Illustrations.

Of course.

And if that which is cold were imperishable, when the warm principle came attacking the snow, must not the snow have retired whole and unmelted — for it could never have perished, nor could it have remained and admitted the heat?

True, he said.

Again, if the uncooling or warm principle were imperishable, the fire when assailed by cold would not have perished

Phaedo.

SOCRATES, CEBES.

or have been extinguished, but would have gone away unaffected?

Certainly, he said.

And the same may be said of the immortal: if the immortal is also imperishable, the soul when attacked by death cannot perish; for the preceding argument shows that the soul will not admit of death, or ever be dead, any more than three or the odd number will admit of the even, or fire, or the heat in the fire, of the cold. Yet a person may say: 'But although the odd will not become even at the approach of the even, why may not the odd perish and the even take the place of the odd?' Now to him who makes this objection, we cannot answer that the odd principle is imperishable; for this has not been acknowledged, but if this had been acknowledged, there would have been no difficulty in contending that at the approach of the even the odd principle and the number three took their departure; and the same argument would have held good of fire and heat and any other thing.

Very true.

The immortal is imperishable, and therefore the soul is imperishable.

And the same may be said of the immortal: if the immortal is also imperishable, then the soul will be imperishable as well as immortal; but if not, some other proof of her imperishableness will have to be given.

No other proof is needed, he said; for if the immortal, being eternal, is liable to perish, then nothing is imperishable.

Yes, replied Socrates, and yet all men will agree that God, and the essential form of life, and the immortal in general, will never perish.

Yes, all men, he said — that is true; and what is more, gods, if I am not mistaken, as well as men.

Seeing then that the immortal is indestructible, must not the soul, if she is immortal, be also imperishable?

Most certainly.

Then when death attacks a man, the mortal portion of him may be supposed to die, but the immortal retires at the approach of death and is preserved safe and sound?

True.

At death the soul retires into another world.

Then, Cebes, beyond question, the soul is immortal and imperishable, and our souls will truly exist in another world! 107

I am convinced, Socrates, said Cebes, and have nothing more to object; but if my friend Simmias, or any one else, has any further objection to make, he had better speak out, and not keep silence, since I do not know to what other season he can defer the discussion, if there is anything which he wants to say or to have said.

But I have nothing more to say, replied Simmias; nor can I see any reason for doubt after what has been said. But I still feel and cannot help feeling uncertain in my own mind, when I think of the greatness of the subject and the feebleness of man.

Yes, Simmias, replied Socrates, that is well said: and I may add that first principles, even if they appear certain, should be carefully considered; and when they are satisfactorily ascertained, then, with a sort of hesitating confidence in human reason, you may, I think, follow the course of the argument; and if that be plain and clear, there will be no need for any further enquiry.

Very true.

'Wherefore, seeing all these things, what manner of persons ought we to be?'

But then, O my friends, he said, if the soul is really immortal, what care should be taken of her, not only in respect of the portion of time which is called life, but of eternity! And the danger of neglecting her from this point of view does indeed appear to be awful. If death had only been the end of all, the wicked would have had a good bargain in dying, for they would have been happily quit not only of their body, but of their own evil together with their souls. But now, inasmuch as the soul is manifestly immortal, there is no release or salvation from evil except the attainment of the highest virtue and wisdom. For the soul when on her progress to the world below takes nothing with her but nurture and education; and these are said greatly to benefit or greatly to injure the departed, at the very beginning of his journey thither.

The attendant genius of each brings him after death to the judgment.

For after death, as they say, the genius of each individual, to whom he belonged in life, leads him to a certain place in which the dead are gathered together, whence after judgment has been given they pass into the world below, following the guide, who is appointed to conduct them from this world to the other: and when they have there received their

Phaedo.

SOCRATES, SIMMIAS.

due and remained their time, another guide brings them back again after many revolutions of ages. Now this way to the other world is not, as Aeschylus says in the Telephus, a 108
single and straight path — if that were so no guide would be needed, for no one could miss it; but there are many partings of the road, and windings, as I infer from the rites and sacrifices which are offered to the gods below in places where three ways meet on earth. The wise and orderly soul follows in the straight path and is conscious of her surroundings; but the soul which desires the body, and which, as I was relating before, has long been fluttering about the lifeless frame and the world of sight, is after many struggles and many sufferings hardly and with violence carried away by her attendant genius; and when she arrives at the place where the other souls are gathered, if she be impure and have done impure deeds, whether foul murders or other crimes which are the brothers of these, and the works of brothers in crime — from that soul every one flees and turns away; no one will be her companion, no one her guide, but alone she wanders in extremity of evil until certain times are fulfilled, and when they are fulfilled, she is borne irresistibly to her own fitting habitation; as every pure and just soul which has passed through life in the company and under the guidance of the gods has also her own proper home.

The different destinies of pure and impure souls.

Description of the divers regions of earth.

Now the earth has divers wonderful regions, and is indeed in nature and extent very unlike the notions of geographers, as I believe on the authority of one who shall be nameless.

What do you mean, Socrates? said Simmias. I have myself heard many descriptions of the earth, but I do not know, and I should very much like to know, in which of these you put faith.

And I, Simmias, replied Socrates, if I had the art of Glaucus would tell you; although I know not that the art of Glaucus could prove the truth of my tale, which I myself should never be able to prove, and even if I could, I fear, Simmias, that my life would come to an end before the argument was completed. I may describe to you, however, the form and regions of the earth according to my conception of them.

That, said Simmais, will be enough.

Well then, he said, my conviction is, that the earth is a round body in the centre of the heavens, and therefore has
109 no need of air or of any similar force to be a support, but is kept there and hindered from falling or inclining any way by the equability of the surrounding heaven and by her own equipoise. For that which, being in equipoise, is in the centre of that which is equably diffused, will not incline any way in any degree, but will always remain in the same state and not deviate. And this is my first notion.

The earth is a round body kept in her place by equipoise and the equability of the surrounding element.

Which is surely a correct one, said Simmias.

Also I believe that the earth is very vast, and that we who dwell in the region extending from the river Phasis to the Pillars of Heracles inhabit a small portion only about the sea, like ants or frogs about a marsh, and that there are other inhabitants of many other like places; for everywhere on the face of the earth there are hollows of various forms and sizes, into which the water and the mist and the lower air collect. But the true earth is pure and situated in the pure heaven — there are the stars also; and it is the heaven which is commonly spoken of by us as the ether, and of which our own earth is the sediment gathering in the hollows beneath. But we who live in these hollows are deceived into the notion that we are dwelling above on the surface of the earth; which is just as if a creature who was at the bottom of the sea were to fancy that he was on the surface of the water, and that the sea was the heaven through which he saw the sun and the other stars, he having never come to the surface by reason of his feebleness and sluggishness, and having never lifted up his head and seen, nor ever heard from one who had seen, how much purer and fairer the world above is than his own. And such is exactly our case: for we are dwelling in a hollow of the earth, and fancy that we are on the surface; and the air we call the heaven, in which we imagine that the stars move. But the fact is, that owing to our feebleness and sluggishness we are prevented from reaching the surface of the air: for if any man could arrive at the exterior limit, or take the wings of a bird and come to the top, then like a fish who puts his head out of the water and sees this world, he would see a world beyond; and, if the nature of man could sustain the sight, he would acknowledge that this other world was the

Mankind lives only in a small portion of the earth at a distance from the surface.

If, like fishes who now and then put their heads out of the water, we could rise to the top of the atmo-

Phaedo.

SOCRATES, SIMMIAS.

sphere, we should behold the true heaven and the true earth.

place of the true heaven and the true light and the true earth. For our earth, and the stones, and the entire region which 110
surrounds us, are spoilt and corroded, as in the sea all things are corroded by the brine, neither is there any noble or perfect growth, but caverns only, and sand, and an endless slough of mud; and even the shore is not to be compared to the fairer sights of this world. And still less is this our world to be compared with the other. Of that upper earth which is under the heaven, I can tell you a charming tale, Simmias, which is well worth hearing.

And we, Socrates, replied Simmias, shall be charmed to listen to you.

The upper earth is in every respect far fairer than the lower. There is gold and purple, and pure light, and trees and flowers lovelier far than our own, and all the stones are more precious than our precious stones.

The tale, my friend, he said, is as follows:—In the first place, the earth, when looked at from above, is in appearance streaked like one of those balls which have leather coverings in twelve pieces, and is decked with various colours, of which the colours used by painters on earth are in a manner samples. But there the whole earth is made up of them, and they are brighter far and clearer than ours; there is a purple of wonderful lustre, also the radiance of gold, and the white which is in the earth is whiter than any chalk or snow. Of these and other colours the earth is made up, and they are more in number and fairer than the eye of man has ever seen; the very hollows (of which I was speaking) filled with air and water have a colour of their own, and are seen like light gleaming amid the diversity of the other colours, so that the whole presents a single and continuous appearance of variety in unity. And in this fair region everything that grows — trees, and flowers, and fruits — are in a like degree fairer than any here; and there are hills, having stones in them in a like degree smoother, and more transparent, and fairer in colour than our highly-valued emeralds and sardonyxes and jaspers, and other gems, which are but minute fragments of them: for there all the stones are like our precious stones, and fairer still[1]. The reason is, that they are pure, and not, like our precious stones, infected or corroded by the corrupt briny elements which coagulate among us, and which breed foulness and disease both in earth and stones, as well as in animals and

[1] Cp. Rev., esp. c. xxi. v. 18 ff.

plants. They are the jewels of the upper earth, which also
111 shines with gold and silver and the like, and they are set in the light of day and are large and abundant and in all places, making the earth a sight to gladden the beholder's eye. And there are animals and men, some in a middle region, others dwelling about the air as we dwell about the sea; others in islands which the air flows round, near the continent; and in a word, the air is used by them as the water and the sea are by us, and the ether is to them what the air is to us. Moreover, the temperament of their seasons is such that they have no disease, and live much longer than we do, and have sight and hearing and smell, and all the other senses, in far greater perfection, in the same proportion that air is purer than water or the ether than air. Also they have temples and sacred places in which the gods really dwell, and they hear their voices and receive their answers, and are conscious of them and hold converse with them; and they see the sun, moon, and stars as they truly are, and their other blessedness is of a piece with this.

The blessed gods dwell there and hold converse with the inhabitants.

Such is the nature of the whole earth, and of the things which are around the earth; and there are divers regions in the hollows on the face of the globe everywhere, some of them deeper and more extended than that which we inhabit, others deeper but with a narrower opening than ours, and some are shallower and also wider. All have numerous perforations, and there are passages broad and narrow in the interior of the earth, connecting them with one another; and there flows out of and into them, as into basins, a vast tide of water, and huge subterranean streams of perennial rivers, and springs hot and cold, and a great fire, and great rivers of fire, and streams of liquid mud, thin or thick (like the rivers of mud in Sicily, and the lava streams which follow them), and the regions about which they happen to flow are filled up with them. And there is a swinging or see-saw in the interior of the earth which moves all this up and down, and is due to the following cause:—There is a chasm which is the vastest of them all, and pierces right
112 through the whole earth; this is that chasm which Homer describes in the words,—

Description of the interior of the earth and of the subterranean seas and rivers.

'Far off, where is the inmost depth beneath the earth;'

Phaedo.
SOCRATES.

and which he in other places, and many other poets, have called Tartarus. And the see-saw is caused by the streams flowing into and out of this chasm, and they each have the nature of the soil through which they flow. And the reason why the streams are always flowing in and out, is that the watery element has no bed or bottom, but is swinging and surging up and down, and the surrounding wind and air do the same; they follow the water up and down, hither and thither, over the earth — just as in the act of respiration the air is always in process of inhalation and exhalation; — and the wind swinging with the water in and out produces fearful and irresistible blasts: when the waters retire with a rush into the lower parts of the earth, as they are called, they flow through the earth in those regions, and fill them up like water raised by a pump, and then when they leave those regions and rush back hither, they again fill the hollows here, and when these are filled, flow through subterranean channels and find their way to their several places, forming seas, and lakes, and rivers, and springs. Thence they again enter the earth, some of them making a long circuit into many lands, others going to a few places and not so distant; and again fall into Tartarus, some at a point a good deal lower than that at which they rose, and others not much lower, but all in some degree lower than the point from which they came. And some burst forth again on the opposite side, and some on the same side, and some wind round the earth with one or many folds like the coils of a serpent, and descend as far as they can, but always return and fall into the chasm. The rivers flowing in either direction can descend only to the centre and no further, for opposite to the rivers is a precipice.

Oceanus, Acheron, Pyriphlegethon, and Styx (or Cocytus).

Now these rivers are many, and mighty, and diverse, and there are four principal ones, of which the greatest and outermost is that called Oceanus, which flows round the earth in a circle; and in the opposite direction flows Acheron, which passes under the earth through desert places into the 113
Acherusian lake: this is the lake to the shores of which the souls of the many go when they are dead, and after waiting an appointed time, which is to some a longer and to some a shorter time, they are sent back to be born again as animals.

The third river passes out between the two, and near the place of outlet pours into a vast region of fire, and forms a lake larger than the Mediterranean Sea, boiling with water and mud; and proceeding muddy and turbid, and winding about the earth, comes, among other places, to the extremities of the Acherusian lake, but mingles not with the waters of the lake, and after making many coils about the earth plunges into Tartarus at a deeper level. This is that Pyriphlegethon, as the stream is called, which throws up jets of fire in different parts of the earth. The fourth river goes out on the opposite side, and falls first of all into a wild and savage region, which is all of a dark blue colour, like lapis lazuli; and this is that river which is called the Stygian river, and falls into and forms the Lake Styx, and after falling into the lake and receiving strange powers in the waters, passes under the earth, winding round in the opposite direction, and comes near the Acherusian lake from the opposite side to Pyriphlegethon. And the water of this river too mingles with no other, but flows round in a circle and falls into Tartarus over against Pyriphlegethon; and the name of the river, as the poets say, is Cocytus. *Phaedo.* SOCRATES.

Such is the nature of the other world; and when the dead arrive at the place to which the genius of each severally guides them, first of all, they have sentence passed upon them, as they have lived well and piously or not. And those who appear to have lived neither well nor ill, go to the river Acheron, and embarking in any vessels which they may find, are carried in them to the lake, and there they dwell and are purified of their evil deeds, and having suffered the penalty of the wrongs which they have done to others, they are absolved, and receive the rewards of their good deeds, each of them according to his deserts. But those who appear to be incurable by reason of the greatness of their crimes — who have committed many and terrible deeds of sacrilege, murders foul and violent, or the like — such are hurled into Tartarus which is their suitable destiny, and they never come out. Those again who have committed crimes, which, although great, are not irremediable — who in a moment of anger, for example, have done some violence to a father or a mother, and have The judgment of the dead.

Phaedo.

SOCRATES.

repented for the remainder of their lives, or, who have taken 114
the life of another under the like extenuating circumstances — these are plunged into Tartarus, the pains of which they are compelled to undergo for a year, but at the end of the year the wave casts them forth — mere homicides by way of Cocytus, parricides and matricides by Pyriphlegethon — and they are borne to the Acherusian lake, and there they lift up their voices and call upon the victims whom they have slain or wronged, to have pity on them, and to be kind to them, and let them come out into the lake. And if they prevail, then they come forth and cease from their troubles; but if not, they are carried back again into Tartarus and from thence into the rivers unceasingly, until they obtain mercy from those whom they have wronged: for that is the sentence inflicted upon them by their judges. Those too who have been pre-eminent for holiness of life are released from this earthly prison, and go to their pure home which is above, and dwell in the purer earth; and of these, such as have duly purified themselves with philosophy live henceforth altogether without the body, in mansions fairer still, which may not be described, and of which the time would fail me to tell.

Wherefore, Simmias, seeing all these things, what ought not we to do that we may obtain virtue and wisdom in this life? Fair is the prize, and the hope great!

These descriptions are not true to the letter, but something like them is true.

A man of sense ought not to say, nor will I be very confident, that the description which I have given of the soul and her mansions is exactly true. But I do say that, inasmuch as the soul is shown to be immortal, he may venture to think, not improperly or unworthily, that something of the kind is true. The venture is a glorious one, and he ought to comfort himself with words like these, which is the reason why I lengthen out the tale. Wherefore, I say, let a man be of good cheer about his soul, who having cast away the pleasures and ornaments of the body as alien to him and working harm rather than good, has sought after the pleasures of knowledge; and has arrayed the soul, not in some foreign attire, but in her own proper jewels, temperance, and justice, and courage, and nobility, and truth — in these adorned she 115
is ready to go on her journey to the world below, when her

hour comes. You, Simmias and Cebes, and all other men, will depart at some time or other. Me already, as a tragic poet would say, the voice of fate calls. Soon I must drink the poison; and I think that I had better repair to the bath first, in order that the women may not have the trouble of washing my body after I am dead. *Phaedo.* SOCRATES, CRITO.

When he had done speaking, Crito said: And have you any commands for us, Socrates — anything to say about your children, or any other matter in which we can serve you?

Nothing particular, Crito, he replied: only, as I have always told you, take care of yourselves; that is a service which you may be ever rendering to me and mine and to all of us, whether you promise to do so or not. But if you have no thought for yourselves, and care not to walk according to the rule which I have prescribed for you, not now for the first time, however much you may profess or promise at the moment, it will be of no avail.

We will do our best, said Crito: And in what way shall we bury you?

In any way that you like; but you must get hold of me, and take care that I do not run away from you. Then he turned to us, and added with a smile:— I cannot make Crito believe that I am the same Socrates who have been talking and conducting the argument; he fancies that I am the other Socrates whom he will soon see, a dead body — and he asks, How shall he bury me? And though I have spoken many words in the endeavour to show that when I have drunk the poison I shall leave you and go to the joys of the blessed,— these words of mine, with which I was comforting you and myself, have had, as I perceive, no effect upon Crito. And therefore I want you to be surety for me to him now, as at the trial he was surety to the judges for me: but let the promise be of another sort; for he was surety for me to the judges that I would remain, and you must be my surety to him that I shall not remain, but go away and depart; and then he will suffer less at my death, and not be grieved when he sees my body being burned or buried. I would not have him sorrow at my hard lot, or say at the burial, Thus we lay out Socrates, or, Thus we follow him to the grave or bury him; for false words are not only evil in

The dead body which remains is not the true Socrates.

Phaedo.

SOCRATES, CRITO, THE JAILER.

themselves, but they infect the soul with evil. Be of good cheer then, my dear Crito, and say that you are burying my body only, and do with that whatever is usual, and what you think best. 116

When he had spoken these words, he arose and went into a chamber to bathe; Crito followed him and told us to wait. So we remained behind, talking and thinking of the subject of discourse, and also of the greatness of our sorrow; he was like a father of whom we were being bereaved, and we were about to pass the rest of our lives as orphans.

He takes leave of his family.

When he had taken the bath his children were brought to him — (he had two young sons and an elder one); and the women of his family also came, and he talked to them and gave them a few directions in the presence of Crito; then he dismissed them and returned to us.

Now the hour of sunset was near, for a good deal of time had passed while he was within. When he came out, he sat down with us again after his bath, but not much was said.

The humanity of the jailer.

Soon the jailer, who was the servant of the Eleven, entered and stood by him, saying: — To you, Socrates, whom I know to be the noblest and gentlest and best of all who ever came to this place, I will not impute the angry feelings of other men, who rage and swear at me, when, in obedience to the authorities, I bid them drink the poison — indeed, I am sure that you will not be angry with me; for others, as you are aware, and not I, are to blame. And so fare you well, and try to bear lightly what must needs be — you know my errand. Then bursting into tears he turned away and went out.

Socrates looked at him and said: I return your good wishes, and will do as you bid. Then turning to us, he said, How charming the man is: since I have been in prison he has always been coming to see me, and at times he would talk to me, and was as good to me as could be, and now see how generously he sorrows on my account. We must do as he says, Crito; and therefore let the cup be brought, if the poison is prepared: if not, let the attendant prepare some.

Crito would detain Socrates a little while.

Yet, said Crito, the sun is still upon the hill-tops, and I know that many a one has taken the draught late, and after the announcement has been made to him, he has eaten and

drunk, and enjoyed the society of his beloved; do not hurry — there is time enough.

Phaedo.

SOCRATES, CRITO, THE JAILER.

Socrates said: Yes, Crito, and they of whom you speak are right in so acting, for they think that they will be gainers by the delay; but I am right in not following their example, for I do not think that I should gain anything by
117 drinking the poison a little later; I should only be ridiculous in my own eyes for sparing and saving a life which is already forfeit. Please then to do as I say, and not to refuse me.

Socrates thinks that there is nothing to be gained by delay.

Crito made a sign to the servant, who was standing by; and he went out, and having been absent for some time, returned with the jailer carrying the cup of poison. Socrates said: You, my good friend, who are experienced in these matters, shall give me directions how I am to proceed. The man answered: You have only to walk about until your legs are heavy, and then to lie down, and the poison will act. At the same time he handed the cup to Socrates, who in the easiest and gentlest manner, without the least fear or change of colour or feature, looking at the man with all his eyes, Echecrates, as his manner was, took the cup and said: What do you say about making a libation out of this cup to any god? May I, or not? The man answered: We only prepare, Socrates, just so much as we deem enough. I understand, he said: but I may and must ask the gods to prosper my journey from this to the other world — even so — and so be it according to my prayer. Then raising the cup to his lips, quite readily and cheerfully he drank off the poison. And hitherto most of us had been able to control our sorrow; but now when we saw him drinking, and saw too that he had finished the draught, we could no longer forbear, and in spite of myself my own tears were flowing fast; so that I covered my face and wept, not for him, but at the thought of my own calamity in having to part from such a friend. Nor was I the first; for Crito, when he found himself unable to restrain his tears, had got up, and I followed; and at that moment, Apollodorus, who had been weeping all the time, broke out in a loud and passionate cry which made cowards of us all. Socrates alone retained his calmness: What is this strange outcry? he said. I sent away the women mainly in order that they might not misbehave in this way, for I have been

The poison is brought.

He drinks the poison.

The company of friends are unable to control themselves.

Says Socrates, 'A man should die in peace.'

Phaedo.

SOCRATES, CRITO, PHAEDO.

told that a man should die in peace. Be quiet then, and have patience. When we heard his words we were ashamed, and refrained our tears; and he walked about until, as he said, his legs began to fail, and then he lay on his back, according to the directions, and the man who gave him the poison now and then looked at his feet and legs; and after a while he pressed his foot hard, and asked him if he could feel; and he said, No; and then his leg, and so upwards and 118
upwards, and showed us that he was cold and stiff. And he felt them himself, and said: When the poison reaches the heart, that will be the end. He was beginning to grow cold about the groin, when he uncovered his face, for he had covered himself up, and said — they were his last words — he said: Crito, I owe a cock to Asclepius; will you remember to pay the debt? The debt shall be paid, said Crito; is there anything else? There was no answer to this question; but in a minute or two a movement was heard, and the attendants uncovered him; his eyes were set, and Crito closed his eyes and mouth.

The debt to Asclepius.

Such was the end, Echecrates, of our friend; concerning whom I may truly say, that of all the men of his time whom I have known, he was the wisest and justest and best.

GORGIAS.

INTRODUCTION.

IN several of the dialogues of Plato, doubts have arisen among his interpreters as to which of the various subjects discussed in them is the main thesis. The speakers have the freedom of conversation; no severe rules of art restrict them, and sometimes we are inclined to think, with one of the dramatis personae in the Theaetetus (177 C), that the digressions have the greater interest. Yet in the most irregular of the dialogues there is also a certain natural growth or unity; the beginning is not forgotten at the end, and numerous allusions and references are interspersed, which form the loose connecting links of the whole. We must not neglect this unity, but neither must we attempt to confine the Platonic dialogue on the Procrustean bed of a single idea. (Cp. Introduction to the Phaedrus.)

Two tendencies seem to have beset the interpreters of Plato in this matter. First, they have endeavoured to hang the dialogues upon one another by the slightest threads; and have thus been led to opposite and contradictory assertions respecting their order and sequence. The mantle of Schleiermacher has descended upon his successors, who have applied his method with the most various results. The value and use of the method has been hardly, if at all, examined either by him or them. Secondly, they have extended almost indefinitely the scope of each separate dialogue; in this way they think that they have escaped all difficulties, not seeing that what they have gained in generality they have lost in truth and distinctness. Metaphysical conceptions easily pass into one another; and the simpler notions of antiquity, which we can only realize by an effort, imperceptibly blend with the more familiar theories of modern philosophers. An eye for proportion is needed (his own art of measuring) in the study of Plato, as well as of other great artists. We may readily admit that the moral antithesis of

good and pleasure, or the intellectual antithesis of knowledge and opinion, being an appearance, are never far off in a Platonic discussion. But because they are in the background, we should not bring them into the foreground, or expect to discern them equally in all the dialogues.

There may be some advantage in drawing out a little the main outlines of the building; but the use of this is limited, and may be easily exaggerated. We may give Plato too much system, and alter the natural form and connection of his thoughts. Under the idea that his dialogues are finished works of art, we may find a reason for everything, and lose the highest characteristic of art, which is simplicity. Most great works receive a new light from a new and original mind. But whether these new lights are true or only suggestive, will depend on their agreement with the spirit of Plato, and the amount of direct evidence which can be urged in support of them. When a theory is running away with us, criticism does a friendly office in counselling moderation, and recalling us to the indications of the text.

Like the Phaedrus, the Gorgias has puzzled students of Plato by the appearance of two or more subjects. Under the cover of rhetoric higher themes are introduced; the argument expands into a general view of the good and evil of man. After making an ineffectual attempt to obtain a sound definition of his art from Gorgias, Socrates assumes the existence of a universal art of flattery or simulation having several branches; — this is the genus of which rhetoric is only one, and not the highest species. To flattery is opposed the true and noble art of life which he who possesses seeks always to impart to others, and which at last triumphs, if not here, at any rate in another world. These two aspects of life and knowledge appear to be the two leading ideas of the dialogue. The true and the false in individuals and states, in the treatment of the soul as well as of the body, are conceived under the forms of true and false art. In the development of this opposition there arise various other questions, such as the two famous paradoxes of Socrates (paradoxes as they are to the world in general, ideals as they may be more worthily called): (1) that to do is worse than to suffer evil; and (2) that when a man has done evil he had better be punished than unpunished; to which may be added (3) a third Socratic paradox or ideal, that bad men do what

they think best, but not what they desire, for the desire of all is towards the good. That pleasure is to be distinguished from good is proved by the simultaneousness of pleasure and pain, and by the possibility of the bad having in certain cases pleasures as great as those of the good, or even greater. Not merely rhetoricians, but poets, musicians, and other artists, the whole tribe of statesmen, past as well as present, are included in the class of flatterers. The true and false finally appear before the judgment-seat of the gods below.

The dialogue naturally falls into three divisions, to which the three characters of Gorgias, Polus, and Callicles respectively correspond; and the form and manner change with the stages of the argument. Socrates is deferential towards Gorgias, playful and yet cutting in dealing with the youthful Polus, ironical and sarcastic in his encounter with Callicles. In the first division the question is asked — What is rhetoric? To this there is no answer given, for Gorgias is soon made to contradict himself by Socrates, and the argument is transferred to the hands of his disciple Polus, who rushes to the defence of his master. The answer has at last to be given by Socrates himself, but before he can even explain his meaning to Polus, he must enlighten him upon the great subject of shams or flatteries. When Polus finds his favourite art reduced to the level of cookery, he replies that at any rate rhetoricians, like despots, have great power. Socrates denies that they have any real power, and hence arise the three paradoxes already mentioned. Although they are strange to him, Polus is at last convinced of their truth; at least, they seem to him to follow legitimately from the premises. Thus the second act of the dialogue closes. Then Callicles appears on the scene, at first maintaining that pleasure is good, and that might is right, and that law is nothing but the combination of the many weak against the few strong. When he is confuted he withdraws from the argument, and leaves Socrates to arrive at the conclusion by himself. The conclusion is that there are two kinds of statesmanship, a higher and a lower — that which makes the people better, and that which only flatters them, and he exhorts Callicles to choose the higher. The dialogue terminates with a mythus of a final judgment, in which there will be no more flattery or disguise, and no further use for the teaching of rhetoric.

Gorgias. INTRODUCTION.

The characters of the three interlocutors also correspond to the parts which are assigned to them. Gorgias is the great rhetorician, now advanced in years, who goes from city to city displaying his talents, and is celebrated throughout Greece. Like all the Sophists in the dialogues of Plato, he is vain and boastful, yet he has also a certain dignity, and is treated by Socrates with considerable respect. But he is no match for him in dialectics. Although he has been teaching rhetoric all his life, he is still incapable of defining his own art. When his ideas begin to clear up, he is unwilling to admit that rhetoric can be wholly separated from justice and injustice, and this lingering sentiment of morality, or regard for public opinion, enables Socrates to detect him in a contradiction. Like Protagoras, he is described as of a generous nature; he expresses his approbation of Socrates' manner of approaching a question; he is quite 'one of Socrates' sort, ready to be refuted as well as to refute,' and very eager that Callicles and Socrates should have the game out. He knows by experience that rhetoric exercises great influence over other men, but he is unable to explain the puzzle how rhetoric can teach everything and know nothing.

Polus is an impetuous youth, a runaway 'colt,' as Socrates describes him, who wanted originally to have taken the place of Gorgias under the pretext that the old man was tired, and now avails himself of the earliest opportunity to enter the lists. He is said to be the author of a work on rhetoric (462 C), and is again mentioned in the Phaedrus (267 B), as the inventor of balanced or double forms of speech (cp. Gorg. 448 C, 467 C; Symp. 185 C). At first he is violent and ill-mannered, and is angry at seeing his master overthrown. But in the judicious hands of Socrates he is soon restored to good-humour, and compelled to assent to the required conclusion. Like Gorgias, he is overthrown because he compromises; he is unwilling to say that to do is fairer or more honourable than to suffer injustice. Though he is fascinated by the power of rhetoric, and dazzled by the splendour of success, he is not insensible to higher arguments. Plato may have felt that there would be an incongruity in a youth maintaining the cause of injustice against the world. He has never heard the other side of the question, and he listens to the paradoxes, as they appear to him, of Socrates with evident astonishment. He can hardly understand the meaning of Archelaus being miserable, or of rhetoric

being only useful in self-accusation. When the argument with him has fairly run out,

Callicles, in whose house they are assembled, is introduced on the stage: he is with difficulty convinced that Socrates is in earnest; for if these things are true, then, as he says with real emotion, the foundations of society are upside down. In him another type of character is represented; he is neither sophist nor philosopher, but man of the world, and an accomplished Athenian gentleman. He might be described in modern language as a cynic or materialist, a lover of power and also of pleasure, and unscrupulous in his means of attaining both. There is no desire on his part to offer any compromise in the interests of morality; nor is any concession made by him. Like Thrasymachus in the Republic, though he is not of the same weak and vulgar class, he consistently maintains that might is right. His great motive of action is political ambition; in this he is characteristically Greek. Like Anytus in the Meno, he is the enemy of the Sophists; but favours the new art of rhetoric, which he regards as an excellent weapon of attack and defence. He is a despiser of mankind as he is of philosophy, and sees in the laws of the state only a violation of the order of nature, which intended that the stronger should govern the weaker (cp. Rep. ii. 358–360). Like other men of the world who are of a speculative turn of mind, he generalizes the bad side of human nature, and has easily brought down his principles to his practice. Philosophy and poetry alike supply him with distinctions suited to his view of human life. He has a good will to Socrates, whose talents he evidently admires, while he censures the puerile use which he makes of them. He expresses a keen intellectual interest in the argument. Like Anytus, again, he has a sympathy with other men of the world; the Athenian statesmen of a former generation, who showed no weakness and made no mistakes, such as Miltiades, Themistocles, Pericles, are his favourites. His ideal of human character is a man of great passions and great powers, which he has developed to the utmost, and which he uses in his own enjoyment and in the government of others. Had Critias been the name instead of Callicles, about whom we know nothing from other sources, the opinions of the man would have seemed to reflect the history of his life.

And now the combat deepens. In Callicles, far more than in any

Gorgias. INTRODUCTION.

sophist or rhetorician, is concentrated the spirit of evil against which Socrates is contending, the spirit of the world, the spirit of the many contending against the one wise man, of which the Sophists, as he describes them in the Republic, are the imitators rather than the authors, being themselves carried away by the great tide of public opinion. Socrates approaches his antagonist warily from a distance, with a sort of irony which touches with a light hand both his personal vices (probably in allusion to some scandal of the day) and his servility to the populace. At the same time, he is in most profound earnest, as Chaerephon remarks. Callicles soon loses his temper, but the more he is irritated, the more provoking and matter of fact does Socrates become. A repartee of his which appears to have been really made to the 'omniscient' Hippias, according to the testimony of Xenophon (Mem. iv. 4, 6, 10), is introduced (490 E). He is called by Callicles a popular declaimer, and certainly shows that he has the power, in the words of Gorgias, of being 'as long as he pleases,' or 'as short as he pleases' (cp. Protag. 336 D). Callicles exhibits great ability in defending himself and attacking Socrates, whom he accuses of trifling and word-splitting; he is scandalized (p. 494) that the legitimate consequences of his own argument should be stated in plain terms; after the manner of men of the world, he wishes to preserve the decencies of life. But he cannot consistently maintain the bad sense of words; and getting confused between the abstract notions of better, superior, stronger, he is easily turned round by Socrates, and only induced to continue the argument by the authority of Gorgias. Once, when Socrates is describing the manner in which the ambitious citizen has to identify himself with the people, he partially recognizes the truth of his words.

The Socrates of the Gorgias may be compared with the Socrates of the Protagoras and Meno. As in other dialogues, he is the enemy of the Sophists and rhetoricians; and also of the statesmen, whom he regards as another variety of the same species. His behaviour is governed by that of his opponents; the least forwardness or egotism on their part is met by a corresponding irony on the part of Socrates. He must speak, for philosophy will not allow him to be silent. He is indeed more ironical and provoking than in any other of Plato's writings: for he is 'fooled to the top of his bent' by the worldliness of Callicles. But he is also more deeply

in earnest. He rises higher than even in the Phaedo and Crito: at first enveloping his moral convictions in a cloud of dust and dialectics, he ends by losing his method, his life, himself, in them. As in the Protagoras and Phaedrus, throwing aside the veil of irony, he makes a speech, but, true to his character, not until his adversary has refused to answer any more questions. The presentiment of his own fate is hanging over him. He is aware that Socrates, the single real teacher of politics, as he ventures to call himself, cannot safely go to war with the whole world, and that in the courts of earth he will be condemned. But he will be justified in the world below. Then the position of Socrates and Callicles will be reversed; all those things 'unfit for ears polite' which Callicles has prophesied as likely to happen to him in this life, the insulting language, the box on the ears, will recoil upon his assailant. (Compare Rep. x. 613, D, E, and the similar reversal of the position of the lawyer and the philosopher in the Theaetetus, 173–176.)

There is an interesting allusion to his own behaviour at the trial of the generals after the battle of Arginusae, which he ironically attributes to his ignorance of the manner in which a vote of the assembly should be taken (473 E). This is said to have happened 'last year' (B. C. 406), and therefore the assumed date of the dialogue has been fixed at 405 B. C., when Socrates would already have been an old man. The date is clearly marked, but is scarcely reconcilable with another indication of time, viz. the 'recent' usurpation of Archelaus, which occurred in the year 413 (470 D); and still less with the 'recent' death (503 B) of Pericles, who really died twenty-four years previously (429 B. C.) and is afterwards reckoned among the statesmen of a past age (cp. 517 A); or with the mention of Nicias, who died in 413, and is nevertheless spoken of as a living witness (472 A, B). But we shall hereafter have reason to observe, that although there is a general consistency of times and persons in the Dialogues of Plato, a precise dramatic date is an invention of his commentators (Preface to Republic, p. ix).

The conclusion of the Dialogue is remarkable, (1) for the truly characteristic declaration of Socrates (p. 509 A) that he is ignorant of the true nature and bearing of these things, while he affirms at the same time that no one can maintain any other view without

Gorgias.
INTRODUCTION.

being ridiculous. The profession of ignorance reminds us of the earlier and more exclusively Socratic Dialogues. But neither in them, nor in the Apology, nor in the Memorabilia of Xenophon, does Socrates express any doubt of the fundamental truths of morality. He evidently regards this 'among the multitude of questions' which agitate human life 'as the principle which alone remains unshaken' (527 B). He does not insist here, any more than in the Phaedo, on the literal truth of the myth, but only on the soundness of the doctrine which is contained in it, that doing wrong is worse than suffering, and that a man should be rather than seem; for the next best thing to a man's being just is that he should be corrected and become just; also that he should avoid all flattery, whether of himself or of others; and that rhetoric should be employed for the maintenance of the right only. The revelation of another life is a recapitulation of the argument in a figure.

(2) Socrates makes the singular remark, that he is himself the only true politician of his age. In other passages, especially in the Apology, he disclaims being a politician at all. There he is convinced that he or any other good man who attempted to resist the popular will would be put to death before he had done any good to himself or others. Here he anticipates such a fate for himself, from the fact that he is 'the only man of the present day who performs his public duties at all' (521 D). The two points of view are not really inconsistent, but the difference between them is worth noticing: Socrates is and is not a public man. Not in the ordinary sense, like Alcibiades or Pericles, but in a higher one; and this will sooner or later entail the same consequences on him. He cannot be a private man if he would; neither can he separate morals from politics. Nor is he unwilling to be a politician, although he foresees the dangers which await him; but he must first become a better and wiser man, for he as well as Callicles is in a state of perplexity and uncertainty (527 D, E). And yet there is an inconsistency: for should not Socrates too have taught the citizens better than to put him to death (519)?

And now, as he himself says (506 D), we will 'resume the argument from the beginning.'

ANALYSIS.

Socrates, who is attended by his inseparable disciple, Chaere-

Steph. phon, meets Callicles in the streets of Athens. He is informed
447 that he has just missed an exhibition of Gorgias, which he regrets, because he was desirous, not of hearing Gorgias display his rhetoric, but of interrogating him concerning the nature of his art. Callicles proposes that they shall go with him to his own house, where Gorgias is staying. There they find the great
448 rhetorician and his younger friend and disciple Polus.

Soc. Put the question to him, Chaerephon. *Ch.* What question? *Soc.* Who is he?—such a question as would elicit from a man the answer, 'I am a cobbler.' Polus suggests that Gorgias may be tired, and desires to answer for him. 'Who is Gorgias?' asks Chaerephon, imitating the manner of his master Socrates. 'One of the best of men, and a proficient in the best and noblest of experimental arts,' etc., replies Polus, in rhetorical and balanced phrases. Socrates is dissatisfied at the length and unmeaningness of the answer; he tells the disconcerted volunteer that he has mistaken the quality for the nature of the art, and remarks to Gorgias, that Polus has learnt how to make a speech, but not how to answer a question. He wishes that Gorgias would answer him. Gorgias is willing enough, and replies to the question asked by Chaerephon, —that he is a rhetorician, and in Homeric language, 'boasts
449 himself to be a good one.' At the request of Socrates he promises to be brief; for 'he can be as long as he pleases, and as short as he pleases.' Socrates would have him bestow his length on others, and proceeds to ask him a number of questions, which are answered by him to his own great satisfaction, and with a brevity which excites the admiration of Socrates. The result of the discussion may be summed up as follows:—

450 Rhetoric treats of discourse; but music and medicine, and other particular arts, are also concerned with discourse; in what way then does rhetoric differ from them? Gorgias draws a distinction between the arts which deal with words, and the arts which have to do with external actions. Socrates extends this distinction further, and divides all productive arts into two classes: (1) arts which may be carried on in silence; and (2) arts which have to do with words, or in which words are coextensive with action, such as arithmetic, geometry, rhetoric. But still
451 Gorgias could hardly have meant to say that arithmetic was the same as rhetoric. Even in the arts which are concerned with

words there are differences. What then distinguishes rhetoric from the other arts which have to do with words? 'The words which rhetoric uses relate to the best and greatest of human things.' But tell me, Gorgias, what are the best? 'Health first, beauty next, wealth third,' in the words of the old song, or how would you rank them? The arts will come to you in a body, each 452
claiming precedence and saying that her own good is superior to that of the rest — How will you choose between them? 'I should say, Socrates, that the art of persuasion, which gives freedom to all men, and to individuals power in the state, is the greatest 453
good.' But what is the exact nature of this persuasion?— is the persevering retort: You could not describe Zeuxis as a painter, or even as a painter of figures, if there were other painters of figures; neither can you define rhetoric simply as an art of persuasion, because there are other arts which persuade, such as arithmetic, which is an art of persuasion about odd and even numbers. Gorgias is made to see the necessity of a further limitation, and he now defines rhetoric as the art of persuading in 454
the law courts, and in the assembly, about the just and unjust. But still there are two sorts of persuasion: one which gives knowledge, and another which gives belief without knowledge; and knowledge is always true, but belief may be either true or 455
false,— there is therefore a further question: which of the two sorts of persuasion does rhetoric effect in courts of law and assemblies? Plainly that which gives belief and not that which gives knowledge; for no one can impart a real knowledge of such matters to a crowd of persons in a few minutes. And there is another point to be considered:— when the assembly meets to advise about walls or docks or military expeditions, the rhetorician is not taken into counsel, but the architect, or the general. How would Gorgias explain this phenomenon? All who intend to become disciples, of whom there are several in the company, and not Socrates only, are eagerly asking:— About what then will rhetoric teach us to persuade or advise the state?

Gorgias illustrates the nature of rhetoric by adducing the example of Themistocles, who persuaded the Athenians to build their docks and walls, and of Pericles, whom Socrates himself has heard speaking about the middle wall of the Piraeus. He adds 456
that he has exercised a similar power over the patients of his

brother Herodicus. He could be chosen a physician by the assembly if he pleased, for no physician could compete with a rhetorician in popularity and influence. He could persuade the multitude of anything by the power of his rhetoric; not that the rhetorician ought to abuse this power any more than a boxer
457 should abuse the art of self-defence. Rhetoric is a good thing, but, like all good things, may be unlawfully used. Neither is the teacher of the art to be deemed unjust because his pupils are unjust and make a bad use of the lessons which they have learned from him.

Socrates would like to know before he replies, whether Gorgias will quarrel with him if he points out a slight inconsistency into which he has fallen, or whether he, like himself, is one who loves
458 to be refuted. Gorgias declares that he is quite one of his sort, but fears that the argument may be tedious to the company. The company cheer, and Chaerephon and Callicles exhort them to proceed. Socrates gently points out the supposed inconsistency into which Gorgias appears to have fallen, and which he is inclined to think may arise out of a misapprehension of his own.
459 The rhetorician has been declared by Gorgias to be more persuasive to the ignorant than the physician, or any other expert. And he is said to be ignorant, and this ignorance of his is regarded by Gorgias as a happy condition, for he has escaped the trouble of learning. But is he as ignorant of just and unjust as he
460 is of medicine or building? Gorgias is compelled to admit that if he did not know them previously he must learn them from his teacher as a part of the art of rhetoric. But he who has learned carpentry is a carpenter, and he who has learned music is a musician, and he who has learned justice is just. The rhetorician then must be a just man, and rhetoric is a just thing. But Gorgias has already admitted the opposite of this, viz. that rhetoric may be abused, and that the rhetorician may act unjustly. How is the
461 inconsistency to be explained?

The fallacy of this argument is twofold; for in the first place, a man may know justice and not be just — here is the old confusion of the arts and the virtues; — nor can any teacher be expected to counteract wholly the bent of natural character; and secondly, a man may have a degree of justice, but not sufficient to prevent him from ever doing wrong. Polus is naturally

exasperated at the sophism, which he is unable to detect; of course, he says, the rhetorician, like every one else, will admit that he knows justice (how can he do otherwise when pressed by the interrogations of Socrates?), but he thinks that great want of manners is shown in bringing the argument to such a pass. Socrates ironically replies, that when old men trip, the young set 462
them on their legs again; and he is quite willing to retract, if he can be shown to be in error, but upon one condition, which is that Polus studies brevity. Polus is in great indignation at not being allowed to use as many words as he pleases in the free state of Athens. Socrates retorts, that yet harder will be his own case, if he is compelled to stay and listen to them. After some altercation they agree (cp. Protag. 338), that Polus shall ask and Socrates answer.

'What is the art of Rhetoric?' says Polus. Not an art at all, replies Socrates, but a thing which in your book you affirm to have created art. Polus asks, 'What thing?' and Socrates answers, An experience or routine of making a sort of delight or gratification. 'But is not rhetoric a fine thing?' I have not yet told you what rhetoric is. Will you ask me another question — What is cookery? 'What is cookery?' An experience or routine of making a sort of delight or gratification. Then they are the same, or rather fall under the same class, and rhetoric 463
has still to be distinguished from cookery. 'What is rhetoric?' asks Polus once more. A part of a not very creditable whole, which may be termed flattery, is the reply. 'But what part?' A shadow of a part of politics. This, as might be expected, is wholly unintelligible, both to Gorgias and Polus; and, in order 464
to explain his meaning to them, Socrates draws a distinction between shadows or appearances and realities; e. g. there is real health of body or soul, and the appearance of them; real arts and sciences, and the simulations of them. Now the soul and body have two arts waiting upon them, first the art of politics, which attends on the soul, having a legislative part and a judicial part; and another art attending on the body, which has no generic name, but may also be described as having two divisions, one of which is medicine and the other gymnastic. Corresponding with these four arts or sciences there are four shams or simulations of them, mere experiences, as they may be termed, because they

give no reason of their own existence. The art of dressing up is the sham or simulation of gymnastic, the art of cookery, of medicine;
465 rhetoric is the simulation of justice, and sophistic of legislation. They may be summed up in an arithmetical formula:—

Tiring : gymnastic : : cookery : medicine : : sophistic : legislation.

And,

Cookery : medicine : : rhetoric : the art of justice.

And this is the true scheme of them, but when measured only by the gratification which they procure, they become jumbled together and return to their aboriginal chaos. Socrates apologizes for the
466 length of his speech, which was necessary to the explanation of the subject, and begs Polus not unnecessarily to retaliate on him.

'Do you mean to say that the rhetoricians are esteemed flatterers?' They are not esteemed at all. 'Why, have they not
467 great power, and can they not do whatever they desire?' They have no power, and they only do what they think best, and never what they desire; for they never attain the true object of desire, which is the good. 'As if you, Socrates, would not envy the possessor of despotic power, who can imprison, exile, kill any one whom he
469 pleases.' But Socrates replies that he has no wish to put any one to death; he who kills another, even justly, is not to be envied, and he who kills him unjustly is to be pitied; it is better to suffer than to do injustice. He does not consider that going about with a dagger and putting men out of the way, or setting a house on
470 fire, is real power. To this Polus assents, on the ground that such acts would be punished, but he is still of opinion that evil-doers, if they are unpunished, may be happy enough. He instances Archelaus, son of Perdiccas, the usurper of Macedonia.
471 Does not Socrates think him happy?—Socrates would like to know more about him; he cannot pronounce even the great king to be happy, unless he knows his mental and moral condition. Polus explains that Archelaus was a slave, being the son of a woman who was the slave of Alcetas, brother of Perdiccas king of Macedon—and he, by every species of crime, first murdering his uncle and cousin and then his half-brother, obtained the kingdom. This was very wicked, and yet all the world, including
472 Socrates, would like to have his place. Socrates dismisses the appeal to numbers; Polus, if he will, may summon all the rich

men of Athens, Nicias and his brothers, Aristocrates, the house of Pericles, or any other great family — this is the kind of evidence which is adduced in courts of justice, where truth depends upon numbers. But Socrates employs proof of another sort; his appeal is to one witness only,— that is to say, the person with whom he is speaking; him he will convict out of his own mouth. And he is prepared to show, after his manner, that Archelaus cannot be a wicked man and yet happy. 473

The evil-doer is deemed happy if he escapes, and miserable if he suffers punishment; but Socrates thinks him less miserable if he suffers than if he escapes. Polus is of opinion that such a paradox as this hardly deserves refutation, and is at any rate sufficiently refuted by the fact. Socrates has only to compare the lot of the successful tyrant who is the envy of the world, and of the wretch who, having been detected in a criminal attempt against the state, is crucified or burnt to death. Socrates replies, that if they are both criminal they are both miserable, but that the unpunished is the more miserable of the two. At this Polus laughs outright, which leads Socrates to remark that laughter is a new species of refutation. Polus replies, that he is already refuted; for if he will take the votes of the company, he will find that no one agrees with 474 him. To this Socrates rejoins, that he is not a public man, and (referring to his own conduct at the trial of the generals after the battle of Arginusae) is unable to take the suffrages of any company, as he had shown on a recent occasion; he can only deal with one witness at a time, and that is the person with whom he is arguing. But he is certain that in the opinion of any man to do is worse than to suffer evil.

Polus, though he will not admit this, is ready to acknowledge that to do evil is considered the more foul or dishonourable of the two. But what is fair and what is foul; whether the terms are applied to bodies, colours, figures, laws, habits, studies, must they not be defined with reference to pleasure and utility? Polus 475 assents to this latter doctrine, and is easily persuaded that the fouler of two things must exceed either in pain or in hurt. But the doing cannot exceed the suffering of evil in pain, and therefore must exceed in hurt. Thus doing is proved by the testimony of Polus himself to be worse or more hurtful than suffering.

There remains the other question: Is a guilty man better off

476 when he is punished or when he is unpunished? Socrates replies, that what is done justly is suffered justly: if the act is just, the effect is just; if to punish is just, to be punished is just, and therefore fair, and therefore beneficent; and the benefit is that the soul
477 is improved. There are three evils from which a man may suffer, and which affect him in estate, body, and soul;—these are, poverty, disease, injustice; and the foulest of these is injustice, the evil of the soul, because that brings the greatest hurt. And there are
478 three arts which heal these evils—trading, medicine, justice—and the fairest of these is justice. Happy is he who has never com-
479 mitted injustice, and happy in the second degree he who has been healed by punishment. And therefore the criminal should himself
480 go to the judge as he would to the physician, and purge away his crime. Rhetoric will enable him to display his guilt in proper colours, and to sustain himself and others in enduring the necessary
481 penalty. And similarly if a man has an enemy, he will desire not to punish him, but that he shall go unpunished and become worse and worse, taking care only that he does no injury to himself. These are at least conceivable uses of the art, and no others have been discovered by us.

Here Callicles, who has been listening in silent amazement, asks Chaerephon whether Socrates is in earnest, and on receiving the assurance that he is, proceeds to ask the same question of Socrates himself. For if such doctrines are true, life must have been turned upside down, and all of us are doing the opposite of what we ought to be doing.

Socrates replies in a style of playful irony, that before men can understand one another they must have some common feeling. And such a community of feeling exists between himself and Callicles, for both of them are lovers, and they have both a pair of
482 loves; the beloved of Callicles are the Athenian Demos and Demos the son of Pyrilampes; the beloved of Socrates are Alcibiades and philosophy. The peculiarity of Callicles is that he can never contradict his loves; he changes as his Demos changes in all his opinions; he watches the countenance of both his loves, and repeats their sentiments, and if any one is surprised at his sayings and doings, the explanation of them is, that he is not a free agent, but must always be imitating his two loves. And this is the explanation of Socrates' peculiarities also. He is always repeating

what his mistress, Philosophy, is saying to him, who, unlike his other love, Alcibiades, is ever the same, ever true. Callicles must refute her, or he will never be at unity with himself; and discord in life is far worse than the discord of musical sounds.

Callicles answers, that Gorgias was overthrown because, as Polus said, in compliance with popular prejudice he had admitted that if his pupil did not know justice the rhetorician must teach him; and Polus has been similarly entangled, because his modesty led him to admit that to suffer is more honourable than to do injustice. By custom 'yes,' but not by nature, says Callicles. And Socrates is 483
always playing between the two points of view, and putting one in the place of the other. In this very argument, what Polus only meant in a conventional sense has been affirmed by him to be a law of nature. For convention says that 'injustice is dishonourable,' but nature says that 'might is right.' And we are always taming down the nobler spirits among us to the conventional level. But sometimes a great man will rise up and reassert his original rights, trampling under foot all our formularies, and then the light 484
of natural justice shines forth. Pindar says, 'Law, the king of all, does violence with high hand;' as is indeed proved by the example of Heracles, who drove off the oxen of Geryon and never paid for them.

This is the truth, Socrates, as you will be convinced, if you leave philosophy and pass on to the real business of life. A little philosophy is an excellent thing; too much is the ruin of a man. He who has not 'passed his metaphysics' before he has grown up to manhood will never know the world. Philosophers are ridiculous when they take to politics, and I dare say that politicians are equally ridiculous when they take to philosophy: 'Every man,' as Euripides says, 'is fondest of that in which he is best.' Philosophy 485
is graceful in youth, like the lisp of infancy, and should be cultivated as a part of education; but when a grown-up man lisps or studies philosophy, I should like to beat him. None of those over-refined natures ever come to any good; they avoid the busy haunts of men, and skulk in corners, whispering to a few admiring youths, and never giving utterance to any noble sentiments.

For you, Socrates, I have a regard, and therefore I say to you, as Zethus says to Amphion in the play, that you have 'a noble soul 486
disguised in a puerile exterior.' And I would have you consider

the danger which you and other philosophers incur. For you would not know how to defend yourself if any one accused you in a law-court,— there you would stand, with gaping mouth and dizzy brain, and might be murdered, robbed, boxed on the ears with impunity. Take my advice, then, and get a little common sense; leave to others these frivolities; walk in the ways of the wealthy and be wise.

Socrates professes to have found in Callicles the philosopher's touchstone; and he is certain that any opinion in which they both agree must be the very truth. Callicles has all the three qualities
487 which are needed in a critic — knowledge, good-will, frankness; Gorgias and Polus, although learned men, were too modest, and their modesty made them contradict themselves. But Callicles is well-educated; and he is not too modest to speak out (of this he has already given proof), and his good-will is shown both by his own profession and by his giving the same caution against philosophy to Socrates, which Socrates remembers hearing him give
488 long ago to his own clique of friends. He will pledge himself to retract any error into which he may have fallen, and which Callicles may point out. But he would like to know first of all what he and Pindar mean by natural justice. Do they suppose that the rule of justice is the rule of the stronger or of the better? 'There is no difference.' Then are not the many superior to the one, and the opinions of the many better? And their opinion is that justice is equality, and that to do is more dishonourable than to suffer wrong.
489 And as they are the superior or stronger, this opinion of theirs must be in accordance with natural as well as conventional justice. 'Why will you continue splitting words? Have I not told you that the superior is the better?' But what do you mean by the better? Tell me that, and please to be a little milder in your language, if
490 you do not wish to drive me away. 'I mean the worthier, the wiser.' You mean to say that one man of sense ought to rule over ten thousand fools? 'Yes, that is my meaning.' Ought the physician then to have a larger share of meats and drinks? or the weaver to have more coats, or the cobbler larger shoes, or the
491 farmer more seed? 'You are always saying the same things, Socrates.' Yes, and on the same subjects too; but you are never saying the same things. For, first, you defined the superior to be the stronger, and then the wiser, and now something else; — what

do you mean? 'I mean men of political ability, who ought to govern and to have more than the governed.' Than themselves? 'What do you mean?' I mean to say that every man is his own governor. 'I see that you mean those dolts, the temperate. But my doctrine is, that a man should let his desires grow, and take the means of satisfying them. To the many this is impossible, 492
and therefore they combine to prevent him. But if he is a king, and has power, how base would he be in submitting to them! To invite the common herd to be lord over him, when he might have the enjoyment of all things! For the truth is, Socrates, that luxury and self-indulgence are virtue and happiness; all the rest is mere talk.'

Socrates compliments Callicles on his frankness in saying what other men only think. According to his view, those who want nothing are not happy. 'Why,' says Callicles, 'if they were, stones and the dead would be happy.' Socrates in reply is led into a half-serious, half-comic vein of reflection. 'Who knows,' as Euripides says, 'whether life may not be death, and death life?' Nay, there are philosophers who maintain that even in life we are 493
dead, and that the body (σῶμα) is the tomb (σῆμα) of the soul. And some ingenious Sicilian has made an allegory, in which he represents fools as the uninitiated, who are supposed to be carrying water to a vessel, which is full of holes, in a similarly holey sieve, and this sieve is their own soul. The idea is fanciful, but nevertheless is a figure of a truth which I want to make you acknowledge, viz. that the life of contentment is better than the life of indulgence. Are you disposed to admit that? 'Far otherwise.' Then hear another parable. The life of self-contentment and self-indulgence may be represented respectively by two men, who are filling jars with streams of wine, honey, milk,— the jars of the one are sound, and the jars of the other leaky; the first fills his jars, and has no more trouble with them; the second is always filling 494
them, and would suffer extreme misery if he desisted. Are you of the same opinion still? 'Yes, Socrates, and the figure expresses what I mean. For true pleasure is a perpetual stream, flowing in and flowing out. To be hungry and always eating, to be thirsty and always drinking, and to have all the other desires and to satisfy them, that, as I admit, is my idea of happiness.' And to be itching and always scratching? 'I do not deny that there may be

happiness even in that.' And to indulge unnatural desires, if they are abundantly satisfied? Callicles is indignant at the introduction of such topics. But he is reminded by Socrates that they are
495 introduced, not by him, but by the maintainer of the identity of pleasure and good. Will Callicles still maintain this? 'Yes, for the sake of consistency, he will.' The answer does not satisfy Socrates, who fears that he is losing his touchstone. A profession of seriousness on the part of Callicles reassures him, and they proceed with the argument. Pleasure and good are the same, but knowledge and courage are not the same either with pleasure or good, or with one another. Socrates disproves the first of these statements by showing that two opposites cannot coexist, but must
496 alternate with one another — to be well and ill together is impossible. But pleasure and pain are simultaneous, and the cessation of them is simultaneous; e. g. in the case of drinking and thirsting,
497 whereas good and evil are not simultaneous, and do not cease simultaneously, and therefore pleasure cannot be the same as good.

Callicles has already lost his temper, and can only be persuaded to go on by the interposition of Gorgias. Socrates, having already guarded against objections by distinguishing courage and knowledge from pleasure and good, proceeds: — The good are good by the presence of good, and the bad are bad by the presence of evil.
498 And the brave and wise are good, and the cowardly and foolish are bad. And he who feels pleasure is good, and he who feels pain is bad, and both feel pleasure and pain in nearly the same degree, and sometimes the bad man or coward in a greater degree.
499 Therefore the bad man or coward is as good as the brave or may be even better.

Callicles endeavours now to avert the inevitable absurdity by affirming that he and all mankind admitted some pleasures to be good and others bad. The good are the beneficial, and the bad are the hurtful, and we should choose the one and avoid the other. But this, as Socrates observes, is a return to the old doctrine of himself and Polus, that all things should be done for the sake of the good.

500 Callicles assents to this, and Socrates, finding that they are agreed in distinguishing pleasure from good, returns to his old
501 division of empirical habits, or shams, or flatteries, which study

pleasure only, and the arts which are concerned with the higher interests of soul and body. Does Callicles agree to this division? Callicles will agree to anything, in order that he may get through the argument. Which of the arts then are flatteries? Flute-playing, harp-playing, choral exhibitions, the dithyrambics of Cinesias are all equally condemned on the ground that they give pleasure only; and Meles the harp-player, who was the father of 502
Cinesias, failed even in that. The stately muse of Tragedy is bent upon pleasure, and not upon improvement. Poetry in general is only a rhetorical address to a mixed audience of men, women, and children. And the orators are very far from speaking with a view to what is best; their way is to humour the assembly as if they were children.

Callicles replies, that this is only true of some of them; others have a real regard for their fellow-citizens. Granted; then there are two species of oratory; the one a flattery, another which has a real regard for the citizens. But where are the orators among whom you find the latter? Callicles admits that there are none 503
remaining, but there were such in the days when Themistocles, Cimon, Miltiades, and the great Pericles were still alive. Socrates replies that none of these were true artists, setting before themselves the duty of bringing order out of disorder. The good man 504
and true orator has a settled design, running through his life, to which he conforms all his words and actions; he desires to implant justice and eradicate injustice, to implant all virtue and eradicate all vice in the minds of his citizens. He is the physician 505
who will not allow the sick man to indulge his appetites with a variety of meats and drinks, but insists on his exercising self-restraint. And this is good for the soul, and better than the unrestrained indulgence which Callicles was recently approving.

Here Callicles, who had been with difficulty brought to this point, turns restive, and suggests that Socrates shall answer his own questions. 'Then,' says Socrates, 'one man must do for two;' and though he had hoped to have given Callicles an 'Amphion' in return for his 'Zethus,' he is willing to proceed; at the 506
same time, he hopes that Callicles will correct him, if he falls into error. He recapitulates the advantages which he has already won: —

The pleasant is not the same as the good — Callicles and I are

agreed about that,— but pleasure is to be pursued for the sake of the good, and the good is that of which the presence makes us good; we and all things good have acquired some virtue or other. And virtue, whether of body or soul, of things or persons, is not attained by accident, but is due to order and harmonious arrange-
507 ment. And the soul which has order is better than the soul which is without order, and is therefore temperate and is therefore good, and the intemperate is bad. And he who is temperate is also just and brave and pious, and has attained the perfection of goodness and therefore of happiness, and the intemperate whom you approve is the opposite of all this and is wretched. He therefore who would be happy must pursue temperance and avoid intemperance, and if possible escape the necessity of punishment, but if he have done wrong he must endure punishment. In this
508 way states and individuals should seek to attain harmony, which, as the wise tell us, is the bond of heaven and earth, of gods and men. Callicles has never discovered the power of geometrical proportion in both worlds; he would have men aim at disproportion and excess. But if he be wrong in this, and if self-control is the true secret of happiness, then the paradox is true that the only use of rhetoric is in self-accusation, and Polus was right in saying that to do wrong is worse than to suffer wrong, and Gorgias was right in saying that the rhetorician must be a just man. And you were wrong in taunting me with my defenceless condition, and in saying that I might be accused or put to death or boxed on the ears with impunity. For I may repeat once more, that to strike is
509 worse than to be stricken — to do than to suffer. What I said then is now made fast in adamantine bonds. I myself know not the true nature of these things, but I know that no one can deny my words and not be ridiculous. To do wrong is the greatest of evils,
510 and to suffer wrong is the next greatest evil. He who would avoid the last must be a ruler, or the friend of a ruler; and to be the friend he must be the equal of the ruler, and must also resemble him. Under his protection he will suffer no evil, but will he also do no evil? Nay, will he not rather do all the evil which
511 he can and escape? And in this way the greatest of all evils will befall him. 'But this imitator of the tyrant,' rejoins Callicles, 'will kill any one who does not similarly imitate him.' Socrates replies that he is not deaf, and that he has heard that repeated

many times, and can only reply, that a bad man will kill a good one. 'Yes, and that is the provoking thing.' Not provoking to a man of sense who is not studying the arts which will preserve him from danger; and this, as you say, is the use of rhetoric in courts of justice. But how many other arts are there which also save men from death, and are yet quite humble in their pretensions—such as the art of swimming, or the art of the pilot? Does not the pilot do men at least as much service as the rhetorician, and yet for the voyage from Aegina to Athens he does not charge more than two obols, and when he disembarks is quite unassuming in his demeanour? The reason is that he is not certain 512
whether he has done his passengers any good in saving them from death, if one of them is diseased in body, and still more if he is diseased in mind—who can say? The engineer too will often save whole cities, and yet you despise him, and would not allow your son to marry his daughter, or his son to marry yours. But what reason is there in this? For if virtue only means the saving of life, whether your own or another's, you have no right to despise him or any practiser of saving arts. But is not virtue something different from saving and being saved? I would have 513
you rather consider whether you ought not to disregard length of life, and think only how you can live best, leaving all besides to the will of Heaven. For you must not expect to have influence either with the Athenian Demos or with Demos the son of Pyrilampes, unless you become like them. What do you say to this?

'There is some truth in what you are saying, but I do not entirely believe you.'

That is because you are in love with Demos. But let us have a little more conversation. You remember the two processes—one which was directed to pleasure, the other which was directed to making men as good as possible. And those who have the care of the city should make the citizens as good as possible. But who 514
would undertake a public building, if he had never had a teacher of the art of building, and had never constructed a building before? or who would undertake the duty of state-physician, if he had never cured either himself or any one else? Should we not examine him before we entrusted him with the office? And as Callicles is about to enter public life, should we not examine him? Whom has he made better? For we have already admitted that 515

this is the statesman's proper business. And we must ask the same question about Pericles, and Cimon, and Miltiades, and Themistocles. Whom did they make better? Nay, did not Pericles make the citizens worse? For he gave them pay, and at first he was very popular with them, but at last they condemned him to
516 death. Yet surely he would be a bad tamer of animals who, having received them gentle, taught them to kick and butt, and man is an animal; and Pericles who had the charge of man only made him wilder, and more savage and unjust, and therefore he could not have been a good statesman. The same tale might be repeated about Cimon, Themistocles, Miltiades. But the
517 charioteer who keeps his seat at first is not thrown out when he gains greater experience and skill. The inference is, that the statesmen of a past age were no better than those of our own. They may have been cleverer constructors of docks and harbours, but they did not improve the character of the citizens. I have told you again and again (and I purposely use the same images) that the soul, like the body, may be treated in two ways — there is
518 the meaner and the higher art. You seemed to understand what I said at the time, but when I ask you who were the really good statesmen, you answer — as if I asked you who were the good trainers, and you answered, Thearion, the baker, Mithoecus, the author of the Sicilian cookery-book, Sarambus, the vintner. And you would be affronted if I told you that these are a parcel of cooks who make men fat only to make them thin. And those whom they have fattened applaud them, instead of finding fault with them, and lay the blame of their subsequent disorders on their physicians. In this respect, Callicles, you are like them; you applaud the statesmen of old, who pandered to the vices of the citizens, and filled the city with docks and harbours, but neglected
519 virtue and justice. And when the fit of illness comes, the citizens who in like manner applauded Themistocles, Pericles, and others, will lay hold of you and my friend Alcibiades, and you will suffer for the misdeeds of your predecessors. The old story is always being repeated — 'after all his services, the ungrateful city banished him, or condemned him to death.' As if the statesman should not have taught the city better! He surely cannot blame the state for having unjustly used him, any more than the sophist or teacher
520 can find fault with his pupils if they cheat him. And the sophist

and orator are in the same case; although you admire rhetoric and despise sophistic, whereas sophistic is really the higher of the two. The teacher of the arts takes money, but the teacher of virtue or politics takes no money, because this is the only kind of service which makes the disciple desirous of requiting his teacher.

Socrates concludes by finally asking, to which of the two modes of serving the state Callicles invites him: —'to the inferior and ministerial one,' is the ingenuous reply. That is the only way of 521
avoiding death, replies Socrates; and he has heard often enough, and would rather not hear again, that the bad man will kill the good. But he thinks that such a fate is very likely reserved for him, because he remarks that he is the only person who teaches the true art of politics. And very probably, as in the case which 522
he described to Polus, he may be the physician who is tried by a jury of children. He cannot say that he has procured the citizens any pleasure, and if any one charges him with perplexing them, or with reviling their elders, he will not be able to make them understand that he has only been actuated by a desire for their good. And therefore there is no saying what his fate may be. 'And do you think that a man who is unable to help himself is in a good condition?' Yes, Callicles, if he have the true self-help, which is never to have said or done any wrong to himself or others. If I had not this kind of self-help, I should be ashamed; but if I die for want of your flattering rhetoric, I shall die in peace. For death is no evil, but to go to the world below laden with offences is the worst of evils. In proof of which I will tell you a tale: —

Under the rule of Cronos, men were judged on the day of their 523
death, and when judgment had been given upon them they departed — the good to the islands of the blest, the bad to the house of vengeance. But as they were still living, and had their clothes on at the time when they were being judged, there was favouritism, and Zeus, when he came to the throne, was obliged to alter the mode of procedure, and try them after death, having first sent down Prometheus to take away from them the foreknowledge of death. Minos, Rhadamanthus, and Aeacus were appointed to be the 524
judges; Rhadamanthus for Asia, Aeacus for Europe, and Minos was to hold the court of appeal. Now death is the separation of soul and body, but after death soul and body alike retain their characteristics; the fat man, the dandy, the branded slave, are all

distinguishable. Some prince or potentate, perhaps even the great king himself, appears before Rhadamanthus, and he instantly
525 detects him, though he knows not who he is; he sees the scars of perjury and iniquity, and sends him away to the house of torment.

For there are two classes of souls who undergo punishment — the curable and the incurable. The curable are those who are benefited by their punishment; the incurable are such as Archelaus, who benefit others by becoming a warning to them. The latter class are generally kings and potentates; meaner persons, happily for themselves, have not the same power of doing injustice. Sisyphus and Tityus, not Thersites, are supposed by Homer to be undergoing everlasting punishment. Not that there is anything to prevent a great man from being a good one, as is
526 shown by the famous example of Aristeides, the son of Lysimachus. But to Rhadamanthus the souls are only known as good or bad; they are stripped of their dignities and preferments; he despatches the bad to Tartarus, labelled either as curable or incurable, and looks with love and admiration on the soul of some just one, whom he sends to the islands of the blest. Similar is the practice of Aeacus; and Minos overlooks them, holding a golden sceptre, as Odysseus in Homer saw him

'Wielding a sceptre of gold, and giving laws to the dead.'

My wish for myself and my fellow-men is, that we may present our souls undefiled to the judge in that day; my desire in life is to
527 be able to meet death. And I exhort you, and retort upon you the reproach which you cast upon me,— that you will stand before the judge, gaping, and with dizzy brain, and any one may box you on the ear, and do you all manner of evil.

Perhaps you think that this is an old wives' fable. But you, who are the three wisest men in Hellas, have nothing better to say, and no one will ever show that to do is better than to suffer evil. A man should study to be, and not merely to seem. If he is bad, he should become good, and avoid all flattery, whether of the many or of the few.

Follow me, then; and if you are looked down upon, that will do you no harm. And when we have practised virtue, we will betake ourselves to politics, but not until we are delivered from the shameful state of ignorance and uncertainty in which we are at

Gorgias. ANALYSIS. present. Let us follow in the way of virtue and justice, and not in the way to which you, Callicles, invite us; for that way is nothing worth.

INTRODUCTION. We will now consider in order some of the principal points of the dialogue. Having regard (1) to the age of Plato and the ironical character of his writings, we may compare him with himself and with other great teachers, and we may note in passing the objections of his critics. And then (2) casting one eye upon him, we may cast another upon ourselves, and endeavour to draw out the great lessons which he teaches for all time, stripped of the accidental form in which they are enveloped.

(1) In the Gorgias, as in nearly all the other dialogues of Plato, we are made aware that formal logic has as yet no existence. The old difficulty of framing a definition recurs. The illusive analogy of the arts and the virtues also continues. The ambiguity of several words, such as nature, custom, the honourable, the good, is not cleared up. The Sophists are still floundering about the distinction of the real and seeming. Figures of speech are made the basis of arguments. The possibility of conceiving a universal art or science, which admits of application to a particular subject-matter, is a difficulty which remains unsolved, and has not altogether ceased to haunt the world at the present day (cp. Charmides, 166 ff.). The defect of clearness is also apparent in Socrates himself, unless we suppose him to be practising on the simplicity of his opponent, or rather perhaps trying an experiment in dialectics. Nothing can be more fallacious than the contradiction which he pretends to have discovered in the answers of Gorgias (see Analysis). The advantages which he gains over Polus are also due to a false antithesis of pleasure and good, and to an erroneous assertion that an agent and a patient may be described by similar predicates; — a mistake which Aristotle partly shares and partly corrects in the Nicomachean Ethics, V. i. 4; xi. 2. Traces of a 'robust sophistry' are likewise discernible in his argument with Callicles (pp. 490, 496, 516).

(2) Although Socrates professes to be convinced by reason only, yet the argument is often a sort of dialectical fiction, by which he conducts himself and others to his own ideal of life and action. And we may sometimes wish that we could have

suggested answers to his antagonists, or pointed out to them the rocks which lay concealed under the ambiguous terms good, pleasure, and the like. But it would be as useless to examine his arguments by the requirements of modern logic, as to criticise this ideal from a merely utilitarian point of view. If we say that the ideal is generally regarded as unattainable, and that mankind will by no means agree in thinking that the criminal is happier when punished than when unpunished, any more than they would agree to the stoical paradox that a man may be happy on the rack, Plato has already admitted that the world is against him. Neither does he mean to say that Archelaus is tormented by the stings of conscience; or that the sensations of the impaled criminal are more agreeable than those of the tyrant drowned in luxurious enjoyment. Neither is he speaking, as in the Protagoras, of virtue as a calculation of pleasure, an opinion which he afterwards repudiates in the Phaedo. What then is his meaning? His meaning we shall be able to illustrate best by parallel notions, which, whether justifiable by logic or not, have always existed among mankind. We must remind the reader that Socrates himself implies that he will be understood or appreciated by very few.

He is speaking not of the consciousness of happiness, but of the idea of happiness. When a martyr dies in a good cause, when a soldier falls in battle, we do not suppose that death or wounds are without pain, or that their physical suffering is always compensated by a mental satisfaction. Still we regard them as happy, and we would a thousand times rather have their death than a shameful life. Nor is this only because we believe that they will obtain an immortality of fame, or that they will have crowns of glory in another world, when their enemies and persecutors will be proportionably tormented. Men are found in a few instances to do what is right, without reference to public opinion or to consequences. And we regard them as happy on this ground only, much as Socrates' friends in the opening of the Phaedo are described as regarding him; or as was said of another, 'they looked upon his face as upon the face of an angel.' We are not concerned to justify this idealism by the standard of utility or public opinion, but merely to point out the existence of such a sentiment in the better part of human nature.

Gorgias.
INTRODUCTION.

The idealism of Plato is founded upon this sentiment. He would maintain that in some sense or other truth and right are alone to be sought, and that all other goods are only desirable as means towards these. He is thought to have erred in 'considering the agent only, and making no reference to the happiness of others, as affected by him.' But the happiness of others or of mankind, if regarded as an end, is really quite as ideal and almost as paradoxical to the common understanding as Plato's conception of happiness. For the greatest happiness of the greatest number may mean also the greatest pain of the individual which will procure the greatest pleasure of the greatest number. Ideas of utility, like those of duty and right, may be pushed to unpleasant consequences. Nor can Plato in the Gorgias be deemed purely self-regarding, considering that Socrates expressly mentions the duty of imparting the truth when discovered to others. Nor must we forget that the side of ethics which regards others is by the ancients merged in politics. Both in Plato and Aristotle, as well as in the Stoics, the social principle, though taking another form, is really far more prominent than in most modern treatises on ethics.

The idealizing of suffering is one of the conceptions which have exercised the greatest influence on mankind. Into the theological import of this, or into the consideration of the errors to which the idea may have given rise, we need not now enter. All will agree that the ideal of the Divine Sufferer, whose words the world would not receive, the man of sorrows of whom the Hebrew prophets spoke, has sunk deep into the heart of the human race. It is a similar picture of suffering goodness which Plato desires to pourtray, not without an allusion to the fate of his master Socrates. He is convinced that, somehow or other, such an one must be happy in life or after death. In the Republic, he endeavours to show that his happiness would be assured here in a well-ordered state. But in the actual condition of human things the wise and good are weak and miserable; such an one is like a man fallen among wild beasts, exposed to every sort of wrong and obloquy.

Plato, like other philosophers, is thus led on to the conclusion, that if 'the ways of God' to man are to be 'justified,' the hopes of another life must be included. If the question could have been

put to him, whether a man dying in torments was happy still, even if, as he suggests in the Apology (40 C), 'death be only a long sleep,' we can hardly tell what would have been his answer. There have been a few, who, quite independently of rewards and punishments or of posthumous reputation, or any other influence of public opinion, have been willing to sacrifice their lives for the good of others. It is difficult to say how far in such cases an unconscious hope of a future life, or a general faith in the victory of good in the world, may have supported the sufferers. But this extreme idealism is not in accordance with the spirit of Plato. He supposes a day of retribution, in which the good are to be rewarded and the wicked punished (522 E). Though, as he says in the Phaedo, no man of sense will maintain that the details of the stories about another world are true, he will insist that something of the kind is true, and will frame his life with a view to this unknown future. Even in the Republic he introduces a future life as an afterthought, when the superior happiness of the just has been established on what is thought to be an immutable foundation. At the same time he makes a point of determining his main thesis independently of remoter consequences (x. 612 A).

(3) Plato's theory of punishment is partly vindictive, partly corrective. In the Gorgias, as well as in the Phaedo and Republic, a few great criminals, chiefly tyrants, are reserved as examples. But most men have never had the opportunity of attaining this pre-eminence of evil. They are not incurable, and their punishment is intended for their improvement. They are to suffer because they have sinned; like sick men, they must go to the physician and be healed. On this representation of Plato's the criticism has been made, that the analogy of disease and injustice is partial only, and that suffering, instead of improving men, may have just the opposite effect.

Like the general analogy of the arts and the virtues, the analogy of disease and injustice, or of medicine and justice, is certainly imperfect. But ideas must be given through something; the nature of the mind which is unseen can only be represented under figures derived from visible objects. If these figures are suggestive of some new aspect under which the mind may be considered, we cannot find fault with them for not exactly coinciding with the ideas represented. They partake of the

imperfect nature of language, and must not be construed in too strict a manner. That Plato sometimes reasons from them as if they were not figures but realities, is due to the defective logical analysis of his age.

Nor does he distinguish between the suffering which improves and the suffering which only punishes and deters. He applies to the sphere of ethics a conception of punishment which is really derived from criminal law. He does not see that such punishment is only negative, and supplies no principle of moral growth or development. He is not far off the higher notion of an education of man to be begun in this world, and to be continued in other stages of existence, which is further developed in the Republic. And Christian thinkers, who have ventured out of the beaten track in their meditations on the 'last things,' have found a ray of light in his writings. But he has not explained how or in what way punishment is to contribute to the improvement of mankind. He has not followed out the principle which he affirms in the Republic (ii. 380), that 'God is the author of evil only with a view to good,' and that 'they were the better for being punished.' Still his doctrine of a future state of rewards and punishments may be compared favourably with that perversion of Christian doctrine which makes the everlasting punishment of human beings depend on a brief moment of time, or even on the accident of an accident. And he has escaped the difficulty which has often beset divines, respecting the future destiny of the meaner sort of men (Thersites and the like), who are neither very good nor very bad, by not counting them worthy of eternal damnation.

We do Plato violence in pressing his figures of speech or chains of argument; and not less so in asking questions which were beyond the horizon of his vision, or did not come within the scope of his design. The main purpose of the Gorgias is not to answer questions about a future world, but to place in antagonism the true and false life, and to contrast the judgments and opinions of men with judgment according to the truth. Plato may be accused of representing a superhuman or transcendental virtue in the description of the just man in the Gorgias, or in the companion portrait of the philosopher in the Theaetetus; and at the same time may be thought to be condemning a state of the

world which always has existed and always will exist among men. But such ideals act powerfully on the imagination of mankind. And such condemnations are not mere paradoxes of philosophers, but the natural rebellion of the higher sense of right in man against the ordinary conditions of human life. The greatest statesmen have fallen very far short of the political ideal, and are therefore justly involved in the general condemnation.

Subordinate to the main purpose of the dialogue are some other questions, which may be briefly considered:—

a. The antithesis of good and pleasure, which as in other dialogues is supposed to consist in the permanent nature of the one compared with the transient and relative nature of the other. Good and pleasure, knowledge and sense, truth and opinion, essence and generation, virtue and pleasure, the real and the apparent, the infinite and finite, harmony or beauty and discord, dialectic and rhetoric or poetry, are so many pairs of opposites, which in Plato easily pass into one another, and are seldom kept perfectly distinct. And we must not forget that Plato's conception of pleasure is the Heracleitean flux transferred to the sphere of human conduct. There is some degree of unfairness in opposing the principle of good, which is objective, to the principle of pleasure, which is subjective. For the assertion of the permanence of good is only based on the assumption of its objective character. Had Plato fixed his mind, not on the ideal nature of good, but on the subjective consciousness of happiness, that would have been found to be as transient and precarious as pleasure.

b. The arts or sciences, when pursued without any view to truth, or the improvement of human life, are called flatteries. They are all alike dependent upon the opinion of mankind, from which they are derived. To Plato the whole world appears to be sunk in error, based on self-interest. To this is opposed the one wise man hardly professing to have found truth, yet strong in the conviction that a virtuous life is the only good, whether regarded with reference to this world or to another. Statesmen, Sophists, rhetoricians, poets, are alike brought up for judgment. They are the parodies of wise men, and their arts are the parodies of true arts and sciences. All that they call science is merely the result

of that study of the tempers of the Great Beast, which he describes in the Republic.

c. Various other points of contact naturally suggest themselves between the Gorgias and other dialogues, especially the Republic, the Philebus, and the Protagoras. There are closer resemblances both of spirit and language in the Republic than in any other dialogue, the verbal similarity tending to show that they were written at the same period of Plato's life. For the Republic supplies that education and training of which the Gorgias suggests the necessity. The theory of the many weak combining against the few strong in the formation of society (which is indeed a partial truth), is similar in both of them, and is expressed in nearly the same language. The sufferings and fate of the just man, the powerlessness of evil, and the reversal of the situation in another life, are also points of similarity. The poets, like the rhetoricians, are condemned because they aim at pleasure only, as in the Republic they are expelled the State, because they are imitators, and minister to the weaker side of human nature. That poetry is akin to rhetoric may be compared with the analogous notion, which occurs in the Protagoras, that the ancient poets were the Sophists of their day. In some other respects the Protagoras rather offers a contrast than a parallel. The character of Protagoras may be compared with that of Gorgias, but the conception of happiness is different in the two dialogues; being described in the former, according to the old Socratic notion, as deferred or accumulated pleasure, while in the Gorgias, and in the Phaedo, pleasure and good are distinctly opposed.

This opposition is carried out from a speculative point of view in the Philebus. There neither pleasure nor wisdom are allowed to be the chief good, but pleasure and good are not so completely opposed as in the Gorgias. For innocent pleasures, and such as have no antecedent pains, are allowed to rank in the class of goods. The allusion to Gorgias' definition of rhetoric (Philebus, 58 A, B; cp. Gorg. 452 D, E), as the art of persuasion, of all arts the best, for to it all things submit, not by compulsion, but of their own free will — marks a close and perhaps designed connection between the two dialogues. In both the ideas of measure, order, harmony, are the connecting links between the beautiful and the good.

In general spirit and character, that is, in irony and antagonism to public opinion, the Gorgias most nearly resembles the Apology, Crito, and portions of the Republic, and like the Philebus, though from another point of view, may be thought to stand in the same relation to Plato's theory of morals which the Theaetetus bears to his theory of knowledge.

d. A few minor points still remain to be summed up: (1) The extravagant irony in the reason which is assigned for the pilot's modest charge (p. 512); and in the proposed use of rhetoric as an instrument of self-condemnation (p. 480); and in the mighty power of geometrical equality in both worlds (p. 508). (2) The reference of the mythus to the previous discussion should not be overlooked: the fate reserved for incurable criminals such as Archelaus (p. 525); the retaliation of the box on the ears (p. 527); the nakedness of the souls and of the judges who are stript of the clothes or disguises which rhetoric and public opinion have hitherto provided for them (p. 523; cp. Swift's notion that the universe is a suit of clothes, Tale of a Tub, section 2). The fiction seems to have involved Plato in the necessity of supposing that the soul retained a sort of corporeal likeness after death (p. 524). (3) The appeal to the authority of Homer, who says that Odysseus saw Minos in his court 'holding a golden sceptre,' which gives verisimilitude to the tale (p. 526).

It is scarcely necessary to repeat that Plato is playing 'both sides of the game,' and that in criticising the characters of Gorgias and Polus, we are not passing any judgment on historical individuals, but only attempting to analyze the 'dramatis personae' as they were conceived by him. Neither is it necessary to enlarge upon the obvious fact that Plato is a dramatic writer, whose real opinions cannot always be assumed to be those which he puts into the mouth of Socrates, or any other speaker who appears to have the best of the argument; or to repeat the observation that he is a poet as well as a philosopher; or to remark that he is not to be tried by a modern standard, but interpreted with reference to his place in the history of thought and the opinion of his time.

It has been said that the most characteristic feature of the Gorgias is the assertion of the right of dissent, or private judgment. But this mode of stating the question is really opposed both to the spirit of Plato and of ancient philosophy generally. For Plato is

Gorgias. INTRODUCTION.

not asserting any abstract right or duty of toleration, or advantage to be derived from freedom of thought; indeed, in some other parts of his writings (e. g. Laws, x), he has fairly laid himself open to the charge of intolerance. No speculations had as yet arisen respecting the 'liberty of prophesying;' and Plato is not affirming any abstract right of this nature: but he is asserting the duty and right of the one wise and true man to dissent from the folly and falsehood of the many. At the same time he acknowledges the natural result, which he hardly seeks to avert, that he who speaks the truth to a multitude, regardless of consequences, will probably share the fate of Socrates.

The irony of Plato sometimes veils from us the height of idealism to which he soars. When declaring truths which the many will not receive, he puts on an armour which cannot be pierced by them. The weapons of ridicule are taken out of their hands and the laugh is turned against themselves. The disguises which Socrates assumes are like the parables of the New Testament, or the oracles of the Delphian God; they half conceal, half reveal, his meaning. The more he is in earnest, the more ironical he becomes; and he is never more in earnest or more ironical than in the Gorgias. He hardly troubles himself to answer seriously the objections of Gorgias and Polus, and therefore he sometimes appears to be careless of the ordinary requirements of logic. Yet in the highest sense he is always logical and consistent with himself. The form of the argument may be paradoxical; the substance is an appeal to the higher reason. He is uttering truths before they can be understood, as in all ages the words of philosophers, when they are first uttered, have found the world unprepared for them. A further misunderstanding arises out of the wildness of his humour; he is supposed not only by Callicles, but by the rest of mankind, to be jesting when he is profoundly serious. At length he makes even Polus (p. 468) in earnest. Finally, he drops the argument, and heedless any longer of the forms of dialectic, he loses himself in a sort of triumph, while at the same time he retaliates upon his adversaries. From this confusion of jest and earnest, we may now return to the ideal truth, and draw out in a simple form the main theses of the dialogue.

First Thesis:—

It is a greater evil to do than to suffer injustice.

Compare the New Testament —

'It is better to suffer for well doing than for evil doing.' — 1 Pet. iii. 17.

And the Sermon on the Mount —

'Blessed are they that are persecuted for righteousness' sake.'— Matt. v. 10.

The words of Socrates are more abstract than the words of Christ, but they equally imply that the only real evil is moral evil. The righteous may suffer or die, but they have their reward; and even if they had no reward, would be happier than the wicked. The world, represented by Polus, is ready, when they are asked, to acknowledge that injustice is dishonourable, and for their own sakes men are willing to punish the offender (cp. Rep. ii. 360 D). But they are not equally willing to acknowledge that injustice, even if successful, is essentially evil, and has the nature of disease and death. Especially when crimes are committed on the great scale — the crimes of tyrants, ancient or modern — after a while, seeing that they cannot be undone, and have become a part of history, mankind are disposed to forgive them, not from any magnanimity or charity, but because their feelings are blunted by time, and 'to forgive is convenient to them.' The tangle of good and evil can no longer be unravelled; and although they know that the end cannot justify the means, they feel also that good has often come out of evil. But Socrates would have us pass the same judgment on the tyrant now and always; though he is surrounded by his satellites, and has the applauses of Europe and Asia ringing in his ears; though he is the civilizer or liberator of half a continent, he is, and always will be, the most miserable of men. The greatest consequences for good or for evil cannot alter a hair's breadth the morality of actions which are right or wrong in themselves. This is the standard which Socrates holds up to us. Because politics, and perhaps human life generally, are of a mixed nature we must not allow our principles to sink to the level of our practice.

And so of private individuals — to them, too, the world occasionally speaks of the consequences of their actions: — if they are lovers of pleasure, they will ruin their health; if they are false or

Gorgias. INTRODUCTION.

dishonest, they will lose their character. But Socrates would speak to them, not of what will be, but of what is — of the present consequence of lowering and degrading the soul. And all higher natures, or perhaps all men everywhere, if they were not tempted by interest or passion, would agree with him — they would rather be the victims than the perpetrators of an act of treachery or of tyranny. Reason tells them that death comes sooner or later to all, and is not so great an evil as an unworthy life, or rather, if rightly regarded, not an evil at all, but to a good man the greatest good. For in all of us there are slumbering ideals of truth and right, which may at any time awaken and develop a new life in us.

Second Thesis: —

It is better to suffer for wrong doing than not to suffer.

There might have been a condition of human life in which the penalty followed at once, and was proportioned to the offence. Moral evil would then be scarcely distinguishable from physical; mankind would avoid vice as they avoid pain or death. But nature, with a view of deepening and enlarging our characters, has for the most part hidden from us the consequences of our actions, and we can only foresee them by an effort of reflection. To awaken in us this habit of reflection is the business of early education, which is continued in maturer years by observation and experience. The spoilt child is in later life said to be unfortunate — he had better have suffered when he was young, and been saved from suffering afterwards. But is not the sovereign equally unfortunate whose education and manner of life are always concealing from him the consequences of his own actions, until at length they are revealed to him in some terrible downfall, which may, perhaps, have been caused not by his own fault? Another illustration is afforded by the pauper and criminal classes, who scarcely reflect at all, except on the means by which they can compass their immediate ends. We pity them, and make allowances for them; but we do not consider that the same principle applies to human actions generally. Not to have been found out in some dishonesty or folly, regarded from a moral or religious point of view, is the greatest of misfortunes. The success of our evil doings is a proof that the gods have ceased to strive with us,

and have given us over to ourselves. There is nothing to remind us of our sins, and therefore nothing to correct them. Like our sorrows, they are healed by time;

> 'While rank corruption, mining all within,
> Infects unseen.'

The 'accustomed irony' of Socrates adds a corollary to the argument:—'Would you punish your enemy, you should allow him to escape unpunished'—this is the true retaliation. (Compare the obscure verse of Proverbs, xxv. 21, 22, 'Therefore if thine enemy hunger, feed him,' etc., quoted in Romans xii. 20.)

Men are not in the habit of dwelling upon the dark side of their own lives: they do not easily see themselves as others see them. They are very kind and very blind to their own faults; the rhetoric of self-love is always pleading with them on their own behalf. Adopting a similar figure of speech, Socrates would have them use rhetoric, not in defence but in accusation of themselves. As they are guided by feeling rather than by reason, to their feelings the appeal must be made. They must speak to themselves; they must argue with themselves; they must paint in eloquent words the character of their own evil deeds. To any suffering which they have deserved, they must persuade themselves to submit. Under the figure there lurks a real thought, which, expressed in another form, admits of an easy application to ourselves. For do not we too accuse as well as excuse ourselves? And we call to our aid the rhetoric of prayer and preaching, which the mind silently employs while the struggle between the better and the worse is going on within us. And sometimes we are too hard upon ourselves, because we want to restore the balance which self-love has overthrown or disturbed; and then again we may hear a voice as of a parent consoling us. In religious diaries a sort of drama is often enacted by the consciences of men 'accusing or else excusing them.' For all our life long we are talking with ourselves:—What is thought but speech (Soph. 263 E)? What is feeling but rhetoric? And if rhetoric is used on one side only we shall be always in danger of being deceived. And so the words of Socrates, which at first sounded paradoxical, come home to the experience of all of us.

Third Thesis:—

We do not what we will, but what we wish.

Socrates would teach us a lesson which we are slow to learn — that good intentions, and even benevolent actions, when they are not prompted by wisdom, are of no value. We believe something to be for our good which we afterwards find out not to be for our good. The consequences may be inevitable, for they may follow an invariable law, yet they may often be the very opposite of what is expected by us. When we increase pauperism by almsgiving; when we tie up property without regard to changes of circumstances; when we say hastily what we deliberately disapprove; when we do in a moment of passion what upon reflection we regret; when from any want of self-control we give another an advantage over us — we are doing not what we will, but what we wish. All actions of which the consequences are not weighed and foreseen, are of this impotent and paralytic sort; and the author of them has 'the least possible power' while seeming to have the greatest. For he is actually bringing about the reverse of what he intended. And yet the book of nature is open to him, in which he who runs may read if he will exercise ordinary attention; every day offers him experiences of his own and of other men's characters, and he passes them unheeded by. The contemplation of the consequences of actions, and the ignorance of men in regard to them, seems to have led Socrates to his famous thesis: —'Virtue is knowledge;' which is not so much an error or paradox as a half truth, seen first in the twilight of ethical philosophy, but also the half of the truth which is especially needed in the present age. For as the world has grown older men have been too apt to imagine a right and wrong apart from consequences; while a few, on the other hand, have sought to resolve them wholly into their consequences. But Socrates, or Plato for him, neither divides nor identifies them; though the time has not yet arrived either for utilitarian or transcendental systems of moral philosophy, he recognizes the two elements which seem to lie at the basis of morality[1].

[1] Compare the following: 'Now, and for us, it is a time to Hellenize and to praise knowing; for we have Hebraized too much and have overvalued doing. But the habits and discipline received from Hebraism remain for our race an eternal possession. And as humanity is constituted, one must never assign them the second rank to-day without being ready to restore them to the first to-morrow.' Sir William W. Hunter, Preface to Orissa.

Fourth Thesis:—

To be and not to seem is the end of life.

The Greek in the age of Plato admitted praise to be one of the chief incentives to moral virtue, and to most men the opinion of their fellows is a leading principle of action. Hence a certain element of seeming enters into all things; all or almost all desire to appear better than they are, that they may win the esteem or admiration of others. A man of ability can easily feign the language of piety or virtue; and there is an unconscious as well as a conscious hypocrisy which, according to Socrates, is the worst of the two. Again, there is the sophistry of classes and professions. There are the different opinions about themselves and one another which prevail in different ranks of society. There is the bias given to the mind by the study of one department of human knowledge to the exclusion of the rest; and stronger far the prejudice engendered by a pecuniary or party interest in certain tenets. There is the sophistry of law, the sophistry of medicine, the sophistry of politics, the sophistry of theology. All of these disguises wear the appearance of the truth; some of them are very ancient, and we do not easily disengage ourselves from them; for we have inherited them, and they have become a part of us. The sophistry of an ancient Greek sophist is nothing compared with the sophistry of a religious order, or of a church in which during many ages falsehood has been accumulating, and everything has been said on one side, and nothing on the other. The conventions and customs which we observe in conversation, and the opposition of our interests when we have dealings with one another ('the buyer saith, it is nought — it is nought,' etc.), are always obscuring our sense of truth and right. The sophistry of human nature is far more subtle than the deceit of any one man. Few persons speak freely from their own natures, and scarcely any one dares to think for himself: most of us imperceptibly fall into the opinions of those around us, which we partly help to make. A man who would shake himself loose from them, requires great force of mind; he hardly knows where to begin in the search after truth. On every side he is met by the world, which is not an abstraction of theologians, but the most real of all things, being another name for ourselves

Gorgias.

INTRODUCTION.

when regarded collectively and subjected to the influences of society.

Then comes Socrates, impressed as no other man ever was, with the unreality and untruthfulness of popular opinion, and tells mankind that they must be and not seem. How are they to be? At any rate they must have the spirit and desire to be. If they are ignorant, they must acknowledge their ignorance to themselves; if they are conscious of doing evil, they must learn to do well; if they are weak, and have nothing in them which they can call themselves, they must acquire firmness and consistency; if they are indifferent, they must begin to take an interest in the great questions which surround them. They must try to be what they would fain appear in the eyes of their fellow-men. A single individual cannot easily change public opinion; but he can be true and innocent, simple and independent; he can know what he does, and what he does not know; and though not without an effort, he can form a judgment of his own, at least in common matters. In his most secret actions he can show the same high principle (cp. Rep. viii. 554 D) which he shows when supported and watched by public opinion. And on some fitting occasion, on some question of humanity or truth or right, even an ordinary man, from the natural rectitude of his disposition, may be found to take up arms against a whole tribe of politicians and lawyers, and be too much for them.

Who is the true and who the false statesman? —

The true statesman is he who brings order out of disorder; who first organizes and then administers the government of his own country; and having made a nation, seeks to reconcile the national interests with those of Europe and of mankind. He is not a mere theorist, nor yet a dealer in expedients; the whole and the parts grow together in his mind; while the head is conceiving, the hand is executing. Although obliged to descend to the world, he is not of the world. His thoughts are fixed not on power or riches or extension of territory, but on an ideal state, in which all the citizens have an equal chance of health and life, and the highest education is within the reach of all, and the moral and intellectual qualities of every individual are freely developed, and 'the idea of good' is the animating principle of the whole. Not the attainment of freedom alone, or of order alone, but how to

unite freedom with order is the problem which he has to solve.

The statesman who places before himself these lofty aims has undertaken a task which will call forth all his powers. He must control himself before he can control others; he must know mankind before he can manage them. He has no private likes or dislikes; he does not conceal personal enmity under the disguise of moral or political principle: such meannesses, into which men too often fall unintentionally, are absorbed in the consciousness of his mission, and in his love for his country and for mankind. He will sometimes ask himself what the next generation will say of him; not because he is careful of posthumous fame, but because he knows that the result of his life as a whole will then be more fairly judged. He will take time for the execution of his plans; not hurrying them on when the mind of a nation is unprepared for them; but like the Ruler of the Universe Himself, working in the appointed time, for he knows that human life, 'if not long in comparison with eternity' (Rep. vi. 498 D), is sufficient for the fulfilment of many great purposes. He knows, too, that the work will be still going on when he is no longer here; and he will sometimes, especially when his powers are failing, think of that other 'city of which the pattern is in heaven' (Rep. ix. 592 B).

The false politician is the serving-man of the state. In order to govern men he becomes like them; their 'minds are married in conjunction;' they 'bear themselves' like vulgar and tyrannical masters, and he is their obedient servant. The true politician, if he would rule men, must make them like himself; he must 'educate his party' until they cease to be a party; he must breathe into them the spirit which will hereafter give form to their institutions. Politics with him are not a mechanism for seeming what he is not, or for carrying out the will of the majority. Himself a representative man, he is the representative not of the lower but of the higher elements of the nation. There is a better (as well as a worse) public opinion of which he seeks to lay hold; as there is also a deeper current of human affairs in which he is borne up when the waves nearer the shore are threatening him. He acknowledges that he cannot take the world by force — two or three moves on the political chessboard are all that he can foresee — two

or three weeks or months are granted to him in which he can provide against a coming struggle. But he knows also that there are permanent principles of politics which are always tending to the well-being of states — better administration, better education, the reconciliation of conflicting elements, increased security against external enemies. These are not 'of to-day or yesterday,' but are the same in all times, and under all forms of government. Then when the storm descends and the winds blow, though he knows not beforehand the hour of danger, the pilot, not like Plato's captain in the Republic, half-blind and deaf, but with penetrating eye and quick ear, is ready to take command of the ship and guide her into port.

The false politician asks not what is true, but what is the opinion of the world — not what is right, but what is expedient. The only measures of which he approves are the measures which will pass. He has no intention of fighting an uphill battle; he keeps the roadway of politics. He is unwilling to incur the persecution and enmity which political convictions would entail upon him. He begins with popularity, and in fair weather sails gallantly along. But unpopularity soon follows him. For men expect their leaders to be better and wiser than themselves: to be their guides in danger, their saviours in extremity; they do not really desire them to obey all the ignorant impulses of the popular mind; and if they fail them in a crisis they are disappointed. Then, as Socrates says, the cry of ingratitude is heard, which is most unreasonable; for the people, who have been taught no better, have done what might be expected of them, and their statesmen have received justice at their hands.

The true statesman is aware that he must adapt himself to times and circumstances. He must have allies if he is to fight against the world; he must enlighten public opinion; he must accustom his followers to act together. Although he is not the mere executor of the will of the majority, he must win over the majority to himself. He is their leader and not their follower, but in order to lead he must also follow. He will neither exaggerate nor undervalue the power of a statesman, neither adopting the 'laissez faire' nor the 'paternal government' principle; but he will, whether he is dealing with children in politics, or with full-grown men, seek to do for the people what the government can do for them, and what,

from imperfect education or deficient powers of combination, they cannot do for themselves. He knows that if he does too much for them they will do nothing; and that if he does nothing for them they will in some states of society be utterly helpless. For the many cannot exist without the few; if the material force of a country is from below, wisdom and experience are from above. It is not a small part of human evils which kings and governments make or cure. The statesman is well aware that a great purpose carried out consistently during many years will at last be executed. He is playing for a stake which may be partly determined by some accident, and therefore he will allow largely for the unknown element of politics. But the game being one in which chance and skill are combined, if he plays long enough he is certain of victory. He will not be always consistent, for the world is changing; and though he depends upon the support of a party, he will remember that he is the minister of the whole. He lives not for the present, but for the future, and he is not at all sure that he will be appreciated either now or then. For he may have the existing order of society against him, and may not be remembered by a distant posterity.

There are always discontented idealists in politics who, like Socrates in the Gorgias, find fault with all statesmen past as well as present, not excepting the greatest names of history. Mankind have an uneasy feeling that they ought to be better governed than they are. Just as the actual philosopher falls short of the one wise man, so does the actual statesman fall short of the ideal. And so partly from vanity and egotism, but partly also from a true sense of the faults of eminent men, a temper of dissatisfaction and criticism springs up among those who are ready enough to acknowledge the inferiority of their own powers. No matter whether a statesman makes high professions or none at all — they are reduced sooner or later to the same level. And sometimes the more unscrupulous man is better esteemed than the more conscientious, because he has not equally deceived expectations. Such sentiments may be unjust, but they are widely spread; we constantly find them recurring in reviews and newspapers, and still oftener in private conversation.

We may further observe that the art of government, while in some respects tending to improve, has in others a tendency to

Gorgias.
INTRODUCTION.

degenerate, as institutions become more popular. Governing for the people cannot easily be combined with governing by the people: the interests of classes are too strong for the ideas of the statesman who takes a comprehensive view of the whole. According to Socrates the true governor will find ruin or death staring him in the face, and will only be induced to govern from the fear of being governed by a worse man than himself (Rep. i. 347 C). And in modern times, though the world has grown milder, and the terrible consequences which Plato foretells no longer await an English statesman, any one who is not actuated by a blind ambition will only undertake from a sense of duty a work in which he is most likely to fail; and even if he succeed, will rarely be rewarded by the gratitude of his own generation.

Socrates, who is not a politician at all, tells us that he is the only real politician of his time. Let us illustrate the meaning of his words by applying them to the history of our own country. He would have said that not Pitt or Fox, or Canning or Sir R. Peel, are the real politicians of their time, but Locke, Hume, Adam Smith, Bentham, Ricardo. These during the greater part of their lives occupied an inconsiderable space in the eyes of the public. They were private persons; nevertheless they sowed in the minds of men seeds which in the next generation have become an irresistible power. 'Herein is that saying true, One soweth and another reapeth.' We may imagine with Plato an ideal statesman in whom practice and speculation are perfectly harmonized; for there is no necessary opposition between them. But experience shows that they are commonly divorced — the ordinary politician is the interpreter or executor of the thoughts of others, and hardly ever brings to the birth a new political conception. One or two only in modern times, like the Italian statesman Cavour, have created the world in which they moved. The philosopher is naturally unfitted for political life; his great ideas are not understood by the many; he is a thousand miles away from the questions of the day. Yet perhaps the lives of thinkers, as they are stiller and deeper, are also happier than the lives of those who are more in the public eye. They have the promise of the future, though they are regarded as dreamers and visionaries by their own contemporaries. And when they are no longer here, those who would have been ashamed of them during their lives claim kindred

with them, and are proud to be called by their names. (Cp. Thucyd. vi. 16.) *Gorgias.* INTRODUCTION.

Who is the true poet?

Plato expels the poets from his Republic because they are allied to sense; because they stimulate the emotions; because they are thrice removed from the ideal truth. And in a similar spirit he declares in the Gorgias that the stately muse of tragedy is a votary of pleasure and not of truth. In modern times we almost ridicule the idea of poetry admitting of a moral. The poet and the prophet, or preacher, in primitive antiquity are one and the same; but in later ages they seem to fall apart. The great art of novel writing, that peculiar creation of our own and the last century, which, together with the sister art of review writing, threatens to absorb all literature, has even less of seriousness in her composition. Do we not often hear the novel writer censured for attempting to convey a lesson to the minds of his readers?

Yet the true office of a poet or writer of fiction is not merely to give amusement, or to be the expression of the feelings of mankind, good or bad, or even to increase our knowledge of human nature. There have been poets in modern times, such as Goethe or Wordsworth, who have not forgotten their high vocation of teachers; and the two greatest of the Greek dramatists owe their sublimity to their ethical character. The noblest truths, sung of in the purest and sweetest language, are still the proper material of poetry. The poet clothes them with beauty, and has a power of making them enter into the hearts and memories of men. He has not only to speak of themes above the level of ordinary life, but to speak of them in a deeper and tenderer way than they are ordinarily felt, so as to awaken the feeling of them in others. The old he makes young again; the familiar principle he invests with a new dignity; he finds a noble expression for the common-places of morality and politics. He uses the things of sense so as to indicate what is beyond; he raises us through earth to heaven. He expresses what the better part of us would fain say, and the half-conscious feeling is strengthened by the expression. He is his own critic, for the spirit of poetry and of criticism are not divided in him. His mission is not to disguise men from themselves, but to reveal to them their own nature, and make them better acquainted with the world around them. True poetry is the remembrance of youth,

of love, the embodiment in words of the happiest and holiest moments of life, of the noblest thoughts of man, of the greatest deeds of the past. The poet of the future may return to his greater calling of the prophet or teacher; indeed, we hardly know what may not be effected for the human race by a better use of the poetical and imaginative faculty. The reconciliation of poetry, as of religion, with truth, may still be possible. Neither is the element of pleasure to be excluded. For when we substitute a higher pleasure for a lower we raise men in the scale of existence. Might not the novelist, too, make an ideal, or rather many ideals of social life, better than a thousand sermons? Plato, like the Puritans, is too much afraid of poetic and artistic influences. But he is not without a true sense of the noble purposes to which art may be applied (Rep. iii. 401).

Modern poetry is often a sort of plaything, or, in Plato's language, a flattery, a sophistry, or sham, in which, without any serious purpose, the poet lends wings to his fancy and exhibits his gifts of language and metre. Such an one seeks to gratify the taste of his readers; he has the '*savoir faire*,' or trick of writing, but he has not the higher spirit of poetry. He has no conception that true art should bring order out of disorder (504 A); that it should make provision for the soul's highest interest (501 C); that it should be pursued only with a view to 'the improvement of the citizens' (502, 503). He ministers to the weaker side of human nature (Rep. x. 603–605); he idealizes the sensual; he sings the strain of love in the latest fashion; instead of raising men above themselves he brings them back to the 'tyranny of the many masters,' from which all his life long a good man has been praying to be delivered. And often, forgetful of measure and order, he will express not that which is truest, but that which is strongest. Instead of a great and nobly-executed subject, perfect in every part, some fancy of a heated brain is worked out with the strangest incongruity. He is not the master of his words, but his words—perhaps borrowed from another—the faded reflection of some French or German or Italian writer, have the better of him. Though we are not going to banish the poets, how can we suppose that such utterances have any healing or life-giving influence on the minds of men?

'Let us hear the conclusion of the whole matter:' Art then

must be true, and politics must be true, and the life of man must be true and not a seeming or sham. In all of them order has to be brought out of disorder, truth out of error and falsehood. This is what we mean by the greatest improvement of man. And so, having considered in what way 'we can best spend the appointed time, we leave the result with God' (512 E). Plato does not say that God will order all things for the best (cp. Phaedo, 97 C), but he indirectly implies that the evils of this life will be corrected in another. And as we are very far from the best imaginable world at present, Plato here, as in the Phaedo and Republic, supposes a purgatory or place of education for mankind in general, and for a very few a Tartarus or hell. The myth which terminates the dialogue is not the revelation, but rather, like all similar descriptions, whether in the Bible or Plato, the veil of another life. For no visible thing can reveal the invisible. Of this Plato, unlike some commentators on Scripture, is fully aware. Neither will he dogmatize about the manner in which we are 'born again' (Rep. vi. 498 D). Only he is prepared to maintain the ultimate triumph of truth and right, and declares that no one, not even the wisest of the Greeks, can affirm any other doctrine without being ridiculous.

There is a further paradox of ethics, in which pleasure and pain are held to be indifferent, and virtue at the time of action and without regard to consequences is happiness. From this elevation or exaggeration of feeling Plato seems to shrink: he leaves it to the Stoics in a later generation to maintain that when impaled or on the rack the philosopher may be happy (cp. Rep. ii. 361 ff.). It is observable that in the Republic he raises this question, but it is not really discussed; the veil of the ideal state, the shadow of another life, are allowed to descend upon it and it passes out of sight. The martyr or sufferer in the cause of right or truth is often supposed to die in raptures, having his eye fixed on a city which is in heaven. But if there were no future, might he not still be happy in the performance of an action which was attended only by a painful death? He himself may be ready to thank God that he was thought worthy to do Him the least service, without looking for a reward; the joys of another life may not have been present to his mind at all. Do we suppose that the mediaeval

saint, St. Bernard, St. Francis, St. Catharine of Sienna, or the Catholic priest who lately devoted himself to death by a lingering disease that he might solace and help others, was thinking of the 'sweets' of heaven? No; the work was already heaven to him and enough. Much less will the dying patriot be dreaming of the praises of man or of an immortality of fame: the sense of duty, of right, and trust in God will be sufficient, and as far as the mind can reach, in that hour. If he were certain that there were no life to come, he would not have wished to speak or act otherwise than he did in the cause of truth or of humanity. Neither, on the other hand, will he suppose that God has forsaken him or that the future is to be a mere blank to him. The greatest act of faith, the only faith which cannot pass away, is his who has not known, but yet has believed. A very few among the sons of men have made themselves independent of circumstances, past, present, or to come. He who has attained to such a temper of mind has already present with him eternal life; he needs no arguments to convince him of immortality; he has in him already a principle stronger than death. He who serves man without the thought of reward is deemed to be a more faithful servant than he who works for hire. May not the service of God, which is the more disinterested, be in like manner the higher? And although only a very few in the course of the world's history — Christ himself being one of them — have attained to such a noble conception of God and of the human soul, yet the ideal of them may be present to us, and the remembrance of them be an example to us, and their lives may shed a light on many dark places both of philosophy and theology.

The Myths of Plato.

The myths of Plato are a phenomenon unique in literature. There are four longer ones: these occur in the Phaedrus (244–256), Phaedo (110–115), Gorgias (523–527), and Republic (x. 614–621). That in the Republic is the most elaborate and finished of them. Three of these greater myths, namely those contained in the Phaedo, the Gorgias and the Republic, relate to the destiny of human souls in a future life. The magnificent myth in the

Phaedrus treats of the immortality, or rather the eternity of the soul, in which is included a former as well as a future state of existence. To these may be added, (1) the myth, or rather fable, occurring in the Statesman (268–274), in which the life of innocence is contrasted with the ordinary life of man and the consciousness of evil: (2) the legend of the Island of Atlantis, an imaginary history, which is a fragment only, commenced in the Timaeus (21–26) and continued in the Critias: (3) the much less artistic fiction of the foundation of the Cretan colony which is introduced in the preface to the Laws (iii. 702), but soon falls into the background: (4) the beautiful but rather artificial tale of Prometheus and Epimetheus narrated in his rhetorical manner by Protagoras in the dialogue called after him (320–328): (5) the speech at the beginning of the Phaedrus (231–234), which is a parody of the orator Lysias; the rival speech of Socrates and the recantation of it (237–241). To these may be added (6) the tale of the grasshoppers, and (7) the tale of Thamus and of Theuth, both in the Phaedrus (259 and 274–5): (8) the parable of the Cave (Rep. vii. *ad init.*), in which the previous argument is recapitulated, and the nature and degrees of knowledge having been previously set forth in the abstract are represented in a picture: (9) the fiction of the earth-born men (Rep. iii. 414; cp. Laws ii. 664), in which by the adaptation of an old tradition Plato makes a new beginning for his society: (10) the myth of Aristophanes respecting the division of the sexes, Sym. 189: (11) the parable of the noble captain, the pilot, and the mutinous sailors (Rep. vi. 488), in which is represented the relation of the better part of the world, and of the philosopher, to the mob of politicians: (12) the ironical tale of the pilot who plies between Athens and Aegina charging only a small payment for saving men from death, the reason being that he is uncertain whether to live or die is better for them (Gorg. 511): (13) the treatment of freemen and citizens by physicians and of slaves by their apprentices,—a somewhat laboured figure of speech intended to illustrate the two different ways in which the laws speak to men (Laws iv. 720). There also occur in Plato continuous images; some of them extend over several pages, appearing and reappearing at intervals: such as the bees stinging and stingless (paupers and thieves) in the Eighth Book of the Republic (554), who are generated in the transition from timocracy to oligarchy:

Gorgias. INTRODUCTION.

the sun, which is to the visible world what the idea of good is to the intellectual, in the Sixth Book of the Republic (508–9): the composite animal, having the form of a man, but containing under a human skin a lion and a many-headed monster (Rep. ix. 588–9): the great beast (vi. 493), i. e. the populace: and the wild beast within us, meaning the passions which are always liable to break out (ix. 571): the animated comparisons of the degradation of philosophy by the arts to the dishonoured maiden (vi. 495–6), and of the tyrant to the parricide, who 'beats his father, having first taken away his arms' (viii. 569): the dog, who is your only philosopher (ii. 376 B): the grotesque and rather paltry image of the argument wandering about without a head (Laws vi. 752), which is repeated, not improved, from the Gorgias (509 D): the argument personified as veiling her face (Rep. vi. 503 A), as engaged in a chase (iv. 427 C), as breaking upon us in a first, second and third wave (v. 457 C, 472 A, 473 C): — on these figures of speech the changes are rung many times over. It is observable that nearly all these parables or continuous images are found in the Republic; that which occurs in the Theaetetus (149 ff.), of the midwifery of Socrates, is perhaps the only exception. To make the list complete, the mathematical figure of the number of the state (Rep. viii. 546), or the numerical interval which separates king from tyrant (ix. 587–8), should not be forgotten.

The myth in the Gorgias is one of those descriptions of another life which, like the Sixth Aeneid of Virgil, appear to contain reminiscences of the mysteries. It is a vision of the rewards and punishments which await good and bad men after death. It supposes the body to continue, and to be in another world what it has become in this. It includes a Paradiso, Purgatorio, and Inferno, like the sister myths of the Phaedo and the Republic. The Inferno is reserved for great criminals only. The argument of the dialogue is frequently referred to, and the meaning breaks through so as rather to destroy the liveliness and consistency of the picture. The structure of the fiction is very slight, the chief point or moral being that in the judgments of another world there is no possibility of concealment: Zeus has taken from men the power of foreseeing death, and brings together the souls both of them and their judges naked and undisguised at the judgment-seat. Both are exposed to view, stripped of the veils and clothes

which might prevent them from seeing into or being seen by one another.

The myth of the Phaedo is of the same type, but it is more cosmological, and also more poetical. The beautiful and ingenious fancy occurs to Plato that the upper atmosphere is an earth and heaven in one, a glorified earth, fairer and purer than that in which we dwell. As the fishes live in the ocean, mankind are living in a lower sphere, out of which they put their heads for a moment or two and behold a world beyond. The earth which we inhabit is a sediment of the coarser particles which drop from the world above, and is to that heavenly earth what the desert and the shores of the ocean are to us. A part of the myth consists of description of the interior of the earth, which gives the opportunity of introducing several mythological names and of providing places of torment for the wicked. There is no clear distinction of soul and body; the spirits beneath the earth are spoken of as souls only, yet they retain a sort of shadowy form when they cry for mercy on the shores of the lake; and the philosopher alone is said to have got rid of the body. All the three myths in Plato which relate to the world below have a place for repentant sinners, as well as other homes or places for the very good and very bad. It is a natural reflection which is made by Plato elsewhere, that the two extremes of human character are rarely met with, and that the generality of mankind are between them. Hence a place must be found for them. In the myth of the Phaedo they are carried down the river Acheron to the Acherusian lake, where they dwell, and are purified of their evil deeds, and receive the rewards of their good. There are also incurable sinners, who are cast into Tartarus, there to remain as the penalty of atrocious crimes; these suffer everlastingly. And there is another class of hardly-curable sinners who are allowed from time to time to approach the shores of the Acherusian lake, where they cry to their victims for mercy; which if they obtain they come out into the lake and cease from their torments.

Neither this, nor any of the three greater myths of Plato, nor perhaps any allegory or parable relating to the unseen world, is consistent with itself. The language of philosophy mingles with that of mythology; abstract ideas are transformed into persons, figures of speech into realities. These myths may be compared

Gorgias.
INTRODUCTION.

with the Pilgrim's Progress of Bunyan, in which discussions of theology are mixed up with the incidents of travel, and mythological personages are associated with human beings: they are also garnished with names and phrases taken out of Homer, and with other fragments of Greek tradition.

The myth of the Republic is more subtle and also more consistent than either of the two others. It has a greater verisimilitude than they have, and is full of touches which recall the experiences of human life. It will be noticed by an attentive reader that the twelve days during which Er lay in a trance after he was slain coincide with the time passed by the spirits in their pilgrimage. It is a curious observation, not often made, that good men who have lived in a well-governed city (shall we say in a religious and respectable society?) are more likely to make mistakes in their choice of life than those who have had more experience of the world and of evil. It is a more familiar remark that we constantly blame others when we have only ourselves to blame; and the philosopher must acknowledge, however reluctantly, that there is an element of chance in human life with which it is sometimes impossible for man to cope. That men drink more of the waters of forgetfulness than is good for them is a poetical description of a familiar truth. We have many of us known men who, like Odysseus, have wearied of ambition and have only desired rest. We should like to know what became of the infants 'dying almost as soon as they were born' (x. 615 B), but Plato only raises, without satisfying, our curiosity. The two companies of souls, ascending and descending at either chasm of heaven and earth, and conversing when they come out into the meadow, the majestic figures of the judges sitting in heaven, the voice heard by Ardiaeus, are features of the great allegory which have an indescribable grandeur and power. The remark already made respecting the inconsistency of the two other myths must be extended also to this: it is at once an orrery, or model of the heavens, and a picture of the Day of Judgment.

The three myths are unlike anything else in Plato. There is an Oriental, or rather an Egyptian element in them, and they have an affinity to the mysteries and to the Orphic modes of worship. To a certain extent they are un-Greek; at any rate there is hardly anything like them in other Greek writings which

have a serious purpose; in spirit they are mediaeval. They are akin to what may be termed the underground religion in all ages and countries. They are presented in the most lively and graphic manner, but they are never insisted on as true; it is only affirmed that nothing better can be said about a future life. Plato seems to make use of them when he has reached the limits of human knowledge; or, to borrow an expression of his own, when he is standing on the outside of the intellectual world. They are very simple in style; a few touches bring the picture home to the mind, and make it present to us. They have also a kind of authority gained by the employment of sacred and familiar names, just as mere fragments of the words of Scripture, put together in any form and applied to any subject, have a power of their own. They are a substitute for poetry and mythology; and they are also a reform of mythology. The moral of them may be summed up in a word or two: After death the Judgment; and 'there is some better thing remaining for the good than for the evil.'

All literature gathers into itself many elements of the past: for example, the tale of the earth-born men in the Republic appears at first sight to be an extravagant fancy, but it is restored to propriety when we remember that it is based on a legendary belief. The art of making stories of ghosts and apparitions credible is said to consist in the manner of telling them. The effect is gained by many literary and conversational devices, such as the previous raising of curiosity, the mention of little circumstances, simplicity, picturesqueness, the naturalness of the occasion, and the like. This art is possessed by Plato in a degree which has never been equalled.

The myth in the Phaedrus is even greater than the myths which have been already described, but is of a different character. It treats of a former rather than of a future life. It represents the conflict of reason aided by passion or righteous indignation on the one hand, and of the animal lusts and instincts on the other. The soul of man has followed the company of some god, and seen truth in the form of the universal before it was born in this world. Our present life is the result of the struggle which was then carried on. This world is relative to a former world, as it is often projected into a future. We ask the question, Where were men before

Gorgias.
INTRODUCTION.

birth? as we likewise enquire, What will become of them after death? The first question is unfamiliar to us, and therefore seems to be unnatural; but if we survey the whole human race, it has been as influential and as widely spread as the other. In the Phaedrus it is really a figure of speech in which the 'spiritual combat' of this life is represented. The majesty and power of the whole passage —especially of what may be called the theme or proem (beginning 'The mind through all her being is immortal') — can only be rendered very inadequately in another language.

The myth in the Statesman relates to a former cycle of existence, in which men were born of the earth, and by the reversal of the earth's motion had their lives reversed and were restored to youth and beauty: the dead came to life, the old grew middle-aged, and the middle-aged young; the youth became a child, the child an infant, the infant vanished into the earth. The connection between the reversal of the earth's motion and the reversal of human life is of course verbal only, yet Plato, like theologians in other ages, argues from the consistency of the tale to its truth. The new order of the world was immediately under the government of God; it was a state of innocence in which men had neither wants nor cares, in which the earth brought forth all things spontaneously, and God was to man what man now is to the animals. There were no great estates, or families, or private possessions, nor any traditions of the past, because men were all born out of the earth. This is what Plato calls the 'reign of Cronos;' and in like manner he connects the reversal of the earth's motion with some legend of which he himself was probably the inventor.

The question is then asked, under which of these two cycles of existence was man the happier,— under that of Cronos, which was a state of innocence, or that of Zeus, which is our ordinary life? For a while Plato balances the two sides of the serious controversy, which he has suggested in a figure. The answer depends on another question: What use did the children of Cronos make of their time? They had boundless leisure and the faculty of discoursing, not only with one another, but with the animals. Did they employ these advantages with a view to philosophy, gathering from every nature some addition to their store of knowledge? or, Did they pass their time in eating and drinking and telling stories to one another and to the beasts? — in either case there would be no

difficulty in answering. But then, as Plato rather mischievously adds, 'Nobody knows what they did,' and therefore the doubt must remain undetermined.

To the first there succeeds a second epoch. After another natural convulsion, in which the order of the world and of human life is once more reversed, God withdraws his guiding hand, and man is left to the government of himself. The world begins again, and arts and laws are slowly and painfully invented. A secular age succeeds to a theocratical. In this fanciful tale Plato has dropped, or almost dropped, the garb of mythology. He suggests several curious and important thoughts, such as the possibility of a state of innocence, the existence of a world without traditions, and the difference between human and divine government. He has also carried a step further his speculations concerning the abolition of the family and of property, which he supposes to have no place among the children of Cronos any more than in the ideal state.

It is characteristic of Plato and of his age to pass from the abstract to the concrete, from poetry to reality. Language is the expression of the seen, and also of the unseen, and moves in a region between them. A great writer knows how to strike both these chords, sometimes remaining within the sphere of the visible, and then again comprehending a wider range and soaring to the abstract and universal. Even in the same sentence he may employ both modes of speech not improperly or inharmoniously. It is useless to criticise the broken metaphors of Plato, if the effect of the whole is to create a picture not such as can be painted on canvas, but which is full of life and meaning to the reader. A poem may be contained in a word or two, which may call up not one but many latent images; or half reveal to us by a sudden flash the thoughts of many hearts. Often the rapid transition from one image to another is pleasing to us: on the other hand, any single figure of speech if too often repeated, or worked out too much at length, becomes prosy and monotonous. In theology and philosophy we necessarily include both 'the moral law within and the starry heaven above,' and pass from one to the other (cp. for examples Psalm xviii. 1–25, xix. 1–9, etc.). Whether such a use of language is puerile or noble depends upon the genius of the writer or speaker, and the familiarity of the associations employed.

In the myths and parables of Plato the ease and grace of conversation is not forgotten: they are spoken, not written words, stories which are told to a living audience, and so well told that we are more than half-inclined to believe them (cp. Phaedrus 274). As in conversation too, the striking image or figure of speech is not forgotten, but is quickly caught up, and alluded to again and again; as it would still be in our own day in a genial and sympathetic society. The descriptions of Plato have a greater life and reality than is to be found in any modern writing. This is due to their homeliness and simplicity. Plato can do with words just as he pleases; to him they are indeed 'more plastic than wax' (Rep. ix. 588 D). We are in the habit of opposing speech and writing, poetry and prose. But he has discovered a use of language in which they are united; which gives a fitting expression to the highest truths; and in which the trifles of courtesy and the familiarities of daily life are not overlooked.

GORGIAS.

PERSONS OF THE DIALOGUE.

CALLICLES. SOCRATES. CHAEREPHON.
GORGIAS. POLUS.

SCENE:— The house of Callicles.

Gorgias.

SOCRATES, CALLICLES, CHAEREPHON.

Steph. 447 *Callicles.* THE wise man, as the proverb says, is late for a fray, but not for a feast.

Socrates. And are we late for a feast?

Cal. Yes, and a delightful feast; for Gorgias has just been exhibiting to us many fine things.

Soc. It is not my fault, Callicles; our friend Chaerephon is to blame; for he would keep us loitering in the Agora:

Chaerephon. Never mind, Socrates; the misfortune of which I have been the cause I will also repair; for Gorgias is a friend of mine, and I will make him give the exhibition again either now, or, if you prefer, at some other time.

Cal. What is the matter, Chaerephon — does Socrates want to hear Gorgias?

Chaer. Yes, that was our intention in coming.

Cal. Come into my house, then; for Gorgias is staying with me, and he shall exhibit to you.

Soc. Very good, Callicles; but will he answer our questions? for I want to hear from him what is the nature of his art, and what it is which he professes and teaches; he may, as you [Chaerephon] suggest, defer the exhibition to some other time.

Cal. There is nothing like asking him, Socrates; and indeed to answer questions is a part of his exhibition, for he

Gorgias. was saying only just now, that any one in my house might put any question to him, and that he would answer.

SOCRATES, GORGIAS, CHAEREPHON, POLUS.

Soc. How fortunate! will you ask him, Chaerephon —?

Chaer. What shall I ask him?

Soc. Ask him who he is.

Chaer. What do you mean?

Soc. I mean such a question as would elicit from him, if he had been a maker of shoes, the answer that he is a cobbler. Do you understand?

Chaer. I understand, and will ask him: Tell me, Gorgias, is our friend Callicles right in saying that you undertake to answer any questions which you are asked?

Gorgias. Quite right, Chaerephon: I was saying as much only just now; and I may add, that many years have elapsed 448 since any one has asked me a new one.

Chaer. Then you must be very ready, Gorgias.

Gor. Of that, Chaerephon, you can make trial.

Polus offers to take the place of Gorgias in the argument.

Polus. Yes, indeed, and if you like, Chaerephon, you may make trial of me too, for I think that Gorgias, who has been talking a long time, is tired.

Chaer. And do you, Polus, think that you can answer better than Gorgias?

Pol. What does that matter if I answer well enough for you?

Chaer. Not at all:— and you shall answer if you like.

Pol. Ask:—

Chaer. My question is this: If Gorgias had the skill of his brother Herodicus, what ought we to call him? Ought he not to have the name which is given to his brother?

Pol. Certainly.

Chaer. Then we should be right in calling him a physician?

Pol. Yes.

The question is asked, 'What is Gorgias?'

Chaer. And if he had the skill of Aristophon the son of Aglaophon, or of his brother Polygnotus, what ought we to call him?

Pol. Clearly, a painter.

Chaer. But now what shall we call him — what is the art in which he is skilled?

Pol. O Chaerephon, there are many arts among mankind

which are experimental, and have their origin in experience, for experience makes the days of men to proceed according to art, and inexperience according to chance, and different persons in different ways are proficient in different arts, and the best persons in the best arts. And our friend Gorgias is one of the best, and the art in which he is a proficient is the noblest.

Gorgias.

SOCRATES, GORGIAS, POLUS.

Answer:— Gorgias is one of the best proficients in the noblest art.

Soc. Polus has been taught how to make a capital speech, Gorgias; but he is not fulfilling the promise which he made to Chaerephon.

Gor. What do you mean, Socrates?

Soc. I mean that he has not exactly answered the question which he was asked.

Gor. Then why not ask him yourself?

Soc. But I would much rather ask you, if you are disposed to answer: for I see, from the few words which Polus has uttered, that he has attended more to the art which is called rhetoric than to dialectic.

Pol. What makes you say so, Socrates?

Soc. Because, Polus, when Chaerephon asked you what was the art which Gorgias knows, you praised it as if you were answering some one who found fault with it, but you never said what the art was.

This is no answer.

Pol. Why, did I not say that it was the noblest of arts?

Soc. Yes, indeed, but that was no answer to the question: nobody asked what was the quality, but what was the nature, of the art, and by what name we were to describe Gorgias.
449 And I would still beg you briefly and clearly, as you answered Chaerephon when he asked you at first, to say what this art is, and what we ought to call Gorgias: Or rather, Gorgias, let me turn to you, and ask the same question,— what are we to call you, and what is the art which you profess?

Gor. Rhetoric, Socrates, is my art.

Better:— Gorgias is a rhetorician and a teacher of rhetoric.

Soc. Then I am to call you a rhetorician?

Gor. Yes, Socrates, and a good one too, if you would call me that which, in Homeric language, 'I boast myself to be.'

Soc. I should wish to do so.

Gor. Then pray do.

Gorgias. *Soc.* And are we to say that you are able to make other men rhetoricians?

SOCRATES, GORGIAS. *Gor.* Yes, that is exactly what I profess to make them, not only at Athens, but in all places.

Soc. And will you continue to ask and answer questions, Gorgias, as we are at present doing, and reserve for another occasion the longer mode of speech which Polus was attempting? Will you keep your promise, and answer shortly the questions which are asked of you?

Gor. Some answers, Socrates, are of necessity longer; but I will do my best to make them as short as possible; for a part of my profession is that I can be as short as any one.

Soc. That is what is wanted, Gorgias; exhibit the shorter method now, and the longer one at some other time.

Gor. Well, I will; and you will certainly say, that you never heard a man use fewer words.

Soc. Very good then; as you profess to be a rhetorician, and a maker of rhetoricians, let me ask you, with what is rhetoric concerned: I might ask with what is weaving concerned, and you would reply (would you not?), with the making of garments?

Gor. Yes.

Soc. And music is concerned with the composition of melodies?

Gor. It is.

Soc. By Herè, Gorgias, I admire the surpassing brevity of your answers.

Gor. Yes, Socrates, I do think myself good at that.

And rhetoric is concerned with discourse. *Soc.* I am glad to hear it; answer me in like manner about rhetoric: with what is rhetoric concerned?

Gor. With discourse.

Soc. What sort of discourse, Gorgias?—such discourse as would teach the sick under what treatment they might get well?

Gor. No.

Soc. Then rhetoric does not treat of all kinds of discourse?

Gor. Certainly not.

Soc. And yet rhetoric makes men able to speak?

Gor. Yes.

Soc. And to understand that about which they speak? *Gorgias.*

Gor. Of course. SOCRATES, GORGIAS.

Soc. But does not the art of medicine, which we were just
450 now mentioning, also make men able to understand and speak about the sick?

Gor. Certainly.

Soc. Then medicine also treats of discourse?

Gor. Yes.

Soc. Of discourse concerning diseases?

Gor. Just so.

Soc. And does not gymnastic also treat of discourse concerning the good or evil condition of the body?

Gor. Very true.

Soc. And the same, Gorgias, is true of the other arts:— all of them treat of discourse concerning the subjects with which they severally have to do. But so are all the other arts.

Gor. Clearly.

Soc. Then why, if you call rhetoric the art which treats of discourse, and all the other arts treat of discourse, do you not call them arts of rhetoric?

Gor. Because, Socrates, the knowledge of the other arts has only to do with some sort of external action, as of the hand; but there is no such action of the hand in rhetoric which works and takes effect only through the medium of discourse. And therefore I am justified in saying that rhetoric treats of discourse.

Soc. I am not sure whether I entirely understand you, but I dare say I shall soon know better; please to answer me a question:— you would allow that there are arts?

Gor. Yes.

Soc. As to the arts generally, they are for the most part concerned with doing, and require little or no speaking; in painting, and statuary, and many other arts, the work may proceed in silence; and of such arts I suppose you would say that they do not come within the province of rhetoric.

Gor. You perfectly conceive my meaning, Socrates.

Soc. But there are other arts which work wholly through the medium of language, and require either no action or very little, as, for example, the arts of arithmetic, of calculation, of geometry, and of playing draughts; in some of these speech You mean to say that rhetoric belongs to that class of arts which

Gorgias. is pretty nearly co-extensive with action, but in most of them the verbal element is greater — they depend wholly on words for their efficacy and power: and I take your meaning to be that rhetoric is an art of this latter sort?

SOCRATES, GORGIAS. is chiefly concerned with words.

Gor. Exactly.

Soc. And yet I do not believe that you really mean to call any of these arts rhetoric; although the precise expression which you used was, that rhetoric is an art which works and takes effect only through the medium of discourse; and an adversary who wished to be captious might say, 'And so, Gorgias, you call arithmetic rhetoric.' But I do not think that you really call arithmetic rhetoric any more than geometry would be so called by you.

And yet you would not call arithmetic rhetoric.

451

Gor. You are quite right, Socrates, in your apprehension of my meaning.

Soc. Well, then, let me now have the rest of my answer:— seeing that rhetoric is one of those arts which works mainly by the use of words, and there are other arts which also use words, tell me what is that quality in words with which rhetoric is concerned:— Suppose that a person asks me about some of the arts which I was mentioning just now; he might say, 'Socrates, what is arithmetic?' and I should reply to him, as you replied to me, that arithmetic is one of those arts which take effect through words. And then he would proceed to ask: 'Words about what?' and I should reply, Words about odd and even numbers, and how many there are of each. And if he asked again: 'What is the art of calculation?' I should say, That also is one of the arts which is concerned wholly with words. And if he further said, 'Concerned with what?' I should say, like the clerks in the assembly, 'as aforesaid' of arithmetic, but with a difference, the difference being that the art of calculation considers not only the quantities of odd and even numbers, but also their numerical relations to themselves and to one another. And suppose, again, I were to say that astronomy is only words — he would ask, 'Words about what, Socrates?' and I should answer, that astronomy tells us about the motions of the stars and sun and moon, and their relative swiftness.

Illustrations.

Gor. You would be quite right, Socrates.

Soc. And now let us have from you, Gorgias, the truth

about rhetoric: which you would admit (would you not?) to be one of those arts which act always and fulfil all their ends through the medium of words?

Gorgias. SOCRATES, GORGIAS.

Gor. True.

Soc. Words which do what? I should ask. To what class of things do the words which rhetoric uses relate?

Rhetoric has to do with words: about the greatest and best of human things.

Gor. To the greatest, Socrates, and the best of human things.

Soc. That again, Gorgias, is ambiguous; I am still in the dark: for which are the greatest and best of human things? I dare say that you have heard men singing at feasts the old drinking song, in which the singers enumerate the goods of life, first health, beauty next, thirdly, as the writer of the song says, wealth honestly obtained.

452 *Gor.* Yes, I know the song; but what is your drift?

Soc. I mean to say, that the producers of those things which the author of the song praises, that is to say, the physician, the trainer, the money-maker, will at once come to you, and first the physician will say: 'O Socrates, Gorgias is deceiving you, for my art is concerned with the greatest good of men and not his.' And when I ask, Who are you? he will reply, 'I am a physician.' What do you mean? I shall say. Do you mean that your art produces the greatest good? 'Certainly,' he will answer, 'for is not health the greatest good? What greater good can men have, Socrates?' And after him the trainer will come and say, 'I too, Socrates, shall be greatly surprised if Gorgias can show more good of his art than I can show of mine.' To him again I shall say, Who are you, honest friend, and what is your business? 'I am a trainer,' he will reply, 'and my business is to make men beautiful and strong in body.' When I have done with the trainer, there arrives the money-maker, and he, as I expect, will utterly despise them all. 'Consider, Socrates,' he will say, 'whether Gorgias or any one else can produce any greater good than wealth.' Well, you and I say to him, and are you a creator of wealth? 'Yes,' he replies. And who are you? 'A money-maker.' And do you consider wealth to be the greatest good of man? 'Of course,' will be his reply. And we shall rejoin: Yes; but our friend Gorgias contends that his

But which are they?

Gorgias. art produces a greater good than yours. And then he will be sure to go on and ask, 'What good? Let Gorgias answer.' Now I want you, Gorgias, to imagine that this question is asked of you by them and by me; What is that which, as you say, is the greatest good of man, and of which you are the creator? Answer us.

SOCRATES, GORGIAS.

Freedom and power,

Gor. That good, Socrates, which is truly the greatest, being that which gives to men freedom in their own persons, and to individuals the power of ruling over others in their several states.

Soc. And what would you consider this to be?

and the word which gives them.

Gor. What is there greater than the word which persuades the judges in the courts, or the senators in the council, or the citizens in the assembly, or at any other political meeting?—if you have the power of uttering this word, you will have the physician your slave, and the trainer your slave, and the money-maker of whom you talk will be found to gather treasures, not for himself, but for you who are able to speak and to persuade the multitude.

Soc. Now I think, Gorgias, that you have very accurately explained what you conceive to be the art of rhetoric; and you mean to say, if I am not mistaken, that rhetoric is the 453
artificer of persuasion, having this and no other business, and that this is her crown and end. Do you know any other effect of rhetoric over and above that of producing persuasion?

Rhetoric is the art of persuading, says Gorgias.

Gor. No: the definition seems to me very fair, Socrates; for persuasion is the chief end of rhetoric.

Soc. Then hear me, Gorgias, for I am quite sure that if there ever was a man who entered on the discussion of a matter from a pure love of knowing the truth, I am such a one, and I should say the same of you.

Gor. What is coming, Socrates?

Soc. I will tell you: I am very well aware that I do not know what, according to you, is the exact nature, or what are the topics of that persuasion of which you speak, and which is given by rhetoric; although I have a suspicion about both the one and the other. And I am going to ask—what is this power of persuasion which is given by rhetoric, and about what? But why, if I have a suspicion, do I ask

instead of telling you? Not for your sake, but in order that the argument may proceed in such a manner as is most likely to set forth the truth. And I would have you observe, that I am right in asking this further question: If I asked, 'What sort of a painter is Zeuxis?' and you said, 'The painter of figures,' should I not be right in asking, 'What kind of figures, and where do you find them?'

Gorgias. SOCRATES, GORGIAS.

Gor. Certainly.

Soc. And the reason for asking this second question would be, that there are other painters besides, who paint many other figures?

Gor. True.

Soc. But if there had been no one but Zeuxis who painted them, then you would have answered very well?

Gor. Quite so.

Soc. Now I want to know about rhetoric in the same way; — is rhetoric the only art which brings persuasion, or do other arts have the same effect? I mean to say — Does he who teaches anything persuade men of that which he teaches or not?

But so is arithmetic, so is painting.

Gor. He persuades, Socrates, — there can be no mistake about that.

Soc. Again, if we take the arts of which we were just now speaking: — do not arithmetic and the arithmeticians teach us the properties of number?

Gor. Certainly.

Soc. And therefore persuade us of them?

Gor. Yes.

Soc. Then arithmetic as well as rhetoric is an artificer of persuasion?

Gor. Clearly.

Soc. And if any one asks us what sort of persuasion, and about what, — we shall answer, persuasion which teaches the quantity of odd and even; and we shall be able to show that
454 all the other arts of which we were just now speaking are artificers of persuasion, and of what sort, and about what.

Gor. Very true.

Soc. Then rhetoric is not the only artificer of persuasion?

Gor. True.

Soc. Seeing, then, that not only rhetoric works by per-

Gorgias.

SOCRATES, GORGIAS.

Of what persuasion is rhetoric the artificer?

suasion, but that other arts do the same, as in the case of the painter, a question has arisen which is a very fair one: Of what persuasion is rhetoric the artificer, and about what? — is not that a fair way of putting the question?

Gor. I think so.

Soc. Then, if you approve the question, Gorgias, what is the answer?

Of persuasion in the courts and assemblies about the just and unjust.

Gor. I answer, Socrates, that rhetoric is the art of persuasion in courts of law and other assemblies, as I was just now saying, and about the just and unjust.

Soc. And that, Gorgias, was what I was suspecting to be your notion; yet I would not have you wonder if by-and-by I am found repeating a seemingly plain question; for I ask not in order to confute you, but as I was saying that the argument may proceed consecutively, and that we may not get the habit of anticipating and suspecting the meaning of one another's words; I would have you develope your own views in your own way, whatever may be your hypothesis.

Gor. I think that you are quite right, Socrates.

Soc. Then let me raise another question; there is such a thing as 'having learned'?

Gor. Yes.

Soc. And there is also 'having believed'?

Gor. Yes.

Knowledge and belief are not the same things; for there may be a false belief, but not a false knowledge.

Soc. And is the 'having learned' the same as 'having believed,' and are learning and belief the same things?

Gor. In my judgment, Socrates, they are not the same.

Soc. And your judgment is right, as you may ascertain in this way:— If a person were to say to you, 'Is there, Gorgias, a false belief as well as a true?'— you would reply, if I am not mistaken, that there is.

Gor. Yes.

Soc. Well, but is there a false knowledge as well as a true?

Gor. No.

Soc. No, indeed; and this again proves that knowledge and belief differ.

Gor. Very true.

Soc. And yet those who have learned as well as those who have believed are persuaded?

Gor. Just so. *Gorgias.*

Soc. Shall we then assume two sorts of persuasion,— one which is the source of belief without knowledge, as the other is of knowledge? SOCRATES, GORGIAS.

Gor. By all means.

Soc. And which sort of persuasion does rhetoric create in courts of law and other assemblies about the just and unjust, the sort of persuasion which gives belief without knowledge, or that which gives knowledge?

455 *Gor.* Clearly, Socrates, that which only gives belief.

Soc. Then rhetoric, as would appear, is the artificer of a persuasion which creates belief about the just and unjust, but gives no instruction about them? And rhetoric is only the creator of a belief, but gives no instruction.

Gor. True.

Soc. And the rhetorician does not instruct the courts of law or other assemblies about things just and unjust, but he creates belief about them; for no one can be supposed to instruct such a vast multitude about such high matters in a short time?

Gor. Certainly not.

Soc. Come, then, and let us see what we really mean about rhetoric; for I do not know what my own meaning is as yet. When the assembly meets to elect a physician or a shipwright or any other craftsman, will the rhetorician be taken into counsel? Surely not. For at every election he ought to be chosen who is most skilled; and, again, when walls have to be built or harbours or docks to be constructed, not the rhetorician but the master workman will advise; or when generals have to be chosen and an order of battle arranged, or a position taken, then the military will advise and not the rhetoricians: what do you say, Gorgias? Since you profess to be a rhetorician and a maker of rhetoricians, I cannot do better than learn the nature of your art from you. And here let me assure you that I have your interest in view as well as my own. For likely enough some one or other of the young men present might desire to become your pupil, and in fact I see some, and a good many too, who have this wish, but they would be too modest to question you. And therefore when you are interrogated by me, I would have you imagine that you are interrogated by them. 'What is the Neither is the rhetorician taken into counsel when anything has to be done.

Gorgias. use of coming to you, Gorgias?' they will say — 'about what will you teach us to advise the state?— about the just and unjust only, or about those other things also which Socrates has just mentioned?' How will you answer them?

SOCRATES, GORGIAS.

But, says Gorgias, he will persuade people to do it.

Gor. I like your way of leading us on, Socrates, and I will endeavour to reveal to you the whole nature of rhetoric. You must have heard, I think, that the docks and the walls of the Athenians and the plan of the harbour were devised in accordance with the counsels, partly of Themistocles, and partly of Pericles, and not at the suggestion of the builders.

Of pe in the and

Soc. Such is the tradition, Gorgias, about Themistocles; and I myself heard the speech of Pericles when he advised us about the middle wall.

Gor. And you will observe, Socrates, that when a decision 456 has to be given in such matters the rhetoricians are the advisers; they are the men who win their point.

Soc. I had that in my admiring mind, Gorgias, when I asked what is the nature of rhetoric, which always appears to me, when I look at the matter in this way, to be a marvel of greatness.

Gor. A marvel, indeed, Socrates, if you only knew how rhetoric comprehends and holds under her sway all the inferior arts. Let me offer you a striking example of this. On several occasions I have been with my brother Herodicus or some other physician to see one of his patients, who would not allow the physician to give him medicine, or apply the knife or hot iron to him; and I have persuaded him to do for me what he would not do for the physician just by the use of rhetoric. And I say that if a rhetorician and a physician were to go to any city, and had there to argue in the Ecclesia or any other assembly as to which of them should be elected state-physician, the physician would have no chance; but he who could speak would be chosen if he wished; and in a contest with a man of any other profession the rhetorician more than any one would have the power of getting himself chosen, for he can speak more persuasively to the multitude than any of them, and on any subject. Such is the nature and power of the art of rhetoric! And yet, Socrates, rhetoric should be used like any other competitive art, not against everybody,— the

The rhetorician more than a match for a man of any other profession.

rhetorician ought not to abuse his strength any more than a pugilist or pancratiast or other master of fence;—because he has powers which are more than a match either for friend or enemy, he ought not therefore to strike, stab, or slay his friends. Suppose a man to have been trained in the palestra and to be a skilful boxer,—he in the fulness of his strength goes and strikes his father or mother or one of his familiars or friends; but that is no reason why the trainers or fencing-masters should be held in detestation or banished from the city;—surely not. For they taught their art for a good purpose, to be used against enemies and evil-doers, in self-defence not in aggression, and others have perverted
457 their instructions, and turned to a bad use their own strength and skill. But not on this account are the teachers bad, neither is the art in fault, or bad in itself; I should rather say that those who make a bad use of the art are to blame. And the same argument holds good of rhetoric; for the rhetorician can speak against all men and upon any subject,—in short, he can persuade the multitude better than any other man of anything which he pleases, but he should not therefore seek to defraud the physician or any other artist of his reputation merely because he has the power; he ought to use rhetoric fairly, as he would also use his athletic powers. And if after having become a rhetorician he makes a bad use of his strength and skill, his instructor surely ought not on that account to be held in detestation or banished. For he was intended by his teacher to make a good use of his instructions, but he abuses them. And therefore he is the person who ought to be held in detestation, banished, and put to death, and not his instructor.

Gorgias.

SOCRATES, GORGIAS.

His pupils may make a bad use of his instructions, but he is not to be blamed for this.

Soc. You, Gorgias, like myself, have had great experience of disputations, and you must have observed, I think, that they do not always terminate in mutual edification, or in the definition by either party of the subjects which they are discussing; but disagreements are apt to arise—somebody says that another has not spoken truly or clearly; and then they get into a passion and begin to quarrel, both parties conceiving that their opponents are arguing from personal feeling only and jealousy of themselves, not from any interest in the question at issue. And sometimes they will

If Gorgias, like Socrates, is one of those who rejoice in being refuted, he would like to cross-examine him; if not, not.

Gorgias. SOCRATES, GORGIAS, CHAEREPHON, CALLICLES.

go on abusing one another until the company at last are quite vexed at themselves for ever listening to such fellows. Why do I say this? Why, because I cannot help feeling that you are now saying what is not quite consistent or accordant with what you were saying at first about rhetoric. And I am afraid to point this out to you, lest you should think that I have some animosity against you, and that I speak, not for the sake of discovering the truth, but from jealousy of you. Now if you are one of my sort, I should like to cross-examine you, but if not I will let you alone. And what is my sort? 458
you will ask. I am one of those who are very willing to be refuted if I say anything which is not true, and very willing to refute any one else who says what is not true, and quite as ready to be refuted as to refute; for I hold that this is the greater gain of the two, just as the gain is greater of being cured of a very great evil than of curing another. For I imagine that there is no evil which a man can endure so great as an erroneous opinion about the matters of which we are speaking; and if you claim to be one of my sort, let us have the discussion out, but if you would rather have done, no matter;—let us make an end of it.

Gor. I should say, Socrates, that I am quite the man whom you indicate; but, perhaps, we ought to consider the audience, for, before you came, I had already given a long exhibition, and if we proceed the argument may run on to a great length. And therefore I think that we should consider whether we may not be detaining some part of the company when they are wanting to do something else.

Delight of the audience at the prospect of an argument.

Chaer. You hear the audience cheering, Gorgias and Socrates, which shows their desire to listen to you; and for myself, Heaven forbid that I should have any business on hand which would take me away from a discussion so interesting and so ably maintained.

Cal. By the gods, Chaerephon, although I have been present at many discussions, I doubt whether I was ever so much delighted before, and therefore if you go on discoursing all day I shall be the better pleased.

Soc. I may truly say, Callicles, that I am willing, if Gorgias is.

Gor. After all this, Socrates, I should be disgraced if I

refused, especially as I have promised to answer all comers; in accordance with the wishes of the company, then, do you begin, and ask of me any question which you like. *Gorgias.* SOCRATES, GORGIAS.

Soc. Let me tell you then, Gorgias, what surprises me in your words; though I dare say that you may be right, and I may have misunderstood your meaning. You say that you can make any man, who will learn of you, a rhetorician?

Gor. Yes.

Soc. Do you mean that you will teach him to gain the ears of the multitude on any subject, and this not by instruction
459 but by persuasion?

Gor. Quite so.

Soc. You were saying, in fact, that the rhetorician will have greater powers of persuasion than the physician even in a matter of health? The rhetorician has greater powers of persuasion with the mob than e. g. the physician.

Gor. Yes, with the multitude,— that is.

Soc. You mean to say, with the ignorant; for with those who know he cannot be supposed to have greater powers of persuasion.

Gor. Very true.

Soc. But if he is to have more power of persuasion than the physician, he will have greater power than he who knows? The more ignorant therefore will have more power than he who knows.

Gor. Certainly.

Soc. Although he is not a physician:— is he?

Gor. No.

Soc. And he who is not a physician must, obviously, be ignorant of what the physician knows.

Gor. Clearly.

Soc. Then, when the rhetorician is more persuasive than the physician, the ignorant is more persuasive with the ignorant than he who has knowledge?— is not that the inference?

Gor. In the case supposed:— yes.

Soc. And the same holds of the relation of rhetoric to all the other arts; the rhetorician need not know the truth about things; he has only to discover some way of persuading the ignorant that he has more knowledge than those who know?

Gor. Yes, Socrates, and is not this a great comfort?— not to have learned the other arts, but the art of rhetoric only,

Gorgias. and yet to be in no way inferior to the professors of them?

SOCRATES, GORGIAS.

And is the rhetorician as ignorant of good and evil, just and unjust, as about special arts; or will Gorgias teach him these things first?

Soc. Whether the rhetorician is or is not inferior on this account is a question which we will hereafter examine if the enquiry is likely to be of any service to us; but I would rather begin by asking, whether he is or is not as ignorant of the just and unjust, base and honourable, good and evil, as he is of medicine and the other arts; I mean to say, does he really know anything of what is good and evil, base or honourable, just or unjust in them; or has he only a way with the ignorant of persuading them that he not knowing is to be esteemed to know more about these things than some one else who knows? Or must the pupil know these things and come to you knowing them before he can acquire the art of rhetoric? If he is ignorant, you who are the teacher of rhetoric will not teach him — it is not your business; but you will make him seem to the multitude to know them, when he does not know them; and seem to be a good man, when he is not. Or will you be unable to teach him rhetoric 460
at all, unless he knows the truth of these things first? What is to be said about all this? By heaven, Gorgias, I wish that you would reveal to me the power of rhetoric, as you were saying that you would.

He must be taught.

Gor. Well, Socrates, I suppose that if the pupil does chance not to know them, he will have to learn of me these things as well.

Soc. Say no more, for there you are right; and so he whom you make a rhetorician must either know the nature of the just and unjust already, or he must be taught by you.

Gor. Certainly.

Soc. Well, and is not he who has learned carpentering a carpenter?

Gor. Yes.

Soc. And he who has learned music a musician?

Gor. Yes.

Soc. And he who has learned medicine is a physician, in like manner? He who has learned anything whatever is that which his knowledge makes him.

Gor. Certainly.

Gorgias.

SOCRATES, GORGIAS.

He who has learned what is just, is admitted to be just and to act justly. But if so, the rhetorician, having learned what is just, must act justly, and can never therefore make an ill use of rhetoric.

Soc. And in the same way, he who has learned what is just is just?

Gor. To be sure.

Soc. And he who is just may be supposed to do what is just?

Gor. Yes.

Soc. And must not[1] the just man always desire to do what is just?

Gor. That is clearly the inference.

Soc. Surely, then, the just man will never consent to do injustice?

Gor. Certainly not.

Soc. And according to the argument the rhetorician must be a just man?

Gor. Yes.

Soc. And will therefore never be willing to do injustice?

Gor. Clearly not.

Soc. But do you remember saying just now that the trainer is not to be accused or banished if the pugilist makes a wrong use of his pugilistic art; and in like manner, if the rhetorician makes a bad and unjust use of his rhetoric, that is not to be laid to the charge of his teacher, who is not to be banished, but the wrong-doer himself who made a bad use of his rhetoric — he is to be banished — was not that said?

Gor. Yes, it was.

Soc. But now we are affirming that the aforesaid rhetorician will never have done injustice at all?

Gor. True.

Soc. And at the very outset, Gorgias, it was said that rhetoric treated of discourse, not [like arithmetic] about odd and even, but about just and unjust? Was not this said?

Gor. Yes.

Soc. I was thinking at the time, when I heard you saying so, that rhetoric, which is always discoursing about justice, could not possibly be an unjust thing. But when you added, shortly afterwards, that the rhetorician might make a bad use
461 of rhetoric I noted with surprise the inconsistency into which you had fallen; and I said, that if you thought, as I did, that

[1] Omitting the words *τὸν ῥητορικὸν δίκαιον εἶναι* and *δὲ* in next clause.

Gorgias. SOCRATES, POLUS.

there was a gain in being refuted, there would be an advantage in going on with the question, but if not, I would leave off. And in the course of our investigations, as you will see yourself, the rhetorician has been acknowledged to be incapable of making an unjust use of rhetoric, or of willingness to do injustice. By the dog, Gorgias, there will be a great deal of discussion, before we get at the truth of all this.

The paradoxes of Socrates arouse the ire of Polus.

Polus. And do even you, Socrates, seriously believe what you are now saying about rhetoric? What! because Gorgias was ashamed to deny that the rhetorician knew the just and the honourable and the good, and admitted that to any one who came to him ignorant of them he could teach them, and then out of this admission there arose a contradiction — the thing which you so dearly love, and to which not he, but you, brought the argument by your captious questions — [do you seriously believe that there is any truth in all this?] For will any one ever acknowledge that he does not know, or cannot teach, the nature of justice? The truth is, that there is great want of manners in bringing the argument to such a pass.

Soc. Illustrious Polus, the reason why we provide ourselves with friends and children is, that when we get old and stumble, a younger generation may be at hand to set us on our legs again in our words and in our actions: and now, if I and Gorgias are stumbling, here are you who should raise us up; and I for my part engage to retract any error into which you may think that I have fallen — upon one condition:

Socrates is willing enough to receive his correction, if he will only be brief.

Pol. What condition?

Soc. That you contract, Polus, the prolixity of speech in which you indulged at first.

'Am I to be deprived of speech in a free state?'

Pol. What! do you mean that I may not use as many words as I please?

Soc. Only to think, my friend, that having come on a visit to Athens, which is the most free-spoken state in Hellas, you when you got there, and you alone, should be deprived of the power of speech — that would be hard indeed. But then consider my case: — shall not I be very hardly used, if, when you are making a long oration, and refusing to answer what you are asked, I am compelled to stay and listen to you, and may not go away? I say rather, if you have a real interest in the

'Am I to be compelled to listen?'

462

argument, or, to repeat my former expression, have any desire to set it on its legs, take back any statement which you please; and in your turn ask and answer, like myself and Gorgias — refute and be refuted: for I suppose that you would claim to know what Gorgias knows — would you not?

Pol. Yes.

Soc. And you, like him, invite any one to ask you about anything which he pleases, and you will know how to answer him?

Pol. To be sure.

Soc. And now, which will you do, ask or answer?

Pol. I will ask; and do you answer me, Socrates, the same question which Gorgias, as you suppose, is unable to answer: What is rhetoric?

Soc. Do you mean what sort of an art?

Pol. Yes.

Socrates in his answer contrives to give Polus a lesson.

Soc. To say the truth, Polus, it is not an art at all, in my opinion.

Pol. Then what, in your opinion, is rhetoric?

Soc. A thing which, as I was lately reading in a book of yours, you say created art.

Pol. What thing?

Soc. I should say a sort of experience.

Pol. Does rhetoric seem to you to be an experience?

Soc. That is my view, but you may be of another mind.

Pol. An experience in what?

Soc. An experience in producing a sort of delight and gratification.

Pol. And if able to gratify others, must not rhetoric be a fine thing?

Soc. What are you saying, Polus? Why do you ask me whether rhetoric is a fine thing or not, when I have not as yet told you what rhetoric is?

Pol. Did I not hear you say that rhetoric was a sort of experience?

Soc. Will you, who are so desirous to gratify others, afford a slight gratification to me?

Pol. I will.

Soc. Will you ask me, what sort of an art is cookery?

Pol. What sort of an art is cookery?

Gorgias.

SOCRATES, POLUS, GORGIAS.

He puts rhetoric and cookery in the same class:

Soc. Not an art at all, Polus.

Pol. What then?

Soc. I should say an experience.

Pol. In what? I wish that you would explain to me.

Soc. An experience in producing a sort of delight and gratification, Polus.

Pol. Then are cookery and rhetoric the same?

Soc. No, they are only different parts of the same profession.

Pol. Of what profession?

Soc. I am afraid that the truth may seem discourteous; and I hesitate to answer, lest Gorgias should imagine that I am making fun of his own profession. For whether or no this is that art of rhetoric which Gorgias practises I 463
really cannot tell:—from what he was just now saying, nothing appeared of what he thought of his art, but the rhetoric which I mean is a part of a not very creditable whole.

Gor. A part of what, Socrates? Say what you mean, and never mind me.

and that class is flattery.

Soc. In my opinion then, Gorgias, the whole of which rhetoric is a part is not an art at all, but the habit of a bold and ready wit, which knows how to manage mankind: this habit I sum up under the word 'flattery'; and it appears to me to have many other parts, one of which is cookery, which may seem to be an art, but, as I maintain, is only an experience or routine and not an art:—another part is rhetoric, and the art of attiring and sophistry are two others: thus there are four branches, and four different things answering to them. And Polus may ask, if he likes, for he has not as yet been informed, what part of flattery is rhetoric: he did not see that I had not yet answered him when he proceeded to ask a further question: Whether I do not think rhetoric a fine thing? But I shall not tell him whether rhetoric is a fine thing or not, until I have first answered, 'What is rhetoric?' For that would not be right, Polus; but I shall be happy to answer, if you will ask me, What part of flattery is rhetoric?

Pol. I will ask, and do you answer? What part of flattery is rhetoric?

Gorgias.

SOCRATES, POLUS, GORGIAS.

Soc. Will you understand my answer? Rhetoric, according to my view, is the ghost or counterfeit of a part of politics.

Rhetoric is the shadow of a part of politics.

Pol. And noble or ignoble?

Soc. Ignoble, I should say, if I am compelled to answer, for I call what is bad ignoble:—though I doubt whether you understand what I was saying before.

Gor. Indeed, Socrates, I cannot say that I understand myself.

Soc. I do not wonder, Gorgias; for I have not as yet explained myself, and our friend Polus, colt by name and colt by nature, is apt to run away[1].

'But what in the world does this mean?'

Gor. Never mind him, but explain to me what you mean by saying that rhetoric is the counterfeit of a part of politics.

Soc. I will try, then, to explain my notion of rhetoric, and
464 if I am mistaken, my friend Polus shall refute me. We may assume the existence of bodies and of souls?

Gor. Of course.

Returning to first principles, Socrates assumes the existence of souls and bodies which may or may not be in a good condition, real or apparent.

Soc. You would further admit that there is a good condition of either of them?

Gor. Yes.

Soc. Which condition may not be really good, but good only in appearance? I mean to say, that there are many persons who appear to be in good health, and whom only a physician or trainer will discern at first sight not to be in good health.

Gor. True.

Soc. And this applies not only to the body, but also to the soul: in either there may be that which gives the appearance of health and not the reality?

Gor. Yes, certainly.

To the soul corresponds the art of politics which has two parts, legislation and justice, and to the body cor-

Soc. And now I will endeavour to explain to you more clearly what I mean: The soul and body being two, have two arts corresponding to them: there is the art of politics attending on the soul; and another art attending on the body, of which I know no single name, but which may be described as having two divisions, one of them gymnastic, and the other medicine. And in politics there is a legislative

[1] There is an untranslatable play on the name 'Polus,' which means 'a colt.'

Gorgias.

SOCRATES.

responds another nameless art of training which has two parts, medicine and gymnastic; and these four have four shams corresponding to them.

part, which answers to gymnastic, as justice does to medicine; and the two parts run into one another, justice having to do with the same subject as legislation, and medicine with the same subject as gymnastic, but with a difference. Now, seeing that there are these four arts, two attending on the body and two on the soul for their highest good; flattery knowing, or rather guessing their natures, has distributed herself into four shams or simulations of them; she puts on the likeness of some one or other of them, and pretends to be that which she simulates, and having no regard for men's highest interests, is ever making pleasure the bait of the unwary, and deceiving them into the belief that she is of the highest value to them. Cookery simulates the disguise of medicine, and pretends to know what food is the best for the body; and if the physician and the cook had to enter into a competition in which children were the judges, or men who had no more sense than children, as to which of them best understands the goodness or badness of food, the physician would be starved to death. A flattery I deem this to be and of an ignoble sort, Polus, for to you 465
I am now addressing myself, because it aims at pleasure without any thought of the best. An art I do not call it, but only an experience, because it is unable to explain or to give a reason of the nature of its own applications. And I do not call any irrational thing an art; but if you dispute my words, I am prepared to argue in defence of them.

Cookery, then, I maintain to be a flattery which takes the form of medicine; and tiring, in like manner, is a flattery which takes the form of gymnastic, and is knavish, false, ignoble, illiberal, working deceitfully by the help of lines, and colours, and enamels, and garments, and making men affect a spurious beauty to the neglect of the true beauty which is given by gymnastic.

The shams are cooking, dressing up, sophistry, rhetoric.

I would rather not be tedious, and therefore I will only say, after the manner of the geometricians, (for I think that by this time you will be able to follow,)

as tiring : gymnastic : : cookery : medicine;

or rather,

as tiring : gymnastic : : sophistry : legislation;

and

as cookery : medicine : : rhetoric : justice.

And this, I say, is the natural difference between the rhetorician and the sophist, but by reason of their near connection, they are apt to be jumbled up together, neither do they know what to make of themselves, nor do other men know what to make of them. For if the body presided over itself, and were not under the guidance of the soul, and the soul did not discern and discriminate between cookery and medicine, but the body was made the judge of them, and the rule of judgment was the bodily delight which was given by them, then the word of Anaxagoras, that word with which you, friend Polus, are so well acquainted, would prevail far and wide: 'Chaos' would come again, and cookery, health, and medicine would mingle in an indiscriminate mass. And now I have told you my notion of rhetoric, which is, in relation to the soul, what cookery is to the body. I may have been inconsistent in making a long speech, when I would not allow you to discourse at length. But I think that I may be excused, because you did not understand me, and could make no use of my answer when I spoke shortly, and there-
466 fore I had to enter into an explanation. And if I show an equal inability to make use of yours, I hope that you will speak at equal length; but if I am able to understand you, let me have the benefit of your brevity, as is only fair: And now you may do what you please with my answer.

Socrates excuses himself for the length at which he has spoken.

Pol. What do you mean? do you think that rhetoric is flattery?

Soc. Nay, I said a part of flattery; if at your age, Polus, you cannot remember, what will you do by-and-by, when you get older?

Pol. And are the good rhetoricians meanly regarded in states, under the idea that they are flatterers?

Soc. Is that a question or the beginning of a speech?

Pol. I am asking a question.

Soc. Then my answer is, that they are not regarded at all.

Pol. How not regarded? Have they not very great power in states?

Polus cannot be made to understand that rhetoricians have

Soc. Not if you mean to say that power is a good to the possessor.

Gorgias.

SOCRATES, POLUS.

Pol. And that is what I do mean to say.

Soc. Then, if so, I think that they have the least power of all the citizens.

no real power in a state, because they do not do what they ultimately will, but only what they think best.

Pol. What! are they not like tyrants? They kill and despoil and exile any one whom they please.

Soc. By the dog, Polus, I cannot make out at each deliverance of yours, whether you are giving an opinion of your own, or asking a question of me.

Pol. I am asking a question of you.

Soc. Yes, my friend, but you ask two questions at once.

Pol. How two questions?

Soc. Why, did you not say just now that the rhetoricians are like tyrants, and that they kill and despoil or exile any one whom they please?

Pol. I did.

Soc. Well then, I say to you that here are two questions in one, and I will answer both of them. And I tell you, Polus, that rhetoricians and tyrants have the least possible power in states, as I was just now saying; for they do literally nothing which they will, but only what they think best.

Pol. And is not that a great power?

Soc. Polus has already said the reverse.

Pol. Said the reverse! nay, that is what I assert.

Soc. No, by the great — what do you call him? — not you, for you say that great power is a good to him who has the power.

Pol. I do.

Soc. And would you maintain that if a fool does what he thinks best, this is a good, and would you call this great power?

Pol. I should not.

For a fool and a flatterer cannot know what is good.

Soc. Then you must prove that the rhetorician is not a fool, and that rhetoric is an art and not a flattery — and so you will have refuted me; but if you leave me unrefuted, why, the rhetoricians who do what they think best in states, and the tyrants, will have nothing upon which to congratulate themselves, if, as you say, power be indeed a good, admitting at the same time that what is done without sense is an evil. 467

Pol. Yes; I admit that.

Soc. How then can the rhetoricians or the tyrants have great power in states, unless Polus can refute Socrates, and prove to him that they do as they will? *Gorgias.* SOCRATES, POLUS.

Pol. This fellow —

Soc. I say that they do not do as they will; — now refute me.

Pol. Why, have you not already said that they do as they think best?

Soc. And I say so still.

Pol. Then surely they do as they will?

Soc. I deny it.

Pol. But they do what they think best?

Soc. Aye.

Pol. That, Socrates, is monstrous and absurd.

Soc. Good words, good Polus, as I may say in your own peculiar style; but if you have any questions to ask of me, either prove that I am in error or give the answer yourself.

Pol. Very well, I am willing to answer that I may know what you mean.

Soc. Do men appear to you to will that which they do, or to will that further end for the sake of which they do a thing? when they take medicine, for example, at the bidding of a physician, do they will the drinking of the medicine which is painful, or the health for the sake of which they drink?

Pol. Clearly, the health.

Soc. And when men go on a voyage or engage in business, they do not will that which they are doing at the time; for who would desire to take the risk of a voyage or the trouble of business? — But they will, to have the wealth for the sake of which they go on a voyage.

Pol. Certainly.

Soc. And is not this universally true? If a man does something for the sake of something else, he wills not that which he does, but that for the sake of which he does it. A man cannot will unless he knows the ultimate good for the sake of which he acts.

Pol. Yes.

Soc. And are not all things either good or evil, or intermediate and indifferent?

Pol. To be sure, Socrates.

Gorgias.

SOCRATES, POLUS.

Soc. Wisdom and health and wealth and the like you would call goods, and their opposites evils?

Pol. I should.

Soc. And the things which are neither good nor evil, and 468
which partake sometimes of the nature of good and at other times of evil, or of neither, are such as sitting, walking, running, sailing; or, again, wood, stones, and the like:—these are the things which you call neither good nor evil?

Pol. Exactly so.

Soc. Are these indifferent things done for the sake of the good, or the good for the sake of the indifferent?

Pol. Clearly, the indifferent for the sake of the good.

Soc. When we walk we walk for the sake of the good, and under the idea that it is better to walk, and when we stand we stand equally for the sake of the good?

Pol. Yes.

Soc. And when we kill a man we kill him or exile him or despoil him of his goods, because, as we think, it will conduce to our good?

Pol. Certainly.

Soc. Men who do any of these things do them for the sake of the good?

Pol. Yes.

Soc. And did we not admit that in doing something for the sake of something else, we do not will those things which we do, but that other thing for the sake of which we do them?

Pol. Most true.

Soc. Then we do not will simply to kill a man or to exile him or to despoil him of his goods, but we will to do that which conduces to our good, and if the act is not conducive to our good we do not will it; for we will, as you say, that which is our good, but that which is neither good nor evil, or simply evil, we do not will. Why are you silent, Polus? Am I not right?

Pol. You are right.

Soc. Hence we may infer, that if any one, whether he be a tyrant or a rhetorician, kills another or exiles another or deprives him of his property, under the idea that the act is for his own interests when really not for his own interests, he may be said to do what seems best to him?

Pol. Yes.

Soc. But does he do what he wills if he does what is evil? Why do you not answer?

No man does what he wills who does what is evil.

Pol. Well, I suppose not.

Soc. Then if great power is a good as you allow, will such a one have great power in a state?

Pol. He will not.

Soc. Then I was right in saying that a man may do what seems good to him in a state, and not have great power, and not do what he wills?

Pol. As though you, Socrates, would not like to have the power of doing what seemed good to you in the state, rather than not; you would not be jealous when you saw any one killing or despoiling or imprisoning whom he pleased, Oh, no!

469 *Soc.* Justly or unjustly, do you mean?

Pol. In either case is he not equally to be envied?

Soc. Forbear, Polus!

Pol. Why 'forbear'?

Soc. Because you ought not to envy wretches who are not to be envied, but only to pity them.

Pol. And are those of whom I spoke wretches?

Soc. Yes, certainly they are.

He who makes a bad use of power is not to be envied, but pitied.

Pol. And so you think that he who slays any one whom he pleases, and justly slays him, is pitiable and wretched?

Soc. No, I do not say that of him: but neither do I think that he is to be envied.

Pol. Were you not saying just now that he is wretched?

Soc. Yes, my friend, if he killed another unjustly, in which case he is also to be pitied; and he is not to be envied if he killed him justly.

Pol. At any rate you will allow that he who is unjustly put to death is wretched, and to be pitied?

Soc. Not so much, Polus, as he who kills him, and not so much as he who is justly killed.

Pol. How can that be, Socrates?

Soc. That may very well be, inasmuch as doing injustice is the greatest of evils.

Pol. But is it the greatest? Is not suffering injustice a greater evil?

Gorgias. SOCRATES, POLUS.

Soc. Certainly not.

Pol. Then would you rather suffer than do injustice?

Better to suffer than to do injustice.

Soc. I should not like either, but if I must choose between them, I would rather suffer than do.

Pol. Then you would not wish to be a tyrant?

Soc. Not if you mean by tyranny what I mean.

Pol. I mean, as I said before, the power of doing whatever seems good to you in a state, killing, banishing, doing in all things as you like.

A tyrant has no real power any more than a man who runs out into the Agora carrying a dagger.

Soc. Well then, illustrious friend, when I have said my say, do you reply to me. Suppose that I go into a crowded Agora, and take a dagger under my arm. Polus, I say to you, I have just acquired rare power, and become a tyrant; for if I think that any of these men whom you see ought to be put to death, the man whom I have a mind to kill is as good as dead; and if I am disposed to break his head or tear his garment, he will have his head broken or his garment torn in an instant. Such is my great power in this city. And if you do not believe me, and I show you the dagger, you would probably reply: Socrates, in that sort of way any one may have great power — he may burn any house which he pleases, and the docks and triremes of the Athenians, and all their other vessels, whether public or private — but can you believe that this mere doing as you think best is great power?

Pol. Certainly not such doing as this.

Soc. But can you tell me why you disapprove of such a 470
power?

Pol. I can.

Soc. Why then?

Pol. Why, because he who did as you say would be certain to be punished.

Soc. And punishment is an evil?

Pol. Certainly.

Soc. And you would admit once more, my good sir, that great power is a benefit to a man if his actions turn out to his advantage, and that this is the meaning of great power; and if not, then his power is an evil and is no power. But let us look at the matter in another way: — do we not acknowledge that the things of which we were speaking, the infliction of

death, and exile, and the deprivation of property are sometimes a good and sometimes not a good?

SOCRATES, POLUS.

Pol. Certainly.

Soc. About that you and I may be supposed to agree?

Even what we commonly call the evils of life may be goods in disguise.

Pol. Yes.

Soc. Tell me, then, when do you say that they are good and when that they are evil — what principle do you lay down?

Pol. I would rather, Socrates, that you should answer as well as ask that question.

Soc. Well, Polus, since you would rather have the answer from me, I say that they are good when they are just, and evil when they are unjust.

Pol. You are hard of refutation, Socrates, but might not a child refute that statement?

Soc. Then I shall be very grateful to the child, and equally grateful to you if you will refute me and deliver me from my foolishness. And I hope that refute me you will, and not weary of doing good to a friend.

Pol. Yes, Socrates, and I need not go far or appeal to antiquity; events which happened only a few days ago are enough to refute you, and to prove that many men who do wrong are happy.

Soc. What events?

Pol. You see, I presume, that Archelaus the son of Perdiccas is now the ruler of Macedonia?

Soc. At any rate I hear that he is.

Pol. And do you think that he is happy or miserable?

Soc. I cannot say, Polus, for I have never had any acquaintance with him.

Pol. And cannot you tell at once, and without having an acquaintance with him, whether a man is happy?

Soc. Most certainly not.

Is the great king happy?

Pol. Then clearly, Socrates, you would say that you did not even know whether the great king was a happy man?

Soc. And I should speak the truth; for I do not know how he stands in the matter of education and justice.

Pol. What! and does all happiness consist in this?

Soc. Yes, indeed, Polus, that is my doctrine; the men and

Gorgias.

SOCRATES, POLUS.

women who are gentle and good are also happy, as I maintain, and the unjust and evil are miserable.

Pol. Then, according to your doctrine, the said Archelaus is miserable? 471

Soc. Yes, my friend, if he is wicked.

Polus attempts to prove the happiness of the unjust by the story of Archelaus, who has lately by many crimes gained the throne of Macedonia.

Pol. That he is wicked I cannot deny; for he had no title at all to the throne which he now occupies, he being only the son of a woman who was the slave of Alcetas the brother of Perdiccas; he himself therefore in strict right was the slave of Alcetas; and if he had meant to do rightly he would have remained his slave, and then, according to your doctrine, he would have been happy. But now he is unspeakably miserable, for he has been guilty of the greatest crimes: in the first place he invited his uncle and master, Alcetas, to come to him, under the pretence that he would restore to him the throne which Perdiccas had usurped, and after entertaining him and his son Alexander, who was his own cousin, and nearly of an age with him, and making them drunk, he threw them into a waggon and carried them off by night, and slew them, and got both of them out of the way; and when he had done all this wickedness he never discovered that he was the most miserable of all men, and was very far from repenting: shall I tell you how he showed his remorse? he had a younger brother, a child of seven years old, who was the legitimate son of Perdiccas, and to him of right the kingdom belonged; Archelaus, however, had no mind to bring him up as he ought and restore the kingdom to him; that was not his notion of happiness; but not long afterwards he threw him into a well and drowned him, and declared to his mother Cleopatra that he had fallen in while running after a goose, and had been killed. And now as he is the greatest criminal of all the Macedonians, he may be supposed to be the most miserable and not the happiest of them, and I dare say that there are many Athenians, and you would be at the head of them, who would rather be any other Macedonian than Archelaus!

Socrates sees no force in such arguments.

Soc. I praised you at first, Polus, for being a rhetorician rather than a reasoner. And this, as I suppose, is the sort of argument with which you fancy that a child might refute me, and by which I stand refuted when I say that the unjust

Gorgias. SOCRATES, POLUS.

man is not happy. But, my good friend, where is the refutation? I cannot admit a word which you have been saying.

Pol. That is because you will not; for you surely must think as I do.

The multitude of witnesses are nothing to him. He must convince his opponent and himself by argument.

Soc. Not so, my simple friend, but because you will refute me after the manner which rhetoricians practise in courts of law. For there the one party think that they refute the other when they bring forward a number of witnesses of good repute in proof of their allegations, and their adversary
472 has only a single one or none at all. But this kind of proof is of no value where truth is the aim; a man may often be sworn down by a multitude of false witnesses who have a great air of respectability. And in this argument nearly every one, Athenian and stranger alike, would be on your side, if you should bring witnesses in disproof of my statement;—you may, if you will, summon Nicias the son of Niceratus, and let his brothers, who gave the row of tripods which stand in the precincts of Dionysus, come with him; or you may summon Aristocrates, the son of Scellius, who is the giver of that famous offering which is at Delphi; summon, if you will, the whole house of Pericles, or any other great Athenian family whom you choose;—they will all agree with you: I only am left alone and cannot agree, for you do not convince me; although you produce many false witnesses against me, in the hope of depriving me of my inheritance, which is the truth. But I consider that nothing worth speaking of will have been effected by me unless I make you the one witness of my words; nor by you, unless you make me the one witness of yours; no matter about the rest of the world. For there are two ways of refutation, one which is yours and that of the world in general; but mine is of another sort—let us compare them, and see in what they differ. For, indeed, we are at issue about matters which to know is honourable and not to know disgraceful; to know or not to know happiness and misery—that is the chief of them. And what knowledge can be nobler? or what ignorance more disgraceful than this? And therefore I will begin by asking you whether you do not think that a man who is unjust and doing injustice can be happy, seeing that you think

Gorgias.

SOCRATES, POLUS.

According to Polus the unjust man may be happy if he is unpunished: Socrates maintains that he is more happy, or less unhappy, if he meets with retribution.

Archelaus unjust, and yet happy? May I assume this to be your opinion?

Pol. Certainly.

Soc. But I say that this is an impossibility — here is one point about which we are at issue: — very good. And do you mean to say also that if he meets with retribution and punishment he will still be happy?

Pol. Certainly not; in that case he will be most miserable.

Soc. On the other hand, if the unjust be not punished, then, according to you, he will be happy?

Pol. Yes.

Soc. But in my opinion, Polus, the unjust or doer of unjust actions is miserable in any case,— more miserable, however, if he be not punished and does not meet with retribution, and less miserable if he be punished and meets with retribution at the hands of gods and men. 473

Pol. You are maintaining a strange doctrine, Socrates.

Soc. I shall try to make you agree with me, O my friend, for as a friend I regard you. Then these are the points at issue between us — are they not? I was saying that to do is worse than to suffer injustice?

Pol. Exactly so.

Soc. And you said the opposite?

Pol. Yes.

Soc. I said also that the wicked are miserable, and you refuted me?

Pol. By Zeus I did.

Soc. In your own opinion, Polus.

Pol. Yes, and I rather suspect that I was in the right.

Soc. You further said that the wrong-doer is happy if he be unpunished?

Pol. Certainly.

Soc. And I affirm that he is most miserable, and that those who are punished are less miserable — are you going to refute this proposition also?

Pol. A proposition which is harder of refutation than the other, Socrates.

Soc. Say rather, Polus, impossible; for who can refute the truth?

Pol. What do you mean? If a man is detected in an

SOCRATES, POLUS.

unjust attempt to make himself a tyrant, and when detected is racked, mutilated, has his eyes burned out, and after having had all sorts of great injuries inflicted on him, and having seen his wife and children suffer the like, is at last impaled or tarred and burned alive, will he be happier than if he escape and become a tyrant, and continue all through life doing what he likes and holding the reins of government, the envy and admiration both of citizens and strangers? Is that the paradox which, as you say, cannot be refuted?

What nonsense! Do you mean that the man who expires among tortures is happier than the successful tyrant?

Soc. There again, noble Polus, you are raising hobgoblins instead of refuting me; just now you were calling witnesses against me. But please to refresh my memory a little; did you say—'in an unjust attempt to make himself a tyrant'?

Pol. Yes, I did.

Soc. Then I say that neither of them will be happier than the other,—neither he who unjustly acquires a tyranny, nor he who suffers in the attempt, for of two miserables one cannot be the happier, but that he who escapes and becomes a tyrant is the more miserable of the two. Do you laugh, Polus? Well, this is a new kind of refutation,—when any one says anything, instead of refuting him to laugh at him.

Neither is to be called happy if both are wicked.

Pol. But do you not think, Socrates, that you have been sufficiently refuted, when you say that which no human being will allow? Ask the company.

Why refute what nobody believes? Ask the company.

Soc. O Polus, I am not a public man, and only last year, when my tribe were serving as Prytanes, and it became my duty as their president to take the votes, there was a laugh at
474 me, because I was unable to take them. And as I failed then, you must not ask me to count the suffrages of the company now; but if, as I was saying, you have no better argument than numbers, let me have a turn, and do you make trial of the sort of proof which, as I think, is required; for I shall produce one witness only of the truth of my words, and he is the person with whom I am arguing; his suffrage I know how to take; but with the many I have nothing to do, and do not even address myself to them. May I ask then whether you will answer in turn and have your words put to the proof? For I certainly think that I and you and every man do really believe, that to do is a greater evil than to suffer injustice: and not to be punished than to be punished.

Socrates never could count heads. [This is his description of one of the noblest actions of his life.]

Say rather, why affirm what every body knows?

Gorgias.

SOCRATES, POLUS

Pol. And I should say neither I, nor any man: would you yourself, for example, suffer rather than do injustice?

Soc. Yes, and you, too; I or any man would.

Pol. Quite the reverse; neither you, nor I, nor any man.

Soc. But will you answer?

Pol. To be sure, I will; for I am curious to hear what you can have to say.

Polus, while denying that to do injustice is worse than to suffer, acknowledges it to be more disgraceful. Hence the shipwreck of his argument.

Soc, Tell me, then, and you will know, and let us suppose that I am beginning at the beginning: which of the two, Polus, in your opinion, is the worst?—to do injustice or to suffer?

Pol. I should say that suffering was worst.

Soc And which is the greater disgrace?—Answer.

Pol. To do.

Soc. And the greater disgrace is the greater evil?

Pol. Certainly not.

Soc. I understand you to say, if I am not mistaken, that the honourable is not the same as the good, or the disgraceful as the evil?

Pol. Certainly not.

Soc. Let me ask a question of you: When you speak of beautiful things, such as bodies, colours, figures, sounds, institutions, do you not call them beautiful in reference to some standard: bodies, for example, are beautiful in proportion as they are useful, or as the sight of them gives pleasure to the spectators; can you give any other account of personal beauty?

Pol. I cannot.

Soc. And you would say of figures or colours generally that they were beautiful, either by reason of the pleasure which they give, or of their use, or of both?

Pol. Yes, I should.

Soc. And you would call sounds and music beautiful for the same reason?

Pol. I should.

Soc. Laws and institutions also have no beauty in them except in so far as they are useful or pleasant or both?

Pol. I think not. 475

Soc. And may not the same be said of the beauty of knowledge?

Pol. To be sure, Socrates; and I very much approve of your measuring beauty by the standard of pleasure and utility.

All things may be measured by the standard of pleasure and utility or of pain and evil.

Soc. And deformity or disgrace may be equally measured by the opposite standard of pain and evil?

Pol. Certainly.

Soc. Then when of two beautiful things one exceeds in beauty, the measure of the excess is to be taken in one or both of these; that is to say, in pleasure or utility or both?

Pol. Very true.

Soc. And of two deformed things, that which exceeds in deformity or disgrace, exceeds either in pain or evil — must it not be so?

Pol. Yes.

Soc. But then again, what was the observation which you just now made, about doing and suffering wrong? Did you not say, that suffering wrong was more evil, and doing wrong more disgraceful?

Pol. I did.

If to do is, as Polus admits, more disgraceful than to endure wrong, it must also be more evil.

Soc. Then, if doing wrong is more disgraceful than suffering, the more disgraceful must be more painful and must exceed in pain or in evil or both: does not that also follow?

Pol. Of course.

Soc. First, then, let us consider whether the doing of injustice exceeds the suffering in the consequent pain: Do the injurers suffer more than the injured?

Pol. No, Socrates; certainly not.

Soc. Then they do not exceed in pain?

Pol. No.

Soc. But if not in pain, then not in both?

Pol. Certainly not.

Soc. Then they can only exceed in the other?

Pol. Yes.

Soc. That is to say, in evil?

Pol. True.

Soc. Then doing injustice will have an excess of evil, and will therefore be a greater evil than suffering injustice?

Pol. Clearly.

Soc. But have not you and the world already agreed that to do injustice is more disgraceful than to suffer?

Gorgias.

SOCRATES, POLUS.

Pol. Yes.

Soc. And that is now discovered to be more evil?

Pol. True.

Soc. And would you prefer a greater evil or a greater dishonour to a less one? Answer, Polus, and fear not; for you will come to no harm if you nobly resign yourself into the healing hand of the argument as to a physician without shrinking, and either say 'Yes' or 'No' to me.

Pol. I should say 'No.'

Soc. Would any other man prefer a greater to a less evil?

Pol. No, not according to this way of putting the case, Socrates.

Polus is refuted out of his own mouth.

Soc. Then I said truly, Polus, that neither you, nor I, nor any man, would rather do than suffer injustice; for to do injustice is the greater evil of the two.

Pol. That is the conclusion.

Soc. You see, Polus, when you compare the two kinds of refutations, how unlike they are. All men, with the exception of myself, are of your way of thinking; but your single assent and witness are enough for me,— I have no need of any 476
other; I take your suffrage, and am regardless of the rest.

The next question: Is it better for the guilty to suffer or not to suffer punishment?

Enough of this, and now let us proceed to the next question; which is, Whether the greatest of evils to a guilty man is to suffer punishment, as you supposed, or whether to escape punishment is not a greater evil, as I supposed. Consider:— You would say that to suffer punishment is another name for being justly corrected when you do wrong?

Pol. I should.

Soc. And would you not allow that all just things are honourable in so far as they are just? Please to reflect, and tell me your opinion.

Pol. Yes, Socrates, I think that they are.

Soc. Consider again:— Where there is an agent, must there not also be a patient?

Pol. I should say so.

Soc. And will not the patient suffer that which the agent does, and will not the suffering have the quality of the action? I mean, for example, that if a man strikes, there must be something which is stricken?

Pol. Yes.

Soc. And if the striker strikes violently or quickly, that which is struck will be struck violently or quickly?

Pol. True.

Soc. And the suffering to him who is stricken is of the same nature as the act of him who strikes?

Pol. Yes.

Soc. And if a man burns, there is something which is burned?

Pol. Certainly.

Soc. And if he burns in excess or so as to cause pain, the thing burned will be burned in the same way?

Pol. Truly.

Soc. And if he cuts, the same argument holds — there will be something cut?

Pol. Yes.

Soc. And if the cutting be great or deep or such as will cause pain, the cut will be of the same nature?

Pol. That is evident.

Soc. Then you would agree generally to the universal proposition which I was just now asserting: that the affection of the patient answers to the act of the agent?

Since the affection of the patient answers to the act of the agent, it follows that he who is punished justly suffers justly, and therefore honourably,

Pol. I agree.

Soc. Then, as this is admitted, let me ask whether being punished is suffering or acting?

Pol. Suffering, Socrates; there can be no doubt of that.

Soc. And suffering implies an agent?

Pol. Certainly, Socrates; and he is the punisher.

Soc. And he who punishes rightly, punishes justly?

Pol. Yes.

Soc. And therefore he acts justly?

Pol. Justly.

Soc. Then he who is punished and suffers retribution, suffers justly?

Pol. That is evident.

Soc. And that which is just has been admitted to be honourable?

Pol. Certainly.

Soc. Then the punisher does what is honourable, and the punished suffers what is honourable?

Pol. True.

Soc. And if what is honourable, then what is good, for the honourable is either pleasant or useful? 477

Pol. Certainly.

Soc. Then he who is punished suffers what is good?

Pol. That is true.

Soc. Then he is benefited?

Pol. Yes.

Soc. Do I understand you to mean what I mean by the term 'benefited'? I mean, that if he be justly punished his soul is improved.

Pol. Surely.

Soc. Then he who is punished is delivered from the evil of his soul?

Pol. Yes.

and is delivered from the greatest of all evils, the evil of the soul, which, being the most disgraceful, is also the most painful or hurtful.

Soc. And is he not then delivered from the greatest evil? Look at the matter in this way:—In respect of a man's estate, do you see any greater evil than poverty?

Pol. There is no greater evil.

Soc. Again, in a man's bodily frame, you would say that the evil is weakness and disease and deformity?

Pol. I should.

Soc. And do you not imagine that the soul likewise has some evil of her own?

Pol. Of course.

Soc. And this you would call injustice and ignorance and cowardice, and the like?

Pol. Certainly.

Soc. So then, in mind, body, and estate, which are three, you have pointed out three corresponding evils — injustice, disease, poverty?

Pol. True.

Soc. And which of the evils is the most disgraceful?—Is not the most disgraceful of them injustice, and in general the evil of the soul?

Pol. By far the most.

Soc. And if the most disgraceful, then also the worst?

Pol. What do you mean, Socrates?

Soc. I mean to say, that what is most disgraceful has been already admitted to be most painful or hurtful, or both.

Pol. Certainly.

Soc. And now injustice and all evil in the soul has been admitted by us to be most disgraceful?

Pol. It has been admitted.

Soc. And most disgraceful either because most painful and causing excessive pain, or most hurtful, or both?

Pol. Certainly.

Soc. And therefore to be unjust and intemperate, and cowardly and ignorant, is more painful than to be poor and sick?

Pol. Nay, Socrates; the painfulness does not appear to me to follow from your premises.

Polus stumbles at the notion which he has already admitted, that the evil of the soul is more painful than that of the body.

Soc. Then, if, as you would argue, not more painful, the evil of the soul is of all evils the most disgraceful; and the excess of disgrace must be caused by some preternatural greatness, or extraordinary hurtfulness of the evil.

Pol. Clearly.

Soc. And that which exceeds most in hurtfulness will be the greatest of evils?

Pol. Yes.

Soc. Then injustice and intemperance, and in general the depravity of the soul, are the greatest of evils?

Pol. That is evident.

Soc. Now, what art is there which delivers us from poverty? Does not the art of making money?

Pol. Yes.

Soc. And what art frees us from disease? Does not the art of medicine?

Pol. Very true.

478 *Soc.* And what from vice and injustice? If you are not able to answer at once, ask yourself whither we go with the sick, and to whom we take them.

Pol. To the physicians, Socrates.

Soc. And to whom do we go with the unjust and intemperate?

Pol. To the judges, you mean.

Soc. — Who are to punish them?

Pol. Yes.

Soc. And do not those who rightly punish others, punish them in accordance with a certain rule of justice?

Pol. Clearly.

SOCRATES, POLUS.

Soc. Then the art of money-making frees a man from poverty: medicine from disease; and justice from intemperance and injustice?

Pol. That is evident.

Soc. Which, then, is the best of these three?

Pol. Will you enumerate them?

Soc. Money-making, medicine, and justice.

Pol. Justice, Socrates, far excels the two others.

Soc. And justice, if the best, gives the greatest pleasure or advantage or both?

Pol. Yes.

Soc. But is the being healed a pleasant thing, and are those who are being healed pleased?

Pol. I think not.

Soc. A useful thing, then?

Pol. Yes.

Punishment is the deliverance from evil, and he who is punished, like him who is healed, is happier than he who is not punished or not healed.

Soc. Yes, because the patient is delivered from a great evil; and this is the advantage of enduring the pain — that you get well?

Pol. Certainly.

Soc. And would he be the happier man in his bodily condition, who is healed, or who never was out of health?

Pol. Clearly he who was never out of health.

Soc. Yes; for happiness surely does not consist in being delivered from evils, but in never having had them.

Pol. True.

Soc. And suppose the case of two persons who have some evil in their bodies, and that one of them is healed and delivered from evil, and another is not healed, but retains the evil — which of them is the most miserable?

Pol. Clearly he who is not healed.

Soc. And was not punishment said by us to be a deliverance from the greatest of evils, which is vice?

Pol. True.

Soc. And justice punishes us, and makes us more just, and is the medicine of our vice?

Pol. True.

Happiest of all is he who is just;

Soc. He, then, has the first place in the scale of happiness who has never had vice in his soul; for this has been shown to be the greatest of evils.

Pol. Clearly.

Soc. And he has the second place, who is delivered from vice?

Pol. True.

Soc. That is to say, he who receives admonition and rebuke and punishment?

Pol. Yes.

Soc. Then he lives worst, who, having been unjust, has no deliverance from injustice?

Pol. Certainly.

479 *Soc.* That is, he lives worst who commits the greatest crimes, and who, being the most unjust of men, succeeds in escaping rebuke or correction or punishment; and this, as you say, has been accomplished by Archelaus and other tyrants and rhetoricians and potentates [1]?

happy in the second degree he who is delivered from injustice by punishment, most deluded and most unhappy of all he who lives on, enjoying the fruit of his crimes.

Pol. True.

Soc. May not their way of proceeding, my friend, be compared to the conduct of a person who is afflicted with the worst of diseases and yet contrives not to pay the penalty to the physician for his sins against his constitution, and will not be cured, because, like a child, he is afraid of the pain of being burned or cut:—Is not that a parallel case?

Pol. Yes, truly.

Soc. He would seem as if he did not know the nature of health and bodily vigour; and if we are right, Polus, in our previous conclusions, they are in a like case who strive to evade justice, which they see to be painful, but are blind to the advantage which ensues from it, not knowing how far more miserable a companion a diseased soul is than a diseased body; a soul, I say, which is corrupt and unrighteous and unholy. And hence they do all that they can to avoid punishment and to avoid being released from the greatest of evils; they provide themselves with money and friends, and cultivate to the utmost their powers of persuasion. But if we, Polus, are right, do you see what follows, or shall we draw out the consequences in form?

Pol. If you please.

Soc. Is it not a fact that injustice, and the doing of injustice, is the greatest of evils?

[1] Cp. Rep. ix. 579, 580.

Gorgias.

SOCRATES, POLUS.

Pol. That is quite clear.

Soc. And further, that to suffer punishment is the way to be released from this evil?

Pol. True.

Soc. And not to suffer, is to perpetuate the evil?

Pol. Yes.

Soc. To do wrong, then, is second only in the scale of evils; but to do wrong and not to be punished, is first and greatest of all?

Pol. That is true.

Archelaus then is more miserable than his victims.

Soc. Well, and was not this the point in dispute, my friend? You deemed Archelaus happy, because he was a very great criminal and unpunished: I, on the other hand, maintained that he or any other who like him has done wrong and has not been punished, is, and ought to be, the most miserable of all men; and that the doer of injustice is more miserable than the sufferer; and he who escapes punishment, more miserable than he who suffers.— Was not that what I said?

Pol. Yes.

Soc. And it has been proved to be true?

Pol. Certainly.

Soc. Well, Polus, but if this is true, where is the great use of rhetoric? If we admit what has been just now said, every man ought in every way to guard himself against doing wrong, for he will thereby suffer great evil? 480

Pol. True.

Injustice, if not removed, will become the cancer of the soul.

Soc. And if he, or any one about whom he cares, does wrong, he ought of his own accord to go where he will be immediately punished; he will run to the judge, as he would to the physician, in order that the disease of injustice may not be rendered chronic and become the incurable cancer of the soul; must we not allow this consequence, Polus, if our former admissions are to stand:— is any other inference consistent with them?

Pol. To that, Socrates, there can be but one answer.

The only use of rhetoric is that it enables a man to

Soc. Then rhetoric is of no use to us, Polus, in helping a man to excuse his own injustice, or that of his parents or friends, or children or country; but may be of use to any one who holds that instead of excusing he ought to accuse —

himself above all, and in the next degree his family or any of his friends who may be doing wrong; he should bring to light the iniquity and not conceal it, that so the wrong-doer may suffer and be made whole; and he should even force himself and others not to shrink, but with closed eyes like brave men to let the physician operate with knife or searing iron, not regarding the pain, in the hope of attaining the good and the honourable; let him who has done things worthy of stripes, allow himself to be scourged, if of bonds, to be bound, if of a fine, to be fined, if of exile, to be exiled, if of death, to die, himself being the first to accuse himself and his own relations, and using rhetoric to this end, that his and their unjust actions may be made manifest, and that they themselves may be delivered from injustice, which is the greatest evil. Then, Polus, rhetoric would indeed be useful. Do you say 'Yes' or 'No' to that?

expose his own injustice and to petition for speedy punishment.

Pol. To me, Socrates, what you are saying appears very strange, though probably in agreement with your premises.

Soc. Is not this the conclusion, if the premises are not disproven?

Pol. Yes; it certainly is.

Soc. And from the opposite point of view, if indeed it be our duty to harm another, whether an enemy or not — I except the case of self-defence — then I have to be upon my
481 guard — but if my enemy injures a third person, then in every sort of way, by word as well as deed, I should try to prevent his being punished, or appearing before the judge; and if he appears, I should contrive that he should escape, and not suffer punishment: if he has stolen a sum of money, let him keep what he has stolen and spend it on him and his, regardless of religion and justice; and if he have done things worthy of death, let him not die, but rather be immortal in his wickedness; or, if this is not possible, let him at any rate be allowed to live as long as he can. For such purposes, Polus, rhetoric may be useful, but is of small if of any use to him who is not intending to commit injustice; at least, there was no such use discovered by us in the previous discussion.

A slighter and secondary use of rhetoric in self-defence against an enemy, or in preventing the punishment of an enemy.

Cal. Tell me, Chaerephon, is Socrates in earnest, or is he joking?

Gorgias.

SOCRATES, CALLIAS, CHAEREPHON.

Callicles asks in amazement whether Socrates really means what he says.

Chaer. I should say, Callicles, that he is in most profound earnest; but you may as well ask him.

Cal. By the gods, and I will. Tell me, Socrates, are you in earnest, or only in jest? For if you are in earnest, and what you say is true, is not the whole of human life turned upside down; and are we not doing, as would appear, in everything the opposite of what we ought to be doing?

I am only repeating the words of philosophy, whose lover I am. For as you love the Athenian people and their namesake Demus, so I have two loves, philosophy and Alcibiades.

Soc. O Callicles, if there were not some community of feelings among mankind, however varying in different persons — I mean to say, if every man's feelings were peculiar to himself and were not shared by the rest of his species — I do not see how we could ever communicate our impressions to one another. I make this remark because I perceive that you and I have a common feeling. For we are lovers both, and both of us have two loves apiece: — I am the lover of Alcibiades, the son of Cleinias, and of philosophy; and you of the Athenian Demus, and of Demus the son of Pyrilampes. Now, I observe that you, with all your cleverness, do not venture to contradict your favourite in any word or opinion of his; but as he changes you change, backwards and forwards. When the Athenian Demus denies anything that you are saying in the assembly, you go over to his opinion; and you do the same with Demus, the fair young son of Pyrilampes. For you have not the power to resist the words and ideas of your loves; and if a person were to express surprise at the strangeness of what you say from time to time when under their influence, you would probably reply to 482
him, if you were honest, that you cannot help saying what your loves say unless they are prevented; and that you can only be silent when they are. Now you must understand that my words are an echo too, and therefore you need not wonder at me; but if you want to silence me, silence philosophy, who is my love, for she is always telling me what I am now telling you, my friend; neither is she capricious like my other love, for the son of Cleinias says one thing to-day and another thing to-morrow, but philosophy is always true. She is the teacher at whose words you are now wondering, and you have heard her yourself. Her you must refute, and either show, as I was saying, that to do injustice and to escape punishment is not the worst of all evils; or, if you leave her

The son of Cleinias is inconstant, but philosophy is ever the same: she it is whom you have to refute: I am only her mouthpiece.

word unrefuted, by the dog the god of Egypt, I declare, O Callicles, that Callicles will never be at one with himself, but that his whole life will be a discord. And yet, my friend, I would rather that my lyre should be inharmonious, and that there should be no music in the chorus which I provided; aye, or that the whole world should be at odds with me, and oppose me, rather than that I myself should be at odds with myself, and contradict myself.

Gorgias.

SOCRATES, CALLICLES.

Cal. O Socrates, you are a regular declaimer, and seem to be running riot in the argument. And now you are declaiming in this way because Polus has fallen into the same error himself of which he accused Gorgias:—for he said that when Gorgias was asked by you, whether, if some one came to him who wanted to learn rhetoric, and did not know justice, he would teach him justice, Gorgias in his modesty replied that he would, because he thought that mankind in general would be displeased if he answered 'No;' and then in consequence of this admission, Gorgias was compelled to contradict himself, that being just the sort of thing in which you delight. Whereupon Polus laughed at you, deservedly, as I think; but now he has himself fallen into the same trap. I cannot say very much for his wit when he conceded to you that to do is more dishonourable than to suffer injustice, for this was the admission which led to his being entangled by you; and because he was too modest to say what he thought, he had his mouth stopped. For the truth is, Socrates, that you, who pretend to be engaged in the pursuit of truth, are appealing now to the popular and vulgar notions of right, which are not natural, but only conventional. Convention and nature are generally at variance with one another: and hence, if a person is too
483 modest to say what he thinks, he is compelled to contradict himself; and you, in your ingenuity perceiving the advantage to be thereby gained, slyly ask of him who is arguing conventionally a question which is to be determined by the rule of nature; and if he is talking of the rule of nature, you slip away to custom: as, for instance, you did in this very discussion about doing and suffering injustice. When Polus was speaking of the conventionally dishonourable, you assailed him from the point of view of nature; for by the rule

Polus was vanquished because he refused to take a bold line.

Callicles would return to the rule of nature in the lower sense of the term.

Gorgias.

CALLICLES.

of nature, to suffer injustice is the greater disgrace because the greater evil; but conventionally, to do evil is the more disgraceful. For the suffering of injustice is not the part of a man, but of a slave, who indeed had better die than live; since when he is wronged and trampled upon, he is unable to help himself, or any other about whom he cares. The reason, as I conceive, is that the makers of laws are the majority who are weak; and they make laws and distribute praises and censures with a view to themselves and to their own interests; and they terrify the stronger sort of men, and those who are able to get the better of them, in order that they may not get the better of them; and they say, that dishonesty is shameful and unjust; meaning, by the word injustice, the desire of a man to have more than his neighbours; for knowing their own inferiority, I suspect that they are too glad of equality. And therefore the endeavour to have more than the many, is conventionally said to be shameful and unjust, and is called injustice [1], whereas nature herself intimates that it is just for the better to have more than the worse, the more powerful than the weaker; and in many ways she shows, among men as well as among animals, and indeed among whole cities and races, that justice consists in the superior ruling over and having more than the inferior. For on what principle of justice did Xerxes invade Hellas, or his father the Scythians? (not to speak of numberless other examples). Nay, but these are the men who act according to nature; yes, by Heaven, and according to the law of nature: not, perhaps, according to that artificial law, which we invent and impose upon our fellows, of whom we take the best and strongest from their youth upwards, and tame them like young lions,— charming them with the sound 484
of the voice, and saying to them, that with equality they must be content, and that the equal is the honourable and the just. But if there were a man who had sufficient force, he would shake off and break through, and escape from all this; he would trample under foot all our formulas and spells and charms, and all our laws which are against nature: the slave would rise in rebellion and be lord over us, and the light of natural justice would shine forth. And this I take to be the

Convention was only introduced by the weak majority in order to protect themselves against the few strong.

A man of courage would easily break down the guards of convention.

[1] Cp. Rep. ii. 359.

sentiment of Pindar, when he says in his poem, that *Gorgias.*

'Law is the king of all, of mortals as well as of immortals;' CALLICLES.

this, as he says,

'Makes might to be right, doing violence with highest hand; as I infer from the deeds of Heracles, for without buying them —'[1] Pindar.

— I do not remember the exact words, but the meaning is, that without buying them, and without their being given to him, he carried off the oxen of Geryon, according to the law of natural right, and that the oxen and other possessions of the weaker and inferior properly belong to the stronger and superior. And this is true, as you may ascertain, if you will leave philosophy and go on to higher things: for philosophy, Socrates, if pursued in moderation and at the proper age, is an elegant accomplishment, but too much philosophy is the ruin of human life. Even if a man has good parts, still, if he carries philosophy into later life, he is necessarily ignorant of all those things which a gentleman and a person of honour ought to know; he is inexperienced in the laws of the State, and in the language which ought to be used in the dealings of man with man, whether private or public, and utterly ignorant of the pleasures and desires of mankind and of human character in general. And people of this sort, when they betake themselves to politics or business, are as ridiculous as I imagine the politicians to be, when they make their appearance in the arena of philosophy. For, as Euripides says, A little philosophy not a bad thing in youth.

'Every man shines in that and pursues that, and devotes the greatest portion of the day to that in which he most excels[2],' Euripides.

485 but anything in which he is inferior, he avoids and depreciates, and praises the opposite from partiality to himself, and because he thinks that he will thus praise himself. The true principle is to unite them. Philosophy, as a part of education, is an excellent thing, and there is no disgrace to a man while he is young in pursuing such a study; but when he is more advanced in years, the thing becomes ridiculous, and I feel towards philosophers as I do towards those who lisp and imitate children. For I love to see a little child, who is not

[1] Fragm. Incert. 151 (Böckh). [2] Antiope, fragm. 20 (Dindorf).

Gorgias. of an age to speak plainly, lisping at his play; there is an
CALLICLES. appearance of grace and freedom in his utterance, which is natural to his childish years. But when I hear some small creature carefully articulating its words, I am offended; the sound is disagreeable, and has to my ears the twang of slavery. So when I hear a man lisping, or see him playing like a child, his behaviour appears to me ridiculous and unmanly and worthy of stripes. And I have the same feeling about students of philosophy; when I see a youth thus engaged,—the study appears to me to be in character, and becoming a man of a liberal education, and him who neglects philosophy I regard as an inferior man, who will never aspire to anything great or noble. But if I see him continuing the study in later life, and not leaving off, I should like to beat him, Socrates; for, as I was saying, such a one, even though he have good natural parts, becomes effeminate. He flies from the busy centre and the market-place, in which, as the poet says, men become distinguished; he creeps into a corner for the rest of his life, and talks in a whisper with three or four admiring youths, but never speaks out like a freeman in a satisfactory manner. Now I, Socrates, am very well inclined towards you, and my feeling may be compared with that of Zethus towards Amphion, in the play of Euripides, whom I was mentioning just now: for I am disposed to say to you much what Zethus said to his brother, that you, Socrates, are careless about the things of which you ought to be careful; and that you

But the study should not be continued into later life.

> 'Who have a soul so noble, are remarkable for a puerile exterior; 486
> Neither in a court of justice could you state a case, or give any reason or proof,
> Or offer valiant counsel on another's behalf.'

And you must not be offended, my dear Socrates, for I am speaking out of good-will towards you, if I ask whether you are not ashamed of being thus defenceless; which I affirm to be the condition not of you only but of all those who will carry the study of philosophy too far. For suppose that some one were to take you, or any one of your sort, off to prison, declaring that you had done wrong when you had done no wrong, you must allow that you would not know what to do:—there you would stand giddy and gaping, and

not having a word to say; and when you went up before the Court, even if the accuser were a poor creature and not good for much, you would die if he were disposed to claim the penalty of death. And yet, Socrates, what is the value of

> 'An art which converts a man of sense into a fool,'

who is helpless, and has no power to save either himself or others, when he is in the greatest danger and is going to be despoiled by his enemies of all his goods, and has to live, simply deprived of his rights of citizenship?—he being a man who, if I may use the expression, may be boxed on the ears with impunity. Then, my good friend, take my advice, and refute no more:

> 'Learn the philosophy of business, and acquire the reputation of wisdom.
> But leave to others these niceties,'

whether they are to be described as follies or absurdities:

> 'For they will only
> Give you poverty for the inmate of your dwelling.'

Cease, then, emulating these paltry splitters of words, and emulate only the man of substance and honour, who is well to do.

Callicles the desired touchstone of Socrates.

Soc. If my soul, Callicles, were made of gold, should I not rejoice to discover one of those stones with which they test gold, and the very best possible one to which I might bring my soul; and if the stone and I agreed in approving of her training, then I should know that I was in a satisfactory state, and that no other test was needed by me.

Cal. What is your meaning, Socrates?

Soc. I will tell you; I think that I have found in you the desired touchstone.

Cal. Why?

Soc. Because I am sure that if you agree with me in any of the opinions which my soul forms, I have at last found the truth indeed. For I consider that if a man is to make a
487 complete trial of the good or evil of the soul, he ought to have three qualities — knowledge, good-will, outspokenness, which are all possessed by you. Many whom I meet are unable to make trial of me, because they are not wise as you are; others are wise, but they will not tell me the truth, because

Gorgias. they have not the same interest in me which you have; and these two strangers, Gorgias and Polus, are undoubtedly wise men and my very good friends, but they are not outspoken enough, and they are too modest. Why, their modesty is so great that they are driven to contradict themselves, first one and then the other of them, in the face of a large company, on matters of the highest moment. But you have all the qualities in which these others are deficient, having received an excellent education; to this many Athenians can testify. And you are my friend. Shall I tell you why I think so? I know that you, Callicles, and Tisander of Aphidnae, and Andron the son of Androtion, and Nausicydes of the deme of Cholarges, studied together: there were four of you, and I once heard you advising with one another as to the extent to which the pursuit of philosophy should be carried, and, as I know, you came to the conclusion that the study should not be pushed too much into detail. You were cautioning one another not to be overwise; you were afraid that too much wisdom might unconsciously to yourselves be the ruin of you. And now when I hear you giving the same advice to me which you then gave to your most intimate friends, I have a sufficient evidence of your real good-will to me. And of the frankness of your nature and freedom from modesty I am assured by yourself, and the assurance is confirmed by your last speech. Well then, the inference in the present case clearly is, that if you agree with me in an argument about any point, that point will have been sufficiently tested by us, and will not require to be submitted to any further test. For you could not have agreed with me, either from lack of knowledge or from superfluity of modesty, nor yet from a desire to deceive me, for you are my friend, as you tell me yourself. And therefore when you and I are agreed, the result will be the attainment of perfect truth. Now there is no nobler enquiry, Callicles, than that which you censure me for making,— What ought the character of a man to be, and what his pursuits, and how far is he to go, both in maturer years and in youth? For be assured that if I err in my own conduct I do not err intentionally, 488
but from ignorance. Do not then desist from advising me, now that you have begun, until I have learned clearly what

SOCRATES.

Other men have not the knowledge or frankness or good-will which is required; and they are too modest. His sincerity is shown by his consistency.

this is which I am to practise, and how I may acquire it. And if you find me assenting to your words, and hereafter not doing that to which I assented, call me 'dolt,' and deem me unworthy of receiving further instruction. Once more, then, tell me what you and Pindar mean by natural justice: Do you not mean that the superior should take the property of the inferior by force; that the better should rule the worse, the noble have more than the mean? Am I not right in my recollection?

Gorgias. SOCRATES, CALLICLES. But still he would ask, What Callicles means by the superior?

Cal. Yes; that is what I was saying, and so I still aver.

Soc. And do you mean by the better the same as the superior? for I could not make out what you were saying at the time — whether you meant by the superior the stronger, and that the weaker must obey the stronger, as you seemed to imply when you said that great cities attack small ones in accordance with natural right, because they are superior and stronger, as though the superior and stronger and better were the same; or whether the better may be also the inferior and weaker, and the superior the worse, or whether better is to be defined in the same way as superior: — this is the point which I want to have cleared up. Are the superior and better and stronger the same or different?

Cal. I say unequivocally that they are the same.

Soc. Then the many are by nature superior to the one, against whom, as you were saying, they make the laws?

He means the better and stronger, and therefore the many who make the laws, which are noble because they are made by the better.

Cal. Certainly.

Soc. Then the laws of the many are the laws of the superior?

Cal. Very true.

Soc. Then they are the laws of the better; for the superior class are far better, as you were saying?

Cal. Yes.

Soc. And since they are superior, the laws which are made by them are by nature good?

Cal. Yes.

Soc. And are not the many of opinion, as you were lately
489 saying, that justice is equality, and that to do is more disgraceful than to suffer injustice? — is that so or not? Answer, Callicles, and let no modesty be found to come in the way [1];

And the many are also of opinion that to do

[1] Cp. what is said of Gorgias by Callicles at p. 482.

Gorgias.

SOCRATES, CALLICLES.

do the many think, or do they not think thus?— I must beg of you to answer, in order that if you agree with me I may fortify myself by the assent of so competent an authority.

is more disgraceful than to suffer injustice.

Cal. Yes; the opinion of the many is what you say.

Soc. Then not only custom but nature also affirms that to do is more disgraceful than to suffer injustice, and that justice is equality; so that you seem to have been wrong in your former assertion, when accusing me you said that nature and custom are opposed, and that I, knowing this, was dishonestly playing between them, appealing to custom when the argument is about nature, and to nature when the argument is about custom?

'Of course I don't mean the mob.'

Cal. This man will never cease talking nonsense. At your age, Socrates, are you not ashamed to be catching at words and chuckling over some verbal slip? do you not see — have I not told you already, that by superior I mean better: do you imagine me to say, that if a rabble of slaves and nondescripts, who are of no use except perhaps for their physical strength, get together, their ipsissima verba are laws?

Soc. Ho! my philosopher, is that your line?

Cal. Certainly.

Soc. I was thinking, Callicles, that something of the kind must have been in your mind, and that is why I repeated the question,— What is the superior? I wanted to know clearly what you meant; for you surely do not think that two men are better than one, or that your slaves are better than you because they are stronger? Then please to begin again, and tell me who the better are, if they are not the stronger; and I will ask you, great Sir, to be a little milder in your instructions, or I shall have to run away from you.

Cal. You are ironical.

Then once more,—Who are the better?

Soc. No, by the hero Zethus, Callicles, by whose aid you were just now saying (486 A) many ironical things against me, I am not:— tell me, then, whom you mean by the better?

Cal. I mean the more excellent.

Soc. Do you not see that you are yourself using words which have no meaning and that you are explaining nothing? — will you tell me whether you mean by the better and superior the wiser, or if not, whom?

490 *Cal.* Most assuredly, I do mean the wiser.

SOCRATES, CALLICLES.

Soc. Then according to you, one wise man may often be superior to ten thousand fools, and he ought to rule them, and they ought to be his subjects, and he ought to have more than they should. This is what I believe that you mean (and you must not suppose that I am word-catching), if you allow that the one is superior to the ten thousand?

The wiser: the one wise among ten thousand fools,—he ought to rule.

Cal. Yes; that is what I mean, and that is what I conceive to be natural justice — that the better and wiser should rule and have more than the inferior.

Soc. Stop there, and let me ask you what you would say in this case: Let us suppose that we are all together as we are now; there are several of us, and we have a large common store of meats and drinks, and there are all sorts of persons in our company having various degrees of strength and weakness, and one of us, being a physician, is wiser in the matter of food than all the rest, and he is probably stronger than some and not so strong as others of us — will he not, being wiser, be also better than we are, and our superior in this matter of food?

But this is contrary to the analogy of the other arts.

Cal. Certainly.

Soc. Either, then, he will have a larger share of the meats and drinks, because he is better, or he will have the distribution of all of them by reason of his authority, but he will not expend or make use of a larger share of them on his own person, or if he does, he will be punished;— his share will exceed that of some, and be less than that of others, and if he be the weakest of all, he being the best of all will have the smallest share of all, Callicles:— am I not right, my friend?

Cal. You talk about meats and drinks and physicians and other nonsense; I am not speaking of them.

Callicles is disgusted at the commonplace parallels of Socrates.

Soc. Well, but do you admit that the wiser is the better? Answer 'Yes' or 'No.'

Cal. Yes.

Soc. And ought not the better to have a larger share?

Cal. Not of meats and drinks.

Soc. I understand: then, perhaps, of coats — the skilfullest weaver ought to have the largest coat, and the greatest

Gorgias. SOCRATES, CALLICLES.

number of them, and go about clothed in the best and finest of them?

Cal. Fudge about coats!

Soc. Then the skilfullest and best in making shoes ought to have the advantage in shoes; the shoemaker, clearly, should walk about in the largest shoes, and have the greatest number of them?

Cal. Fudge about shoes! What nonsense are you talking?

Soc. Or, if this is not your meaning, perhaps you would say that the wise and good and true husbandman should actually have a larger share of seeds, and have as much seed as possible for his own land?

Cal. How you go on, always talking in the same way, Socrates!

Soc. Yes, Callicles, and also about the same things. 491

Cal. Yes, by the Gods, you are literally always talking of cobblers and fullers and cooks and doctors, as if this had to do with our argument.

Soc. But why will you not tell me in what a man must be superior and wiser in order to claim a larger share; will you neither accept a suggestion, nor offer one?

Cal. I have already told you. In the first place, I mean by superiors not cobblers or cooks, but wise politicians who understand the administration of a state, and who are not only wise, but also valiant and able to carry out their designs, and not the men to faint from want of soul.

Socrates is accused of always saying the same things: he accuses Callicles of never saying the same about the same.

Soc. See now, most excellent Callicles, how different my charge against you is from that which you bring against me, for you reproach me with always saying the same; but I reproach you with never saying the same about the same things, for at one time you were defining the better and the superior to be the stronger, then again as the wiser, and now you bring forward a new notion; the superior and the better are now declared by you to be the more courageous: I wish, my good friend, that you would tell me, once for all, whom you affirm to be the better and superior, and in what they are better?

Cal. I have already told you that I mean those who are wise and courageous in the administration of a state — they

ought to be the rulers of their states, and justice consists in their having more than their subjects.

Soc. But whether rulers or subjects will they or will they not have more than themselves, my friend?

Cal. What do you mean?

Soc. I mean that every man is his own ruler; but perhaps you think that there is no necessity for him to rule himself; he is only required to rule others?

Cal. What do you mean by his 'ruling over himself'?

Soc. A simple thing enough; just what is commonly said, that a man should be temperate and master of himself, and ruler of his own pleasures and passions.

Cal. What innocence! you mean those fools,—the temperate?

Soc. Certainly:—any one may know that to be my meaning.

Callicles reasserts his doctrine that the esteem in which virtue and justice are held is due only to men's fear for themselves. No man who has the power to enjoy himself practises self-control.

Cal. Quite so, Socrates; and they are really fools, for how can a man be happy who is the servant of anything? On the contrary, I plainly assert, that he who would truly live ought to allow his desires to wax to the uttermost, and not to chastise them; but when they have grown to their greatest
492 he should have courage and intelligence to minister to them and to satisfy all his longings. And this I affirm to be natural justice and nobility. To this however the many cannot attain; and they blame the strong man because they are ashamed of their own weakness, which they desire to conceal, and hence they say that intemperance is base. As I have remarked already, they enslave the nobler natures, and being unable to satisfy their pleasures, they praise temperance and justice out of their own cowardice. For if a man had been originally the son of a king, or had a nature capable of acquiring an empire or a tyranny or sovereignty, what could be more truly base or evil than temperance — to a man like him, I say, who might freely be enjoying every good, and has no one to stand in his way, and yet has admitted custom and reason and the opinion of other men to be lords over him?—must not he be in a miserable plight whom the reputation of justice and temperance hinders from giving more to his friends than to his enemies, even though he be a ruler in his city? Nay, Socrates, for you profess to

Gorgias.

SOCRATES, CALLICLES.

be a votary of the truth, and the truth is this:—that luxury and intemperance and licence, if they be provided with means, are virtue and happiness—all the rest is a mere bauble, agreements contrary to nature, foolish talk of men, nothing worth [1].

Soc. There is a noble freedom, Callicles, in your way of approaching the argument; for what you say is what the rest of the world think, but do not like to say. And I must beg of you to persevere, that the true rule of human life may become manifest. Tell me, then:—you say, do you not, that in the rightly-developed man the passions ought not to be controlled, but that we should let them grow to the utmost and somehow or other satisfy them, and that this is virtue?

Cal. Yes; I do.

Soc. Then those who want nothing are not truly said to be happy?

To live without pleasure or passion is to be dead.

Cal. No indeed, for then stones and dead men would be the happiest of all.

Soc. But surely life according to your view is an awful thing; and indeed I think that Euripides may have been right in saying,

'Who knows if life be not death and death life;'

No; the true death, as Pythagorean philosophy tells us, is to pour water out of a vessel full of holes into a colander full of holes.

and that we are very likely dead; I have heard a philosopher 493
say that at this moment we are actually dead, and that the body (*σῶμα*) is our tomb (*σῆμα* [2]), and that the part of the soul which is the seat of the desires is liable to be tossed about by words and blown up and down; and some ingenious person, probably a Sicilian or an Italian, playing with the word, invented a tale in which he called the soul—because of its believing and make-believe nature—a vessel [3], and the ignorant he called the uninitiated or leaky, and the place in the souls of the uninitiated in which the desires are seated, being the intemperate and incontinent part, he compared to a vessel full of holes, because it can never be satisfied. He is not of your way of thinking, Callicles, for he declares, that of all the souls in Hades, meaning the invisible world (*ἀειδὲς*), these uninitiated or leaky persons are the most miserable,

[1] Cp. Rep. i. 348. [2] Cp. Phaedr. 250 C.

[3] An untranslateable pun,—*διὰ τὸ πιθανόν τε καὶ πιστικὸν ὠνόμασε πίθον.*

and that they pour water into a vessel which is full of holes out of a colander which is similarly perforated. The colander, as my informer assures me, is the soul, and the soul which he compares to a colander is the soul of the ignorant, which is likewise full of holes, and therefore incontinent, owing to a bad memory and want of faith. These notions are strange enough, but they show the principle which, if I can, I would fain prove to you; that you should change your mind, and, instead of the intemperate and insatiate life, choose that which is orderly and sufficient and has a due provision for daily needs. Do I make any impression on you, and are you coming over to the opinion that the orderly are happier than the intemperate? Or do I fail to persuade you, and, however many tales I rehearse to you, do you continue of the same opinion still?

Cal. The latter, Socrates, is more like the truth.

The temperate man is the sound, the intemperate the leaky vessel.

Soc. Well, I will tell you another image, which comes out of the same school:—Let me request you to consider how far you would accept this as an account of the two lives of the temperate and intemperate in a figure:—There are two men, both of whom have a number of casks; the one man has his casks sound and full, one of wine, another of honey, and a third of milk, besides others filled with other liquids, and the streams which fill them are few and scanty, and he can only obtain them with a great deal of toil and difficulty; but when his casks are once filled he has no need to feed them any more, and has no further trouble with them or care about them. The other, in like manner, can procure streams, though not without difficulty; but his vessels are leaky and unsound, and night and day he is compelled to be filling
494 them, and if he pauses for a moment, he is in an agony of pain. Such are their respective lives:—And now would you say that the life of the intemperate is happier than that of the temperate? Do I not convince you that the opposite is the truth?

The life of desire and pleasure is not to be compared to a full vessel, but

Cal. You do not convince me, Socrates, for the one who has filled himself has no longer any pleasure left; and this, as I was just now saying, is the life of a stone: he has neither joy nor sorrow after he is once filled; but the pleasure depends on the superabundance of the influx.

Gorgias.

SOCRATES, CALLICLES.

to an ever-running stream.

Soc. But the more you pour in, the greater the waste; and the holes must be large for the liquid to escape.

Cal. Certainly.

Soc. The life which you are now depicting is not that of a dead man, or of a stone, but of a cormorant; you mean that he is to be hungering and eating?

Cal. Yes.

Soc. And he is to be thirsting and drinking?

Cal. Yes, that is what I mean; he is to have all his desires about him, and to be able to live happily in the gratification of them.

Soc. Capital, excellent; go on as you have begun, and have no shame; I, too, must disencumber myself of shame: and first, will you tell me whether you include itching and scratching, provided you have enough of them and pass your life in scratching, in your notion of happiness?

Cal. What a strange being you are, Socrates! a regular mob-orator.

Soc. That was the reason, Callicles, why I scared Polus and Gorgias, until they were too modest to say what they thought; but you will not be too modest and will not be scared, for you are a brave man. And now, answer my question.

Cal. I answer, that even the scratcher would live pleasantly.

Soc. And if pleasantly, then also happily?

Cal. To be sure.

Soc. But what if the itching is not confined to the head? Shall I pursue the question? And here, Callicles, I would have you consider how you would reply if consequences are pressed upon you, especially if in the last resort you are asked, whether the life of a catamite is not terrible, foul, miserable? Or would you venture to say, that they too are happy, if they only get enough of what they want?

Callicles professes a virtuous indignation at the very mention of the consequences of his own doctrine.

Cal. Are you not ashamed, Socrates, of introducing such topics into the argument?

Soc. Well, my fine friend, but am I the introducer of these topics, or he who says without any qualification that all who feel pleasure in whatever manner are happy, and who admits of no distinction between good and bad pleasures? And I 495

would still ask, whether you say that pleasure and good are the same, or whether there is some pleasure which is not a good?

Cal. Well, then, for the sake of consistency, I will say that they are the same.

Soc. You are breaking the original agreement, Callicles, and will no longer be a satisfactory companion in the search after truth, if you say what is contrary to your real opinion.

Cal. Why, that is what you are doing too, Socrates.

Soc. Then we are both doing wrong. Still, my dear friend, I would ask you to consider whether pleasure, from whatever source derived, is the good; for, if this be true, then the disagreeable consequences which have been darkly intimated must follow, and many others.

Cal. That, Socrates, is only your opinion.

Soc. And do you, Callicles, seriously maintain what you are saying?

Cal. Indeed I do.

Soc. Then, as you are in earnest, shall we proceed with the argument?

Cal. By all means[1].

Callicles, having admitted that pleasure and good are the same, is led to make the further admission that pleasure and knowledge and courage are different.

Soc. Well, if you are willing to proceed, determine this question for me:— There is something, I presume, which you would call knowledge?

Cal. There is.

Soc. And were you not saying just now, that some courage implied knowledge?

Cal. I was.

Soc. And you were speaking of courage and knowledge as two things different from one another?

Cal. Certainly I was.

Soc. And would you say that pleasure and knowledge are the same, or not the same?

Cal. Not the same, O man of wisdom.

Soc. And would you say that courage differed from pleasure?

Cal. Certainly.

Soc. Well, then, let us remember that Callicles, the Acharnian, says that pleasure and good are the same; but that

[1] Or, 'I am in profound earnest.'

Gorgias. knowledge and courage are not the same, either with one another, or with the good.

SOCRATES, CALLICLES. *Cal.* And what does our friend Socrates, of Foxton, say — does he assent to this, or not?

Soc. He does not assent; neither will Callicles, when he sees himself truly. You will admit, I suppose, that good and evil fortune are opposed to each other?

Cal. Yes.

Soc. And if they are opposed to each other, then, like health and disease, they exclude one another; a man cannot have them both, or be without them both, at the same time?

Cal. What do you mean?

Soc. Take the case of any bodily affection:— a man may have the complaint in his eyes which is called ophthalmia?

Cal. To be sure. 496

Soc. But he surely cannot have the same eyes well and sound at the same time?

Cal. Certainly not.

Soc. And when he has got rid of his ophthalmia, has he got rid of the health of his eyes too? Is the final result, that he gets rid of them both together?

Cal. Certainly not.

Soc. That would surely be marvellous and absurd?

Cal. Very.

A man may have good and evil by turns, but not at the same time.

Soc. I suppose that he is affected by them, and gets rid of them in turns?

Cal. Yes.

Soc. And he may have strength and weakness in the same way, by fits?

Cal. Yes.

Soc. Or swiftness and slowness?

Cal. Certainly.

Soc. And does he have and not have good and happiness, and their opposites, evil and misery, in a similar alternation[1]?

Cal. Certainly he has.

Soc. If then there be anything which a man has and has not at the same time, clearly that cannot be good and evil — do we agree? Please not to answer without consideration.

[1] Cp. Rep. iv. 436.

Cal. I entirely agree.

Soc. Go back now to our former admissions.— Did you say that to hunger, I mean the mere state of hunger, was pleasant or painful?

Cal. I said painful, but that to eat when you are hungry is pleasant.

Soc. I know; but still the actual hunger is painful: am I not right?

Cal. Yes.

Soc. And thirst, too, is painful?

Cal. Yes, very.

Soc. Need I adduce any more instances, or would you agree that all wants or desires are painful?

Cal. I agree, and therefore you need not adduce any more instances.

Soc. Very good. And you would admit that to drink, when you are thirsty, is pleasant?

Cal. Yes.

Soc. And in the sentence which you have just uttered, the word 'thirsty' implies pain?

Cal. Yes.

Soc. And the word 'drinking' is expressive of pleasure, and of the satisfaction of the want?

Cal. Yes.

Soc. There is pleasure in drinking?

Cal. Certainly.

Soc. When you are thirsty?

Cal. Yes.

Soc. And in pain?

Cal. Yes.

But he may have pleasure and pain at the same time.

Soc. Do you see the inference:— that pleasure and pain are simultaneous, when you say that being thirsty, you drink? For are they not simultaneous, and do they not affect at the same time the same part, whether of the soul or the body?— which of them is affected cannot be supposed to be of any consequence: Is not this true?

Cal. It is.

Soc. You said also, that no man could have good and evil fortune at the same time?

Cal. Yes, I did.

Gorgias.

SOCRATES, CALLICLES, GORGIAS.

Therefore pleasure and pain are not the same as good and evil.

Soc. But you admitted, that when in pain a man might also 497
have pleasure?

Cal. Clearly.

Soc. Then pleasure is not the same as good fortune, or pain the same as evil fortune, and therefore the good is not the same as the pleasant?

Cal. I wish I knew, Socrates, what your quibbling means.

Soc. You know, Callicles, but you affect not to know.

Cal. Well, get on, and don't keep fooling: then you will know what a wiseacre you are in your admonition of me.

Soc. Does not a man cease from his thirst and from his pleasure in drinking at the same time?

Cal. I do not understand what you are saying.

Gor. Nay, Callicles, answer, if only for our sakes;—we should like to hear the argument out.

Cal. Yes, Gorgias, but I must complain of the habitual trifling of Socrates; he is always arguing about little and unworthy questions.

Gor. What matter? Your reputation, Callicles, is not at stake. Let Socrates argue in his own fashion.

Cal. Well, then, Socrates, you shall ask these little peddling questions, since Gorgias wishes to have them.

Soc. I envy you, Callicles, for having been initiated into the great mysteries before you were initiated into the lesser. I thought that this was not allowable. But to return to our argument:—Does not a man cease from thirsting and from the pleasure of drinking at the same moment?

Cal. True.

Soc. And if he is hungry, or has any other desire, does he not cease from the desire and the pleasure at the same moment?

Cal. Very true.

Soc. Then he ceases from pain and pleasure at the same moment?

Cal. Yes.

Soc. But he does not cease from good and evil at the same moment, as you have admitted:—do you still adhere to what you said?

Cal. Yes, I do; but what is the inference?

Soc. Why, my friend, the inference is that the good is not

the same as the pleasant, or the evil the same as the painful; there is a cessation of pleasure and pain at the same moment; but not of good and evil, for they are different. How then can pleasure be the same as good, or pain as evil? And I would have you look at the matter in another light, which could hardly, I think, have been considered by you when you identified them: Are not the good good because they have good present with them, as the beautiful are those who have beauty present with them?

Gorgias. SOCRATES, CALLICLES. Another point of view.

Cal. Yes.

Soc. And do you call the fools and cowards good men? For you were saying just now that the courageous and the wise are the good — would you not say so?

Cal. Certainly.

Soc. And did you never see a foolish child rejoicing?

Cal. Yes, I have.

Soc. And a foolish man too?

Cal. Yes, certainly; but what is your drift?

498 *Soc.* Nothing particular, if you will only answer.

Cal. Yes, I have.

Soc. And did you ever see a sensible man rejoicing or sorrowing?

Cal. Yes.

Soc. Which rejoice and sorrow most — the wise or the foolish?

Cal. They are much upon a par, I think, in that respect.

Soc. Enough: And did you ever see a coward in battle?

Cal. To be sure.

Soc. And which rejoiced most at the departure of the enemy, the coward or the brave?

Cal. I should say 'most' of both; or at any rate, they rejoiced about equally.

Soc. No matter; then the cowards, and not only the brave, rejoice?

Cal. Greatly.

Soc. And the foolish; so it would seem?

Cal. Yes.

Soc. And are only the cowards pained at the approach of their enemies, or are the brave also pained?

Cal. Both are pained.

Gorgias.

SOCRATES, CALLICLES.

Soc. And are they equally pained?

Cal. I should imagine that the cowards are more pained.

Soc. And are they not better pleased at the enemy's departure?

Cal. I dare say.

Good is in proportion to pleasure, and the bad are often as much or more pleased than the good.

Soc. Then are the foolish and the wise and the cowards and the brave all pleased and pained, as you were saying, in nearly equal degree; but are the cowards more pleased and pained than the brave?

Cal. Yes.

Soc. But surely the wise and brave are the good, and the foolish and the cowardly are the bad?

Cal. Yes.

Soc. Then the good and the bad are pleased and pained in a nearly equal degree?

Cal. Yes.

Soc. Then are the good and bad good and bad in a nearly equal degree, or have the bad the advantage both in good and evil? [i. e. in having more pleasure and more pain.]

Cal. I really do not know what you mean.

Soc. Why, do you not remember saying that the good were good because good was present with them, and the evil because evil; and that pleasures were goods and pains evils?

Cal. Yes, I remember.

Soc. And are not these pleasures or goods present to those who rejoice — if they do rejoice?

Cal. Certainly.

Soc. Then those who rejoice are good when goods are present with them?

Cal. Yes.

Soc. And those who are in pain have evil or sorrow present with them?

Cal. Yes.

Soc. And would you still say that the evil are evil by reason of the presence of evil?

Cal. I should.

Soc. Then those who rejoice are good, and those who are in pain evil?

Cal. Yes.

Soc. The degrees of good and evil vary with the degrees of pleasure and of pain?

Cal. Yes.

Soc. Have the wise man and the fool, the brave and the coward, joy and pain in nearly equal degrees? or would you say that the coward has more?

Cal. I should say that he has.

Soc. Help me then to draw out the conclusion which follows from our admissions; for it is good to repeat and
499 review what is good twice and thrice over, as they say. Both the wise man and the brave man we allow to be good?

Cal. Yes.

Soc. And the foolish man and the coward to be evil?

Cal. Certainly.

Soc. And he who has joy is good?

Cal. Yes.

Soc. And he who is in pain is evil?

Cal. Certainly.

Soc. The good and evil both have joy and pain, but, perhaps, the evil has more of them?

Cal. Yes.

Therefore the bad man is as good as the good, or perhaps even better.

Soc. Then must we not infer, that the bad man is as good and bad as the good, or, perhaps, even better?—is not this a further inference which follows equally with the preceding from the assertion that the good and the pleasant are the same:—can this be denied, Callicles?

Cal. I have been listening and making admissions to you, Socrates; and I remark that if a person grants you anything in play, you, like a child, want to keep hold and will not give it back. But do you really suppose that I or any other human being denies that some pleasures are good and others bad?

Socrates begins again with some obvious truisms.

Soc. Alas, Callicles, how unfair you are! you certainly treat me as if I were a child, sometimes saying one thing, and then another, as if you were meaning to deceive me. And yet I thought at first that you were my friend, and would not have deceived me if you could have helped. But I see that I was mistaken; and now I suppose that I must make the best of a bad business, as they said of old, and take what I can get out of you.—Well, then, as I understand you to

Gorgias. SOCRATES, CALLICLES.

say, I may assume that some pleasures are good and others evil?

Cal. Yes.

Soc. The beneficial are good, and the hurtful are evil?

Cal. To be sure.

Soc. And the beneficial are those which do some good, and the hurtful are those which do some evil?

Cal. Yes.

Soc. Take, for example, the bodily pleasures of eating and drinking, which we were just now mentioning — you mean to say that those which promote health, or any other bodily excellence, are good, and their opposites evil?

Cal. Certainly.

Soc. And in the same way there are good pains and there are evil pains?

Cal. To be sure.

Soc. And ought we not to choose and use the good pleasures and pains?

Cal. Certainly.

Soc. But not the evil?

Cal. Clearly.

Soc. Because, if you remember, Polus and I have agreed that all our actions are to be done for the sake of the good; — and will you agree with us in saying, that the good is the end of all our actions, and that all our actions are to be done for the sake of the good, and not the good for the sake of them? — will you add a third vote to our two? 500

Cal. I will.

Soc. Then pleasure, like everything else, is to be sought for the sake of that which is good, and not that which is good for the sake of pleasure?

Cal. To be sure.

Soc. But can every man choose what pleasures are good and what are evil, or must he have art or knowledge of them in detail?

Cal. He must have art.

Soc. Let me now remind you of what I was saying to Gorgias and Polus; I was saying, as you will not have forgotten, that there were some processes which aim only at pleasure, and know nothing of a better and worse, and there

are other processes which know good and evil. And I considered that cookery, which I do not call an art, but only an experience, was of the former class, which is concerned with pleasure, and that the art of medicine was of the class which is concerned with the good. And now, by the god of friendship, I must beg you, Callicles, not to jest, or to imagine that I am jesting with you; do not answer at random and contrary to your real opinion;—for you will observe that we are arguing about the way of human life; and to a man who has any sense at all, what question can be more serious than this?—whether he should follow after that way of life to which you exhort me, and act what you call the manly part of speaking in the assembly, and cultivating rhetoric, and engaging in public affairs, according to the principles now in vogue; or whether he should pursue the life of philosophy;—and in what the latter way differs from the former. But perhaps we had better first try to distinguish them, as I did before, and when we have come to an agreement that they are distinct, we may proceed to consider in what they differ from one another, and which of them we should choose. Perhaps, however, you do not even now understand what I mean?

Cal. No, I do not.

Soc. Then I will explain myself more clearly: seeing that you and I have agreed that there is such a thing as good, and that there is such a thing as pleasure, and that pleasure is not the same as good, and that the pursuit and process of acquisition of the one, that is pleasure, is different from the pursuit and process of acquisition of the other, which is good—I wish that you would tell me whether you agree with me thus far or not—do you agree?

Cal. I do.

Socrates repeats his distinction between true arts and flatteries or shams,

Soc. Then I will proceed, and ask whether you also agree
501 with me, and whether you think that I spoke the truth when I further said to Gorgias and Polus that cookery in my opinion is only an experience, and not an art at all; and that whereas medicine is an art, and attends to the nature and constitution of the patient, and has principles of action and reason in each case, cookery in attending upon pleasure never regards either the nature or reason of that pleasure to

Gorgias. SOCRATES, CALLICLES.

which she devotes herself, but goes straight to her end, nor ever considers or calculates anything, but works by experience and routine, and just preserves the recollection of what she has usually done when producing pleasure. And first, I would have you consider whether I have proved what I was saying, and then whether there are not other similar processes which have to do with the soul — some of them processes of art, making a provision for the soul's highest interest — others despising the interest, and, as in the previous case, considering only the pleasure of the soul, and how this may be acquired, but not considering what pleasures are good or bad, and having no other aim but to afford gratification, whether good or bad. In my opinion, Callicles, there are such processes, and this is the sort of thing which I term flattery, whether concerned with the body or the soul, or whenever employed with a view to pleasure and without any consideration of good and evil. And now I wish that you would tell me whether you agree with us in this notion, or whether you differ.

to which Callicles pretends to give assent.

Cal. I do not differ; on the contrary, I agree; for in that way I shall soonest bring the argument to an end, and shall oblige my friend Gorgias.

Soc. And is this notion true of one soul, or of two or more?

Cal. Equally true of two or more.

Soc. Then a man may delight a whole assembly, and yet have no regard for their true interests?

Cal. Yes.

There are arts which delight mankind but which never consider the soul's higher interest.

Soc. Can you tell me the pursuits which delight mankind — or rather, if you would prefer, let me ask, and do you answer, which of them belong to the pleasurable class, and which of them not? In the first place, what say you of flute-playing? Does not that appear to be an art which seeks only pleasure, Callicles, and thinks of nothing else?

Cal. I assent.

Soc. And is not the same true of all similar arts, as, for example, the art of playing the lyre at festivals?

Cal. Yes.

Soc. And what do you say of the choral art and of dithyrambic poetry? — are not they of the same nature? Do you

imagine that Cinesias the son of Meles cares about what
502 will tend to the moral improvement of his hearers, or about what will give pleasure to the multitude?

Cal. There can be no mistake about Cinesias, Socrates.

Soc. And what do you say of his father, Meles the harp-player? Did he perform with any view to the good of his hearers? Could he be said to regard even their pleasure? For his singing was an infliction to his audience. And of harp-playing and dithyrambic poetry in general, what would you say? Have they not been invented wholly for the sake of pleasure?

Cal. That is my notion of them.

Soc. And as for the Muse of Tragedy, that solemn and august personage — what are her aspirations? Is all her aim and desire only to give pleasure to the spectators, or does she fight against them and refuse to speak of their pleasant vices, and willingly proclaim in word and song truths welcome and unwelcome? — which in your judgment is her character?

Cal. There can be no doubt, Socrates, that Tragedy has her face turned towards pleasure and the gratification of the audience.

Soc. And is not that the sort of thing, Callicles, which we were just now describing as flattery?

Cal. Quite true.

Soc. Well now, suppose that we strip all poetry of song and rhythm and metre, there will remain speech[1]?

Cal. To be sure.

Soc. And this speech is addressed to a crowd of people?

Cal. Yes.

Soc. Then poetry is a sort of rhetoric?

Cal. True.

Soc. And do not the poets in the theatres seem to you to be rhetoricians?

Cal. Yes.

Poetry is of the nature of flattery.

Soc. Then now we have discovered a sort of rhetoric which is addressed to a crowd of men, women, and children, freemen and slaves. And this is not much to our taste, for we have described it as having the nature of flattery.

[1] Cp. Rep. iii. 392 foll.

Gorgias.

Cal. Quite true.

SOCRATES, CALLICLES.

Soc. Very good. And what do you say of that other rhetoric which addresses the Athenian assembly and the assemblies of freemen in other states? Do the rhetoricians appear to you always to aim at what is best, and do they seek to improve the citizens by their speeches, or are they too, like the rest of mankind, bent upon giving them pleasure, forgetting the public good in the thought of their own interest, playing with the people as with children, and trying to amuse them, but never considering whether they are better or worse for this?

Oratory, too, as practised regards the interest of the speaker rather than the good of the people.

Cal. I must distinguish. There are some who have a real 503
care of the public in what they say, while others are such as you describe.

Soc. I am contented with the admission that rhetoric is of two sorts; one, which is mere flattery and disgraceful declamation; the other, which is noble and aims at the training and improvement of the souls of the citizens, and strives to say what is best, whether welcome or unwelcome, to the audience; but have you ever known such a rhetoric; or if you have, and can point out any rhetorician who is of this stamp, who is he?

There might be a higher style of oratory; and Callicles thinks that such really existed in the great days of old, the days of Miltiades and Themistocles and Pericles.

Cal. But, indeed, I am afraid that I cannot tell you of any such among the orators who are at present living.

Soc. Well, then, can you mention any one of a former generation, who may be said to have improved the Athenians, who found them worse and made them better, from the day that he began to make speeches? for, indeed, I do not know of such a man.

Cal. What! did you never hear that Themistocles was a good man, and Cimon and Miltiades and Pericles, who is just lately dead, and whom you heard yourself?

Yet even these famous men had no ideal or standard.

Soc. Yes, Callicles, they were good men, if, as you said at first, true virtue consists only in the satisfaction of our own desires and those of others; but if not, and if, as we were afterwards compelled to acknowledge, the satisfaction of some desires makes us better, and of others, worse, and we ought to gratify the one and not the other, and there is an art in distinguishing them,— can you tell me of any of these statesmen who did distinguish them?

Gorgias.

Cal. No, indeed, I cannot.

SOCRATES, CALLICLES.

Soc. Yet, surely, Callicles, if you look you will find such a one. Suppose that we just calmly consider whether any of these was such as I have described. Will not the good man, who says whatever he says with a view to the best, speak with a reference to some standard and not at random; just as all other artists, whether the painter, the builder, the shipwright, or any other look all of them to their own work, and do not select and apply at random what they apply, but strive to give a definite form to it? The artist disposes all
504 things in order, and compels the one part to harmonize and accord with the other part, until he has constructed a regular and systematic whole; and this is true of all artists, and in the same way the trainers and physicians, of whom we spoke before, give order and regularity to the body: do you deny this?

Some standard needed other than a man's interest.

Cal. No; I am ready to admit it.

Soc. Then the house in which order and regularity prevail is good; that in which there is disorder, evil?

Order is good, disorder evil, in a ship, in a human body, in a human soul.

Cal. Yes.

Soc. And the same is true of a ship?

Cal. Yes.

Soc. And the same may be said of the human body?

Cal. Yes.

Soc. And what would you say of the soul? Will the good soul be that in which disorder is prevalent, or that in which there is harmony and order?

Cal. The latter follows from our previous admissions.

Soc. What is the name which is given to the effect of harmony and order in the body?

Cal. I suppose that you mean health and strength?

Soc. Yes, I do; and what is the name which you would give to the effect of harmony and order in the soul? Try and discover a name for this as well as for the other.

Cal. Why not give the name yourself, Socrates?

Soc. Well, if you had rather that I should, I will; and you shall say whether you agree with me, and if not, you shall refute and answer me. 'Healthy,' as I conceive, is the name which is given to the regular order of the body,

Gorgias.

SOCRATES, CALLICLES.

whence comes health and every other bodily excellence: is that true or not?

Cal. True.

From order and law spring temperance and justice.

Soc. And 'lawful' and 'law' are the names which are given to the regular order and action of the soul, and these make men lawful and orderly:—and so we have temperance and justice: have we not?

Cal. Granted.

The true rhetorician will seek to implant these virtues, to implant justice and take away injustice.

Soc. And will not the true rhetorician who is honest and understands his art have his eye fixed upon these, in all the words which he addresses to the souls of men, and in all his actions, both in what he gives and in what he takes away? Will not his aim be to implant justice in the souls of his citizens and take away injustice, to implant temperance and take away intemperance, to implant every virtue and take away every vice? Do you not agree?

Cal. I agree.

Soc. For what use is there, Callicles, in giving to the body of a sick man who is in a bad state of health a quantity of the most delightful food or drink or any other pleasant thing, which may be really as bad for him as if you gave him 505
nothing, or even worse if rightly estimated. Is not that true?

Cal. I will not say No to it.

The body of the sick and the soul of the wicked must be chastised and improved.

Soc. For in my opinion there is no profit in a man's life if his body is in an evil plight — in that case his life also is evil: am I not right?

Cal. Yes.

Soc. When a man is in health the physicians will generally allow him to eat when he is hungry and drink when he is thirsty, and to satisfy his desires as he likes, but when he is sick they hardly suffer him to satisfy his desires at all: even you will admit that?

Cal. Yes.

Soc. And does not the same argument hold of the soul, my good sir? While she is in a bad state and is senseless and intemperate and unjust and unholy, her desires ought to be controlled, and she ought to be prevented from doing anything which does not tend to her own improvement.

Cal. Yes.

Soc. Such treatment will be better for the soul herself?

Cal. To be sure.

Soc. And to restrain her from her appetites is to chastise her?

Cal. Yes.

Soc. Then restraint or chastisement is better for the soul than intemperance or the absence of control, which you were just now preferring?

Cal. I do not understand you, Socrates, and I wish that you would ask some one who does.

Callicles does not wish to be improved.

Soc. Here is a gentleman who cannot endure to be improved or to subject himself to that very chastisement of which the argument speaks!

Cal. I do not heed a word of what you are saying, and have only answered hitherto out of civility to Gorgias.

Soc. What are we to do, then? Shall we break off in the middle?

Cal. You shall judge for yourself.

Soc. Well, but people say that 'a tale should have a head and not break off in the middle,' and I should not like to have the argument going about without a head[1]; please then to go on a little longer, and put the head on.

Cal. How tyrannical you are, Socrates! I wish that you and your argument would rest, or that you would get some one else to argue with you.

Soc. But who else is willing?—I want to finish the argument.

Cal. Cannot you finish without my help, either talking straight on, or questioning and answering yourself?

Soc. Must I then say with Epicharmus, 'Two men spoke before, but now one shall be enough'? I suppose that there is absolutely no help. And if I am to carry on the enquiry by myself, I will first of all remark that not only I but all of us should have an ambition to know what is true and what is false in this matter, for the discovery of the truth is a common good. And now I will proceed to argue according to
506 my own notion. But if any of you think that I arrive at conclusions which are untrue you must interpose and refute me, for I do not speak from any knowledge of what I am

[1] Cp. Laws vi. 752 A.

Gorgias.
SOCRATES, GORGIAS, CALLICLES.

saying; I am an enquirer like yourselves, and therefore, if my opponent says anything which is of force, I shall be the first to agree with him. I am speaking on the supposition that the argument ought to be completed; but if you think otherwise let us leave off and go our ways.

Gor. I think, Socrates, that we should not go our ways until you have completed the argument; and this appears to me to be the wish of the rest of the company; I myself should very much like to hear what more you have to say.

Soc. I too, Gorgias, should have liked to continue the argument with Callicles, and then I might have given him an 'Amphion' in return for his 'Zethus'[1]; but since you, Callicles, are unwilling to continue, I hope that you will listen, and interrupt me if I seem to you to be in error. And if you refute me, I shall not be angry with you as you are with me, but I shall inscribe you as the greatest of benefactors on the tablets of my soul.

Cal. My good fellow, never mind me, but get on.

The pleasant not the same as the good, and is to be sought only for the sake of the good: and we are good when good is present in us, and good is the effect of order and truth and art.

Soc. Listen to me, then, while I recapitulate the argument: — Is the pleasant the same as the good? Not the same. Callicles and I are agreed about that. And is the pleasant to be pursued for the sake of the good? or the good for the sake of the pleasant? The pleasant is to be pursued for the sake of the good. And that is pleasant at the presence of which we are pleased, and that is good at the presence of which we are good? To be sure. And we are good, and all good things whatever are good when some virtue is present in us or them? That, Callicles, is my conviction. But the virtue of each thing, whether body or soul, instrument or creature, when given to them in the best way comes to them not by chance but as the result of the order and truth and art which are imparted to them: Am I not right? I maintain that I am. And is not the virtue of each thing dependent on order or arrangement? Yes, I say. And that which makes a thing good is the proper order inhering in each thing? Such is my view. And is not the soul which has an order of her own better than that which has no order? Certainly. And the soul which has order is orderly? Of course. And that which is orderly is temperate? Assuredly. And the 507

[1] p. 485.

temperate soul is good? No other answer can I give, Callicles dear; have you any?

Cal. Go on, my good fellow.

Soc. Then I shall proceed to add, that if the temperate soul is the good soul, the soul which is in the opposite condition, that is, the foolish and intemperate, is the bad soul. Very true.

The temperate soul is the good soul, just in relation to men, and holy in relation to gods, and is therefore happy; and the intemperate is the reverse of all this.

And will not the temperate man do what is proper, both in relation to the gods and to men;—for he would not be temperate if he did not? Certainly he will do what is proper. In his relation to other men he will do what is just; and in his relation to the gods he will do what is holy; and he who does what is just and holy must be just and holy? Very true. And must he not be courageous? for the duty of a temperate man is not to follow or to avoid what he ought not, but what he ought, whether things or men or pleasures or pains, and patiently to endure when he ought; and therefore, Callicles, the temperate man, being, as we have described, also just and courageous and holy, cannot be other than a perfectly good man, nor can the good man do otherwise than well and perfectly whatever he does; and he who does well must of necessity be happy and blessed, and the evil man who does evil, miserable: now this latter is he whom you were applauding — the intemperate who is the opposite of the temperate. Such is my position, and these things I affirm to be true. And if they are true, then I further affirm that he who desires to be happy must pursue and practise temperance and run away from intemperance as fast as his legs will carry him: he had better order his life so as not to need punishment; but if either he or any of his friends, whether private individual or city, are in need of punishment, then justice must be done and he must suffer punishment, if he would be happy. This appears to me to be the aim which a man ought to have, and towards which he ought to direct all the energies both of himself and of the state, acting so that he may have temperance and justice present with him and be happy, not suffering his lusts to be unrestrained, and in the never-ending desire to satisfy them leading a robber's life. Such a one is the friend neither of God nor man, for he is incapable of communion, and he who is incapable of

Gorgias.

SOCRATES.

communion is also incapable of friendship. And philosophers tell us, Callicles, that communion and friendship and orderliness and temperance and justice bind together heaven and earth and gods and men, and that this universe is therefore called Cosmos or order, not disorder or misrule, my friend. But although you are a philosopher you seem to me never to have observed that geometrical equality is mighty, both among gods and men; you think that you ought to cultivate inequality or excess, and do not care about geometry.— Well, then, either the principle that the happy are made happy by the possession of justice and temperance, and the miserable miserable by the possession of vice, must be refuted, or, if it is granted, what will be the consequences? All the consequences which I drew before, Callicles, and about which you asked me whether I was in earnest when I said that a man ought to accuse himself and his son and his friend if he did anything wrong, and that to this end he should use his rhetoric — all those consequences are true. And that which you thought that Polus was led to admit out of modesty is true, viz. that, to do injustice, if more disgraceful than to suffer, is in that degree worse; and the other position, which, according to Polus, Gorgias admitted out of modesty, that he who would truly be a rhetorician ought to be just and have a knowledge of justice, has also turned out to be true.

If it be admitted that virtue is happiness and vice misery, then what Socrates said about the use of rhetoric in self-accusation turns out to be true.

And now, these things being as we have said, let us proceed in the next place to consider whether you are right in throwing in my teeth that I am unable to help myself or any of my friends or kinsmen, or to save them in the extremity of danger, and that I am in the power of another like an outlaw to whom any one may do what he likes,— he may box my ears, which was a brave saying of yours; or take away my goods or banish me, or even do his worst and kill me; a condition which, as you say, is the height of disgrace. My answer to you is one which has been already often repeated, but may as well be repeated once more. I tell you, Callicles, that to be boxed on the ears wrongfully is not the worst evil which can befall a man, nor to have my purse or my body cut open, but that to smite and slay me and mine wrongfully is far more disgraceful and more evil;

aye, and to despoil and enslave and pillage, or in any way at all to wrong me and mine, is far more disgraceful and evil to the doer of the wrong than to me who am the sufferer. 509 These truths, which have been already set forth as I state them in the previous discussion, would seem now to have been fixed and riveted by us, if I may use an expression which is certainly bold, in words which are like bonds of iron and adamant; and unless you or some other still more enterprising hero shall break them, there is no possibility of denying what I say. For my position has always been, that I myself am ignorant how these things are, but that I have never met any one who could say otherwise, any more than you can, and not appear ridiculous. This is my position still, and if what I am saying is true, and injustice is the greatest of evils to the doer of injustice, and yet there is if possible a greater than this greatest of evils[1], in an unjust man not suffering retribution, what is that defence of which the want will make a man truly ridiculous? Must not the defence be one which will avert the greatest of human evils? And will not the worst of all defences be that with which a man is unable to defend himself or his family or his friends?—and next will come that which is unable to avert the next greatest evil; thirdly that which is unable to avert the third greatest evil; and so of other evils. As is the greatness of evil so is the honour of being able to avert them in their several degrees, and the disgrace of not being able to avert them. Am I not right, Callicles?

The greatest evil to do injustice, but there is a greater still, not to be punished for doing injustice.

Cal. Yes, quite right.

Soc. Seeing then that there are these two evils, the doing injustice and the suffering injustice — and we affirm that to do injustice is a greater, and to suffer injustice a lesser evil — by what devices can a man succeed in obtaining the two advantages, the one of not doing and the other of not suffering injustice? must he have the power, or only the will to obtain them? I mean to ask whether a man will escape injustice if he has only the will to escape, or must he have provided himself with the power?

Cal. He must have provided himself with the power; that is clear.

[1] Cp. Republic, 9. 578 ff.

Gorgias.

SOCRATES, CALLICLES.

Soc. And what do you say of doing injustice? Is the will only sufficient, and will that prevent him from doing injustice, or must he have provided himself with power and art; and if he have not studied and practised, will he be unjust still? Surely you might say, Callicles, whether you think that Polus and I were right in admitting the conclusion that no one does wrong voluntarily, but that all do wrong against their will?

Cal. Granted, Socrates, if you will only have done. 510

Soc. Then, as would appear, power and art have to be provided in order that we may do no injustice?

Cal. Certainly.

Soc. And what art will protect us from suffering injustice, if not wholly, yet as far as possible? I want to know whether you agree with me; for I think that such an art is the art of one who is either a ruler or even tyrant himself, or the equal and companion of the ruling power.

Cal. Well said, Socrates; and please to observe how ready I am to praise you when you talk sense.

Soc. Think and tell me whether you would approve of another view of mine: To me every man appears to be most the friend of him who is most like to him — like to like, as ancient sages say: Would you not agree to this?

Cal. I should.

The tyrant naturally hates both his superiors and inferiors: he likes only those who resemble him in character.

Soc. But when the tyrant is rude and uneducated, he may be expected to fear any one who is his superior in virtue, and will never be able to be perfectly friendly with him.

Cal. That is true.

Soc. Neither will he be the friend of any one who is greatly his inferior, for the tyrant will despise him, and will never seriously regard him as a friend.

Cal. That again is true.

Soc. Then the only friend worth mentioning, whom the tyrant can have, will be one who is of the same character, and has the same likes and dislikes, and is at the same time willing to be subject and subservient to him; he is the man who will have power in the state, and no one will injure him with impunity: — is not that so?

Cal. Yes.

Soc. And if a young man begins to ask how he may be-

SOCRATES, CALLICLES.

come great and formidable, this would seem to be the way — he will accustom himself, from his youth upward, to feel sorrow and joy on the same occasions as his master, and will contrive to be as like him as possible?

And the way to be a great man and not to suffer injury is to become like him. And there can be no greater evil to him than this.

Cal. Yes.

Soc. And in this way he will have accomplished, as you and your friends would say, the end of becoming a great man and not suffering injury?

Cal. Very true.

Soc. But will he also escape from doing injury? Must not the very opposite be true, if he is to be like the tyrant in his
511 injustice, and to have influence with him? Will he not rather contrive to do as much wrong as possible, and not be punished?

Cal. True.

Soc. And by the imitation of his master and by the power which he thus acquires will not his soul become bad and corrupted, and will not this be the greatest evil to him?

Cal. You always contrive somehow or other, Socrates, to invert everything: do you not know that he who imitates the tyrant will, if he has a mind, kill him who does not imitate him and take away his goods?

But how provoking that the bad man should slay the good!

Soc. Excellent Callicles, I am not deaf, and I have heard that a great many times from you and from Polus and from nearly every man in the city, but I wish that you would hear me too. I dare say that he will kill him if he has a mind — the bad man will kill the good and true.

Cal. And is not that just the provoking thing?

Nay, but we should not always study the arts which save us from death;— the art of swimming, the art of the pilot, &c.

Soc. Nay, not to a man of sense, as the argument shows: do you think that all our cares should be directed to prolonging life to the uttermost, and to the study of those arts which secure us from danger always; like that art of rhetoric which saves men in courts of law, and which you advise me to cultivate?

Cal. Yes, truly, and very good advice too.

Soc. Well, my friend, but what do you think of swimming; is that an art of any great pretensions?

Cal. No, indeed.

Soc. And yet surely swimming saves a man from death, and there are occasions on which he must know how to swim.

Gorgias.

SOCRATES.

And if you despise the swimmers, I will tell you of another and greater art, the art of the pilot, who not only saves the souls of men, but also their bodies and properties from the extremity of danger, just like rhetoric. Yet his art is modest and unpresuming: it has no airs or pretences of doing anything extraordinary, and, in return for the same salvation which is given by the pleader, demands only two obols, if he brings us from Aegina to Athens, or for the longer voyage from Pontus or Egypt, at the utmost two drachmae, when he has saved, as I was just now saying, the passenger and his wife and children and goods, and safely disembarked them at the Piraeus,— this is the payment which he asks in return for so great a boon; and he who is the master of the art, and has done all this, gets out and walks about on the sea-shore by his ship in an unassuming way. For he is able to reflect and is aware that he cannot tell which of his fellow-passengers he has benefited, and which of them he has injured in not allowing them to be drowned. He knows that they are just the same when he has disembarked them as when they embarked, 512
and not a whit better either in their bodies or in their souls; and he considers that if a man who is afflicted by great and incurable bodily diseases is only to be pitied for having escaped, and is in no way benefited by him in having been saved from drowning, much less he who has great and incurable diseases, not of the body, but of the soul, which is the more valuable part of him; neither is life worth having nor of any profit to the bad man, whether he be delivered from the sea, or the law-courts, or any other devourer;— and so he reflects that such a one had better not live, for he cannot live well[1].

The pilot demands a very moderate payment as the fare of a passenger from Athens to Aegina, because he is not certain whether salvation from death be a good or an evil.

And this is the reason why the pilot, although he is our saviour, is not usually conceited, any more than the engineer, who is not at all behind either the general, or the pilot, or any one else, in his saving power, for he sometimes saves whole cities. Is there any comparison between him and the pleader? And if he were to talk, Callicles, in your grandiose style, he would bury you under a mountain of words, declaring and insisting that we ought all of us to be engine-makers, and that no other profession is worth thinking about;

The engineer, too:—how much better than the pleader!

[1] Cp. Rep. iii. 407 E.

Gorgias.

SOCRATES, CALLICLES.

He too is another of your saviours; but you despise him, whereas you ought to esteem him highly.

he would have plenty to say. Nevertheless you despise him and his art, and sneeringly call him an engine-maker, and you will not allow your daughters to marry his son, or marry your son to his daughters. And yet, on your principle, what justice or reason is there in your refusal? What right have you to despise the engine-maker, and the others whom I was just now mentioning? I know that you will say, 'I am better, and better born.' But if the better is not what I say, and virtue consists only in a man saving himself and his, whatever may be his character, then your censure of the engine-maker, and of the physician, and of the other arts of salvation, is ridiculous. O my friend! I want you to see that the noble and the good may possibly be something different from saving and being saved:—May not he who is truly a man cease to care about living a certain time?—he knows, as women say, that no man can escape fate, and therefore he is not fond of life; he leaves all that with God, and considers in what way he can best spend his appointed term;—whether by assimilating himself to the constitution under which he
513 lives, as you at this moment have to consider how you may become as like as possible to the Athenian people, if you mean to be in their good graces, and to have power in the state; whereas I want you to think and see whether this is for the interest of either of us;—I would not have us risk that which is dearest on the acquisition of this power, like the Thessalian enchantresses, who, as they say, bring down the moon from heaven at the risk of their own perdition. But if you suppose that any man will show you the art of becoming great in the city, and yet not conforming yourself to the ways of the city, whether for better or worse, then I can only say that you are mistaken, Callicles; for he who would deserve to be the true natural friend of the Athenian Demus, aye, or of Pyrilampes' darling who is called after them, must be by nature like them, and not an imitator only. He, then, who will make you most like them, will make you as you desire, a statesman and orator: for every man is pleased when he is spoken to in his own language and spirit, and dislikes any other. But perhaps you, sweet Callicles, may be of another mind. What do you say?

I want you to consider whether you can possibly become great among the people unless you become like them.

Cal. Somehow or other your words, Socrates, always

Gorgias.

SOCRATES, CALLICLES.

appear to me to be good words; and yet, like the rest of the world, I am not quite convinced by them[1].

Callicles inclines for an instant to the Gospel of Socrates, but the love of the world and of popularity overcomes him.

Soc. The reason is, Callicles, that the love of Demus which abides in your soul is an adversary to me; but I dare say that if we recur to these same matters, and consider them more thoroughly, you may be convinced for all that. Please, then, to remember that there are two processes of training all things, including body and soul; in the one, as we said, we treat them with a view to pleasure, and in the other with a view to the highest good, and then we do not indulge but resist them: was not that the distinction which we drew?

Two processes of training; one having a view to pleasure, the other to good.

Cal. Very true.

Soc. And the one which had pleasure in view was just a vulgar flattery:— was not that another of our conclusions?

Cal. Be it so, if you will have it.

Soc. And the other had in view the greatest improvement of that which was ministered to, whether body or soul?

Cal. Quite true.

And we must train our citizens with a view to their good; and, as in other arts, we must show that we can be trusted to improve them.

Soc. And must we not have the same end in view in the treatment of our city and citizens? Must we not try and make them as good as possible? For we have already discovered that there is no use in imparting to them any other 514
good, unless the mind of those who are to have the good, whether money, or office, or any other sort of power, be gentle and good. Shall we say that?

Cal. Yes, certainly, if you like.

Soc. Well, then, if you and I, Callicles, were intending[2] to set about some public business, and were advising one another to undertake buildings, such as walls, docks or temples of the largest size, ought we not to examine ourselves, first, as to whether we know or do not know the art of building, and who taught us?— would not that be necessary, Callicles?

Cal. True.

Soc. In the second place, we should have to consider whether we had ever constructed any private house, either of our own or for our friends, and whether this building of ours was a success or not; and if upon consideration we found that we had had good and eminent masters, and had been

[1] Cp. Symp. 216: 1 Alcib. 135.

[2] Reading with the majority of MSS. *πράξοντες*.

successful in constructing many fine buildings, not only with their assistance, but without them, by our own unaided skill — in that case prudence would not dissuade us from proceeding to the construction of public works. But if we had no master to show, and only a number of worthless buildings or none at all, then, surely, it would be ridiculous in us to attempt public works, or to advise one another to undertake them. Is not this true?

Cal. Certainly.

Soc. And does not the same hold in all other cases? If you and I were physicians, and were advising one another that we were competent to practise as state-physicians, should I not ask about you, and would you not ask about me, Well, but how about Socrates himself, has he good health? and was any one else ever known to be cured by him, whether slave or freeman? And I should make the same enquiries about you. And if we arrived at the conclusion that no one, whether citizen or stranger, man or woman, had ever been any the better for the medical skill of either of us, then, by Heaven, Callicles, what an absurdity to think that we or any human being should be so silly as to set up as state-physicians and advise others like ourselves to do the same, without having first practised in private, whether successfully or not, and acquired experience of the art! Is not this, as they say, to begin with the big jar when you are learning the potter's art; which is a foolish thing?

515 *Cal.* True.

And now, Callicles, what are you who are a public character doing for the improvement of the citizens?

Soc. And now, my friend, as you are already beginning to be a public character, and are admonishing and reproaching me for not being one, suppose that we ask a few questions of one another. Tell me, then, Callicles, how about making any of the citizens better? Was there ever a man who was once vicious, or unjust, or intemperate, or foolish, and became by the help of Callicles good and noble? Was there ever such a man, whether citizen or stranger, slave or freeman? Tell me, Callicles, if a person were to ask these questions of you, what would you answer? Whom would you say that you had improved by your conversation? There may have been good deeds of this sort which were done by you

Gorgias.

SOCRATES, CALLICLES.

as a private person, before you came forward in public. Why will you not answer?

Cal. You are contentious, Socrates.

Callicles makes no answer.

Soc. Nay, I ask you, not from a love of contention, but because I really want to know in what way you think that affairs should be administered among us — whether, when you come to the administration of them, you have any other aim but the improvement of the citizens? Have we not already admitted many times over that such is the duty of a public man? Nay, we have surely said so; for if you will not answer for yourself I must answer for you. But if this is what the good man ought to effect for the benefit of his own state, allow me to recall to you the names of those whom you were just now mentioning, Pericles, and Cimon, and Miltiades, and Themistocles, and ask whether you still think that they were good citizens.

Or how did Pericles and the great of old benefit the citizens?

Cal. I do.

Soc. But if they were good, then clearly each of them must have made the citizens better instead of worse?

Cal. Yes.

Soc. And, therefore, when Pericles first began to speak in the assembly, the Athenians were not so good as when he spoke last?

Cal. Very likely.

Soc. Nay, my friend, 'likely' is not the word; for if he was a good citizen, the inference is certain.

Cal. And what difference does that make?

Pericles corrupted them by giving them pay.

Soc. None; only I should like further to know whether the Athenians are supposed to have been made better by Pericles, or, on the contrary, to have been corrupted by him; for I hear that he was the first who gave the people pay, and made them idle and cowardly, and encouraged them in the love of talk and of money.

Cal. You heard that, Socrates, from the laconising set who bruise their ears.

He made them worse instead of better, for they all but put him to death.

Soc. But what I am going to tell you now is not mere hearsay, but well known both to you and me: that at first, Pericles was glorious and his character unimpeached by any verdict of the Athenians — this was during the time when 516
they were not so good — yet afterwards, when they had been

made good and gentle by him, at the very end of his life they convicted him of theft, and almost put him to death, clearly under the notion that he was a malefactor.

Cal. Well, but how does that prove Pericles' badness?

Soc. Why, surely, you would say that he was a bad manager of asses or horses or oxen, who had received them originally neither kicking nor butting nor biting him, and implanted in them all these savage tricks? Would he not be a bad manager of any animals who received them gentle, and made them fiercer than they were when he received them? What do you say?

Cal. I will do you the favour of saying 'yes.'

Soc. And will you also do me the favour of saying whether man is an animal?

Cal. Certainly he is.

Soc. And was not Pericles a shepherd of men?

Cal. Yes.

Soc. And if he was a good political shepherd, ought not the animals who were his subjects, as we were just now acknowledging, to have become more just, and not more unjust?

Cal. Quite true.

Soc. And are not just men gentle, as Homer says?—or are you of another mind?

Cal. I agree.

Soc. And yet he really did make them more savage than he received them, and their savageness was shown towards himself; which he must have been very far from desiring.

Cal. Do you want me to agree with you?

Soc. Yes, if I seem to you to speak the truth.

Cal. Granted then.

Soc. And if they were more savage, must they not have been more unjust and inferior?

Cal. Granted again.

Soc. Then upon this view, Pericles was not a good statesman?

Cal. That is, upon your view.

Cimon was ostracised;

Soc. Nay, the view is yours, after what you have admitted. Take the case of Cimon again. Did not the very persons whom he was serving ostracize him, in order that they might

Gorgias.

SOCRATES, CALLICLES.

Themistocles was exiled; Miltiades was nearly thrown from the rock.

not hear his voice for ten years? and they did just the same to Themistocles, adding the penalty of exile; and they voted that Miltiades, the hero of Marathon, should be thrown into the pit of death, and he was only saved by the Prytanis. And yet, if they had been really good men, as you say, these things would never have happened to them. For the good charioteers are not those who at first keep their place, and then, when they have broken-in their horses, and themselves become better charioteers, are thrown out — that is not the way either in charioteering or in any profession.— What do you think?

Cal. I should think not.

The older statesmen no better than the existing ones.

Soc. Well, but if so, the truth is as I have said already, 517 that in the Athenian State no one has ever shown himself to be a good statesman — you admitted that this was true of our present statesmen, but not true of former ones, and you preferred them to the others; yet they have turned out to be no better than our present ones; and therefore, if they were rhetoricians, they did not use the true art of rhetoric or of flattery, or they would not have fallen out of favour.

Cal. But surely, Socrates, no living man ever came near any one of them in his performances.

The older statesmen not able really to elevate the state to a higher level, but more capable of gratifying its desires.

Soc. O, my dear friend, I say nothing against them regarded as the serving-men of the State; and I do think that they were certainly more serviceable than those who are living now, and better able to gratify the wishes of the State; but as to transforming those desires and not allowing them to have their way, and using the powers which they had, whether of persuasion or of force, in the improvement of their fellow-citizens, which is the prime object of the truly good citizen, I do not see that in these respects they were a whit superior to our present statesmen, although I do admit that they were more clever at providing ships and walls and docks, and all that. You and I have a ridiculous way, for during the whole time that we are arguing, we are always going round and round to the same point, and constantly misunderstanding one another. If I am not mistaken, you have admitted and acknowledged more than once, that there are two kinds of operations which have to do with the body,

and two which have to do with the soul: one of the two is ministerial, and if our bodies are hungry provides food for them, and if they are thirsty gives them drink, or if they are cold supplies them with garments, blankets, shoes, and all that they crave. I use the same images as before intentionally, in order that you may understand me the better. The purveyor of the articles may provide them either wholesale or retail, or he may be the maker of any of them,— the baker, or the cook, or the weaver, or the shoemaker, or the currier; and in so doing, being such as he is, he is naturally supposed by himself and every one to minister to the body. For none of them know that there is another art — an art of gymnastic and medicine which is the true minister of the body, and ought to be the mistress of all the rest, and to use their results according to the knowledge which she has and they have not, of the real good or bad effects of meats
518 and drinks on the body. All other arts which have to do with the body are servile and menial and illiberal; and gymnastic and medicine are, as they ought to be, their mistresses. Now, when I say that all this is equally true of the soul, you seem at first to know and understand and assent to my words, and then a little while afterwards you come repeating, Has not the State had good and noble citizens? and when I ask you who they are, you reply, seemingly quite in earnest, as if I had asked, Who are or have been good trainers?— and you had replied, Thearion, the baker, Mithoecus, who wrote the Sicilian cookery-book, Sarambus, the vintner: these are ministers of the body, first-rate in their art; for the first makes admirable loaves, the second excellent dishes, and the third capital wine;— to me these appear to be the exact parallel of the statesmen whom you mention. Now you would not be altogether pleased if I said to you, My friend, you know nothing of gymnastics; those of whom you are speaking to me are only the ministers and purveyors of luxury, who have no good or noble notions of their art, and may very likely be filling and fattening men's bodies and gaining their approval, although the result is that they lose their original flesh in the long run, and become thinner than they were before; and yet they, in their simplicity, will not attribute their diseases and

Gorgias.

SOCRATES.

You might as well say that the cook or the baker is a good trainer as that they were great statesmen.

Gorgias.
SOCRATES.

loss of flesh to their entertainers; but when in after years the unhealthy surfeit brings the attendant penalty of disease, he who happens to be near them at the time, and offers them advice, is accused and blamed by them, and if they could they would do him some harm; while they proceed to eulogize the men who have been the real authors of the mischief. And that, Callicles, is just what you are now doing. You praise the men who feasted the citizens and satisfied their desires, and people say that they have made the city great, not seeing that the swollen and ulcerated condition of the State is to be attributed to these elder statesmen; for they have filled the city full of harbours and docks and walls and revenues and all that, and have left no room for justice and temperance. And when the crisis of the disorder comes, 519
the people will blame the advisers of the hour, and applaud Themistocles and Cimon and Pericles, who are the real authors of their calamities; and if you are not careful they may assail you and my friend Alcibiades, when they are losing not only their new acquisitions, but also their original possessions; not that you are the authors of these misfortunes of theirs, although you may perhaps be accessories to them.

The statesman like the Sophist; neither has any right to accuse their followers of wronging them; they should have taught them better.

A great piece of work is always being made, as I see and am told, now as of old, about our statesmen. When the State treats any of them as malefactors, I observe that there is a great uproar and indignation at the supposed wrong which is done to them; 'after all their many services to the State, that they should unjustly perish,'—so the tale runs. But the cry is all a lie; for no statesman ever could be unjustly put to death by the city of which he is the head. The case of the professed statesman is, I believe, very much like that of the professed sophist; for the sophists, although they are wise men, are nevertheless guilty of a strange piece of folly; professing to be teachers of virtue, they will often accuse their disciples of wronging them, and defrauding them of their pay, and showing no gratitude for their services. Yet what can be more absurd than that men who have become just and good, and whose injustice has been taken away from them, and who have had justice implanted in them by their teachers, should act unjustly by reason of the injustice which is not in them? Can anything be more

irrational, my friend, than this? You, Callicles, compel me to be a mob-orator, because you will not answer.

Cal. And you are the man who cannot speak unless there is some one to answer?

Soc. I suppose that I can; just now, at any rate, the speeches which I am making are long enough because you refuse to answer me. But I adjure you by the god of friendship, my good sir, do tell me whether there does not appear to you to be a great inconsistency in saying that you have made a man good, and then blaming him for being bad?

Cal. Yes, it appears so to me.

520 *Soc.* Do you never hear our professors of education speaking in this inconsistent manner?

Cal. Yes, but why talk of men who are good for nothing?

Soc. I would rather say, why talk of men who profess to be rulers, and declare that they are devoted to the improvement of the city, and nevertheless upon occasion declaim against the utter vileness of the city:—do you think that there is any difference between one and the other? My good friend, the sophist and the rhetorician, as I was saying to Polus, are the same, or nearly the same; but you ignorantly fancy that rhetoric is a perfect thing, and sophistry a thing to be despised; whereas the truth is, that sophistry is as much superior to rhetoric as legislation is to the practice of law, or gymnastic to medicine. The orators and sophists, as I am inclined to think, are the only class who cannot complain of the mischief ensuing to themselves from that which they teach others, without in the same breath accusing themselves of having done no good to those whom they profess to benefit. Is not this a fact?

Sophistry is much superior to rhetoric.

Cal. Certainly it is.

Soc. If they were right in saying that they make men better, then they are the only class who can afford to leave their remuneration to those who have been benefited by them. Whereas if a man has been benefited in any other way, if, for example, he has been taught to run by a trainer, he might possibly defraud him of his pay, if the trainer left the matter to him, and made no agreement with him that he should receive money as soon as he had given him the

He who teaches honesty ought to teach his pupils to pay him for the lesson.

Gorgias. SOCRATES, CALLICLES.

utmost speed; for not because of any deficiency of speed do men act unjustly, but by reason of injustice.

Cal. Very true.

Soc. And he who removes injustice can be in no danger of being treated unjustly: he alone can safely leave the honorarium to his pupils, if he be really able to make them good — am I not right [1]?

Cal. Yes.

Soc. Then we have found the reason why there is no dishonour in a man receiving pay who is called in to advise about building or any other art?

Cal. Yes, we have found the reason.

Soc. But when the point is, how a man may become best himself, and best govern his family and state, then to say that you will give no advice gratis is held to be dishonourable?

Cal. True.

Soc. And why? Because only such benefits call forth a desire to requite them, and there is evidence that a benefit has been conferred when the benefactor receives a return; otherwise not. Is this true?

Cal. It is.

Callicles advises Socrates to be the servant of the state, and not run the risk of popular enmity.

Soc. Then to which service of the State do you invite me? determine for me. Am I to be the physician of the 521
State who will strive and struggle to make the Athenians as good as possible; or am I to be the servant and flatterer of the State? Speak out, my good friend, freely and fairly as you did at first and ought to do again, and tell me your entire mind.

Cal. I say then that you should be the servant of the State.

Soc. The flatterer? well, sir, that is a noble invitation.

Cal. The Mysian, Socrates, or what you please. For if you refuse, the consequences will be —

Soc. Do not repeat the old story — that he who likes will kill me and get my money; for then I shall have to repeat the old answer, that he will be a bad man and will kill the good, and that the money will be of no use to him, but that

[1] Cp. Protag. 328.

he will wrongly use that which he wrongly took, and if wrongly, basely, and if basely, hurtfully. *Gorgias.* SOCRATES, CALLICLES.

Cal. How confident you are, Socrates, that you will never come to harm! you seem to think that you are living in another country, and can never be brought into a court of justice, as you very likely may be brought by some miserable and mean person.

Soc. Then I must indeed be a fool, Callicles, if I do not know that in the Athenian State any man may suffer anything. And if I am brought to trial and incur the dangers of which you speak, he will be a villain who brings me to trial — of that I am very sure, for no good man would accuse the innocent. Nor shall I be surprised if I am put to death. Shall I tell you why I anticipate this? Socrates has no fear of popular enmity, but is quite aware that he will incur it, because he is the only true politician of his time,

Cal. By all means.

Soc. I think that I am the only or almost the only Athenian living who practises the true art of politics; I am the only politician of my time. Now, seeing that when I speak my words are not uttered with any view of gaining favour, and that I look to what is best and not to what is most pleasant, having no mind to use those arts and graces which you recommend, I shall have nothing to say in the justice court. And you might argue with me, as I was arguing with Polus: — I shall be tried just as a physician would be tried in a court of little boys at the indictment of the cook. What would he reply under such circumstances, if some one were to accuse him, saying, 'O my boys, many evil things has this man done to you: he is the death of you, especially of the younger ones among you, cutting and
522 burning and starving and suffocating you, until you know not what to do; he gives you the bitterest potions, and compels you to hunger and thirst. How unlike the variety of meats and sweets on which I feasted you!' What do you suppose that the physician would be able to reply when he found himself in such a predicament? If he told the truth he could only say, 'All these evil things, my boys, I did for your health,' and then would there not just be a clamour among a jury like that? How they would cry out!

Cal. I dare say.

Soc. Would he not be utterly at a loss for a reply?

Gorgias.

Cal. He certainly would.

SOCRATES, CALLICLES.

Soc. And I too shall be treated in the same way, as I well know, if I am brought before the court. For I shall not be able to rehearse to the people the pleasures which I have procured for them, and which, although I am not disposed to envy either the procurers or enjoyers of them, are deemed by them to be benefits and advantages. And if any one says that I corrupt young men, and perplex their minds, or that I speak evil of old men, and use bitter words towards them, whether in private or public, it is useless for me to reply, as I truly might:—'All this I do for the sake of justice, and with a view to your interest, my judges, and to nothing else.' And therefore there is no saying what may happen to me.

and he has no defence against men such as his opponents:

Cal. And do you think, Socrates, that a man who is thus defenceless is in a good position?

Soc. Yes, Callicles, if he have that defence, which as you have often acknowledged he should have — if he be his own defence, and have never said or done anything wrong, either in respect of gods or men; and this has been repeatedly acknowledged by us to be the best sort of defence. And if any one could convict me of inability to defend myself or others after this sort, I should blush for shame, whether I was convicted before many, or before a few, or by myself alone; and if I died from want of ability to do so, that would indeed grieve me. But if I died because I have no powers of flattery or rhetoric, I am very sure that you would not find me repining at death. For no man who is not an utter fool and coward is afraid of death itself, but he is afraid of doing wrong. For to go to the world below having one's soul full of injustice is the last and worst of all evils. And in proof of what I say, if you have no objection, I should like to tell you a story.

that is to say, he has the defence of truth, but not such a defence as men ordinarily produce.

Cal. Very well, proceed; and then we shall have done.

Soc. Listen, then, as story-tellers say, to a very pretty tale, which I dare say that you may be disposed to regard as a fable only, but which, as I believe, is a true tale, for I mean to speak the truth. Homer tells us[1], how Zeus and Poseidon and Pluto divided the empire which they inherited from their father. Now in the days of Cronos there existed 523

The philosopher has no reason to dread death, as Socrates will prove by a relation of what

[1] Il. xv. 187. foll.

a law respecting the destiny of man, which has always been, and still continues to be in Heaven,— that he who has lived all his life in justice and holiness shall go, when he is dead, to the Islands of the Blessed, and dwell there in perfect happiness out of the reach of evil; but that he who has lived unjustly and impiously shall go to the house of vengeance and punishment, which is called Tartarus. And in the time of Cronos, and even quite lately in the reign of Zeus, the judgment was given on the very day on which the men were to die; the judges were alive, and the men were alive; and the consequence was that the judgments were not well given. Then Pluto and the authorities from the Islands of the Blessed came to Zeus, and said that the souls found their way to the wrong places. Zeus said: 'I shall put a stop to this; the judgments are not well given, because the persons who are judged have their clothes on, for they are alive; and there are many who, having evil souls, are apparelled in fair bodies, or encased in wealth or rank, and, when the day of judgment arrives, numerous witnesses come forward and testify on their behalf that they have lived righteously. The judges are awed by them, and they themselves too have their clothes on when judging; their eyes and ears and their whole bodies are interposed as a veil before their own souls. All this is a hindrance to them; there are the clothes of the judges and the clothes of the judged.— What is to be done? I will tell you:— In the first place, I will deprive men of the foreknowledge of death, which they possess at present: this power which they have Prometheus has already received my orders to take from them: in the second place, they shall be entirely stripped before they are judged, for they shall be judged when they are dead; and the judge too shall be naked, that is to say, dead — he with his naked soul shall pierce into the other naked souls; and they shall die suddenly and be deprived of all their kindred, and leave their brave attire strewn upon the earth — conducted in this manner, the judgment will be just. I knew all about the matter before any of you, and therefore I have made my sons judges; two from Asia, Minos and Rhadamanthus, and one from Europe,
524 Aeacus. And these, when they are dead, shall give judgment in the meadow at the parting of the ways, whence the

Gorgias.

SOCRATES.

happens in the world below.

Before the days of Zeus, the judgments of another world too much resembled the judgments of this.

Zeus takes measures for the correction and improvement of them.

Gorgias.

SOCRATES.

two roads lead, one to the Islands of the Blessed, and the other to Tartarus. Rhadamanthus shall judge those who come from Asia, and Aeacus those who come from Europe. And to Minos I shall give the primacy, and he shall hold a court of appeal, in case either of the two others are in any doubt:—then the judgment respecting the last journey of men will be as just as possible.'

As the body is, so is the soul after death; they both retain the traces of what they were in life,

From this tale, Callicles, which I have heard and believe, I draw the following inferences:—Death, if I am right, is in the first place the separation from one another of two things, soul and body; nothing else. And after they are separated they retain their several natures, as in life; the body keeps the same habit, and the results of treatment or accident are distinctly visible in it: for example, he who by nature or training or both, was a tall man while he was alive, will remain as he was, after he is dead; and the fat man will remain fat; and so on; and the dead man, who in life had a fancy to have flowing hair, will have flowing hair. And if he was marked with the whip and had the prints of the scourge, or of wounds in him when he was alive, you might see the same in the dead body; and if his limbs were broken or misshapen when he was alive, the same appearance would be visible in the dead. And in a word, whatever was the habit of the body during life would be distinguishable after death, either perfectly, or in a great measure and for a certain time. And I should imagine that this is equally true of the soul, Callicles; when a man is stripped of the body, all the natural or acquired affections of the soul are laid open to view.—

and they are punished accordingly.

And when they come to the judge, as those from Asia come to Rhadamanthus, he places them near him and inspects them quite impartially, not knowing whose the soul is: perhaps he may lay hands on the soul of the great king, or of some other king or potentate, who has no soundness in him, but his soul is marked with the whip, and is full of the prints and scars of perjuries and crimes with which each action has stained him, and he is all crooked with falsehood and im- 525
posture, and has no straightness, because he has lived without truth. Him Rhadamanthus beholds, full of all deformity and disproportion, which is caused by licence and luxury and insolence and incontinence, and despatches him igno-

Gorgias.

SOCRATES.

miniously to his prison, and there he undergoes the punishment which he deserves.

The proper office of punishment is either to improve or to deter.

Now the proper office of punishment is twofold: he who is rightly punished ought either to become better and profit by it, or he ought to be made an example to his fellows, that they may see what he suffers, and fear and become better. Those who are improved when they are punished by gods and men, are those whose sins are curable; and they are improved, as in this world so also in another, by pain and suffering; for there is no other way in which they can be delivered from their evil. But they who have been guilty of the worst crimes, and are incurable by reason of their crimes, are made examples; for, as they are incurable, the time has passed at which they can receive any benefit. They get no good themselves, but others get good when they behold them enduring for ever the most terrible and painful and fearful sufferings as the penalty of their sins — there they are, hanging up as examples, in the prison-house of the world below, a spectacle and a warning to all unrighteous men who come thither. And among them, as I confidently affirm, will be found Archelaus, if Polus truly reports of him, and any other tyrant who is like him. Of these fearful examples, most, as I believe, are taken from the class of tyrants and kings and potentates and public men, for they are the authors of the greatest and most impious crimes, because they have the power. And Homer witnesses to the truth of this; for they are always kings and potentates whom he has described as suffering everlasting punishment in the world below: such were Tantalus and Sisyphus and Tityus. But no one ever described Thersites, or any private person who was a villain, as suffering everlasting punishment, or as incurable. For to commit the worst crimes, as I am inclined to think, was not in his power, and he was happier than those who had the

The meaner sort of men are incapable of great crimes.

526 power. No, Callicles, the very bad men come from the class of those who have power [1]. And yet in that very class there may arise good men, and worthy of all admiration they are, for where there is great power to do wrong, to live and to die justly is a hard thing, and greatly to be praised, and few there are who attain to this. Such good and true men,

Great men have sometimes been good men; but power is apt to corrupt them.

[1] Cp. Rep. x. 615 E.

Gorgias.

SOCRATES. however, there have been, and will be again, at Athens and in other states, who have fulfilled their trust righteously; and there is one who is quite famous all over Hellas, Aristeides, the son of Lysimachus. But, in general, great men are also bad, my friend.

The impartiality of the judges in another world.

As I was saying, Rhadamanthus, when he gets a soul of the bad kind, knows nothing about him, neither who he is, nor who his parents are; he knows only that he has got hold of a villain; and seeing this, he stamps him as curable or incurable, and sends him away to Tartarus, whither he goes and receives his proper recompense. Or, again, he looks with admiration on the soul of some just one who has lived in holiness and truth; he may have been a private man or not; and I should say, Callicles, that he is most likely to have been a philosopher who has done his own work, and not troubled himself with the doings of other men in his lifetime; him Rhadamanthus sends to the Islands of the Blessed. Aeacus does the same; and they both have sceptres, and judge; but Minos alone has a golden sceptre and is seated looking on, as Odysseus in Homer[1] declares that he saw him:

'Holding a sceptre of gold, and giving laws to the dead.'

Now I, Callicles, am persuaded of the truth of these things, and I consider how I shall present my soul whole and undefiled before the judge in that day. Renouncing the honours at which the world aims, I desire only to know the truth, and to live as well as I can, and, when I die, to die as well as I can. And, to the utmost of my power, I exhort all other men to do the same. And, in return for your exhortation of me, I exhort you also to take part in the great combat, which is the combat of life, and greater than every other earthly conflict. And I retort your reproach of me, and say, that you will not be able to help yourself when the day of trial and judgment, of which I was speaking, comes upon you; you will go before the judge, the son of Aegina, and, when he has got you in his grip and is carrying you off, you 527
will gape and your head will swim round, just as mine would in the courts of this world, and very likely some one will

[1] Odyss. xi. 569.

shamefully box you on the ears, and put upon you any sort of insult. *Gorgias.* SOCRATES.

Perhaps this may appear to you to be only an old wife's tale, which you will contemn. And there might be reason in your contemning such tales, if by searching we could find out anything better or truer: but now you see that you and Polus and Gorgias, who are the three wisest of the Greeks of our day, are not able to show that we ought to live any life which does not profit in another world as well as in this. And of all that has been said, nothing remains unshaken but the saying, that to do injustice is more to be avoided than to suffer injustice, and that the reality and not the appearance of virtue is to be followed above all things, as well in public as in private life; and that when any one has been wrong in anything, he is to be chastised, and that the next best thing to a man being just is that he should become just, and be chastised and punished; also that he should avoid all flattery of himself as well as of others, of the few or of the many: and rhetoric and any other art should be used by him, and all his actions should be done always, with a view to justice.

Follow me then, and I will lead you where you will be happy in life and after death, as the argument shows. And never mind if some one despises you as a fool, and insults you, if he has a mind; let him strike you, by Zeus, and do you be of good cheer, and do not mind the insulting blow, for you will never come to any harm in the practice of virtue, if you are a really good and true man. When we have practised virtue together, we will apply ourselves to politics, if that seems desirable, or we will advise about whatever else may seem good to us, for we shall be better able to judge then. In our present condition we ought not to give ourselves airs, for even on the most important subjects we are always changing our minds; so utterly stupid are we! Let us, then, take the argument as our guide, which has revealed to us that the best way of life is to practise justice and every virtue in life and death. This way let us go; and in this exhort all men to follow, not in the way to which you trust and in which you exhort me to follow you; for that way, Callicles, is nothing worth.

APPENDIX I.

APPENDIX I.

IT seems impossible to separate by any exact line the genuine writings of Plato from the spurious. The only external evidence to them which is of much value is that of Aristotle; for the Alexandrian catalogues of a century later include manifest forgeries. Even the value of the Aristotelian authority is a good deal impaired by the uncertainty concerning the date and authorship of the writings which are ascribed to him. And several of the citations of Aristotle omit the name of Plato, and some of them omit the name of the dialogue from which they are taken. Prior, however, to the enquiry about the writings of a particular author, general considerations which equally affect all evidence to the genuineness of ancient writings are the following: Shorter works are more likely to have been forged, or to have received an erroneous designation, than longer ones; and some kinds of composition, such as epistles or panegyrical orations, are more liable to suspicion than others; those, again, which have a taste of sophistry in them, or the ring of a later age, or the slighter character of a rhetorical exercise, or in which a motive or some affinity to spurious writings can be detected, or which seem to have originated in a name or statement really occurring in some classical author, are also of doubtful credit; while there is no instance of any ancient writing proved to be a forgery, which combines excellence with length. A really great and original writer would have no object in fathering his works on Plato; and to the forger or imitator, the 'literary hack' of Alexandria and Athens, the Gods did not grant originality or genius. Further, in attempting to balance the evidence for and against a Platonic dialogue, we must not forget that the form of the Platonic writing was common to several of his contemporaries. Aeschines, Euclid,

APPENDIX I

Phaedo, Antisthenes, and in the next generation Aristotle, are all said to have composed dialogues; and mistakes of names are very likely to have occurred. Greek literature in the third century before Christ was almost as voluminous as our own, and without the safeguards of regular publication, or printing, or binding, or even of distinct titles. An unknown writing was naturally attributed to a known writer whose works bore the same character; and the name once appended easily obtained authority. A tendency may also be observed to blend the works and opinions of the master with those of his scholars. To a later Platonist, the difference between Plato and his imitators was not so perceptible as to ourselves. The Memorabilia of Xenophon and the Dialogues of Plato are but a part of a considerable Socratic literature which has passed away. And we must consider how we should regard the question of the genuineness of a particular writing, if this lost literature had been preserved to us.

These considerations lead us to adopt the following criteria of genuineness: (1) That is most certainly Plato's which Aristotle attributes to him by name, which (2) is of considerable length, of (3) great excellence, and also (4) in harmony with the general spirit of the Platonic writings. But the testimony of Aristotle cannot always be distinguished from that of a later age (see above); and has various degrees of importance. Those writings which he cites without mentioning Plato, under their own names, e. g. the Hippias, the Funeral Oration, the Phaedo, etc., have an inferior degree of evidence in their favour. They may have been supposed by him to be the writings of another, although in the case of really great works, e. g. the Phaedo, this is not credible; those again which are quoted but not named, are still more defective in their external credentials. There may be also a possibility that Aristotle was mistaken, or may have confused the master and his scholars in the case of a short writing; but this is inconceivable about a more important work, e. g. the Laws, especially when we remember that he was living at Athens, and a frequenter of the groves of the Academy, during the last twenty years of Plato's life. Nor must we forget that in all his numerous citations from the Platonic writings he never attributes any passage found in the extant dialogues to any one but Plato. And

lastly, we may remark that one or two great writings, such as the Parmenides and the Politicus, which are wholly devoid of Aristotelian (1) credentials may be fairly attributed to Plato, on the ground of (2) length, (3) excellence, and (4) accordance with the general spirit of his writings. Indeed the greater part of the evidence for the genuineness of ancient Greek authors may be summed up under two heads only: (1) excellence; and (2) uniformity of tradition — a kind of evidence, which though in many cases sufficient, is of inferior value.

Proceeding upon these principles we appear to arrive at the conclusion that nineteen-twentieths of all the writings which have ever been ascribed to Plato, are undoubtedly genuine. There is another portion of them, including the Epistles, the Epinomis, the dialogues rejected by the ancients themselves, namely, the Axiochus, De justo, De virtute, Demodocus, Sisyphus, Eryxias, which on grounds, both of internal and external evidence, we are able with equal certainty to reject. But there still remains a small portion of which we are unable to affirm either that they are genuine or spurious. They may have been written in youth, or possibly like the works of some painters, may be partly or wholly the compositions of pupils; or they may have been the writings of some contemporary transferred by accident to the more celebrated name of Plato, or of some Platonist in the next generation who aspired to imitate his master. Not that on grounds either of language or philosophy we should lightly reject them. Some difference of style, or inferiority of execution, or inconsistency of thought, can hardly be considered decisive of their spurious character. For who always does justice to himself, or who writes with equal care at all times? Certainly not Plato, who exhibits the greatest differences in dramatic power, in the formation of sentences, and in the use of words, if his earlier writings are compared with his later ones, say the Protagoras or Phaedrus with the Laws. Or who can be expected to think in the same manner during a period of authorship extending over above fifty years, in an age of great intellectual activity, as well as of political and literary transition? Certainly not Plato, whose earlier writings are separated from his later ones by as wide an interval of philosophical speculation as that which separates his later writings from Aristotle.

Appendix I.

The dialogues which have been translated in the first Appendix, and which appear to have the next claim to genuineness among the Platonic writings, are the Lesser Hippias, the Menexenus or Funeral Oration, the First Alcibiades. Of these, the Lesser Hippias and the Funeral Oration are cited by Aristotle; the first in the Metaphysics, iv. 29, 5, the latter in the Rhetoric, iii. 14, 11. Neither of them are expressly attributed to Plato, but in his citation of both of them he seems to be referring to passages in the extant dialogues. From the mention of 'Hippias' in the singular by Aristotle, we may perhaps infer that he was unacquainted with a second dialogue bearing the same name. Moreover, the mere existence of a Greater and Lesser Hippias, and of a First and Second Alcibiades, does to a certain extent throw a doubt upon both of them. Though a very clever and ingenious work, the Lesser Hippias does not appear to contain anything beyond the power of an imitator, who was also a careful student of the earlier Platonic writings, to invent. The motive or leading thought of the dialogue may be detected in Xen. Mem. iv. 2, 21, and there is no similar instance of a 'motive' which is taken from Xenophon in an undoubted dialogue of Plato. On the other hand, the upholders of the genuineness of the dialogue will find in the Hippias a true Socratic spirit; they will compare the Ion as being akin both in subject and treatment; they will urge the authority of Aristotle; and they will detect in the treatment of the Sophist, in the satirical reasoning upon Homer, in the *reductio ad absurdum* of the doctrine that vice is ignorance, traces of a Platonic authorship. In reference to the last point we are doubtful, as in some of the other dialogues, whether the author is asserting or overthrowing the paradox of Socrates, or merely following the argument 'whither the wind blows.' That no conclusion is arrived at is also in accordance with the character of the earlier dialogues. The resemblances or imitations of the Gorgias, Protagoras, and Euthydemus, which have been observed in the Hippias, cannot with certainty be adduced on either side of the argument. On the whole, more may be said in favour of the genuineness of the Hippias than against it.

The Menexenus or Funeral Oration is cited by Aristotle, and is interesting as supplying an example of the manner in which the orators praised 'the Athenians among the Athenians,' falsifying

persons and dates, and casting a veil over the gloomier events of Athenian history. It exhibits an acquaintance with the funeral oration of Thucydides, and was, perhaps, intended to rival that great work. If genuine, the proper place of the Menexenus would be at the end of the Phaedrus. The satirical opening and the concluding words bear a great resemblance to the earlier dialogues; the oration itself is professedly a mimetic work, like the speeches in the Phaedrus, and cannot therefore be tested by a comparison of the other writings of Plato. The funeral oration of Pericles is expressly mentioned in the Phaedrus, and this may have suggested the subject, in the same manner that the Cleitophon appears to be suggested by the slight mention of Cleitophon and his attachment to Thrasymachus in the Republic, cp. 465 A; and the Theages by the mention of Theages in the Apology and Republic; or as the Second Alcibiades seems to be founded upon the text of Xenophon, Mem. i. 3, 1. A similar taste for parody appears not only in the Phaedrus, but in the Protagoras, in the Symposium, and to a certain extent in the Parmenides.

To these two doubtful writings of Plato I have added the First Alcibiades, which, of all the disputed dialogues of Plato, has the greatest merit, and is somewhat longer than any other of them, though not verified by the testimony of Aristotle, and in many respects at variance with the Symposium in the description of the relations of Socrates and Alcibiades. Like the Lesser Hippias and the Menexenus, it is to be compared to the earlier writings of Plato. The motive of the piece may, perhaps, be found in that passage of the Symposium in which Alcibiades describes himself as self-convicted by the words of Socrates (216 B, C). For the disparaging manner in which Schleiermacher has spoken of this dialogue there seems to be no sufficient foundation. At the same time, the lesson imparted is simple, and the irony more transparent than in the undoubted dialogues of Plato. We know, too, that Alcibiades was a favourite thesis, and that at least five or six dialogues bearing this name passed current in antiquity, and are attributed to contemporaries of Socrates and Plato. (1) In the entire absence of real external evidence (for the catalogues of the Alexandrian librarians cannot be regarded as trustworthy); and (2) in the absence of the highest marks either of poetical or philosophical excellence; and (3) considering that we have express

Appendix I.

testimony to the existence of contemporary writings bearing the name of Alcibiades, we are compelled to suspend our judgment on the genuineness of the extant dialogue.

Neither at this point, nor at any other, do we propose to draw an absolute line of demarcation between genuine and spurious writings of Plato. They fade off imperceptibly from one class to another. There may have been degrees of genuineness in the dialogues themselves, as there are certainly degrees of evidence by which they are supported. The traditions of the oral discourses both of Socrates and Plato may have formed the basis of semi-Platonic writings; some of them may be of the same mixed character which is apparent in Aristotle and Hippocrates, although the form of them is different. But the writings of Plato, unlike the writings of Aristotle, seem never to have been confused with the writings of his disciples: this was probably due to their definite form, and to their inimitable excellence. The three dialogues which we have offered in the Appendix to the criticism of the reader may be partly spurious and partly genuine; they may be altogether spurious;— that is an alternative which must be frankly admitted. Nor can we maintain of some other dialogues, such as the Parmenides, and the Sophist, and Politicus, that no considerable objection can be urged against them, though greatly overbalanced by the weight (chiefly) of internal evidence in their favour. Nor, on the other hand, can we exclude a bare possibility that some dialogues which are usually rejected, such as the Greater Hippias and the Cleitophon, may be genuine. The nature and object of these semi-Platonic writings require more careful study and more comparison of them with one another, and with forged writings in general, than they have yet received, before we can finally decide on their character. We do not consider them all as genuine until they can be proved to be spurious, as is often maintained and still more often implied in this and similar discussions; but should say of some of them, that their genuineness is neither proven nor disproven until further evidence about them can be adduced. And we are as confident that the Epistles are spurious, as that the Republic, the Timaeus, and the Laws are genuine.

On the whole, not a twentieth part of the writings which pass under the name of Plato, if we exclude the works rejected by the

ancients themselves and two or three other plausible inventions, can be fairly doubted by those who are willing to allow that a considerable change and growth may have taken place in his philosophy (see above). That twentieth debatable portion scarcely in any degree affects our judgment of Plato, either as a thinker or a writer, and though suggesting some interesting questions to the scholar and critic, is of little importance to the general reader.

LESSER HIPPIAS.

INTRODUCTION.

Lesser Hippias.

THE Lesser Hippias may be compared with the earlier dialogues of Plato, in which the contrast of Socrates and the Sophists is most strongly exhibited. Hippias, like Protagoras and Gorgias, though civil, is vain and boastful: he knows all things; he can make anything, including his own clothes; he is a manufacturer of poems and declamations, and also of seal-rings, shoes, strigils; his girdle, which he has woven himself, is of a finer than Persian quality. He is a vainer, lighter nature than the two great Sophists (cp. Protag. 314, 337), but of the same character with them, and equally impatient of the short cut-and-thrust method of Socrates, whom he endeavours to draw into a long oration. At last, he gets tired of being defeated at every point by Socrates, and is with difficulty induced to proceed (compare Thrasymachus, Protagoras, Callicles, and others, to whom the same reluctance is ascribed).

INTRODUCTION.

ANALYSIS.

Steph. Hippias like Protagoras has common sense on his side, when
–363 he argues, citing passages of the Iliad in support of his view, that Homer intended Achilles to be the bravest, Odysseus the wisest of the Greeks. But he is easily overthrown by the superior dialectics of Socrates, who pretends to show that Achilles is not
369 true to his word, and that no similar inconsistency is to be found in Odysseus. Hippias replies that Achilles unintentionally, but
370 Odysseus intentionally, speaks falsehood. But is it better to do wrong intentionally or unintentionally? Socrates, relying on the analogy of the arts, maintains the former, Hippias the latter of the
–372 two alternatives. . . . All this is quite conceived in the spirit of Plato, who is very far from making Socrates always argue on the side of truth. The over-reasoning on Homer, which is of course satirical, is also in the spirit of Plato. Poetry turned logic is even more

Lesser Hippias.

ANALYSIS.

ridiculous than 'rhetoric turned logic,' and equally fallacious. There were reasoners in ancient as well as in modern times, who could never receive the natural impression of Homer, or of any other book which they read. The argument of Socrates, in which he picks out the apparent inconsistencies and discrepancies in the speech and actions of Achilles, and the final paradox, 'that he who is true is also false,' reminds us of the interpretation by Socrates of Simonides in the Protagoras, and of similar reasonings in the first book of the Republic. The discrepancies which Socrates discovers in the words of Achilles are perhaps as great as those discovered by some of the modern separatists of the-376 Homeric poems. . . . .

At last, Socrates having caught Hippias in the toils of the voluntary and involuntary, is obliged to confess that he is wandering about in the same labyrinth; he makes the reflection on himself which others would make upon him (cp. Protagoras, sub fin.). He does not wonder that he should be in a difficulty, but he wonders at Hippias, and he becomes sensible of the gravity of the situation, when ordinary men like himself can no longer go to the wise and be taught by them.

INTRODUCTION.

It may be remarked as bearing on the genuineness of this dialogue: (1) that the manners of the speakers are less subtle and refined than in the other dialogues of Plato; (2) that the sophistry of Socrates is more palpable and unblushing, and also more unmeaning; (3) that many turns of thought and style are found in it which appear also in the other dialogues:—whether resemblances of this kind tell in favour of or against the genuineness of an ancient writing, is an important question which will have to be answered differently in different cases. For that a writer may repeat himself is as true as that a forger may imitate; and Plato elsewhere, either of set purpose or from forgetfulness, is full of repetitions. The parallelisms of the Lesser Hippias, as already remarked, are not of the kind which necessarily imply that the dialogue is the work of a forger. The parallelisms of the Greater Hippias with the other dialogues, and the allusion to the Lesser 285, 286 A, B (where Hippias sketches the programme of his next lecture, and invites Socrates to attend and bring any friends with him who may be competent judges), are more than suspicious:—

they are of a very poor sort, such as we cannot suppose to have been due to Plato himself. The Greater Hippias more resembles the Euthydemus than any other dialogue; but is immeasurably inferior to it. The Lesser Hippias seems to have more merit than the Greater, and to be more Platonic in spirit. The character of Hippias is the same in both dialogues, but his vanity and boasting are even more exaggerated in the Greater Hippias. His art of memory is specially mentioned in both. He is an inferior type of the same species as Hippodamus of Miletus (Arist. Pol. II. 8, § 1). Some passages in which the Lesser Hippias may be advantageously compared with the undoubtedly genuine dialogues of Plato are the following: — Less. Hipp. 369 B: cp. Rep. vi. 487 (Socrates' cunning in argument): || ib. D, E: cp. Laches 188 (Socrates' feeling about arguments): || 372 B, C: cp. Rep. i. 338 B (Socrates not unthankful): || 373 B: cp. Rep. i. 340 D (Socrates dishonest in argument).

The Lesser Hippias, though inferior to the other dialogues, may be reasonably believed to have been written by Plato, on the ground (1) of considerable excellence; (2) of uniform tradition beginning with Aristotle and his school. That the dialogue falls below the standard of Plato's other works, or that he has attributed to Socrates an unmeaning paradox (perhaps with the view of showing that he could beat the Sophists at their own weapons; or that he could 'make the worse appear the better cause'; or merely as a dialectical experiment) — are not sufficient reasons for doubting the genuineness of the work.

LESSER HIPPIAS.

PERSONS OF THE DIALOGUE.

EUDICUS, SOCRATES, HIPPIAS.

Lesser Hippias.

SOCRATES, EUDICUS, HIPPIAS.

Steph. 363 *Eudicus.* WHY are you silent, Socrates, after the magnificent display which Hippias has been making? Why do you not either refute his words, if he seems to you to have been wrong in any point, or join with us in commending him? There is the more reason why you should speak, because we are now alone, and the audience is confined to those who may fairly claim to take part in a philosophical discussion.

The Iliad of Homer a finer work than the Odyssey, because Achilles, the hero of the poem, is greater than Odysseus.

Socrates. I should greatly like, Eudicus, to ask Hippias the meaning of what he was saying just now about Homer. I have heard your father, Apemantus, declare that the Iliad of Homer is a finer poem than the Odyssey in the same degree that Achilles was a better man than Odysseus; Odysseus, he would say, is the central figure of the one poem and Achilles of the other. Now, I should like to know, if Hippias has no objection to tell me, what he thinks about these two heroes, and which of them he maintains to be the better; he has already told us in the course of his exhibition many things of various kinds about Homer and divers other poets.

Eud. I am sure that Hippias will be delighted to answer anything which you would like to ask; tell me, Hippias, if Socrates asks you a question, will you answer him?

Hippias. Indeed, Eudicus, I should be strangely inconsistent if I refused to answer Socrates, when at each Olympic festival, as I went up from my house at Elis to the temple of

Lesser Hippias.

SOCRATES, HIPPIAS.

Olympia, where all the Hellenes were assembled, I continually professed my willingness to perform any of the exhibitions which I had prepared, and to answer any questions which any one had to ask.

Soc. Truly, Hippias, you are to be congratulated, if at 364
every Olympic festival you have such an encouraging opinion of your own wisdom when you go up to the temple. I doubt whether any muscular hero would be so fearless and confident in offering his body to the combat at Olympia, as you are in offering your mind.

Hip. And with good reason, Socrates; for since the day when I first entered the lists at Olympia I have never found any man who was my superior in anything[1].

Soc. What an ornament, Hippias, will the reputation of your wisdom be to the city of Elis and to your parents! But to return: what say you of Odysseus and Achilles? Which is the better of the two? and in what particular does either surpass the other? For when you were exhibiting and there was company in the room, though I could not follow you, I did not like to ask what you meant, because a crowd of people were present, and I was afraid that the question might interrupt your exhibition. But now that there are not so many of us, and my friend Eudicus bids me ask, I wish you would tell me what you were saying about these two heroes, so that I may clearly understand; how did you distinguish them?

Achilles the bravest, Nestor the wisest, and Odysseus the wiliest of the Greeks at Troy.

Hip. I shall have much pleasure, Socrates, in explaining to you more clearly than I could in public my views about these and also about other heroes. I say that Homer intended Achilles to be the bravest of the men who went to Troy, Nestor the wisest, and Odysseus the wiliest.

Soc. O rare Hippias, will you be so good as not to laugh, if I find a difficulty in following you, and repeat my questions several times over? Please to answer me kindly and gently.

Hip. I should be greatly ashamed of myself, Socrates, if I, who teach others and take money of them, could not, when I was asked by you, answer in a civil and agreeable manner.

[1] Cp. Gorgias 448 A.

Lesser Hippias.

SOCRATES, HIPPIAS.

Soc. Thank you: the fact is, that I seemed to understand what you meant when you said that the poet intended Achilles to be the bravest of men, and also that he intended Nestor to be the wisest; but when you said that he meant Odysseus to be the wiliest, I must confess that I could not understand what you were saying. Will you tell me, and then I shall perhaps understand you better; has not Homer made Achilles wily?

Hip. Certainly not, Socrates; he is the most straightforward of mankind, and when Homer introduces them talking with one another in the passage called the Prayers, Achilles is supposed by the poet to say to Odysseus:—

365 'Son of Laertes, sprung from heaven, crafty Odysseus, I will speak out plainly the word which I intend to carry out in act, and which will, I believe, be accomplished. For I hate him like the gates of death who thinks one thing and says another. But I will speak that which shall be accomplished.'

Now, in these verses he clearly indicates the character of the two men; he shows Achilles to be true and simple, and Odysseus to be wily and false; for he supposes Achilles to be addressing Odysseus in these lines.

Wily means false:

Soc. Now, Hippias, I think that I understand your meaning; when you say that Odysseus is wily, you clearly mean that he is false?

Hip. Exactly so, Socrates; it is the character of Odysseus, as he is represented by Homer in many passages both of the Iliad and Odyssey.

Soc. And Homer must be presumed to have meant that the true man is not the same as the false?

Hip. Of course, Socrates.

Soc. And is that your own opinion, Hippias?

Hip. Certainly; how can I have any other?

Soc. Well, then, as there is no possibility of asking Homer what he meant in these verses of his, let us leave him; but as you show a willingness to take up his cause, and your opinion agrees with what you declare to be his, will you answer on behalf of yourself and him?

Hip. I will; ask shortly anything which you like.

Soc. Do you say that the false, like the sick, have no power to do things, or that they have the power to do things?

Lesser Hippias.

SOCRATES, HIPPIAS.

And the false have the power of deceiving mankind; they are prudent and knowing and wise, and have the ability to speak falsely.

Hip. I should say that they have power to do many things, and in particular to deceive mankind.

Soc. Then, according to you, they are both powerful and wily, are they not?

Hip. Yes.

Soc. And are they wily, and do they deceive by reason of their simplicity and folly, or by reason of their cunning and a certain sort of prudence?

Hip. By reason of their cunning and prudence, most certainly.

Soc. Then they are prudent, I suppose?

Hip. So they are — very.

Soc. And if they are prudent, do they know or do they not know what they do?

Hip. Of course, they know very well; and that is why they do mischief to others.

Soc. And having this knowledge, are they ignorant, or are they wise?

Hip. Wise, certainly; at least, in so far as they can deceive.

Soc. Stop, and let us recall to mind what you are saying; 366
are you not saying that the false are powerful and prudent and knowing and wise in those things about which they are false?

Hip. To be sure.

Soc. And the true differ from the false — the true and the false are the very opposite of each other?

Hip. That is my view.

Soc. Then, according to your view, it would seem that the false are to be ranked in the class of the powerful and wise?

Hip. Assuredly.

Soc. And when you say that the false are powerful and wise in so far as they are false, do you mean that they have or have not the power of uttering their falsehoods if they like?

Hip. I mean to say that they have the power.

Soc. In a word, then, the false are they who are wise and have the power to speak falsely?

Hip. Yes.

Soc. Then a man who has not the power of speaking falsely and is ignorant cannot be false?

Hip. You are right.

Soc. And every man has power who does that which he wishes at the time when he wishes. I am not speaking of any special case in which he is prevented by disease or something of that sort, but I am speaking generally, as I might say of you, that you are able to write my name when you like. Would you not call a man able who could do that?

Hip. Yes.

Soc. And tell me, Hippias, are you not a skilful calculator and arithmetician?

Hip. Yes, Socrates, assuredly I am.

Soc. And if some one were to ask you what is the sum of 3 multiplied by 700, you would tell him the true answer in a moment, if you pleased?

Hip. Certainly I should.

Soc. Is not that because you are the wisest and ablest of men in these matters?

Hip. Yes.

Soc. And being as you are the wisest and ablest of men in these matters of calculation, are you not also the best?

Hip. To be sure, Socrates, I am the best.

Soc. And therefore you would be the most able to tell the truth about these matters, would you not?

Hip. Yes, I should.

They must truly know that about which they falsely speak or they will fall into the error of speaking the truth by mistake.

Soc. And could you speak falsehoods about them equally well? I must beg, Hippias, that you will answer me with the same frankness and magnanimity which has hitherto characterized you. If a person were to ask you what is the sum of 3 multiplied by 700, would not you be the best and most consistent teller of a falsehood, having always the power of speaking falsely as you have of speaking truly, about these same matters, if you wanted to tell a falsehood,
367 and not to answer truly? Would the ignorant man be better able to tell a falsehood in matters of calculation than you would be, if you chose? Might he not sometimes stumble upon the truth, when he wanted to tell a lie, because he did not know, whereas you who are the wise man, if you wanted to tell a lie would always and consistently lie?

SOCRATES, HIPPIAS.

Hip. Yes; there you are quite right.

Soc. Does the false man tell lies about other things, but not about number, or when he is making a calculation?

Hip. To be sure; he would tell as many lies about number as about other things.

Soc. Then may we further assume, Hippias, that there are men who are false about calculation and number?

Hip. Yes.

Soc. Who can they be? For you have already admitted that he who is false must have the ability to be false: you said, as you will remember, that he who is unable to be false will not be false?

Hip. Yes, I remember; it was so said.

Soc. And were you not yourself just now shown to be best able to speak falsely about calculation?

Hip. Yes; that was another thing which was said.

Soc. And are you not likewise said to speak truly about calculation?

Hip. Certainly.

Soc. Then the same person is able to speak both falsely and truly about calculation? And that person is he who is good at calculation — the arithmetician?

Hip. Yes.

Soc. Who, then, Hippias, is discovered to be false at calculation? Is he not the good man? For the good man is the able man, and he is the true man.

Hip. That is evident.

Therefore the same man must be true if he is to be truly false, in astronomy, in geometry, and in all the sciences.

Soc. Do you not see, then, that the same man is false and also true about the same matters? And the true man is not a whit better than the false; for indeed he is the same with him and not the very opposite, as you were just now imagining.

Hip. Not in that instance, clearly.

Soc. Shall we examine other instances?

Hip. Certainly, if you are disposed.

Soc. Are you not also skilled in geometry?

Hip. I am.

Soc. Well, and does not the same hold in that science also? Is not the same person best able to speak falsely or to speak truly about diagrams; and he is — the geometrician?

Hip. Yes.

Soc. He and no one else is good at it?

Hip. Yes, he and no one else.

Soc. Then the good and wise geometer has this double power in the highest degree; and if there be a man who is false about diagrams the good man will be he, for he is able to be false; whereas the bad is unable, and for this reason is not false, as has been admitted.

Hip. True.

Soc. Once more — let us examine a third case; that of the astronomer, in whose art, again, you, Hippias, profess to be a still greater proficient than in the preceding — do you not?

368 *Hip.* Yes, I am.

Soc. And does not the same hold of astronomy?

Hip. True, Socrates.

Soc. And in astronomy, too, if any man be able to speak falsely he will be the good astronomer, but he who is not able will not speak falsely, for he has no knowledge.

Hip. Clearly not.

Soc. Then in astronomy also, the same man will be true and false?

Hip. It would seem so.

Socrates compliments Hippias on his skill in engraving gems, in making clothes and shoes and the finest fabrics, in writing poetry and prose of the most varied kind, and on the art of memory which he has invented.

Soc. And now, Hippias, consider the question at large about all the sciences, and see whether the same principle does not always hold. I know that in most arts you are the wisest of men, as I have heard you boasting in the agora at the tables of the money-changers, when you were setting forth the great and enviable stores of your wisdom; and you said that upon one occasion, when you went to the Olympic games, all that you had on your person was made by yourself. You began with your ring, which was of your own workmanship, and you said that you could engrave rings; and you had another seal which was also of your own workmanship, and a strigil and an oil flask, which you had made yourself; you said also that you had made the shoes which you had on your feet, and the cloak and the short tunic; but what appeared to us all most extraordinary and a proof of singular art, was the girdle of your tunic, which, you said, was as fine as the most costly Persian fabric, and of your own weaving; moreover, you told us that you had brought

Lesser Hippias.

SOCRATES, HIPPIAS.

with you poems, epic, tragic, and dithyrambic, as well as prose writings of the most various kinds; and you said that your skill was also pre-eminent in the arts which I was just now mentioning, and in the true principles of rhythm and harmony and of orthography; and if I remember rightly, there were a great many other accomplishments in which you excelled. I have forgotten to mention your art of memory, which you regard as your special glory, and I dare say that I have forgotten many other things; but, as I was saying, only look to your own arts — and there are plenty of them — and to those of others; and tell me, having regard to the admissions which you and I have made, whether you discover any department of art or any description of wisdom or cunning, whichever name you use, in which the true and false are different and not the same: tell me, if you can, of any. But 369
you cannot.

Hip. Not without consideration, Socrates.

Soc. Nor will consideration help you, Hippias, as I believe; but then if I am right, remember what the consequence will be.

Yet he who knows and remembers all things can call to mind no instance in which the false is not also true, although he was saying just now that Achilles is true and Odysseus false.

Hip. I do not know what you mean, Socrates.

Soc. I suppose that you are not using your art of memory, doubtless because you think that such an accomplishment is not needed on the present occasion. I will therefore remind you of what you were saying: were you not saying that Achilles was a true man, and Odysseus false and wily?

Hip. I was.

Soc. And now do you perceive that the same person has turned out to be false as well as true? If Odysseus is false he is also true, and if Achilles is true he is also false, and so the two men are not opposed to one another, but they are alike.

Hip. O Socrates, you are always weaving the meshes of an argument, selecting the most difficult point, and fastening upon details instead of grappling with the matter in hand as a whole. Come now, and I will demonstrate to you, if you will allow me, by many satisfactory proofs, that Homer has made Achilles a better man than Odysseus, and a truthful man too; and that he has made the other crafty, and a teller of many untruths, and inferior to Achilles. And then, if you please,

SOCRATES, HIPPIAS.

you shall make a speech on the other side, in order to prove that Odysseus is the better man; and this may be compared to mine, and then the company will know which of us is the better speaker.

Soc. O Hippias, I do not doubt that you are wiser than I am. But I have a way, when anybody else says anything, of giving close attention to him, especially if the speaker appears to me to be a wise man. Having a desire to understand, I question him, and I examine and analyse and put together what he says, in order that I may understand; but if the speaker appears to me to be a poor hand, I do not interrogate him, or trouble myself about him, and you may know by this who they are whom I deem to be wise men, for you will see that when I am talking with a wise man, I am very attentive to what he says; and I ask questions of him, in order that I may learn, and be improved by him. And I could not help remarking while you were speaking, that when you recited the verses in which Achilles, as you argued, attacks Odysseus as a deceiver, that you must be strangely mistaken, because Odysseus, the man of wiles, is never found to tell a lie; but
370 Achilles is found to be wily on your own showing. At any rate he speaks falsely; for first he utters these words, which you just now repeated,—

Socrates pays Hippias the compliment which he always pays to a wise man, of attending to him. He proves by example that Achilles, the true man, is always uttering falsehoods, Odysseus, the false man, never.

'He is hateful to me even as the gates of death who thinks one thing and says another:'—

And then he says, a little while afterwards, he will not be persuaded by Odysseus and Agamemnon, neither will he remain at Troy; but, says he,—

'To-morrow, when I have offered sacrifices to Zeus and all the Gods, having loaded my ships well, I will drag them down into the deep; and then you shall see, if you have a mind, and if such things are a care to you, early in the morning my ships sailing over the fishy Hellespont, and my men eagerly plying the oar; and, if the illustrious shaker of the earth gives me a good voyage, on the third day I shall reach the fertile Phthia.'

And before that, when he was reviling Agamemnon, he said,—

'And now to Phthia I will go, since to return home in the beaked ships is far better, nor am I inclined to stay here in dishonour and amass wealth and riches for you.'

Lesser Hippias.

SOCRATES, HIPPIAS.

But although on that occasion, in the presence of the whole army, he spoke after this fashion, and on the other occasion to his companions, he appears never to have made any preparation or attempt to draw down the ships, as if he had the least intention of sailing home; so nobly regardless was he of the truth. Now I, Hippias, originally asked you the question, because I was in doubt as to which of the two heroes was intended by the poet to be the best, and because I thought that both of them were the best, and that it would be difficult to decide which was the better of them, not only in respect of truth and falsehood, but of virtue generally, for even in this matter of speaking the truth they are much upon a par.

Aye, but the falsehood of Achilles is accidental; that of Odysseus intentional.

Hip. There you are wrong, Socrates; for in so far as Achilles speaks falsely, the falsehood is obviously unintentional. He is compelled against his will to remain and rescue the army in their misfortune. But when Odysseus speaks falsely he is voluntarily and intentionally false.

Soc. You, sweet Hippias, like Odysseus, are a deceiver yourself.

Hip. Certainly not, Socrates; what makes you say so? 371

Soc. Because you say that Achilles does not speak falsely from design, when he is not only a deceiver, but besides being a braggart, in Homer's description of him is so cunning, and so far superior to Odysseus in lying and pretending, that he dares to contradict himself, and Odysseus does not find him out; at any rate he does not appear to say anything to him which would imply that he perceived his falsehood.

Hip. What do you mean, Socrates?

Soc. Did you not observe that afterwards, when he is speaking to Odysseus, he says that he will sail away with the early dawn; but to Ajax he tells quite a different story?

Hip. Where is that?

Soc. Where he says,—

> 'I will not think about bloody war until the son of warlike Priam, illustrious Hector, comes to the tents and ships of the Myrmidons, slaughtering the Argives, and burning the ships with fire; and about my tent and dark ship, I suspect that Hector, although eager for the battle, will nevertheless stay his hand.'

Now, do you really think, Hippias, that the son of Thetis,

who had been the pupil of the sage Cheiron, had such a bad memory, or would have carried the art of lying to such an extent (when he had been assailing liars in the most violent terms only the instant before) as to say to Odysseus that he would sail away, and to Ajax that he would remain, and that he was not rather practising upon the simplicity of Odysseus, whom he regarded as an ancient, and thinking that he would get the better of him by his own cunning and falsehood?

Hip. No, I do not agree with you, Socrates; but I believe that Achilles is induced to say one thing to Ajax, and another to Odysseus in the innocence of his heart, whereas Odysseus, whether he speaks falsely or truly, speaks always with a purpose.

That proves Odysseus to be better than Achilles.

Soc. Then Odysseus would appear after all to be better than Achilles?

Hip. Certainly not, Socrates.

Soc. Why, were not the voluntary liars only just now shown to be better than the involuntary?

Hip. And how, Socrates, can those who intentionally err, and voluntarily and designedly commit iniquities, be better
372 than those who err and do wrong involuntarily? Surely there is a great excuse to be made for a man telling a falsehood, or doing an injury or any sort of harm to another in ignorance. And the laws are obviously far more severe on those who lie or do evil, voluntarily, than on those who do evil involuntarily.

Socrates is convinced of his own ignorance because he never agrees with wise men. But he is willing to learn,

Soc. You see, Hippias, as I have already told you, how pertinacious I am in asking questions of wise men. And I think that this is the only good point about me, for I am full of defects, and always getting wrong in some way or other. My deficiency is proved to me by the fact that when I meet one of you who are famous for wisdom, and to whose wisdom all the Hellenes are witnesses, I am found out to know nothing. For speaking generally, I hardly ever have the same opinion about anything which you have, and what proof of ignorance can be greater than to differ from wise men? But I have one singular good quality, which is my salvation; I am not ashamed to learn, and I ask and enquire, and am very grateful to those who answer me, and never fail to give them my grateful thanks; and when I learn a thing I

Lesser Hippias.

SOCRATES, HIPPIAS, EUDICUS.

never deny my teacher, or pretend that the lesson is a discovery of my own; but I praise his wisdom, and proclaim what I have learned from him. And now I cannot agree in what you are saying, but I strongly disagree. Well, I know that this is my own fault, and is a defect in my character, but I will not pretend to be more than I am; and my opinion, Hippias, is the very contrary of what you are saying. For I maintain that those who hurt or injure mankind, and speak falsely and deceive, and err voluntarily, are better far than those who do wrong involuntarily. Sometimes, however, I am of the opposite opinion; for I am all abroad in my ideas about this matter, a condition obviously occasioned by ignorance. And just now I happen to be in a crisis of my disorder at which those who err voluntarily appear to me better than those who err involuntarily. My present state of mind is due to our previous argument, which inclines me to believe that in general those who do wrong involuntarily are worse than those who do wrong voluntarily, and therefore I hope that you will be good to me, and not refuse to heal me; for you will do me a much greater benefit if you cure my soul of ignorance, than you would if you were to cure my body of disease. I must, however, tell you beforehand, that if you 373 make a long oration to me you will not cure me, for I shall not be able to follow you; but if you will answer me, as you did just now, you will do me a great deal of good, and I do not think that you will be any the worse yourself. And I have some claim upon you also, O son of Apemantus, for you incited me to converse with Hippias; and now, if Hippias will not answer me, you must entreat him on my behalf.

and he desires to be cured by Hippias of his ignorance in as few words as possible.

Eud. But I do not think, Socrates, that Hippias will require any entreaty of mine; for he has already said that he will refuse to answer no man.— Did you not say so, Hippias?

Hip. Yes, I did; but then, Eudicus, Socrates is always troublesome in an argument, and appears to be dishonest[1].

Soc. Excellent Hippias, I do not do so intentionally (if I did, it would show me to be a wise man and a master of wiles, as you would argue), but unintentionally, and therefore you must pardon me; for, as you say, he who is unintentionally dishonest should be pardoned.

[1] Cp. Gorgias 499, 505; Rep. vi. 487.

Eud. Yes, Hippias, do as he says; and for our sake, and also that you may not belie your profession, answer whatever Socrates asks you.

Hip. I will answer, as you request me; and do you ask whatever you like.

Soc. I am very desirous, Hippias, of examining this question, as to which are the better — those who err voluntarily or involuntarily? And if you will answer me, I think that I can put you in the way of approaching the subject: You would admit, would you not, that there are good runners?

Hip. Yes.

Socrates by citation of instances not 'in pari materia' proves that it is better to do evil intentionally;

Soc. And there are bad runners?

Hip. Yes.

Soc. And he who runs well is a good runner, and he who runs ill is a bad runner?

Hip. Very true.

Soc. And he who runs slowly runs ill, and he who runs quickly runs well?

Hip. Yes.

e. g. in running,

Soc. Then in a race, and in running, swiftness is a good, and slowness is an evil quality?

Hip. To be sure.

Soc. Which of the two then is a better runner? He who runs slowly voluntarily, or he who runs slowly involuntarily?

Hip. He who runs slowly voluntarily.

Soc. And is not running a species of doing?

Hip. Certainly.

Soc. And if a species of doing, a species of action?

Hip. Yes.

Soc. Then he who runs badly does a bad and dishonourable action in a race?

Hip. Yes; a bad action, certainly.

Soc. And he who runs slowly runs badly?

Hip. Yes.

Soc. Then the good runner does this bad and disgraceful action voluntarily, and the bad involuntarily?

Hip. That is to be inferred.

Soc. Then he who involuntarily does evil actions, is worse in a race than he who does them voluntarily?

Hip. Yes, in a race.

Lesser Hippias.

SOCRATES, HIPPIAS.

Soc. Well; but at a wrestling match — which is the better wrestler, he who falls voluntarily or involuntarily? 374

Hip. He who falls voluntarily, doubtless.

in wrestling,

Soc. And is it worse or more dishonourable at a wrestling match, to fall, or to throw another?

Hip. To fall.

Soc. Then, at a wrestling match, he who voluntarily does base and dishonourable actions is a better wrestler than he who does them involuntarily?

Hip. That appears to be the truth.

Soc. And what would you say of any other bodily exercise — is not he who is better made able to do both that which is strong and that which is weak — that which is fair and that which is foul? — so that when he does bad actions with the body, he who is better made does them voluntarily, and he who is worse made does them involuntarily.

Hip. Yes, that appears to be true about strength.

in the action of the body,

Soc. And what do you say about grace, Hippias? Is not he who is better made able to assume evil and disgraceful figures and postures voluntarily, as he who is worse made assumes them involuntarily?

Hip. True.

Soc. Then voluntary ungracefulness comes from excellence of the bodily frame, and involuntary from the defect of the bodily frame?

Hip. True.

in singing,

Soc. And what would you say of an unmusical voice; would you prefer the voice which is voluntarily or involuntarily out of tune?

Hip. That which is voluntarily out of tune.

Soc. The involuntary is the worse of the two?

Hip. Yes.

Soc. And would you choose to possess goods or evils?

Hip. Goods.

in the use of the feet,

Soc. And would you rather have feet which are voluntarily or involuntarily lame?

Hip. Feet which are voluntarily lame.

Soc. But is not lameness a defect or deformity?

Hip. Yes.

Soc. And is not blinking a defect in the eyes?

Hip. Yes.

Soc. And would you rather always have eyes with which you might voluntarily blink and not see, or with which you might involuntarily blink? SOCRATES, HIPPIAS.

Hip. I would rather have eyes which voluntarily blink. eyes,

Soc. Then in your own case you deem that which voluntarily acts ill, better than that which involuntarily acts ill?

Hip. Yes, certainly, in cases such as you mention.

Soc. And does not the same hold of ears, nostrils, mouth, and of all the senses — those which involuntarily act ill are not to be desired, as being defective; and those which voluntarily act ill are to be desired as being good? ears,

Hip. I agree.

Soc. And what would you say of instruments; — which are the better sort of instruments to have to do with? — those with which a man acts ill voluntarily or involuntarily? For example, had a man better have a rudder with which he will steer ill, voluntarily or involuntarily? of instruments.

Hip. He had better have a rudder with which he will steer ill voluntarily.

Soc. And does not the same hold of the bow and the lyre, the flute and all other things?

Hip. Very true.

Soc. And would you rather have a horse of such a temper that you may ride him ill voluntarily or involuntarily?

375 *Hip.* I would rather have a horse which I could ride ill voluntarily. It is true also of animals,

Soc. That would be the better horse?

Hip. Yes.

Soc. Then with a horse of better temper, vicious actions would be produced voluntarily; and with a horse of bad temper involuntarily?

Hip. Certainly.

Soc. And that would be true of a dog, or of any other animal?

Hip. Yes.

Soc. And is it better to possess the mind of an archer who voluntarily or involuntarily misses the mark? in the practice of archery,

Hip. Of him who voluntarily misses.

Lesser Hippias.

SOCRATES, HIPPIAS.

Soc. This would be the better mind for the purposes of archery?

Hip. Yes.

Soc. Then the mind which involuntarily errs is worse than the mind which errs voluntarily?

Hip. Yes, certainly, in the use of the bow.

of medicine,

Soc. And what would you say of the art of medicine;—has not the mind which voluntarily works harm to the body, more of the healing art?

Hip. Yes.

Soc. Then in the art of medicine the voluntary is better than the involuntary?

Hip. Yes.

Soc. Well, and in lute-playing and in flute-playing, and in all arts and sciences, is not that mind the better which voluntarily does what is evil and dishonourable, and goes wrong, and is not the worse that which does so involuntarily?

Hip. That is evident.

in the characters of slaves.

Soc. And what would you say of the characters of slaves? Should we not prefer to have those who voluntarily do wrong and make mistakes, and are they not better in their mistakes than those who commit them involuntarily?

Hip. Yes.

Soc. And should we not desire to have our own minds in the best state possible?

Hip. Yes.

Soc. And will our minds be better if they do wrong and make mistakes voluntarily or involuntarily?

Hippias revolts at the conclusion.

Hip. O, Socrates, it would be a monstrous thing to say that those who do wrong voluntarily are better than those who do wrong involuntarily!

Soc. And yet that appears to be the only inference.

Hip. I do not think so.

Socrates recapitulates the argument.

Soc. But I imagined, Hippias, that you did. Please to answer once more: Is not justice a power, or knowledge, or both? Must not justice, at all events, be one of these?

Hip. Yes.

Soc. But if justice is a power of the soul, then the soul which has the greater power is also the more just; for that

which has the greater power, my good friend, has been proved by us to be the better.

Hip. Yes, that has been proved.

Soc. And if justice is knowledge, then the wiser will be the juster soul, and the more ignorant the more unjust?

Hip. Yes.

Soc. But if justice be power as well as knowledge — then will not the soul which has both knowledge and power be the more just, and that which is the more ignorant be the more unjust? Must it not be so?

Hip. Clearly.

Soc. And is not the soul which has the greater power and wisdom also better, and better able to do both good and evil in every action?

Hip. Certainly.

376 *Soc.* The soul, then, which acts ill, acts voluntarily by power and art — and these either one or both of them are elements of justice?

Hip. That seems to be true.

Soc. And to do injustice is to do ill, and not to do injustice is to do well?

Hip. Yes.

Soc. And will not the better and abler soul when it does wrong, do wrong voluntarily, and the bad soul involuntarily?

Hip. Clearly.

Soc. And the good man is he who has the good soul, and the bad man is he who has the bad?

Hip. Yes.

Soc. Then the good man will voluntarily do wrong, and the bad man involuntarily, if the good man is he who has the good soul?

Hip. Which he certainly has.

Hippias, who has admitted the previous deductions, rebels at the final one. Socrates is himself dissatisfied. What remains if Socrates

Soc. Then, Hippias, he who voluntarily does wrong and disgraceful things, if there be such a man, will be the good man?

Hip. There I cannot agree with you.

Soc. Nor can I agree with myself, Hippias; and yet that seems to be the conclusion which, as far as we can see at present, must follow from our argument. As I was saying

Lesser Hippias.

SOCRATES.

and a wiser than Socrates are alike in doubt?

before, I am all abroad, and being in perplexity am always changing my opinion. Now, that I or any ordinary man should wander in perplexity is not surprising; but if you wise men also wander, and we cannot come to you and rest from our wandering, the matter begins to be serious both to us and to you.

ALCIBIADES I.

INTRODUCTION.

THE First Alcibiades is a conversation between Socrates and Alcibiades. Socrates is represented in the character which he attributes to himself in the Apology of a know-nothing who detects the conceit of knowledge in others. The two have met already in the Protagoras and in the Symposium; in the latter dialogue, as in this, the relation between them is that of a lover and his beloved. But the narrative of their loves is told differently in different places; for in the Symposium Alcibiades is depicted as the impassioned but rejected lover; here, as coldly receiving the advances of Socrates, who, for the best of purposes, lies in wait for the aspiring and ambitious youth.

ANALYSIS.

Steph. 103–106 Alcibiades, who is described as a very young man, is about to enter on public life, having an inordinate opinion of himself, and an extravagant ambition. Socrates, 'who knows what is in man,' astonishes him by a revelation of his designs. But has he the knowledge which is necessary for carrying them out? He is 107–109 going to persuade the Athenians — about what? Not about any particular art, but about politics — when to fight and when to make peace. Now, men should fight and make peace on just grounds, and therefore the question of justice and injustice must enter into peace and war; and he who advises the Athenians must know the difference between them. Does Alcibiades know? If he does, he must either have been taught by some master, or he must have discovered the nature of them himself. If he has had a master, Socrates would like to be informed who he is, that he 110 may go and learn of him also. Alcibiades admits that he has never learned. Then has he enquired for himself? He may have, if he was ever aware of a time when he was ignorant. But he never was ignorant; for when he played with other boys at dice,

he charged them with cheating, and this implied a knowledge of just and unjust. According to his own explanation, he had learned of the multitude. Why, he asks, should he not learn of them the nature of justice, as he has learned the Greek language of them? To this Socrates answers, that they can teach Greek, but they 111
cannot teach justice; for they are agreed about the one, but they are not agreed about the other: and therefore Alcibiades, who 112
has admitted that if he knows he must either have learned from a master or have discovered for himself the nature of justice, is convicted out of his own mouth. 113

Alcibiades rejoins, that the Athenians debate not about what is just, but about what is expedient; and he asserts that the two principles of justice and expediency are opposed. Socrates, by a 114
series of questions, compels him to admit that the just and the expedient coincide. Alcibiades is thus reduced to the humiliating–117
conclusion that he knows nothing of politics, even if, as he says, they are concerned with the expedient.

However, he is no worse than other Athenian statesmen; and he will not need training, for others are as ignorant as he is. He is reminded that he has to contend, not only with his own countrymen, but with their enemies — with the Spartan kings and–120
with the great king of Persia; and he can only attain this higher aim of ambition by the assistance of Socrates. Not that Socrates himself professes to have attained the truth, but the questions which he asks bring others to a knowledge of themselves, and this is the first step in the practice of virtue.

The dialogue continues: — We wish to become as good as–124
possible. But to be good in what? Alcibiades replies — 'Good in transacting business.' But what business? 'The business of the 125
most intelligent men at Athens.' The cobbler is intelligent in shoemaking, and is therefore good in that; he is not intelligent, and therefore not good, in weaving. Is he good in the sense which Alcibiades means, who is also bad? 'I mean,' replies Alcibiades, 'the man who is able to command in the city.' But to command what — horses or men? and if men, under what circumstances? 'I mean to say, that he is able to command men living in social and political relations.' And what is their aim? 'The better preservation of the city.' But when is a city better? 126
'When there is unanimity, such as exists between husband and

ANALYSIS.

127 wife.' Then, when husbands and wives perform their own special duties, there can be no unanimity between them; nor can a city be well ordered when each citizen does his own work only. Alcibiades, having stated first that goodness consists in the unanimity of the citizens, and then in each of them doing his own separate work, is brought to the required point of self-contra-
128 diction, leading him to confess his own ignorance.

But he is not too old to learn, and may still arrive at the truth,
129 if he is willing to be cross-examined by Socrates. He must know himself; that is to say, not his body, or the things of the body, but his mind, or truer self. The physician knows the body, and the tradesman knows his own business, but they do not necessarily know themselves. Self-knowledge can be obtained only
–132 by looking into the mind and virtue of the soul, which is the diviner part of a man, as we see our own image in another's eye. And if we do not know ourselves, we cannot know what belongs to ourselves or belongs to others, and are unfit to take a part in
–134 political affairs. Both for the sake of the individual and of the state, we ought to aim at justice and temperance, not at wealth or power. The evil and unjust should have no power,—they should
135 be the slaves of better men than themselves. None but the virtuous are deserving of freedom.

And are you, Alcibiades, a freeman? 'I feel that I am not; but I hope, Socrates, that by your aid I may become free, and from this day forward I will never leave you.'

INTRODUCTION.

The Alcibiades has several points of resemblance to the undoubted dialogues of Plato. The process of interrogation is of the same kind with that which Socrates practises upon the youthful Cleinias in the Euthydemus; and he characteristically attributes to Alcibiades the answers which he has elicited from him. The definition of good is narrowed by successive questions, and virtue is shown to be identical with knowledge. Here, as elsewhere, Socrates awakens the consciousness not of sin but of ignorance. Self-humiliation is the first step to knowledge, even of the commonest things. No man knows how ignorant he is, and no man can arrive at virtue and wisdom who has not once in his life, at least, been convicted of error. The process by which the soul is elevated is not unlike that which religious writers describe under

Alcibiades I. INTRODUCTION.

the name of 'conversion,' if we substitute the sense of ignorance for the consciousness of sin.

In some respects the dialogue differs from any other Platonic composition. The aim is more directly ethical and hortatory; the process by which the antagonist is undermined is simpler than in other Platonic writings, and the conclusion more decided. There is a good deal of humour in the manner in which the pride of Alcibiades, and of the Greeks generally, is supposed to be taken down by the Spartan and Persian queens; and the dialogue has considerable dialectical merit. But we have a difficulty in supposing that the same writer, who has given so profound and complex a notion of the characters both of Alcibiades and Socrates in the Symposium, should have treated them in so thin and superficial a manner in the Alcibiades, or that he would have ascribed to the ironical Socrates the rather unmeaning boast that Alcibiades could not attain the objects of his ambition without his help (105 D foll.); or that he should have imagined that a mighty nature like his could have been reformed by a few not very conclusive words of Socrates. For the arguments by which Alcibiades is reformed are not convincing; the writer of the dialogue, whoever he was, arrives at his idealism by crooked and tortuous paths, in which many pitfalls are concealed. The anachronism of making Alcibiades about twenty years old during the life of his uncle, Pericles, may be noted; and the repetition of the favourite observation, which occurs also in the Laches and Protagoras, that great Athenian statesmen, like Pericles, failed in the education of their sons. There is none of the undoubted dialogues of Plato in which there is so little dramatic verisimilitude.

ALCIBIADES I.

PERSONS OF THE DIALOGUE.

ALCIBIADES, SOCRATES.

Alcibiades I. SOCRATES, ALCIBIADES.

Steph. *Socrates.* I DARE SAY that you may be surprised to find,
103 O son of Cleinias, that I, who am your first lover, not having spoken to you for many years, when the rest of the world were wearying you with their attentions, am the last of your lovers who still speaks to you. The cause of my silence has been that I was hindered by a power more than human, of which I will some day explain to you the nature; this impediment has now been removed; I therefore here present myself before you, and I greatly hope that no similar hindrance will again occur. Meanwhile, I have observed that your pride has been too much for the pride of your admirers; they were numerous and high-spirited, but they have all run away, overpowered by your superior force of
104 character; not one of them remains. And I want you to understand the reason why you have been too much for them. You think that you have no need of them or of any other man, for you have great possessions and lack nothing, beginning with the body, and ending with the soul. In the first place, you say to yourself that you are the fairest and tallest of the citizens, and this every one who has eyes may see to be true; in the second place, that you are among the noblest of them, highly connected both on the father's and the mother's side, and sprung from one of the most distinguished families in your own state, which is the greatest in Hellas, and having many friends and kinsmen of the best sort, who can assist you when in need; and there is one

The pride of Alcibiades has been too much for his lovers.

Alcibiades I.

SOCRATES, ALCIBIADES.

potent relative, who is more to you than all the rest, Pericles the son of Xanthippus, whom your father left guardian of you, and of your brother, and who can do as he pleases not only in this city, but in all Hellas, and among many and mighty barbarous nations. Moreover, you are rich; but I must say that you value yourself least of all upon your possessions. And all these things have lifted you up; you have overcome your lovers, and they have acknowledged that you were too much for them. Have you not remarked their absence? And now I know that you wonder why I, unlike the rest of them, have not gone away, and what can be my motive in remaining.

Alcibiades. Perhaps, Socrates, you are not aware that I was just going to ask you the very same question — What do you want? And what is your motive in annoying me, and always, wherever I am, making a point of coming[1]? I do really wonder what you mean, and should greatly like to know.

Soc. Then if, as you say, you desire to know, I suppose that you will be willing to hear, and I may consider myself to be speaking to an auditor who will remain, and will not run away?

Al. Certainly, let me hear.

Soc. You had better be careful, for I may very likely be as unwilling to end as I have hitherto been to begin.

Al. Proceed, my good man, and I will listen.

Soc. I will proceed; and, although no lover likes to speak with one who has no feeling of love in him[2], I will make an effort, and tell you what I meant: My love, Alcibiades, which 105
I hardly like to confess, would long ago have passed away, as I flatter myself, if I saw you loving your good things, or thinking that you ought to pass life in the enjoyment of them. But I shall reveal other thoughts of yours, which you keep to yourself; whereby you will know that I have always had my eye on you. Suppose that at this moment some God came to you and said: Alcibiades, will you live as you are, or die in an instant if you are forbidden to make any further acquisition?— I verily believe that you would choose death. And I will tell you the hope in which you are at present

Alcibiades a lover, not of pleasure, but of ambition; and he requires the help of Socrates for the accomplishment of his designs.

[1] Cp. Symp. 213 C.

[2] Cp. Symp. 217 E ff.

living: Before many days have elapsed, you think that you will come before the Athenian assembly, and will prove to them that you are more worthy of honour than Pericles, or any other man that ever lived, and having proved this, you will have the greatest power in the state. When you have gained the greatest power among us, you will go on to other Hellenic states, and not only to Hellenes, but to all the barbarians who inhabit the same continent with us. And if the God were then to say to you again: Here in Europe is to be your seat of empire, and you must not cross over into Asia or meddle with Asiatic affairs, I do not believe that you would choose to live upon these terms; but the world, as I may say, must be filled with your power and name — no man less than Cyrus and Xerxes is of any account with you. Such I know to be your hopes — I am not guessing only — and very likely you, who know that I am speaking the truth, will reply, Well, Socrates, but what have my hopes to do with the explanation which you promised of your unwillingness to leave me? And that is what I am now going to tell you, sweet son of Cleinias and Dinomachè. The explanation is, that all these designs of yours cannot be accomplished by you without my help; so great is the power which I believe myself to have over you and your concerns; and this I conceive to be the reason why the God has hitherto forbidden me to converse with you, and I have been long expecting his permission. For, as you hope to prove your own great value to the state, and having proved it, to attain at once to absolute power, so do I indulge a hope that I shall have the supreme power over you, if I am able to prove my own great value to you, and to show you that neither guardian, nor kinsman, nor any one is able to deliver into your hands the power which you desire, but I only, God being my helper. When you were young[1] and your hopes were not yet matured, I should have wasted my time, and
106 therefore, as I conceive, the God forbade me to converse with you; but now, having his permission, I will speak, for now you will listen to me.

And this is the reason why Socrates has clung to him; he is hoping when Alcibiades has become the ruler of Athens to rule over him.

Al. Your silence, Socrates, was always a surprise to me. I never could understand why you followed me about, and

Alcibiades does not

[1] Cp. Symp. 181 E.

Alcibiades I.

SOCRATES, ALCIBIADES.

now that you have begun to speak again, I am still more amazed. Whether I think all this or not, is a matter about which you seem to have already made up your mind, and therefore my denial will have no effect upon you. But granting, if I must, that you have perfectly divined my purposes, why is your assistance necessary to the attainment of them? Can you tell me why?

deny the impeachment.

Soc. You want to know whether I can make a long speech, such as you are in the habit of hearing; but that is not my way. I think, however, that I can prove to you the truth of what I am saying, if you will grant me one little favour.

Al. Yes, if the favour which you mean be not a troublesome one.

Soc. Will you be troubled at having questions to answer?

Alcibiades is willing to answer questions.

Al. Not at all.

Soc. Then please to answer.

Al. Ask me.

Soc. Have you not the intention which I attribute to you?

Al. I will grant anything you like, in the hope of hearing what more you have to say.

Soc. You do, then, mean, as I was saying, to come forward in a little while in the character of an adviser of the Athenians? And suppose that when you are ascending the bema, I pull you by the sleeve and say, Alcibiades, you are getting up to advise the Athenians — do you know the matter about which they are going to deliberate, better than they?— How would you answer?

He is going to advise the Athenians about matters which he knows better than they.

Al. I should reply, that I was going to advise them about a matter which I do know better than they.

Soc. Then you are a good adviser about the things which you know?

Al. Certainly.

Soc. And do you know anything but what you have learned of others, or found out yourself?

Al. That is all.

Soc. And would you have ever learned or discovered anything, if you had not been willing either to learn of others or to examine yourself?

Al. I should not.

Soc. And would you have been willing to learn or to examine what you supposed that you knew?

Al. Certainly not.

Soc. Then there was a time when you thought that you did not know what you are now supposed to know?

Al. Certainly.

But when did he ever learn about these matters?

Soc. I think that I know tolerably well the extent of your acquirements; and you must tell me if I forget any of them: according to my recollection, you learned the arts of writing, of playing on the lyre, and of wrestling; the flute you never would learn; this is the sum of your accomplishments, unless there were some which you acquired in secret; and I think that secrecy was hardly possible, as you could not have come out of your door, either by day or night, without my seeing you.

Al. Yes, that was the whole of my schooling.

107 *Soc.* And are you going to get up in the Athenian assembly, and give them advice about writing?

Al. No, indeed.

Soc. Or about the touch of the lyre?

Al. Certainly not.

Soc. And they are not in the habit of deliberating about wrestling, in the assembly?

Al. Hardly.

Soc. Then what are the deliberations in which you propose to advise them? Surely not about building?

Al. No.

Soc. For the builder will advise better than you will about that?

Al. He will.

Soc. Nor about divination?

Al. No.

Soc. About that again the diviner will advise better than you will?

Al. True.

Soc. Whether he be little or great, good or ill-looking, noble or ignoble — makes no difference.

Al. Certainly not.

Soc. A man is a good adviser about anything, not because he has riches, but because he has knowledge?

SOCRATES, ALCIBIADES.

Al. Assuredly.

Soc. Whether their counsellor is rich or poor, is not a matter which will make any difference to the Athenians when they are deliberating about the health of the citizens; they only require that he should be a physician.

Al. Of course.

Soc. Then what will be the subject of deliberation about which you will be justified in getting up and advising them?

Al. About their own concerns, Socrates.

Soc. You mean about shipbuilding, for example, when the question is what sort of ships they ought to build?

Al. No, I should not advise them about that.

Soc. I suppose, because you do not understand shipbuilding:—is that the reason?

Al. It is.

Soc. Then about what concerns of theirs will you advise them?

He will advise them about war and peace, and with whom they had better go to war, and when and how long.

Al. About war, Socrates, or about peace, or about any other concerns of the state.

Soc. You mean, when they deliberate with whom they ought to make peace, and with whom they ought to go to war, and in what manner?

Al. Yes.

Soc. And they ought to go to war with those against whom it is better to go to war?

Al. Yes.

Soc. And when it is better?

Al. Certainly.

Soc. And for as long a time as is better?

Al. Yes.

Soc. But suppose the Athenians to deliberate with whom they ought to close in wrestling, and whom they should grasp by the hand, would you, or the master of gymnastics, be a better adviser of them?

Al. Clearly, the master of gymnastics.

Soc. And can you tell me on what grounds the master of gymnastics would decide, with whom they ought or ought not to close, and when and how? To take an instance: Would he not say that they should wrestle with those against whom it is best to wrestle?

Al. Yes.

108 *Soc.* And as much as is best?

Al. Certainly.

Soc. And at such times as are best?

Al. Yes.

Soc. Again; you sometimes accompany the lyre with the song and dance?

Al. Yes.

Soc. When it is well to do so?

Al. Yes.

Soc. And as much as is well?

Al. Just so.

Soc. And as you speak of an excellence or art of the best in wrestling, and of an excellence in playing the lyre, I wish you would tell me what this latter is;—the excellence of wrestling I call gymnastic, and I want to know what you call the other.

Al. I do not understand you.

Soc. Then try to do as I do; for the answer which I gave is universally right, and when I say right, I mean according to rule.

Al. Yes.

Soc. And was not the art of which I spoke gymnastic?

Al. Certainly.

Soc. And I called the excellence in wrestling gymnastic?

Al. You did.

Soc. And I was right?

Al. I think that you were.

Alcibiades should learn to argue nicely.

Soc. Well, now,—for you should learn to argue prettily—let me ask you in return to tell me, first, what is that art of which playing and singing, and stepping properly in the dance, are parts,—what is the name of the whole? I think that by this time you must be able to tell.

Al. Indeed I cannot.

Soc. Then let me put the matter in another way: what do you call the Goddesses who are the patronesses of art?

Al. The Muses do you mean, Socrates?

Soc. Yes, I do; and what is the name of the art which is called after them?

Alcibiades I.

SOCRATES, ALCIBIADES.

What is the meaning of 'the better,' 'the more excellent.'

Al. I suppose that you mean music.

Soc. Yes, that is my meaning; and what is the excellence of the art of music, as I told you truly that the excellence of wrestling was gymnastic — what is the excellence of music — to be what?

Al. To be musical, I suppose.

Soc. Very good; and now please to tell me what is the excellence of war and peace; as the more musical was the more excellent, or the more gymnastical was the more excellent, tell me, what name do you give to the more excellent in war and peace?

Al. But I really cannot tell you.

The term better, when applied to food, means more wholesome.

Soc. But if you were offering advice to another and said to him — This food is better than that, at this time and in this quantity, and he said to you — What do you mean, Alcibiades, by the word 'better'? you would have no difficulty in replying that you meant 'more wholesome,' although you do not profess to be a physician: and when the subject is one of which you profess to have knowledge, and about which you are ready to get up and advise as if you knew, are you not ashamed, when you are asked, not to be able to answer the question? Is it not disgraceful? 109

Al. Very.

Soc. Well, then, consider and try to explain what is the meaning of 'better,' in the matter of making peace and going to war with those against whom you ought to go to war? To what does the word refer?

Al. I am thinking, and I cannot tell.

Soc. But you surely know what are the charges which we bring against one another, when we arrive at the point of making war, and what name we give them?

Al. Yes, certainly; we say that deceit or violence has been employed, or that we have been defrauded.

Soc. And how does this happen? Will you tell me how? For there may be a difference in the manner.

Al. Do you mean by 'how,' Socrates, whether we suffered these things justly or unjustly?

Soc. Exactly.

Al. There can be no greater difference than between just and unjust.

Soc. And would you advise the Athenians to go to war with the just or with the unjust?

Al. That is an awkward question; for certainly, even if a person did intend to go to war with the just, he would not admit that they were just.

Soc. He would not go to war, because it would be unlawful?

Al. Neither lawful nor honourable.

Soc. Then you, too, would address them on principles of justice?

Al. Certainly.

In going to war or not going to war, the better is the more just.

Soc. What, then, is justice but that better, of which I spoke, in going to war or not going to war with those against whom we ought or ought not, and when we ought or ought not to go to war?

Al. Clearly.

Soc. But how is this, friend Alcibiades? Have you forgotten that you do not know this, or have you been to the schoolmaster without my knowledge, and has he taught you to discern the just from the unjust? Who is he? I wish you would tell me, that I may go and learn of him — you shall introduce me.

Al. You are mocking, Socrates.

But where did Alcibiades acquire this notion of just and unjust?

Soc. No, indeed; I most solemnly declare to you by Zeus, who is the God of our common friendship, and whom I never will forswear, that I am not; tell me, then, who this instructor is, if he exists.

Al. But, perhaps, he does not exist; may I not have acquired the knowledge of just and unjust in some other way?

Soc. Yes; if you have discovered them.

Al. But do you not think that I could discover them?

Soc. I am sure that you might, if you enquired about them.

Al. And do you not think that I would enquire?

Soc. Yes; if you thought that you did not know them.

Al. And was there not a time when I did so think?

Soc. Very good; and can you tell me how long it is since you thought that you did not know the nature of the just and the unjust? What do you say to a year ago? Were you then in a state of conscious ignorance and enquiry?

Alcibiades I.

SOCRATES, ALCIBIADES.

or did you think that you knew? And please to answer truly, that our discussion may not be in vain.

Al. Well, I thought that I knew.

Soc. And two years ago, and three years ago, and four years ago, you knew all the same?

Al. I did.

Soc. And more than four years ago you were a child — were you not?

Al. Yes.

Soc. And then I am quite sure that you thought you knew.

Al. Why are you so sure?

He always had them.

Soc. Because I often heard you when a child, in your teacher's house, or elsewhere, playing at dice or some other game with the boys, not hesitating at all about the nature of the just and unjust; but very confident — crying and shouting that one of the boys was a rogue and a cheat, and had been cheating. Is it not true?

Al. But what was I to do, Socrates, when anybody cheated me?

Soc. And how can you say, 'What was I to do'? if at the time you did not know whether you were wronged or not?

Al. To be sure I knew; I was quite aware that I was being cheated.

Soc. Then you suppose yourself even when a child to have known the nature of just and unjust?

Al. Certainly; and I did know then.

Soc. And when did you discover them — not, surely, at the time when you thought that you knew them?

Al. Certainly not.

Soc. And when did you think that you were ignorant — if you consider, you will find that there never was such a time?

Al. Really, Socrates, I cannot say.

Soc. Then you did not learn them by discovering them?

Al. Clearly not.

Soc. But just before you said that you did not know them by learning; now, if you have neither discovered nor learned them, how and whence do you come to know them?

Al. I suppose that I was mistaken in saying that I knew them through my own discovery of them; whereas, in truth, I learned them in the same way that other people learn.

Soc. So you said before, and I must again ask, of whom? Do tell me.

SOCRATES, ALCIBIADES.

Al. Of the many.

Soc. Do you take refuge in them? I cannot say much for your teachers.

He learned them of the many,

Al. Why, are they not able to teach?

Soc. They could not teach you how to play at draughts, which you would acknowledge (would you not) to be a much smaller matter than justice?

Al. Yes.

Soc. And can they teach the better who are unable to teach the worse?

Al. I think that they can; at any rate, they can teach many far better things than to play at draughts.

111 *Soc.* What things?

Al. Why, for example, I learned to speak Greek of them, and I cannot say who was my teacher, or to whom I am to attribute my knowledge of Greek, if not to those good-for-nothing teachers, as you call them.

as he learned Greek;—of those who knew it.

Soc. Why, yes, my friend; and the many are good enough teachers of Greek, and some of their instructions in that line may be justly praised.

Al. Why is that?

Soc. Why, because they have the qualities which good teachers ought to have.

Al. What qualities?

Soc. Why, you know that knowledge is the first qualification of any teacher?

Al. Certainly.

Soc. And if they know, they must agree together and not differ?

Al. Yes.

Soc. And would you say that they knew the things about which they differ?

Al. No.

Soc. Then how can they teach them?

Al. They cannot.

Soc. Well, but do you imagine that the many would differ about the nature of wood and stone? are they not agreed if you ask them what they are? and do they not run to fetch

Yes: the many can teach things about

Alcibiades I.

SOCRATES, ALCIBIADES.

the same thing, when they want a piece of wood or a stone? And so in similar cases, which I suspect to be pretty nearly all that you mean by speaking Greek.

Al. True.

which they are agreed.

Soc. These, as we were saying, are matters about which they are agreed with one another and with themselves; both individuals and states use the same words about them; they do not use some one word and some another.

Al. They do not.

Soc. Then they may be expected to be good teachers of these things?

Al. Yes.

Soc. And if we want to instruct any one in them, we shall be right in sending him to be taught by our friends the many?

Al. Very true.

Soc. But if we wanted further to know not only which are men and which are horses, but which men or horses have powers of running, would the many still be able to inform us?

Al. Certainly not.

Soc. And you have a sufficient proof that they do not know these things and are not the best teachers of them, inasmuch as they are never agreed about them?

Al. Yes.

But could the many teach things about which they are disagreed?

Soc. And suppose that we wanted to know not only what men are like, but what healthy or diseased men are like — would the many be able to teach us?

Al. They would not.

Soc. And you would have a proof that they were bad teachers of these matters, if you saw them at variance?

Al. I should.

And one of these things is justice.

Soc. Well, but are the many agreed with themselves, or with one another, about the justice or injustice of men and 112
things?

Al. Assuredly not, Socrates.

Soc. There is no subject about which they are more at variance?

Al. None.

Soc. I do not suppose that you ever saw or heard of men

quarrelling over the principles of health and disease to such an extent as to go to war and kill one another for the sake of them?

SOCRATES, ALCIBIADES.

Al. No, indeed.

Did not a question of justice cause the war between the Trojans and Achaeans, and between the Athenians and Lacedaemonians?

Soc. But of the quarrels about justice and injustice, even if you have never seen them, you have certainly heard from many people, including Homer; for you have heard of the Iliad and Odyssey?

Al. To be sure, Socrates.

Soc. A difference of just and unjust is the argument of those poems?

Al. True.

Soc. Which difference caused all the wars and deaths of Trojans and Achaeans, and the deaths of the suitors of Penelope in their quarrel with Odysseus.

Al. Very true.

Soc. And when the Athenians and Lacedaemonians and Boeotians fell at Tanagra, and afterwards in the battle of Coronea, at which your father Cleinias met his end, the question was one of justice — this was the sole cause of the battles, and of their deaths.

Al. Very true.

And yet they did not know what they were fighting about?

Soc. But can they be said to understand that about which they are quarrelling to the death?

Al. Clearly not.

Soc. And yet those whom you thus allow to be ignorant are the teachers to whom you are appealing.

Al. Very true.

Soc. But how are you ever likely to know the nature of justice and injustice, about which you are so perplexed, if you have neither learned them of others nor discovered them yourself?

Al. From what you say, I suppose not.

Soc. See, again, how inaccurately you speak, Alcibiades!

Al. In what respect?

Soc. In saying that I say so.

Al. Why, did you not say that I know nothing of the just and unjust?

Soc. No; I did not.

Al. Did I, then?

Alcibiades I.

SOCRATES, ALCIBIADES.

Soc. Yes.

Al. How was that?

Soc. Let me explain. Suppose I were to ask you which is the greater number, two or one; you would reply 'two'?

Al. I should.

Soc. And by how much greater?

Al. By one.

Soc. Which of us now says that two is more than one?

Al. I do.

Soc. Did not I ask, and you answer the question?

Al. Yes.

Soc. Then who is speaking? I who put the question, or 113
you who answer me?

Al. I am.

The answerer, not the questioner, has been drawing these inferences.

Soc. Or suppose that I ask and you tell me the letters which make up the name Socrates, which of us is the speaker?

Al. I am.

Soc. Now let us put the case generally: whenever there is a question and answer, who is the speaker,—the questioner or the answerer?

Al. I should say, Socrates, that the answerer was the speaker.

Soc. And have I not been the questioner all through?

Al. Yes.

Soc. And you the answerer?

Al. Just so.

Soc. Which of us, then, was the speaker?

Al. The inference is, Socrates, that I was the speaker.

Soc. Did not some one say that Alcibiades, the fair son of Cleinias, not understanding about just and unjust, but thinking that he did understand, was going to the assembly to advise the Athenians about what he did not know? Was not that said?

Al. Very true.

How can you teach what you do not know?

Soc. Then, Alcibiades, the result may be expressed in the language of Euripides. I think that you have heard all this 'from yourself, and not from me'; nor did I say this, which you erroneously attribute to me, but you yourself, and what you said was very true. For indeed, my dear fellow, the

SOCRATES, ALCIBIADES.

design which you meditate of teaching what you do not know, and have not taken any pains to learn, is downright insanity.

But the expedient, not the just, is the subject about which men commonly debate.

Al. But, Socrates, I think that the Athenians and the rest of the Hellenes do not often advise as to the more just or unjust; for they see no difficulty in them, and therefore they leave them, and consider which course of action will be most expedient; for there is a difference between justice and expediency. Many persons have done great wrong and profited by their injustice; others have done rightly and come to no good.

Soc. Well, but granting that the just and the expedient are ever so much opposed, you surely do not imagine that you know what is expedient for mankind, or why a thing is expedient?

Alcibiades insists that he will not have the old argument over again.

Al. Why not, Socrates?— But I am not going to be asked again from whom I learned, or when I made the discovery.

Soc. What a way you have! When you make a mistake which might be refuted by a previous argument, you insist on having a new and different refutation; the old argument is a worn-out garment which you will no longer put on, but some
114 one must produce another which is clean and new. Now I shall disregard this move of yours, and shall ask over again, — Where did you learn and how do you know the nature of the expedient, and who is your teacher? All this I comprehend in a single question, and now you will manifestly be in the old difficulty, and will not be able to show that you know the expedient, either because you learned or because you discovered it yourself. But, as I perceive that you are dainty, and dislike the taste of a stale argument, I will enquire no further into your knowledge of what is expedient or what is not expedient for the Athenian people, and simply request you to say why you do not explain whether justice and expediency are the same or different? And if you like you may examine me as I have examined you, or, if you would rather, you may carry on the discussion by yourself.

Al. But I am not certain, Socrates, whether I shall be able to discuss the matter with you.

Soc. Then imagine, my dear fellow, that I am the demus

Alcibiades I.

SOCRATES, ALCIBIADES.

and the ecclesia; for in the ecclesia, too, you will have to persuade men individually.

Al. Yes.

Soc. And is not the same person able to persuade one individual singly and many individuals of the things which he knows? The grammarian, for example, can persuade one and he can persuade many about letters.

Al. True.

Soc. And about number, will not the same person persuade one and persuade many?

Al. Yes.

Soc. And this will be he who knows number, or the arithmetician?

Al. Quite true.

He who can persuade many can persuade one. Alcibiades should therefore be able to persuade Socrates.

Soc. And cannot you persuade one man about that of which you can persuade many?

Al. I suppose so.

Soc. And that of which you can persuade either is clearly what you know?

Al. Yes.

Soc. And the only difference between one who argues as we are doing, and the orator who is addressing an assembly, is that the one seeks to persuade a number, and the other an individual, of the same things.

Al. I suppose so.

Soc. Well, then, since the same person who can persuade a multitude can persuade individuals, try conclusions upon me, and prove to me that the just is not always expedient.

Al. You take liberties, Socrates.

Soc. I shall take the liberty of proving to you the opposite of that which you will not prove to me.

Al. Proceed.

Soc. Answer my questions — that is all.

Al. Nay, I should like you to be the speaker.

Soc. What, do you not wish to be persuaded?

Al. Certainly I do.

Soc. And can you be persuaded better than out of your own mouth?

Al. I think not.

Soc. Then you shall answer; and if you do not hear the

words, that the just is the expedient, coming from your own lips, never believe another man again.

SOCRATES, ALCIBIADES.

Al. I won't; but answer I will, for I do not see how I can come to any harm.

115 *Soc.* A true prophecy! Let me begin then by enquiring of you whether you allow that the just is sometimes expedient and sometimes not?

A man may do what is expedient and not just, but he cannot do what is honourable and not just and good.

Al. Yes.

Soc. And sometimes honourable and sometimes not?

Al. What do you mean?

Soc. I am asking if you ever knew any one who did what was dishonourable and yet just?

Al. Never.

Soc. All just things are honourable?

Al. Yes.

Soc. And are honourable things sometimes good and sometimes not good, or are they always good?

Al. I rather think, Socrates, that some honourable things are evil.

Soc. And are some dishonourable things good?

Al. Yes.

Soc. You mean in such a case as the following:— In time of war, men have been wounded or have died in rescuing a companion or kinsman, when others who have neglected the duty of rescuing them have escaped in safety?

Al. True.

Soc. And to rescue another under such circumstances is honourable, in respect of the attempt to save those whom we ought to save; and this is courage?

Al. True.

Soc. But evil in respect of death and wounds?

Al. Yes.

Soc. And the courage which is shown in the rescue is one thing, and the death another?

Al. Certainly.

Soc. Then the rescue of one's friends is honourable in one point of view, but evil in another?

Al. True.

Soc. And if honourable, then also good: Will you consider now whether I may not be right, for you were acknowledging

Alcibiades I.

SOCRATES, ALCIBIADES.

that the courage which is shown in the rescue is honourable? Now is this courage good or evil? Look at the matter thus: which would you rather choose, good or evil?

Al. Good.

Soc. And the greatest goods you would be most ready to choose, and would least like to be deprived of them?

Al. Certainly.

Soc. What would you say of courage? At what price would you be willing to be deprived of courage?

Al. I would rather die than be a coward.

Soc. Then you think that cowardice is the worst of evils?

Al. I do.

Soc. As bad as death, I suppose?

Al. Yes.

Soc. And life and courage are the extreme opposites of death and cowardice?

Al. Yes.

Soc. And they are what you would most desire to have, and their opposites you would least desire?

Al. Yes.

Soc. Is this because you think life and courage the best, and death and cowardice the worst?

Al. Yes.

Soc. And you would term the rescue of a friend in battle honourable, in as much as courage does a good work?

Al. I should.

But good may contain an element of evil. Good and evil are to be judged of by their consequences.

Soc. But evil because of the death which ensues?

Al. Yes.

Soc. Might we not describe their different effects as follows:— You may call either of them evil in respect of the evil which is the result, and good in respect of the good which is the result of either of them? 116

Al. Yes.

Soc. And they are honourable in so far as they are good, and dishonourable in so far as they are evil?

Al. True.

Soc. Then when you say that the rescue of a friend in battle is honourable and yet evil, that is equivalent to saying that the rescue is good and yet evil?

Al. I believe that you are right, Socrates.

SOCRATES, ALCIBIADES.

The honourable is identified with the good, and the good is the expedient,

Soc. Nothing honourable, regarded as honourable, is evil; nor anything base, regarded as base, good.

Al. Clearly not.

Soc. Look at the matter yet once more in a further light: he who acts honourably acts well?

Al. Yes.

Soc. And he who acts well is happy?

Al. Of course.

Soc. And the happy are those who obtain good?

Al. True.

Soc. And they obtain good by acting well and honourably?

Al. Yes.

Soc. Then acting well is a good?

Al. Certainly.

Soc. And happiness is a good?

Al. Yes.

Soc. Then the good and the honourable are again identified.

Al. Manifestly.

Soc. Then, if the argument holds, what we find to be honourable we shall also find to be good?

Al. Certainly.

Soc. And is the good expedient or not?

Al. Expedient.

Soc. Do you remember our admissions about the just?

Al. Yes; if I am not mistaken, we said that those who acted justly must also act honourably.

Soc. And the honourable is the good?

Al. Yes.

Soc. And the good is expedient?

Al. Yes.

Soc. Then, Alcibiades, the just is expedient?

and therefore the just which is the honourable is also the expedient. All this has been proved by Alcibiades himself.

Al. I should infer so.

Soc. And all this I prove out of your own mouth, for I ask and you answer?

Al. I must acknowledge it to be true.

Soc. And having acknowledged that the just is the same as the expedient, are you not (let me ask) prepared to ridicule any one who, pretending to understand the principles of justice and injustice, gets up to advise the noble

Alcibiades I.

SOCRATES, ALCIBIADES.

Athenians or the ignoble Peparethians, that the just may be the evil?

Yet he still finds himself in a perplexity,

Al. I solemnly declare, Socrates, that I do not know what I am saying. Verily, I am in a strange state, for when you put questions to me I am of different minds in successive instants.

Soc. And are you not aware of the nature of this perplexity, my friend?

Al. Indeed I am not.

Soc. Do you suppose that if some one were to ask you whether you have two eyes or three, or two hands or four, or anything of that sort, you would then be of different minds in successive instants?

Al. I begin to distrust myself, but still I do not suppose 117
that I should.

Soc. You would feel no doubt; and for this reason — because you would know?

Al. I suppose so.

Soc. And the reason why you involuntarily contradict yourself is clearly that you are ignorant?

Al. Very likely.

and this is because he thinks that he knows, but if he knew that he were ignorant he would be in no perplexity.

Soc. And if you are perplexed in answering about just and unjust, honourable and dishonourable, good and evil, expedient and inexpedient, the reason is that you are ignorant of them, and therefore in perplexity. Is not that clear?

Al. I agree.

Soc. But is this always the case, and is a man necessarily perplexed about that of which he has no knowledge?

Al. Certainly he is.

Soc. And do you know how to ascend into heaven?

Al. Certainly not.

Soc. And in this case, too, is your judgment perplexed?

Al. No.

Soc. Do you see the reason why, or shall I tell you?

Al. Tell me.

Soc. The reason is, that you not only do not know, my friend, but you do not think that you know.

Al. There again; what do you mean?

Alcibiades I.

SOCRATES, ALCIBIADES.

Soc. Ask yourself; are you in any perplexity about things of which you are ignorant? You know, for example, that you know nothing about the preparation of food.

Al. Very true.

Soc. And do you think and perplex yourself about the preparation of food: or do you leave that to some one who understands the art?

Al. The latter.

Soc. Or if you were on a voyage, would you bewilder yourself by considering whether the rudder is to be drawn inwards or outwards, or do you leave that to the pilot, and do nothing?

Al. It would be the concern of the pilot.

Soc. Then you are not perplexed about what you do not know, if you know that you do not know it?

Al. I imagine not.

The people who make mistakes are neither those who know, nor those who do not know, but those who think that they know and do not know.

Soc. Do you not see, then, that mistakes in life and practice are likewise to be attributed to the ignorance which has conceit of knowledge?

Al. Once more, what do you mean?

Soc. I suppose that we begin to act when we think that we know what we are doing?

Al. Yes.

Soc. But when people think that they do not know, they entrust their business to others?

Al. Yes.

Soc. And so there is a class of ignorant persons who do not make mistakes in life, because they trust others about things of which they are ignorant?

Al. True.

Soc. Who, then, are the persons who make mistakes? They cannot, of course, be those who know?

Al. Certainly not.

Soc. But if neither those who know, nor those who know
118 that they do not know, make mistakes, there remain those only who do not know and think that they know.

Al. Yes, only those.

Soc. Then this is ignorance of the disgraceful sort which is mischievous?

Al. Yes.

Alcibiades I.

SOCRATES, ALCIBIADES.

Soc. And most mischievous and most disgraceful when having to do with the greatest matters?

Al. By far.

Soc. And can there be any matters greater than the just, the honourable, the good, and the expedient?

Al. There cannot be.

Soc. And these, as you were saying, are what perplex you?

Al. Yes.

Soc. But if you are perplexed, then, as the previous argument has shown, you are not only ignorant of the greatest matters, but being ignorant you fancy that you know them?

Al. I fear that you are right.

And you, like other statesmen, rush into politics without being trained. Pericles, alone of them all, associated with the philosophers.

Soc. And now see what has happened to you, Alcibiades! I hardly like to speak of your evil case, but as we are alone I will: My good friend, you are wedded to ignorance of the most disgraceful kind, and of this you are convicted, not by me, but out of your own mouth and by your own argument; wherefore also you rush into politics before you are educated. Neither is your case to be deemed singular. For I might say the same of almost all our statesmen, with the exception, perhaps, of your guardian, Pericles.

Al. Yes, Socrates; and Pericles is said not to have got his wisdom by the light of nature, but to have associated with several of the philosophers; with Pythocleides, for example, and with Anaxagoras, and now in advanced life with Damon, in the hope of gaining wisdom.

Soc. Very good; but did you ever know a man wise in anything who was unable to impart his particular wisdom? For example, he who taught you letters was not only wise, but he made you and any others whom he liked wise.

Al. Yes.

Soc. And you, whom he taught, can do the same?

Al. True.

Soc. And in like manner the harper and gymnastic-master?

Al. Certainly.

Soc. When a person is enabled to impart knowledge to another, he thereby gives an excellent proof of his own understanding of any matter.

Al. I agree.

Soc. Well, and did Pericles make any one wise; did he begin by making his sons wise?

SOCRATES, ALCIBIADES.

Al. But, Socrates, if the two sons of Pericles were simpletons, what has that to do with the matter?

And even he could not teach his own sons, or your brother Cleinias, nor did any one ever grow wiser in his society.

Soc. Well, but did he make your brother, Cleinias, wise?

Al. Cleinias is a madman; there is no use in talking of him.

Soc. But if Cleinias is a madman and the two sons of Pericles were simpletons, what reason can be given why he neglects you, and lets you be as you are?

Al. I believe that I am to blame for not listening to him.

Soc. But did you ever hear of any other Athenian or foreigner, bond or free, who was deemed to have grown
119 wiser in the society of Pericles,—as I might cite Pythodorus, the son of Isolochus, and Callias, the son of Calliades, who have grown wiser in the society of Zeno, for which privilege they have each of them paid him the sum of a hundred minae [1] to the increase of their wisdom and fame.

Al. I certainly never did hear of any one.

Soc. Well, and in reference to your own case, do you mean to remain as you are, or will you take some pains about yourself?

Al. With your aid, Socrates, I will. And indeed, when I hear you speak, the truth of what you are saying strikes home to me, and I agree with you, for our statesmen, all but a few, do appear to be quite uneducated.

But if other statesmen are uneducated, what need has Alcibiades of education?

Soc. What is the inference?

Al. Why, that if they were educated they would be trained athletes, and he who means to rival them ought to have knowledge and experience when he attacks them; but now, as they have become politicians without any special training, why should I have the trouble of learning and practising? For I know well that by the light of nature I shall get the better of them.

Soc. My dear friend, what a sentiment! And how unworthy of your noble form and your high estate!

The lover is pained at hearing from the lips of Alcibiades

Al. What do you mean, Socrates; why do you say so?

Soc. I am grieved when I think of our mutual love.

Al. At what?

[1] About £406.

Alcibiades I.

SOCRATES, ALCIBIADES.

Soc. At your fancying that the contest on which you are entering is with people here.

Al. Why, what others are there?

Soc. Is that a question which a magnanimous soul should ask?

so unworthy a sentiment. He should have a higher ambition than this.

Al. Do you mean to say that the contest is not with these?

Soc. And suppose that you were going to steer a ship into action, would you only aim at being the best pilot on board? Would you not, while acknowledging that you must possess this degree of excellence, rather look to your antagonists, and not, as you are now doing, to your fellow combatants? You ought to be so far above these latter, that they will not even dare to be your rivals; and, being regarded by you as inferiors, will do battle for you against the enemy; this is the kind of superiority which you must establish over them, if you mean to accomplish any noble action really worthy of yourself and of the state.

Al. That would certainly be my aim.

Soc. Verily, then, you have good reason to be satisfied, if you are better than the soldiers; and you need not, when you are their superior and have your thoughts and actions fixed upon them, look away to the generals of the enemy.

Al. Of whom are you speaking, Socrates?

His rivals should be the Spartan and Persian kings, not any chance persons.

Soc. Why, you surely know that our city goes to war now and then with the Lacedaemonians and with the great king? 120

Al. True enough.

Soc. And if you meant to be the ruler of this city, would you not be right in considering that the Lacedaemonian and Persian king were your true rivals?

Al. I believe that you are right.

Soc. Oh no, my friend, I am quite wrong, and I think that you ought rather to turn your attention to Midias the quail-breeder and others like him, who manage our politics; in whom, as the women would remark, you may still see the slaves' cut of hair, cropping out in their minds as well as on their pates; and they come with their barbarous lingo to flatter us and not to rule us. To these, I say, you should look, and then you need not trouble yourself about your own fitness to contend in such a noble arena: there is no reason

why you should either learn what has to be learned, or practise what has to be practised, and only when thoroughly prepared enter on a political career.

Al. There, I think, Socrates, that you are right; I do not suppose, however, that the Spartan generals or the great king are really different from anybody else.

Soc. But, my dear friend, do consider what you are saying.

Al. What am I to consider?

Soc. In the first place, will you be more likely to take care of yourself, if you are in a wholesome fear and dread of them, or if you are not?

Al. Clearly, if I have such a fear of them.

Soc. And do you think that you will sustain any injury if you take care of yourself?

Al. No, I shall be greatly benefited.

Soc. And this is one very important respect in which that notion of yours is bad.

Al. True.

Soc. In the next place, consider that what you say is probably false.

Al. How so?

Soc. Let me ask you whether better natures are likely to be found in noble races or not in noble races?

Al. Clearly in noble races.

Soc. Are not those who are well born and well bred most likely to be perfect in virtue?

Al. Certainly.

Soc. Then let us compare our antecedents with those of the Lacedaemonian and Persian kings; are they inferior to us in descent? Have we not heard that the former are sprung from Heracles, and the latter from Achaemenes, and that the race of Heracles and the race of Achaemenes go back to Perseus, son of Zeus?

We too have our pride of birth, but how inferior are we to those who are descended from Zeus through a line of kings!

121 *Al.* Why, so does mine go back to Eurysaces, and he to Zeus!

Soc. And mine, noble Alcibiades, to Daedalus, and he to Hephaestus, son of Zeus. But, for all that, we are far inferior to them. For they are descended 'from Zeus,' through a line of kings — either kings of Argos and Lacedaemon, or kings of Persia, a country which the descendants

Alcibiades I.

SOCRATES.

of Achaemenes have always possessed, besides being at various times sovereigns of Asia, as they now are; whereas, we and our fathers were but private persons. How ridiculous would you be thought if you were to make a display of your ancestors and of Salamis the island of Eurysaces, or of Aegina, the habitation of the still more ancient Aeacus, before Artaxerxes, son of Xerxes. You should consider how inferior we are to them both in the derivation of our birth and in other particulars. Did you never observe how great is the property of the Spartan kings? And their wives are under the guardianship of the Ephori, who are public officers and watch over them, in order to preserve as far as possible the purity of the Heracleid blood. Still greater is the difference among the Persians; for no one entertains a suspicion that the father of a prince of Persia can be any one but the king. Such is the awe which invests the person of the queen, that any other guard is needless. And when the heir of the kingdom is born, all the subjects of the king feast; and the day of his birth is for ever afterwards kept as a holiday and time of sacrifice by all Asia; whereas, when you and I were born, Alcibiades, as the comic poet says, the neighbours hardly knew of the important event. After the birth of the royal child, he is tended, not by a good-for-nothing woman-nurse, but by the best of the royal eunuchs, who are charged with the care of him, and especially with the fashioning and right formation of his limbs, in order that he may be as shapely as possible; which being their calling, they are held in great honour. And when the young prince is seven years old he is put upon a horse and taken to the riding-masters, and begins to go out hunting. And at fourteen years of age he is handed over to the royal schoolmasters, as they are termed: these are four chosen men, reputed to be the best among the Persians of a certain age; and one of them is the wisest, another the justest, a third the most temperate, and a fourth the most valiant. The first instructs him in the magianism of Zoroaster, the son of Oromasus, which is the worship of 122
the Gods, and teaches him also the duties of his royal office; the second, who is the justest, teaches him always to speak the truth; the third, or most temperate, forbids him to allow

The wealth and dignity of the Spartan kings is great, but it is as nothing compared with that of the Persians.

The birth of the Persian princes is a world-famous event, and the utmost pains is taken with their education, which is entrusted to great and noble persons.

Alcibiades I.

SOCRATES.

any pleasure to be lord over him, that he may be accustomed to be a freeman and king indeed,—lord of himself first, and not a slave; the most valiant trains him to be bold and fearless, telling him that if he fears he is to deem himself a slave; whereas Pericles gave you, Alcibiades, for a tutor Zopyrus the Thracian, a slave of his who was past all other work. I might enlarge on the nurture and education of your rivals, but that would be tedious; and what I have said is a sufficient sample of what remains to be said. I have only to remark, by way of contrast, that no one cares about your birth or nurture or education, or, I may say, about that of any other Athenian, unless he has a lover who looks after him. And if you cast an eye on the wealth, the luxury, the garments with their flowing trains, the anointings with myrrh, the multitudes of attendants, and all the other bravery of the Persians, you will be ashamed when you discern your own inferiority; or if you look at the temperance and orderliness and ease and grace and magnanimity and courage and endurance and love of toil and desire of glory and ambition of the Lacedaemonians—in all these respects you will see that you are but a child in comparison of them. Even in the matter of wealth, if you value yourself upon that, I must reveal to you how you stand; for if you form an estimate of the wealth of the Lacedaemonians, you will see that our possessions fall far short of theirs. For no one here can compete with them either in the extent and fertility of their own and the Messenian territory, or in the number of their slaves, and especially of the Helots, or of their horses, or of the animals which feed on the Messenian pastures. But I have said enough of this: and as to gold and silver, there is more of them in Lacedaemon than in all the rest of Hellas, for during many generations gold has been always flowing in to them from the whole Hellenic world, and often from the barbarian also, and never going
123 out, as in the fable of Aesop the fox said to the lion, 'The prints of the feet of those going in are distinct enough;' but who ever saw the trace of money going out of Lacedaemon? and therefore you may safely infer that the inhabitants are the richest of the Hellenes in gold and silver, and that their kings are the richest of them, for they have a larger share of

When Alcibiades was born nobody knew or cared, and his education was handed over to a worn-out slave of his guardian's.

Alcibiades I.

SOCRATES.

these things, and they have also a tribute paid to them which is very considerable. Yet the Spartan wealth, though great in comparison of the wealth of the other Hellenes, is as nothing in comparison of that of the Persians and their kings. Why, I have been informed by a credible person who went up to the king [at Susa], that he passed through a large tract of excellent land, extending for nearly a day's journey, which the people of the country called the queen's girdle, and another, which they called her veil; and several other fair and fertile districts, which were reserved for the adornment of the queen, and are named after her several habiliments. Now, I cannot help thinking to myself, What if some one were to go to Amestris, the wife of Xerxes and mother of Artaxerxes, and say to her, There is a certain Dinomachè, whose whole wardrobe is not worth fifty minae — and that will be more than the value — and she has a son who is possessed of a three-hundred acre patch at Erchiae, and he has a mind to go to war with your son — would she not wonder to what this Alcibiades trusts for success in the conflict? 'He must rely,' she would say to herself, 'upon his training and wisdom — these are the things which Hellenes value.' And if she heard that this Alcibiades who is making the attempt is not as yet twenty years old, and is wholly uneducated, and when his lover tells him that he ought to get education and training first, and then go and fight the king, he refuses, and says that he is well enough as he is, would she not be amazed, and ask, 'On what, then, does the youth rely?' And if we replied: He relies on his beauty, and stature, and birth, and mental endowments, she would think that we were mad, Alcibiades, when she compared the advantages which you possess with those of her own people. And I believe that even Lampido, the daughter 124
of Leotychides, the wife of Archidamus and mother of Agis, all of whom were kings, would have the same feeling; if, in your present uneducated state, you were to turn your thoughts against her son, she too would be equally astonished. But how disgraceful, that we should not have as high a notion of what is required in us as our enemies' wives and mothers have of the qualities which are required in their assailants! O my friend, be persuaded by me, and hear the Delphian

The country called the 'queen's girdle,' the 'queen's veil,' and the like.

The queen of Persia or of Sparta, if they heard that a youth of twenty, without resources and without education, was going to attack their son or husband, would deem him mad.

inscription, 'Know thyself'—not the men whom you think, but these kings are our rivals, and we can only overcome them by pains and skill. And if you fail in the required qualities, you will fail also in becoming renowned among Hellenes and Barbarians, which you seem to desire more than any other man ever desired anything.

Al. I entirely believe you; but what are the sort of pains which are required, Socrates,—can you tell me?

I too need education; and God, who is my guardian, inspires me with the belief that I shall bring you to honour.

Soc. Yes, I can; but we must take counsel together concerning the manner in which both of us may be most improved. For what I am telling you of the necessity of education applies to myself as well as to you; and there is only one point in which I have an advantage over you.

Al. What is that?

Soc. I have a guardian who is better and wiser than your guardian, Pericles.

Al. Who is he, Socrates?

Soc. God, Alcibiades, who up to this day has not allowed me to converse with you; and he inspires in me the faith that I am especially designed to bring you to honour.

Al. You are jesting, Socrates.

Soc. Perhaps; at any rate, I am right in saying that all men greatly need pains and care, and you and I above all men.

Al. You are not far wrong about me.

Soc. And certainly not about myself.

Al. But what can we do?

Soc. There must be no hesitation or cowardice, my friend.

Al. That would not become us, Socrates.

We must take counsel together, (not about equestrian or naval affairs), but

Soc. No, indeed, and we ought to take counsel together: for do we not wish to be as good as possible?

Al. We do.

Soc. In what sort of virtue?

Al. Plainly, in the virtue of good men.

Soc. Who are good in what?

Al. Those, clearly, who are good in the management of affairs.

Soc. What sort of affairs? Equestrian affairs?

Al. Certainly not.

Alcibiades I.

SOCRATES, ALCIBIADES.

Soc. You mean that about them we should have recourse to horsemen?

Al. Yes.

Soc. Well; naval affairs?

Al. No.

Soc. You mean that we should have recourse to sailors about them?

Al. Yes.

Soc. Then what affairs? And who do them?

about the things which occupy the minds of wise men.

Al. The affairs which occupy Athenian gentlemen. 125

Soc. And when you speak of gentlemen, do you mean the wise or the unwise?

Al. The wise.

Soc. And a man is good in respect of that in which he is wise?

Al. Yes.

Soc. And evil in respect of that in which he is unwise?

Al. Certainly.

Soc. The shoemaker, for example, is wise in respect of the making of shoes?

Al. Yes.

Soc. Then he is good in that?

Al. He is.

Soc. But in respect of the making of garments he is unwise?

Al. Yes.

Soc. Then in that he is bad?

Al. Yes.

Soc. Then upon this view of the matter the same man is good and also bad?

Al. True.

Soc. But would you say that the good are the same as the bad?

Al. Certainly not.

Soc. Then whom do you call the good?

And the wise are those who take counsel for the better order and

Al. I mean by the good those who are able to rule in the city.

Soc. Not, surely, over horses?

Al. Certainly not.

Soc. But over men?

Al. Yes.

Soc. When they are sick?

Al. No.

Soc. Or on a voyage?

Al. No.

Soc. Or reaping the harvest?

Al. No.

Soc. When they are doing something or nothing?

Al. When they are doing something, I should say.

Soc. I wish that you would explain to me what this something is.

Al. When they are having dealings with one another, and using one another's services, as we citizens do in our daily life.

Soc. Those of whom you speak are ruling over men who are using the services of other men? Illustrations.

Al. Yes.

Soc. Are they ruling over the signal-men who give the time to the rowers?

Al. No; they are not.

Soc. That would be the office of the pilot?

Al. Yes.

Soc. But, perhaps you mean that they rule over flute-players who lead the singers and use the services of the dancers?

Al. Certainly not.

Soc. That would be the business of the teacher of the chorus?

Al. Yes.

Soc. Then what is the meaning of being able to rule over men who use other men?

Al. I mean that they rule over men who have common rights of citizenship, and dealings with one another.

Soc. And what sort of an art is this? Suppose that I ask you again, as I did just now, What art makes men know how to rule over their fellow-sailors,—how would you answer?

Al. The art of the pilot.

Soc. And, if I may recur to another old instance, what art enables them to rule over their fellow-singers?

Alcibiades I.

SOCRATES, ALCIBIADES.

Al. The art of the teacher of the chorus, which you were just now mentioning.

Soc. And what do you call the art of fellow-citizens?

Al. I should say, good counsel, Socrates.

Soc. And is the art of the pilot evil counsel?

Al. No.

Soc. But good counsel?

Al. Yes, that is what I should say,— good counsel, of which 126
the aim is the preservation of the voyagers.

Soc. True. And what is the aim of that other good counsel of which you speak?

Al. The aim is the better order and preservation of the city.

Soc. And what is that of which the absence or presence improves and preserves the order of the city? Suppose you were to ask me, what is that of which the presence or absence improves or preserves the order of the body? I should reply, the presence of health and the absence of disease. You would say the same?

Al. Yes.

Soc. And if you were to ask me the same question about the eyes, I should reply in the same way, 'the presence of sight and the absence of blindness;' or about the ears, I should reply, that they were improved and were in better case, when deafness was absent, and hearing was present in them.

Al. True.

And this improvement is given by friendship and agreement,

Soc. And what would you say of a state? What is that by the presence or absence of which the state is improved and better managed and ordered?

Al. I should say, Socrates:— the presence of friendship and the absence of hatred and division.

Soc. And do you mean by friendship agreement or disagreement?

Al. Agreement.

Soc. What art makes cities agree about numbers?

Al. Arithmetic.

Soc. And private individuals?

Al. The same.

Soc. And what art makes each individual agree with himself?

Al. The same.

Soc. And what art makes each of us agree with himself about the comparative length of the span and of the cubit? Does not the art of measure?

Al. Yes.

Soc. Individuals are agreed with one another about this; and states, equally?

Al. Yes.

Soc. And the same holds of the balance?

Al. True.

Soc. But what is the other agreement of which you speak, and about what? what art can give that agreement? And does that which gives it to the state give it also to the individual, so as to make him consistent with himself and with another?

Al. I should suppose so.

Soc. But what is the nature of the agreement?—answer, and faint not.

Al. I mean to say that there should be such friendship and agreement as exists between an affectionate father and mother and their son, or between brothers, or between husband and wife.

such as exists between the members of a family, however they may differ in their qualities and accomplishments.

Soc. But can a man, Alcibiades, agree with a woman about the spinning of wool, which she understands and he does not?

Al. No, truly.

Soc. Nor has he any need, for spinning is a female accomplishment.

Al. Yes.

127 *Soc.* And would a woman agree with a man about the science of arms, which she has never learned?

Al. Certainly not.

Soc. I suppose that the use of arms would be regarded by you as a male accomplishment?

Al. It would.

Soc. Then, upon your view, women and men have two sorts of knowledge?

Al. Certainly.

Soc. Then in their knowledge there is no agreement of women and men?

Al. There is not.

Alcibiades I.

SOCRATES, ALCIBIADES.

Soc. Nor can there be friendship, if friendship is agreement?

Al. Plainly not.

Soc. Then women are not loved by men when they do their own work?

Al. I suppose not.

Soc. Nor men by women when they do their own work?

Al. No.

If everybody is doing his own business, how can this promote friendship? And yet when individuals are doing each his own work, they are doing what is just.

Soc. Nor are states well administered, when individuals do their own work?

Al. I should rather think, Socrates, that the reverse is the truth [1].

Soc. What! do you mean to say that states are well administered when friendship is absent, the presence of which, as we were saying, alone secures their good order?

Al. But I should say that there is friendship among them, for this very reason, that the two parties respectively do their own work.

Soc. That was not what you were saying before; and what do you mean now by affirming that friendship exists when there is no agreement? How can there be agreement about matters which the one party knows, and of which the other is in ignorance?

Al. Impossible.

Soc. And when individuals are doing their own work, are they doing what is just or unjust?

Al. What is just, certainly.

Soc. And when individuals do what is just in the state, is there no friendship among them?

Al. I suppose that there must be, Socrates.

Soc. Then what do you mean by this friendship or agreement about which we must be wise and discreet in order that we may be good men? I cannot make out where it exists or among whom; according to you, the same persons may sometimes have it, and sometimes not.

Al. But, indeed, Socrates, I do not know what I am saying; and I have long been, unconsciously to myself, in a most disgraceful state.

Soc. Nevertheless, cheer up; at fifty, if you had discovered

[1] Cp. Rep. i. 332 foll.

Alcibiades I.

SOCRATES, ALCIBIADES.

your deficiency, you would have been too old, and the time for taking care of yourself would have passed away, but yours is just the age at which the discovery should be made.

Al. And what should he do, Socrates, who would make the discovery?

Soc. Answer questions, Alcibiades; and that is a process which, by the grace of God, if I may put any faith in my oracle, will be very improving to both of us.

The way to clear up difficulties is to answer questions. Alcibiades is willing to have recourse to this method of improvement.

Al. If I can be improved by answering, I will answer.

128 *Soc.* And first of all, that we may not peradventure be deceived by appearances, fancying, perhaps, that we are taking care of ourselves when we are not, what is the meaning of a man taking care of himself? and when does he take care? Does he take care of himself when he takes care of what belongs to him?

Al. I should think so.

Soc. When does a man take care of his feet? Does he not take care of them when he takes care of that which belongs to his feet?

Al. I do not understand.

Soc. Let me take the hand as an illustration; does not a ring belong to the finger, and to the finger only?

Al. Yes.

Soc. And the shoe in like manner to the foot?

Al. Yes.

Soc. And when we take care of our shoes, do we not take care of our feet?

Al. I do not comprehend, Socrates.

Soc. But you would admit, Alcibiades, that to take proper care of a thing is a correct expression?

Al. Yes.

Soc. And taking proper care means improving?

Al. Yes.

Soc. And what is the art which improves our shoes?

Al. Shoemaking.

Soc. Then by shoemaking we take care of our shoes?

Al. Yes.

Soc. And do we by shoemaking take care of our feet, or by some other art which improves the feet?

Al. By some other art.

Alcibiades I.

SOCRATES, ALCIBIADES.

Soc. And the same art improves the feet which improves the rest of the body?

Al. Very true.

Soc. Which is gymnastic?

Al. Certainly.

Soc. Then by gymnastic we take care of our feet, and by shoemaking of that which belongs to our feet?

Al. Very true.

Soc. And by gymnastic we take care of our hands, and by the art of graving rings of that which belongs to our hands?

Al. Yes.

Soc. And by gymnastic we take care of the body, and by the art of weaving and the other arts we take care of the things of the body?

Al. Clearly.

It has been shown by examples that a man does not take care of himself, when he only takes care of what belongs to him.

Soc. Then the art which takes care of each thing is different from that which takes care of the belongings of each thing?

Al. True.

Soc. Then in taking care of what belongs to you, you do not take care of yourself?

Al. Certainly not.

Soc. For the art which takes care of our belongings appears not to be the same as that which takes care of ourselves?

Al. Clearly not.

Soc. And now let me ask you what is the art with which we take care of ourselves?

Al. I cannot say.

Soc. At any rate, thus much has been admitted, that the art is not one which makes any of our possessions, but which makes ourselves better?

Al. True.

Soc. But should we ever have known what art makes a shoe better, if we did not know a shoe?

Al. Impossible.

Soc. Nor should we know what art makes a ring better, if we did not know a ring?

Al. That is true.

A man must know himself

Soc. And can we ever know what art makes a man better, if we do not know what we are ourselves? 129

SOCRATES, ALCIBIADES.

before he can improve himself or know what belongs to him.

Al. Impossible.

Soc. And is self-knowledge such an easy thing, and was he to be lightly esteemed who inscribed the text on the temple at Delphi? Or is self-knowledge a difficult thing, which few are able to attain?

Al. At times I fancy, Socrates, that anybody can know himself; at other times the task appears to be very difficult.

Soc. But whether easy or difficult, Alcibiades, still there is no other way; knowing what we are, we shall know how to take care of ourselves, and if we are ignorant we shall not know.

Al. That is true.

Soc. Well, then, let us see in what way the self-existent can be discovered by us; that will give us a chance of discovering our own existence, which otherwise we can never know.

Al. You say truly.

Soc. Come, now, I beseech you, tell me with whom you are conversing?— with whom but with me?

Al. Yes.

Soc. As I am, with you?

Al. Yes.

Soc. That is to say, I, Socrates, am talking?

Al. Yes.

Soc. And Alcibiades is my hearer?

Al. Yes.

Soc. And I in talking use words?

Al. Certainly.

Soc. And talking and using words have, I suppose, the same meaning?

Al. To be sure.

Soc. And the user is not the same as the thing which he uses?

Al. What do you mean?

Soc. I will explain; the shoemaker, for example, uses a square tool, and a circular tool, and other tools for cutting?

Al. Yes.

Soc. But the tool is not the same as the cutter and user of the tool?

Al. Of course not.

Alcibiades I.

SOCRATES, ALCIBIADES.

Soc. And in the same way the instrument of the harper is to be distinguished from the harper himself?

Al. It is.

Soc. Now the question which I asked was whether you conceive the user to be always different from that which he uses?

Al. I do.

Soc. Then what shall we say of the shoemaker? Does he cut with his tools only or with his hands?

Al. With his hands as well.

Soc. He uses his hands too?

Al. Yes.

Soc. And does he use his eyes in cutting leather?

Al. He does.

He is distinct from what he uses; and therefore distinct from his own body.

Soc. And we admit that the user is not the same with the things which he uses?

Al. Yes.

Soc. Then the shoemaker and the harper are to be distinguished from the hands and feet which they use?

Al. Clearly.

Soc. And does not a man use the whole body?

Al. Certainly.

Soc. And that which uses is different from that which is used?

Al. True.

Soc. Then a man is not the same as his own body?

Al. That is the inference.

Soc. What is he, then?

Al. I cannot say.

Soc. Nay, you can say that he is the user of the body.

Al. Yes.

Soc. And the user of the body is the soul? 130

Al. Yes, the soul.

Soc. And the soul rules?

Al. Yes.

Soc. Let me make an assertion which will, I think, be universally admitted.

But he must be one of three things:—

Al. What is it?

Soc. That man is one of three things.

Al. What are they?

Soc. Soul, body, or both together forming a whole.

Soul, body, or the union of the two.

Al. Certainly.

Soc. But did we not say that the actual ruling principle of the body is man?

What is the ruling principle in him? Clearly the soul.

Al. Yes, we did.

Soc. And does the body rule over itself?

Al. Certainly not.

Soc. It is subject, as we were saying?

Al. Yes.

Soc. Then that is not the principle which we are seeking?

Al. It would seem not.

Soc. But may we say that the union of the two rules over the body, and consequently that this is man?

Al. Very likely.

Soc. The most unlikely of all things; for if one of the members is subject, the two united cannot possibly rule.

Al. True.

Soc. But since neither the body, nor the union of the two, is man, either man has no real existence, or the soul is man?

Al. Just so.

Soc. Is anything more required to prove that the soul is man?

Al. Certainly not; the proof is, I think, quite sufficient.

There remains a question of absolute existence, which has not been considered by us, or rather is being considered by us when we speak of the soul.

Soc. And if the proof, although not perfect, be sufficient, we shall be satisfied;—more precise proof will be supplied when we have discovered that which we were led to omit, from a fear that the enquiry would be too much protracted.

Al. What was that?

Soc. What I meant, when I said that absolute existence must be first considered; but now, instead of absolute existence, we have been considering the nature of individual existence, and this may, perhaps, be sufficient; for surely there is nothing which may be called more properly ourselves than the soul?

Al. There is nothing.

You and I are talking soul to soul.

Soc. Then we may truly conceive that you and I are conversing with one another, soul to soul?

Al. Very true.

Soc. And that is just what I was saying before — that I, Socrates, am not arguing or talking with the face of

Alcibiades I.

SOCRATES, ALCIBIADES.

Alcibiades, but with the real Alcibiades; or in other words, with his soul.

Al. True.

Soc. Then he who bids a man know himself, would have him know his soul?

Al. That appears to be true.

But if the soul is the man, he who knows only the arts which concern man does not know himself.

Soc. He whose knowledge only extends to the body, knows the things of a man, and not the man himself? 131

Al. That is true.

Soc. Then neither the physician regarded as a physician, nor the trainer regarded as a trainer, knows himself?

Al. He does not.

Soc. The husbandmen and the other craftsmen are very far from knowing themselves, for they would seem not even to know their own belongings? When regarded in relation to the arts which they practise they are even further removed from self-knowledge, for they only know the belongings of the body, which minister to the body.

Al. That is true.

Soc. Then if temperance is the knowledge of self, in respect of his art none of them is temperate?

Al. I agree.

Soc. And this is the reason why their arts are accounted vulgar, and are not such as a good man would practise?

Al. Quite true.

Soc. Again, he who cherishes his body cherishes not himself, but what belongs to him?

Al. That is true.

Soc. But he who cherishes his money, cherishes neither himself nor his belongings, but is in a stage yet further removed from himself?

Al. I agree.

Soc. Then the money-maker has really ceased to be occupied with his own concerns?

Al. True.

The lover of the soul is the true lover.

Soc. And if any one has fallen in love with the person of Alcibiades, he loves not Alcibiades, but the belongings of Alcibiades?

Al. True.

Soc. But he who loves your soul is the true lover?

Al. That is the necessary inference.

Soc. The lover of the body goes away when the flower of youth fades?

Al. True.

He only remains and goes not away, so long as the soul of his beloved follows after virtue.

Soc. But he who loves the soul goes not away, as long as the soul follows after virtue?

Al. Yes.

Soc. And I am the lover who goes not away, but remains with you, when you are no longer young and the rest are gone?

Al. Yes, Socrates; and therein you do well, and I hope that you will remain.

Soc. Then you must try to look your best.

Al. I will.

Soc. The fact is, that there is only one lover of Alcibiades the son of Cleinias; there neither is nor ever has been seemingly any other; and he is his darling,— Socrates, the son of Sophroniscus and Phaenarete.

Al. True.

Soc. And did you not say, that if I had not spoken first, you were on the point of coming to me, and enquiring why I only remained?

Al. That is true.

And Socrates will never desert Alcibiades so long as he is not spoiled by the Athenian people.

Soc. The reason was that I loved you for your own sake, whereas other men love what belongs to you; and your
132 beauty, which is not you, is fading away, just as your true self is beginning to bloom. And I will never desert you, if you are not spoiled and deformed by the Athenian people; for the danger which I most fear is that you will become a lover of the people and will be spoiled by them. Many a noble Athenian has been ruined in this way. For the demus of the great-hearted Erechtheus is of a fair countenance, but you should see him naked; wherefore observe the caution which I give you.

Al. What caution?

Soc. Practise yourself, sweet friend, in learning what you ought to know, before you enter on politics; and then you will have an antidote which will keep you out of harm's way.

Al. Good advice, Socrates, but I wish that you would explain to me in what way I am to take care of myself.

Soc. Have we not made an advance? for we are at any

Alcibiades I.

SOCRATES, ALCIBIADES.

rate tolerably well agreed as to what we are, and there is no longer any danger, as we once feared, that we might be taking care not of ourselves, but of something which is not ourselves.

Al. That is true.

Soc. And the next step will be to take care of the soul, and look to that?

Al. Certainly.

Soc. Leaving the care of our bodies and of our properties to others?

Al. Very good.

He who would take care of himself must first of all know himself.

Soc. But how can we have a perfect knowledge of the things of the soul?— For if we know them, then I suppose we shall know ourselves. Can we really be ignorant of the excellent meaning of the Delphian inscription, of which we were just now speaking?

Al. What have you in your thoughts, Socrates?

Soc. I will tell you what I suspect to be the meaning and lesson of that inscription. Let me take an illustration from sight, which I imagine to be the only one suitable to my purpose.

Al. What do you mean?

The eye which would see itself must look into the pupil of another, which is the divinest part of the eye, and will then behold itself.

Soc. Consider; if some one were to say to the eye, 'See thyself,' as you might say to a man, 'Know thyself,' what is the nature and meaning of this precept? Would not his meaning be:— That the eye should look at that in which it would see itself?

Al. Clearly.

Soc. And what are the objects in looking at which we see ourselves?

Al. Clearly, Socrates, in looking at mirrors and the like.

Soc. Very true; and is there not something of the nature of a mirror in our own eyes?

Al. Certainly.

Soc. Did you ever observe that the face of the person looking into the eye of another is reflected as in a mirror; and in the visual organ which is over against him, and which 133
is called the pupil, there is a sort of image of the person looking?

Al. That is quite true.

Soc. Then the eye, looking at another eye, and at that in the eye which is most perfect, and which is the instrument of vision, will there see itself?

Al. That is evident.

Soc. But looking at anything else either in man or in the world, and not to what resembles this, it will not see itself?

Al. Very true.

Soc. Then if the eye is to see itself, it must look at the eye, and at that part of the eye where sight which is the virtue of the eye resides?

Al. True.

And the soul which would know herself must look especially at that part of herself in which she resembles the divine.

Soc. And if the soul, my dear Alcibiades, is ever to know herself, must she not look at the soul; and especially at that part of the soul in which her virtue resides, and to any other which is like this?

Al. I agree, Socrates.

Soc. And do we know of any part of our souls more divine than that which has to do with wisdom and knowledge?

Al. There is none.

Soc. Then this is that part of the soul which resembles the divine; and he who looks at this and at the whole class of things divine, will be most likely to know himself?

Al. Clearly.

Soc. And self-knowledge we agree to be wisdom?

Al. True.

Soc. But if we have no self-knowledge and no wisdom, can we ever know our own good and evil?

Al. How can we, Socrates?

Soc. You mean, that if you did not know Alcibiades, there would be no possibility of your knowing that what belonged to Alcibiades was really his?

Al. It would be quite impossible.

He who knows not himself and his belongings, will not know others and their belongings,

Soc. Nor should we know that we were the persons to whom anything belonged, if we did not know ourselves?

Al. How could we?

Soc. And if we did not know our own belongings, neither should we know the belongings of our belongings?

Al. Clearly not.

Soc. Then we were not altogether right in acknowledging just now that a man may know what belongs to him and yet

Alcibiades I.

SOCRATES, ALCIBIADES.

not know himself; nay, rather he cannot even know the belongings of his belongings; for the discernment of the things of self, and of the things which belong to the things of self. appear all to be the business of the same man, and of the same art.

Al. So much may be supposed.

Soc. And he who knows not the things which belong to himself, will in like manner be ignorant of the things which belong to others?

Al. Very true.

and therefore he will not know the affairs of states.

Soc. And if he knows not the affairs of others, he will not know the affairs of states?

Al. Certainly not.

Soc. Then such a man can never be a statesman?

Al. He cannot.

Soc. Nor an economist?

Al. He cannot.

Soc. He will not know what he is doing? 134

Al. He will not.

Soc. And will not he who is ignorant fall into error?

Al. Assuredly.

And, if he knows not what he is doing, he will be miserable and will make others miserable.

Soc. And if he falls into error will he not fail both in his public and private capacity?

Al. Yes, indeed.

Soc. And failing, will he not be miserable?

Al. Very.

Soc. And what will become of those for whom he is acting?

Al. They will be miserable also.

Soc. Then he who is not wise and good cannot be happy?

Al. He cannot.

Soc. The bad, then, are miserable?

Al. Yes, very.

Soc. And if so, not he who has riches, but he who has wisdom, is delivered from his misery?

Al. Clearly.

Soc. Cities, then, if they are to be happy, do not want walls, or triremes, or docks, or numbers, or size, Alcibiades, without virtue[1]?

[1] Cp. Arist. Pol. vii. 1. § 5.

SOCRATES, ALCIBIADES.

Al. Indeed they do not.

Soc. And you must give the citizens virtue, if you mean to administer their affairs rightly or nobly?

He must give the citizens wisdom and justice, and he cannot give what he has not got.

Al. Certainly.

Soc. But can a man give that which he has not?

Al. Impossible.

Soc. Then you or any one who means to govern and superintend, not only himself and the things of himself, but the state and the things of the state, must in the first place acquire virtue.

Al. That is true.

Soc. You have not therefore to obtain power or authority, in order to enable you to do what you wish for yourself and the state, but justice and wisdom.

Al. Clearly.

If he acts wisely and justly he will act according to the will of God.

Soc. You and the state, if you act wisely and justly, will act according to the will of God?

Al. Certainly.

Soc. As I was saying before, you will look only at what is bright and divine, and act with a view to them?

Al. Yes.

In the mirror of the divine he will see his own good and will act rightly and be happy.

Soc. In that mirror you will see and know yourselves and your own good?

Al. Yes.

Soc. And so you will act rightly and well?

Al. Yes.

Soc. In which case, I will be security for your happiness.

Al. I accept the security.

Soc. But if you act unrighteously, your eye will turn to the dark and godless, and being in darkness and ignorance of yourselves, you will probably do deeds of darkness.

Al. Very possibly.

Soc. For if a man, my dear Alcibiades, has the power to do what he likes, but has no understanding, what is likely to
135 be the result, either to him as an individual or to the state — for example, if he be sick and is able to do what he likes, not having the mind of a physician — having moreover tyrannical power, and no one daring to reprove him, what will happen to him? Will he not be likely to have his constitution ruined?

Alcibiades I.

SOCRATES, ALCIBIADES.

Al. That is true.

Soc. Or again, in a ship, if a man having the power to do what he likes, has no intelligence or skill in navigation, do you see what will happen to him and to his fellow-sailors?

Al. Yes; I see that they will all perish.

Soc. And in like manner, in a state, and where there is any power and authority which is wanting in virtue, will not misfortune, in like manner, ensue?

Al. Certainly.

Not power, but virtue, should be the aim both of individuals and of states: and he only is a freeman who has virtue.

Soc. Not tyrannical power, then, my good Alcibiades, should be the aim either of individuals or states, if they would be happy, but virtue.

Al. That is true.

Soc. And before they have virtue, to be commanded by a superior is better for men as well as for children[1]?

Al. That is evident.

Soc. And that which is better is also nobler?

Al. True.

Soc. And what is nobler is more becoming?

Al. Certainly.

Soc. Then to the bad man slavery is more becoming, because better?

Al. True.

Soc. Then vice is only suited to a slave?

Al. Yes.

Soc. And virtue to a freeman?

Al. Yes.

Soc. And, O my friend, is not the condition of a slave to be avoided?

Al. Certainly, Socrates.

Soc. And are you now conscious of your own state? And do you know whether you are a freeman or not?

Al. I think that I am very conscious indeed of my own state.

Soc. And do you know how to escape out of a state which I do not even like to name to my beauty?

Al. Yes, I do.

Soc. How?

Al. By your help, Socrates.

[1] Cp. Arist. Pol. i. 5. § 7.

Soc. That is not well said, Alcibiades.

Al. What ought I to have said?

Soc. By the help of God.

Al. I agree; and I further say, that our relations are likely to be reversed. From this day forward, I must and will follow you as you have followed me; I will be the disciple, and you shall be my master.

Soc. O that is rare! My love breeds another love: and so like the stork I shall be cherished by the bird whom I have hatched.

Al. Strange, but true; and henceforward I shall begin to think about justice.

Soc. And I hope that you will persist; although I have fears, not because I doubt you; but I see the power of the state, which may be too much for both of us.

MENEXENUS.

INTRODUCTION.

THE Menexenus has more the character of a rhetorical exercise than any other of the Platonic works. The writer seems to have wished to emulate Thucydides, and the far slighter work of Lysias. In his rivalry with the latter, to whom in the Phaedrus Plato shows a strong antipathy, he is entirely successful, but he is not equal to Thucydides. The Menexenus, though not without real Hellenic interest, falls very far short of the rugged grandeur and political insight of the great historian. The fiction of the speech having been invented by Aspasia is well sustained, and is in the manner of Plato, notwithstanding the anachronism which puts into her mouth an allusion to the peace of Antalcidas, an event occurring forty years after the date of the supposed oration. But Plato, like Shakespeare, is careless of such anachronisms, which are not supposed to strike the mind of the reader. The effect produced by these grandiloquent orations on Socrates, who does not recover after having heard one of them for three days and more, is truly Platonic.

Such discourses, if we may form a judgment from the three which are extant (for the so-called Funeral Oration of Demosthenes is a bad and spurious imitation of Thucydides and Lysias), conformed to a regular type. They began with Gods and ancestors, and the legendary history of Athens, to which succeeded an almost equally fictitious account of later times. The Persian war usually formed the centre of the narrative; in the age of Isocrates and Demosthenes the Athenians were still living on the glories of Marathon and Salamis. The Menexenus veils in panegyric the weak places of Athenian history. The war of Athens and Boeotia is a war of liberation; the Athenians gave back the Spartans taken at Sphacteria out of kindness — indeed, the only fault of the city was too great kindness to their enemies, who were more honoured than the friends of others (cp. Thucyd. ii. 41, which seems to contain the

Menexenus. INTRODUCTION.

germ of the idea); we democrats are the aristocracy of virtue, and the like. These are the platitudes and falsehoods in which history is disguised. The taking of Athens is hardly mentioned.

The author of the Menexenus, whether Plato or not, is evidently intending to ridicule the practice, and at the same time to show that he can beat the rhetoricians in their own line, as in the Phaedrus he may be supposed to offer an example of what Lysias might have said, and of how much better he might have written in his own style. The orators had recourse to their favourite *loci communes*, one of which, as we find in Lysias, was the shortness of the time allowed them for preparation. But Socrates points out that they had them always ready for delivery, and that there was no difficulty in improvising any number of such orations. To praise the Athenians among the Athenians was easy,— to praise them among the Lacedaemonians would have been a much more difficult task. Socrates himself has turned rhetorician, having learned of a woman, Aspasia, the mistress of Pericles; and any one whose teachers had been far inferior to his own — say, one who had learned from Antiphon the Rhamnusian —would be quite equal to the task of praising men to themselves. When we remember that Antiphon is described by Thucydides as the best pleader of his day, the satire on him and on the whole tribe of rhetoricians is transparent.

The ironical assumption of Socrates, that he must be a good orator because he had learnt of Aspasia, is not coarse, as Schleiermacher supposes, but is rather to be regarded as fanciful. Nor can we say that the offer of Socrates to dance naked out of love for Menexenus, is any more un-Platonic than the threat of physical force which Phaedrus uses towards Socrates (286 C). Nor is there any real vulgarity in the fear which Socrates expresses that he will get a beating from his mistress, Aspasia: this is the natural exaggeration of what might be expected from an imperious woman. Socrates is not to be taken seriously in all that he says, and Plato, both in the Symposium and elsewhere, is not slow to admit a sort of Aristophanic humour. How a great original genius like Plato might or might not have written, what was his conception of humour, or what limits he would have prescribed to himself, if any, in drawing the picture of the Silenus Socrates, are problems which no critical instinct can determine.

On the other hand, the dialogue has several Platonic traits, whether original or imitated may be uncertain. Socrates, when he departs from his character of a 'know nothing' and delivers a speech, generally pretends that what he is speaking is not his own composition. Thus in the Cratylus he is run away with (410 E); in the Phaedrus he has heard somebody say something (235 C)—is inspired by the *genius loci* (238 D); in the Symposium he derives his wisdom from Diotima of Mantinea, and the like. But he does not impose on Menexenus by his dissimulation. Without violating the character of Socrates, Plato, who knows so well how to give a hint, or some one writing in his name, intimates clearly enough that the speech in the Menexenus like that in the Phaedrus is to be attributed to Socrates. The address of the dead to the living at the end of the oration may also be compared to the numerous addresses of the same kind which occur in Plato, in whom the dramatic element is always tending to prevail over the rhetorical. The remark has been often made, that in the Funeral Oration of Thucydides there is no allusion to the existence of the dead. But in the Menexenus a future state is clearly, although not strongly, asserted.

Whether the Menexenus is a genuine writing of Plato, or an imitation only, remains uncertain. In either case, the thoughts are partly borrowed from the Funeral Oration of Thucydides; and the fact that they are so, is not in favour of the genuineness of the work. Internal evidence seems to leave the question of authorship in doubt. There are merits and there are defects which might lead to either conclusion. The form of the greater part of the work makes the enquiry difficult; the introduction and the finale certainly wear the look either of Plato or of an extremely skilful imitator. The excellence of the forgery may be fairly adduced as an argument that it is not a forgery at all. In this uncertainty the express testimony of Aristotle, who quotes, in the Rhetoric,[1] the well-known words, 'It is easy to praise the Athenians among the Athenians,' from the Funeral Oration, may perhaps turn the balance in its favour. It must be remembered also that the work was famous in antiquity, and is included in the Alexandrian catalogues of Platonic writings.

[1] i. 9, 30; iii. 14, 11.

MENEXENUS.

PERSONS OF THE DIALOGUE.

SOCRATES and MENEXENUS.

Steph. 234 *Socrates.* WHENCE come you, Menexenus? Are you from the Agora?

Menexenus. Yes, Socrates; I have been at the Council.

Menexenus. SOCRATES, MENEXENUS.

Soc. And what might you be doing at the Council? And yet I need hardly ask, for I see that you, believing yourself to have arrived at the end of education and of philosophy, and to have had enough of them, are mounting upwards to things higher still, and, though rather young for the post, are intending to govern us elder men, like the rest of your family, which has always provided some one who kindly took care of us.

Men. Yes, Socrates, I shall be ready to hold office, if you allow and advise that I should, but not if you think otherwise. I went to the council chamber because I heard that the Council was about to choose some one who was to speak over the dead. For you know that there is to be a public funeral?

Soc. Yes, I know. And whom did they choose?

Men. No one; they delayed the election until to-morrow, but I believe that either Archinus or Dion will be chosen.

The gain of dying in battle.

Soc. O Menexenus! death in battle is certainly in many respects a noble thing. The dead man gets a fine and costly funeral, although he may have been poor, and an elaborate speech is made over him by a wise man who has long ago prepared what he has to say, although he who is praised may not have been good for much. The speakers praise him for what he has done and for what he has not done — that is the

Menexenus.

SOCRATES, MENEXENUS.

The effect upon Socrates of panegyrical oratory.

beauty of them — and they steal away our souls with their embellished words; in every conceivable form they praise 235
the city; and they praise those who died in war, and all our ancestors who went before us; and they praise ourselves also who are still alive, until I feel quite elevated by their laudations, and I stand listening to their words, Menexenus, and become enchanted by them, and all in a moment I imagine myself to have become a greater and nobler and finer man than I was before. And if, as often happens, there are any foreigners who accompany me to the speech, I become suddenly conscious of having a sort of triumph over them, and they seem to experience a corresponding feeling of admiration at me, and at the greatness of the city, which appears to them, when they are under the influence of the speaker, more wonderful than ever. This consciousness of dignity lasts me more than three days, and not until the fourth or fifth day do I come to my senses and know where I am; in the meantime I have been living in the Islands of the Blest. Such is the art of our rhetoricians, and in such manner does the sound of their words keep ringing in my ears.

Socrates always making fun of the rhetoricians.

Men. You are always making fun of the rhetoricians, Socrates; this time, however, I am inclined to think that the speaker who is chosen will not have much to say, for he has been called upon to speak at a moment's notice, and he will be compelled almost to improvise.

Soc. But why, my friend, should he not have plenty to say? Every rhetorician has speeches ready made; nor is there any difficulty in improvising that sort of stuff. Had the orator to praise Athenians among Peloponnesians, or Peloponnesians among Athenians, he would be a good rhetorician who could succeed and gain credit. But there is no difficulty in a man's winning applause when he is contending for fame among the persons whom he is praising.

Men. Do you think not, Socrates?

Soc. Certainly 'not.'

Could Socrates himself make a funeral oration?

Men. Do you think that you could speak yourself if there should be a necessity, and if the Council were to choose you?

Soc. That I should be able to speak is no great wonder, Menexenus, considering that I have an excellent mistress in the art of rhetoric,— she who has made so many good

speakers, and one who was the best among all the Hellenes — Pericles, the son of Xanthippus.

SOCRATES, MENEXENUS.

Men. And who is she? I suppose that you mean Aspasia.

Yes; for he is a pupil of Aspasia.

Soc. Yes, I do; and besides her I had Connus, the son of
236 Metrobius, as a master, and he was my master in music, as she was in rhetoric. No wonder that a man who has received such an education should be a finished speaker; even the pupil of very inferior masters, say, for example, one who had learned music of Lamprus, and rhetoric of Antiphon the Rhamnusian, might make a figure if he were to praise the Athenians among the Athenians.

Men. And what would you be able to say if you had to speak?

The funeral oration composed by Aspasia.

Soc. Of my own wit, most likely nothing; but yesterday I heard Aspasia composing a funeral oration about these very dead. For she had been told, as you were saying, that the Athenians were going to choose a speaker, and she repeated to me the sort of speech which he should deliver, partly improvising and partly from previous thought, putting together fragments of the funeral oration which Pericles spoke, but which, as I believe, she composed.

Men. And can you remember what Aspasia said?

Soc. I ought to be able, for she taught me, and she was ready to strike me because I was always forgetting.

Men. Then why will you not rehearse what she said?

Soc. Because I am afraid that my mistress may be angry with me if I publish her speech.

Men. Nay, Socrates, let us have the speech, whether Aspasia's or any one else's, no matter. I hope that you will oblige me.

Soc. But I am afraid that you will laugh at me if I continue the games of youth in old age.

Men. Far otherwise, Socrates; let us by all means have the speech.

Soc. Truly I have such a disposition to oblige you, that if you bid me dance naked I should not like to refuse, since we are alone. Listen then: If I remember rightly, she began as follows, with the mention of the dead[1]:—

There is a tribute of deeds and of words. The departed

[1] Thucyd. ii. 35–46.

Menexenus. have already had the first, when going forth on their destined
SOCRATES. journey they were attended on their way by the state and by their friends; the tribute of words remains to be given to them, as is meet and by law ordained. For noble words are a memorial and a crown of noble actions, which are given to the doers of them by the hearers. A word is needed which will duly praise the dead and gently admonish the living, exhorting the brethren and descendants of the departed to imitate their virtue, and consoling their fathers and mothers and the survivors, if any, who may chance to be alive of the 237
previous generation. What sort of a word will this be, and how shall we rightly begin the praises of these brave men? In their life they rejoiced their own friends with their valour, and their death they gave in exchange for the salvation of the living. And I think that we should praise them in the order in which nature made them good, for they were good because they were sprung from good fathers. Wherefore let us first of all praise the goodness of their birth; secondly, their nurture and education; and then let us set forth how noble their actions were, and how worthy of the education which they had received.

The departed were the children of the soil;

And first as to their birth. Their ancestors were not strangers, nor are these their descendants sojourners only, whose fathers have come from another country; but they are the children of the soil, dwelling and living in their own land. And the country which brought them up is not like other countries, a stepmother to her children, but their own true mother; she bore them and nourished them and received them, and in her bosom they now repose. It is meet and right, therefore, that we should begin by praising the land which is their mother, and that will be a way of praising their noble birth.

and their country is dear to the Gods, who contended for the possession of her.

The country is worthy to be praised, not only by us, but by all mankind; first, and above all, as being dear to the Gods. This is proved by the strife and contention of the Gods respecting her. And ought not the country which the Gods praise to be praised by all mankind? The second praise which may be fairly claimed by her, is that at the time when the whole earth was sending forth and creating diverse animals, tame and wild, she our mother was free and

pure from savage monsters, and out of all animals selected and brought forth man, who is superior to the rest in understanding, and alone has justice and religion. And a great proof that she brought forth the common ancestors of us and of the departed, is that she provided the means of support for her offspring For as a woman proves her motherhood by giving milk to her young ones (and she who has no fountain of milk is not a mother), so did this our land prove that she was the mother of men, for in those days she alone and first of all brought forth wheat and barley for human
238 food, which is the best and noblest sustenance for man, whom she regarded as her true offspring. And these are truer proofs of motherhood in a country than in a woman, for the woman in her conception and generation is but the imitation of the earth, and not the earth of the woman. And of the fruit of the earth she gave a plenteous supply, not only to her own, but to others also; and afterwards she made the olive to spring up to be a boon to her children, and to help them in their toils. And when she had herself nursed them and brought them up to manhood, she gave them Gods to be their rulers and teachers, whose names are well known, and need not now be repeated. They are the Gods who first ordered our lives, and instructed us in the arts for the supply of our daily needs, and taught us the acquisition and use of arms for the defence of the country.

Menexenus.

SOCRATES.

She first brought forth man, and proved her true motherhood by providing food for her own offspring.

The Gods were the rulers of primitive men, and gave them arts.

Thus born into the world and thus educated, the ancestors of the departed lived and made themselves a government, which I ought briefly to commemorate. For government is the nurture of man, and the government of good men is good, and of bad men bad. And I must show that our ancestors were trained under a good government, and for this reason they were good, and our contemporaries are also good, among whom our departed friends are to be reckoned. Then as now, and indeed always, from that time to this, speaking generally, our government was an aristocracy — a form of government which receives various names, according to the fancies of men, and is sometimes called democracy, but is really an aristocracy or government of the best which has the approval of the many. For kings we have always had, first hereditary and then elected, and authority is mostly in the

We have a good government, which is sometimes called a democracy, but is really an aristocracy, for the best rule with the consent of the many.

Menexenus. hands of the people, who dispense offices and power to those

SOCRATES. who appear to be most deserving of them. Neither is a man rejected from weakness or poverty or obscurity of origin, nor honoured by reason of the opposite, as in other states, but there is one principle — he who appears to be wise and good is a governor and ruler. The basis of this our government is equality of birth; for other states are made up of all sorts and unequal conditions of men, and therefore their governments are unequal; there are tyrannies and there are oligarchies, in which the one party are slaves and the other masters. But we and our citizens are brethren, the children all of one 239
mother, and we do not think it right to be one another's masters or servants; but the natural equality of birth compels us to seek for legal equality, and to recognize no superiority except in the reputation of virtue and wisdom.

The principle of our government is equality; the only superiority is that of virtue and wisdom.

And so their and our fathers, and these, too, our brethren, being nobly born and having been brought up in all freedom, did both in their public and private capacity many noble deeds famous over the whole world. They were the deeds of men who thought that they ought to fight both against Hellenes for the sake of Hellenes on behalf of freedom, and against barbarians in the common interest of Hellas. Time would fail me to tell of their defence of their country against the invasion of Eumolpus and the Amazons, or of their defence of the Argives against the Cadmeians, or of the Heracleids against the Argives; besides, the poets have already declared in song to all mankind their glory, and therefore any commemoration of their deeds in prose which we might attempt would hold a second place. They already have their reward, and I say no more of them; but there are other worthy deeds of which no poet has worthily sung, and which are still wooing the poet's muse. Of these I am bound to make honourable mention, and shall invoke others to sing of them also in lyric and other strains, in a manner becoming the actors. And first I will tell how the Persians, lords of Asia, were enslaving Europe, and how the children of this land, who were our fathers, held them back. Of these I will speak first, and praise their valour, as is meet and fitting. He who would rightly estimate them should place himself in thought at that time, when the whole of Asia was subject to the third king of

The greatness of Persia.

Menexenus. SOCRATES.

Persia. The first king, Cyrus, by his valour freed the Persians, who were his countrymen, and subjected the Medes, who were their lords, and he ruled over the rest of Asia, as far as Egypt; and after him came his son, who ruled all the accessible part of Egypt and Libya; the third king was Darius, who extended the land boundaries of the empire to
240 Scythia, and with his fleet held the sea and the islands. None presumed to be his equal; the minds of all men were enthralled by him — so many and mighty and warlike nations had the power of Persia subdued. Now Darius had a quarrel against us and the Eretrians, because, as he said, we had conspired against Sardis, and he sent 500,000 men in transports and vessels of war, and 300 ships, and Datis as commander, telling him to bring the Eretrians and Athenians to the king, if he wished to keep his head on his shoulders. He sailed against the Eretrians, who were reputed to be amongst the noblest and most warlike of the Hellenes of that day, and they were numerous, but he conquered them all in three days; and when he had conquered them, in order that no one might escape, he searched the whole country after this manner: his soldiers, coming to the borders of Eretria and spreading from sea to sea, joined hands and passed through the whole country, in order that they might be able to tell the king that no one had escaped them. And from Eretria they went to Marathon with a like intention, expecting to bind the Athenians in the same yoke of necessity in which they had bound the Eretrians. Having effected one-half of their purpose, they were in the act of attempting the other, and none of the Hellenes dared to assist either the Eretrians or the Athenians, except the Lacedaemonians, and they arrived a day too late for the battle; but the rest were panic-stricken and kept quiet, too happy in having escaped for a time. He who has present to his mind that conflict will know what manner of men they were who received the onset of the barbarians at Marathon, and chastened the pride of the whole of Asia, and by the victory which they gained over the barbarians first taught other men that the power of the Persians was not invincible, but that hosts of men and the multitude of riches alike yield to valour. And I assert that those men are the fathers not only of ourselves, but of our liberties and of the liberties of

Yet at Marathon the army of Darius was overcome by the Athenians almost single-handed.

Menexenus.

SOCRATES.

all who are on the continent, for that was the action to which the Hellenes looked back when they ventured to fight for their own safety in the battles which ensued: they became disciples of the men of Marathon. To them, therefore, I assign in my speech the first place, and the second to those 241 who fought and conquered in the sea fights at Salamis and Artemisium; for of them, too, one might have many things to say — of the assaults which they endured by sea and land, and how they repelled them. I will mention only that act of theirs which appears to me to be the noblest, and which followed that of Marathon and came nearest to it; for the men of Marathon only showed the Hellenes that it was possible to ward off the barbarians by land, the many by the few; but there was no proof that they could be defeated by ships, and at sea the Persians retained the reputation of being invincible in numbers and wealth and skill and strength. This is the glory of the men who fought at sea, that they dispelled the second terror which had hitherto possessed the Hellenes, and so made the fear of numbers, whether of ships or men, to cease among them. And so the soldiers of Marathon and the sailors of Salamis became the schoolmasters of Hellas; the one teaching and habituating the Hellenes not to fear the barbarians at sea, and the others not to fear them by land. Third in order, for the number and valour of the combatants, and third in the salvation of Hellas, I place the battle of Plataea. And now the Lacedaemonians as well as the Athenians took part in the struggle; they were all united in this greatest and most terrible conflict of all; wherefore their virtues will be celebrated in times to come, as they are now celebrated by us. But at a later period many Hellenic tribes were still on the side of the barbarians, and there was a report that the great king was going to make a new attempt upon the Hellenes, and therefore justice requires that we should also make mention of those who crowned the previous work of our salvation, and drove and purged away all barbarians from the sea. These were the men who fought by sea at the river Eurymedon, and who went on the expedition to Cyprus, and who sailed to Egypt and divers other places; and they should be gratefully remembered by us, because they compelled the king in fear for himself to

The men of Marathon should have the first place: those who followed in the war were their disciples, except the men who defeated the Persians at Salamis and first made proof of them at sea; these have the second place.

And the third place is to be assigned to those who fought at Plataea.

Eurymedon; Cyprus; Egypt.

look to his own safety instead of plotting the destruction of Hellas. *Menexenus.* SOCRATES.

242 And so the war against the barbarians was fought out to the end by the whole city on their own behalf, and on behalf of their countrymen. There was peace, and our city was held in honour; and then, as prosperity makes men jealous, there succeeded a jealousy of her, and jealousy begat envy, and so she became engaged against her will in a war with the Hellenes. On the breaking out of war, our citizens met the Lacedaemonians at Tanagra, and fought for the freedom of the Boeotians; the issue was doubtful, and was decided by the engagement which followed. For when the Lacedaemonians had gone on their way, leaving the Boeotians, whom they were aiding, on the third day after the battle of Tanagra, our countrymen conquered at Oenophyta, and righteously restored those who had been unrighteously exiled. And they were the first after the Persian war who fought on behalf of liberty in aid of Hellenes against Hellenes; they were brave men, and freed those whom they aided, and were the first too who were honourably interred in this sepulchre by the state. Afterwards there was a mighty war, in which all the Hellenes joined, and devastated our country, which was very ungrateful of them; and our countrymen, after defeating them in a naval engagement and taking their leaders, the Spartans, at Sphagia, when they might have destroyed them, spared their lives, and gave them back, and made peace, considering that they should war with their fellow-countrymen only until they gained a victory over them, and not because of the private anger of the state destroy the common interest of Hellas; but that with barbarians they should war to the death. Worthy of praise are they also who waged this war, and are here interred; for they proved, if any one doubted the superior prowess of the Athenians in the former war with the barbarians, that their doubts had no foundation — showing by their victory in the civil war with Hellas, in which they subdued the other chief state of the Hellenes, that they could conquer single-handed those with whom they had been allied in the war against the barbarians. After the peace there followed a third war, which was of a terrible and desperate nature, and in this many brave men who are here interred lost their lives — many of them had

Tanagra; Oenophyta.

Sphacteria.

The Sicilian expedition.

Menexenus. SOCRATES. won victories in Sicily, whither they had gone over the seas to fight for the liberties of the Leontines, to whom they were bound by oaths; but, owing to the distance, the city was unable to help them, and they lost heart and came to misfortune; of whom their very enemies give a higher praise for temperance and valour than friends do of most other men. Many also fell in naval engagements at the Hellespont, after having in one day taken all the ships of the enemy, and defeated them in other naval engagements. And what I call the terrible and desperate nature of the war, is that the other Hellenes, in their extreme animosity towards the city, should have entered into negotiations with their bitterest enemy, the king of Persia, whom they, together with us, had expelled;— him, without us, they again brought back, barbarian against Hellenes, and all the hosts, both of Hellenes and barbarians, were united against Athens. And then shone forth the power and valour of our city. Her enemies had supposed that she was exhausted by the war, and our ships were blockaded at Mitylene. But the citizens themselves embarked, and came to the rescue with sixty other ships, and their valour was confessed of all men, for they conquered their enemies and delivered their friends. And yet by some evil fortune they were left to perish at sea, and therefore are [1] not interred here. Ever to be remembered and honoured are they, for by their valour not only that sea-fight was won for us, but the entire war was decided by them, and through them the city gained the reputation of being invincible, even though attacked by all mankind. And that reputation was a true one, for the defeat which came upon us was our own doing. We were never conquered by others, and to this day we are still unconquered by them; but we were our own conquerors, and received defeat at our own hands. Afterwards there was quiet and peace abroad, but there sprang up war at home; and, if men are destined to have civil war, no one could have desired that his city should take the disorder in a milder form. How joyful and natural was the reconciliation of those who came from the Piraeus and those who came from the city; with what moderation did they order the war against the tyrants in Eleusis, and in a manner how unlike what the other

243

Cyzicus.

Hellas betrayed to the Persian.

Arginusae.

The taking of the city is obscurely intimated.

The great reconciliation of kindred.

[1] Reading *οὐ κεῖνται*, or taking *οὐκ* before *ἀναιρεθέντες* with *κεῖνται*.

244 Hellenes expected! And the reason of this gentleness was the veritable tie of blood, which created among them a friendship as of kinsmen, faithful not in word only, but in deed. And we ought also to remember those who then fell by one another's hands, and on such occasions as these to reconcile them with sacrifices and prayers, praying to those who have power over them, that they may be reconciled even as we are reconciled. For they did not attack one another out of malice or enmity, but they were unfortunate. And that such was the fact we ourselves are witnesses, who are of the same race with them, and have mutually received and granted forgiveness of what we have done and suffered. After this there was perfect peace, and the city had rest; and her feeling was that she forgave the barbarians, who had severely suffered at her hands and severely retaliated, but that she was indignant at the ingratitude of the Hellenes, when she remembered how they had received good from her and returned evil, having made common cause with the barbarians, depriving her of the ships which had once been their salvation, and dismantling our walls, which had preserved their own from falling. She thought that she would no longer defend the Hellenes, when enslaved either by one another or by the barbarians, and did accordingly. This was our feeling, while the Lacedaemonians were thinking that we who were the champions of liberty had fallen, and that their business was to subject the remaining Hellenes. And why should I say more? for the events of which I am speaking happened not long ago and we can all of us remember how the chief peoples of Hellas, Argives and Boeotians and Corinthians, came to feel the need of us, and, what is the greatest miracle of all, the Persian king himself was driven to such extremity as to come round to the opinion, that from this city, of which he was the destroyer, and from no other, his salvation would proceed.

Menexenus. SOCRATES.

Change in the relation of the Athenians (1) to the other Hellenes; (2) to the Persian king.

And if a person desired to bring a deserved accusation against our city, he would find only one charge which he could justly urge — that she was too compassionate and too favourable to the weaker side. And in this instance she was not able to hold out or keep her resolution of refusing aid to
245 her injurers when they were being enslaved, but she was softened, and did in fact send out aid, and delivered the

Menexenus. Hellenes from slavery, and they were free until they after-
SOCRATES. wards enslaved themselves. Whereas, to the great king she refused to give the assistance of the state, for she could not forget the trophies of Marathon and Salamis and Plataea; but she allowed exiles and volunteers to assist him, and they were his salvation. And she herself, when she was compelled, entered into the war, and built walls and ships, and fought with the Lacedaemonians on behalf of the Parians. Now the king fearing this city and wanting to stand aloof, when he saw the Lacedaemonians growing weary of the war at sea, asked of us, as the price of his alliance with us and the other allies, to give up the Hellenes in Asia, whom the Lacedaemonians had previously handed over to him, he thinking that we should refuse, and that then he might have a pretence for withdrawing from us. About the other allies he was mistaken, for the Corinthians and Argives and Boeotians, and the other states, were quite willing to let them go, and swore and covenanted, that, if he would pay them money, they would make over to him the Hellenes of the continent, and we alone refused to give them up and swear. Such was the natural nobility of this city, so sound and healthy was the spirit of freedom among us, and the instinctive dislike of the barbarian, because we are pure Hellenes, having no admixture of barbarism in us. For we are not like many others, descendants of Pelops or Cadmus or Egyptus or Danaus, who are by nature barbarians, and yet pass for Hellenes, and dwell in the midst of us; but we are pure Hellenes, uncontaminated by any foreign element, and therefore the hatred of the foreigner has passed unadulterated into the life-blood of the city. And so, notwithstanding our noble sentiments, we were again isolated, because we were unwilling to be guilty of the base and unholy act of giving up Hellenes to barbarians. And we were in the same case as when we were subdued before: but, by the favour of Heaven, we managed better, for we ended the war without the loss of our ships or walls or colonies; the enemy was only too glad to be quit of us. Yet in this war we lost many brave men, such as were those who fell owing to the ruggedness of the ground at the battle of Corinth, or by treason at Lechaeum. Brave men, too, were those who

delivered the Persian king, and drove the Lacedaemonians *Menexenus.*
246 from the sea. I remind you of them, and you must SOCRATES.
celebrate them together with me, and do honour to their memories.

Such were the actions of the men who are here interred, and of others who have died on behalf of their country; many and glorious things I have spoken of them, and there are yet many more and more glorious things remaining to be told — many days and nights would not suffice to tell of them. Let them not be forgotten, and let every man remind their descendants that they also are soldiers who must not desert the ranks of their ancestors, or from cowardice fall behind. Even as I exhort you this day, and in all future time, whenever I meet with any of you, shall continue to remind and exhort you, O ye sons of heroes, that you strive to be the bravest of men. And I think that I ought now to repeat what your fathers desired to have said to you who are their survivors, when they went out to battle, in case anything happened to them. I will tell you what I heard them say, and what, if they had only speech, they would fain be saying, judging from what they then said. And you must imagine that you hear them saying what I now repeat to you:—

'Sons, the event proves that your fathers were brave men; for we might have lived dishonourably, but have preferred to die honourably rather than bring you and your children into disgrace, and rather than dishonour our own fathers and forefathers; considering that life is not life to one who is a dishonour to his race, and that to such a one neither men nor Gods are friendly, either while he is on the earth or after death in the world below. Remember our words, then, and whatever is your aim let virtue be the condition of the attainment of your aim, and know that without this all possessions and pursuits are dishonourable and evil. For neither does wealth bring honour to the owner, if he be a coward; of such a one the wealth belongs to another, and not to himself. Nor does beauty and strength of body, when dwelling in a base and cowardly man, appear comely, but the reverse of comely, making the possessor more conspicuous, and manifesting forth his cowardice. And all

Menexenus. knowledge, when separated from justice and virtue, is seen
SOCRATES. to be cunning and not wisdom; wherefore make this your first and last and constant and all-absorbing aim, to exceed, 247
if possible, not only us but all your ancestors in virtue; and know that to excel you in virtue only brings us shame, but that to be excelled by you is a source of happiness to us. And we shall most likely be defeated, and you will most likely be victors in the contest, if you learn so to order your lives as not to abuse or waste the reputation of your ancestors, knowing that to a man who has any self-respect, nothing is more dishonourable than to be honoured, not for his own sake, but on account of the reputation of his ancestors. The honour of parents is a fair and noble treasure to their posterity, but to have the use of a treasure of wealth and honour, and to leave none to your successors, because you have neither money nor reputation of your own, is alike base and dishonourable. And if you follow our precepts you will be received by us as friends, when the hour of destiny brings you hither; but if you neglect our words and are disgraced in your lives, no one will welcome or receive you. This is the message which is to be delivered to our children.

'Some of us have fathers and mothers still living, and we would urge them, if, as is likely, we shall die, to bear the calamity as lightly as possible, and not to condole with one another; for they have sorrows enough, and will not need any one to stir them up. While we gently heal their wounds, let us remind them that the Gods have heard the chief part of their prayers; for they prayed, not that their children might live for ever, but that they might be brave and renowned. And this, which is the greatest good, they have attained. A mortal man cannot expect to have everything in his own life turning out according to his will; and they, if they bear their misfortunes bravely, will be truly deemed brave fathers of the brave. But if they give way to their sorrows, either they will be suspected of not being our parents, or we of not being such as our panegyrists declare. Let not either of the two alternatives happen, but rather let them be our chief and true panegyrists, who show in their lives that they are true men, and had men for their sons.

Of old the saying, "Nothing too much," appeared to be, and really was, well said. For he whose happiness rests with *Menexenus.* SOCRATES.
248 himself, if possible, wholly, and if not, as far as is possible, — who is not hanging in suspense on other men, or changing with the vicissitude of their fortune,— has his life ordered for the best. He is the temperate and valiant and wise; and when his riches come and go, when his children are given and taken away, he will remember the proverb —"Neither rejoicing overmuch nor grieving overmuch," for he relies upon himself. And such we would have our parents to be — that is our word and wish, and as such we now offer ourselves, neither lamenting overmuch, nor fearing overmuch, if we are to die at this time. And we entreat our fathers and mothers to retain these feelings throughout their future life, and to be assured that they will not please us by sorrowing and lamenting over us. But, if the dead have any knowledge of the living, they will displease us most by making themselves miserable and by taking their misfortunes too much to heart, and they will please us best if they bear their loss lightly and temperately. For our life will have the noblest end which is vouchsafed to man, and should be glorified rather than lamented. And if they will direct their minds to the care and nurture of our wives and children, they will soonest forget their misfortunes, and live in a better and nobler way, and be dearer to us.

'This is all that we have to say to our families: and to the state we would say — Take care of our parents and of our sons: let her worthily cherish the old age of our parents, and bring up our sons in the right way. But we know that she will of her own accord take care of them, and does not need any exhortation of ours.'

This, O ye children and parents of the dead, is the message which they bid us deliver to you, and which I do deliver with the utmost seriousness. And in their name I beseech you, the children, to imitate your fathers, and you, parents, to be of good cheer about yourselves; for we will nourish your age, and take care of you both publicly and privately in any place in which one of us may meet one of you who are the parents of the dead. And the care of you which the city shows, you know yourselves; for she has made provision by

Menexenus. law concerning the parents and children of those who die in
SOCRATES, MENEXENUS. war; the highest authority is specially entrusted with the 249
duty of watching over them above all other citizens, and they will see that your fathers and mothers have no wrong done to them. The city herself shares in the education of the children, desiring as far as it is possible that their orphanhood may not be felt by them; while they are children she is a parent to them, and when they have arrived at man's estate she sends them to their several duties, in full armour clad; and bringing freshly to their minds the ways of their fathers, she places in their hands the instruments of their fathers' virtues; for the sake of the omen, she would have them from the first begin to rule over their own houses arrayed in the strength and arms of their fathers. And as for the dead, she never ceases honouring them, celebrating in common for all rites which become the property of each; and in addition to this, holding gymnastic and equestrian contests, and musical festivals of every sort. She is to the dead in the place of a son and heir, and to their sons in the place of a father, and to their parents and elder kindred in the place of a guardian — ever and always caring for them. Considering this, you ought to bear your calamity the more gently; for thus you will be most endeared to the dead and to the living, and your sorrows will heal and be healed. And now do you and all, having lamented the dead in common according to the law, go your ways.

You have heard, Menexenus, the oration of Aspasia the Milesian.

This speech, Socrates, was not composed by Aspasia, but by yourself.

Men. Truly, Socrates, I marvel that Aspasia, who is only a woman, should be able to compose such a speech; she must be a rare one.

Soc. Well, if you are incredulous, you may come with me and hear her.

Men. I have often met Aspasia, Socrates, and know what she is like.

Soc. Well, and do you not admire her, and are you not grateful for her speech?

Men. Yes, Socrates, I am very grateful to her or to him who told you, and still more to you who have told me.

Soc. Very good. But you must take care not to tell of me, and then at some future time I will repeat to you many other excellent political speeches of hers. *Menexenus.* SOCRATES, MENEXENUS.

Men. Fear not; only let me hear them, and I will keep the secret.

Soc. Then I will keep my promise.

APPENDIX II.

ALCIBIADES II.

ERYXIAS.

APPENDIX II.

THE two dialogues which are translated in the second appendix are not mentioned by Aristotle, or by any early authority, and have no claim to be ascribed to Plato. They are examples of Platonic dialogues to be assigned probably to the second or third generation after Plato, when his writings were well known at Athens and Alexandria. They exhibit considerable originality, and are remarkable for containing several thoughts of the sort which we suppose to be modern rather than ancient, and which therefore have a peculiar interest for us. The Second Alcibiades shows that the difficulties about prayer which have perplexed Christian theologians were not unknown among the followers of Plato. The Eryxias was doubted by the ancients themselves: yet it may claim the distinction of being, among all Greek or Roman writings, the one which anticipates in the most striking manner the modern science of political economy and gives an abstract form to some of its principal doctrines.

For the translation of these two dialogues I am indebted to my friend and secretary, Mr. Knight.

That the Dialogue which goes by the name of the Second Alcibiades is a genuine writing of Plato will not be maintained by any modern critic, and was hardly believed by the ancients themselves. The dialectic is poor and weak. There is no power over language, or beauty of style; and there is a certain abruptness and *ἀγροικία* in the conversation, which is very un-Platonic. The best passage is probably that about the poets, p. 147:—the remark that the poet, who is of a reserved disposition, is uncommonly difficult to understand, and the ridiculous interpretation of Homer, are entirely in the spirit of Plato (cp. Protag. 339 foll.; Ion 534; Apol. 22 D). The characters are ill-drawn. Socrates

Appendix II. assumes the 'superior person' and preaches too much, while Alcibiades is stupid and heavy-in-hand. There are traces of Stoic influence in the general tone and phraseology of the Dialogue (cp. 138 B, *ὅπως μὴ λήσει τις . . . κακά*: 139 C, *ὅτι πᾶς ἄφρων μαίνεται*): and the writer seems to have been acquainted with the 'Laws' of Plato (cp. Laws 3. 687, 688; 7. 801; 11. 931 B). An incident from the Symposium (213 E) is rather clumsily introduced (151 A), and two somewhat hackneyed quotations (Symp. 174 D, Gorg. 484 E) recur at 140 A and 146 A. The reference to the death of Archelaus as having occurred 'quite lately' (141 D) is only a fiction, probably suggested by the Gorgias, 470 D, where the story of Archelaus is told, and a similar phrase occurs,—*τὰ γὰρ ἐχθὲς καὶ πρώην γεγονότα ταῦτα, κ.τ.λ.* There are several passages which are either corrupt or extremely ill-expressed (see pp. 144, 145, 146, 147, 150). But there is a modern interest in the subject of the dialogue; and it is a good example of a short spurious work, which may be attributed to the second or third century before Christ.

ALCIBIADES II.

PERSONS OF THE DIALOGUE.

SOCRATES and ALCIBIADES.

Steph. 138 *Soc.* ARE you going, Alcibiades, to offer prayer to Zeus?

Al. Yes, Socrates, I am.

Soc. You seem to be troubled and to cast your eyes on the ground, as though you were thinking about something.

Al. Of what do you suppose that I am thinking?

Soc. Of the greatest of all things, as I believe. Tell me, do you not suppose that the Gods sometimes partly grant and partly reject the requests which we make in public and private, and favour some persons and not others?

Al. Certainly.

The danger of a prayer which is ill-advised.

Soc. Do you not imagine, then, that a man ought to be very careful, lest perchance without knowing it he implore great evils for himself, deeming that he is asking for good, especially if the Gods are in the mood to grant whatever he may request? There is the story of Oedipus, for instance, who prayed that his children might divide their inheritance between them by the sword: he did not, as he might have done, beg that his present evils might be averted, but called down new ones. And was not his prayer accomplished, and did not many and terrible evils thence arise, upon which I need not dilate?

Al. Yes, Socrates, but you are speaking of a madman: surely you do not think that any one in his senses would venture to make such a prayer?

Soc. Madness, then, you consider to be the opposite of discretion?

Al. Of course.

Alcibiades II.

SOCRATES, ALCIBIADES.

Soc. And some men seem to you to be discreet, and others the contrary?

Al. They do.

Soc. Well, then, let us discuss who these are. We acknowledge that some are discreet, some foolish, and that some are mad?

Al. Yes.

Soc. And again, there are some who are in health?

Al. There are.

Soc. While others are ailing?

Al. Yes. 139

Soc. And they are not the same?

Al. Certainly not.

Soc. Nor are there any who are in neither state?

Al. No.

Soc. A man must either be sick or be well?

Al. That is my opinion.

Alcibiades first denies and afterwards admits

Soc. Very good: and do you think the same about discretion and want of discretion?

Al. How do you mean?

Soc. Do you believe that a man must be either in or out of his senses; or is there some third or intermediate condition, in which he is neither one nor the other?

Al. Decidedly not.

Soc. He must be either sane or insane?

Al. So I suppose.

Soc. Did you not acknowledge that madness was the opposite of discretion?

Al. Yes.

Soc. And that there is no third or middle term between discretion and indiscretion?

Al. True.

Soc. And there cannot be two opposites to one thing?

Al. There cannot.

Soc. Then madness and want of sense are the same?

Al. That appears to be the case.

Soc. We shall be in the right, therefore, Alcibiades, if we say that all who are senseless are mad. For example, if among persons of your own age or older than yourself there are some who are senseless,— as there certainly are,— they are

Alcibiades II.

mad. For tell me, by heaven, do you not think that in the city the wise are few, while the foolish, whom you call mad, are many?

SOCRATES, ALCIBIADES.

Al. I do.

that differences of kind do not exclude differences of degree.

Soc. But how could we live in safety with so many crazy people? Should we not long since have paid the penalty at their hands, and have been struck and beaten and endured every other form of ill-usage which madmen are wont to inflict? Consider, my dear friend: may it not be quite otherwise?

Al. Why, Socrates, how is that possible? I must have been mistaken.

Soc. So it seems to me. But perhaps we may consider the matter thus:—

Al. How?

Soc. I will tell you. We think that some are sick; do we not?

Al. Yes.

The sick may have many kinds of sickness;

Soc. And must every sick person either have the gout, or be in a fever, or suffer from ophthalmia? Or do you believe that a man may labour under some other disease, even although he has none of these complaints? Surely, they are not the only maladies which exist?

Al. Certainly not.

Soc. And is every kind of ophthalmia a disease?

Al. Yes.

Soc. And every disease ophthalmia?

Al. Surely not. But I scarcely understand what I mean myself.

140 *Soc.* Perhaps, if you give me your best attention, 'two of us' looking together, we may find what we seek.

Al. I am attending, Socrates, to the best of my power.

Soc. We are agreed, then, that every form of ophthalmia is a disease, but not every disease ophthalmia?

Al. We are.

Soc. And so far we seem to be right. For every one who suffers from a fever is sick; but the sick, I conceive, do not all have fever or gout or ophthalmia, although each of these is a disease, which, according to those whom we call physicians, may require a different treatment. They are not all alike,

Alcibiades II. SOCRATES, ALCIBIADES.

nor do they produce the same result, but each has its own effect, and yet they are all diseases. May we not take an illustration from the artizans?

Al. Certainly.

Soc. There are cobblers and carpenters and sculptors and others of all sorts and kinds, whom we need not stop to enumerate. All have their distinct employments and all are workmen, although they are not all of them cobblers or carpenters or sculptors.

Al. No, indeed.

so there are different kinds of want of sense.

Soc. And in like manner men differ in regard to want of sense. Those who are most out of their wits we call 'madmen,' while we term those who are less far gone 'stupid' or 'idiotic,' or, if we prefer gentler language, describe them as 'romantic' or 'simple-minded,' or, again, as 'innocent' or 'inexperienced' or 'foolish.' You may even find other names, if you seek for them; but by all of them lack of sense is intended. They only differ as one art appeared to us to differ from another or one disease from another. Or what is your opinion?

Al. I agree with you.

Soc. Then let us return to the point at which we digressed. We said at first that we should have to consider who were the wise and who the foolish. For we acknowledged that there are these two classes? Did we not?

Al. To be sure.

Soc. And you regard those as sensible who know what ought to be done or said?

Al. Yes.

Soc. The senseless are those who do not know this?

Al. True.

Soc. The latter will say or do what they ought not without their own knowledge?

Al. Exactly.

Men often, like Oedipus, pray unadvisedly.

Soc. Oedipus, as I was saying, Alcibiades, was a person of 141
this sort. And even now-a-days you will find many who [have offered inauspicious prayers], although, unlike him, they were not in anger nor thought that they were asking evil. He neither sought, nor supposed that he sought for good, but others have had quite the contrary notion. I be-

lieve that if the God whom you are about to consult should appear to you, and, in anticipation of your request, enquired whether you would be contented to become tyrant of Athens, and if this seemed in your eyes a small and mean thing, should add to it the dominion of all Hellas; and seeing that even then you would not be satisfied unless you were ruler of the whole of Europe, should promise, not only that, but, if you so desired, should proclaim to all mankind in one and the same day that Alcibiades, son of Cleinias, was tyrant:— in such a case, I imagine, you would depart full of joy, as one who had obtained the greatest of goods.

Al. And not only I, Socrates, but any one else who should meet with such luck.

Soc. Yet you would not accept the dominion and lordship of all the Hellenes and all the barbarians in exchange for your life?

Al. Certainly not: for then what use could I make of them?

Soc. And would you accept them if you were likely to use them to a bad and mischievous end?

Al. I would not.

Soc. You see that it is not safe for a man either rashly to accept whatever is offered him, or himself to request a thing, if he is likely to suffer thereby or immediately to lose his life. And yet we could tell of many who, having long desired and diligently laboured to obtain a tyranny, thinking that thus they would procure an advantage, have nevertheless fallen victims to designing enemies. You must have heard of what happened only the other day, how Archelaus of Macedonia was slain by his beloved [1], whose love for the tyranny was not less than that of Archelaus for him. The tyrannicide expected by his crime to become tyrant and afterwards to have a happy life; but when he had held the tyranny three or four days, he was in his turn conspired against and slain. Or look at certain of our own citizens,— and of their actions we have been not hearers, but eyewitnesses,— who have desired to obtain military command: of
142 those who have gained their object, some are even to this day

Archelaus and his beloved.

[1] Cp. Aristotle, Pol. v. 10, § 17.

Alcibiades II.

SOCRATES, ALCIBIADES.

exiles from the city, while others have lost their lives. And even they who seem to have fared best, have not only gone through many perils and terrors during their office, but after their return home they have been beset by informers worse than they once were by their foes, insomuch that several of them have wished that they had remained in a private station rather than have had the glories of command. If, indeed, such perils and terrors were of profit to the commonwealth, there would be reason in undergoing them; but the very contrary is the case. Again, you will find persons who have prayed for offspring, and when their prayers were heard, have fallen into the greatest pains and sufferings. For some have begotten children who were utterly bad, and have therefore passed all their days in misery, while the parents of good children have undergone the misfortune of losing them, and have been so little happier than the others that they would have preferred never to have had children rather than to have had them and lost them. And yet, although these and the like examples are manifest and known of all, it is rare to find any one who has refused what has been offered him, or, if he were likely to gain aught by prayer, has refrained from making his petition. The mass of mankind would not decline to accept a tyranny, or the command of an army, or any of the numerous things which cause more harm than good: but rather, if they had them not, would have prayed to obtain them. And often in a short space of time they change their tone, and wish their old prayers unsaid. Wherefore also I suspect that men are entirely wrong when they blame the gods as the authors of the ills which befall them[1]: 'their own presumption,' or folly (whichever is the right word) —

Men never refuse the goods of fortune, however great the evils which may attend them.

'Has brought these unmeasured woes upon them[2].'

He must have been a wise poet, Alcibiades, who, seeing as I believe, his friends foolishly praying for and doing things which would not really profit them, offered up a common prayer in behalf of them all:—

'King Zeus, grant us good whether prayed for or unsought by us; 143
But that which we ask amiss, do thou avert[3].'

[1] Cp. Rep. x. 619 C. [2] Hom. Odyss. i. 32.

[3] The author of these lines, which are probably of Pythagorean origin, is unknown. They are found also in the Anthology (Anth. Pal. 10. 108).

In my opinion, I say, the poet spoke both well and prudently; but if you have anything to say in answer to him, speak out.

SOCRATES, ALCIBIADES.

Al. It is difficult, Socrates, to oppose what has been well said. And I perceive how many are the ills of which ignorance is the cause, since, as would appear, through ignorance we not only do, but what is worse, pray for the greatest evils. No man would imagine that he would do so; he would rather suppose that he was quite capable of praying for what was best: to call down evil seems more like a curse than a prayer.

Soc. But perhaps, my good friend, some one who is wiser than either you or I will say that we have no right to blame ignorance thus rashly, unless we can add what ignorance we mean and of what, and also to whom and how it is respectively a good or an evil?

Al. How do you mean? Can ignorance possibly be better than knowledge for any person in any conceivable case?

Soc. So I believe:— you do not think so?

Al. Certainly not.

Orestes and Alcmaeon.

Soc. And yet surely I may not suppose that you would ever wish to act towards your mother as they say that Orestes and Alcmaeon and others have done towards their parent.

Al. Good words, Socrates, prithee.

Ignorance of the best is bad: ignorance of the bad good.

Soc. You ought not to bid him use auspicious words, who says that you would not be willing to commit so horrible a deed, but rather him who affirms the contrary, if the act appear to you unfit even to be mentioned. Or do you think that Orestes, had he been in his senses and knew what was best for him to do, would ever have dared to venture on such a crime?

Al. Certainly not.

Soc. Nor would any one else, I fancy?

Al. No.

Soc. That ignorance is bad then, it would appear, which is of the best and does not know what is best?

Al. So I think, at least.

Soc. And both to the person who is ignorant and everybody else?

Alcibiades II.

SOCRATES, ALCIBIADES.

Al. Yes.

Soc. Let us take another case. Suppose that you were suddenly to get into your head that it would be a good thing 144
to kill Pericles, your kinsman and guardian, and were to seize a sword and, going to the doors of his house, were to enquire if he were at home, meaning to slay only him and no one else:—the servants reply, 'Yes': (Mind, I do not mean that you would really do such a thing; but there is nothing, you think, to prevent a man who is ignorant of the best, having occasionally the whim that what is worst is best?

Al. No.)

A man might be prevented from committing murder by ignorance of the person whom he was going to murder.

Soc.—If, then, you went indoors, and seeing him, did not know him, but thought that he was some one else, would you venture to slay him?

Al. Most decidedly not [1] [it seems to me] [1].

Soc. For you designed to kill, not the first who offered, but Pericles himself?

Al. Certainly.

Soc. And if you made many attempts, and each time failed to recognize Pericles, you would never attack him?

Al. Never.

Soc. Well, but if Orestes in like manner had not known his mother, do you think that he would ever have laid hands upon her?

Al. No.

Soc. He did not intend to slay the first woman he came across, nor any one else's mother, but only his own?

Al. True.

Soc. Ignorance, then, is better for those who are in such a frame of mind, and have such ideas?

Al. Obviously.

Soc. You acknowledge that for some persons in certain cases the ignorance of some things is a good and not an evil, as you formerly supposed?

Al. I do.

Soc. [2] And there is still another case which will also perhaps appear strange to you, if you will consider it? [2]

Al. What is that, Socrates?

[1] These words are omitted in several MSS.

[2] The reading is here uncertain.

All knowledge if unaccompanied by a knowledge of the best is hurtful.

Soc. It may be, in short, that the possession of all the sciences, if unaccompanied by the knowledge of the best, will more often than not injure the possessor. Consider the matter thus:— Must we not, when we intend either to do or say anything, suppose that we know or ought to know that which we propose so confidently to do or say?

Al. Yes, in my opinion.

Soc. We may take the orators for an example, who from
145 time to time advise us about war and peace, or the building of walls and the construction of harbours, whether they understand the business in hand, or only think that they do. Whatever the city, in a word, does to another city, or in the management of her own affairs, all happens by the counsel of the orators.

Al. True.

Soc. But now see what follows, if I can [1][make it clear to you][1]. You would distinguish the wise from the foolish?

Al. Yes.

Soc. The many are foolish, the few wise?

Al. Certainly.

Soc. And you use both the terms, 'wise' and 'foolish,' in reference to something?

Al. I do.

Examples.

Soc. Would you call a person wise who can give advice, but does not know whether or when it is better to carry out the advice?

Al. Decidedly not.

Soc. Nor again, I suppose, a person who knows the art of war, but does not know whether it is better to go to war or for how long?

Al. No.

Soc. Nor, once more, a person who knows how to kill another or to take away his property or to drive him from his native land, but not when it is better to do so or for whom it is better?

Al. Certainly not.

Soc. But he who understands anything of the kind and has at the same time the knowledge of the best course of action:— and the best and the useful are surely the same?—

[1] Some words appear to have dropped out here.

Alcibiades II.

SOCRATES, ALCIBIADES.

Al. Yes.

Soc.— Such an one, I say, we should call wise and a useful adviser both of himself and of the city. What do you think?

Al. I agree.

Soc. And if any one knows how to ride or to shoot with the bow or to box or to wrestle, or to engage in any other sort of contest or to do anything whatever which is in the nature of an art,— what do you call him who knows what is best according to that art? Do you not speak of one who knows what is best in riding as a good rider?

Al. Yes.

Soc. And in a similar way you speak of a good boxer or a good flute-player or a good performer in any other art?

Al. True.

Soc. But is it necessary that the man who is clever in any of these arts should be wise also in general? Or is there a difference between the clever artist and the wise man?

Al. All the difference in the world.

A state would be bad which was composed only of skilful artists and clever politicians, but where no one had the knowledge of the best.

Soc. And what sort of a state do you think that would be which was composed of good archers and flute-players and athletes and masters in other arts, and besides them of those others about whom we spoke, who knew how to go to war and how to kill, as well as of orators puffed up with political pride, but in which not one of them all had this knowledge of the best, and there was no one who could tell when it was better to apply any of these arts or in regard to whom? 146

Al. I should call such a state bad, Socrates.

Soc. You certainly would when you saw each of them rivalling the other and esteeming that of the greatest importance in the state,

'Wherein he himself most excelled[1].'

— I mean that which was best in any art, while he was entirely ignorant of what was best for himself and for the state, because, as I think, he trusts to opinion which is devoid of intelligence. In such a case should we not be right if we said that the state would be full of anarchy and lawlessness?

[1] Euripides, Antiope, fr. 20 (Dindorf).

Al. Decidedly.

Soc. But ought we not then, think you, either to fancy that we know or really to know, what we confidently propose to do or say?

Al. Yes.

Soc. And if a person does that which he knows or supposes that he knows, and the result is beneficial, he will act advantageously both for himself and for the state?

Al. True.

Soc. And if he do the contrary, both he and the state will suffer?

Al. Yes.

Soc. Well, and are you of the same mind as before?

Al. I am.

Soc. But were you not saying that you would call the many unwise and the few wise?

Al. I was.

Soc. And have we not come back to our old assertion that the many fail to obtain the best because they trust to opinion which is devoid of intelligence?

Al. That is the case.

Soc. It is good, then, for the many, if they particularly desire to do that which they know or suppose that they know, neither to know nor to suppose that they know, in cases where if they carry out their ideas in action they will be losers rather than gainers?

Al. What you say is very true.

Soc. Do you not see that I was really speaking the truth when I affirmed that the possession of any other kind of knowledge was more likely to injure than to benefit the possessor, unless he had also the knowledge of the best?

Al. I do now, if I did not before, Socrates.

The soul requires this knowledge of the best before she sets sail on the voyage of life.

Soc. The state or the soul, therefore, which wishes to have a right existence must hold firmly to this knowledge, just as the sick man clings to the physician, or the passenger
147 depends for safety on the pilot. And if the soul does not set sail until she have obtained this she will be all the safer in the voyage through life. But when she rushes in pursuit of wealth or bodily strength or anything else, not having the knowledge of the best, so much the more is she likely to

Alcibiades II.

SOCRATES, ALCIBIADES.

meet with misfortune. And he who has the love of learning[1], and is skilful in many arts, and does not possess the knowledge of the best, but is under some other guidance, will make, as he deserves, a sorry voyage:—he will, I believe, hurry through the brief space of human life, pilotless in mid-ocean, and the words will apply to him in which the poet blamed his enemy:—

> '. . . . . Full many a thing he knew;
> But knew them all badly[2].'

Al. How in the world, Socrates, do the words of the poet apply to him? They seem to me to have no bearing on the point whatever.

The poets spoke in riddles a hidden truth.

Soc. Quite the contrary, my sweet friend: only the poet is talking in riddles after the fashion of his tribe. For all poetry has by nature an enigmatical character, and it is by no means everybody who can interpret it. And if, moreover, the spirit of poetry happen to seize on a man who is of a begrudging temper and does not care to manifest his wisdom but keeps it to himself as far as he can, it does indeed require an almost superhuman wisdom to discover what the poet would be at. You surely do not suppose that Homer, the wisest and most divine of poets, was unaware of the impossibility of knowing a thing badly: for it was no less a person than he who said of Margites that 'he knew many things, but knew them all badly.' The solution of the riddle is this, I imagine:—By 'badly' Homer meant 'bad' and 'knew' stands for 'to know.' Put the words together;—the metre will suffer, but the poet's meaning is clear;—'Margites knew all these things, but it was bad for him to know them.' And, obviously, if it was bad for him to know so many things, he must have been a good-for-nothing, unless the argument has played us false.

Al. But I do not think that it has, Socrates: at least, if the argument is fallacious, it would be difficult for me to find another which I could trust.

Soc. And you are right in thinking so.

Al. Well, that is my opinion.

[1] Or, reading *πολυμάθειαν*, 'abundant learning.'

[2] A fragment from the pseudo-Homeric poem, 'Margites.'

Soc. But tell me, by Heaven:—you must see now the nature and greatness of the difficulty in which you, like others, have your part. For you change about in all directions, and never come to rest anywhere: what you once most strongly inclined to suppose, you put aside again and
148 quite alter your mind. If the God to whose shrine you are going should appear at this moment, and ask before you made your prayer, 'Whether you would desire to have one of the things which we mentioned at first, or whether he should leave you to make your own request:'—what in either case, think you, would be the best way to take advantage of the opportunity?

Alcibiades is too unstable to be able to trust his own prayers.

Al. Indeed, Socrates, I could not answer you without consideration. It seems to me to be a wild thing[1] to make such a request; a man must be very careful lest he pray for evil under the idea that he is asking for good, when shortly after he may have to recall his prayer, and, as you were saying, demand the opposite of what he at first requested.

Soc. And was not the poet whose words I originally quoted wiser than we are, when he bade us [pray God] to defend us from evil even though we asked for it?

Al. I believe that you are right.

Soc. The Lacedaemonians, too, whether from admiration of the poet or because they have discovered the idea for themselves, are wont to offer the prayer alike in public and private, that the Gods will give unto them the beautiful as well as the good:—no one is likely to hear them make any further petition. And yet up to the present time they have not been less fortunate than other men; or if they have sometimes met with misfortune, the fault has not been due to their prayer. For surely, as I conceive, the Gods have power either to grant our requests, or to send us the contrary of what we ask.

And now I will relate to you a story which I have heard from certain of our elders. It chanced that when the Athenians and Lacedaemonians were at war, our city lost every battle by land and sea and never gained a victory.

[1] The Homeric word *μάργος* is said to be here employed in allusion to the quotation from the 'Margites' which Socrates has just made; but it is not used in the sense which it has in Homer.

Alcibiades II. SOCRATES.

The Athenians being annoyed and perplexed how to find a remedy for their troubles, decided to send and enquire at the shrine of Ammon. Their envoys were also to ask, 'Why the Gods always granted the victory to the Lacedaemonians?' 'We,' (they were to say,) 'offer them more and finer sacrifices than any other Hellenic state, and adorn their temples with gifts, as nobody else does; moreover, we make the most solemn and costly processions to them every year, and spend more money in their service than all the rest of the Hellenes put together. But the Lacedaemonians 149
take no thought of such matters, and pay so little respect to the Gods that they have a habit of sacrificing blemished animals to them, and in various ways are less zealous than we are, although their wealth is quite equal to ours.' When they had thus spoken, and had made their request to know what remedy they could find against the evils which troubled them, the prophet made no direct answer,—clearly because he was not allowed by the God to do so;—but he summoned them to him and said: 'Thus saith Ammon to the Athenians: "The silent worship of the Lacedaemonians pleaseth me better than all the offerings of the other Hellenes."' Such were the words of the God, and nothing more. He seems to have meant by 'silent worship' the prayer of the Lacedaemonians, which is indeed widely different from the usual requests of the Hellenes. For they either bring to the altar bulls with gilded horns or make offerings to the Gods, and beg at random for what they need, good or bad. When, therefore, the Gods hear them using words of ill omen they reject these costly processions and sacrifices of theirs. And we ought, I think, to be very careful and consider well what we should say and what leave unsaid. Homer, too, will furnish us with similar stories. For he tells us how the Trojans in making their encampment,

The silent prayer of the Lacedaemonians better than all the offerings of the other Hellenes.

> 'Offered up whole hecatombs to the immortals,'

and how the 'sweet savour' was borne 'to the heavens by the winds;

> 'But the blessed Gods were averse and received it not.
> For exceedingly did they hate the holy Ilium,
> Both Priam and the people of the spear-skilled king.'

So that it was in vain for them to sacrifice and offer gifts, seeing that they were hateful to the Gods, who are not, like vile usurers, to be gained over by bribes. And it is foolish for us to boast that we are superior to the Lacedaemonians by reason of our much worship. The idea is inconceivable
150 that the Gods have regard, not to the justice and purity of our souls, but to costly processions and sacrifices, which men may celebrate year after year, although they have committed innumerable crimes against the Gods or against their fellow-men or the state. For the Gods, as Ammon and his prophet declare, are no receivers of gifts, and they scorn such unworthy service. Wherefore also it would seem that wisdom and justice are especially honoured both by the Gods and by men of sense; and they are the wisest and most just who know how to speak and act towards Gods and men. But I should like to hear what your opinion is about these matters.

Al. I agree, Socrates, with you and with the God, whom, indeed, it would be unbecoming for me to oppose.

Soc. Do you not remember saying that you were in great perplexity, lest perchance you should ask for evil, supposing that you were asking for good?

Al. I do.

Alcibiades cannot tell whether he is asking for good or evil. 'Therefore let his words be few.'

Soc. You see, then, that there is a risk in your approaching the God in prayer, lest haply he should refuse your sacrifice when he hears the blasphemy which you utter, and make you partake of other evils as well. The wisest plan, therefore, seems to me that you should keep silence; for your 'highmindedness'—to use the mildest term which men apply to folly—will most likely prevent you from using the prayer of the Lacedaemonians. You had better wait until we find out how we should behave towards the Gods and towards men.

Al. And how long must I wait, Socrates, and who will be my teacher? I should be very glad to see the man.

Soc. It is he who takes an especial interest in you. But first of all, I think, the darkness must be taken away in which your soul is now enveloped, just as Athene in Homer removes the mist from the eyes of Diomede that

> 'He may distinguish between God and mortal man.'

Alcibiades II. Socrates, Alcibiades.

Afterwards the means may be given to you whereby you may distinguish between good and evil. At present, I fear, this is beyond your power.

Al. Only let my instructor take away the impediment, whether it pleases him to call it mist or anything else! I care not who he is; but I am resolved to disobey none of his commands, if I am likely to be the better for them.

Soc. And surely he has a wondrous care for you. 151

Al. It seems to be altogether advisable to put off the sacrifice until he is found.

Soc. You are right: that will be safer than running such a tremendous risk.

Al. But how shall we manage, Socrates?—At any rate I will set this crown of mine upon your head, as you have given me such excellent advice, and to the Gods we will offer crowns and perform the other customary rites when I see that day approaching: nor will it be long hence, if they so will.

Soc. I accept your gift, and shall be ready and willing to receive whatever else you may proffer. Euripides makes Creon say in the play, when he beholds Teiresias with his crown and hears that he has gained it by his skill as the first-fruits of the spoil:—

> 'An auspicious omen I deem thy victor's wreath:
> For well thou knowest that wave and storm oppress us[1].'

And so I count your gift to be a token of good-fortune; for I am in no less stress than Creon, and would fain carry off the victory over your lovers.

[1] Phoeniss. 865, 866.

ERYXIAS.

INTRODUCTION.

MUCH cannot be said in praise of the style or conception of the Eryxias. It is frequently obscure; like the exercise of a student, it is full of small imitations of Plato: — Phaeax returning from an expedition to Sicily (cp. Socrates in the Charmides from the army at Potidaea), the figure of the game at draughts, 395 B, borrowed from Rep. vi. 487, etc. It has also in many passages the ring of sophistry. On the other hand, the rather unhandsome treatment which is exhibited towards Prodicus is quite unlike the urbanity of Plato.

Yet there are some points in the argument which are deserving of attention. (1) That wealth depends upon the need of it or demand for it, is the first anticipation in an abstract form of one of the great principles of modern political economy, and the nearest approach to it to be found in an ancient writer. (2) The resolution of wealth into its simplest implements going on to infinity is a subtle and refined thought. (3) That wealth is relative to circumstances is a sound conception. (4) That the arts and sciences which receive payment are likewise to be comprehended under the notion of wealth, also touches a question of modern political economy. (5) The distinction of *post hoc* and *propter hoc*, often lost sight of in modern as well as in ancient times. These metaphysical conceptions and distinctions show considerable power of thought in the writer, whatever we may think of his merits as an imitator of Plato.

ERYXIAS.

PERSONS OF THE DIALOGUE.

SOCRATES.	ERASISTRATUS.
ERYXIAS.	CRITIAS.

SCENE:— The portico of a temple of Zeus.

Eryxias. SOCRATES, ERASISTRATUS.

Steph. 392 IT happened by chance that Eryxias the Steirian was walking with me in the Portico of Zeus the Deliverer, when there came up to us Critias and Erasistratus, the latter the son of Phaeax, who was the nephew of Erasistratus. Now Erasistratus had just arrived from Sicily and that part of the world. As they approached, he said, Hail, Socrates!

Soc. The same to you, I said; have you any good news from Sicily to tell us?

Eras. Most excellent. But, if you please, let us first sit down; for I am tired with my yesterday's journey from Megara.

Soc. Gladly, if that is your desire.

The troublesome Sicilians.

Eras. What would you wish to hear first? he said. What the Sicilians are doing, or how they are disposed towards our city? To my mind, they are very like wasps: so long as you only cause them a little annoyance they are quite unmanageable; you must destroy their nests if you wish to get the better of them. And in a similar way, the Syracusans, unless we set to work in earnest, and go against them with a great expedition, will never submit to our rule. The petty injuries which we at present inflict merely irritate them enough to make them utterly intractable. And now they have sent ambassadors to Athens, and intend, I suspect, to

Eryxias. play us some trick.— While we were talking, the Syracusan envoys chanced to go by, and Erisastratus, pointing to one of them, said to me, That, Socrates, is the richest man in all Italy and Sicily. For who has larger estates or more land at his disposal to cultivate if he please? And they are of a quality, too, finer than any other land in Hellas. Moreover, he has all the things which go to make up wealth, slaves and horses innumerable, gold and silver without end.

SOCRATES, ERASISTRATUS.

I saw that he was inclined to expatiate on the riches of the man; so I asked him, Well, Erasistratus, and what sort of character does he bear in Sicily?

The wicked millionaire.

Eras. He is esteemed to be, and really is, the wickedest of 393 all the Sicilians and Italians, and even more wicked than he is rich; indeed, if you were to ask any Sicilian whom he thought to be the worst and the richest of mankind, you would never hear any one else named.

I reflected that we were speaking, not of trivial matters, but about wealth and virtue, which are deemed to be of the greatest moment, and I asked Erasistratus whom he considered the wealthier,— he who was the possessor of a talent of silver or he who had a field worth two talents?

Eras. The owner of the field.

Soc. And on the same principle he who had robes and bedding and such things which are of greater value to him than to a stranger would be richer than the stranger?

Eras. True.

Soc. And if any one gave you a choice, which of these would you prefer?

Eras. That which was most valuable.

Wealth consists of things which are valuable.

Soc. In which way do you think you would be the richer?

Eras. By choosing as I said.

Soc. And he appears to you to be the richest who has goods of the greatest value?

Eras. He does.

Soc. And are not the healthy richer than the sick, since health is a possession more valuable than riches to the sick? Surely there is no one who would not prefer to be poor and well, rather than to have all the King of Persia's wealth and

to be ill. And this proves that men set health above wealth, else they would never choose the one in preference to the other. *Eryxias.* SOCRATES, ERASISTRATUS, ERYXIAS.

Eras. True.

Soc. And if anything appeared to be more valuable than health, he would be the richest who possessed it?

Eras. He would.

Soc. Suppose that some one came to us at this moment and were to ask, Well, Socrates and Eryxias and Erasistratus, can you tell me what is of the greatest value to men? Is it not that of which the possession will best enable a man to advise how his own and his friends' affairs should be administered?— What will be our reply?

Eras. I should say, Socrates, that happiness was the most precious of human possessions.

Soc. Not a bad answer. But do we not deem those men who are most prosperous to be the happiest?

Eras. That is my opinion.

Soc. And are they not most prosperous who commit the fewest errors in respect either of themselves or of other men?

Eras. Certainly.

Soc. And they who know what is evil and what is good; what should be done and what should be left un-
394 done;— these behave the most wisely and make the fewest mistakes?

Erasistratus agreed to this.

Soc. Then the wisest and those who do best and the most fortunate and the richest would appear to be all one and the same, if wisdom is really the most valuable of our possessions?

Yes, said Eryxias, interposing, but what use would it be if a man had the wisdom of Nestor and wanted the necessaries of life, food and drink and clothes and the like? Where would be the advantage of wisdom then? Or how could he be the richest of men who might even have to go begging, because he had not wherewithal to live? Of what use would wisdom be, if a man had not the necessaries of life?

I thought that what Eryxias was saying had some weight, and I replied, Would the wise man really suffer in this way, if he were so ill-provided; whereas if he had the house of

Eryxias. Polytion, and the house were full of gold and silver, he would lack nothing?

SOCRATES, ERYXIAS.

Eryx. Yes; for then he might dispose of his property and obtain in exchange what he needed, or he might sell it for money with which he could supply his wants and in a moment procure abundance of everything.

The wisdom of Nestor better and even more saleable than the house of Polytion.

Soc. True, if he could find some one who preferred such a house to the wisdom of Nestor. But if there are persons who set great store by wisdom like Nestor's and the advantages accruing from it, to sell these, if he were so disposed, would be easier still. Or is a house a most useful and necessary possession, and does it make a great difference in the comfort of life to have a mansion like Polytion's instead of living in a shabby little cottage, whereas wisdom is of small use and it is of no importance whether a man is wise or ignorant about the highest matters? Or is wisdom despised of men and can find no buyers, although cypress wood and marble of Pentelicus are eagerly bought by numerous purchasers? Surely the prudent pilot or the skilful physician, or the artist of any kind who is proficient in his art, is more worth than the things which are especially reckoned among riches; and he who can advise well and prudently for himself and others is able also to sell the product of his art, if he so desire.

And in the arts is not wisdom better than riches?

Eryxias looked askance, as if he had received some unfair 395
treatment, and said, I believe, Socrates, that if you were forced to speak the truth, you would declare that you were richer than Callias the son of Hipponicus. And yet, although you claimed to be wiser about things of real importance, you would not any the more be richer than he.

Eryxias is supposed to reply that arguments can prove anything and convince no one.

I dare say, Eryxias, I said, that you may regard these arguments of ours as a kind of game; you think that they have no relation to facts, but are like the pieces in the game of draughts which the player can move in such a way that his opponents are unable to make any countermove[1]. And perhaps, too, as regards riches you are of opinion that while facts remain the same, there are arguments, no matter whether true or false, which enable the user of them to prove that the wisest and the richest are one and the same, although

[1] Cp. Rep. vi. 487.

he is in the wrong and his opponents are in the right. There would be nothing strange in this; it would be as if two persons were to dispute about letters, one declaring that the word Socrates began with an S, the other that it began with an A, and the latter could gain the victory over the former.

Eryxias.

SOCRATES, ERYXIAS, CRITIAS.

Eryxias glanced at the audience, laughing and blushing at once, as if he had had nothing to do with what had just been said, and replied,— No, indeed, Socrates, I never supposed that our arguments should be of a kind which would never convince any one of those here present or be of advantage to them. For what man of sense could ever be persuaded that the wisest and the richest are the same? The truth is that we are discussing the subject of riches, and my notion is that we should argue respecting the honest and dishonest means of acquiring them, and, generally, whether they are a good thing or a bad.

Eryxias disclaims the answer which is attributed to him.

Very good, I said, and I am obliged to you for the hint: in future we will be more careful. But why do not you yourself, as you introduced the argument, and do not think that the former discussion touched the point at issue, tell us whether you consider riches to be a good or an evil?

The argument is renewed from a fresh point of view. Eryxias declares riches to be a good; Critias maintains that they are sometimes an evil.

I am of opinion, he said, that they are a good. He was about to add something more, when Critias interrupted him: — Do you really suppose so, Eryxias?

Certainly, replied Eryxias; I should be mad if I did not: and I do not fancy that you would find any one else of a contrary opinion.

And I, retorted Critias, should say that there is no one whom I could not compel to admit that riches are bad for
396 some men. But surely, if they were a good, they could not appear bad for any one?

Here I interposed and said to them: If you two were having an argument about equitation and what was the best way of riding, supposing that I knew the art myself, I should try to bring you to an agreement. For I should be ashamed if I were present and did not do what I could to prevent your difference. And I should do the same if you were quarrelling about any other art and were likely, unless you agreed on the point in dispute, to part as enemies instead of as friends. But now, when we are contending about a thing

Eryxias.

SOCRATES, ERYXIAS, CRITIAS.

Socrates encourages the two disputants to follow up the argument.

of which the usefulness continues during the whole of life, and it makes an enormous difference whether we are to regard it as beneficial or not,—a thing, too, which is esteemed of the highest importance by the Hellenes:—(for parents, as soon as their children are, as they think, come to years of discretion, urge them to consider how wealth may be acquired, since by riches the value of a man is judged):—When, I say, we are thus in earnest, and you, who agree in other respects, fall to disputing about a matter of such moment, that is, about wealth, and not merely whether it is black or white, light or heavy, but whether it is a good or an evil, whereby, although you are now the dearest of friends and kinsmen, the most bitter hatred may arise betwixt you, I must hinder your dissension to the best of my power. If I could, I would tell you the truth, and so put an end to the dispute; but as I cannot do this, and each of you supposes that you can bring the other to an agreement, I am prepared, as far as my capacity admits, to help you in solving the question. Please, therefore, Critias, try to make us accept the doctrines which you yourself entertain.

Crit. I should like to follow up the argument, and will ask Eryxias whether he thinks that there are just and unjust men?

Eryx. Most decidedly.

Crit. And does injustice seem to you an evil or a good?

Eryx. An evil.

Crit. Do you consider that he who bribes his neighbour's wife and commits adultery with her, acts justly or unjustly, and this although both the state and the laws forbid?

Eryx. Unjustly.

Wealth may furnish the opportunity of crime.

Crit. And if the wicked man has wealth and is willing to 397
spend it, he will carry out his evil purposes? whereas he who is short of means cannot do what he fain would, and therefore does not sin? In such a case, surely, it is better that a person should not be wealthy, if his poverty prevents the accomplishment of his desires, and his desires are evil? Or, again, should you call sickness a good or an evil?

Eryx. An evil.

Crit. Well, and do you think that some men are intemperate?

Eryx. Yes.

Eryxias.

Crit. Then, if it is better for his health that the intemperate man should refrain from meat and drink and other pleasant things, but he cannot owing to his intemperance, will it not also be better that he should be too poor to gratify his lust rather than that he should have a superabundance of means? For thus he will not be able to sin, although he desire never so much.

SOCRATES, ERYXIAS, CRITIAS, ERASISTRATUS.

Critias appeared to be arguing so admirably that Eryxias, if he had not been ashamed of the bystanders, would probably have got up and struck him. For he thought that he had been robbed of a great possession when it became obvious to him that he had been wrong in his former opinion about wealth. I observed his vexation, and feared that they would proceed to abuse and quarrelling: so I said,— I heard that very argument used in the Lyceum yesterday by a wise man, Prodicus of Ceos; but the audience thought that he was talking mere nonsense, and no one could be persuaded that he was speaking the truth. And when at last a certain talkative young gentleman came in, and, taking his seat, began to laugh and jeer at Prodicus, tormenting him and demanding an explanation of his argument, he gained the ear of the audience far more than Prodicus.

Eryxias takes offence at Critias, whose argument, as Socrates pretends, is only the repetition of which one had been used by Prodicus of Ceos on the day before,

Can you repeat the discourse to us? said Erasistratus.

Soc. If I can only remember it, I will. The youth began by asking Prodicus, In what way did he think that riches were a good and in what an evil? Prodicus answered, as you did just now, that they were a good to good men and to those who knew in what way they should be employed, while to the bad and the ignorant they were an evil. The same is true, he went on to say, of all other things; men make them to be what they are themselves. The saying of Archilochus is true:—

'Men's thoughts correspond to the things which they meet with.'

398 Well, then, replied the youth, if any one makes me wise in that wisdom whereby good men become wise, he must also make everything else good to me. Not that he concerns himself at all with these other things, but he has converted my ignorance into wisdom. If, for example, a person teach

and had been refuted by an impertinent youth.

Eryxias. me grammar or music, he will at the same time teach me all
SOCRATES. that relates to grammar or music, and so when he makes me good, he makes things good to me.

Prodicus did not altogether agree: still he consented to what was said.

And do you think, said the youth, that doing good things is like building a house,—the work of human agency; or do things remain what they were at first, good or bad, for all time?

Prodicus began to suspect, I fancy, the direction which the argument was likely to take, and did not wish to be put down by a mere stripling before all those present:—(if they two had been alone, he would not have minded):—so he answered, cleverly enough: I think that doing good things is a work of human agency.

And is virtue in your opinion, Prodicus, innate or acquired by instruction?

The latter, said Prodicus.

Then you would consider him a simpleton who supposed that he could obtain by praying to the Gods the knowledge of grammar or music or any other art, which he must either learn from another or find out for himself?

Prodicus agreed to this also.

And when you pray to the Gods that you may do well and receive good, you mean by your prayer nothing else than that you desire to become good and wise:—if, at least, things are good to the good and wise and evil to the evil. But in that case, if virtue is acquired by instruction, it would appear that you only pray to be taught what you do not know.

Hereupon I said to Prodicus that it was no misfortune to him if he had been proved to be in error in supposing that the Gods immediately granted to us whatever we asked:—if, I added, whenever you go up to the Acropolis you earnestly entreat the Gods to grant you good things, although you know not whether they can yield your request, it is as though you went to the doors of the grammarian and begged him, although you had never made a study of the art, to give you a knowledge of grammar which would enable you forthwith to do the business of a grammarian.

Eryxias.

SOCRATES, ERASISTRATUS.

While I was speaking, Prodicus was preparing to retaliate upon his youthful assailant, intending to employ the argu-
399 ment of which you have just made use; for he was annoyed to have it supposed that he offered a vain prayer to the Gods. But the master of the gymnasium came to him and begged him to leave because he was teaching the youths doctrines which were unsuited to them, and therefore bad for them.

Prodicus is desired to leave the gymnasium because he is disturbing the minds of youth.

I have told you this because I want you to understand how men are circumstanced in regard to philosophy. Had Prodicus been present and said what you have said, the audience would have thought him raving, and he would have been ejected from the gymnasium. But you have argued so excellently well that you have not only persuaded your hearers, but have brought your opponent to an agreement. For just as in the law courts, if two witnesses testify to the same fact, one of whom seems to be an honest fellow and the other a rogue, the testimony of the rogue often has the contrary effect on the judges' minds to what he intended, while the same evidence if given by the honest man at once strikes them as perfectly true. And probably the audience have something of the same feeling about yourself and Prodicus; they think him a Sophist and a braggart, and regard you as a gentleman of courtesy and worth. For they do not pay attention to the argument so much as to the character of the speaker.

Socrates jesting professes to be in earnest.

But truly, Socrates, said Erasistratus, though you may be joking, Critias does seem to me to be saying something which is of weight.

Soc. I am in profound earnest, I assure you. But why, as you have begun your argument so prettily, do you not go on with the rest? There is still something lacking, now you have agreed that [wealth] is a good to some and an evil to others. It remains to enquire what constitutes wealth; for unless you know this, you cannot possibly come to an understanding as to whether it is a good or an evil. I am ready to assist you in the enquiry to the utmost of my power: but first let him who affirms that riches are a good, tell us what, in his opinion, is wealth.

Eras. Indeed, Socrates, I have no notion about wealth beyond that which men commonly have. I suppose that

Eryxias.

SOCRATES, ERASISTRATUS.

wealth is a quantity of money[1]; and this, I imagine, would also be Critias' definition.

Soc. Then now we have to consider, What is money? Or else later on we shall be found to differ about the question. For instance, the Carthaginians use money of this sort. Something which is about the size of a stater is tied up in a small piece of leather: what it is, no one knows but the makers. A seal is next set upon the leather, which then passes into circulation, and he who has the largest number of such pieces is esteemed the richest and best off. And yet if any one among us had a mass of such coins he would be no wealthier than if he had so many pebbles from the mountain. At Lacedaemon, again, they use iron by weight which has been rendered useless: and he who has the greatest mass of such iron is thought to be the richest, although elsewhere it has no value. In Ethiopia engraved stones are employed, of which a Lacedaemonian could make no use. Once more, among the Nomad Scythians a man who owned the house of Polytion would not be thought richer than one who possessed Mount Lycabettus among ourselves. And clearly those things cannot all be regarded as possessions; for in some cases the possessors would appear none the richer thereby: but, as I was saying, some one of them is thought in one place to be money, and the possessors of it are the wealthy, whereas in some other place it is not money, and the ownership of it does not confer wealth; just as the standard of morals varies, and what is honourable to some men is dishonourable to others. And if we wish to enquire why a house is valuable to us but not to the Scythians, or why the Carthaginians value leather which is worthless to us, or the Lacedaemonians find wealth in iron and we do not, can we not get an answer in some such way as this: Would an Athenian, who had a thousand talents weight of the stones which lie about in the Agora and which we do not employ for any purpose, be thought to be any the richer?

What is money? It is observed that different kinds of money pass current in different countries,—Carthage, Lacedaemon, Ethiopia, Scythia.

400

Eras. He certainly would not appear so to me.

Soc. But if he possessed a thousand talents weight of some precious stone, we should say that he was very rich?

Eras. Of course.

[1] Cp. Arist. Pol. i. 9, §§ 10, 14.

Soc. The reason is that the one is useless and the other useful? *Eryxias.*

Eras. Yes. SOCRATES, ERASISTRATUS.

Soc. And in the same way among the Scythians a house has no value because they have no use for a house, nor would a Scythian set so much store on the finest house in the world as on a leather coat, because he could use the one and not the other. Or again, the Carthaginian coinage is not wealth in our eyes, for we could not employ it, as we can silver, to procure what we need, and therefore it is of no use to us.

Eras. True.

Soc. What is useful to us, then, is wealth, and what is useless to us is not wealth? Wealth is useful, but other things are useful besides wealth.

But how do you mean, Socrates? said Eryxias, interrupting. 401 Do we not employ in our intercourse with one another speech and violence (?) and various other things? These are useful and yet they are not wealth.

Soc. Clearly we have not yet answered the question, What is wealth? That wealth must be useful, to be wealth at all,— thus much is acknowledged by every one. But what particular thing is wealth, if not all things? Let us pursue the argument in another way; and then we may perhaps find what we are seeking. What is the use of wealth, and for what purpose has the possession of riches been invented,— in the sense, I mean, in which drugs have been discovered for the cure of disease? Perhaps in this way we may throw some light on the question. It appears to be clear that whatever constitutes wealth must be useful, and that wealth is one class of useful things; and now we have to enquire, What is the use of those useful things which constitute wealth? For all things probably may be said to be useful which we use in production, just as all things which have life are animals, but there is a special kind of animal which we call 'man.' Now if any one were to ask us, What is that of which, if we were rid, we should not want medicine and the instruments of medicine, we might reply that this would be the case if disease were absent from our bodies and either never came to them at all or went away again as soon as it appeared; and we may therefore conclude that

Eryxias. medicine is the science which is useful for getting rid of
SOCRATES, ERYXIAS. disease. But if we are further asked, What is that from which, if we were free, we should have no need of wealth? can we give an answer? If we have none, suppose that we restate the question thus:— If a man could live without food or drink, and yet suffer neither hunger nor thirst, would he want either money or anything else in order to supply his needs?

Eryx. He would not.

If the body had no wants or feelings there would be no need of money.

Soc. And does not this apply in other cases? If we did not want for the service of the body the things of which we now stand in need, and heat and cold and the other bodily sensations were unperceived by us, there would be no use in this so-called wealth, if no one, that is, had any necessity for those things which now make us wish for wealth in order that we may satisfy the desires and needs of the body in respect of our various wants. And therefore if the possession of wealth is useful in ministering to our bodily wants, and bodily wants were unknown to us, we should not need wealth, and possibly there would be no such thing as wealth.

Eryx. Clearly not.

Soc. Then our conclusion is, as would appear, that wealth is what is useful to this end?

Eryxias once more gave his assent, but the small argument considerably troubled him.

Soc. And what is your opinion about another question:— 402
Would you say that the same thing can be at one time useful and at another useless for the production of the same result?

Eryx. I cannot say more than that if we require the same thing to produce the same result, then it seems to me to be useful; if not, not.

Soc. Then if without the aid of fire we could make a brazen statue, we should not want fire for that purpose; and if we did not want it, it would be useless to us? And the argument applies equally in other cases.

Eryx. Clearly.

Soc. And therefore conditions which are not required for the existence of a thing are not useful for the production of it?

Eryx. Of course not.

Eryxias.

SOCRATES, ERYXIAS.

Soc. And if without gold or silver or anything else which we do not use directly for the body in the way that we do food and drink and bedding and houses,— if without these we could satisfy the wants of the body, they would be of no use to us for that purpose?

Eryx. They would not.

Soc. They would no longer be regarded as wealth, because they are useless, whereas that would be wealth which enabled us to obtain what was useful to us?

Eryx. O Socrates, you will never be able to persuade me that gold and silver and similar things are not wealth. But I am very strongly of opinion that things which are useless to us are not wealth, and that the money which is useful for this purpose is of the greatest use; not that these things are not useful towards life, if by them we can procure wealth.

The arts too are wealth, for by them the needs of life are satisfied.

Soc. And how would you answer another question? There are persons, are there not, who teach music and grammar and other arts for pay, and thus procure those things of which they stand in need?

Eryx. There are.

Soc. And these men by the arts which they profess, and in exchange for them, obtain the necessities of life just as we do by means of gold and silver?

Eryx. True.

Soc. Then if they procure by this means what they want for the purposes of life, that art will be useful towards life? For do we not say that silver is useful because it enables us to supply our bodily needs?

Eryx. We do.

Soc. Then if these arts are reckoned among things useful, the arts are wealth for the same reason as gold and silver are, for, clearly, the possession of them gives wealth. Yet a little while ago we found it difficult to accept the argument which
403 proved that the wisest are the wealthiest. But now there seems no escape from this conclusion. Suppose that we are asked, 'Is a horse useful to everybody?' will not our reply be, 'No, but only to those who know how to use a horse?'

Eryx. Certainly.

Eryxias.

SOCRATES, ERYXIAS, CRITIAS.

Soc. And so, too, physic is not useful to every one, but only to him who knows how to use it?

Eryx. True.

Soc. And the same is the case with everything else?

Eryx. Yes.

Soc. Then gold and silver and all the other elements which are supposed to make up wealth are only useful to the person who knows how to use them?

Eryx. Exactly.

Soc. And were we not saying before that it was the business of a good man and a gentleman to know where and how anything should be used?

Eryx. Yes.

The good only know how to use things.

Soc. The good and gentle, therefore, will alone have profit from these things, supposing at least that they know how to use them. But if so, to them only will they seem to be wealth. It appears, however, that where a person is ignorant of riding, and has horses which are useless to him, if some one teaches him that art, he makes him also richer, for what was before useless has now become useful to him, and in giving him knowledge he has also conferred riches upon him.

Eryx. That is the case.

Soc. Yet I dare be sworn that Critias will not be moved a whit by the argument.

Crit. No, by heaven, I should be a madman if I were. But why do you not finish the argument which proves that gold and silver and other things which seem to be wealth are not real wealth? For I have been exceedingly delighted to hear the discourses which you have just been holding.

Soc. My argument, Critias (I said), appears to have given you the same kind of pleasure which you might have derived from some rhapsode's recitation of Homer; for you do not believe a word of what has been said. But come now, give me an answer to this question. Are not certain things useful to the builder when he is building a house?

Crit. They are.

Soc. And would you say that those things are useful which are employed in house building,—stones and bricks and beams and the like, and also the instruments with which the

builder built the house, the beams and stones which they provided, and again the instruments by which these were obtained? *Eryxias.* SOCRATES, CRITIAS.

Crit. It seems to me that they are all useful for building.

Soc. And is it not true of every art, that not only the materials but the instruments by which we procure them and without which the work could not go on, are useful for that art?

Crit. Certainly.

Soc. And further, the instruments by which the instruments
404 are procured, and so on, going back from stage to stage *ad infinitum*,—are not all these, in your opinion, necessary in order to carry out the work?

Crit. We may fairly suppose such to be the case.

Soc. And if a man has food and drink and clothes and the other things which are useful to the body, would he need gold or silver or any other means by which he could procure that which he now has? A sophism. Gold and silver would be useless if they were not needed to obtain food: and things cannot be at one time useless, at another time useful, in the same actions.

Crit. I do not think so.

Soc. Then you consider that a man never wants any of these things for the use of the body?

Crit. Certainly not.

Soc. And if they appear useless to this end, ought they not always to appear useless? For we have already laid down the principle that things cannot be at one time useful and at another time not, in the same process.

Crit. But in that respect your argument and mine are the same. For you maintain if they are useful to a certain end, they can never become useless; whereas I say that in order to accomplish some results bad things are needed, and good for others.

Soc. But can a bad thing be used to carry out a good purpose?

Crit. I should say not.

Soc. And we call those actions good which a man does for the sake of virtue?

Crit. Yes.

Soc. But can a man learn any kind of knowledge which is imparted by word of mouth if he is wholly deprived of the sense of hearing?

Eryxias.

SOCRATES, CRITIAS.

Crit. Certainly not, I think.

Soc. And will not hearing be useful for virtue, if virtue is taught by hearing and we use the sense of hearing in giving instruction?

Crit. Yes.

There are indirect means towards ends.

Soc. And since medicine frees the sick man from his disease, that art too may sometimes appear useful in the acquisition of virtue, e. g. when hearing is procured by the aid of medicine.

Crit. Very likely.

Soc. But if, again, we obtain by wealth the aid of medicine, shall we not regard wealth as useful for virtue?

Crit. True.

Soc. And also the instruments by which wealth is procured?

Crit. Certainly.

Wealth may be gained discreditably, but spent in the acquisition of virtue.

Soc. Then you think that a man may gain wealth by bad and disgraceful means, and, having obtained the aid of medicine which enables him to acquire the power of hearing, may use that very faculty for the acquisition of virtue?

Crit. Yes, I do.

Soc. But can that which is evil be useful for virtue?

Crit. No.

Soc. It is not therefore necessary that the means by which we obtain what is useful for a certain object should always be useful for the same object: for it seems that bad actions may sometimes serve good purposes? The matter will be still 405
plainer if we look at it in this way:— If things are useful towards the several ends for which they exist, which ends would not come into existence without them, how would you regard them? Can ignorance, for instance, be useful for knowledge, or disease for health, or vice for virtue?

Crit. Never.

Soc. And yet we have already agreed — have we not?— that there can be no knowledge where there has not previously been ignorance, nor health where there has not been disease, nor virtue where there has not been vice?

Difference between causes and antecedents.

Crit. I think that we have.

Soc. But then it would seem that the antecedents without which a thing cannot exist are not necessarily useful to it.

Otherwise ignorance would appear useful for knowledge, disease for health, and vice for virtue. *Eryxias.*

SOCRATES, CRITIAS.

Critias still showed great reluctance to accept any argument which went to prove that all these things were useless. I saw that it was as difficult to persuade him as (according to the proverb) it is to boil a stone, so I said: Let us bid 'good-bye' to the discussion, since we cannot agree whether these things are useful and a part of wealth or not. But what shall we say to another question: Which is the happier and better man,— he who requires the greatest quantity of necessaries for body and diet, or he who requires only the fewest and least? The answer will perhaps become more obvious if we suppose some one, comparing the man himself at different times, to consider whether his condition is better when he is sick or when he is well?

Crit. That is not a question which needs much consideration.

Health is a better condition than disease; and it needs less.

Soc. Probably, I said, every one can understand that health is a better condition than disease. But when have we the greatest and the most various needs, when we are sick or when we are well?

Crit. When we are sick.

Soc. And when we are in the worst state we have the greatest and most especial need and desire of bodily pleasures?

Crit. True.

So he is best off who has fewest desires.

Soc. And seeing that a man is best off when he is least in need of such things, does not the same reasoning apply to the case of any two persons, of whom one has many and great wants and desires, and the other few and moderate? For instance, some men are gamblers, some drunkards, and some gluttons: and gambling and the love of drink and greediness are all desires?

Crit. Certainly.

Soc. But desires are only the lack of something: and those who have the greatest desires are in a worse condition than those who have none or very slight ones?

406 *Crit.* Certainly I consider that those who have such wants are bad, and that the greater their wants the worse they are.

Soc. And do we think it possible that a thing should be

Eryxias. useful for a purpose unless we have need of it for that purpose?

SOCRATES, CRITIAS.

Crit. No.

Soc. Then if these things are useful for supplying the needs of the body, we must want them for that purpose?

Crit. That is my opinion.

Soc. And he to whom the greatest number of things are useful for his purpose, will also want the greatest number of means of accomplishing it, supposing that we necessarily feel the want of all useful things?

Crit. It seems so.

Soc. The argument proves then that he who has great riches has likewise need of many things for the supply of the wants of the body; for wealth appears useful towards that end. And the richest must be in the worst condition, since they seem to be most in want of such things.

MENO

INTRODUCTION

This Dialogue begins abruptly with a question of Meno, who asks "whether virtue can be taught." Socrates replies that he does not as yet know what virtue is, and has never known any one who did. "Then he can not have met Gorgias when he was at Athens." Yes, Socrates had met him, but he has a bad memory, and has forgotten what Gorgias said. Will Meno tell him his own notion, which is probably not very different from that of Gorgias? "O yes — nothing easier; there is the virtue of a man, of a woman, of an old man, and of a child; there is a virtue of every age and state of life, all of which may be easily described."

Socrates reminds Meno that this is only an enumeration of the virtues and not a definition of the notion which is common to them all. Meno tries again; this time he defines virtue to be "the power of command." But to this, again, exceptions are taken. For there must be a virtue of those who obey, as well as of those who command; and the power of command must be justly or not unjustly exercised. Meno is ever ready to admit that justice is virtue: "Would you say virtue or a virtue, for there are other virtues, such as courage, temperance, and the like; just as round is a figure, and black and white are colors, and yet there are other figures and other colors. Let Meno take the examples of figure and color, and try to define them." Meno confesses his inability, and after a process of interrogation, in which Socrates explains to him the nature of a "simile in multis," Socrates himself defines figure as "the accompaniment of color." But some one may object that he does not know the meaning of the word "color;" and if he is a candid friend, and not a mere disputant, Socrates is willing to furnish him with a simpler and more philosophical definition, in which no disputed word is allowed to intrude: "Figure is the limit of form." Meno imperiously insists that he must still have a definition of color. To which, after some playful raillery, Socrates is induced to reply, "that color is the effluence of form in due proportion to the sight." This definition is exactly suited to the taste of Meno, who welcomes the familiar language of Gorgias

and Empedocles. Socrates is of opinion that the more abstract or dialectical definition of figure is far better.

Now that Meno has been made to understand the nature of a general definition, he answers in the spirit of a Greek gentleman, and in the words of a poet, "that virtue is to delight in things honorable, and to have the power of getting them." This is a nearer approximation than he has yet made to a complete definition, and, regarded as a piece of proverbial or popular morality is not far from the truth. But the objection is urged "that the honorable is the good," and as every one desires the good, the point of the definition is contained in the last words, "the power of getting them." "And they must be got justly or with justice." The definition will then stand thus: "Virtue is the power of getting good with justice." But justice is a part of virtue, and therefore virtue is the getting of good with a part of virtue. The definition repeats the word defined.

Meno complains that the conversation of Socrates has the effect of a torpedo's shock upon him. When he talks with other persons he has plenty to say about virtue; in the presence of Socrates, his thoughts seem to desert him. Socrates replies that he is only the cause of perplexity in others, because he is himself perplexed. He proposes to continue the inquiry. But how, asks Meno, can he inquire either into what he knows or into what he does not know? This is a sophistical puzzle, which, as Socrates remarks, saves a great deal of trouble to him who accepts it. But the puzzle has a real difficulty latent under it, to which Socrates replies in a figure. The difficulty is the origin of knowledge.

He professes to have heard from priests and priestesses, and from the poet Pindar, of an immortal soul which is always learning and forgetting in successive periods of existence, wandering over all places of the upper and under world, having seen and known all things at one time or other, and by association out of one thing capable of recovering all. For nature is of one kindred; and every soul has a seed or germ which may be developed into all knowledge. The existence of this latent knowledge is further proved by the interrogation of one of Meno's slaves, who, in the skilful hands of Socrates, is made to acknowledge some elementary relations of geometrical figures. The theorem that the square of the diagonal is double the square of the side — that famous discovery of primitive mathematics, in honor of which the legendary Pythagoras is said to have sacrificed a hecatomb — is elicited from him. The first step in the process of

teaching has made him conscious of his own ignorance. He has had the "torpedo's shock" given him, and is the better for the operation. But whence had the uneducated man this knowledge? He had never learned geometry in this world; nor was it born with him; he must therefore have had it in a previous existence.

After Socrates has given this specimen of the true nature of teaching, the original question of the teachableness of virtue is renewed. Again he professes a desire to know "what virtue is" first. But he is willing to argue the question, as mathematicians say, under an hypothesis. He will assume that if virtue is knowledge, then virtue can be taught.

Socrates has no difficulty in showing that virtue is a good, and that goods, whether of body or mind, must be under the direction of knowledge. Upon the assumption just made, then, virtue is teachable. But where are the teachers? There are none found. This is extremely discouraging. Virtue is no sooner discovered to be teachable, than the discovery follows that it is not taught. Virtue, therefore, is and is not teachable.

In this dilemma an appeal is made to Anytus, who is a respectable and well-to-do citizen of the old school, and happens to be present. He is asked "whether Meno shall go to the Sophists and be taught." The very suggestion of this throws him into a rage. "To whom, then, shall Meno go?" asks Socrates. To any Athenian gentleman — to the great Athenian statesmen of past times. Socrates replies here, that Themistocles, Pericles, and other great men, never taught their sons anything worth learning; and they would surely, if they could, have imparted to them their own political wisdom. Anytus is angry at the imputation which is supposed to be cast on his favorite statesmen, and breaks off with a significant threat.

Socrates returns to the consideration of the question "whether virtue is teachable," which was denied on the ground that there are no teachers of it: (for the Sophists are bad teachers, and the rest of the world do not profess to teach.) But there is another point which we failed to observe, and in which Gorgias has never instructed Meno, nor Prodicus Socrates. This is the nature of right opinion. For virtue may be under the guidance of right opinion as well as knowledge; and right opinion is for practical purposes as good as knowledge, but is incapable of being taught, and is also liable to "walk off," because not bound by the tie of the cause. This is the sort of instinct which is possessed by statesmen who are not wise or knowing persons, but only inspired or divine. The higher virtue, which is identical

with knowledge, is an ideal only. If the statesman had this knowledge, and could teach what he knew, he would be like Tiresias in the world below, — "he alone would have wisdom, while the rest flit as shadows."

This Dialogue is an attempt to answer the question, Can virtue be taught? No one would either ask or answer such a question in modern times. But in the age of Socrates it was only by an effort that the mind could rise to a general notion of virtue as distinct from the particular virtues of courage, liberality, and the like. And when a hazy conception of this was attained, it was only by a further effort that the question of the teachableness of virtue could be resolved.

The answer which is given by Plato is paradoxical enough, and seems rather intended to stimulate than to satisfy inquiry. Virtue is knowledge, and therefore virtue can be taught. But virtue is not taught, and therefore in this higher and ideal sense there is no virtue and no knowledge. The teaching of the Sophists is confessedly inadequate, and Meno, who is their pupil, is ignorant of the very nature of general terms. He can only produce out of their armory the sophism, "that you can neither inquire into what you know nor into what you do not know;" to which Socrates replies by his theory of reminiscence.

To the doctrine that virtue is knowledge, Plato has been constantly tending in the previous Dialogues. But here the new truth is no sooner found than it seems to vanish away. "If there is knowledge, there must be teachers; and where are the teachers?" There is no knowledge in the higher sense of systematic, connected, reasoned knowledge, such as may one day be attained, and such as Plato himself seems to see in some far off vision of a single science. And there are no teachers in the higher sense of the word; that is to say, no real teachers who will arouse the spirit of inquiry in their pupils, and not merely instruct them in rhetoric or impart to them ready-made information for a fee of "one" or of "fifty drachms." Plato is desirous of deepening the notion of education, and therefore he asserts the seeming paradox that there are no educators.

But there is still a possibility which must not be overlooked. Even if there is no knowledge, as has been proved by "the wretched state of education," there may be right opinion. This is a sort of guessing or divination which rests on no knowledge of causes, and is incommunicable to others. This is what our statesmen have, as is proved by the circumstance that they are

unable to impart their knowledge to others. Those who are possessed of this gift can not be said to be men of science or philosophers, but they are inspired and divine.

There is no trace of irony in this curious passage, which forms the concluding portion of the dialogue. Nor again does Plato mean to intimate that the supernatural or divine is the true basis of human life. To him knowledge, if only attainable in this world, is of all things the most divine. But, like other philosophers, he is willing to admit that "probability is the guide of life;" and at the same time is desirous to contrast "the wisdom which governs the world" with true wisdom. There are many instincts, judgments, and anticipations of the human mind which can not be reduced to rule, and of which the grounds can not always be given in words. A person may have some skill or latent experience which he is able to use himself and is yet unable to teach others, because he has no principles, and is not able to collect or arrange his ideas. He has practice, but not theory; art, but not science. This is a true fact of psychology, which is recognized by Plato in this passage.

Also here, as in the Phaedrus, Plato appears to acknowledge an unreasoning element in the higher nature of man. The philosopher only has knowledge, and yet the statesman and the poet are inspired. There may be a sort of irony in regarding in this way the gifts of genius. But there is no reason to suppose that he is deriding them any more than he is deriding the phenomena of love or of enthusiasm in the Symposium, or of oracles in the Apology, or of divine intimations when he is speaking of the daemonium of Socrates. He recognizes the lower form of right opinion, as well as the higher one of science, in the spirit of one who desires to include in his philosophy every aspect of human life; just as he recognizes the existence of popular opinion as a fact, and the Sophists as the expression of it.

This Dialogue contains the first intimation of the doctrine of reminiscence and of the immortality of the soul. It may be observed that the fanciful notion of preëxistence is combined with a true view of the unity of knowledge, and of the association of ideas. The germs of two valuable principles of education may also be gathered from the "doctrine of priests and priestesses:" (1) that true knowledge is a knowledge of causes; and (2) that the process of learning consists not in what is brought to the learner, but in what is drawn out of him. The philosophy of ideas is here presented in a less developed form,

than in the Phaedo and Phaedrus. Nothing is said of the pre-existence of ideas of justice, temperance, and the like. Nor is Socrates positive of anything but the duty of inquiry. The doctrine of reminiscence too is explained in a manner more in accordance with fact and experience out of the affinities of nature. Modern philosophy says that all things in nature are dependent on one another; the ancient philosopher has the same truth latent in his mind when he says that out of one thing all the rest may be recovered.

Some lesser traits of the dialogue may be noted also, such as the acute observation that Meno prefers the familiar definition, which is embellished with poetical language, to the better and truer one; or (2) the shrewd reflection, which may admit of an application to modern as well as to ancient teachers, that the Sophists having made large fortunes, this must surely be a criterion of their powers of teaching, for that no man could get a living by shoemaking who was not a good shoemaker; or (3) the remark conveyed, almost in a word, that the verbal sceptic is saved the labor of thought and inquiry. Characteristic also of the temper of the Socratic inquiry is, (4) the proposal to discuss the teachableness of virtue under an hypothesis, after the manner of the mathematicians, and (5) the repetition of the favorite doctrine which occurs so frequently in the earlier and more Socratic Dialogues, and gives a color to all of them — that mankind only desire evil through ignorance.

The character of Meno, like that of Critias, has no relation to the actual circumstances of his life. Plato is silent about his treachery to the ten thousand Greeks, which Xenophon has recorded, as he is also silent about the crimes of Critias. He is a Thessalian Alcibiades, rich and luxurious — a spoiled child of fortune, and is described as the hereditary friend of the great king. Like Alcibiades, he is inspired with an ardent desire of knowledge, and is equally willing to learn of Socrates and the Sophists. He may be regarded as standing in the same relation to Gorgias as Hippocrates in the Protagoras to the other great Sophist. He is the sophisticated youth on whom Socrates tries his cross-examining powers, with a view of exhibiting him and his teachers in their true light, just as in the Charmides, the Lysis, and the Euthydemus, he makes ingenuous boyhood the subject of a similar experiment. Socrates treats Meno in a half playful manner, and tries to exhibit him to himself and to the reader as ignorant of the very elements of dialectics, in which the Sophists have failed to instruct their disciple.

Anytus is the type of the narrow-minded man of the world, who is indignant at innovation, and equally detests the popular teacher and the true philosopher. He seems, like Aristophanes, to regard the new opinions, whether of Socrates or the Sophists, as fatal to Athenian greatness. He is of the same class as Callicles in the Gorgias, but of a different variety; the immoral and sophistical doctrines of Callicles are not attributed to him. The moderation with which he is described is remarkable, if he be the accuser of Socrates; and this seems to be indicated by his parting words. Perhaps Plato may have been desirous of showing that the accusation of Socrates was not to be attributed to badness or malevolence, but rather to a tendency in men's minds. Or he may have been regardless of the historical truth of the characters of his dialogue, as in the case of Meno and Critias. Like Chaerephon the real Anytus was a democrat, and had joined Thrasybulus in the conflict with the thirty.

MENO

PERSONS OF THE DIALOGUE

MENO. A SLAVE OF MENO.
SOCRATES. ANYTUS.

Meno. CAN you tell me, Socrates, whether virtue is acquired by teaching or by practice; or if neither by teaching nor by practice, then whether it comes to man by nature, or in what other way?

Socrates. O Meno, there was a time when the Thessalians were famous among the other Hellenes only for their riches and their riding; but now, if I am not mistaken, they are equally famous for their wisdom, especially at Larisa, which is the native city of your friend Aristippus. And this is Gorgias' doing; for when he came there, the flower of the Aleuadae, of whom your lover Aristippus is one, and the other chiefs of the Thessalians, fell in love with his wisdom. And he has taught you the habit of answering questions in a grand and bold style, which becomes those who know, and is the style in which he himself answers all comers; and any Hellene who likes may ask him anything. How different is our lot! my dear Meno. Here at Athens there is a dearth of the commodity, and all wisdom seems to have emigrated from us to you. I am certain that if you were to ask any Athenian whether virtue was natural or acquired, he would laugh in your face, and say: Stranger, you have far too good an opinion of me; if I were inspired I might answer your question. But now I literally do not know what virtue is, and much less whether it is ac-

quired by teaching or not. And I myself, Meno, living as I do in this region of poverty, am as poor as the rest of the citizens; and I confess with shame that I know literally nothing about virtue; and when I do not know the "quid" of anything how can I know the "quale?" How, if I knew nothing at all of Meno, could I tell if he was fair, or the opposite of fair; rich and noble, or the reverse of rich and noble? Do you think that I could?

Men. No, indeed. But are you in earnest, Socrates, in saying that you do not know what virtue is? And am I to carry back this report of you to Thessaly?

Soc. Not only that, my dear boy, but you may say further that I have never known of any one else who did, in my judgment.

Men. Then you have never met Gorgias when he was at Athens?

Soc. Yes, I have.

Men. And did you not think that he knew?

Soc. I have not a good memory, Meno, and therefore I can not now tell what I thought of him at the time. And I dare say that he did know, and that you know what he said: please, therefore, to remind me of what he said; or, if you would rather, tell me your own view, for I dare say that you and he think much alike.

Men. True.

Soc. Then as he is not here, never mind him, and do you tell me. By the gods, Meno, be generous, and tell me what you say that virtue is; for I shall be truly delighted to find that I have been mistaken, and that you and Gorgias do really know what I have been saying that I have never found anybody who knew.

Men. There will be no difficulty, Socrates, in answering that. Take first the virtue of a man: his virtue is to know how to administer the state, in the

administration of which he will benefit his friends and damage his enemies, and will take care not to suffer damage himself. A woman's virtue may also be easily described: her virtue is to order her house, and keep what is indoors, and obey her husband. Every age, every condition of life, young or old, male or female, bond or free, has a different virtue: there are virtues numberless, and no lack of definitions of them; for virtue is relative to the actions and ages of each of us in all that we do. And the same may be said of vice, Socrates.

Soc. How fortunate I am, Meno! When I ask you for one virtue, you present me with a swarm of them, which are in your keeping. Suppose that I carry on the figure of the swarm, and ask of you, What is the nature of the bee? and you answer that there are many kinds of bees, and I reply: But do bees differ as bees, because there are many and different kinds of them; or are they not rather to be distinguished by some other quality, as for example beauty, size, or shape? How would you answer that?

Men. I should answer that bees do not differ from one another, as bees.

Soc. And suppose that I went on to say: That is what I want to know, Meno; tell me what is that quality in which they do not differ, but are all alike; — you would be able to answer that?

Men. I should.

Soc. And so of the virtues, however many and different they may be, they have all a common nature which makes them virtues; and on this he who would answer the question, "What is virtue?" would do well to have his eye fixed. Do you understand?

Men. I am beginning to understand; but I do not as yet take hold of the question as I could wish.

Soc. When you say, Meno, that there is one virtue

of a man, another of a woman, another of a child, and so on; does this apply only to virtue, or would you say the same of health, and size, and strength? Or is the nature of health always the same, whether in man or woman?

Men. I should say that health, regarded as health, is the same, whether of man or woman.

Soc. And is not this true of size and strength? If a woman is strong, she will be strong by reason of the same form and of the same strength subsisting in her which there is in the man. I mean to say that strength, as strength, whether of man or woman, is the same. Is there any difference?

Men. I think not.

Soc. And will not virtue, as virtue, be the same, whether in a child or in a grown-up person, in a woman or in a man?

Men. I can not help feeling, Socrates, that this case is not like the others.

Soc. Why? Were you not saying that the virtue of a man was to order a state, and the virtue of a woman was to order a house?

Men. I did say that.

Soc. And can either house or state or anything be well ordered without temperance and without justice?

Men. Certainly not.

Soc. Then they who order a state or a house temperately or justly order them with temperance and justice?

Men. Certainly.

Soc. Then both men and women, if they are to be good men and women, must have the same virtues of temperance and justice?

Men. True.

Soc. And can either a young man or an old one be good, if they are intemperate and unjust?

Men. They can not.

Soc. They must be temperate and just?

Men. Yes.

Soc. Then all men are good in the same way, and by participation in the same virtues?

Men. That is the inference.

Soc. And they surely would not have been good in the same way, unless their virtue had been the same?

Men. They would not.

Soc. Then now that the sameness of all virtue has been proven, try and remember what you and Gorgias say that virtue is.

Men. Will you have one definition of them all?

Soc. That is what I am seeking.

Men. What can I say but that virtue is the power of governing mankind?

Soc. And does this definition of virtue include all virtue? Is virtue the same in a child and in a slave, Meno? Ought the child to govern his father, or the slave his master; and would he who governed be any longer a slave?

Men. I think not, Socrates.

Soc. No, indeed; there would be small reason in that. Yet once more, fair friend; according to you, virtue is " the power of governing; " but do you not add " justly " and not unjustly?

Men. Yes, Socrates; I agree to that, for justice is virtue.

Soc. Would you say " virtue," Meno, or " a virtue? "

Men. What do you mean?

Soc. I mean as I might say about anything; that a round, for example, is " a figure " and not simply " figure," and I should say this because there are other figures.

Men. Quite right; and that is just what I am saying about virtue — that there are other virtues as well as justice.

Soc. What are they? tell me the names of them, as I would tell you the names of the other figures if you asked me.

Men. Courage and temperance and wisdom and magnificence are virtues; and there are many others.

Soc. Yes, Meno; and again we are in the same case: in searching after one virtue we have found many, though not in the same way as before; but we have been unable to find the common element which runs through them all.

Men. Why, Socrates, even now I am not able to follow you in the attempt to get at one common notion of virtue as of other things.

Soc. No wonder; but I will try to arrive a little nearer if I can, for you know that all things have a common notion. Suppose now that some one asked you the question which I asked before: Meno, he would say, what is figure? And if you answered "roundness," he would reply to you, in my way of speaking, by asking whether you would say that roundness is "figure" or "a figure;" and you would answer "a figure."

Men. Certainly.

Soc. And for this reason — that there are other figures?

Men. Yes.

Soc. And if he proceeded to ask, what other figures are there? you would have told him.

Men. I should.

Soc. And if he similarly asked what color is, and you answered whiteness, and the questioner rejoined, Would you say that whiteness is color or a color? you

would reply, A color, because there are other colors as well.

Men. I should.

Soc. And if he had said, Tell me what they are, you would have told him of other colors which are colors just as much as whiteness.

Men. Yes.

Soc. And suppose that he were to pursue the matter in my way, he would say: Ever and anon we are landed in particulars, but this is not what I want; tell me then, since you call them by a common name, and say that they are all figures, even when opposed to one another, what is that common nature which you designate as figure — which comprehends straight as well as round, and is no more one than the other — would you not say that?

Men. Yes.

Soc. And in saying that, you do not mean to say that the round is round any more than straight, or the straight any more straight than round?

Men. Certainly not.

Soc. You only assert that the round figure is not more a figure than the straight, or the straight than the round?

Men. That is true.

Soc. What then is this which is called figure? Try and answer. Suppose that when a person asked you this question either about figure or color, you were to reply, Man, I do not understand what you want, or know what you are saying; he would look rather astonished and say: Do you not understand that I am looking for the "simile in multis?" And then he might put the question in another form: Meno, he might say, what is that "simile in multis" which you call figure, and which includes not only round and straight figures, but all? Could you not answer that

question, Meno? I wish that you would try; the attempt will be good practice with a view to the answer about virtue.

Men. I would rather that you should answer, Socrates.

Soc. Shall I indulge you?

Men. By all means.

Soc. And then you will tell me about virtue?

Men. I will.

Soc. Then I must do my best, for there is a prize to be won.

Men. Certainly.

Soc. Well, I will try and explain to you what figure is. What do you say to this answer? — Figure is the only thing that always follows color. I hope that you are satisfied with that, as I am sure I should be content if you would let me have a similar definition of virtue.

Men. But that, Socrates, is a simple answer.

Soc. Why simple?

Men. Because you say that figure is that which always follows color; but if a person says that he does not know what color is, any more than what figure is — what sort of answer would you have given him?

Soc. I should have told him the truth. And if he were a philosopher of the eristic and antagonistic sort, I should say to him: You have my answer, and if I am wrong, your business is to take up the argument and refute me. But if I were talking as you and I now are, as between friends, I should reply in a milder strain and more in the dialectician's way; that is to say, I should not only speak the truth, but I should make use of premisses which the person interrogated would be willing to admit. And this is the way in which I shall approach you. You will acknowledge, will you not, that there is such a thing as an end, or termina-

tion, or extremity? — all of which words I use in the same sense, although I am aware that Prodicus might quarrel with us about this: but still you, I am sure, would speak of a thing as ended or terminated — that is all which I am saying — not anything very difficult.

Men. Yes, I should; and I believe that I understand your meaning.

Soc. And you will speak of a surface and also of a solid, as for example in geometry.

Men. Yes.

Soc. Well then, you are now in a condition to understand my definition of figure. I define figure to be that in which the solid ends; or, more concisely, as the limit of solid.

Men. And now, Socrates, what is color?

Soc. You are outrageous, Meno, in thus plaguing a poor old man to give you an answer, when you won't take the trouble of remembering what is Gorgias' definition of virtue.

Men. When you have told me what I ask, I will tell you, Socrates.

Soc. A man who was blindfolded has only to hear you talking, and he would know that you are a fair creature and have still many lovers.

Men. Why do you say that?

Soc. Why, because you always speak in imperatives: like all beauties when they are in their prime, you are tyrannical; and also, as I suspect, you have found out that I have a weakness for the fair, and therefore I must humor you and answer.

Men. Please do.

Soc. Would you like me to answer you after the manner of Gorgias, which is familiar to you?

Men. I should very much like that.

Soc. Do not he and Empedocles say that there are certain effluences of existence?

Men. Certainly.

Soc. And passages into which and through which the effluences pass?

Men. Exactly.

Soc. And some of the effluences fit into the passages, and some of them are too small or too large?

Men. True.

Soc. And there is such a thing as sight?

Men. Yes.

Soc. And now, as Pindar says, "read my meaning:" — color is an effluence of form, commensurate with sight, and sensible.

Men. That, Socrates, appears to me to be an admirable answer.

Soc. Why, yes, because it is just such an one as you have been in the habit of hearing: and your wit will have discovered that you may explain in the same way the nature of sound and smell, and of many other similar phenomena.

Men. Quite true.

Soc. The answer, Meno, was in the orthodox solemn vein, and therefore was more acceptable to you than the other answer about figure.

Men. Yes.

Soc. And yet, O son of Alexidemus, I can not help thinking that the other was the better; and I am sure that you would be of the same opinion, if you would only stay and be initiated, and were not compelled, as you said yesterday, to go away before the mysteries.

Men. But I will gladly stay, Socrates, if you will give me many such answers.

Soc. Well then, for my own sake as well as for yours, I will do my very best; but I am afraid that I shall not be able to give you very many as good: and now, in your turn, you are to fulfil your promise, and

tell me what virtue is in the universal; and do not make a singular into a plural, as the facetious say of those who break a thing, but deliver virtue to me whole and sound and not broken into a number of pieces. I have given you the pattern.

Men. Well then, Socrates, virtue, as I take it, is the love and attainment of the honorable; that is what the poet says, and I say too —

"Virtue is the desire and power of attaining the honorable."

Soc. And does he who desires the honorable also desire the good?

Men. Certainly.

Soc. Then are there some who desire the evil and others who desire the good! Do not all men, my dear sir, desire good?

Men. No, I do not think that.

Soc. There are some who desire evil?

Men. Yes.

Soc. Do you mean that they think the evils which they desire to be good; or do they know that they are evil and yet desire them?

Men. Both, as I think.

Soc. And do you really imagine, Meno, that a man knows evils to be evils and desires them notwithstanding?

Men. Certainly I do.

Soc. And desire is of possession?

Men. Yes, of possession.

Soc. And does he think that the evils will do good to him who possesses them, or does he know that they will do him harm?

Men. There are some who think that the evils will do them good, and others who know that they will do them harm.

Soc. And, in your opinion, do those who think

that they will do them good know that they are evils?

Men. No, I certainly do not think that.

Soc. Can anything be clearer than that those who are ignorant of the evils do not desire them, but they desire what they suppose to be good when they are really evils, and they who do not know them to be evils, and suppose them to be good, desire good?

Men. Yes, in that case.

Soc. Well, and do those who, as you say, desire evils, and think that evils are hurtful to the possessor of them, know that they will be hurt by them?

Men. They must know that.

Soc. And do they not suppose that they are miserable in the degree that they are hurt?

Men. That again they must believe.

Soc. And are not the miserable ill-fated?

Men. Yes, indeed.

Soc. And does any one desire to be miserable and ill-fated?

Men. I should say not, Socrates.

Soc. But if there is no one who desires to be miserable, there is no one, Meno, who desires evil; for what is misery but the desire and possession of evil?

Men. That appears to be the truth, Socrates, and I admit that nobody desires evil.

Soc. And yet, were you not saying just now that virtue is the desire and power of attaining good?

Men. Yes, I did say that.

Soc. But granting that, then the desire of good is common to all, and one man is no better than another in that?

Men. True.

Soc. And if one man is not better than another in desiring good, he must be better in the power of attaining good?

Men. Exactly.

Soc. Then, according to your definition, virtue would appear to be the power of attaining good?

Men. I entirely approve, Socrates, of the manner in which you view this matter.

Soc. Then now let us see whether this is true from another point of view; for I dare say that you are right. What you say is, that virtue is the power of attaining good?

Men. Yes.

Soc. And you would say that goods are such as health and wealth and the possession of gold and silver, and having office and honor in the state — these are what you would call goods?

Men. Yes, all these.

Soc. Then, according to Meno, who is the hereditary friend of the great king, virtue is the power of getting silver and gold; and would you add piously, justly, or do you deem this of no consequence? And is any mode of acquisition, even if unjust or dishonest, equally to be regarded as virtue?

Men. Not virtue, Socrates, but vice.

Soc. Then justice or temperance or holiness, or some other part of virtue, as would appear, must accompany the acquisition, and without them the mere acquisition of good will not be virtue.

Men. Why, how can there be virtue without these?

Soc. And the non-acquisition of gold and silver in a dishonest manner may be equally virtue?

Men. True.

Soc. Then the acquisition of such goods is no more virtue than the non-acquisition of them, but whatever is accompanied by justice or honesty is virtue, and whatever is devoid of justice is vice?

Men. There can be no doubt about that, in my judgment.

Soc. And were we not saying just now that justice, temperance, and the like, were each of them a part of virtue?

Men. Yes.

Soc. And so, Meno, this is the way in which you mock me.

Men. Why do you say that, Socrates?

Soc. Why, because I asked you to deliver virtue into my hands whole and unbroken, and I gave you a pattern according to which you were to frame your answer; and you have already forgotten this, and tell me that virtue is the power of attaining good justly, or with justice — thus acknowledging justice to be a part of virtue.

Men. Yes.

Soc. Then it follows from your own admissions, that virtue is doing what you do with a part of virtue; for justice and the like are each of them parts of virtue.

Men. What of that?

Soc. What of that! Why, did not I ask you to tell me the nature of virtue as a whole? And you are very far from telling me this; but declare every action to be virtue which is done with a part of virtue; as though you had already told me the whole of virtue, and as if I should know what the whole was when frittered away into little pieces. And, therefore, my dear Meno, I fear that I must begin again and repeat the same question: What is virtue? for otherwise, I can only say, that every action done with a part of virtue is virtue; what else is the meaning of saying that every action done with justice is virtue? Don't you think that the question requires to be repeated; for can any one who does not know virtue know a part of virtue?

Men. No; I do not say that he can.

Soc. Do you remember how, in the example of figure, we rejected any answer given in terms which were as yet unexplained or unadmitted?

Men. Yes, Socrates; and we were right in that.

Soc. Well, my friend, do as we did then: and do not suppose that we can explain to any one the nature of virtue as a whole through some unexplained portion of virtue, or anything at all in that fashion; for that only leads to a repetition of the old question, What is virtue? Now, am I not right?

Men. I believe that you are.

Soc. Then begin again, and answer me, What, according to you and your friend, is the definition of virtue?

Men. O Socrates; I used to be told, before I knew you, that you are always puzzling yourself and others; and now you are casting your spells over me, and I am simply getting bewitched and enchanted, and am at my wits' end. And if I may venture to make a jest upon you, you seem to me both in your appearance and in your power over others to be very like the flat torpedo fish, who torpifies those who come near him with the touch, as you have now torpified me, I think. For my soul and my tongue are really torpid, and I do not know how to answer you; and though I have been delivered of an infinite variety of speeches about virtue before now, and to many persons — and very good ones they were, as I thought — now I can not even say what virtue is. And I think that you are very wise in not voyaging and going away from home, for if you did in other places as you do in Athens, you would be cast into prison as a magician.

Soc. You are a rogue, Meno, and had all but caught me.

Men. What do you mean, Socrates?

Soc. I can tell why you made a simile about me.

Men. Why, do you think?

Soc. In order that I might make another simile about you. For I know that all pretty young gentlemen like to have pretty similes made about them; and well they may: but I shall not return the compliment. As to my being a torpedo, if the torpedo is torpid as well as the cause of torpidity in others, then indeed I am a torpedo, but not otherwise; for I perplex others, not because I am clear, but because I am utterly perplexed myself. And now I know not what virtue is, and you seem to be in the same case, although you did once know before you touched me. However, I have no objection to join with you in the inquiry.

Men. And how will you inquire, Socrates, into that which you know not? What will you put forth as the subject of inquiry? And if you find what you want, how will you ever know that this is what you did not know?

Soc. I know, Meno, what you mean; but just see what a tiresome dispute you are introducing. You argue that a man can not inquire either about that which he knows, or about that which he does not know; for he knows, and therefore has no need to inquire about that — nor about that which he does not know; for he does not know that about which he is to inquire.

Men. Well, Socrates, and is not the argument sound?

Soc. I think not.

Men. Why not?

Soc. I will tell you why. I have heard from certain wise men and women who spoke of things divine that —

Men. What did they say?

Soc. They spoke of a glorious truth, as I conceive.

Men. What was that? and who were they?

Soc. Some of them were priests and priestesses,

who have studied how they might be able to give a reason of their profession: there have been poets also, such as the poet Pindar and other inspired men. And what they say is — mark, now, and see whether their words are true — they say that the soul of man is immortal, and at one time has an end, which is termed dying, and at another time is born again, but is never destroyed. And the moral is, that a man ought to live always in perfect holiness. For in the ninth year Persephone sends the souls of those from whom she has received the penalty of ancient crime back again into the light of this world, and these are they who become noble kings and mighty men and great in wisdom and are called saintly heroes in after ages. The soul, then, as being immortal, and having been born again many times, and having seen all things that there are, whether in this world or in the world below, has knowledge of them all; and it is no wonder that she should be able to call to remembrance all that she ever knew about virtue, and about everything; for as all nature is akin, and the soul has learned all things, there is no difficulty in her eliciting, or as men say learning, all out of a single recollection, if a man is strenuous and does not faint; for all inquiry and all learning is but recollection. And therefore we ought not to listen to this sophistical argument about the impossibility of inquiry: that is a saying which will make us idle, and is sweet only to the sluggard; but the other saying will make us active and enterprising. In that confiding, I will gladly inquire with you into the nature of virtue.

Men. Yes, Socrates; but what do you mean by saying that we do not learn, and that what we call learning is only a process of recollection? Can you teach me that?

Soc. I told you, Meno, that you were a rogue, and

now you ask whether I can teach you, when I am saying that there is no teaching, but only recollection; and thus you imagine that you will involve me in a contradiction.

Men. Indeed, Socrates, I protest that I had no such intention. I only asked the question from habit; but if you can prove to me that what you say is true, I wish that you would.

Soc. That is no easy matter, but I will try to please you to the utmost of my power. Suppose that you call one of your numerous attendants, that I may demonstrate on him.

Men. Certainly. Come hither, boy.

Soc. He is Greek, and speaks Greek, does he not?

Men. Yes; he was born in the house.

Soc. Attend now to the questions which I ask him, and observe whether he learns of me or only remembers.

Men. I will.

Soc. Tell me, boy, do you know that a figure like this is a square?

Boy. I do.

Soc. And you know that a square figure has these four lines equal?

Boy. Certainly.

Soc. And these lines which I have drawn through the middle of the square are also equal?

Boy. Yes.

Soc. A square may be of any size?

Boy. Certainly.

Soc. And if one side of the figure be of two feet, and the other side be of two feet, how much will the whole be? Let me explain: if in one direction the space was of two feet, and in the other direction of one foot, the whole would be of two feet taken once?

Boy. Yes.

Soc. But since this side is also of two feet, there are twice two feet?

Boy. There are.

Soc. Then the square is of twice two feet?

Boy. Yes.

Soc. And how many are twice two feet? count and tell me.

Boy. Four, Socrates.

Soc. And might there not be another square twice as large as this, and having like this the lines equal?

Boy. Yes.

Soc. And of how many feet will that be?

Boy. Of eight feet.

Soc. And now try and tell me the length of the line which forms the side of that double square: this is two feet — what will that be?

Boy. Clearly, Socrates, that will be double.

Soc. Do you observe, Meno, that I am not teaching the boy anything, but only asking him questions; and now he fancies that he knows how long a line is necessary in order to produce a figure of eight square feet; does he not?

Men. Yes.

Soc. And does he really know?

Men. Certainly not.

Soc. He only guesses that [because the square is double], the line is double.

Men. True.

Soc. Observe him while he recalls the steps in regular order. (*To the Boy.*) Tell me, boy, do you assert that a double space comes from a double line? Remember that I am not speaking of an oblong, but of a square, and of a square twice the size of this one — that is to say of eight feet; and I want to know whether you still say that a double square comes from a double line?

Boy. Yes.

Soc. But does not this line become doubled if we add another such line here?

Boy. Certainly.

Soc. And four such lines will make a space containing eight feet?

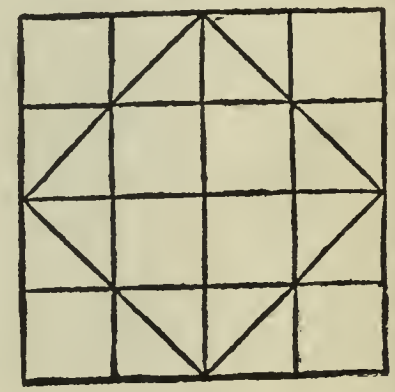
Boy. Yes.

Soc. Let us describe such a figure: is not that what you would say is the figure of eight feet?

Boy. Yes.

Soc. And are there not these four divisions in the figure, each of which is equal to the figure of four feet?

Boy. True.



Soc. And is not that four times four?

Boy. Certainly.

Soc. And four times is not double.

Boy. No, indeed.

Soc. But how much?

Boy. Four times as much.

Soc. Therefore the double line, boy, has formed a space, not twice, but four times as much.

Boy. True.

Soc. And four times four are sixteen — are they not?

Boy. Yes.

Soc. What line would give you a space of eight feet, as this gives one of sixteen feet; — do you see?

Boy. Yes.

Soc. And the space of four feet is made from this half line?

Boy. Yes.

Soc. Good; and is not a space of eight feet twice the size of this, and half the size of the other?

Boy. Certainly.

Soc. Such a space, then, will be made out of a line greater than this one, and less than that one?

Boy. Yes; that is what I think.

Soc. Very good; I like to hear you say what you think. And now tell me, is not this a line of two feet and that of four?

Boy. Yes.

Soc. Then the line which forms the side of eight feet ought to be more than this line of two feet, and less than the other of four feet?

Boy. It ought.

Soc. Try and see if you can tell me how much it will be.

Boy. Three feet.

Soc. Then if we add a half to this line of two, that will be the line of three. Here are two and there is one; and on the other side, here are two also and there is one: and that makes the figure of which you speak?

Boy. Yes.

Soc. But if there are three feet this way and three feet that way, the whole space will be three times three feet?

Boy. That is evident.

Soc. And how much are three times three feet?

Boy. Nine.

Soc. And how much is the double of four?

Boy. Eight.

Soc. Then the figure of eight is not made out of a line of three?

Boy. No.

Soc. But from what line? — tell me exactly; and if you would rather not reckon, try and show me the line.

Boy. Indeed, Socrates, I do not know.

Soc. Do you see, Meno, what advances he has made in his power of recollection? He did not know at first, and he does not know now, what is the side of a figure of eight feet: but then he thought that he knew, and answered confidently as if he knew, and had no difficulty; but now he has a difficulty, and neither knows nor fancies that he knows.

Men. True.

Soc. Is he not better off in knowing his ignorance?

Men. I think that he is.

Soc. If we have made him doubt, and given him the "torpedo's shock," have we done him any harm?

Men. I think not.

Soc. We have certainly done something that may assist him in finding out the truth of the matter; and now he will wish to remedy his ignorance, but then he would have been ready to tell all the world that the double space should have a double side.

Men. True.

Soc. But do you suppose that he would ever have inquired or learned what he fancied that he knew and did not know, until he had fallen into perplexity under the idea that he did not know, and had desired to know?

Men. I think not, Socrates.

Soc. Then he was the better for the torpedo's touch?

Men. I think that he was.

Soc. Mark now the farther development. I shall only ask him, and not teach him, and he shall share the inquiry with me: and do you watch and see if you find me telling or explaining anything to him, instead of eliciting his opinion. Tell me, boy, is not this a square of four feet which I have drawn?

Boy. Yes.

Soc. And now I add another square equal to the former one?

Boy. Yes.

Soc. And a third, which is equal to either of them?

Boy. Yes.

Soc. Suppose that we fill up the vacant corner.

Boy. Very good.

Soc. Here, then, there are four equal spaces?

Boy. Yes.

Soc. And how many times is this space larger than this?

Boy. Four times.

Soc. But it ought to have been twice only, as you will remember.

Boy. True.

Soc. And does not this line, reaching from corner to corner, bisect each of these spaces?

Boy. Yes.

Soc. And are there not here four equal lines which contain this space?

Boy. There are.

Soc. Look and see how much this space is.

Boy. I do not understand.

Soc. Has not each interior line cut off half of the four spaces?

Boy. Yes.

Soc. And how many such spaces are there in this division?

Boy. Four.

Soc. And how many in this?

Boy. Two.

Soc. And four is how many times two?

Boy. Twice.

Soc. And this space is of how many feet?

Boy. Of eight feet.

Soc. And from what line do you get this figure?

Boy. From this.

Soc. That is, from the line which extends from corner to corner?

Boy. Yes.

Soc. And that is the line which the learned call the diagonal. And if this is the proper name, then you, Meno's slave, are prepared to affirm that the double space is the square of the diagonal?

Boy. Certainly, Socrates.

Soc. What do you say of him, Meno? Were not all these answers given out of his own head?

Men. Yes, they were all his own.

Soc. And yet, as we were just now saying, he did not know?

Men. True.

Soc. And yet he had those notions in him?

Men. Yes.

Soc. Then he who does not know still has true notions of that which he does not know?

Men. He has.

Soc. And at present these notions are just wakening up in him, as in a dream; but if he were frequently asked the same questions, in different forms, he would know as well as any one at last?

Men. I dare say.

Soc. Without any one teaching him he will recover his knowledge for himself, if he is only asked questions?

Men. Yes.

Soc. And this spontaneous recovery in him is recollection?

Men. True.

Soc. And this knowledge which he now has must he not either have acquired or always possessed?

Men. Yes.

Soc. But if he always possessed this knowledge he would always have known; or if he has acquired the

knowledge, he could not have acquired it in this life, unless he has been taught geometry; for he may be made to do the same with all geometry and every other branch of knowledge. Now, has any one ever taught him? You must know that, if, as you say, he was born and bred in your house.

Men. And I am certain that no one ever did teach him.

Soc. And yet has he not the knowledge?

Men. That, Socrates, is most certain.

Soc. But if he did not acquire this knowledge in this life, then clearly he must have had and learned it at some other time?

Men. That is evident.

Soc. And that must have been the time when he was not a man?

Men. Yes.

Soc. And if there have been always true thoughts in him, both at the time when he was and was not a man, which only need to be awakened into knowledge by putting questions to him, his soul must have always possessed this knowledge, for he always either was or was not a man?

Men. That is clear.

Soc. And if the truth of all things always existed in the soul, then the soul is immortal. Wherefore be of good cheer, and try to recollect what you do not know, or rather do not remember.

Men. I feel, somehow, that I like what you are saying.

Soc. And I, Meno, like what I am saying. Some things I have said of which I am not altogether confident. But that we shall be better and braver and less helpless if we think that we ought to inquire, than we should have been if we indulged in the idle fancy that there was no knowing and no use in searching

after what we know not; — that is a theme upon which I am ready to fight, in word and deed, to the utmost of my power.

Men. That again, Socrates, appears to me to be well said.

Soc. Then, as we are agreed that a man should inquire about that which he does not know, shall you and I make an effort to inquire together into the nature of virtue?

Men. By all means, Socrates. And yet I would rather return to my original question, Whether virtue comes by instruction, or by nature, or is gained in some other way?

Soc. Had I the command of you as well as of myself, Meno, I would not have inquired whether virtue is given by instruction or not, until we had first ascertained "what virtue is." But as you never think of controlling yourself, but only of controlling him who is your slave, and this is your notion of freedom, I must yield to you, for I can not help. And therefore I have now to inquire into the qualities of that of which I do not at present know the nature. At any rate, will you condescend a little, and allow the question "Whether virtue is given by instruction, or in any other way," to be argued upon hypothesis? As the geometrician, when he is asked whether a certain triangle is capable of being described in a certain circle, will reply: "I can not tell you as yet; but I will offer a hypothesis which may assist us in forming a conclusion: If the space be such that when you have drawn along the line given by it another figure, the original figure is reduced by a space equal to that which is added,[1] then one consequence follows, and if this is impossible then some other; and therefore I wish to assume a hypothesis before I tell you whether

[1] Or, in simpler phrase, "If so much be taken from the triangle."

this triangle is capable of being included in the circle:" — that is a geometrical hypothesis. And we too, as we know not the nature and qualities of virtue, must ask, whether virtue is or is not taught, under a hypothesis: as thus, if virtue is of such a class of mental goods, will it be taught or not? Let the first hypothesis be that virtue is or is not knowledge, — in that case will it be taught or not? or, as we were just now saying, "remembered?" For there is no use in disputing about the name. But is virtue taught or not? or rather, does not every one see that knowledge alone is taught?

Men. I agree.

Soc. Then if virtue is knowledge, virtue will be taught?

Men. Certainly.

Soc. Then now we have made a quick end of this question: if virtue is of such a nature, it will be taught; and if not, not?

Men. Certainly.

Soc. And the next question is, whether virtue is knowledge or of another species?

Men. Yes, that appears to be the question which comes next in order.

Soc. Do we not say that virtue is a good? This is a hypothesis which is not set aside.

Men. Certainly.

Soc. Now, if there be any sort of good which is parted from knowledge, virtue may be that good; but if knowledge embraces all good, then we shall be right in thinking that knowledge is some sort of good?

Men. True.

Soc. And virtue makes us good?

Men. Yes.

Soc. And if we are good, then we are profitable; for all good things are profitable?

Men. Yes.

Soc. Then virtue is profitable?

Men. That is the only inference.

Soc. Then now let us see what are the things that severally profit us. Health and strength, and beauty and wealth — these, as we say, are the sort of things which profit us?

Men. True.

Soc. And yet these things may also sometimes do us harm: would you not admit that?

Men. Yes.

Soc. And what is the guiding principle which makes them profitable or the reverse? Are they not profitable when they are rightly used, and hurtful when they are not rightly used?

Men. Certainly.

Soc. Next, let us consider the goods of the soul: these are temperance, justice, courage, quickness of apprehension, memory, magnificence, and the like?

Men. Surely.

Soc. And such of these as are not knowledge, but of another sort, are sometimes profitable and sometimes hurtful; as, for example, courage, which has no prudence, but is only a sort of confidence? When a man has no sense he is harmed by courage, but when he has sense he is profited?

Men. True.

Soc. And the same may be said of temperance and quickness of apprehension; whatever things are learned or done with sense are profitable, but when done without sense they are hurtful?

Men. Very true.

Soc. And in general, all that the soul attempts or endures, when under the guidance of wisdom, ends in happiness; but when she is under the guidance of folly, in the opposite?

Men. That appears to be true.

Soc. If then virtue is a good of the soul, and is to be profitable, it must be wisdom or prudence, since some of the goods of the soul are either profitable or hurtful by the addition of wisdom or of folly; and therefore if virtue is profitable, virtue must be a sort of wisdom or prudence?

Men. That is my view.

Soc. And the other goods, such as wealth and the like, of which we were just now saying that they are sometimes good and sometimes evil, are they not also made profitable or hurtful, accordingly as the soul guides and uses them rightly or wrongly — as in the soul generally, wisdom is the useful and folly the hurtful guide?

Men. True.

Soc. And the wise soul guides them rightly, and the foolish soul wrongly?

Men. Yes.

Soc. And is not this universally true of human nature? All other things hang upon the soul, and the things of the soul hang upon wisdom, if they are to be good; and according to this view of the question that which profits is wisdom — and virtue, as we say, is profitable?

Men. Certainly.

Soc. And thus we arrive at the conclusion that virtue is either wholly or partly wisdom?

Men. I think that what you are saying, Socrates, is very true.

Soc. But if this is true, then the good are not by nature good?

Men. I think not.

Soc. If they had been, there would assuredly have been discerners of characters among us who would have known our future great men; and we should

have taken them on their showing, and when we had got them, we should have kept them in the citadel out of the way of harm, and set a stamp upon them more than upon gold, in order that no one might tamper with them; and then when they grew up they would have been useful to the state?

Men. Yes, Socrates, that would have been the way.

Soc. But if the good are not by nature good, are they made good by instruction?

Men. There is no other alternative, Socrates. On the supposition that virtue is knowledge, there can be no doubt that virtue is taught.

Soc. Yes, indeed; but what if the supposition is erroneous?

Men. I certainly thought just now that we were right.

Soc. Yes, Meno; but a principle which has any soundness should stand firm not only now and then, but always and forever.

Men. Well; and why are you so slow of heart to believe that knowledge is virtue?

Soc. I will try and tell you why, Meno. I do not retract the assertion that if virtue is knowledge it may be taught; but I fear that I have some reason in doubting whether virtue is knowledge: for consider now and say whether virtue, or anything that is taught, must not have teachers and disciples?

Men. Surely.

Soc. And again, may not that art of which there are neither teachers nor disciples be assumed to be incapable of being taught?

Men. True; but do you think that there are no teachers of virtue?

Soc. I have certainly often inquired whether there were any, and taken great pains to find them, and have never succeeded; and many have assisted me in

the search, and they were the persons whom I thought the most likely to know. Here is Anytus, who is sitting by us at the very moment when he is wanted; he is the person whom we should ask. In the first place, he is the son of a wealthy and wise father, Anthemion, who acquired his wealth, not by accident or gift, like Ismenias the Theban (who has recently made himself as rich as a Polycrates), but by his own skill and industry, and he is a well-conditioned, modest man, not insolent, or overbearing, or annoying; moreover, he has given his son a good education, as the Athenian people certainly appear to think, for they choose him to fill the highest offices. And these are the sort of men from whom you are likely to learn whether there are any teachers of virtue, and who they are. Please, Anytus, to help me and your friend Meno in answering our question, Who are the teachers? Consider the matter thus: If we wanted Meno to be a good physician, to whom should we send him? Should we not send him to the physicians?

Any. Certainly.

Soc. Or if we wanted him to be a good cobbler, should we not send him to the cobblers?

Any. Yes.

Soc. And so forth?

Any. Yes.

Soc. Let me trouble you with one more question. When we say that we should be right in sending him to the physicians if we wanted him to be a physician, do we mean that we should be right in sending him to those who profess the art, rather than to those who don't, and to those who demand payment for teaching the art, and profess to teach it to any one who will come and learn? If we were right in sending him, would that be the reason?

Any. Yes.

Soc. And might not the same be said of flute-playing, and of the other arts? No man who wanted to make a man a flute-player would refuse to send him to those who profess to teach the art for money, and trouble other persons to give him instruction who do not profess to teach, and never had a disciple in that branch of knowledge which we want him to acquire — that would be the height of folly.

Any. Yes, by Zeus, and of ignorance too.

Soc. Very good. And now you are in a position to advise with me about my friend Meno. He has been saying to me, Anytus, that he desires to attain that wisdom and virtue, by which men order the state or the house, and honor their parents, and know when to receive and when to send away citizens and strangers, as a good man should. Now, to whom ought we to send him in order that he may learn this virtue? Does not the previous argument imply clearly that he ought to go to those who profess and avouch that they are the common teachers of Hellas, and are ready to impart instruction to any one who likes, at a fixed price?

Any. Whom do you mean, Socrates?

Soc. You surely know, do you not, Anytus, that these are the people whom mankind describe as Sophists?

Any. By Heracles, Socrates, forbear! I only hope that no friend or kinsman or acquaintance of mine, whether citizen or stranger, will ever be so mad as to allow himself to be corrupted by them; for they are a manifest pest and corrupting influence of those who have to do with them.

Soc. What do you mean, Anytus? Of all the people who profess that they know how to do men good, are these the only ones who not only do them no good, but positively corrupt those who are en-

trusted to them? That is very singular. And moreover, in return they publicly demand money. Indeed, I can not believe this; for I know of a single man, Protagoras, who made more out of his craft than the illustrious Pheidias, or any ten other statuaries. How could that be? A mender of old shoes, or patcher up of clothes, who made the shoes or clothes worse than he received them, could not have remained thirty days undetected, and would very soon have starved; whereas, during more than forty years, Protagoras was corrupting his disciples, and sending them from him worse than he received them, and yet all Hellas failed in detecting him. For, if I am not mistaken, he was about seventy years old at his death, forty of which were spent in the practice of his profession; and during all that time he had a good reputation, which to this day he retains: and not only Protagoras, but many others have a good reputation; some who lived before him, and others who are still living. Now, when you say that they deceived and corrupted the youth, are they to be supposed to have corrupted them intentionally or unintentionally? Can those who were deemed by many to be the wisest men of Hellas have been out of their minds?

Any. Out of their minds! No, Socrates; the young men who gave their money to them were out of their minds, and their relations and guardians who entrusted them to their care were still more out of their minds, and most of all the cities who allowed them to come in and did not drive them out, citizen or stranger alike.

Soc. Has any of the Sophists wronged you, Anytus? What makes you so angry with them?

Any. No, indeed, neither I nor any of my belongings has ever had, nor would I suffer them to have, anything to do with them.

Soc. Then you are entirely unacquainted with them?

Any. And I have no wish to be acquainted.

Soc. Then, my dear friend, how can you know whether a thing is good or bad of which you are wholly ignorant?

Any. Quite well; I am quite sure that I know what manner of men these are, whether I know them or not.

Soc. You must be a diviner, Anytus, for I really can not make out, judging from your own words, how, if you are not acquainted with them, you know about them. But I am not inquiring of you who are the teachers who will corrupt Meno (let them be, if you please, the Sophists); I only ask you to tell him who there is in this great city who will teach him how to become eminent in the virtues which I was just now describing. He is the friend of your family, and you will oblige him.

Any. Why don't you tell him?

Soc. I have told him whom I supposed to be the teachers of these things; but I learn from you that I am utterly at fault, and I dare say that you are right. And now I wish that you, on your part, would tell me to whom among the Athenians he should go. Whom would you name?

Any. Why single out individuals? Any Athenian gentleman, taken at random, if he will mind him, will do him far more good than the Sophists.

Soc. And did those gentlemen grow of themselves; and without having been taught by any one, were they nevertheless able to teach others that which they never learned themselves?

Any. I imagine that they learned of the previous generation of gentlemen. Have there not been many good men in this city?

Soc. Yes, certainly, Anytus; and many good statesmen also there always have been, and there are still, in the city of Athens. But the question is whether they were also good teachers of their own virtue; — not whether there are, or have been, good men, but whether virtue can be taught, is the question which we have been discussing. Now, do we mean to say that the good men of our own and of other times knew how to impart to others that virtue which they had themselves; or is this virtue incapable of being communicated or imparted by one man to another? That is the question which I and Meno have been arguing. Look at the matter in your own way. Would you not admit that Themistocles was a good man?

Any. Certainly; no man better.

Soc. And must not he then have been a good teacher, if any man ever was a good teacher, of his own virtue?

Any. Yes, certainly, — if he wanted to be that.

Soc. But would he not have wanted? He would, at any rate, have desired to make his own son a good man and a gentleman; he could not have been jealous of him, or have intentionally abstained from imparting to him his own virtue. Did you never hear that he made Cleophantus, who was his son, a famous horseman? — he would stand upright on horseback and hurl a javelin; and many other marvellous things he could do which his father had him taught; and in anything which the skill of a master could teach him he was well trained. Have you not heard from our elders of this?

Any. I have.

Soc. Then no one could say that his son showed any want of capacity?

Any. Possibly not.

Soc. But did any one, old or young, ever say in your hearing that Cleophantus, the son of Themistocles, was a wise or good man, as his father was?

Any. I have certainly never heard that.

Soc. And if virtue could have been taught, would he have sought to train him in these sort of accomplishments, and allowed him who, as you must remember, was his own son, to be no better than his neighbors in those qualities in which he himself excelled?

Any. Indeed, indeed, I think not.

Soc. Here then is a teacher of virtue whom you admit to be among the best men of the past. Let us take another, — Aristides, the son of Lysimachus: would you not acknowledge that he was a good man?

Any. To be sure, I should.

Soc. And did not he train his son Lysimachus better than any other Athenian in all that could be done for him by the help of masters? But what has been the result? Is he a bit better than any other mortal? He is an acquaintance of yours, and you see what he is like. There is Pericles, again, magnificent in his wisdom; and he, as you know, had two sons, Paralus and Xanthippus.

Any. I know.

Soc. And you know, also, that he taught them to be unrivalled horsemen, and had them trained in music and gymnastics and all sorts of arts — in these respects they were on a level with the best — and had he no wish to make good men of them? Nay, he must have wished that. But I suspect that virtue could not be taught. And that you may not suppose that the incompetent teachers are the meaner sort of Athenians and few in number, remember again that Thucydides had two sons, Melesias and Stephanus, whom he

trained chiefly in wrestling; and they too had an excellent education, and were the best wrestlers in Athens: one of them he committed to the care of Xanthias, and the other of Eudorus, who had the reputation of being the most celebrated wrestlers of that day. Do you remember them?

Any. I have heard of them.

Soc. Now, can there be a doubt that Thucydides, who had his children taught wrestling, at a considerable expense, would have taught them to be good men, which would have cost him nothing, if virtue could have been taught? Will you reply that he was a mean man, and had not many friends among the Athenians and allies? Nay, but he was of a great family, and a man of influence at Athens and in all Hellas, and, if virtue could have been taught, he would have found out some one either in or out of Hellas who would have made good men of his sons, if he could not himself spare the time from cares of state. Again I suspect, friend Anytus, that virtue is not a thing which can be taught?

Any. Socrates, I think that you are too ready to speak evil of men: and, if you will take my advice, I would recommend you to be careful. Perhaps there is no city in which it is not easier to do men harm than to do them good, and this is certainly the case at Athens, as I believe that you know.

Soc. O Meno, I think that Anytus is in a rage. And he may well be in a rage, for he thinks, in the first place, that I am defaming these gentlemen; and then, in the second place, he thinks that he is one of them. But when he understands, which he does not at present, what is the meaning of defamation, he will forgive me. Meanwhile I will return to you, Meno; for I suppose that there are gentlemen in your region too?

Men. Certainly there are.

Soc. And are they willing to teach the young? and do they profess to be teachers? and do they agree that virtue is taught?

Men. No indeed, Socrates, they are anything but agreed; and you may hear them saying at one time that virtue can be taught, and then again the reverse.

Soc. Can we call them teachers who do not acknowledge the possibility of their own vocation?

Men. I think not, Socrates.

Soc. And what do you think of these Sophists, who are the only professors? Do they seem to you to be teachers of virtue?

Men. I often wonder, Socrates, that you never hear Gorgias promising to teach virtue: and when he hears others promising this he only laughs at them; but he thinks that you ought to teach men to speak.

Soc. Then do you not think that the Sophists are teachers?

Men. I can not tell you, Socrates; like the rest of the world, I am in doubt, and sometimes I think that they are teachers and sometimes not.

Soc. And are you aware that not you only and other political men have doubts whether virtue can be taught or not, but that Theognis the poet says the very same thing — are you aware of that?

Men. Where does he imply that?

Soc. In the elegiac verses, in which he says: —

"Eat and drink and sit with the mighty, and make yourself agreeable to them; for from the good you will learn what is good, but if you mix with the bad you will lose the intelligence which you already have."

Do you observe that here he seems to imply that virtue can be taught?

Men. Clearly.

Soc. But in some other verses he shifts about and says: —

"If understanding could be created and put into a man, then they (who were able to accomplish this) would have obtained great rewards."

And again: —

"Never did a bad son spring from a good sire because he heard the voice of instruction; not by teaching will you ever make a bad man into a good one."

And this, as you may remark, is a contradiction of the other.

Men. That is palpable.

Soc. And is there anything else of which the teachers and professors are not only asserted not to be teachers of others, but to be ignorant themselves of that which they profess to teach and bad at the knowledge of that which they preach; and about which the acknowledged "gentlemen" are themselves saying sometimes that "this thing can be taught," and sometimes not. Can you say that they are teachers of authority whose ideas are in this state of confusion?

Men. I should say, certainly not.

Soc. But if neither the Sophists nor the gentlemen are teachers, clearly there can be no other teachers?

Men. No.

Soc. And if there are no teachers, neither are there disciples?

Men. Agreed.

Soc. And we have admitted that a thing can not be taught of which there are neither teachers nor disciples?

Men. We have.

Soc. And there are no teachers of virtue to be found anywhere?

Men. There are not.

Soc. And if there are no teachers neither are there scholars?

Men. I think that is true.

Soc. Then virtue can not be taught?

Men. Not if we are right in our view. But I can not believe, Socrates, that there are no good men in the state. And if there are, how did they come into existence?

Soc. I am afraid, Meno, that you and I are not good for much, and that Gorgias has been as poor an educator of you as Prodicus has been of me. Certainly we shall have to look to ourselves, and try to find some one who will help to improve us. This I say, because I observe that in the previous discussion none of us remarked that right and good action is possible to man under other guidance than that of knowledge; — and indeed if this be denied, there is no seeing how there can be any good men at all.

Men. How do you mean, Socrates?

Soc. I mean this — that good men must necessarily be useful or profitable. Were we not right in admitting that?

Men. Yes.

Soc. And in supposing that they will be useful only if they are true guides of action — in that we were also right?

Men. Yes.

Soc. But we do not seem to have been right in saying that knowledge only was the right and good guide of action.

Men. What do you mean by the word "right?"

Soc. I will explain. If a man knew the way to Larisa, or anywhere else, and went to the place and led others thither, would he not be a right and good guide?

Men. Certainly.

Soc. And a person who had a right opinion about the way, but had never been and did not know, might be a good guide also, might he not?

Men. Certainly.

Soc. And while he has true opinion about that which the other knows, he will be just as good a guide if he thinks the truth, as if he knows the truth?

Men. Exactly.

Soc. Then true opinion is as good a guide to correct action as wisdom; and that was the point which we omitted in our speculation about the nature of virtue, when we said that wisdom only is the guide of right action; whereas there is also right opinion.

Men. True.

Soc. Then right opinion is not less useful than knowledge?

Men. The difference, Socrates, is only that he who has knowledge will always be right; but he who has right opinion will sometimes be right, and sometimes not right.

Soc. What do you mean? Can he be wrong who has right opinion, as long as he has right opinion?

Men. I admit the cogency of that, and therefore, Socrates, allowing this, I wonder that knowledge should be preferred to right opinion — or why they should ever differ.

Soc. And shall I explain this wonder to you?

Men. Do tell me.

Soc. You would not wonder if you had ever observed the images of Daedalus; but perhaps you have not got them in your country?

Men. Why do you refer to them?

Soc. Because they require to be fastened in order

to keep them, and if they are not fastened they will run away.

Men. Well, what of that?

Soc. I mean to say that it is not much use possessing one of them if they are at liberty, for they will walk off like runaway slaves; but when fastened, they are of great value, for they are really beautiful works of art. Now this is an illustration of the nature of true opinions: while they abide with us they are beautiful and fruitful, but they run away out of the human soul, and do not remain long, and therefore they are not of much value until they are fastened by the tie of the cause; and this fastening of them, friend Meno, is recollection, as has been already agreed by us. But when they are bound, in the first place, they have the nature of knowledge; and, in the second place, they are abiding. And this is why knowledge is more honorable and excellent than true opinion, because fastened by a chain.

Men. Yes indeed, Socrates, that I should conjecture to be the truth.

Soc. I too speak not as one who knows; and yet that knowledge differs from true opinion is not a matter of conjecture with me. There are not many things which I should affirm that I knew, but that is most certainly one of them.

Men. You are right, Socrates.

Soc. And am I not right also in saying that true opinion is as good a guide in the performance of an action as knowledge?

Men. That also appears to me to be true.

Soc. Then right opinion is not a whit inferior to knowledge, or less useful in action; nor is the man who has right opinion inferior to him who has knowledge?

Men. That is true.

Soc. And surely the good man has been acknowledged by us to be useful?

Men. Yes.

Soc. Seeing then that men become good and useful to states, not only because they have knowledge, but because they have right opinion, and neither knowledge nor right opinion is given to man by nature or acquired by him — (do you think that either of them is given by nature?

Men. Not I.)

Soc. Then if they are not given by nature, neither are the good by nature good?

Men. Certainly not.

Soc. And nature being excluded, the next question was whether virtue is acquired by teaching?

Men. Yes.

Soc. If virtue was wisdom, then, as we thought, it was taught?

Men. Yes.

Soc. And if it was taught it was wisdom?

Men. Certainly.

Soc. And if there were teachers, it might be taught; and if there were no teachers, not?

Men. True.

Soc. But surely we acknowledged that there were no teachers of virtue?

Men. Yes.

Soc. Then we acknowledged that it was not taught, and was not wisdom?

Men. Certainly.

Soc. And yet we admitted that it was a good?

Men. Yes.

Soc. And the right guide is useful and good?

Men. Certainly.

Soc. And the only right guides are knowledge and true opinion — these are the guides of man; for things

which happen by chance are not under the guidance of man: but the guidance of man are true opinion and knowledge.

Men. I think so too.

Soc. But if virtue is not taught, neither is virtue knowledge.

Men. Clearly not.

Soc. Then of two good and useful things, one, which is knowledge, has been set aside, and can not be supposed to be our guide in political life.

Men. I think not.

Soc. And therefore not by any wisdom, and not because they were wise, did Themistocles and those others of whom Anytus spoke govern states. And this was the reason why they were unable to make others like themselves — because their virtue was not grounded on knowledge.

Men. That is probably true, Socrates.

Soc. But if not by knowledge, the only alternative which remains is that statesmen must have guided states by right opinion, which is in politics what divination is in religion; for diviners and also prophets say many things truly, but they know not what they say.

Men. Very true.

Soc. And may we not, Meno, truly call those men divine who, having no understanding, yet succeed in many a grand deed and word?

Men. Certainly.

Soc. Then we shall also be right in calling those divine whom we were just now speaking of as diviners and prophets, as well as all poets. Yes, and statesmen above all may be said to be divine and illumined, being inspired and possessed of God, in which condition they say many grand things, not knowing what they say.

Men. Yes.

Soc. And the women too, Meno, call good men divine; and the Spartans, when they praise a good man, say "that he is a divine man."

Men. And I think, Socrates, that they are right; although very likely our friend Anytus may take offence at the name.

Soc. I do not care; as for Anytus, there will be another opportunity of talking with him. To sum up our inquiry — the result seems to be, if we are at all right in our view, that virtue is neither natural nor acquired, but an instinct given by God to the virtuous. Nor is the instinct accompanied by reason, unless there may be supposed to be among statesmen any one who is also the educator of statesmen. And if there be such an one, he may be said to be among the living what Tiresias was among the dead, who "alone," according to Homer, "of those in the world below, has understanding; but the rest flit as shadows."

Men. That is excellent, Socrates.

Soc. Then, Meno, the conclusion is that virtue comes to the virtuous by the gift of God. But we shall never know the certain truth until, before asking how virtue is given, we inquire into the actual nature of virtue. I fear that I must go away, but do you, now that you are persuaded yourself, persuade our friend Anytus. And don't let him be so exasperated; for if you can persuade him you will have done some service to the Athenian people.

EUTHYPHRO

INTRODUCTION

In the Meno Anytus had parted from Socrates with the threatening words: "That in any city, and particularly in the city of Athens, it is easier to do men harm than to do them good;" and Socrates was anticipating another opportunity of talking with him. In the Euthyphro Socrates is already awaiting his trial for impiety in the porch of the King Archon. But before the trial proceeds, Plato would like to put the world on their trial, and convince them of ignorance in that very matter touching which Socrates is accused. An incident which may perhaps really have occurred in the family of Euthyphro, a learned Athenian diviner and soothsayer, furnishes the occasion of the discussion.

This Euthyphro and Socrates are represented as meeting in the porch of the Archon. Both have legal business in hand. Socrates is defendant in a suit for impiety which Meletus has brought against him (it is remarked by the way that he is not a likely man himself to have brought a suit against another); and Euthyphro too is plaintiff in an action for murder, which he has brought against his own father. The latter has originated in the following manner: — A poor dependant of the family of Euthyphro had slain one of their domestic slaves in Naxos. The guilty person was bound and thrown into a ditch by the command of Euthyphro's father, who sent to the interpreters of religion at Athens to ask what should be done with him. Before the messenger came back the criminal had died from hunger and exposure.

This is the origin of the charge of murder which Euthyphro brings against his father. Socrates is confident that before he could have taken upon himself the responsibility of such a prosecution, he must have been perfectly informed of the nature of piety and impiety; and as he is going to be tried for impiety, he thinks that he can not do better than learn of Euthyphro (who will be admitted by all men, including the judges, to be an unimpeachable authority) what piety is, and what is impiety. What then is piety?

Euthyphro, who, in the abundance of his knowledge, is very

willing to undertake all the responsibility, replies: That piety is doing as I do, prosecuting your father (if he is guilty) on a charge of murder; doing as the gods do — as Zeus did to Cronos, and Cronos to Uranus.

Socrates has a dislike to these tales of mythology, and he fancies that this dislike of his may be the reason why he is charged with impiety. "Are they really true?" "Yes, they are;" and Euthyphro will gladly tell Socrates some more of them. But Socrates would like first of all to have a more satisfactory answer to the question, "What is piety?" "Doing as I do, charging a father with murder" may be a single instance of piety, but can hardly be regarded as a general definition.

Euthyphro replies, that "Piety is what is dear to the gods, and impiety is what is not dear to them." But may there not be differences of opinion, as among men, so also among the gods? Especially about good and evil, which have no fixed rule, and are precisely the sort of differences which give rise to quarrels. And therefore what may be dear to one god may not be dear to another, and the same action may be both pious and impious; e. g. your chastisement of your father, Euthyphro, may be dear or pleasing to Zeus, but not pleasing to Cronos or Uranus.

Euthyphro answers that there is no difference of opinion, either among gods or men, as to the propriety of punishing a murderer. Yes, rejoins Socrates, when they know him to be a murderer; but that assumes the point at issue. If all the circumstances of the case are considered, are you able to show that your father was guilty of murder, or that all the gods are agreed in approving of your prosecution of him? And must you not allow that what is hated by one god may be liked by another? Waiving this last, however, Socrates proposes to amend the definition, and say that "what all the gods love is pious, and what they all hate is impious." To this Euthyphro agrees.

Socrates proceeds to analyze the new form of the definition. He shows that in other cases the act precedes the state; e. g. the act of being carried, loved, etc., precedes the state of being carried, loved, etc., and therefore that which is dear to the gods is dear to the gods because it is first loved of them, not loved of them because it is dear to them. But the pious or holy is loved by the gods because it is pious or holy, which is equivalent to saying, that it is loved by them because it is dear to them. Here then appears to be a contradiction, — Euthyphro has been giving an attribute or accident of piety only, and not the essence. Euthyphro acknowledges himself that his explanations

seem to walk away or go round in a circle, like the moving figures of Daedalus, the ancestor of Socrates, who has communicated his art to his descendants.

Socrates, who is desirous of stimulating the indolent intelligence of Euthyphro, raises the question in another manner: "Is all the pious just?" "Yes." "Is all the just pious?" "No." "Then what part of justice is piety?" Euthyphro replies that piety is that part of justice which "attends" to the gods, as there is another part of justice which "attends" to men. But what is the meaning of "attending" to the gods? The word "attending," when applied to dogs, horses, and men, implies that in some way they are made better. But how do pious or holy acts make the gods any better? Euthyphro explains that he means by pious acts, acts of ministration. Yes; but the ministrations of the husbandman, the physician, and the builder have an end. To what end do we minister to the gods, and what do we help them to accomplish? Euthyphro replies, that there is not time for all these difficult questions to be resolved; and he would rather say simply that piety is knowing how to please the gods in word and deed, by prayers and sacrifices. In other words, says Socrates, piety is "a science of asking and giving" — asking what we want and giving what they want; in short, a mode of doing business between gods and men. But although they are the givers of all good, how can we give them any good in return? "Nay, but we give them honor." Then we give them not what is beneficial, but what is pleasing or dear to them; and this is what has been already disproved.

Socrates, although weary of the subterfuges and evasions of Euthyphro, remains unshaken in his conviction that he must know the nature of piety, or he would never have prosecuted his old father. He is still hoping that he will condescend to instruct him. But Euthyphro is in a hurry and can not stay. And Socrates' last hope of knowing the nature of piety before he is prosecuted for impiety has disappeared.

The Euthyphro is manifestly designed to contrast the real nature of piety and impiety with the popular conceptions of them. But although the popular conceptions are overthrown, Plato does not offer any definition of his own: as in the Laches and Lysis, he exhibits the subject of the Dialogue in several different lights, but fails to answer explicitly his main question.

Euthyphro is a religionist, and is elsewhere spoken of as the author of a philosophy of names, by whose "prancing steeds"

Socrates in the Cratylus is carried away. He has the conceit and self-confidence of a Sophist; no doubt that he is right in prosecuting his father has ever entered into his mind. Like a Sophist too, and perhaps like most educated men of his age, he is incapable either of framing a general definition or of following the course of an argument. But he is not a bad man, and he is friendly to Socrates, whose familiar sign he recognizes with interest. Moreover he is the enemy of Meletus, who, as he thinks, is availing himself of the popular dislike to innovations in religion in order to injure Socrates; at the same time he is amusingly confident that he has weapons in his own armory which would be more than a match for him. He is quite sincere in his prosecution of his father, who has accidentally been guilty of homicide, and is not wholly free from blame. To purge away the crime appears to him in the light of a duty, whoever may be the criminal.

Thus begins the contrast between the religion of the letter, or of the narrow and unenlightened conscience, and the higher notion of religion which Socrates vainly endeavors to elicit from him. "Piety is doing as I do" is the first idea of religion which is suggested to his mind, and may be regarded as the definition of popular religion in all ages. Greek mythology hardly admitted of the distinction between accidental homicide and murder: that the pollution of blood was the same in both cases is also the feeling of the Athenian diviner. He is ready to defend his conduct by the examples of the gods. These are the very tales which Socrates can not abide; and his dislike of which, as he suspects, has branded him with the reputation of impiety. Here is one answer to the question, "Why Socrates was put to death," suggested by the way. Another is conveyed in the words, "The Athenians do not care about any man being thought wise until he begins to make other men wise; and then for some reason or other they are angry:" which may be said to be the rule of popular toleration in most other countries, and not at Athens only.

The next definition, "Piety is that which is loved of the gods," is shipwrecked on a refined distinction between the state and the act, corresponding respectively to the adjective (*φιλον*) and the participle (*φιλούμενον*), or rather perhaps to the participle and the verb (*φιλούμενον* and *φιλεῖται*). The words "loved of the gods" express an attribute only, and not the essence of piety. Then follows the third and last definition "Piety is a part of justice." Thus far Socrates has proceeded in placing religion

on a moral foundation. To which the soothsayer adds, "attending upon the gods." When further interrogated by Socrates as to the nature of this "attention to the gods," he replies, that piety is an affair of business, a science of giving and asking, and the like. Socrates points out the latent anthropomorphism of these notions. But when we expect him to go on and show that the true service of the gods is the service of the spirit, and the coöperation with them in all things true and good, he stops short; this was a lesson which the soothsayer could not have been made to understand, and which every one must learn for himself.

There seem to be altogether three aims or interests in this little Dialogue: (1) the dialectical development of the idea of piety; (2) the antithesis of true and false religion, which is carried to a certain extent only; (3) the defence of Socrates.

The subtle connection of this Dialogue with the Apology and the Crito, the holding back of the conclusion; the insight into the religious world; the dramatic power and play of the two characters; the inimitable irony, are reasons for believing that it is a genuine Platonic writing. The spirit in which the popular representations of mythology are denounced recalls the Republic. The virtue of piety has been already mentioned as one of five in the Protagoras, but is not reckoned among the four cardinal virtues of the Republic.

EUTHYPHRO

PERSONS OF THE DIALOGUE

SOCRATES. EUTHYPHRO.

SCENE: — The Porch of the King Archon

Euthyphro. WHY have you left the Lyceum, Socrates? and what are you doing in the porch of the King Archon? Surely you can not be engaged in an action before the king, as I am.

Socrates. Not in an action, Euthyphro; impeachment is the word which the Athenians use.

Euth. What! I suppose that some one has been prosecuting you, for I can not believe that you are the prosecutor of another.

Soc. Certainly not.

Euth. Then some one else has been prosecuting you?

Soc. Yes.

Euth. And who is he?

Soc. A young man who is little known, Euthyphro; and I hardly know him: his name is Meletus, and he is of the deme of Pitthis. Perhaps you may remember his appearance; he has a beak, and long straight hair, and a beard which is ill grown.

Euth. No, I do not remember him, Socrates. And what is the charge which he brings against you?

Soc. What is the charge? Well, a very serious charge, which shows a good deal of character in the young man, and for which he is certainly not to be despised. He says he knows how the youth are corrupted and who are their corruptors. I fancy that

he must be a wise man, and seeing that I am anything but a wise man, he has found me out, and is going to accuse me of corrupting his young friends. And of this our mother the state is to be the judge. Of all our political men he is the only one who seems to me to begin in the right way, with the cultivation of virtue in youth; he is a good husbandman, and takes care of the shoots first, and clears away us who are the destroyers of them. That is the first step; he will afterwards attend to the elder branches; and if he goes on as he has begun, he will be a very great public benefactor.

Euth. I hope that he may; but I rather fear, Socrates, that the reverse will turn out to be the truth. My opinion is that in attacking you he is simply aiming a blow at the state in a sacred place. But in what way does he say that you corrupt the young?

Soc. He brings a wonderful accusation against me, which at first hearing excites surprise: he says that I am a poet or maker of gods, and that I make new gods and deny the existence of old ones; this is the ground of his indictment.

Euth. I understand, Socrates; he means to attack you about the familiar sign which occasionally, as you say, comes to you. He thinks that you are a neologian, and he is going to have you up before the court for this. He knows that such a charge is readily received, for the world is always jealous of novelties in religion. And I know that when I myself speak in the assembly about divine things, and foretell the future to them, they laugh at me as a madman; and yet every word that I say is true. But they are jealous of all of us. I suppose that we must be brave and not mind them.

Soc. Their laughter, friend Euthyphro, is not a matter of much consequence. For a man may be thought wise; but the Athenians, I suspect, do not

care much about this, until he begins to make other men wise; and then for some reason or other, perhaps, as you say, from jealousy, they are angry.

Euth. I have no desire to try conclusions with them about this.

Soc. I dare say that you don't make yourself common, and are not apt to impart your wisdom. But I have a benevolent habit of pouring out myself to everybody, and would even pay for a listener, and I am afraid that the Athenians know this; and therefore, as I was saying, if the Athenians would only laugh at me as you say that they laugh at you, the time might pass gaily enough in the court; but perhaps they may be in earnest, and then what the end will be you soothsayers only can predict.

Euth. I dare say that the affair will end in nothing, Socrates, and that you will win your cause; and I think that I shall win mine.

Soc. And what is your suit? and are you the pursuer or defendant, Euthyphro?

Euth. I am pursuer.

Soc. Of whom?

Euth. You will think me mad when I tell you whom I am pursuing.

Soc. Why, has the fugitive wings?

Euth. Nay, he is not very volatile at his time of life.

Soc. Who is he?

Euth. My father.

Soc. Your father! good heavens, you don't mean that?

Euth. Yes.

Soc. And of what is he accused?

Euth. Murder, Socrates.

Soc. By the powers, Euthyphro! how little does the common herd know of the nature of right and

truth. A man must be an extraordinary man and have made great strides in wisdom, before he could have seen his way to this.

Euth. Indeed, Socrates, he must have made great strides.

Soc. I suppose that the man whom your father murdered was one of your relatives; if he had been a stranger you would never have thought of prosecuting him.

Euth. I am amused, Socrates, at your making a distinction between one who is a relation and one who is not a relation; for surely the pollution is the same in either case, if you knowingly associate with the murderer when you ought to clear yourself by proceeding against him. The real question is whether the murdered man has been justly slain. If justly, then your duty is to let the matter alone; but if unjustly, then even if the murderer is under the same roof with you and eats at the same table, proceed against him. Now the man who is dead was a poor dependant of mine who worked for us as a field laborer at Naxos, and one day in a fit of drunken passion he got into a quarrel with one of our domestic servants and slew him. My father bound him hand and foot and threw him into a ditch, and then sent to Athens to ask of a diviner what he should do with him. Meantime he had no care or thought of him, being under the impression that he was a murderer; and that even if he did die there would be no great harm. And this was just what happened. For such was the effect of cold and hunger and chains upon him, that before the messenger returned from the diviner, he was dead. And my father and family are angry with me for taking the part of the murderer and prosecuting my father. They say that he did not kill him, and if he did, the

dead man was but a murderer, and I ought not to take any notice, for that a son is impious who prosecutes a father. That shows, Socrates, how little they know of the opinions of the gods about piety and impiety.

Soc. Good heavens, Euthyphro! and have you such a precise knowledge of piety and impiety, and of divine things in general, that, supposing the circumstances to be as you state, you are not afraid that you too may be doing an impious thing in bringing an action against your father?

Euth. The best of Euthyphro, and that which distinguishes him, Socrates, from other men, is his exact knowledge of all these matters. What should I be good for without that?

Soc. Rare friend! I think that I can not do better than be your disciple, before the trial with Meletus comes on. Then I shall challenge him, and say that I have always had a great interest in religious questions, and now, as he charges me with rash imaginations and innovations in religion, I have become your disciple. Now you, Meletus, as I shall say to him, acknowledge Euthyphro to be a great theologian, and sound in his opinions; and if you think that of him you ought to think the same of me, and not have me into court; you should begin by indicting him who is my teacher, and who is the real corruptor, not of the young, but of the old; that is to say, of myself whom he instructs, and of his old father whom he admonishes and chastises. And if Meletus refuses to listen to me, but will go on, and will not shift the indictment from me to you, I can not do better than say in the court that I challenged him in this way.

Euth. Yes, Socrates; and if he attempts to indict me I am mistaken if I don't find a flaw in him; the court shall have a great deal more to say to him than to me.

Soc. I know that, dear friend; and that is the reason why I desire to be your disciple. For I observe that no one, not even Meletus, appears to notice you; but his sharp eyes have found me out at once, and he has indicted me for impiety. And therefore, I adjure you to tell me the nature of piety and impiety, which you said that you knew so well, and of murder, and the rest of them. What are they? Is not piety in every action always the same? and impiety, again, is not that always the opposite of piety, and also the same with itself, having, as impiety, one notion which includes whatever is impious?

Euth. To be sure, Socrates.

Soc. And what is piety, and what is impiety?

Euth. Piety is doing as I am doing; that is to say, prosecuting any one who is guilty of murder, sacrilege, or of any other similar crime — whether he be your father or mother, or some other person, that makes no difference — and not prosecuting them is impiety. And please to consider, Socrates, what a notable proof I will give you of the truth of what I am saying, which I have already given to others: — of the truth, I mean, of the principle that the impious, whoever he may be, ought not to go unpunished. For do not men regard Zeus as the best and most righteous of the gods? — and even they admit that he bound his father (Cronos) because he wickedly devoured his sons, and that he too had punished his own father (Uranus) for a similar reason, in a nameless manner. And yet when I proceed against my father, they are angry with me. This is their inconsistent way of talking when the gods are concerned, and when I am concerned.

Soc. May not this be the reason, Euthyphro, why I am charged with impiety — that I can not away with these stories about the gods? and therefore I

suppose that people think me wrong. But, as you who are well informed about them approve of them, I can not do better than assent to your superior wisdom. For what else can I say, confessing as I do, that I know nothing of them. I wish you would tell me whether you really believe that they are true?

Euth. Yes, Socrates; and things more wonderful still, of which the world is in ignorance.

Soc. And do you really believe that the gods fought with one another, and had dire quarrels, battles, and the like, as the poets say, and as you may see represented in the works of great artists? The temples are full of them; and notably the robe of Athene, which is carried up to the Acropolis at the great Panathenaea, is embroidered with them. Are all these tales of the gods true, Euthyphro?

Euth. Yes, Socrates; and, as I was saying, I can tell you, if you would like to hear them, many other things about the gods which would quite amaze you.

Soc. I dare say; and you shall tell me them at some other time when I have leisure. But just at present I would rather hear from you a more precise answer, which you have not as yet given, my friend, to the question, What is "piety?" In reply, you only say that piety is, Doing as you do, charging your father with murder?

Euth. And that is true, Socrates.

Soc. I dare say, Euthyphro, but there are many other pious acts.

Euth. There are.

Soc. Remember that I did not ask you to give me two or three examples of piety, but to explain the general idea which makes all pious things to be pious. Do you not recollect that there was one idea which made the impious impious, and the pious pious?

Euth. I remember.

Soc. Tell me what this is, and then I shall have a standard to which I may look, and by which I may measure the nature of actions, whether yours or any one's else, and say that this action is pious, and that impious?

Euth. I will tell you, if you like.

Soc. I should very much like.

Euth. Piety, then, is that which is dear to the gods, and impiety is that which is not dear to them.

Soc. Very good, Euthyphro; you have now given me just the sort of answer which I wanted. But whether it is true or not I can not as yet tell, although I make no doubt that you will prove the truth of your words.

Euth. Of course.

Soc. Come, then, and let us examine what we are saying. That thing or person which is dear to the gods is pious, and that thing or person which is hateful to the gods is impious. Was not that said?

Euth. Yes, that was said.

Soc. And that seems to have been very well said too?

Euth. Yes, Socrates, I think that; it was certainly said.

Soc. And further, Euthyphro, the gods were admitted to have enmities and hatreds and differences — that was also said?

Euth. Yes, that was said.

Soc. And what sort of difference creates enmity and anger? Suppose for example that you and I, my good friend, differ about a number; do differences of this sort make us enemies and set us at variance with one another? Do we not go at once to calculation, and end them by a sum?

Euth. True.

Soc. Or suppose that we differ about magnitudes,

do we not quickly put an end to that difference by measuring?

Euth. That is true.

Soc. And we end a controversy about heavy and light by resorting to a weighing-machine?

Euth. To be sure.

Soc. But what differences are those which, because they can not be thus decided, make us angry and set us at enmity with one another? I dare say the answer does not occur to you at the moment, and therefore I will suggest that this happens when the matters of difference are the just and unjust, good and evil, honorable and dishonorable. Are not these the points about which, when differing, and unable satisfactorily to decide our differences, we quarrel, when we do quarrel, as you and I and all men experience?

Euth. Yes, Socrates, that is the nature of the differences about which we quarrel.

Soc. And the quarrels of the gods, noble Euthyphro, when they occur, are of a like nature?

Euth. They are.

Soc. They have differences of opinion, as you say, about good and evil, just and unjust, honorable and dishonorable: there would have been no quarrels among them, if there had been no such differences — would there now?

Euth. You are quite right.

Soc. Does not every man love that which he deems noble and just and good, and hate the opposite of them?

Euth. Very true.

Soc. But then, as you say, people regard the same things, some as just and others as unjust; and they dispute about this, and there arise wars and fightings among them.

Euth. Yes, that is true.

Soc. Then the same things, as appears, are hated by the gods and loved by the gods, and are both hateful and dear to them?

Euth. True.

Soc. Then upon this view the same things, Euthyphro, will be pious and also impious?

Euth. That, I suppose, is true.

Soc. Then, my friend, I remark with surprise that you have not answered what I asked. For I certainly did not ask what was that which is at once pious and impious: and that which is loved by the gods appears also to be hated by them. And therefore, Euthyphro, in thus chastising your father you may very likely be doing what is agreeable to Zeus but disagreeable to Cronos or Uranus, and what is acceptable to Hephaestus but unacceptable to Here, and there may be other gods who have similar differences of opinion.

Euth. But I believe, Socrates, that all the gods would be agreed as to the propriety of punishing a murderer: there would be no difference of opinion about that.

Soc. Well, but speaking of men, Euthyphro, did you ever hear any one arguing that a murderer or any sort of evil-doer ought to be let off?

Euth. I should rather say that they are always arguing this, especially in courts of law: they commit all sorts of crimes, and there is nothing that they will not do or say in order to escape punishment.

Soc. But do they admit their guilt, Euthyphro, and yet say that they ought not to be punished?

Euth. No; they do not.

Soc. Then there are some things which they do not venture to say and do: for they do not venture to argue that the guilty are to be unpunished, but they deny their guilt, do they not?

Euth. Yes.

Soc. Then they do not argue that the evil-doer should not be punished, but they argue about the fact of who the evil-doer is, and what he did and when?

Euth. True.

Soc. And the gods are in the same case, if as you imply they quarrel about just and unjust, and some of them say that they wrong one another, and others of them deny this. For surely neither God nor man will ever venture to say that the doer of evil is not to be punished: — you don't mean to tell me that?

Euth. That is true, Socrates, in the main.

Soc. But they join issue about particulars; and this applies not only to men but to the gods; if they dispute at all they dispute about some act which is called in question, and which some affirm to be just, others to be unjust. Is not that true?

Euth. Quite true.

Soc. Well then, my dear friend Euthyphro, do tell me, for my better instruction and information, what proof have you that in the opinion of all the gods a servant who is guilty of murder, and is put in chains by the master of the dead man, and dies because he is put in chains before his corrector can learn from the interpreters what he ought to do with him, dies unjustly; and that on behalf of such an one a son ought to proceed against his father and accuse him of murder. How would you show that all the gods absolutely agree in approving of his act? Prove to me that, and I will applaud your wisdom as long as you live.

Euth. That would not be an easy task, although I could make the matter very clear indeed to you.

Soc. I understand; you mean to say that I am not so quick of apprehension as the judges: for to them you will be sure to prove that the act is unjust, and hateful to the gods.

Euth. Yes indeed, Socrates; at least if they will listen to me.

Soc. But they will be sure to listen if they find that you are a good speaker. There was a notion that came into my mind while you were speaking; I said to myself: "Well, and what if Euthyphro does prove to me that all the gods regarded the death of the serf as unjust, how do I know anything more of the nature of piety and impiety? for granting that this action may be hateful to the gods, still these distinctions have no bearing on the definition of piety and impiety, for that which is hateful to the gods has been shown to be also pleasing and dear to them." And therefore, Euthyphro, I don't ask you to prove this; I will suppose, if you like, that all the gods condemn and abominate such an action. But I will amend the definition so far as to say that what all the gods hate is impious, and what they love pious or holy; and what some of them love and others hate is both or neither. Shall this be our definition of piety and impiety?

Euth. Why not, Socrates?

Soc. Why not! certainly, as far as I am concerned, Euthyphro. But whether this admission will greatly assist you in the task of instructing me as you promised, is a matter for you to consider.

Euth. Yes, I should say that what all the gods love is pious and holy, and the opposite which they all hate, impious.

Soc. Ought we to inquire into the truth of this, Euthyphro, or simply to accept the mere statement on our own authority and that of others?

Euth. We should inquire; and I believe that the statement will stand the test of inquiry.

Soc. That, my good friend, we shall know better in a little while. The point which I should first wish

to understand is whether the pious or holy is beloved by the gods because it is holy, or holy because it is beloved of the gods.

Euth. I don't understand your meaning, Socrates.

Soc. I will endeavor to explain: we speak of carrying and we speak of being carried, of leading and being led, seeing and being seen. And here is a difference, the nature of which you understand.

Euth. I think that I understand.

Soc. And is not that which is beloved distinct from that which loves?

Euth. Certainly.

Soc. Well; and now tell me, is that which is carried in this state of carrying because it is carried, or for some other reason?

Euth. No; that is the reason.

Soc. And the same is true of that which is led and of that which is seen?

Euth. True.

Soc. And a thing is not seen because it is visible, but conversely, visible because it is seen; nor is a thing in the state of being led because it is led, or in the state of being carried because it is carried, but the converse of this. And now I think, Euthyphro, that my meaning will be intelligible; and my meaning is, that any state of action or passion implies previous action or passion. It does not become because it is becoming, but it is becoming because it comes; neither does it suffer because it is in a state of suffering, but it is in a state of suffering because it suffers. Do you admit that?

Euth. Yes.

Soc. Is not that which is loved in some state either of becoming or suffering?

Euth. Yes.

Soc. And the same holds as in the previous in-

stances; the state of being loved follows the act of being loved, and not the act the state.

Euth. That is certain.

Soc. And what do you say of piety, Euthyphro: is not piety, according to your definition, loved by all the gods?

Euth. Yes.

Soc. Because it is pious or holy, or for some other reason?

Euth. No, that is the reason.

Soc. It is loved because it is holy, not holy because it is loved?

Euth. Yes.

Soc. And that which is in a state to be loved of the gods, and is dear to them, is in a state to be loved of them because it is loved of them?

Euth. Certainly.

Soc. Then that which is loved of God, Euthyphro, is not holy, nor is that which is holy loved of God, as you affirm; but they are two different things.

Euth. How do you mean, Socrates?

Soc. I mean to say that the holy has been acknowledged by us to be loved of God because it is holy, not to be holy because it is loved.

Euth. Yes.

Soc. But that which is dear to the gods is dear to them because it is loved by them, not loved by them because it is dear to them.

Euth. True.

Soc. But, friend Euthyphro, if that which is holy is the same as that which is dear to God, and that which is holy is loved as being holy, then that which is dear to God would have been loved as being dear to God; but if that which is dear to God is dear to him because loved by him, then that which is holy would have been holy because loved by him. But now

you see that the reverse is the case, and that they are quite different from one another. For one (θεοφιλὲς) is of a kind to be loved because it is loved, and the other (ὅσιον) is loved because it is of a kind to be loved. Thus you appear to me, Euthyphro, when I ask you what is the essence of holiness, to offer an attribute only, and not the essence — the attribute of being loved by all the gods. But you still refuse to explain to me the nature of piety. And therefore, if you please, I will ask you not to hide your treasure, but to tell me once more what piety or holiness really is, whether dear to the gods or not (for that is a matter about which we will not quarrel). And what is impiety?

Euth. I really do not know, Socrates, how to say what I mean. For somehow or other our arguments, on whatever ground we rest them, seem to turn round and walk away.

Soc. Your words, Euthyphro, are like the handiwork of my ancestor Daedalus; and if I were the sayer or propounder of them, you might say that this comes of my being his relation; and that this is the reason why my arguments walk away and won't remain fixed where they are placed. But now, as the notions are your own, you must find some other gibe, for they certainly, as you yourself allow, show an inclination to be on the move.

Euth. Nay, Socrates, I shall still say that you are the Daedalus who sets arguments in motion; not I, certainly, make them move or go round, for they would never have stirred, as far as I am concerned.

Soc. Then I must be a greater than Daedalus; for whereas he only made his own inventions to move, I move those of other people as well. And the beauty of it is, that I would rather not. For I would give the wisdom of Daedalus, and the wealth of Tantalus,

to be able to detain them and keep them fixed. But enough of this. As I perceive that you are indolent, I will myself endeavor to show you how you might instruct me in the nature of piety; and I hope that you will not grudge your labor. Tell me, then, — Is not that which is pious necessarily just?

Euth. Yes.

Soc. And is, then, all which is just pious? or, is that which is pious all just, but that which is just only in part and not all pious?

Euth. I don't understand you, Socrates.

Soc. And yet I know that you are as much wiser than I am, as you are younger. But, as I was saying, revered friend, the abundance of your wisdom makes you indolent. Please to exert yourself, for there is no real difficulty in understanding me. What I mean I may explain by an illustration of what I do not mean. The poet (Stasinus) sings —

"Of Zeus, the author and creator of all these things,
You will not tell: for where there is fear there is also reverence."

And I disagree with this poet. Shall I tell you in what I disagree?

Euth. By all means.

Soc. I should not say that where there is fear there is also reverence; for I am sure that many persons fear poverty and disease, and the like evils, but I do not perceive that they reverence the objects of their fear.

Euth. Very true.

Soc. But where reverence is, there is fear; for he who has a feeling of reverence and shame about the commission of any action, fears and is afraid of an ill reputation.

Euth. No doubt.

Soc. Then we are wrong in saying that where there

is fear there is also reverence; and we should say, where there is reverence there is also fear. But there is not always reverence where there is fear; for fear is a more extended notion, and reverence is a part of fear, just as the odd is a part of number, and number is a more extended notion than the odd. I suppose that you follow me now?

Euth. Quite well.

Soc. That was the sort of question which I meant to raise when asking whether the just is the pious, or the pious the just; and whether there may not be justice where there is not always piety; for justice is the more extended notion of which piety is only a part. Do you agree in that?

Euth. Yes; that, I think, is correct.

Soc. Then, now, if piety is a part of justice, I suppose that we inquire what part? If you had pursued the injury in the previous cases; for instance, if you had asked me what is an even number, and what part of number the even is, I should have had no difficulty in replying, a number which represents a figure having two equal sides. Do you agree?

Euth. Yes.

Soc. In like manner, I want you to tell me what part of justice is piety or holiness; that I may be able to tell Meletus not to do me injustice, or indict me for impiety; as I am now adequately instructed by you in the nature of piety or holiness, and their opposites.

Euth. Piety or holiness, Socrates, appears to me to be that part of justice which attends to the gods, as there is the other part of justice which attends to men.

Soc. That is good, Euthyphro; yet still there is a little point about which I should like to have further information, What is the meaning of "attention?"

For attention can hardly be used in the same sense when applied to the gods as when applied to other things. For instance, horses are said to require attention, and not every person is able to attend to them, but only a person skilled in horsemanship. Is not that true?

Euth. Quite true.

Soc. I should suppose that the art of horsemanship is the art of attending to horses?

Euth. Yes.

Soc. Nor is every one qualified to attend to dogs, but only the huntsman.

Euth. True.

Soc. And I should also conceive that the art of the huntsman is the art of attending to dogs?

Euth. Yes.

Soc. As the art of the oxherd is the art of attending to oxen?

Euth. Very true.

Soc. And as holiness or piety is the art of attending to the gods? — that would be your meaning, Euthyphro?

Euth. Yes.

Soc. And is not attention always designed for the good or benefit of that to which the attention is given? As in the case of horses, you may observe that when attended to by the horseman's art they are benefited and improved, are they not?

Euth. True.

Soc. As the dogs are benefited by the huntsman's art, and the oxen by the art of the oxherd, and all other things are tended or attended for their good and not for their hurt?

Euth. Certainly, not for their hurt.

Soc. But for their good?

Euth. Of course.

Soc. And does piety or holiness, which has been defined as the art of attending to the gods, benefit or improve them? Would you say that when you do a holy act you make any of the gods better?

Euth. No, no; that is certainly not my meaning.

Soc. Indeed, Euthyphro, I did not suppose that this was your meaning; far otherwise. And that was the reason why I asked you the nature of this attention, because I thought that this was not your meaning.

Euth. You do me justice, Socrates; for that is not my meaning.

Soc. Good: but I must still ask what is this attention to the gods which is called piety?

Euth. It is such, Socrates, as servants show to their masters.

Soc. I understand — a sort of ministration to the gods.

Euth. Exactly.

Soc. Medicine is also a sort of ministration or service, tending to the attainment of some object — would you not say health?

Euth. Yes.

Soc. Again, there is an art which ministers to the ship-builder with a view to the attainment of some result?

Euth. Yes, Socrates, with a view to the building of a ship.

Soc. As there is an art which ministers to the house-builder with a view to the building of a house?

Euth. Yes.

Soc. And now tell me, my good friend, about this art which ministers to the gods: what work does that help to accomplish? For you must surely know if, as you say, you are of all men living the one who is best instructed in religion.

Euth. And that is true, Socrates.

Soc. Tell me then, oh tell me — what is that fair work which the gods do by the help of us as their ministers?

Euth. Many and fair, Socrates, are the works which they do.

Soc. Why, my friend, and so are those of a general. But the chief of them is easily told. Would you not say that victory in war is the chief of them?

Euth. Certainly.

Soc. Many and fair, too, are the works of the husbandman, if I am not mistaken; but his chief work is the production of food from the earth?

Euth. Exactly.

Soc. And of the many and fair things which the gods do, which is the chief and principal one?

Euth. I have told you already, Socrates, that to learn all these things accurately will be very tiresome. Let me simply say that piety is learning how to please the gods in word and deed, by prayers and sacrifices. That is piety, which is the salvation of families and states, just as the impious, which is unpleasing to the gods, is their ruin and destruction.

Soc. I think that you could have answered in much fewer words the chief question which I asked, Euthyphro, if you had chosen. But I see plainly that you are not disposed to instruct me: else why, when we had reached the point, did you turn aside? Had you only answered me I should have learned of you by this time the nature of piety. Now, as the asker of a question is necessarily dependent on the answerer, whither he leads I must follow; and can only ask again, what is the pious, and what is piety? Do you mean that they are a sort of science of praying and sacrificing?

Euth. Yes, I do.

Soc. And sacrificing is giving to the gods, and prayer is asking of the gods?

Euth. Yes, Socrates.

Soc. Upon this view, then, piety is a science of asking and giving?

Euth. You understand me capitally, Socrates.

Soc. Yes, my friend; the reason is that I am a votary of your science, and give my mind to it, and therefore nothing which you say will be thrown away upon me. Please then to tell me, what is the nature of this service to the gods? Do you mean that we prefer requests and give gifts to them?

Euth. Yes, I do.

Soc. Is not the right way of asking to ask of them what we want?

Euth. Certainly.

Soc. And the right way of giving is to give to them in return what they want of us. There would be no meaning in an art which gives to any one that which he does not want.

Euth. Very true, Socrates.

Soc. Then piety, Euthyphro, is an art which gods and men have of doing business with one another?

Euth. That is an expression which you may use, if you like.

Soc. But I have no particular liking for anything but the truth. I wish, however, that you would tell me what benefit accrues to the gods from our gifts. That they are the givers of every good to us is clear; but how we can give any good thing to them in return is far from being equally clear. If they give everything and we give nothing, that must be an affair of business in which we have very greatly the advantage of them.

Euth. And do you imagine, Socrates, that any

benefit accrues to the gods from what they receive of us?

Soc. But if not, Euthyphro, what sort of gifts do we confer upon the gods?

Euth. What should we confer upon them, but tributes of honor; and, as I was just now saying, what is pleasing to them?

Soc. Piety, then, is pleasing to the gods, but not beneficial or dear to them?

Euth. I should say that nothing could be dearer.

Soc. Then once more the assertion is repeated that piety is dear to the gods?

Euth. No doubt.

Soc. And when you say this, can you wonder at your words not standing firm, but walking away? Will you accuse me of being the Daedalus who makes them walk away, not perceiving that there is another and far greater artist than Daedalus who makes them go round in a circle; and that is yourself: for the argument, as you will perceive, comes round to the same point. I think that you must remember our saying that the holy or pious was not the same as that which is loved of the gods. Do you remember that?

Euth. I do.

Soc. And do you not see that what is loved of the gods is holy, and that this is the same as what is dear to them?

Euth. True.

Soc. Then either we were wrong in that admission; or, if we were right then, we are wrong now.

Euth. I suppose that is the case.

Soc. Then we must begin again and ask, What is piety? That is an inquiry which I shall never be weary of pursuing as far as in me lies; and I entreat you not to scorn me, but to apply your mind to the utmost, and tell me the truth. For, if any man

knows, you are he; and therefore I shall detain you, like Proteus, until you tell. For if you had not certainly known the nature of piety and impiety, I am confident that you would never, on behalf of a serf, have charged your aged father with murder. You would not have run such a risk of doing wrong in the sight of the gods, and you would have had too much respect for the opinions of men. I am sure, therefore, that you know the nature of piety and impiety. Speak out then, my dear Euthyphro, and do not hide your knowledge.

Euth. Another time, Socrates; for I am in a hurry, and must go now.

Soc. Alas! my companion, and will you leave me in despair? I was hoping that you would instruct me in the nature of piety and impiety, so that I might have cleared myself of Meletus and his indictment. Then I might have proved to him that I had been converted by Euthyphro, and had done with rash innovations and speculations, in which I had indulged through ignorance, and was about to lead a better life.

APOLOGY

INTRODUCTION

In what relation the Apology of Plato stands to the real defence of Socrates, there are no means of determining. It certainly agrees in tone and character with the description of Xenophon, who says in the Memorabilia that Socrates might have been acquitted "if in any moderate degree he would have conciliated the favor of the dicasts;" and who informs us in another passage, on the testimony of Hermogenes, the friend of Socrates, that he had no wish to live; and that the divine sign refused to allow him to prepare a defence, and also that Socrates himself declared this to be unnecessary, on the ground that all his life long he had been preparing against that hour. For the speech breathes throughout a spirit of defiance, "ut non supplex aut reus sed magister aut dominus videretur esse judicum" (Cic. de Orat. i. 54); and the loose and desultory style is an imitation of the "accustomed manner" in which Socrates spoke in "the agora and among the tables of the money-changers." The allusion in the Crito may, perhaps, be adduced as a further evidence of the literal accuracy of some parts. But in the main it must be regarded as the ideal of Socrates, according to Plato's conception of him, appearing in the greatest and most public scene of his life, and in the height of his triumph, when he is weakest, and yet his mastery over mankind is greatest, and the habitual irony of his life acquires a new meaning and a sort of tragic pathos in the face of death. The facts of his life are summed up, and the features of his character are brought out as if by accident in the course of the defence. The looseness of the style, the seeming want of arrangement of the topics, is found to result in a perfect work of art, which is the portrait of Socrates.

Yet some of the topics may have been actually used by Socrates; and the recollection of his very words may have rung in the ears of his disciple. The Apology of Plato may be compared generally with those speeches of Thucydides in which he has embodied his conception of the lofty character and policy of the great Pericles, and which at the same time furnish a com-

mentary on the situation of affairs from the point of view of the historian. So in the Apology there is an ideal rather than a literal truth; much is said that ought to have been said but was not said, and is only Plato's view of the situation. And we may perhaps even indulge in the fancy that the actual defence of Socrates was as much greater than the Platonic defence as the master was greater than the disciple. But in any case, some of the words actually used have probably been preserved. It is significant that Plato is said to have been present at the defence, as he is also said to have been absent at the last scene in the Phaedo. Is it fanciful to suppose that he meant to give the stamp of authenticity to the one and not to the other? — especially when we remember that these two passages are the only ones in which Plato makes mention of himself. Moreover, the Apology appears to combine the common characteristics both of the Xenophontean and Platonic Socrates, while the Phaedo passes into a region of thought which is very characteristic of Plato, but not of his master.

There is not much in the other Dialogues which can be compared with the Apology. The same recollection of his master may have been present to the mind of Plato when depicting the sufferings of the Just in the Republic. The Crito may also be regarded as a sort of appendage to the Apology, in which Socrates, who has defied the judges, is nevertheless represented as scrupulously obedient to the laws. The idealization of the sufferer is carried still further in the Gorgias, in which the thesis is maintained, that "to suffer is better than to do evil;" and the art of rhetoric is described as only useful for the purpose of self-accusation. The parallelisms which occur in the so-called Apology of Xenophon are not worth noticing, because the writing in which they are contained is manifestly spurious. The statements of the Memorabilia respecting the trial and death of Socrates agree generally with Plato; but they have lost the flavor of Socratic irony in the narrative of Xenophon.

The Apology or Platonic defence of Socrates is divided into three parts: 1st. The defence properly so called; 2nd. The shorter address in mitigation of the penalty; 3rd. The last words of prophetic rebuke and exhortation.

The first part commences with an apology for his colloquial style; he is, as he has always been, the enemy of rhetoric, and knows of no rhetoric but truth; he will not falsify his character by making a speech. Then he proceeds to divide his accusers into two classes; first, there is the nameless accuser — public

opinion. All the world from their earliest years had [illegible] he was a corruptor of youth, and had seen him caricatured in the Clouds of Aristophanes. Secondly, there are the professional accusers, who are but the mouth-piece of the others. The accusations of both might be summed up in a formula. The first say, "Socrates is an evil-doer and a curious person, searching into things under the earth and above the heaven; and making the worse appear the better cause, and teaching all this to others." The second, "Socrates is an evil-doer and corruptor of the youth, who does not receive the gods whom the state receives, but introduces other new divinities." These last appear to have been the words of the actual indictment, of which the previous formula is a parody.

The answer begins by clearing up a confusion. In the representations of the comic poets, and in the opinion of the multitude, he had been confounded with the teachers of physical science and with the Sophists. But this was an error. For both of them he professes a respect in the open court, which contrasts with his manner of speaking about them in other places. But at the same time he shows that he is not one of them. Of natural philosophy he knows nothing; not that he despises such pursuits, but the fact is that he is ignorant of them, and never says a word about them. Nor does he receive money for teaching; that is another mistaken notion, for he has nothing to teach. But he commends Evenus for teaching virtue at such a moderate rate. Something of the "accustomed irony," which may perhaps be expected to sleep in the ear of the multitude, is lurking here.

He then goes on to explain the reason why he is in such an evil name. That had arisen out of a peculiar mission which he had taken upon himself. The enthusiastic Chaerephon (probably in anticipation of the answer which he received) had gone to Delphi and asked the oracle if there was any man wiser than Socrates; and the answer was, that there was no man wiser. What could be the meaning of this — that he who knew nothing, and knew that he knew nothing, should be declared by the oracle to be the wisest of men? Reflecting upon this, he determined to refute the oracle by finding "a wiser;" and first he went to the politicians, and then to the poets, and then to the craftsmen, but always with the same result — he found that they knew nothing, or hardly anything more than himself; and that the little advantage which in some cases they possessed was more than counterbalanced by their conceit of knowledge. He knew nothing, and knew that he knew nothing: they knew little or

nd imagined that they knew all things. Thus he had his life as a sort of missionary in detecting the pretended om of mankind; and this occupation had quite absorbed m and taken him away both from public and private affairs. Young men of the richer sort had made a pastime of the same pursuit, "which was not unamusing." And hence bitter enmities had arisen; the professors of knowledge had revenged themselves by calling him a villainous corruptor of the youth, and by repeating the commonplaces about atheism and materialism and sophistry, which are the stock-accusations against all philosophers when there is nothing else to be said of them.

The second accusation he meets by interrogating Meletus, who is present and can be interrogated. "If he is the corruptor, who is the improver of the citizens?" "All mankind." But how absurd, how contrary to analogy is this! How inconceivable too, that he should make the citizens worse when he has to live with them. This surely can not be intentional; and if unintentional, he ought to have been instructed by Meletus, and not accused in the court.

But there is another part of the indictment which says that he teaches men not to receive the gods whom the city receives, and has other new gods. "Is that the way in which he is supposed to corrupt the youth?" "Yes, that is the way." "Has he only new gods, or none at all?" "None at all." "What, not even the sun and moon?" "No; why, he says that the sun is a stone, and the moon earth." That, replies Socrates, is the old confusion about Anaxagoras; the Athenian people are not so ignorant as to attribute to the influence of Socrates notions which have found their way into the drama, and may be learned at the theatre. Socrates undertakes to show that Meletus (rather unjustifiably) has been compounding a riddle in this part of the indictment: "There are no gods, but Socrates believes in the existence of the sons of gods, which is absurd."

Leaving Meletus, who has had enough words spent upon him, he returns to his original accusers. The question may be asked, Why will he persist in following a profession which leads him to death? Why — because he must remain at his post where the god has placed him, as he remained at Potidaea, and Amphipolis, and Delium, where the generals placed him. Besides, he is not so overwise as to imagine that he knows whether death is a good or an evil; and he is certain that desertion of his duty is an evil. Anytus is quite right in saying that they should never have indicted him if they meant to let him go. For he will cer-

tainly obey God rather than man; and will continue to preach to all men of all ages the necessity of virtue and improvement; and if they refuse to listen to him he will persevere and reprove them. This is his way of corrupting the youth, which he will not cease to follow in obedience to the god, even if a thousand deaths await him.

He is desirous that they should not put him to death — not for his own sake, but for theirs; because he is their heaven-sent friend (and they will never have such another), or, as he may be ludicrously described, the gadfly who stirs the generous steed into motion. Why then has he never taken part in public affairs? Because the familiar divine voice has hindered him; if he had been a public man, and fought for the right, as he would certainly have fought against the many, he would not have lived, and could therefore have done no good. Twice in public matters he has risked his life for the sake of justice — once at the trial of the generals; and again in resistance to the tyrannical commands of the Thirty.

But, though not a public man, he has passed his days in instructing the citizens without fee or reward; this was his mission. Whether his disciples have turned out well or ill, he can not justly be charged with the result, for he never promised to teach them anything. They might come if they liked, and they might stay away if they liked: and they did come, because they found an amusement in hearing the pretenders to wisdom detected. If they had been corrupted, their elder relatives (if not themselves) might surely appear in court and witness against him, and there is an opportunity still for them to do this. But their fathers and brothers all appear in court (including "this" Plato), to witness on his behalf; and if their relatives are corrupted, at least they are uncorrupted; "and they are my witnesses. For they know that I am speaking the truth, and that Meletus is lying."

This is about all that he has to say. He will not entreat the judges to spare his life; neither will he present a spectacle of weeping children, although he, too, is not made of "rock or oak." Some of the judges themselves may have complied with this practice on similar occasions, and he trusts that they will not be angry with him for not following their example. But he feels that such conduct brings discredit on the name of Athens: he feels, too, that the judge has sworn not to give away justice; and he can not be guilty of the impiety of asking the judge to forswear himself, when he is himself being tried for impiety.

As he expected, and probably intended, he is convicted. And now the tone of the speech, instead of being more conciliatory, becomes more lofty and commanding. Anytus proposes death as the penalty: and what counter-proposition shall he make? He, the benefactor of the Athenian people, whose whole life has been spent in doing them good, should at least have the Olympic victor's reward of maintenance in the prytaneum. Or why should he propose any counter-penalty when he does not know whether death, which Anytus proposes, is a good or an evil? and he is certain that imprisonment is an evil, exile is an evil. Loss of money might be no evil, but then he has none to give; perhaps he can make up a mina. Let that then be the penalty, or, if his friends wish, thirty minae; for this they will be excellent securities.

(*He is condemned to death.*)

He is an old man already, and the Athenians will gain nothing but disgrace by depriving him of a few years of life. Perhaps he could have escaped, if he had chosen to throw down his arms and entreat for his life. But he does not at all repent of the manner of his defence; he would rather die in his own fashion than live in theirs. For the penalty of unrighteousness is swifter than death, and that has already overtaken his accusers as death will soon overtake him.

And now, as one who is about to die, he will prophesy to them. They have put him to death in order to escape the necessity of giving an account of their lives. But his death "will be the seed" of many disciples who will convict them of their evil ways, and will come forth to reprove them in harsher terms, because they are younger and more inconsiderate.

He would like to say a few words, while there is time, to those who would have acquitted him. He wishes them to know that the divine sign never interrupted him in the course of his defence; the reason of which, as he conjectures, is that the death to which he is going is a good and not an evil. For either death is a long sleep, the best of sleeps, or a journey to another world in which the souls of the dead are gathered together, and in which there may be a hope of seeing the heroes of old — in which, too, there are just judges; and as all are immortal, there can be no fear of any one being put to death for his opinions.

Nothing evil can happen to the good man either in life or death, and his own death has been permitted by the gods, be-

cause it was better for him to depart; and therefore he forgives his judges because they have done him no harm, although they never meant to do him any good.

He has a last request to make to them — that they will trouble his sons as he has troubled them, if they appear to prefer riches to virtue, or to think themselves something when they are nothing.

"Few persons will be found to wish that Socrates should have defended himself otherwise," — if, as we must add, his defence was that with which Plato has provided him. But leaving this question, which does not admit of a precise solution, we may go on to ask what was the impression which Plato in the Apology intended to leave of the character and conduct of his master in the last great scene? Did he intend to represent him (1) as employing sophistries; (2) as designedly irritating the judges? Or are these sophistries to be regarded as belonging to the age in which he lived and to his personal character, and this apparent haughtiness as flowing from the natural elevation of his position?

For example, when he says that it is absurd to suppose that one man is the corruptor and all the rest of the world the improvers of the youth; or, when he argues that he never could have corrupted the men with whom he had to live; or, when he proves his belief in the gods because he believes in the sons of gods, is he serious or jesting? It may be observed that these sophisms all occur in his cross-examination of Meletus, who is easily foiled and mastered in the hands of the great dialectician. Perhaps he regarded these answers as all of them good enough for his accuser (he makes very light of him throughout). Also it may be noted that there is a touch of irony in all of them, which takes them out of the category of sophistry.

That the manner in which he defends himself about the lives of his disciples is not satisfactory, can hardly be denied. Fresh in the memory of the Athenians, and detestable as they deserved to be to the newly restored democracy, were the names of Alcibiades, Critias, Charmides. It is obviously not a sufficient answer that Socrates had never professed to teach them anything, and is therefore not justly chargeable with their crimes. Yet the defence, when taken out of this ironical form, is doubtless sound: that his teaching had nothing to do with their evil lives. Here, then, the sophistry is rather in form than in sub-

stance, though we might desire that to such a serious charge Socrates had given a more serious answer.

Truly characteristic of Socrates is another point in his answer, which may also be regarded as sophistical. He says that "if he has corrupted the youth, he must have corrupted them involuntarily." In these words the Socratic doctrine of the involuntariness of evil is clearly intended to be conveyed. But if, as Socrates argues, all evil is involuntary, then all criminals ought to be admonished and not punished. Here again, as in the former instance, the defence of Socrates, which is untrue practically, may yet be true in some ideal or transcendental sense. The commonplace reply, that if he had been guilty of corrupting the youth their relations would surely have witnessed against him, with which he concludes this part of his defence, is more satisfactory.

Again, when Socrates argues that he must believe in the gods because he believes in the sons of gods, we must remember that this is a refutation not of the original indictment, which is consistent enough — "Socrates does not receive the gods whom the city receives, and has other new divinities" — but of the interpretation put upon the words by Meletus, who has affirmed that he is a downright atheist. To this Socrates fairly answers, in accordance with the ideas of the time, that a downright atheist can not believe in the sons of gods or in divine things. The notion that demons or lesser divinities are the sons of gods is not to be regarded as ironical or sceptical. But the love of argument may certainly have led Plato to relapse into the mythological point of view, and prevented him from observing that the reasoning is only formally corect.

The second question, whether Plato meant to represent Socrates as needlessly braving or irritating his judges, must also be answered in the negative. His irony, his superiority, his audacity, "regarding not the person of man," necessarily flow out of the loftiness of his situation. He is not acting a part upon a great occasion, but he is what he has been all his life long, "a king of men." He would rather not appear insolent, if he could avoid this (*οὐχ ὡς αὐθαδιζόμενος τοῦτο λέγω*). He is not desirous of hastening his own end, for life and death are simply indifferent to him. But neither will he say or do anything which might avert the penalty; he can not have his tongue bound, even in the "throat of death:" his natural character must appear. He is quite willing to make his defence to posterity and to the world, for that is a true defence. But such a defence as would be acceptable to his judges and might procure an acquittal, it is

not in his nature to make. With his actual accusers he will only fence and play. The singularity of the mission which he ascribes to himself is a great reason for believing that he is serious in his account of the motives which actuated him. The dedication of his life to the improvement of his fellow-citizens is not so remarkable as the ironical spirit in which he goes about doing good to all men only in vindication of the credit of the oracle, and in the vain hope of finding a wiser man than himself. Yet this singular and almost accidental character of his mission agrees with the divine sign which, according to our notions, is equally accidental and irrational, and is nevertheless accepted by him as the guiding principle in his life. Nor must we forget that Socrates is nowhere represented to us as a freethinker or sceptic. There is no reason whatever to doubt his sincerity when he implies his belief in the divinity of the sun and moon, or when he speculates on the possibility of seeing and knowing the heroes of the Trojan war in another world. On the other hand, his hope of immortality is uncertain; — he also conceives of death as a long sleep (in this respect differing from the Phaedo), and at last falls back on resignation to the divine will, and the certainty that no evil can happen to the good man either in life or death. His absolute truthfulness seems to hinder him from asserting positively more than this. The irony of Socrates is not a mask which he puts on at will, but flows necessarily out of his character and out of his relation to mankind. This, which is true of him generally, is especially true of the last memorable act in which his life is summed up. Such irony is not impaired but greatly heightened by a sort of natural simplicity.

It has been remarked that the prophecy at the end of a new generation of teachers who would rebuke and exhort the Athenian people in harsher and more violent terms, as far as we know, was never fulfilled. No inference can be drawn from this circumstance as to the probability of their having been actually uttered. They express the aspiration of the first martyr of philosophy, that he would leave behind him many followers, accompanied by the not unnatural feeling that they would be fiercer and more inconsiderate in their words when emancipated from his control.

The above remarks must be understood as applying with any degree of certainty to the Platonic Socrates only. For, however probable it may be that these or similar words may have been spoken by Socrates himself, we can not exclude the possibility, that like so much else, *e. g.* the wisdom of Critias, the poem of Solon, the virtues of Charmides, they may have been due only to the imagination of Plato.

APOLOGY

How you have felt, O men of Athens, at hearing the speeches of my accusers, I cannot tell; but I know that their persuasive words almost made me forget who I was: — such was the effect of them; and yet they have hardly spoken a word of truth. But many as their falsehoods were, there was one of them which quite amazed me; — I mean when they told you to be upon your guard, and not to let yourselves be deceived by the force of my eloquence. They ought to have been ashamed of saying this, because they were sure to be detected as soon as I opened my lips and displayed my deficiency: they certainly did appear to be most shameless in saying this, unless by the force of eloquence they mean the force of truth; for then I do indeed admit that I am eloquent. But in how different a way from theirs! Well, as I was saying, they have hardly uttered a word, or not more than a word, of truth; but you shall hear from me the whole truth: not, however, delivered after their manner, in a set oration duly ornamented with words and phrases. No, indeed! but I shall use the words and arguments which occur to me at the moment; for I am certain that this is right, and that at my time of life I ought not to be appearing before you, O men of Athens, in the character of a juvenile orator — let no one expect this of me. And I must beg of you to grant me one favor, which is this — If you hear me using the same words in my

defence which I have been in the habit of using, and which most of you may have heard in the agora, and at the tables of the money-changers, or anywhere else, I would ask you not to be surprised at this, and not to interrupt me. For I am more than seventy years of age, and this is the first time that I have ever appeared in a court of law, and I am quite a stranger to the ways of the place; and therefore I would have you regard me as if I were really a stranger, whom you would excuse if he spoke in his native tongue, and after the fashion of his country; — that I think is not an unfair request. Never mind the manner, which may or may not be good; but think only of the justice of my cause, and give heed to that: let the judge decide justly and the speaker speak truly.

And first, I have to reply to the older charges and to my first accusers, and then I will go on to the later ones. For I have had many accusers, who accused me of old, and their false charges have continued during many years; and I am more afraid of them than of Anytus and his associates, who are dangerous, too, in their own way. But far more dangerous are these, who began when you were children, and took possession of your minds with their falsehoods, telling of one Socrates, a wise man, who speculated about the heaven above, and searched into the earth beneath, and made the worse appear the better cause. These are the accusers whom I dread; for they are the circulators of this rumor, and their hearers are too apt to fancy that speculators of this sort do not believe in the gods. And they are many, and their charges against me are of ancient date, and they made them in days when you were impressible — in childhood, or perhaps in youth — and the cause when heard went by default, for there was none to answer. And hardest of all, their names I do not know and

can not tell; unless in the chance case of a comic poet. But the main body of these slanderers who from envy and malice have wrought upon you — and there are some of them who are convinced themselves, and impart their convictions to others — all these, I say, are most difficult to deal with; for I can not have them up here, and examine them, and therefore I must simply fight with shadows in my own defence, and examine when there is no one who answers. I will ask you then to assume with me, as I was saying, that my opponents are of two kinds; one recent, the other ancient: and I hope that you will see the propriety of my answering the latter first, for these accusations you heard long before the others, and much oftener.

Well, then, I will make my defence, and I will endeavor in the short time which is allowed to do away with this evil opinion of me which you have held for such a long time; and I hope that I may succeed, if this be well for you and me, and that my words may find favor with you. But I know that to accomplish this is not easy — I quite see the nature of the task. Let the event be as God wills: in obedience to the law I make my defence.

I will begin at the beginning, and ask what the accusation is which has given rise to this slander of me, and which has encouraged Meletus to proceed against me. What do the slanderers say? They shall be my prosecutors, and I will sum up their words in an affidavit. "Socrates is an evil-doer, and a curious person, who searches into things under the earth and in heaven, and he makes the worse appear the better cause; and he teaches the aforesaid doctrines to others." That is the nature of the accusation, and that is what you have seen yourselves in the comedy of Aristophanes, who has introduced a man whom he

calls Socrates, going about and saying that he can walk in the air, and talking a deal of nonsense concerning matters of which I do not pretend to know either much or little — not that I mean to say anything disparaging of any one who is a student of natural philosophy. I should be very sorry if Meletus could lay that to my charge. But the simple truth is, O Athenians, that I have nothing to do with these studies. Very many of those here present are witnesses to the truth of this, and to them I appeal. Speak then, you who have heard me, and tell your neighbors whether any of you have ever known me hold forth in few words or in many upon matters of this sort. . . . You hear their answer. And from what they say of this you will be able to judge of the truth of the rest.

As little foundation is there for the report that I am a teacher, and take money; that is no more true than the other. Although, if a man is able to teach, I honor him for being paid. There is Gorgias of Leontium, and Prodicus of Ceos, and Hippias of Elis, who go the round of the cities, and are able to persuade the young men to leave their own citizens, by whom they might be taught for nothing, and come to them, whom they not only pay, but are thankful if they may be allowed to pay them. There is actually a Parian philosopher residing in Athens, of whom I have heard; and I came to hear of him in this way: — I met a man who has spent a world of money on the sophists, Callias, the son of Hipponicus, and knowing that he had sons, I asked him: "Callias," I said, "if your two sons were foals or calves, there would be no difficulty in finding some one to put over them; we should hire a trainer of horses, or a farmer probably, who would improve and perfect them in their own proper virtue and excellence; but as they are

human beings, whom are you thinking of placing over them? Is there any one who understands human and political virtue? You must have thought about this as you have sons; is there any one?" "There is," he said. "Who is he?" said I; "and of what country? and what does he charge?" "Evenus the Parian," he replied; "he is the man, and his charge is five minae." Happy is Evenus, I said to myself, if he really has this wisdom, and teaches at such a modest charge. Had I the same, I should have been very proud and conceited; but the truth is that I have no knowledge of the kind, O Athenians.

I dare say that some one will ask the question, "Why is this, Socrates, and what is the origin of these accusations of you: for there must have been something strange which you have been doing? All this great fame and talk about you would never have arisen if you had been like other men: tell us, then, why this is, as we should be sorry to judge hastily of you." Now I regard this as a fair challenge, and I will endeavor to explain to you the origin of this name of "wise," and of this evil fame. Please to attend then. And although some of you may think that I am joking, I declare that I will tell you the entire truth. Men of Athens, this reputation of mine has come of a certain sort of wisdom which I possess. If you ask me what kind of wisdom, I reply, such wisdom as is attainable by man, for to that extent I am inclined to believe that I am wise; whereas the persons of whom I was speaking have a superhuman wisdom, which I may fail to describe, because I have it not myself; and he who says that I have, speaks falsely, and is taking away my character. And here, O men of Athens, I must beg you not to interrupt me, even if I seem to say something extravagant. For the word which I will speak is not mine. I will

refer you to a wisdom who is worthy of credit, and will tell you about my wisdom — whether I have any, and of what sort — and that witness shall be the God of Delphi. You must have known Chaerephon; he was early a friend of mine, and also a friend of yours, for he shared in the exile of the people, and returned with you. Well, Chaerephon, as you know, was very impetuous in all his doings, and he went to Delphi and boldly asked the oracle to tell him whether — as I was saying, I must beg you not to interrupt — he asked the oracle to tell him whether there was any one wiser than I was, and the Pythian prophetess answered, that there was no man wiser. Chaerephon is dead himself; but his brother, who is in court, will confirm the truth of this story.

Why do I mention this? Because I am going to explain to you why I have such an evil name. When I heard the answer, I said to myself, What can the god mean? and what is the interpretation of this riddle? for I know that I have no wisdom, small or great. What then can he mean when he says that I am the wisest of men? And yet he is a god, and can not lie; that would be against his nature. After long consideration, I at last thought of a method of trying the question. I reflected that if I could only find a man wiser than myself, then I might go to the god with a refutation in my hand. I should say to him, "Here is a man who is wiser than I am; but you said that I was the wisest." Accordingly I went to one who had the reputation of wisdom, and observed him — his name I need not mention; he was a politician whom I selected for examination — and the result was as follows: When I began to talk with him, I could not help thinking that he was not really wise, although he was thought wise by many, and wiser still by himself; and I went and tried to explain to

him that he thought himself wise, but was not really wise; and the consequence was that he hated me, and his enmity was shared by several who were present and heard me. So I left him, saying to myself, as I went away: Well, although I do not suppose that either of us knows anything really beautiful and good, I am better off than he is, — for he knows nothing, and thinks that he knows. I neither know nor think that I know. In this latter particular, then, I seem to have slightly the advantage of him. Then I went to another who had still higher philosophical pretensions, and my conclusion was exactly the same. I made another enemy of him, and of many others besides him.

After this I went to one man after another, being not unconscious of the enmity which I provoked, and I lamented and feared this: but necessity was laid upon me, — the word of God, I thought, ought to be considered first. And I said to myself, Go I must to all who appear to know, and find out the meaning of the oracle. And I swear to you, Athenians, by the dog I swear! — for I must tell you the truth — the result of my mission was just this: I found that the men most in repute were all but the most foolish; and that some inferior men were really wiser and better. I will tell you the tale of my wanderings and of the " Herculean " labors, as I may call them, which I endured only to find at last the oracle irrefutable. When I left the politicians, I went to the poets; tragic, dithyrambic, and all sorts. And there, I said to myself, you will be detected; now you will find out that you are more ignorant than they are. Accordingly, I took them some of the most elaborate passages in their own writings, and asked what was the meaning of them — thinking that they would teach me something. Will you believe me? I am

almost ashamed to speak of this, but still I must say that there is hardly a person present who would not have talked better about their poetry than they did themselves. That showed me in an instant that not by wisdom do poets write poetry, but by a sort of genius and inspiration; they are like diviners or soothsayers who also say many fine things, but do not understand the meaning of them. And the poets appeared to me to be much in the same case; and I further observed that upon the strength of their poetry they believed themselves to be the wisest of men in other things in which they were not wise. So I departed, conceiving myself to be superior to them for the same reason that I was superior to the politicians.

At last I went to the artisans, for I was conscious that I knew nothing at all, as I may say, and I was sure that they knew many fine things; and in this I was not mistaken, for they did know many things of which I was ignorant, and in this they certainly were wiser than I was. But I observed that even the good artisans fell into the same error as the poets; — because they were good workmen they thought that they also knew all sorts of high matters, and this defect in them overshadowed their wisdom — therefore I asked myself on behalf of the oracle, whether I would like to be as I was, neither having their knowledge nor their ignorance, or like them in both; and I made answer to myself and the oracle that I was better off as I was.

This investigation has led to my having many enemies of the worst and most dangerous kind, and has given occasion also to many calumnies. And I am called wise, for my hearers always imagine that I myself possess the wisdom which I find wanting in others: but the truth is, O men of Athens, that God

only is wise; and in this oracle he means to say that the wisdom of men is little or nothing; he is not speaking of Socrates, he is only using my name as an illustration, as if he said, He, O men, is the wisest who, like Socrates, knows that his wisdom is in truth worth nothing. And so I go my way, obedient to the god, and make inquisition into the wisdom of any one, whether citizen or stranger, who appears to be wise; and if he is not wise, then in vindication of the oracle I show him that he is not wise; and this occupation quite absorbs me, and I have no time to give either to any public matter of interest or to any concern of my own, but I am in utter poverty by reason of my devotion to the god.

There is another thing: — young men of the richer classes, who have not much to do, come about me of their own accord; they like to hear the pretenders examined, and they often imitate me, and examine others themselves; there are plenty of persons, as they soon enough discover, who think that they know something, but really know little or nothing; and then those who are examined by them instead of being angry with themselves are angry with me: This confounded Socrates, they say; this villainous misleader of youth! — and then if somebody asks them, Why, what evil does he practise or teach? they do not know, and can not tell; but in order that they may not appear to be at a loss, they repeat the ready-made charges which are used against all philosophers about teaching things up in the clouds and under the earth, and having no gods, and making the worse appear the better cause; for they do not like to confess that their pretence of knowledge has been detected — which is the truth; and as they are numerous and ambitious and energetic, and are all in battle array and have persuasive tongues, they have filled your

ears with their loud and inveterate calumnies. And this is the reason why my three accusers, Meletus and Anytus and Lycon, have set upon me; Meletus, who has a quarrel with me on behalf of the poets; Anytus, on behalf of the craftsmen; Lycon, on behalf of the rhetoricians: and as I said at the beginning, I can not expect to get rid of this mass of calumny all in a moment. And this, O men of Athens, is the truth and the whole truth; I have concealed nothing, I have dissembled nothing. And yet, I know that this plainness of speech makes them hate me, and what is their hatred but a proof that I am speaking the truth? — this is the occasion and reason of their slander of me, as you will find out either in this or in any future inquiry.

I have said enough in my defence against the first class of my accusers; I turn to the second class who are headed by Meletus, that good and patriotic man, as he calls himself. And now I will try to defend myself against them: these new accusers must also have their affidavit read. What do they say? Something of this sort: — That Socrates is a doer of evil, and corruptor of the youth, and he does not believe in the gods of the state, and has other new divinities of his own. That is the sort of charge; and now let us examine the particular counts. He says that I am a doer of evil, who corrupt the youth; but I say, O men of Athens, that Meletus is a doer of evil, and the evil is that he makes a joke of a serious matter, and is too ready at bringing other men to trial from a pretended zeal and interest about matters in which he really never had the smallest interest. And the truth of this I will endeavor to prove.

Come hither, Meletus, and let me ask a question of you. You think a great deal about the improvement of youth?

Yes I do.

Tell the judges, then, who is their improver; for you must know, as you have taken the pains to discover their corruptor, and are citing and accusing me before them. Speak, then, and tell the judges who their improver is. Observe, Meletus, that you are silent, and have nothing to say. But is not this rather disgraceful, and a very considerable proof of what I was saying, that you have no interest in the matter? Speak up, friend, and tell us who their improver is.

The laws.

But that, my good sir, is not my meaning. I want to know who the person is, who, in the first place, knows the laws.

The judges, Socrates, who are present in court.

What, do you mean to say, Meletus, that they are able to instruct and improve youth?

Certainly they are.

What, all of them, or some only and not others?

All of them.

By the goddess Here, that is good news! There are plenty of improvers, then. And what do you say of the audience, — do they improve them?

Yes, they do.

And the senators?

Yes, the senators improve them.

But perhaps the ecclesiasts corrupt them? — or do they too improve them?

They improve them.

Then every Athenian improves and elevates them; all with the exception of myself; and I alone am their corruptor? Is that what you affirm?

That is what I stoutly affirm.

I am very unfortunate if that is true. But suppose I ask you a question: Would you say that this also holds true in the case of horses? Does one man do

them harm and all the world good? Is not the exact opposite of this true? One man is able to do them good, or at least not many; — the trainer of horses, that is to say, does them good, and others who have to do with them rather injure them? Is not that true, Meletus, of horses, or any other animals? Yes, certainly. Whether you and Anytus say yes or no, that is no matter. Happy indeed would be the condition of youth if they had one corruptor only, and all the rest of the world were their improvers. And you, Meletus, have sufficiently shown that you never had a thought about the young: your carelessness is seen in your not caring about the matters spoken of in this very indictment.

And now, Meletus, I must ask you another question: Which is better, to live among bad citizens, or among good ones? Answer, friend, I say; for that is a question which may be easily answered. Do not the good do their neighbors good, and the bad do them evil?

Certainly.

And is there any one who would rather be injured than benefited by those who live with him? Answer, my good friend, the law requires you to answer — does any one like to be injured?

Certainly not.

And when you accuse me of corrupting and deteriorating the youth, do you allege that I corrupt them intentionally or unintentionally?

Intentionally, I say.

But you have just admitted that the good do their neighbors good, and the evil do them evil. Now, is that a truth which your superior wisdom has recognized thus early in life, and am I, at my age, in such darkness and ignorance as not to know that if a man with whom I have to live is corrupted by me, I am

very likely to be harmed by him, and yet I corrupt him, and intentionally, too; — that is what you are saying and of that you will never persuade me or any other human being. But either I do not corrupt them, or I corrupt them unintentionally, so that on either view of the case you lie. If my offence is unintentional, the law has no cognizance of unintentional offences: you ought to have taken me privately, and warned and admonished me; for if I had been better advised, I should have left off doing what I only did unintentionally — no doubt I should; whereas you hated to converse with me or teach me, but you indicted me in this court, which is a place not of instruction, but of punishment.

I have shown, Athenians, as I was saying, that Meletus has no care at all, great or small, about the matter. But still I should like to know, Meletus, in what I am affirmed to corrupt the young. I suppose you mean, as I infer from your indictment, that I teach them not to acknowledge the gods which the state acknowledges, but some other new divinities or spiritual agencies in their stead. These are the lessons which corrupt the youth, as you say.

Yes, that I say emphatically.

Then, by the gods, Meletus, of whom we are speaking, tell me and the court, in somewhat plainer terms, what you mean! for I do not as yet understand whether you affirm that I teach others to acknowledge some gods, and therefore do believe in gods, and am not an entire atheist — this you do not lay to my charge; — but only that they are not the same gods which the city recognizes — the charge is that they are different gods. Or, do you mean to say that I am an atheist simply, and a teacher of atheism?

I mean the latter — that you are a complete atheist.

That is an extraordinary statement, Meletus. Why

do you say that? Do you mean that I do not believe in the godhead of the sun or moon, which is the common creed of all men?

I assure you, judges, that he does not believe in them; for he says that the sun is stone, and the moon earth.

Friend Meletus, you think that you are accusing Anaxagoras: and you have but a bad opinion of the judges, if you fancy them ignorant to such a degree as not to know that these doctrines are found in the books of Anaxagoras the Clazomenian, who is full of them. And these are the doctrines which the youth are said to learn of Socrates, when there are not unfrequently exhibitions of them at the theatre[1] (price of admission one drachma at the most); and they might cheaply purchase them, and laugh at Socrates if he pretends to father such eccentricities. And so, Meletus, you really think that I do not believe in any god?

I swear by Zeus that you believe absolutely in none at all.

You are a liar, Meletus, not believed even by yourself. For I can not help thinking, O men of Athens, that Meletus is reckless and impudent, and that he has written this indictment in a spirit of mere wantonness and youthful bravado. Has he not compounded a riddle, thinking to try me? He said to himself: — I shall see whether this wise Socrates will discover my ingenious contradiction, or whether I shall be able to deceive him and the rest of them. For he certainly does appear to me to contradict himself in the indictment as much as if he said that Socrates is guilty of not believing in the gods, and yet of believing in them — but this surely is a piece of fun.

[1] Probably in allusion to Aristophanes who caricatured, and to Euripides who borrowed the notions of Anaxagoras, as well as to other dramatic poets.

I should like you, O men of Athens, to join me in examining in what I conceive to be his inconsistency; and do you, Meletus, answer. And I must remind you that you are not to interrupt me if I speak in my accustomed manner.

Did ever man, Meletus, believe in the existence of human things, and not human beings? . . . I wish, men of Athens, that he would answer, and not be always trying to get up an interruption. Did ever any man believe in horsemanship, and not in horses? or in flute-playing, and not in flute-players? No, my friend; I will answer to you and to the court, as you refuse to answer for yourself. There is no man who ever did. But now please to answer the next question: Can a man believe in spiritual and divine agencies, and not in spirits or demigods?

He can not.

I am glad that I have extracted that answer, by the assistance of the court; nevertheless you swear in the indictment that I teach and believe in divine or spiritual agencies (new or old, no matter for that); at any rate, I believe in spiritual agencies, as you say and swear in the affidavit; but if I believe in divine beings, I must believe in spirits or demigods; — is not that true? Yes, that is true, for I may assume that your silence gives assent to that. Now what are spirits or demigods? are they not either gods or the sons of gods? Is that true?

Yes, that is true.

But this is just the ingenious riddle of which I was speaking: the demigods or spirits are gods, and you say first that I don't believe in gods, and then again that I do believe in gods; that is, if I believe in demigods. For if the demigods are the illegitimate sons of gods, whether by the nymphs or by any other mothers, as is thought, that, as all men will allow, neces-

sarily implies the existence of their parents. You might as well affirm the existence of mules, and deny that of horses and asses. Such nonsense, Meletus, could only have been intended by you as a trial of me. You have put this into the indictment because you had nothing real of which to accuse me. But no one who has a particle of understanding will ever be convinced by you that the same men can believe in divine and superhuman things, and yet not believe that there are gods and demigods and heroes.

I have said enough in answer to the charge of Meletus: any elaborate defence is unnecessary; but as I was saying before, I certainly have many enemies, and this is what will be my destruction if I am destroyed; of that I am certain; — not Meletus, nor yet Anytus, but the envy and detraction of the world, which has been the death of many good men, and will probably be the death of many more; there is no danger of my being the last of them.

Some one will say: And are you not ashamed, Socrates, of a course of life which is likely to bring you to an untimely end? To him I may fairly answer: There you are mistaken: a man who is good for anything ought not to calculate the chance of living or dying; he ought only to consider whether in doing anything he is doing right or wrong — acting the part of a good man or of a bad. Whereas, according to your view, the heroes who fell at Troy were not good for much, and the son of Thetis above all, who altogether despised danger in comparison with disgrace; and when his goddess mother said to him, in his eagerness to slay Hector, that if he avenged his companion Patroclus, and slew Hector, he would die himself — "Fate," as she said, "waits upon you next after Hector;" he, hearing this, utterly despised danger and death, and instead of fear-

ing them, feared rather to live in dishonor, and not to avenge his friend. "Let me die next," he replies, "and be avenged of my enemy, rather than abide here by the beaked ships, a scorn and a burden of the earth." Had Achilles any thought of death and danger? For wherever a man's place is, whether the place which he has chosen or that in which he has been placed by a commander, there he ought to remain in the hour of danger; he should not think of death or of anything, but of disgrace. And this, O men of Athens, is a true saying.

Strange, indeed, would be my conduct, O men of Athens, if I who, when I was ordered by the generals whom you chose to command me at Potidaea and Amphipolis and Delium, remained where they placed me, like any other man, facing death; if, I say, now, when, as I conceive and imagine, God orders me to fulfil the philosopher's mission of searching into myself and other men, I were to desert my post through fear of death, or any other fear; that would indeed be strange, and I might justly be arraigned in court for denying the existence of the gods, if I disobeyed the oracle because I was afraid of death: then I should be fancying that I was wise when I was not wise. For this fear of death is indeed the pretence of wisdom, and not real wisdom, being the appearance of knowing the unknown; since no one knows whether death, which they in their fear apprehend to be the greatest evil, may not be the greatest good. Is there not here conceit of knowledge, which is a disgraceful sort of ignorance? And this is the point in which, as I think, I am superior to men in general, and in which I might perhaps fancy myself wiser than other men, — that whereas I know but little of the world below, I do not suppose that I know: but I do know that injustice and disobedience to a better,

whether God or man, is evil and dishonorable, and I will never fear or avoid a possible good rather than a certain evil. And therefore if you let me go now, and reject the counsels of Anytus, who said that if I were not put to death I ought not to have been prosecuted, and that if I escape now, your sons will all be utterly ruined by listening to my words — if you say to me, Socrates, this time we will not mind Anytus, and will let you off, but upon one condition, that you are not to inquire and speculate in this way any more, and that if you are caught doing this again you shall die; — if this was the condition on which you let me go, I should reply: Men of Athens, I honor and love you; but I shall obey God rather than you, and while I have life and strength I shall never cease from the practice and teaching of philosophy, exhorting any one whom I meet after my manner, and convincing him, saying: O my friend, why do you, who are a citizen of the great and mighty and wise city of Athens, care so much about laying up the greatest amount of money and honor and reputation, and so little about wisdom and truth and the greatest improvement of the soul, which you never regard or heed at all? Are you not ashamed of this? And if the person with whom I am arguing, says: Yes, but I do care; I do not depart or let him go at once; I interrogate and examine and cross-examine him, and if I think that he has no virtue, but only says that he has, I reproach him with undervaluing the greater, and overvaluing the less. And this I should say to every one whom I meet, young and old, citizen and alien, but especially to the citizens, inasmuch as they are my brethren. For this is the command to God, as I would have you know; and I believe that to this day no greater good has ever happened in the state than my service to the God. For I do nothing but

go about persuading you all, old and young alike, not to take thought for your persons or your properties, but first and chiefly to care about the greatest improvement of the soul. I tell you that virtue is not given by money, but that from virtue come money and every other good of man, public as well as private. This is my teaching, and if this is the doctrine which corrupts the youth, my influence is ruinous indeed. But if any one says that this is not my teaching, he is speaking an untruth. Wherefore, O men of Athens, I say to you, do as Anytus bids or not as Anytus bids, and either acquit me or not; but whatever you do, know that I shall never alter my ways, not even if I have to die many times.

Men of Athens, do not interrupt, but hear me; there was an agreement between us that you should hear me out. And I think that what I am going to say will do you good: for I have something more to say, at which you may be inclined to cry out; but I beg that you will not do this. I would have you know, that if you kill such an one as I am, you will injure yourselves more than you will injure me. Meletus and Anytus will not injure me: they can not; for it is not in the nature of things that a bad man should injure a better than himself. I do not deny that he may, perhaps, kill him, or drive him into exile, or deprive him of civil rights; and he may imagine, and others may imagine, that he is doing him a great injury: but in that I do not agree with him; for the evil of doing as Anytus is doing — of unjustly taking away another man's life — is greater far. And now, Athenians, I am not going to argue for my own sake, as you may think, but for yours, that you may not sin against the God, or lightly reject his boon by condemning me. For if you kill me you will not easily find another like me, who, if I may use such a ludi-

crous figure of speech, am a sort of gadfly, given to the state by the God; and the state is like a great and noble steed who is tardy in his motions owing to his very size, and requires to be stirred into life. I am that gadfly which God has given the state, and all day long and in all places am always fastening upon you, arousing and persuading and reproaching you. And as you will not easily find another like me, I would advise you to spare me. I dare say that you may feel irritated at being suddenly awakened when you are caught napping; and you may think that if you were to strike me dead as Anytus advises, which you easily might, then you would sleep on for the remainder of your lives, unless God in his care of you gives you another gadfly. And that I am given to you by God is proved by this: — that if I had been like other men, I should not have neglected all my own concerns or patiently seen the neglect of them during all these years, and have been doing yours, coming to you individually like a father or elder brother, exhorting you to regard virtue; this, I say, would not be like human nature. And had I gained anything, or if my exhortations had been paid, there would have been some sense in that; but now, as you will perceive, not even the impudence of my accusers dares to say that I have ever exacted or sought pay of any one; they have no witness of that. And I have a witness of the truth of what I say; my poverty is a sufficient witness.

Some one may wonder why I go about in private giving advice and busying myself with the concerns of others, but do not venture to come forward in public and advise the state. I will tell you the reason of this. You have often heard me speak of an oracle or sign which comes to me, and is the divinity which Meletus ridicules in the indictment. This sign I have

had ever since I was a child. The sign is a voice which comes to me and always forbids me to do something which I am going to do, but never commands me to do anything, and this is what stands in the way of my being a politician. And rightly, as I think. For I am certain, O men of Athens, that if I had engaged in politics, I should have perished long ago, and done no good either to you or to myself. And don't be offended at my telling you the truth: for the truth is, that no man who goes to war with you or any other multitude, honestly struggling against the commission of unrighteousness and wrong in the state, will save his life; he who will really fight for the right, if he would live even for a little while, must have a private station and not a public one.

I can give you as proofs of this, not words only, but deeds, which you value more than words. Let me tell you a passage of my own life which will prove to you that I should never have yielded to injustice from any fear of death, and that if I had not yielded I should have died at once. I will tell you a story — tasteless perhaps and commonplace, but nevertheless true. The only office of state which I ever held, O men of Athens, was that of senator: the tribe Antiochis, which is my tribe, had the presidency at the trial of the generals who had not taken up the bodies of the slain after the battle of Arginusae; and you proposed to try them all together, which was illegal, as you all thought afterwards; but at the time I was the only one of the Prytanes who was opposed to the illegality, and I gave my vote against you; and when the orators threatened to impeach and arrest me, and have me taken away, and you called and shouted, I made up my mind that I would run the risk, having law and justice with me, rather than take part in your injustice because I feared imprisonment and death.

This happened in the days of the democracy. But when the oligarchy of the Thirty was in power, they sent for me and four others into the rotunda, and bade us bring Leon the Salaminian from Salamis, as they wanted to execute him. This was a specimen of the sort of commands which they were always giving with the view of implicating as many as possible in their crimes; and then I showed, not in word only but in deed, that, if I may be allowed to use such an expression, I cared not a straw for death, and that my only fear was the fear of doing an unrighteous or unholy thing. For the strong arm of that oppressive power did not frighten me into doing wrong; and when we came out of the rotunda the other four went to Salamis and fetched Leon, but I went quietly home. For which I might have lost my life, had not the power of the Thirty shortly afterwards come to an end. And to this many will witness.

Now do you really imagine that I could have survived all these years, if I had led a public life, supposing that like a good man I had always supported the right and had made justice, as I ought, the first thing? No indeed, men of Athens, neither I nor any other. But I have been always the same in all my actions, public as well as private, and never have I yielded any base compliance to those who are slanderously termed my disciples, or to any other. For the truth is that I have no regular disciples: but if any one likes to come and hear me while I am pursuing my mission, whether he be young or old, he may freely come. Nor do I converse with those who pay only, and not with those who do not pay; but any one, whether he be rich or poor, may ask and answer me and listen to my words; and whether he turns out to be a bad man or a good one, that can not be justly laid to my charge, as I never taught him anything.

And if any one says that he has ever learned or heard anything from me in private which all the world has not heard, I should like you to know that he is speaking an untruth.

But I shall be asked, Why do people delight in continually conversing with you? I have told you already, Athenians, the whole truth about this: they like to hear the cross-examination of the pretenders to wisdom; there is amusement in this. And this is a duty which the God has imposed upon me, as I am assured by oracles, visions, and in every sort of way in which the will of divine power was ever signified to any one. This is true, O Athenians; or, if not true, would be soon refuted. For if I am really corrupting the youth, and have corrupted some of them already, those of them who have grown up and have become sensible that I gave them bad advice in the days of their youth should come forward as accusers and take their revenge; and if they do not like to come themselves, some of their relatives, fathers, brothers, or other kinsmen, should say what evil their families suffered at my hands. Now is their time. Many of them I see in the court. There is Crito, who is of the same age and of the same deme with myself, and there is Critobulus his son, whom I also see. Then again there is Lysanias of Sphettus, who is the father of Aeschines — he is present; and also there is Antiphon of Cephisus, who is the father of Epigenes; and there are the brothers of several who have associated with me. There is Nicostratus the son of Theosdotides, and the brother of Theodotus (now Theodotus himself is dead, and therefore he, at any rate, will not seek to stop him); and there is Paralus the son of Demodocus, who had a brother Theages; and Adeimantus the son of Ariston, whose brother Plato is present; and Aeantodorus, who is the brother of

Apollodorus, whom I also see. I might mention a great many others, any of whom Meletus should have produced as witnesses in the course of his speech; and let him still produce them, if he has forgotten — I will make way for him. And let him say, if he has any testimony of the sort which he can produce. Nay, Athenians, the very opposite is the truth. For all these are ready to witness on behalf of the corruptor, of the destroyer of their kindred, as Meletus and Anytus call me; not the corrupted youth only — there might have been a motive for that — but their uncorrupted elder relatives. Why should they too support me with their testimony? Why, indeed, except for the sake of truth and justice, and because they know that I am speaking the truth, and that Meletus is lying.

Well, Athenians, this and the like of this is nearly all the defence which I have to offer. Yet a word more. Perhaps there may be some one who is offended at me, when he calls to mind how he himself on a similar, or even a less serious occasion, had recourse to prayers and supplications with many tears, and how he produced his children in court, which was a moving spectacle, together with a posse of his relations and friends; whereas I, who am probably in danger of my life, will do none of these things. Perhaps this may come into his mind, and he may be set against me, and vote in anger because he is displeased at this. Now if there be such a person among you, which I am far from affirming, I may fairly reply to him: My friend, I am a man, and like other men, a creature of flesh and blood, and not of wood or stone, as Homer says; and I have a family, yes, and sons, O Athenians, three in number, one of whom is growing up, and the two others are still young; and yet I will not bring any of them hither in order to

petition you for an acquittal. And why not? Not from any self-will or disregard of you. Whether I am or am not afraid of death is another question, of which I will not now speak. But my reason simply is, that I feel such conduct to be discreditable to myself, and you, and the whole state. One who has reached my years, and who has a name for wisdom, whether deserved or not, ought not to demean himself. At any rate, the world has decided that Socrates is in some way superior to other men. And if those among you who are said to be superior in wisdom and courage, and any other virtue, demean themselves in this way, how shameful is their conduct! I have seen men of reputation, when they have been condemned, behaving in the strangest manner: they seemed to fancy that they were going to suffer something dreadful if they died, and that they could be immortal if you only allowed them to live; and I think that they were a dishonor to the state, and that any stranger coming in would say of them that the most eminent men of Athens, to whom the Athenians themselves give honor and command, are no better than women. And I say that these things ought not to be done by those of us who are of reputation; and if they are done, you ought not to permit them; you ought rather to show that you are more inclined to condemn, not the man who is quiet, but the man who gets up a doleful scene, and makes the city ridiculous.

But, setting aside the question of dishonor, there seems to be something wrong in petitioning a judge, and thus procuring an acquittal instead of informing and convincing him. For his duty is, not to make a present of justice, but to give judgment; and he has sworn that he will judge according to the laws and not according to his own good pleasure; and neither he nor we should get into the habit of perjuring our-

selves — there can be no piety in that. Do not then require me to do what I consider dishonorable and impious and wrong, especially now, when I am being tried for impiety on the indictment of Meletus. For if, O men of Athens, by force of persuasion and entreaty, I could overpower your oaths, then I should be teaching you to believe that there are no gods, and convict myself, in my own defence, of not believing in them. But that is not the case; for I do believe that there are gods, and in a far higher sense than that in which any of my accusers believe in them. And to you and to God I commit my cause, to be determined by you as is best for you and me.

There are many reasons why I am not grieved, O men of Athens, at the vote of condemnation. I expected this, and am only surprised that the votes are so nearly equal; for I had thought that the majority against me would have been far larger; but now, had thirty votes gone over to the other side, I should have been acquitted. And I may say that I have escaped Meletus. And I may say more; for without the assistance of Anytus and Lycon, he would not have had a fifth part of the votes, as the law requires, in which case he would have incurred a fine of a thousand drachmae, as is evident.

And so he proposes death as the penalty. And what shall I propose on my part, O men of Athens? Clearly that which is my due. And what is that which I ought to pay or to receive? What shall be done to the man who has never had the wit to be idle during his whole life; but has been careless of what the many care about — wealth, and family interests, and military offices, and speaking in the assembly, and magistracies, and plots, and parties. Reflecting that I

was really too honest a man to follow in this way and live, I did not go where I could do no good to you or to myself; but where I could do the greatest good privately to every one of you, thither I went, and sought to persuade every man among you, that he must look to himself, and seek virtue and wisdom before he looks to his private interests, and look to the state before he looks to the interests of the state; and that this should be the order which he observes in all his actions. What shall be done to such an one? Doubtless some good thing, O men of Athens, if he has his reward; and the good should be of a kind suitable to him. What would be a reward suitable to a poor man who is your benefactor, who desires leisure that he may instruct you? There can be no more fitting reward than maintenance in the Prytaneum, O men of Athens, a reward which he deserves far more than the citizen who has won the prize at Olympia in the horse or chariot race, whether the chariots were drawn by two horses or by many. For I am in want, and he has enough; and he only gives you the appearance of happiness, and I give you the reality. And if I am to estimate the penalty justly, I say that maintenance in the Prytaneum is the just return.

Perhaps you may think that I am braving you in saying this, as in what I said before about the tears and prayers. But that is not the case. I speak rather because I am convinced that I never intentionally wronged any one, although I can not convince you of that — for we have had a short conversation only; but if there were a law at Athens, such as there is in other cities, that a capital cause should not be decided in one day, then I believe that I should have convinced you; but now the time is too short. I can not in a moment refute great slanders; and, as I am con-

vinced that I never wronged another, I will assuredly not wrong myself. I will not say of myself that I deserve any evil, or propose any penalty. Why should I? Because I am afraid of the penalty of death which Meletus proposes? When I do not know whether death is a good or an evil, why should I propose a penalty which would certainly be an evil? Shall I say imprisonment? And why should I live in prison, and be the slave of the magistrates of the year — of the eleven? Or shall the penalty be a fine, and imprisonment until the fine is paid? There is the same objection. I should have to lie in prison, for money I have none, and can not pay. And if I say exile (and this may possibly be the penalty which you will affix), I must indeed be blinded by the love of life, if I do not consider that when you, who are my own citizens, can not endure my discourses and words, and have found them so grievous and odious that you would fain have done with them, others are likely to endure me. No indeed, men of Athens, that is not very likely. And what a life should I lead, at my age, wandering from city to city, living in ever-changing exile, and always being driven out! For I am quite sure that into whatever place I go, as here so also there, the young men will come to me; and if I drive them away, their elders will drive me out at their desire; and if I let them come, their fathers and friends will drive me out for their sakes.

Some one will say: Yes, Socrates, but can not you hold your tongue, and then you may go into a foreign city, and no one will interfere with you? Now I have great difficulty in making you understand my answer to this. For if I tell you that this would be a disobedience to a divine command, and therefore that I can not hold my tongue, you will not believe that I am serious; and if I say again that the greatest good

of man is daily to converse about virtue, and all that concerning which you hear me examining myself and others, and that the life which is unexamined is not worth living — that you are still less likely to believe. And yet what I say is true, although a thing of which it is hard for me to persuade you. Moreover, I am not accustomed to think that I deserve any punishment. Had I money I might have proposed to give you what I had, and have been none the worse. But you see that I have none, and can only ask you to proportion the fine to my means. However, I think that I could afford a mina, and therefore I propose that penalty: Plato, Crito, Critobulus, and Apollodorus, my friends here, bid me say thirty minae, and they will be the sureties. Well, then, say thirty minae, let that be the penalty; for that they will be ample security to you.

Not much time will be gained, O Athenians, in return for the evil name which you will get from the detractors of the city, who will say that you killed Socrates, a wise man; for they will call me wise even although I am not wise when they want to reproach you. If you had waited a little while, your desire would have been fulfilled in the course of nature. For I am far advanced in years, as you may perceive, and not far from death. I am speaking now only to those of you who have condemned me to death. And I have another thing to say to them: You think that I was convicted through deficiency of words — I mean, that if I had thought fit to leave nothing undone, nothing unsaid, I might have gained an acquittal. Not so; the deficiency which led to my conviction was not of words — certainly not. But I had not the boldness or impudence or inclination to

address you as you would have liked me to address you, weeping and wailing and lamenting, and saying and doing many things which you have been accustomed to hear from others, and which, as I say, are unworthy of me. But I thought that I ought not to do anything common or mean in the hour of danger: nor do I now repent of the manner of my defence, and I would rather die having spoken after my manner, than speak in your manner and live. For neither in war nor yet at law ought any man to use every way of escaping death. For often in battle there is no doubt that if a man will throw away his arms, and fall on his knees before his pursuers, he may escape death; and in other dangers there are other ways of escaping death, if a man is willing to say and do anything. The difficulty, my friends, is not in avoiding death, but in avoiding unrighteousness; for that runs faster than death. I am old and move slowly, and the slower runner has overtaken me, and my accusers are keen and quick, and the faster runner, who is unrighteousness, has overtaken them. And now I depart hence condemned by you to suffer the penalty of death, and they too go their ways condemned by the truth to suffer the penalty of villainy and wrong; and I must abide by my award — let them abide by theirs. I suppose that these things may be regarded as fated, — and I think that they are well.

And now, O men who have condemned me, I would fain prophesy to you; for I am about to die, and that is the hour in which men are gifted with prophetic power. And I prophesy to you who are my murderers, that immediately after my death punishment far heavier than you have inflicted on me will surely await you. Me you have killed because you wanted to escape the accuser, and not to give an ac-

count of your lives. But that will not be as you suppose: far otherwise. For I say that there will be more accusers of you than there are now; accusers whom hitherto I have restrained: and as they are younger they will be more severe with you, and you will be more offended at them. For if you think that by killing men you can avoid the accuser censuring your lives, you are mistaken; that is not a way of escape which is either possible or honorable; the easiest and the noblest way is not to be crushing others, but to be improving yourselves. This is the prophecy which I utter before my departure to the judges who have condemned me.

Friends, who would have acquitted me, I would like also to talk with you about this thing which has happened, while the magistrates are busy, and before I go to the place at which I must die. Stay then awhile, for we may as well talk with one another while there is time. You are my friends, and I should like to show you the meaning of this event which has happened to me. O my judges — for you I may truly call judges — I should like to tell you of a wonderful circumstance. Hitherto the familiar oracle within me has constantly been in the habit of opposing me even about trifles, if I was going to make a slip or error about anything; and now as you see there has come upon me that which may be thought, and is generally believed to be, the last and worst evil. But the oracle made no sign of opposition, either as I was leaving my house and going out in the morning, or when I was going up into this court, or while I was speaking, at anything which I was going to say; and yet I have often been stopped in the middle of a speech, but now in nothing I either said or did touching this matter has the oracle opposed me. What do I take to be the explanation of this? I will tell you. I re-

gard this as a proof that what has happened to me is a good, and that those of us who think that death is an evil are in error. This is a great proof to me of what I am saying, for the customary sign would surely have opposed me had I been going to evil and not to good.

Let us reflect in another way, and we shall see that there is great reason to hope that death is a good, for one of two things: — either death is a state of nothingness and utter unconsciousness, or, as men say, there is a change and migration of the soul from this world to another. Now if you suppose that there is no consciousness, but a sleep like the sleep of him who is undisturbed even by the sight of dreams, death will be an unspeakable gain. For if a person were to select the night in which his sleep was undisturbed even by dreams, and were to compare with this the other days and nights of his life, and then were to tell us how many days and nights he had passed in the course of his life better and more pleasantly than this one, I think that any man, I will not say a private man, but even the great king will not find many such days or nights, when compared with the others. Now if death is like this, I say that to die is gain; for eternity is then only a single night. But if death is the journey to another place, and there, as men say, all the dead are, what good, O my friends and judges, can be greater than this? If indeed when the pilgrim arrives in the world below, he is delivered from the professors of justice in this world, and finds the true judges who are said to give judgment there, Minos and Rhadamanthus and Aeacus and Triptolemus, and other sons of God who were righteous in their own life, that pilgrimage will be worth making. What would not a man give if he might converse with Orpheus and Musaeus and Hesiod and Homer?

Nay, if this be true, let me die again and again. I, too, shall have a wonderful interest in a place where I can converse with Palamedes, and Ajax the son of Telamon, and other heroes of old, who have suffered death through an unjust judgment; and there will be no small pleasure, as I think, in comparing my own sufferings with theirs. Above all, I shall be able to continue my search into true and false knowledge; as in this world, so also in that; I shall find out who is wise, and who pretends to be wise, and is not. What would not a man give, O judges, to be able to examine the leader of the great Trojan expedition; or Odysseus or Sisyphus, or numberless others, men and women too! What infinite delight would there be in conversing with them and asking them questions! For in that world they do not put a man to death for this; certainly not. For besides being happier in that world than in this, they will be immortal, if what is said is true.

Wherefore, O judges, be of good cheer about death, and know this of a truth — that no evil can happen to a good man, either in life or after death. He and his are not neglected by the gods; nor has my own approaching end happened by mere chance. But I see clearly that to die and be released was better for me; and therefore the oracle gave no sign. For which reason, also, I am not angry with my accusers or my condemners; they have done me no harm, although neither of them meant to do me any good; and for this I may gently blame them.

Still I have a favor to ask of them. When my sons are grown up, I would ask you, O my friends, to punish them; and I would have you trouble them, as I have troubled you, if they seem to care about riches, or anything, more than about virtue; or if they pretend to be something when they are really

nothing, — then reprove them, as I have reproved you, for not caring about that for which they ought to care, and thinking that they are something when they are really nothing. And if you do this, I and my sons will have received justice at your hands.

The hour of departure has arrived, and we go our ways — I to die, and you to live. Which is better God only knows.

CRITO

INTRODUCTION

THE Crito seems intended to exhibit the character of Socrates in one light only, not as the philosopher, fulfilling a divine mission and trusting in the will of heaven, but simply as the good citizen, who having been unjustly condemned is willing to give up his life in obedience to the laws of the state.

The days of Socrates are drawing to a close; the fatal ship has been seen off Sunium, as he is informed by his aged friend and contemporary Crito, who visits him before the dawn has broken; he himself has been warned in a dream that on the third day he must depart. Time is precious, and Crito has come early in order to gain his consent to a plan of escape. This can be easily accomplished by his friends, who will incur no danger in making the attempt to save him, but will be disgraced forever if they allow him to perish. He should think of his duty to his children, and not play into the hands of his enemies. Money is already provided by Crito as well as by Simmias and others, and he will have no difficulty in finding friends in Thessaly and other places.

Socrates is afraid that Crito is but pressing upon him the opinions of the many: whereas, all his life long he has followed the dictates of reason only and the opinion of the one wise or skilled man. There was a time when Crito himself had allowed the propriety of this. And although some one will say "the many can kill us," that makes no difference; but a good life, that is to say a just and honorable life, is alone to be valued. All considerations of loss of reputation or injury to his children should be dismissed: the only question is whether he would be right in attempting to escape. Crito, who is a disinterested person not having the fear of death before his eyes, shall answer this for him. Before he was condemned they had often held discussions, in which they agreed that no man should either do evil, or return evil for evil, or betray the right. Are these principles to be altered because the circumstances of Socrates are altered? Crito admits that they remain the same. Then is his

escape consistent with the maintenance of them? To this Crito is unable or unwilling to reply.

Socrates proceeds: — Suppose the laws of Athens to come and remonstrate with him: they will ask "Why does he seek to overturn them?" and if he replies, "they have injured him," will not the laws answer, "Yes, but was that the agreement? Has he any objection to make to them which would justify him in overturning them? Was he not brought into the world and educated by their help, and are they not his parents? He might have left Athens and gone where he pleased, but he has lived there for seventy years more constantly than any other citizen." Thus he has clearly shown that he acknowledged the agreement which he can not now break without dishonor to himself and danger to his friends. Even in the course of the trial he might have proposed exile as the penalty, but then he declared that he preferred death to exile. And whither will he direct his footsteps? In any well-ordered state the laws will consider him as an enemy. Possibly in a land of misrule like Thessaly he may be welcomed at first, and the unseemly narrative of his escape regarded by the inhabitants as an amusing tale. But if he offends them he will have to learn another sort of lesson. Will he continue to give lectures in virtue? That would hardly be decent. And how will his children be the gainers if he takes them into Thessaly, and deprives them of Athenian citizenship? Or if he leaves them behind, does he expect that they will be better taken care of by his friends because he is in Thessaly? Will not true friends care for them equally whether he is alive or dead?

Finally, they exhort him to think of justice first, and of life and children afterwards. He may now depart in peace and innocence, a sufferer and not a doer of evil. But if he breaks agreements, and returns evil for evil, they will be angry with him while he lives; and their brethren the laws of the world below will receive him as an enemy. Such is the mystic voice which is always murmuring in his ears.

That Socrates was not a good citizen was a charge made against him during his lifetime, which has been often repeated in later ages. The crimes of Alcibiades, Critias, and Charmides, who had been his pupils, were still recent in the memory of the now restored democracy. The fact that he had been neutral in the death-struggle of Athens was not likely to conciliate popular good-will. Plato, writing probably in the next generation, un-

dertakes the defence of his friend and master in this particular, not to the Athenians of his day, but to posterity and the world at large.

Whether such an incident ever really occurred as the visit of Crito and the proposal of escape is uncertain: Plato could easily have invented far more than that; and in the selection of Crito, the aged friend, as the fittest person to make the proposal to Socrates, we seem to recognize the hand of the artist. Whether any one who has been subjected by the laws of his country to an unjust judgment is right in attempting to escape, is a thesis about which casuists might disagree. Shelley is of opinion that Socrates " did well to die," but not for the " sophistical " reasons which Plato has put into his mouth. And there would be no difficulty in arguing that Socrates should have lived and preferred to a glorious death the good which he might still be able to perform. " A skilful rhetorician would have had much to say about that." It may be remarked however that Plato never intended to answer the question of casuistry, but only to exhibit the ideal of patient virtue which refuses to do the least evil in order to avoid the greatest, and to show Socrates. his master, maintaining in death the opinions which he had professed in his life. Not " the world," but the " one wise man," is still the philosopher's paradox in his last hours.

CRITO

PERSONS OF THE DIALOGUE

SOCRATES. CRITO.

SCENE: — The Prison of Socrates.

Socrates. WHY have you come at this hour, Crito? it must be quite early?

Crito. Yes, certainly.

Soc. What is the exact time?

Cr. The dawn is breaking.

Soc. I wonder that the keeper of the prison would let you in.

Cr. He knows me, because I often come, Socrates; moreover, I have done him a kindness.

Soc. And are you only just come?

Cr. No, I came some time ago.

Soc. Then why did you sit and say nothing, instead of awakening me at once?

Cr. Why, indeed, Socrates, I myself would rather not have all this sleeplessness and sorrow. But I have been wondering at your peaceful slumbers, and that was the reason why I did not awaken you, because I wanted you to be out of pain. I have always thought you happy in the calmness of your temperament; but never did I see the like of the easy, cheerful way in which you bear this calamity.

Soc. Why, Crito, when a man has reached my age he ought not to be repining at the prospect of death.

Cr. And yet other old men find themselves in sim-

ilar misfortunes, and age does not prevent them from repining.

Soc. That may be. But you have not told me why you come at this early hour.

Cr. I come to bring you a message which is sad and painful; not, as I believe, to yourself, but to all of us who are your friends, and saddest of all to me.

Soc. What! I suppose that the ship has come from Delos, on the arrival of which I am to die?

Cr. No, the ship has not actually arrived, but she will probably be here to-day, as persons who have come from Sunium tell me that they left her there; and therefore to-morrow, Socrates, will be the last day of your life.

Soc. Very well, Crito; if such is the will of God, I am willing; but my belief is that there will be a delay of a day.

Cr. Why do you say this?

Soc. I will tell you. I am to die on the day after the arrival of the ship?

Cr. Yes; that is what the authorities say.

Soc. But I do not think that the ship will be here until to-morrow; this I gather from a vision which I had last night, or rather only just now, when you fortunately allowed me to sleep.

Cr. And what was the nature of the vision?

Soc. There came to me the likeness of a woman, fair and comely, clothed in white raiment, who called to me and said: O Socrates,

> "The third day hence to Phthia shalt thou go."

Cr. What a singular dream, Socrates!

Soc. There can be no doubt about the meaning, Crito, I think.

Cr. Yes; the meaning is only too clear. But, Oh! my beloved Socrates, let me entreat you once more

to take my advice and escape. For if you die I shall not only lose a friend who can never be replaced, but there is another evil: people who do not know you and me will believe that I might have saved you if I had been willing to give money, but that I did not care. Now, can there be a worse disgrace than this — that I should be thought to value money more than the life of a friend? For the many will not be persuaded that I wanted you to escape, and that you refused.

Soc. But why, my dear Crito, should we care about the opinion of the many? Good men, and they are the only persons who are worth considering, will think of these things truly as they happened.

Cr. But do you see, Socrates, that the opinion of the many must be regarded, as is evident in your own case, because they can do the very greatest evil to any one who has lost their good opinion.

Soc. I only wish, Crito, that they could; for then they could also do the greatest good, and that would be well. But the truth is, that they can do neither good nor evil: they can not make a man wise or make him foolish; and whatever they do is the result of chance.

Cr. Well, I will not dispute about that; but please to tell me, Socrates, whether you are not acting out of regard to me and your other friends: are you not afraid that if you escape hence we may get into trouble with the informers for having stolen you away, and lose either the whole or a great part of our property; or that even a worse evil may happen to us? Now, if this is your fear, be at ease; for in order to save you, we ought surely to run this, or even a greater risk; be persuaded, then, and do as I say.

Soc. Yes, Crito, that is one fear which you mention, but by no means the only one.

Cr. Fear not. There are persons who at no great cost are willing to save you and bring you out of prison; and as for the informers, you may observe that they are far from being exorbitant in their demands; a little money will satisfy them. My means, which, as I am sure, are ample, are at your service, and if you have a scruple about spending all mine, here are strangers who will give you the use of theirs; and one of them, Simmias the Theban, has brought a sum of money for this very purpose; and Cebes and many others are willing to spend their money too. I say therefore, do not on that account hesitate about making your escape, and do not say, as you did in the court, that you will have a difficulty in knowing what to do with yourself if you escape. For men will love you in other places to which you may go, and not in Athens only; there are friends of mine in Thessaly, if you like to go to them, who will value and protect you, and no Thessalian will give you any trouble. Nor can I think that you are justified, Socrates, in betraying your own life when you might be saved; this is playing into the hands of your enemies and destroyers; and moreover I should say that you were betraying your children; for you might bring them up and educate them; instead of which you go away and leave them, and they will have to take their chance; and if they do not meet with the usual fate of orphans, there will be small thanks to you. No man should bring children into the world who is unwilling to persevere to the end in their nurture and education. But you are choosing the easier part, as I think, not the better and manlier, which would rather have become one who professes virtue in all his actions, like yourself. And indeed, I am ashamed not only of you, but of us who are your friends, when I reflect that this entire business of yours will be

attributed to our want of courage. The trial need never have come on, or might have been brought to another issue; and the end of all, which is the crowning absurdity, will seem to have been permitted by us, through cowardice and baseness, who might have saved you, as you might have saved yourself, if we had been good for anything (for there was no difficulty in escaping); and we did not see how disgraceful, Socrates, and also miserable all this will be to us as well as to you. Make your mind up then, or rather have your mind already made up, for the time of deliberation is over, and there is only one thing to be done, which must be done, if at all, this very night, and which any delay will render all but impossible; I beseech you therefore, Socrates, to be persuaded by me, and to do as I say.

Soc. Dear Crito, your zeal is invaluable, if a right one; but if wrong, the greater the zeal the greater the evil; and therefore we ought to consider whether these things shall be done or not. For I am and always have been one of those natures who must be guided by reason, whatever the reason may be which upon reflection appears to me to be the best; and now that this fortune has come upon me, I can not put away the reasons which I have before given: the principles which I have hitherto honored and revered I still honor, and unless we can find other and better principles on the instant, I am certain not to agree with you; no, not even if the power of the multitude could inflict many more imprisonments, confiscations, deaths, frightening us like children with hobgoblin terrors. But what will be the fairest way of considering the question? Shall I return to your old argument about the opinions of men? some of which are to be regarded, and others, as we were saying, are not to be regarded. Now were we right in maintain-

ing this before I was condemned? And has the argument which was once good now proved to be talk for the sake of talking; — in fact an amusement only, and altogether vanity? That is what I want to consider with your help, Crito: — whether, under my present circumstances, the argument appears to be in any way different or not; and is to be allowed by me or disallowed. That argument, which, as I believe, is maintained by many who assume to be authorities, was to the effect, as I was saying, that the opinions of some men are to be regarded, and of other men not to be regarded. Now you, Crito, are a disinterested person who are not going to die to-morrow — at least, there is no human probability of this, and you are therefore not liable to be deceived by the circumstances in which you are placed. Tell me then, whether I am right in saying that some opinions, and the opinions of some men only, are to be valued, and other opinions, and the opinions of other men, are not to be valued. I ask you whether I was right in maintaining this?

Cr. Certainly.

Soc. The good are to be regarded, and not the bad?

Cr. Yes.

Soc. And the opinions of the wise are good, and the opinions of the unwise are evil?

Cr. Certainly.

Soc. And what was said about another matter? Was the disciple in gymnastics supposed to attend to the praise and blame and opinion of every man, or of one man only — his physician or trainer, whoever that was?

Cr. Of one man only.

Soc. And he ought to fear the censure and welcome the praise of that one only, and not of the many?

Cr. That is clear.

Soc. And he ought to live and train, and eat and drink in the way which seems good to his single master who has understanding, rather than according to the opinion of all other men put together?

Cr. True.

Soc. And if he disobeys and disregards the opinion and approval of the one, and regards the opinion of the many who have no understanding, will he not suffer evil?

Cr. Certainly he will.

Soc. And what will the evil be, whither tending and what affecting, in the disobedient person?

Cr. Clearly, affecting the body; that is what is destroyed by the evil.

Soc. Very good; and is not this true, Crito, of other things which we need not separately enumerate? In the matter of just and unjust, fair and foul, good and evil, which are the subjects of our present consultation, ought we to follow the opinion of the many and to fear them; or the opinion of the one man who has understanding, and whom we ought to fear and reverence more than all the rest of the world: and whom deserting we shall destroy and injure that principle in us which may be assumed to be improved by justice and deteriorated by injustice; — is there not such a principle?

Cr. Certainly there is, Socrates.

Soc. Take a parallel instance: — if, acting under the advice of men who have no understanding, we destroy that which is improvable by health and deteriorated by disease — when that has been destroyed, I say, would life be worth having? And that is — the body?

Cr. Yes.

Soc. Could we live, having an evil and corrupted body?

Cr. Certainly not.

Soc. And will life be worth having, if that higher part of man be depraved, which is improved by justice and deteriorated by injustice? Do we suppose that principle, whatever it may be in man, which has to do with justice and injustice, to be inferior to the body?

Cr. Certainly not.

Soc. More honored, then?

Cr. Far more honored.

Soc. Then, my friend, we must not regard what the many say of us: but what he, the one man who has understanding of just and unjust, will say, and what the truth will say. And therefore you begin in error when you suggest that we should regard the opinion of the many about just and unjust, good and evil, honorable and dishonorable. — Well, some one will say, " but the many can kill us."

Cr. Yes, Socrates; that will clearly be the answer.

Soc. That is true: but still I find with surprise that the old argument is, as I conceive, unshaken as ever. And I should like to know whether I may say the same of another proposition — that not life, but a good life, is to be chiefly valued?

Cr. Yes, that also remains.

Soc. And a good life is equivalent to a just and honorable one — that holds also?

Cr. Yes, that holds.

Soc. From these premisses I proceed to argue the question whether I ought or ought not to try and escape without the consent of the Athenians: and if I am clearly right in escaping, then I will make the attempt; but if not, I will abstain. The other considerations which you mention, of money and loss of character and the duty of educating children, are, as I fear, only the doctrines of the multitude, who would

be as ready to call people to life, if they were able, as they are to put them to death — and with as little reason. But now, since the argument has thus far prevailed, the only question which remains to be considered is, whether we shall do rightly either in escaping or in suffering others to aid in our escape and paying them in money and thanks, or whether we shall not do rightly; and if the latter, then death or any other calamity which may ensue on my remaining here must not be allowed to enter into the calculation.

Cr. I think that you are right, Socrates; how then shall we proceed?

Soc. Let us consider the matter together, and do you either refute me if you can, and I will be convinced; or else cease, my dear friend, from repeating to me that I ought to escape against the wishes of the Athenians: for I am extremely desirous to be persuaded by you, but not against my own better judgment. And now please to consider my first position, and do your best to answer me.

Cr. I will do my best.

Soc. Are we to say that we are never intentionally to do wrong, or that in one way we ought and in another way we ought not to do wrong, or is doing wrong always evil and dishonorable, as I was just now saying, and as has been already acknowledged by us? Are all our former admissions which were made within a few days to be thrown away? And have we, at our age, been earnestly discoursing with one another all our life long only to discover that we are no better than children? Or are we to rest assured, in spite of the opinion of the many, and in spite of consequences whether better or worse, of the truth of what was then said, that injustice is always an evil and dishonor to him who acts unjustly? Shall we affirm that?

Cr. Yes.

Soc. Then we must do no wrong?

Cr. Certainly not.

Soc. Nor when injured injure in return, as the many imagine; for we must injure no one at all?

Cr. Clearly not.

Soc. Again, Crito, may we do evil?

Cr. Surely not, Socrates.

Soc. And what of doing evil in return for evil, which is the morality of the many — is that just or not?

Cr. Not just.

Soc. For doing evil to another is the same as injuring him?

Cr. Very true.

Soc. Then we ought not to retaliate or render evil for evil to any one, whatever evil we may have suffered from him. But I would have you consider, Crito, whether you really mean what you are saying. For this opinion has never been held, and never will be held, by any considerable number of persons; and those who are agreed and those who are not agreed upon this point have no common ground, and can only despise one another when they see how widely they differ. Tell me, then, whether you agree with and assent to my first principle, that neither injury nor retaliation nor warding off evil by evil is ever right. And shall that be the premiss of our argument? Or do you decline and dissent from this? For this has been of old and is still my opinion; but, if you are of another opinion, let me hear what you have to say. If, however, you remain of the same mind as formerly, I will proceed to the next step.

Cr. You may proceed, for I have not changed my mind.

Soc. Then I will proceed to the next step, which

may be put in the form of a question: — Ought a man to do what he admits to be right, or ought he to betray the right?

Cr. He ought to do what he thinks right.

Soc. But if this is true, what is the application? In leaving the prison against the will of the Athenians, do I wrong any? or rather do I not wrong those whom I ought least to wrong? Do I not desert the principles which were acknowledged by us to be just? What do you say?

Cr. I can not tell, Socrates; for I do not know.

Soc. Then consider the matter in this way: — Imagine that I am about to play truant (you may call the proceeding by any name which you like), and the laws and the government come and interrogate me: "Tell us, Socrates," they say; "what are you about? are you going by an act of yours to overturn us — the laws and the whole state, as far as in you lies? Do you imagine that a state can subsist and not be overthrown, in which the decisions of law have no power, but are set aside and overthrown by individuals?" What will be our answer, Crito, to these and the like words? Any one, and especially a clever rhetorician, will have a good deal to urge about the evil of setting aside the law which requires a sentence to be carried out; and we might reply, "Yes; but the state has injured us and given an unjust sentence." Suppose I say that?

Cr. Very good, Socrates.

Soc. "And was that our agreement with you?" the law would say; "or were you to abide by the sentence of the state?" And if I were to express astonishment at their saying this, the law would probably add: "Answer, Socrates, instead of opening your eyes: you are in the habit of asking and answering questions. Tell us what complaint you have to make

against us which justifies you in attempting to destroy us and the state? In the first place did we not bring you into existence? Your father married your mother by our aid and begat you. Say whether you have any objection to urge against those of us who regulate marriage?" None, I should reply. "Or against those of us who regulate the system of nurture and education of children in which you were trained? Were not the laws, who have the charge of this, right in commanding your father to train you in music and gymnastic?" Right, I should reply. "Well then, since you were brought into the world and nurtured and educated by us, can you deny in the first place that you are our child and slave, as your fathers were before you? And if this is true you are not on equal terms with us; nor can you think that you have a right to do to us what we are doing to you. Would you have any right to strike or revile or do any other evil to a father or to your master, if you had one, when you have been struck or reviled by him, or received some other evil at his hands? — you would not say this? And because we think right to destroy you, do you think that you have any right to destroy us in return, and your country as far as in you lies? And will you, O professor of true virtue, say that you are justified in this? Has a philosopher like you failed to discover that our country is more to be valued and higher and holier far than mother or father or any ancestor, and more to be regarded in the eyes of the gods and of men of understanding? also to be soothed, and gently and reverently entreated when angry, even more than a father, and if not persuaded, obeyed? And when we are punished by her, whether with imprisonment or stripes, the punishment is to be endured in silence; and if she lead us to wounds or death in battle, thither we follow as is right; neither may any

one yield or retreat or leave his rank, but whether in battle or in a court of law, or in any other place, he must do what his city and his country order him; or he must change their view of what is just: and if he may do no violence to his father or mother, much less may he do violence to his country." What answer shall we make to this, Crito? Do the laws speak truly, or do they not?

Cr. I think that they do.

Soc. Then the laws will say: "Consider, Socrates, if this is true, that in your present attempt you are going to do us wrong. For, after having brought you into the world, and nurtured and educated you, and given you and every other citizen a share in every good that we had to give, we further proclaim and give the right to every Athenian, that if he does not like us when he has come of age and has seen the ways of the city, and made our acquaintance, he may go where he pleases and take his goods with him; and none of us laws will forbid him or interfere with him. Any of you who does not like us and the city, and who wants to go to a colony or to any other city, may go where he likes, and take his goods with him. But he who has experience of the manner in which we order justice and administer the state, and still remains, has entered into an implied contract that he will do as we command him. And he who disobeys us is, as we maintain, thrice wrong; first, because in disobeying us he is disobeying his parents; secondly, because we are the authors of his education; thirdly, because he has made an agreement with us that he will duly obey our commands; and he neither obeys them nor convinces us that our commands are wrong; and we do not rudely impose them, but give them the alternative of obeying or convincing us;—that is what we offer, and he does neither. These are the sort of

accusations to which, as we were saying, you, Socrates, will be exposed if you accomplish your intentions; you, above all other Athenians." Suppose I ask, why is this? they will justly retort upon me that I above all other men have acknowledged the agreement. "There is clear proof," they will say, "Socrates, that we and the city were not displeasing to you. Of all Athenians you have been the most constant resident in the city, which, as you never leave, you may be supposed to love. For you never went out of the city either to see the games, except once when you went to the Isthmus, or to any other place unless when you were on military service; nor did you travel as other men do. Nor had you any curiosity to know other states or their laws: your affections did not go beyond us and our state; we were your special favorites, and you acquiesced in our government of you; and this is the state in which you begat your children, which is a proof of your satisfaction. Moreover, you might, if you had liked, have fixed the penalty at banishment in the course of the trial — the state which refuses to let you go now would have let you go then. But you pretended that you preferred death to exile, and that you were not grieved at death. And now you have forgotten these fine sentiments, and pay no respect to us the laws, of whom you are the destroyer; and are doing what only a miserable slave would do, running away and turning your back upon the compacts and agreements which you made as a citizen. And first of all answer this very question: Are we right in saying that you agreed to be governed according to us in deed, and not in word only? Is that true or not?" How shall we answer that, Crito? Must we not agree?

Cr. There is no help, Socrates.

Soc. Then will they not say: "You, Socrates, are

breaking the covenants and agreements which you made with us at your leisure, not in any haste or under any compulsion or deception, but having had seventy years to think of them, during which time you were at liberty to leave the city, if we were not to your mind, or if our covenants appeared to you to be unfair. You had your choice, and might have gone either to Lacedaemon or Crete, which you often praise for their good government, or to some other Hellenic or foreign state. Whereas you, above all other Athenians, seemed to be so fond of the state, or, in other words, of us her laws (for who would like a state that has no laws), that you never stirred out of her; the halt, the blind, the maimed were not more stationary in her than you were. And now you run away and forsake your agreements. Not so, Socrates, if you will take our advice; do not make yourself ridiculous by escaping out of the city.

"For just consider, if you transgress and err in this sort of way, what good will you do either to yourself or to your friends? That your friends will be driven into exile and deprived of citizenship, or will lose their property, is tolerably certain; and you yourself, if you fly to one of the neighboring cities, as, for example, Thebes or Megara, both of which are well-governed cities, will come to them as an enemy, Socrates, and their government will be against you, and all patriotic citizens will cast an evil eye upon you as a subverter of the laws, and you will confirm in the minds of the judges the justice of their own condemnation of you. For he who is a corruptor of the laws is more than likely to be corruptor of the young and foolish portion of mankind. Will you then flee from well-ordered cities and virtuous men? and is existence worth having on these terms? Or will you go to them without shame, and talk to them, Socrates?

And what will you say to them? What you say here about virtue and justice and institutions and laws being the best things among men. Would that be decent of you? Surely not. But if you go away from well-governed states to Crito's friends in Thessaly, where there is a great disorder and license, they will be charmed to have the tale of your escape from prison, set off with ludicrous particulars of the manner in which you were wrapped in a goatskin or some other disguise, and metamorphosed as the fashion of runaways is — that is very likely; but will there be no one to remind you that in your old age you violated the most sacred laws from a miserable desire of a little more life. Perhaps not, if you keep them in a good temper; but if they are out of temper you will hear many degrading things; you will live, but how? — as the flatterer of all men, and the servant of all men; and doing what? — eating and drinking in Thessaly, having gone abroad in order that you may get a dinner. And where will be your fine sentiments about justice and virtue then? Say that you wish to live for the sake of your children, that you may bring them up and educate them — will you take them into Thessaly and deprive them of Athenian citizenship? Is that the benefit which you would confer upon them? Or are you under the impression that they will be better cared for and educated here if you are still alive, although absent from them; for that your friends will take care of them? Do you fancy that if you are an inhabitant of Thessaly they will take care of them, and if you are an inhabitant of the other world they will not take care of them? Nay; but if they who call themselves friends are truly friends, they surely will.

"Listen, then, Socrates, to us who have brought you up. Think not of life and children first, and of

justice afterwards, but of justice first, that you may be justified before the princes of the world below. For neither will you nor any that belong to you be happier or holier or juster in this life, or happier in another, if you do as Crito bids. Now you depart in innocence, a sufferer and not a doer of evil; a victim, not of the laws, but of men. But if you go forth, returning evil for evil, and injury for injury, breaking the covenants and agreements which you have made with us, and wronging those whom you ought least to wrong, that is to say, yourself, your friends, your country, and us, we shall be angry with you while you live, and our brethren, the laws in the world below, will receive you as an enemy; for they will know that you have done your best to destroy us. Listen, then, to us and not to Crito."

This is the voice which I seem to hear murmuring in my ears, like the sound of the flute in the ears of the mystic; that voice, I say, is humming in my ears, and prevents me from hearing any other. And I know that anything more which you may say will be vain. Yet speak, if you have anything to say.

Cr. I have nothing to say, Socrates.

Soc. Then let me follow the intimations of the will of God.

PHAEDO

INTRODUCTION

After an interval of some months or years, and at Phlius a town of Sicyon, the tale of the last hours of Socrates is narrated to Echecrates and other Phliasians by Phaedo the "beloved disciple." The Dialogue necessarily takes the form of a narrative, because Socrates has to be described acting as well as speaking. The minutest particulars of the event are interesting to distant friends, and the narrator has an equal interest in them.

During the voyage of the sacred ship to and from Delos, which has occupied thirty days, the execution of Socrates has been deferred. (Cp. Xen. Mem. iv. 8. 2.) The time has been passed by him in conversation with a select company of disciples. But now the holy season is over, and the disciples meet earlier than usual in order that they may converse with Socrates for the last time. Those who were present, and those who might have been expected to be present, are specially mentioned. There are Simmias and Cebes, two disciples of Philolaus whom Socrates "by his enchantments has attracted from Thebes" (Mem. iii. 11. 17), Crito the aged friend, the attendant of the prison, who is as good as a friend — these take part in the conversation. There are present also, Hermogenes, from whom Xenophon derived his information about the trial of Socrates (Mem. iv. 8. 4), the "madman" Apollodorus, Euclid and Terpsion from Megara, Ctesippus, Antisthenes, Menexenus, and some other less-known members of the Socratic circle, all of whom are silent auditors. Aristippus and Plato are noted as absent. Soon the wife and children of Socrates are sent away, under the direction of Crito; he himself has just been released from chains, and is led by this circumstance to make the natural remark that "pleasure follows pain." (Observe that Plato is preparing the way for his doctrine of the alternation of opposites.) "Aesop would have represented them in a fable as a two-headed creature of the gods." The mention of Aesop reminds Cebes of a question which had been asked by Evenus the poet: "Why Socrates, who was not a poet, while in prison had been putting Aesop into verse?" — "Because several times in his life he had been warned in dreams that he should make music; and as he was about to die and was not

certain what was the meaning of this, he wished to fulfil the admonition in the letter as well as in the spirit, by writing verses as well as by cultivating philosophy. Tell Evenus this and bid him follow me in death." "He is not the sort of man to do that, Socrates." "Why, is he not a philosopher?" "Yes." "Then he will be willing to die, although he will not take his own life, for that is held not to be right."

Cebes asks why men say that suicide is not right, if death is to be accounted a good? Well, (1) according to one explanation, because man is a prisoner, and is not allowed to open the door of his prison and run away — this is the truth in a "mystery." Or rather, perhaps, (2) because man is not his own property, but a possession of the gods, and he has no right to make away with that which does not belong to him. But why, asks Cebes, if he is a possession of the gods, will he wish to die and leave them? for he is under their protection; and surely he can not take better care of himself than they take of him. Simmias explains that Cebes is really referring to Socrates, whom they think too unmoved at the prospect of leaving the gods and his friends. Socrates answers that he is going to other gods who are wise and good, and perhaps to better friends; and he professes that he is ready to defend himself against the charge of Cebes. They shall be his judges, and he hopes that he will be more successful in convincing them than he had been in convincing the court.

The philosopher desires death — which the wicked world will insinuate that he also deserves: and perhaps he does, but not in any sense which they are capable of understanding. Enough of them: the real question is, What is the nature of that death which he desires? Death is the separation of soul and body — and the philosopher desires such a separation. He would like to be freed from the dominion of bodily pleasures and of the senses, which are always perturbing his mental vision. He wants to get rid of eyes and ears, and with the light of the mind only to behold the light of truth. All the evils and impurities and necessities of men come from the body. And death separates him from these evils, which in this life he can not wholly cast aside. Why then should he repine when the hour of separation arrives? Why, if he is dead while he lives, should he fear that other death, through which alone he can behold wisdom in her purity?

Besides, the philosopher has notions of good and evil unlike those of other men. For they are courageous because they are afraid of greater dangers, and temperate because they desire

greater pleasures. But he disdains this balancing of pleasures and pains; he knows no virtue but that which is the companion of wisdom. All the virtues, including wisdom, are regarded by him only as purifications of the soul. And this was the meaning of the founders of the mysteries when they said, "Many are the wand-bearers but few are the mystics." (Cp. Matt. xxii. 14: "Many are called, but few are chosen.") And in the hope that he is one of these mystics, Socrates is now departing. This is his answer to those who charge him with indifference at the prospect of leaving the gods and his friends.

Still, a fear is expressed that the soul upon leaving the body, may vanish away like smoke or air. Socrates in answer appeals first of all to the old Orphic tradition that the souls of the dead are in the world below, and that the living come from them. This he attempts to found on a philosophical assumption that all opposites — e. g. less, greater; weaker, stronger; sleeping, waking; life, death — are generated out of each other. Nor can this process of generation be only a passage from living to dying, for then all would end in death. The perpetual sleeper (Endymion) would be no longer distinguished, for all the world would sink in rest. The circle of nature is not complete unless the living come from the dead as well as pass to them.

The favorite Platonic doctrine of reminiscence is then adduced as a confirmation of the preëxistence of the soul. Some proofs of this doctrine are demanded. One proof given is the same as that of the Meno, and is derived from the latent knowledge of mathematics, which may be elicited from an unlearned person when a diagram is presented to him. Again, there is a power of association, which from seeing Simmias may remember Cebes, or from seeing a picture of Simmias may remember Simmias. The lyre may recall the player of the lyre, and equal pieces of wood or stone may be associated with the higher notion of absolute equality. But here observe that material equalities fall short of the conception of absolute equality with which they are compared, and which is the measure of them. And the measure or standard must be prior to that which is measured, the idea of equality prior to the visible equals. And if prior to them, then prior also to the perceptions of the senses which recall them, and therefore either given before birth or at birth. But all men have not this knowledge, nor have any without a process of reminiscence; and this is a proof that it is not innate or given at birth (unless indeed it was given and taken away at the same instant, which is absurd). But if not given to men in birth, it

must have been given before birth — this is the only alternative which remains. And if we had ideas in a former state, then our souls must have existed and must have had intelligence in a former state. The preëxistence of the soul stands or falls with the doctrine of ideas.

It is objected by Simmias and Cebes that these arguments only prove a former and not a future existence. Socrates answers this objection by recalling the previous argument, in which he had shown that the living had come from the dead. But the fear that the soul at departing may vanish into air (especially if there is a wind blowing at the time) has not yet been charmed away. He proceeds: When we fear that the soul will vanish away, let us ask ourselves what is that which we suppose to be liable to dissolution? Is it the simple or the compound, the unchanging or the changing, the invisible idea or the visible object of sense? Clearly the latter and not the former; and therefore not the soul, which in her own pure thought is unchangeable, and only when using the senses descends into the region of change. Again, the soul commands, the body serves: in this respect too the soul is akin to the divine, and the body to the mortal. And in every point of view the soul is the image of divinity and immortality, and the body of the human and mortal. And whereas the body is liable to speedy dissolution, the soul is almost if not quite indissoluble. Yet even the body may be preserved for ages by the embalmer's art; how much more the soul returning into herself on her way to the good and wise God! She has been practising death all her life long, and is now finally released from the errors and follies and passions of men, and forever dwells in the company of the gods.

But the soul which is polluted and engrossed by the corporeal, and has no eye except that of the senses, and is weighed down by the bodily appetites, can not attain to this abstraction. In her fear of the world below she lingers about her sepulchre, a ghostly apparition, saturated with sense, and therefore visible. At length she enters into the body of some animal of a nature congenial to her former life of sensuality or violence, and becomes an ass or a wolf or a kite. And of these earthly souls the happiest are those who have practised virtue without philosophy; they are allowed to pass into gentle and civil natures, such as bees and ants. But only the philosopher who departs pure is permitted to enter the company of the gods. This is the reason why he abstains from fleshly lusts, and not from the fear of loss or disgrace, which are the motives of other

men. He too has been a captive, and the willing agent of his own captivity. But philosophy has spoken to him, and he has heard her voice; she has gently entreated him, and brought his soul out of the "miry clay," and purged away the mists of passion and the illusions of sense which envelope her, and taught her to resist the influence of pleasures and pains, which are like nails fastening her to the body. To that prison-house she will not return; and therefore she abstains from bodily pleasures — not from a desire of having more or greater ones, which is the exchange of commerce and not of virtue, but because she knows that only in the calm of pleasures and passions she will behold the light of truth.

Simmias and Cebes remain in doubt; but they are unwilling to raise objections at such a time. Socrates wonders at this. Let them regard him rather as the swan, who, having sung the praises of Apollo all his life long, sings at his death more lustily than ever. Simmias acknowledges that there is cowardice in not probing truth to the bottom. "And if truth divine and inspired is not to be had, then let a man take the best of human notions, and upon this frail bark let him sail through life." He proceeds to state his difficulty: It has been argued that the soul is invisible and incorporeal, and therefore immortal, and prior to the body. But is not the soul acknowledged to be a harmony, and has she not the same relation to the body, as the harmony — which like her is invisible — has to the lyre? And yet the harmony does not survive the lyre. Cebes has also an objection, which like Simmias he expresses in a figure. He is willing to admit that the soul is more lasting than the body. But the more lasting nature of the soul does not prove her immortality; for after having worn out many bodies in a single life, and many more in successive births and deaths, she may at last perish, or, as Socrates afterwards restates the objection, the very act of birth may be the beginning of her death, and the last body may survive the last soul, just as the coat of an old weaver is left behind him after he is dead, although a man is more lasting than his coat. And he who would prove the immortality of the soul, must prove not only that the soul outlives one or many bodies, but that she outlives them all.

The audience, like the chorus in a play, for a moment interpret the feelings of the actors; there is a temporary depression, and then the inquiry is resumed. It is a melancholy reflection that arguments, like men, are apt to be deceivers; and those who have been often deceived become distrustful both of arguments

and of friends. But this unfortunate experience should not make us either haters of men or haters of arguments. The hatred of arguments is equally mistaken, whether we are going to live or die. At the approach of death Socrates desires to be impartial, and yet he can not help feeling that he has too great an interest in the truth of his own argument. And therefore he wishes his friends to examine and refute him, if they think that he is not speaking the truth.

Socrates requests Simmias and Cebes to state their objections again. They do not go to the length of denying the preëxistence of ideas. Simmias is of opinion that the soul is a harmony of the body. But the admission of the preëxistence of ideas, and therefore of the soul, is at variance with this. For a harmony is an effect, whereas the soul is not an effect, but a cause; a harmony follows, but the soul leads; a harmony admits of degrees, and the soul has no degrees. Again, upon the supposition that the soul is a harmony, why is one soul better than another? Are they more or less harmonized, or is there one harmony within another? But the soul does not admit of degrees, and can not therefore be more or less harmonized. Further, the soul is often engaged in resisting the affections of the body, as Homer describes Odysseus "rebuking his heart." Could he have written this under the idea that the soul is a harmony of the body? Nay rather, are we not contradicting Homer and ourselves in affirming anything of the sort?

The goddess Harmonia, as Socrates playfully terms the argument of Simmias, has been happily disposed of; and now an answer has to be given to the Theban Cadmus. Socrates recapitulates the argument of Cebes, which, as he remarks, involves the whole question of natural growth or causation; about this he proposes to narrate his own mental experience. When he was young he had puzzled himself with physics: he had inquired into the growth and decay of animals, and the origin of thought, until at last he began to doubt the self-evident fact that growth is the result of eating and drinking, and thus he arrived at the conclusion that he was not meant for such inquiries. Nor was he less perplexed with notions of comparison and number. At first he had imagined himself to understand differences of greater and less, and to know that ten is two more than eight, and the like. But now those very notions appeared to him to contain a contradiction. For how can one be divided into two? or two be compounded into one? These are difficulties which Socrates can not answer. Of generation and

destruction he knows nothing. But he has a confused notion of another method in which matters of this sort are to be investigated.

Then he heard some one reading out of a book of Anaxagoras, that mind is the cause of all things. And he said to himself: If mind is the cause of all things, mind must dispose them all for the best. The new teacher will show me this "order of the best" in man and nature. How great had been his hopes and how great his disappointment! For he found that his new friend was anything but consistent in his use of mind as a cause, and that he soon introduced winds, waters, and other eccentric notions. It was as if a person had said that Socrates is sitting here because he is made up of bones and muscles, instead of telling the true reason — that he is here because the Athenians have thought good to sentence him to death, and he has thought good to await his sentence. Had his bones and muscles been left by him to their own ideas of right, they would long ago have taken themselves off. But surely there is a great confusion of the cause and condition in all this. And this confusion also leads people into all sorts of erroneous theories about the position and motions of the earth. None of them know how much stronger than any Atlas is the power of the best. But this "best" is still undiscovered; and in inquiring after the cause, we can only hope to attain the second best.

Now there is a danger in the contemplation of the nature of things, as there is a danger in looking at the sun during an eclipse, unless the precaution is taken of looking only at the image reflected in the water, or in a glass. And I was afraid, says Socrates, that I might injure the eye of the soul. I thought that I had better return to the old and safe method of ideas. Though I do not mean to say that he who contemplates existence through the medium of ideas sees only through a glass darkly, any more than he who contemplates actual effects.

If the existence of ideas is granted to him, Socrates is of opinion that he will then have no difficulty in proving the immortality of the soul. He will only ask for a further admission: — that beauty is the cause of the beautiful, greatness the cause of the great, smallness of the small, and so on of other things. Thus he avoids the contradictions of greater and less (greater by reason of that which is smaller!), of addition and subtraction, and the other difficulties of relation. These subtleties he is for leaving to wiser heads than his own; he prefers to test ideas by their consequences, and, if asked to give an account of them, goes

back to some higher idea or hypothesis which appears to him to be the best, until at last he arrives at a resting-place.

The doctrine of ideas, which has long ago received the assent of the Socratic circle, is now affirmed by the Phliasian auditor to command the assent of any men of sense. The narrative is continued; Socrates is desirous of explaining how opposite ideas may appear to coëxist but do not really coëxist in the same thing or person. For example, Simmias may be said to have greatness and also smallness, because he is greater than Socrates and less than Phaedo. And yet Simmias is not really great and also small, but only when compared to Phaedo and Socrates. I use the illustration, says Socrates, because I want to show you not only that ideal opposites exclude one another, but also the opposites in us. I, for example, having the attribute of smallness remain small, and can not become great: the smallness in me drives out greatness.

One of the company here remarked that this was inconsistent with the old assertion that opposites generated opposites. But that, replies Socrates, was affirmed, not of opposite ideas either in us or in nature, but of opposite things — not of life and death, but of individuals living and dying. When this objection has been removed, Socrates proceeds: This doctrine of the mutual exclusion of opposites is not only true of the opposites themselves, but of things which are inseparable from them. For example, cold and heat are opposed; and fire, which is inseparable from heat, can not coëxist with cold, or snow, which is inseparable from cold, with heat. Again, the number three excludes the number four, because three is an odd number and four is an even number, and the odd is opposed to the even. Thus we are able to proceed a step beyond "the safe and simple answer." We may say, not only that the odd excludes the even, but that the number three, which participates in oddness, excludes the even. And in like manner, not only does life exclude death, but the soul, of which life is the inseparable attribute, also excludes death. And that of which life is the inseparable attribute is by the force of the terms imperishable. If the odd principle were imperishable, then the number three would not perish, but remove on the approach of the even principle. But the immortal is imperishable; and therefore the soul on the approach of death does not perish but removes.

Thus all objections appear to be finally silenced. And now the application has to be made: If the soul is immortal, "what manner of persons ought we to be?" having regard not only to

time but to eternity. For death is not the end of all, and the wicked is not released from his evil by death; but every one carries with him into the world below that which he is and that which he becomes, and that only.

For after death the soul is carried away to judgment, and when she has received her punishment returns to earth in the course of ages. The wise soul is conscious of her situation, and follows the attendant angel who guides her through the windings of the world below; but the impure soul wanders hither and thither without a guide, and is carried at last to her own place, as the pure soul is also carried away to hers. "In order that you may understand this, I must first describe to you the nature and conformation of the earth."

Now the whole earth is a globe placed in the centre of the heavens, and is maintained there by the perfection of balance. That which we call the earth is only a small hollow, of which there are many; but the true earth is above, and is a finer and subtler element, and is full of precious stones and bright colors, of which the stones and colors in our earth are but fragments and reflections, and the earth itself is corroded and crusted over just as the shore is by the sea. And if, like birds, we could fly to the surface of the air, in the same manner that fishes come to the top of the sea, then we should behold the true earth and the true heaven and the true stars. This heavenly earth is of divers colors, sparkling with jewels brighter than gold and whiter than any snow, having flowers and fruits innumerable. And the inhabitants dwell some on the shore of the sea of air, others in "islets of the blest," and they hold converse with the gods, and behold the sun, moon and stars as they truly are, and their other blessedness is of a piece with this.

But the interior of the earth has other and deeper hollows, and one huge chasm or opening called Tartarus, into which vast streams of water and fire are ever flowing to and fro, of which small portions find their way to the surface and form seas and rivers and volcanoes. There is perpetual inhalation and exhalation of the air rising and falling as the waters pass into the depths of the earth and return again, in their course forming lakes and rivers, but never descending below the centre of the earth, the opposite side of which is a precipice to the rivers on both sides. The rivers are many and mighty, and there are four principal ones, Oceanus, Acheron, Pyriphlegethon, and Cocytus. Oceanus is the river which encircles the earth; Acheron takes an opposite direction, and after flowing under the earth and in

desert places at last reaches the Acherusian lake, and this is the river at which the dead await their return to earth. Pyriphlegethon is a stream of fire, which coils around the earth and flows into the depths of Tartarus. The fourth river (Cocytus) is that which is called by the poets the Stygian river, and falls into, and forms the lake Styx, receiving strange powers in the waters. This river, too, falls into Tartarus.

The dead are first of all judged according to their deeds, and those who are incurable are thrust into Tartarus, from which they never come out. Those who have only committed venial sins are first purified of them, and then rewarded for the good which they have done. Those who have committed crimes, great indeed, but not unpardonable, are thrust into Tartarus, but are cast forth at the end of the year on the shores of the rivers, where they stand crying to their victims to let them come out, and if they prevail, then they are let out and their sufferings cease; if not, they are borne in [illegible]eless whirl along the rivers of Tartarus. The pure s[illegible] receive their reward, and have their abode in the upp[illegible], and a select few in still fairer "mansions."

Socrates is not prepa[illegible] insist on the literal accuracy of this description, but he [illegible]dent that something of the kind is true. He who has sou[illegible]er the pleasures of knowledge and rejected the pleasures of the body, has reason to be of good hope at the approach of death, whose voice is already heard calling to him, and will be heard calling by all men.

The hour has come at which he must drink the poison, and not much remains to be done. How shall they bury him? That is a question which he refuses to entertain, for they are not burying him, but his dead body. His friends had once been sureties that he would remain, and they shall now be sureties that he has run away. Yet he would not die without the customary ceremonies of washing and burial. Shall he make a libation of the poison? In the spirit he will, but not in the letter. One request he utters in the very act of death, which has been a puzzle to after ages. The puzzle has been occasioned by the simplicity of his words, for there is no reason to suppose that they have any hidden meaning. With a sort of irony he remembers that a trifling religious duty is still unfulfilled, just as above he is represented as desirous before he departs to make a few verses in order to satisfy a scruple about the meaning of a dream.

1. The doctrine of the immortality of the soul has such a great interest for all mankind that they are apt to rebel against any

examination of the nature of their belief. They do not like to acknowledge that this, as well as the other "eternal ideas" of man, has a history in time, which may be traced in Greek poetry or philosophy, and also in the Hebrew Scriptures. They convert feeling into reasoning, and throw a network of dialectics over that which is really a deeply-rooted instinct. In the same temper which Socrates reproves in himself they are disposed to think that even bad arguments will do no harm, for they will die with them, and while they live they will gain by the delusion. But there is a better and higher spirit to be gathered from the Phaedo, as well as from the other writings of Plato, which says that first principles should be most constantly reviewed, and that the highest subjects demand of us the greatest accuracy.

2. Modern philosophy is perplexed at this whole question, which is sometimes fairly given up and handed over to the realm of faith. The perplexity should not be forgotten by us when we attempt to submit the Phaedo of Plato to the requirements of logic. For what idea can we form of the soul when separated from the body? Or how can the soul be united with the body and still be independent? Is the soul related to the body as the ideal to the real, or as the whole to the parts, or as the subject to the object, or as the cause to the effect, or as the end to the means? Shall we say with Aristotle, that the soul is the entelechy or form of an organized living body? or with Plato, that she has a life of her own? Is the Pythagorean image of the harmony, or of the monad, the truer expression? Is the soul related to the body as sight to the eye, or as the boatman to his boat? And in another state of being is the soul to be conceived of as vanishing into infinity, hardly possessing an existence which she can call her own, as in the pantheistic system of Spinoza and others? or as an individual spirit informed with another body and retaining the impress of her former character? Or is the opposition of soul and body a mere illusion, and the true self neither soul nor body, but the union of the two in the "I" which is above them? And is death the assertion of this individuality in the higher nature, and the falling away into nothingness of the lower? Or are we vainly attempting to pass the boundaries of human thought? The body and the soul seem to be inseparable, not only in fact, but in our conceptions of them; and any philosophy which too closely unites them, or too widely separates them, either in this life or in another, disturbs the balance of human nature. Neither Plato nor any other philosopher has

perfectly adjusted them, or been perfectly consistent with himself in describing their relation to one another.

3. Again, believing in the immortality of the soul, we must still ask the question of Socrates, "what is that which we suppose to be immortal?" Is it the personal and individual element in us, or the spiritual and universal? Is it the principle of knowledge or of goodness, or the union of the two? Is it the mere force of life which is determined to be, or the consciousness of self which can not be got rid of, or the fire of genius which refuses to be extinguished? Or is there a hidden being which is allied to the Author of all existence, who is because he is perfect, and to whom our ideas of perfection give us a title to belong? Whatever answer is given by us to these questions, there still remains the necessity of allowing the permanence of evil, if not forever, at any rate for a time, in order that the wicked "may not have too good a bargain." For the annihilation of evil at death, or the eternal duration of it, seem to involve equal difficulties in the moral order of the universe. Sometimes we are led by our feelings, rather than by our reason, to think of the good and wise only as existing in another life. Why should the mean, the weak, the idiot, the infant, the herd of men who have never in any proper sense the use of reason, reappear with blinking eyes in the light of another world? But our second thought is that the hope of humanity is a common one, and that all or none have a right to immortality. Reason does not allow us to suppose that we have any greater claims than others, and experience sometimes reveals to us unexpected flashes of the higher nature in those whom we had despised. Such are some of the distracting thoughts which press upon us when we attempt to assign any form to our conceptions of a future state.

4. Again, ideas must be given through something; and we are always prone to argue about the soul from analogies of outward things which may serve to embody our thoughts, but are also partly delusive. For we can not reason from the natural to the spiritual, or from the outward to the inward. The progress of physiological science, without bringing us nearer to the great secret, has perhaps tended to remove some erroneous notions respecting the relations of body and mind, and in this we have the advantage of the ancients. But no one imagines that any seed of immortality is to be discerned in our mortal frames. The result seems to be that those who have thought most deeply on the immortality of the soul, have been content to rest their belief on the agreement of the more enlightened part of mankind,

and on the inseparable connection of such a doctrine with the existence of a God, and our ideas of divine justice — also in a less degree on the impossibility of thinking otherwise of those whom we reverence in this world. And after all has been said, the figure, the analogy, the argument, are felt to be only approximations in different forms to the expression of the common sentiment of the human heart.

5. The Phaedo of Plato may also be regarded as a dialectical approximation to the truth of immortality. Beginning in mystery, Socrates, in the intermediate part of the Dialogue, attempts to bring the doctrine of a future life into connection with his theory of knowledge. In proportion as he succeeds in this, the individual seems to disappear in a more general notion of the soul; the contemplation of ideas "under the form of eternity" takes the place of past and future states of existence. His language may be compared to that of some modern philosophers, who speak of eternity, not in the sense of perpetual duration of time, but as an ever-present quality of the soul. Yet at the conclusion of the Dialogue, having "arrived at the end of the intellectual world," he replaces the veil of mythology, and describes the soul and her attendant genius in the language of the mysteries or of a disciple of Zoroaster. Nor can we fairly demand of Plato a consistency which is wanting among ourselves, who acknowledge that another world is beyond the range of human thought, and yet are always seeking to represent the mansions of heaven or hell in the colors of the painter, or in the descriptions of the poet or rhetorician.

6. The doctrine of the immortality of the soul was not new to the Greeks in the age of Socrates, but, like the unity of God, had a foundation in the popular belief. The old Homeric notion of a gibbering ghost flitting away to Hades; or of a few illustrious heroes enjoying the isles of the blest; or of an existence divided between the two; or the Hesiodic, of righteous spirits, who become guardian angels, — had given place in the mysteries and the Orphic poets to representations, partly fanciful, of a future state of rewards and punishments. The reticence of the Greeks on public occasions and in some part of their literature respecting this "underground" religion, is not to be taken as a measure of the diffusion of such beliefs. If Pericles in the funeral oration is silent on the consolations of immortality, the poet Pindar and the tragedians on the other hand constantly assume the continued existence of the dead in an upper or under world. Darius and Laius are still alive; Antigone will be dear

to her brethren after death; the way to the palace of Cronos is found by those who "have thrice departed from evil." The tragedy of the Greeks is not "rounded" by this life, but is deeply set in decrees of fate and mysterious workings of powers beneath the earth. In the caricature of Aristophanes there is also a witness to the common sentiment. The Ionian and Pythagorean philosophies arose, and some new elements were added to the popular belief. The individual must find an expression as well as the world. Either the soul was supposed to exist in the form of a magnet or of a particle of fire, or light, or air, or water; or of a number or of a harmony of number; or to be or have, like the stars, a principle of motion. At length Anaxagoras, hardly distinguishing between life and mind, or between mind human and divine, attained the pure abstraction; and this, like the other abstractions of Greek philosophy, sank deep into the human intelligence. The opposition of the intelligible and the sensible, and of God to the world, supplied an analogy which assisted in the separation of soul and body. If ideas were separable from phenomena, mind was also separable from matter; if the ideas were eternal, the mind that conceived them was eternal too. As the unity of God was more distinctly acknowledged the conception of the human soul became more developed. The succession, or alternation of life and death, had occurred to Heracleitus. The Eleatic Parmenides had stumbled upon the modern thesis, that "thought and being are the same." The eastern belief in transmigration defined the sense of individuality; and some, like Empedocles, fancied that the blood which they had shed in another state of being was crying against them, and that for thirty thousand years they were to be "fugitives and vagabonds upon the earth." The desire of recognizing a lost love or friend in the world below is a natural feeling which, in that age as well as in every other, has given distinctness to the hope of immortality. Nor were ethical considerations wanting, partly derived from the necessity of punishing the greater sort of criminals, whom no avenging power of this world could reach. The voice of conscience, too, was heard reminding the good man that he was not altogether innocent. To these indistinct longings and fears an expression was given in the mysteries and Orphic poets: a "heap of books," passing under the names of Musaeus and Orpheus in Plato's time were filled with notions of an under world.

7. Yet probably the belief in the individuality of the soul after death had but a feeble hold on the Greek mind. Like the per-

sonality of God, the personality of man in a future state was not inseparably bound up with the reality of his existence. For the distinction between the personal and impersonal, and also between the divine and human, was far less marked to the Greek than to ourselves. And as Plato readily passes from the notion of the good to that of God, he also passes almost imperceptibly to himself and his reader from the future life of the individual soul to the eternal being of the absolute soul. There has been a clearer statement and a clearer denial of the belief in modern times than is found in early Greek philosophy, and hence the comparative silence on the whole subject which is often remarked in ancient writers, and particularly in Aristotle. For Plato and Aristotle are not further removed in their teaching about the immortality of the soul than they are in their theory of knowledge.

8. That in an age when logic was beginning to mould human thought, Plato should have cast his belief in immortality into a logical form, is not surprising. And when we consider how much the doctrine of ideas was also one of words, we can not wonder that he should have fallen into verbal fallacies: early logic is always mistaking the truth of the form for the truth of the matter. It is easy to see that the alternation of opposites is not the same as the generation of them out of each other; and that the generation of them out of each other, which is the first argument in the Phaedo, is at variance with their mutual exclusion of each other, whether in themselves or in us, which is the last. For even if we admit the distinction which he draws between the opposites and the things which have the opposites, still individuals fall under the latter class; and we have to pass out of the region of human hopes and fears to a conception of an abstract soul which is the impersonation of the ideas. Such a conception, which in Plato himself is but half expressed, is unmeaning to us, and relative only to a particular stage in the history of thought. The doctrine of reminiscence is also a fragment of a former world, which has no place in the philosophy of modern times. But Plato had the wonders of psychology just opening to him, and he had not the explanation of them which is supplied by the analysis of language and the history of the human mind. The question, "Whence come our abstract ideas?" he could only answer by an imaginary hypothesis. Nor is it difficult to see that his crowning argument is purely verbal, and is but the expression of an instinctive confidence put into a logical form:—"The soul is immortal because it con-

tains a principle of imperishableness." Nor does he himself seem at all to be aware that nothing is added to human knowledge by his "safe and simple answer," that beauty is the cause of the beautiful; and that he is merely reasserting the Eleatic being "divided by the Pythagorean numbers," against the Heracleitean doctrine of perpetual generation. The answer to the "very serious question" of generation and destruction is really the denial of them. For this he would substitute, as in the Republic, a system of ideas, tested not by experience, but by their consequences, and not explained by actual causes, but by a higher, that is, more general notion: consistency with themselves is all that is required of them.

9. To deal fairly with such arguments they should not only not be separated from the age to which they belong, but they should be translated as far as possible into their modern equivalents. "If the ideas of men are eternal, their souls are eternal, and if not the ideas, then not the souls." Such an argument stands nearly in the same relation to Plato and his age, as the argument from the existence of God to immortality among ourselves. "If God exists, then the soul exists after death; and if there is no God, there is no existence of the soul after death." For the ideas are to his mind the reality, the truth, the principle of permanence, as well as of mind and order in the world. When Simmias and Cebes say that they are more strongly persuaded of the existence of ideas than they are of the immortality of the soul, they represent fairly enough the order of thought in Greek philosophy. And we might say in the same way that we are more certain of the existence of God than we are of the immortality of the soul, and are led by the belief in the one to a belief in the other. The parallel, as Socrates would say, is not perfect, but agrees in as far as the mind in either case is regarded, as dependent on something above and beyond herself. Nor need we shrink from pressing the analogy one step further: "We are more certain of our ideas of truth and right than we are of the existence of God, and are led on in the order of thought from one to the other."

10. The main argument of the Phaedo is derived from the existence of eternal ideas of which the soul is a partaker; the other argument of the alternation of opposites is replaced by this. And there have not been wanting philosophers of the idealist school who have imagined that the doctrine of the immortality of the soul is a theory of knowledge only, and that in all that precedes Plato is preparing for this. Such a view is far from

lying on the surface of the Phaedo, and seems to be inconsistent with the Gorgias and the Republic. Those who maintain it are immediately compelled to renounce the shadow which they have grasped, as a play of words only. But the truth is, that Plato in his argument for the immortality of the soul has collected many elements of proof or persuasion, ethical and mythological as well as dialectical, which are not easily to be reconciled with one another; and he is as much in earnest about his doctrine of retribution, which is repeated in all his more ethical writings, as about his theory of knowledge. And while we may fairly translate the dialectical into the language of Hegel, and the religious and mythological into the language of Dante or Bunyan, the ethical speaks to us still in the same voice, reaching across the ages.

11. Two arguments of this sort occur in the Phaedo. The first may be described as the aspiration of the soul after another sort of being. Like the Oriental or Christian ascetic, the philosopher is seeking to withdraw from impurities of sense, to leave the world and the things of the world, and to find his higher self. Plato recognizes in these aspirations the foretaste of immortality; as Butler and Addison in modern times have argued, the one from the moral tendencies of mankind, the other from the progress of the soul towards perfection. In using this argument Plato has certainly confused the soul which has left the body, with the soul of the good and wise. Such a confusion was natural, and arose partly out of the antithesis of soul and body. The soul in her own essence, and the soul "clothed upon" with virtues and graces, were easily interchanged with one another, because on a subject which passes expression the distinctions of language can hardly be maintained.

12. The other ethical proof of the immortality of the soul is derived from the necessity of retribution. The wicked would be too well off if their evil deeds came to an end. It is not to be supposed that an Ardiaeus, an Archelaus, an Ismenias could ever have suffered the penalty of their crimes in this world. The manner in which this retribution is accomplished Plato represents under the figure of mythology. Doubtless he felt that it was easier to improve than to invent, and that in religion especially the traditional form was required in order to give verisimilitude to the myth. The myth too is far more probable to that age than to ours, and may fairly be regarded as "one guess among many" about the nature of the earth, which he cleverly supports by the indications of geology. Not that he

insists on the absolute truth of his own particular notions: "no man of sense will be confident of that; but he will be confident that something of the kind is true." As in other passages, he wins belief for his fictions by the moderation of his statements; he does not, like Dante or Swedenborg, allow himself to be deceived by his own creations.

The Dialogue must be read in the light of the situation. And first of all we are struck by the calmness of the scene. Like the spectators at the time, we can not pity Socrates; his mien and his language are so noble and fearless. He is the same as he ever was, but milder and gentler, and he has in no degree lost his interest in dialectics; the argument is the greatest gain to him, and he will not forego the delight of it in compliance with the jailer's intimation that he should not heat himself with talking. Some other traits of his character may be noted; for example, the courteous manner in which he inclines his head to the last objector, or the ironical touch, "Me already, as the tragic poet would say, the voice of fate calls;" or the depreciation of the arguments with which "he comforted himself and them;" or the allusion to the possibility of finding another teacher among barbarous races; or the mysterious reference to another science (mathematics?) of generation and destruction for which he is vainly feeling. There is no change in him; only now he is invested with a sort of sacred character, as the prophet or priest of Apollo the God of the festival, in whose honor he first of all composes a hymn, and then like the swan pours forth his dying lay. Perhaps the extreme elevation of Socrates above his own situation, and the ordinary interests of life (compare his *jeu d'esprit* about his burial) create in the mind of the reader an impression stronger than could be derived from arguments that such an one, in his own language, has in him "a principle which does not admit of death."

The other persons of the Dialogue may be considered under two heads: (1) private friends; (2) the respondents in the argument.

First there is Crito, who has been already introduced to us; he is the equal in years of Socrates, and stands in quite a different relation to him from his younger disciples. He is a man of the world who is rich and prosperous, the best friend of Socrates, who wants to know his last commands, in whose presence he talks to his family, and who performs the last duty of closing his eyes. It is observable too that Crito shows no aptitude for philosophical discussions. Nor among the friends of Socrates

must the jailer be forgotten, who seems to have been introduced by Plato in order to show the impression made by the extraordinary man on the common. The gentle nature of the man is indicated by his weeping at the announcement of his errand and then turning away, and also by the words of Socrates to his disciples: "How charming the man is! since I have been in prison he was always coming to me, and has been as good as could be to me." We are reminded too that he has retained this gentle nature amid scenes of death and violence by the contrasts which he draws between the behavior of Socrates and of others when about to die.

Another person who takes no part in the philosophical discussion is the excitable Apollodorus, the same who, in the Symposium, of which he is the narrator, is called "the madman," and who testifies his grief by the most violent emotions. Phaedo is also present, the "beloved disciple" as he may be termed, who is described, if not "leaning on his bosom," as seated next to Socrates, who is playing with his hair. At a particular point the argument is described as falling before the attack of Simmias. A sort of despair is introduced in the minds of the company. The effect of this is heightened by the description of Phaedo, who has been the eye-witness of the scene, and by the sympathy of his Phliasian auditors who are beginning to think "that they too can never trust an argument again." Like Apollodorus, Phaedo himself takes no part in the argument. But the calmness of his behavior, "veiling his face" when he can no longer contain his tears, contrasts with the passionate cries of the other.

The two principal interlocutors are Simmias and Cebes, the disciples of Philolaus the Pythagorean philosopher of Thebes. Simmias is described in the Phaedrus as fonder of an argument than any man living; and Cebes, although finally persuaded by Socrates, is said to be the most incredulous of human beings. It is Cebes who at the commencement of the Dialogue raises the question why "suicide is unlawful," and who first supplies the doctrine of recollection as a confirmation of the argument of the preëxistence of the soul. It is Cebes who urges that the preexistence does not necessarily involve the future existence of the soul, and who brings forward the argument of the weaver and his coat. To Simmias, on the other hand, is attributed the notion that the soul is a harmony, which is naturally put into the mouth of a Pythagorean disciple. It is Simmias, too, who first remarks on the uncertainty of human knowledge, and only at last con-

cedes to the argument such a qualified approval as is consistent with the feebleness of the human faculties.

There is no proof that the conversation was ever actually held, and the place of the Dialogue in the series is doubtful. The doctrine of ideas is certainly carried beyond the Socratic point of view; in no other of the writings of Plato is the theory of them so completely developed. Whether the belief in immortality can be attributed to Socrates or not is uncertain; the silence of the Memorabilia, and of the earlier Dialogues of Plato, is an argument to the contrary. Yet in the Cyropaedia Xenophon has put language into the mouth of the dying Cyrus which recalls the Phaedo, and may perhaps have been derived from the teaching of Socrates.

The Phaedo, as has been already intimated, is not one of the Socratic Dialogues of Plato; nor, on the other hand, can it be assigned to that later period of the Platonic writings at which the ideas appear to be forgotten. Without pretending to determine the real time of composition, the Meno, Euthyphro, Apology, Phaedo, Symposium may be conveniently read by us in this order as illustrative of the life of Socrates. Another chain may be formed of the Meno, Phaedo, Phaedrus in which the immortality of the soul is connected with the doctrine of ideas. In the Meno the theory of ideas is based on the ancient belief in transmigration, which reappears again in the Phaedrus as well as in the Republic and Timaeus, and in all of them is connected with a doctrine of retribution. In the Phaedrus the immortality of the soul is supposed to rest on the conception of the soul as a principle of motion, whereas in the Republic the argument turns on the natural continuance of the soul, which, if not destroyed by her own proper evil, can hardly be destroyed by any other. The soul of man in the Timaeus is derived from the Supreme Creator, and either returns after death to her kindred star, or descends into the lower life of an animal. The Apology expresses the same view as the Phaedo, but with less confidence; the probability of death being a long sleep is not excluded. The Theaetetus also describes, in a digression, the desire of the soul to fly away and be with God — "and to fly to him is to be like him." Lastly, the Symposium may be observed to resemble as well as to differ from the Phaedo. While the first notion of immortality is only in the way of natural procreation or of posthumous fame and glory, the higher vision of beauty, like the good in the Republic, is the vision of the eternal idea. So deeply rooted in Plato's mind is the belief in immor-

tality; so various are the forms of expression which he employs.

Some elements of the drama may be noted in all the Dialogues of Plato. The Phaedo is the tragedy of which Socrates is the protagonist and Simmias and Cebes the secondary performers. No Dialogue has a greater unity of subject and feeling. Plato has certainly fulfilled the condition of Greek, or rather of all art, which requires that scenes of death and suffering should be clothed in beauty. The gathering of the friends at the commencement of the Dialogue, the dejection of the audience at the temporary overthrow of the argument, the picture of Socrates playing with the hair of Phaedo, the final scene in which Socrates alone retains his composure — are masterpieces of art. The chorus at the end might have interpreted the feeling of the play: "There can no evil happen to a good man in life or death."

PHAEDO

PHAEDO

PERSONS OF THE DIALOGUE

PHAEDO, *who is the narrator of the Dialogue to*
ECHECRATES *of Phlius.*
SOCRATES.
ATTENDANT OF THE PRISON.
APOLLODORUS.
SIMMIAS.
CEBES.
CRITO.

SCENE:— The Prison of Socrates.
PLACE OF THE NARRATION:— Phlius.

Echecrates. WERE you yourself, Phaedo, in the prison with Socrates on the day when he drank the poison?

Phaedo. Yes, Echecrates, I was.

Ech. I wish that you would tell me about his death. What did he say in his last hours? We were informed that he died by taking poison, but no one knew anything more; for no Phliasian ever goes to Athens now, and a long time has elapsed since any Athenian found his way to Phlius, and therefore we had no clear account.

Phaed. Did you not hear of the proceedings at the trial?

Ech. Yes; some one told us about the trial, and we could not understand why, having been condemned, he was put to death, as appeared, not at the time, but long afterwards. What was the reason of this?

Phaed. An accident, Echecrates. The reason was that the stern of the ship which the Athenians send to Delos happened to have been crowned on the day before he was tried.

Ech. What is this ship?

Phaed. This is the ship in which, as the Athenians say, Theseus went to Crete when he took with him the fourteen youths, and was the savior of them and of himself. And they were said to have vowed to Apollo at the time, that if they were saved they would make an annual pilgrimage to Delos. Now this custom still continues, and the whole period of the voyage to and from Delos, beginning when the priest of Apollo crowns the stern of the ship, is a holy season, during which the city is not allowed to be polluted by public executions; and often, when the vessel is detained by adverse winds, there may be a very considerable delay. As I was saying, the ship was crowned on the day before the trial, and this was the reason why Socrates lay in prison and was not put to death until long after he was condemned.

Ech. What was the manner of his death, Phaedo? What was said or done? And which of his friends had he with him? Or were they not allowed by the authorities to be present? And did he die alone?

Phaed. No; there were several of his friends with him.

Ech. If you have nothing to do, I wish that you would tell me what passed, as exactly as you can.

Phaed. I have nothing to do, and will try to gratify your wish. For to me too there is no greater pleasure than to have Socrates brought to my recollection; whether I speak myself or hear another speak of him.

Ech. You will have listeners who are of the same mind with you, and I hope that you will be as exact as you can.

Phaed. I remember the strange feeling which came over me at being with him. For I could hardly believe that I was present at the death of a friend, and therefore I did not pity him, Echecrates; his mien and his language were so noble and fearless in the hour of

death that to me he appeared blessed. I thought that in going to the other world he could not be without a divine call, and that he would be happy, if any man ever was, when he arrived there; and therefore I did not pity him as might seem natural at such a time. But neither could I feel the pleasure which I usually felt in philosophical discourse (for philosophy was the theme of which we spoke). I was pleased and I was also pained, because I knew that he was soon to die, and this strange mixture of feeling was shared by us all; we were langhing and weeping by turns, especially the excitable Apollodorus — you know the sort of man?

Ech. Yes.

Phaed. He was quite overcome; and I myself, and all of us were greatly moved.

Ech. Who were present?

Phaed. Of native Athenians there were, besides Apollodorus, Critobulus and his father Crito, Hermogenes, Epigenes, Aeschines, and Antisthenes; likewise Ctesippus of the deme of Paeania, Menexenus, and some others; but Plato, if I am not mistaken, was ill.

Ech. Were there any strangers?

Phaed. Yes, there were; Simmias the Theban, and Cebes, and Phaedondes; Euclid and Terpsion, who came from Megara.

Ech. And was Aristippus there, and Cleombrotus?

Phaed. No, they were said to be in Aegina.

Ech. Any one else?

Phaed. I think that these were about all.

Ech. And what was the discourse of which you spoke?

Phaed. I will begin at the beginning, and endeavor to repeat the entire conversation. You must understand that we had been previously in the habit of

assembling early in the morning at the court in which the trial was held, and which is not far from the prison. There we remained talking with one another until the opening of the prison doors (for they were not opened very early), and then went in and generally passed the day with Socrates. On the last morning the meeting was earlier than usual; this was owing to our having heard on the previous evening that the sacred ship had arrived from Delos, and therefore we agreed to meet very early at the accustomed place. On our going to the prison, the jailer who answered the door, instead of admitting us, came out and bade us wait and he would call us. "For the eleven," he said, "are now with Socrates; they are taking off his chains, and giving orders that he is to die to-day." He soon returned and said that we might come in. On entering we found Socrates just released from chains, and Xanthippe, whom you know, sitting by him, and holding his child in her arms. When she saw us she uttered a cry and said, as women will: "O Socrates, this is the last time that either you will converse with your friends, or they with you." Socrates turned to Crito and said: "Crito, let some one take her home." Some of Crito's people accordingly led her away, crying out and beating herself. And when she was gone, Socrates, sitting up on the couch, began to bend and rub his leg, saying, as he rubbed: How singular is the thing called pleasure, and how curiously related to pain, which might be thought to be the opposite of it; for they never come to a man together, and yet he who pursues either of them is generally compelled to take the other. They are two, and yet they grow together out of one head or stem; and I can not help thinking that if Aesop had noticed them, he would have made a fable about God trying to reconcile their strife, and when he could not, he fastened their heads together;

and this is the reason why when one comes the other follows, as I find in my own case pleasure comes following after the pain in my leg which was caused by the chain.

Upon this Cebes said: I am very glad indeed, Socrates, that you mentioned the name of Aesop. For that reminds me of a question which has been asked by others, and was asked of me only the day before yesterday by Evenus the poet, and as he will be sure to ask again, you may as well tell me what I should say to him, if you would like him to have an answer. He wanted to know why you who never before wrote a line of poetry, now that you are in prison are putting Aesop into verse, and also composing that hymn in honor of Apollo.

Tell him, Cebes, he replied, that I had no idea of rivalling him or his poems; which is the truth, for I knew that I could not do that. But I wanted to see whether I could purge away a scruple which I felt about certain dreams. In the course of my life I have often had intimations in dreams " that I should make music." The same dream came to me sometimes in one form, and sometimes in another, but always saying the same or nearly the same words: Make and cultivate music, said the dream. And hitherto I had imagined that this was only intended to exhort and encourage me in the study of philosophy, which has always been the pursuit of my life, and is the noblest and best of music. The dream was bidding me do what I was already doing, in the same way that the competitor in a race is bidden by the spectators to run when he is already running. But I was not certain of this, as the dream might have meant music in the popular sense of the word, and being under sentence of death, and the festival giving me a respite, I thought that I should be safer if I satisfied the scruple,

and, in obedience to the dream, composed a few verses before I departed. And first I made a hymn in honor of the god of the festival, and then considering that a poet, if he is really to be a poet or maker, should not only put words together but make stories, and as I have no invention, I took some fables of Aesop, which I had ready at hand and knew, and turned them into verse. Tell Evenus this, and bid him be of good cheer; say that I would have him come after me if he be a wise man, and not tarry; and that to-day I am likely to be going, for the Athenians say that I must.

Simmias said: What a message for such a man! having been a frequent companion of his I should say that, as far as I know him, he will never take your advice unless he is obliged.

Why, said Socrates. Is not Evenus a philosopher?

I think that he is, said Simmias.

Then he, or any man who has the spirit of philosophy, will be willing to die, though he will not take his own life, for that is held not to be right.

Here he changed his position, and put his legs off the couch on to the ground, and during the rest of the conversation he remained sitting.

Why do you say, inquired Cebes, that a man ought not to take his own life, but that the philosopher will be ready to follow the dying?

Socrates replied: And have you, Cebes and Simmias, who are acquainted with Philolaus, never heard him speak of this?

I never understood him, Socrates.

My words, too, are only an echo; but I am very willing to say what I have heard: and indeed, as I am going to another place, I ought to be thinking and talking of the nature of the pilgrimage which I am about to make. What can I do better in the interval between this and the setting of the sun?

Then tell me, Socrates, why is suicide held not to be right? as I have certainly heard Philolaus affirm when he was staying with us at Thebes; and there are others who say the same, although none of them has ever made me understand him.

But do your best, replied Socrates, and the day may come when you will understand. I suppose that you wonder why, as most things which are evil may be accidentally good, this is to be the only exception (for may not death, too, be better than life in some cases?), and why, when a man is better dead, he is not permitted to be his own benefactor, but must wait for the hand of another.

By Jupiter! yes, indeed, said Cebes laughing, and speaking in his native Doric.

I admit the appearance of inconsistency, replied Socrates; but there may not be any real inconsistency after all in this. There is a doctrine uttered in secret that man is a prisoner who has no right to open the door of his prison and run away; this is a great mystery which I do not quite understand. Yet I too believe that the gods are our guardians, and that we are a possession of theirs. Do you not agree?

Yes, I agree to that, said Cebes.

And if one of your own possessions, an ox or an ass, for example, took the liberty of putting himself out of the way when you had given no intimation of your wish that he should die, would you not be angry with him, and would you not punish him if you could?

Certainly, replied Cebes.

Then there may be reason in saying that a man should wait, and not take his own life until God summons him, as he is now summoning me.

Yes, Socrates, said Cebes, there is surely reason in that. And yet how can you reconcile this seemingly true belief that God is our guardian and we his posses-

sions, with that willingness to die which we were attributing to the philosopher? That the wisest of men should be willing to leave this service in which they are ruled by the gods who are the best of rulers, is not reasonable, for surely no wise man thinks that when set at liberty he can take better care of himself than the gods take of him. A fool may perhaps think this — he may argue that he had better run away from his master, not considering that his duty is to remain to the end, and not to run away from the good, and that there is no sense in his running away. But the wise man will want to be ever with him who is better than himself. Now this, Socrates, is the reverse of what was just now said; for upon this view the wise man should sorrow and the fool rejoice at passing out of life.

The earnestness of Cebes seemed to please Socrates. Here, said he, turning to us, is a man who is always inquiring, and is not to be convinced all in a moment, nor by every argument.

And in this case, added Simmias, his objection does appear to me to have some force. For what can be the meaning of a truly wise man wanting to fly away and lightly leave a master who is better than himself. And I rather imagine that Cebes is referring to you; he thinks that you are too ready to leave us, and too ready to leave the gods who, as you acknowledge, are our good rulers.

Yes, replied Socrates; there is reason in that. And this indictment you think that I ought to answer as if I were in court?

That is what we should like, said Simmias.

Then I must try to make a better impression upon you than I did when defending myself before the judges. For I am quite ready to acknowledge, Simmias and Cebes, that I ought to be grieved at death,

if I were not persuaded that I am going to other gods who are wise and good (of this I am as certain as I can be of anything of the sort), and to men departed (though I am not so certain of this) who are better than those whom I leave behind; and therefore I do not grieve as I might have done, for I have good hope that there is yet something remaining for the dead, and as has been said of old, some far better thing for the good than for the evil.

But do you mean to take away your thoughts with you, Socrates, said Simmias? Will you not communicate them to us?—the benefit is one in which we too may hope to share. Moreover, if you succeed in convincing us, that will be an answer to the charge against yourself.

I will do my best, replied Socrates. But you must first let me hear what Crito wants; he was going to say something to me.

Only this, Socrates, replied Crito: — the attendant who is to give you the poison has been telling me that you are not to talk much, and he wants me to let you know this; for that by talking, heat is increased, and this interferes with the action of the poison; those who excite themselves are sometimes obliged to drink the poison two or three times.

Then, said Socrates, let him mind his business and be prepared to give the poison two or three times, if necessary; that is all.

I was almost certain that you would say that, replied Crito; but I was obliged to satisfy him.

Never mind him, he said.

And now I will make answer to you, O my judges, and show that he who has lived as a true philosopher has reason to be of good cheer when he is about to die, and that after death he may hope to receive the greatest good in the other world. And how this may

be, Simmias and Cebes, I will endeavor to explain. For I deem that the true disciple of philosophy is likely to be misunderstood by other men; they do not perceive that he is ever pursuing death and dying; and if this is true, why, having had the desire of death all his life long, should he repine at the arrival of that which he has been always pursuing and desiring?

Simmias laughed and said: Though not in a laughing humor, I swear that I can not help laughing, when I think what the wicked world will say when they hear this. They will say that this is very true, and our people at home will agree with them in saying that the life which philosophers desire is truly death, and that they have found them out to be deserving of the death which they desire.

And they are right, Simmias, in saying this, with the exception of the words "they have found them out;" for they have not found out what is the nature of this death which the true philosopher desires, or how he deserves or desires death. But let us leave them and have a word with ourselves: Do we believe that there is such a thing as death?

To be sure, replied Simmias.

And is this anything but the separation of soul and body? And being dead is the attainment of this separation when the soul exists in herself, and is parted from the body and the body is parted from the soul — that is death?

Exactly: that and nothing else, he replied.

And what do you say of another question, my friend, about which I should like to have your opinion, and the answer to which will probably throw light on our present inquiry: Do you think that the philosopher ought to care about the pleasures — if they are to be called pleasures — of eating and drinking?

Certainly not, answered Simmias.

And what do you say of the pleasures of love — should he care about them?

By no means.

And will he think much of the other ways of indulging the body, for example, the acquisition of costly raiment, or sandals or other adornments of the body? Instead of caring about them, does he not rather despise anything more than nature needs? What do you say?

I should say that the true philosopher would despise them.

Would you not say that he is entirely concerned with the soul and not with the body? He would like, as far as he can, to be quit of the body and turn to the soul.

That is true.

In matters of this sort philosophers, above all other men, may be observed in every sort of way to dissever the soul from the body.

That is true.

Whereas, Simmias, the rest of the world are of opinion that a life which has no bodily pleasures and no part in them is not worth having; but that he who thinks nothing of bodily pleasures is almost as though he were dead.

That is quite true.

What again shall we say of the actual acquirement of knowledge? — is the body, if invited to share in the inquiry, a hinderer or a helper? I mean to say, have sight and hearing any truth in them? Are they not, as the poets are always telling us, inaccurate witnesses? and yet, if even they are inaccurate and indistinct, what is to be said of the other senses? — for you will allow that they are the best of them?

Certainly, he replied.

Then when does the soul attain truth? — for in attempting to consider anything in company with the body she is obviously deceived.

Yes, that is true.

Then must not existence be revealed to her in thought, if at all?

Yes.

And thought is best when the mind is gathered into herself and none of these things trouble her — neither sounds nor sights nor pain nor any pleasure, — when she has as little as possible to do with the body, and has no bodily sense or feeling, but is aspiring after being?

That is true.

And in this the philosopher dishonors the body; his soul runs away from the body and desires to be alone and by herself?

That is true.

Well, but there is another thing, Simmias: Is there or is there not an absolute justice?

Assuredly there is.

And an absolute beauty and absolute good?

Of course.

But did you ever behold any of them with your eyes?

Certainly not.

Or did you ever reach them with any other bodily sense? (and I speak not of these alone, but of absolute greatness, and health, and strength, and of the essence or true nature of everything). Has the reality of them ever been perceived by you through the bodily organs? or rather, is not the nearest approach to the knowledge of their several natures made by him who so orders his intellectual vision as to have the most exact conception of the essence of that which he considers?

Certainly.

And he attains to the knowledge of them in their highest purity who goes to each of them with the mind alone, not allowing when in the act of thought the intrusion or introduction of sight or any other sense in the company of reason, but with the very light of the mind in her clearness penetrates into the very light of truth in each; he has got rid, as far as he can, of eyes and ears and of the whole body, which he conceives of only as a disturbing element, hindering the soul from the acquisition of knowledge when in company with her — is not this the sort of man who, if ever man did, is likely to attain the knowledge of existence?

There is admirable truth in that, Socrates, replied Simmias.

And when they consider all this, must not true philosophers make a reflection, of which they will speak to one another in such words as these: We have found, they will say, a path of speculation which seems to bring us and the argument to the conclusion, that while we are in the body, and while the soul is mingled with this mass of evil, our desire will not be satisfied, and our desire is of the truth. For the body is a source of endless trouble to us by reason of the mere requirement of food; and also is liable to diseases which overtake and impede us in the search after truth: and by filling us as full of loves, and lusts, and fears, and fancies, and idols, and every sort of folly, prevents our ever having, as people say, so much as a thought. For whence come wars, and fightings, and factions? whence but from the body and the lusts of the body? For wars are occasioned by the love of money, and money has to be acquired for the sake and in the service of the body; and in consequence of all these things the time which ought to be given to philosophy

is lost. Moreover, if there is time and an inclination towards philosophy, yet the body introduces a turmoil and confusion and fear into the course of speculation, and hinders us from seeing the truth; and all experience shows that if we would have pure knowledge of anything we must be quit of the body, and the soul in herself must behold all things in themselves: then, I suppose, that we shall attain that which we desire, and of which we say that we are lovers, and that is wisdom; not while we live, but after death, as the argument shows; for if while in company with the body, the soul can not have pure knowledge, one of two things seems to follow — either knowledge is not to be attained at all, or, if at all, after death. For then, and not till then, the soul will be in herself alone and without the body. In this present life, I reckon that we make the nearest approach to knowledge when we have the least possible concern or interest in the body, and are not saturated with the bodily nature, but remain pure until the hour when God himself is pleased to release us. And then the foolishness of the body will be cleared away and we shall be pure and hold converse with other pure souls, and know of ourselves the clear light everywhere; and this is surely the light of truth. For no impure thing is allowed to approach the pure. These are the sort of words, Simmias, which the true lovers of wisdom can not help saying to one another, and thinking. You will agree with me in that?

Certainly, Socrates.

But if this is true, O my friend, then there is great hope that, going whither I go, I shall there be satisfied with that which has been the chief concern of you and me in our past lives. And now that the hour of departure is appointed to me, this is the hope with which I depart, and not I only, but every man who believes that he has his mind purified.

Certainly, replied Simmias.

And what is purification but the separation of the soul from the body, as I was saying before; the habit of the soul gathering and collecting herself into herself, out of all the courses of the body; the dwelling in her own place alone, as in another life, so also in this, as far as she can; — the release of the soul from the chains of the body?

Very true, he said.

And what is that which is termed death, but this very separation and release of the soul from the body?

To be sure, he said.

And the true philosophers, and they only, study and are eager to release the soul. Is not the separation and release of the soul from the body their especial study?

That is true.

And, as I was saying at first, there would be a ridiculous contradiction in men studying to live as nearly as they can in a state of death, and yet repining when death comes.

Certainly.

Then Simmias, as the true philosophers are ever studying death, to them, of all men, death is the least terrible. Look at the matter in this way: — how inconsistent of them to have been always enemies of the body, and wanting to have the soul alone, and when this is granted to them, to be trembling and repining; instead of rejoicing at their departing to that place where, when they arrive, they hope to gain that which in life they loved (and this was wisdom), and at the same time to be rid of the company of their enemy. Many a man has been willing to go to the world below in the hope of seeing there an earthly love, or wife, or son, and conversing with them. And will he who is a true lover of wisdom, and is persuaded in like manner

that only in the world below he can worthily enjoy her, still repine at death? Will he not depart with joy? Surely, he will, my friend, if he be a true philosopher. For he will have a firm conviction that there only, and nowhere else, he can find wisdom in her purity. And if this be true, he would be very absurd, as I was saying, if he were to fear death.

He would indeed, replied Simmias.

And when you see a man who is repining at the approach of death, is not his reluctance a sufficient proof that he is not a lover of wisdom, but a lover of the body, and probably at the same time a lover of either money or power, or both?

That is very true, he replied.

There is a virtue, Simmias, which is named courage. Is not that a special attribute of the philosopher?

Certainly.

Again, there is temperance. Is not the calm, and control, and disdain of the passions which even the many call temperance, a quality belonging only to those who despise the body, and live in philosophy?

That is not to be denied.

For the courage and temperance of other men, if you will consider them, are really a contradiction.

How is that, Socrates?

Well, he said, you are aware that death is regarded by men in general as a great evil.

That is true, he said.

And do not courageous men endure death because they are afraid of yet greater evils?

That is true.

Then all but the philosophers are courageous only from fear, and because they are afraid; and yet that a man should be courageous from fear, and because he is a coward, is surely a strange thing.

Very true.

And are not the temperate exactly in the same case? They are temperate because they are intemperate — which may seem to be a contradiction, but is nevertheless the sort of thing which happens with this foolish temperance. For there are pleasures which they must have, and are afraid of losing; and therefore they abstain from one class of pleasures because they are overcome by another: and whereas intemperance is defined as "being under the dominion of pleasure," they overcome only because they are overcome by pleasure. And that is what I mean by saying that they are temperate through intemperance.

That appears to be true.

Yet the exchange of one fear or pleasure or pain for another fear or pleasure or pain, which are measured like coins, the greater with the less, is not the exchange of virtue. O my dear Simmias, is there not one true coin for which all things ought to exchange? — and that is wisdom; and only in exchange for this, and in company with this, is anything truly bought or sold, whether courage or temperance or justice. And is not all true virtue the companion of wisdom, no matter what fears or pleasures or other similar goods or evils may or may not attend her? But the virtue which is made up of these goods, when they are severed from wisdom and exchanged with one another, is a shadow of virtue only, nor is there any freedom or health or truth in her; but in the true exchange there is a purging away of all these things, and temperance, and justice, and courage, and wisdom herself, are a purgation of them. And I conceive that the founders of the mysteries had a real meaning and were not mere triflers when they intimated in a figure long ago that he who passed unsanctified and uninitiated into the world below will live in a slough, but that he who arrives there after initiation and purifica-

tion will dwell with the gods. For "many," as they say in the mysteries, "are the thyrsus-bearers, but few are the mystics," — meaning, as I interpret the words, the true philosophers. In the number of whom I have been seeking, according to my ability, to find a place during my whole life; — whether I have sought in a right way or not, and whether I have succeeded or not, I shall truly know in a little while, if God will, when I myself arrive in the other world: that is my belief. And now Simmias and Cebes, I have answered those who charge me with not grieving or repining at parting from you and my masters in this world; and I am right in not repining, for I believe that I shall find other masters and friends who are as good in the world below. But all men can not receive this, and I shall be glad if my words have any more success with you than with the judges of Athenians.

Cebes answered: I agree, Socrates, in the greater part of what you say. But in what relates to the soul, men are apt to be incredulous; they fear that when she leaves the body her place may be nowhere, and that on the very day of death she may be destroyed and perish — immediately on her release from the body, issuing forth like smoke or air and vanishing away into nothingness. For if she could only hold together and be herself after she was released from the evils of the body, there would be good reason to hope, Socrates, that what you say is true. But much persuasion and many arguments are required in order to prove that when the man is dead the soul yet exists, and has any force or intelligence.

True, Cebes, said Socrates; and shall I suggest that we talk a little of the probabilities of these things?

I am sure, said Cebes, that I should greatly like to know your opinion about them.

I reckon, said Socrates, that no one who heard me now, not even if he were one of my old enemies, the comic poets, could accuse me of idle talking about matters in which I have no concern. Let us then, if you please, proceed with the inquiry.

Whether the souls of men after death are or are not in the world below, is a question which may be argued in this manner: — The ancient doctrine of which I have been speaking affirms that they go from hence into the other world, and return hither, and are born from the dead. Now if this be true, and the living come from the dead, then our souls must be in the other world, for if not, how could they be born again? And this would be conclusive, if there were any real evidence that the living are only born from the dead; but if there is no evidence of this, then other arguments will have to be adduced.

That is very true, replied Cebes.

Then let us consider this question, not in relation to man only, but in relation to animals generally, and to plants, and to everything of which there is generation, and the proof will be easier. Are not all things which have opposites generated out of their opposites? I mean such things as good and evil, just and unjust — and there are innumerable other opposites which are generated out of opposites. And I want to show that this holds universally of all opposites; I mean to say, for example, that anything which becomes greater must become greater after being less.

True.

And that which becomes less must have been once greater and then become less.

Yes.

And the weaker is generated from the stronger, and the swifter from the slower.

Very true.

And the worst is from the better, and the more just is from the more unjust?

Of course.

And is this true of all opposites? and are we convinced that all of them are generated out of opposites?

Yes.

And in this universal opposition of all things, are there not also two intermediate processes which are ever going on, from one to the other, and back again; where there is a greater and a less there is also an intermediate process of increase and diminution, and that which grows is said to wax, and that which decays to wane?

Yes, he said.

And there are many other processes, such as division and composition, cooling and heating, which equally involve a passage into and out of one another. And this holds of all opposites, even though not always expressed in words — they are generated out of one another, and there is a passing or process from one to the other of them?

Very true, he replied.

Well, and is there not an opposite of life, as sleep is the opposite of waking?

True, he said.

And what is that?

Death, he answered.

And these then are generated, if they are opposites, the one from the other, and have there their two intermediate processes also?

Of course.

Now, said Socrates, I will analyze one of the two pairs of opposites which I have mentioned to you, and also its intermediate processes, and you shall analyze the other to me. The state of sleep is opposed to the state of waking, and out of sleeping waking is gener-

ated, and out of waking, sleeping; and the process of generation is in the one case falling asleep, and in the other waking up. Are you agreed about that?

Quite agreed.

Then, suppose that you analyze life and death to me in the same manner. Is not death opposed to life?

Yes.

And they are generated one from the other?

Yes.

What is generated from life?

Death.

And what from death?

I can only say in answer — life.

Then the living, whether things or persons, Cebes, are generated from the dead?

That is clear, he replied.

Then the inference is that our souls are in the world below?

That is true.

And one of the true processes or generations is visible — for surely the act of dying is visible?

Surely, he said.

And may not the other be inferred as the complement of nature, who is not to be supposed to go on one leg only? And if not, a corresponding process of generation in death must also be assigned to her?

Certainly, he replied.

And what is that process?

Revival.

And revival, if there be such a thing, is the birth of the dead into the world of the living?

Quite true.

Then here is a new way in which we arrive at the inference that the living come from the dead, just as the dead come from the living; and if this is true, then

the souls of the dead must be in some place out of which they come again. And this, as I think, has been satisfactorily proved.

Yes, Socrates, he said; all this seems to flow necessarily out of our previous admissions.

And that these admissions were not unfair, Cebes, he said, may be shown, as I think, in this way: If generation were in a straight line only, and there were no compensation or circle in nature, no turn or return into one another, then you know that all things would at last have the same form and pass into the same state, and there would be no more generation of them.

What do you mean? he said.

A simple thing enough, which I will illustrate by the case of sleep, he replied. You know that if there were no compensation of sleeping and waking, the story of the sleeping Endymion would in the end have no meaning, because all other things would be asleep too, and he would not be thought of. Or if there were composition only, and no division of substances, then the chaos of Anaxagoras would come again. And in like manner, my dear Cebes, if all things which partook of life were to die, and after they were dead remained in the form of death, and did not come to life again, all would at last die, and nothing would be alive — how could this be otherwise? For if the living spring from any others who are not the dead, and they die, must not all things at last be swallowed up in death?

There is no escape from that, Socrates, said Cebes; and I think that what you say is entirely true.

Yes, he said, Cebes, I entirely think so too; and we are not walking in a vain imagination: but I am confident in the belief that there truly is such a thing as living again, and that the living spring from the dead, and that the souls of the dead are in existence,

and that the good souls have a better portion [illegible] evil.

Cebes added: Your favorite doctrine, Socrates, [illegible] knowledge is simply recollection, if true, also necessarily implies a previous time in which we learned that which we now recollect. But this would be impossible unless our soul was in some place before existing in the human form; here then is another argument of the soul's immortality.

But tell me, Cebes, said Simmias, interposing, what proofs are given of this doctrine of recollection? I am not very sure at this moment that I remember them.

One excellent proof, said Cebes, is afforded by questions. If you put a question to a person in a right way, he will give a true answer of himself, but how could he do this unless there were knowledge and right reason already in him? And this is most clearly shown when he is taken to a diagram or to anything of that sort.

But if, said Socrates, you are still incredulous, Simmias, I would ask you whether you may not agree with me when you look at the matter in another way; — I mean, if you are still incredulous as to whether knowledge is recollection?

Incredulous, I am not, said Simmias; but I want to have this doctrine of recollection brought to my own recollection, and, from what Cebes has said, I am beginning to recollect and be convinced: but I should still like to hear what more you have to say.

This is what I should say, he replied: — We should agree, if I am not mistaken, that what a man recollects he must have known at some previous time.

Very true.

And what is the nature of this recollection? And, in asking this, I mean to ask, whether when a person

ay seen or heard or in any way perceived ng, and he knows not only that, but something of which he has not the same but another knowledge, we may not fairly say that he recollects that which comes into his mind. Are we agreed about that?

What do you mean?

I mean what I may illustrate by the following instance: — The knowledge of a lyre is not the same as the knowledge of a man?

True.

And yet what is the feeling of lovers when they recognize a lyre, or a garment, or anything else which the beloved has been in the habit of using? Do not they, from knowing the lyre, form in the mind's eye an image of the youth to whom the lyre belongs? And this is recollection: and in the same way any one who sees Simmias may remember Cebes; and there are endless other things of the same nature.

Yes, indeed, there are, — endless, replied Simmias.

And this sort of thing, he said, is recollection, and is most commonly a process of recovering that which has been forgotten through time and inattention.

Very true, he said.

Well; and may you not also from seeing the picture of a horse or a lyre remember a man? and from the picture of Simmias, you may be led to remember Cebes?

True.

Or you may also be led to the recollection of Simmias himself?

True, he said.

And in all these cases, the recollection may be derived from things either like or unlike?

That is true.

And when the recollection is derived from like

things, then there is sure to be another question, which is — whether the likeness of that which is recollected is in any way defective or not?

Very true, he said.

And shall we proceed a step further, and affirm that there is such a thing as equality, not of wood with wood, or of stone with stone, but that, over and above this, there is equality in the abstract? Shall we affirm this?

Affirm, yes, and swear to it, replied Simmias, with all the confidence in life.

And do we know the nature of this abstract essence?

To be sure, he said.

And whence did we obtain this knowledge? Did we not see equalities of material things, such as pieces of wood and stones, and gather from them the idea of an equality which is different from them? — you will admit that? Or look at the matter again in this way: — Do not the same pieces of wood or stone appear at one time equal, and at another time unequal?

That is certain.

But are real equals ever unequal? or is the idea of equality ever inequality?

That surely was never yet known, Socrates.

Then these (so-called) equals are not the same with the idea of equality?

I should say, clearly not, Socrates.

And yet from these equals, although differing from the idea of equality, you conceived and attained that idea?

Very true, he said.

Which might be like, or might be unlike them?

Yes.

But that makes no difference: whenever from seeing one thing you conceived another, whether like or

unlike, there must surely have been an act of recollection?

Very true.

But what would you say of equal portions of wood and stone, or other material equals? and what is the impression produced by them? Are they equals in the same sense as absolute equality? or do they fall short of this in a measure?

Yes, he said, in a very great measure too.

And must we not allow, that when I or any one look at any object, and perceive that the object aims at being some other thing, but falls short of, and can not attain to it, — he who makes this observation must have had a previous knowledge of that to which, as he says, the other, although similar, was inferior?

Certainly.

And has not this been our own case in the matter of equals and of absolute equality?

Precisely.

Then we must have known absolute equality previously to the time when we first saw the material equals, and reflected that all these apparent equals aim at this absolute equality, but fall short of it?

That is true.

And we recognize also that this absolute equality has only been known, and can only be known, through the medium of sight or touch, or of some other sense. And this I would affirm of all such conceptions.

Yes, Socrates, as far as the argument is concerned, one of them is the same as the other.

And from the sense then is derived the knowledge that all sensible things aim at an idea of equality of which they fall short — is not that true?

Yes.

Then before we began to see or hear or perceive in any way, we must have had a knowledge of absolute

equality, or we could not have referred to that the equals which are derived from the senses? — for to that they all aspire, and of that they fall short?

That, Socrates, is certainly to be inferred from the previous statements.

And did we not see and hear and acquire our other senses as soon as we were born?

Certainly.

Then we must have acquired the knowledge of the ideal equal at some time previous to this?

Yes.

That is to say, before we were born, I suppose?

True.

And if we acquired this knowledge before we were born, and were born having it, then we also knew before we were born and at the instant of birth not only the equal or the greater or the less, but all other ideas; for we are not speaking only of equality absolute, but of beauty, good, justice, holiness, and all which we stamp with the name of essence in the dialectical process, when we ask and answer questions. Of all this we may certainly affirm that we acquired the knowledge before birth?

That is true.

But if, after having acquired, we have not forgotten that which we acquired, then we must always have been born with knowledge, and shall always continue to know as long as life lasts — for knowing is the acquiring and retaining knowledge and not forgetting. Is not forgetting, Simmias, just the losing of knowledge?

Quite true, Socrates.

But if the knowledge which we acquired before birth was lost by us at birth, and if afterwards by the use of the senses we recovered that which we previously

knew, will not that which we call learning be a process of recovering our knowledge, and may not this be rightly termed recollection by us?

Very true.

For this is clear — that when we perceived something, either by the help of sight, or hearing, or some other sense, there was no difficulty in receiving from this a conception of some other thing like or unlike which had been forgotten and which was associated with this; and therefore, as I was saying, one of two alternatives follows: — either we had this knowledge at birth, and continued to know through life; or, after birth, those who are said to learn only remember, and learning is recollection only.

Yes, that is quite true, Socrates.

And which alternative, Simmias, do you prefer? Had we the knowledge at our birth, or did we remember afterwards the things which we knew previously to our birth?

I can not decide at the moment.

At any rate you can decide whether he who has knowledge ought or ought not to be able to give a reason for what he knows.

Certainly, he ought.

But do you think that every man is able to give a reason about these very matters of which we are speaking?

I wish that they could, Socrates, but I greatly fear that to-morrow at this time there will be no one able to give a reason worth having.

Then you are not of opinion, Simmias, that all men know these things?

Certainly not.

Then they are in process of recollecting that which they learned before?

Certainly.

But when did our souls acquire this knowledge? — not since we were born as men?

Certainly not.

And therefore, previously?

Yes.

Then, Simmias, our souls must have existed before they were in the form of man — without bodies, and must have had intelligence.

Unless indeed you suppose, Socrates, that these notions were given us at the moment of birth; for this is the only time that remains.

Yes, my friend, but when did we lose them? for they are not in us when we are born — that is admitted. Did we lose them at the moment of receiving them, or at some other time?

No, Socrates, I perceive that I was unconsciously talking nonsense.

Then may we not say, Simmias, that if, as we are always repeating, there is an absolute beauty, and goodness, and essence in general, and to this, which is now discovered to be a previous condition of our being, we refer all our sensations, and with this compare them — assuming this to have a prior existence, then our souls must have had a prior existence, but if not, there would be no force in the argument. There can be no doubt that if these absolute ideas existed before we were born, then our souls must have existed before we were born, and if not the ideas, then not the souls.

Yes, Socrates; I am convinced that there is precisely the same necessity for the existence of the soul before birth, and of the essence of which you are speaking: and the argument arrives at a result which happily agrees with my own notion. For there is nothing which to my mind is so evident as that beauty, good, and other notions of which you were just now

speaking, have a most real and absolute existence; and I am satisfied with the proof.

Well, but is Cebes equally satisfied? for I must convince him too.

I think, said Simmias, that Cebes is satisfied: although he is the most incredulous of mortals, yet I believe that he is convinced of the existence of the soul before birth. But that after death the soul will continue to exist is not yet proven even to my own satisfaction. I can not get rid of the feelings of the many to which Cebes was referring — the feeling that when the man dies the soul may be scattered, and that this may be the end of her. For admitting that she may be generated and created in some other place, and may have existed before entering the human body, why after having entered in and gone out again may she not herself be destroyed and come to an end?

Very true, Simmias, said Cebes; that our soul existed before we were born was the first half of the argument, and this appears to have been proven; that the soul will exist after death as well as before birth is the other half of which the proof is still wanting, and has to be supplied.

But that proof, Simmias and Cebes, has been already given, said Socrates, if you put the two arguments together — I mean this and the former one, in which we admitted that everything living is born of the dead. For if the soul existed before birth, and in coming to life and being born can be born only from death and dying, must she not after death continue to exist, since she has to be born again? surely the proof which you desire has been already furnished. Still I suspect that you and Simmias would be glad to probe the argument further: like children, you are haunted with a fear that when the soul leaves the body, the wind may really blow her away and scatter her; espe-

cially if a man should happen to die in stormy weather and not when the sky is calm.

Cebes answered with a smile: Then, Socrates, you must argue us out of our fears — and yet, strictly speaking, they are not our fears, but there is a child within us to whom death is a sort of hobgoblin; him too we must persuade not to be afraid when he is alone with him in the dark.

Socrates said: Let the voice of the charmer be applied daily until you have charmed him away.

And where shall we find a good charmer of our fears, Socrates, when you are gone?

Hellas, he replied, is a large place, Cebes, and has many good men, and there are barbarous races not a few: seek for him among them all, far and wide, sparing neither pains nor money; for there is no better way of using your money. And you must not forget to seek for him among yourselves too; for he is nowhere more likely to be found.

The search, replied Cebes, shall certainly be made. And now, if you please, let us return to the point of the argument at which we digressed.

By all means, replied Socrates; what else should I please?

Very good, he said.

Must we not, said Socrates, ask ourselves some question of this sort? — What is that which, as we imagine, is liable to be scattered away, and about which we fear? and what again is that about which we have no fear? And then we may proceed to inquire whether that which suffers dispersion is or is not of the nature of soul — our hopes and fears as to our own souls will turn upon that.

That is true, he said.

Now the compound or composite may be supposed to be naturally capable of being dissolved in like man-

ner as of being compounded; but that which is uncompounded, and that only, must be, if anything is, indissoluble.

Yes; that is what I should imagine, said Cebes.

And the uncompounded may be assumed to be the same and unchanging, whereas the compound is always changing and never the same?

That I also think, he said.

Then now let us return to the previous discussion. Is that idea or essence, which in the dialectical process we define as essence or true existence — whether essence of equality, beauty, or anything else — are these essences, I say, liable at times to some degree of change? or are they each of them always what they are, having the same simple self-existent and unchanging forms, and not admitting of variation at all, or in any way, or at any time?

They must be always the same, Socrates, replied Cebes.

And what would you say of the many beautiful — whether men or horses or garments or any other things which may be called equal or beautiful, — are they all unchanging and the same always, or quite the reverse? May they not rather be described as almost always changing and hardly ever the same, either with themselves or with one another?

The latter, replied Cebes; they are always in a state of change.

And these you can touch and see and perceive with the senses, but the unchanging things you can only perceive with the mind — they are invisible and are not seen?

That is very true, he said.

Well then, he added, let us suppose that there are two sorts of existences — one seen, the other unseen.

Let us suppose them.

The seen is the changing, and the unseen is the unchanging?

That may be also supposed.

And, further, is not one part of us body, and the rest of us soul?

To be sure.

And to which class may we say that the body is more alike and akin?

Clearly to the seen: no one can doubt that.

And is the soul seen or not seen?

Not by man, Socrates.

And by "seen" and "not seen" is meant by us that which is or is not visible to the eye of man?

Yes, to the eye of man.

And what do we say of the soul? — is that seen or not seen?

Not seen.

Unseen then?

Yes.

Then the soul is more like to the unseen, and the body to the seen?

That is most certain, Socrates.

And were we not saying long ago that the soul when using the body as an instrument of perception, that is to say, when using the sense of sight or hearing or some other sense (for the meaning of perceiving through the body is perceiving through the senses) — were we not saying that the soul too is then dragged by the body into the region of the changeable, and wanders and is confused; the world spins round her, and she is like a drunkard when under their influence?

Very true.

But when returning into herself she reflects; then she passes into the realm of purity, and eternity, and immortality, and unchangeableness, which are her kin-

dred, and with them she ever lives, when she is by herself and is not let or hindered; then she ceases from her erring ways, and being in communion with the unchanging is unchanging. And this state of the soul is called wisdom?

That is well and truly said, Socrates, he replied.

And to which class is the soul more nearly alike and akin, as far as may be inferred from this argument, as well as from the preceding one?

I think, Socrates, that, in the opinion of every one who follows the argument, the soul will be infinitely more like the unchangeable — even the most stupid person will not deny that.

And the body is more like the changing?

Yes.

Yet once more consider the matter in this light: When the soul and the body are united, then nature orders the soul to rule and govern, and the body to obey and serve. Now which of these two functions is akin to the divine? and which to the mortal? Does not the divine appear to you to be that which naturally orders and rules, and the mortal that which is subject and servant?

True.

And which does the soul resemble?

The soul resembles the divine, and the body the mortal — there can be no doubt of that, Socrates.

Then reflect, Cebes: is not the conclusion of the whole matter this — that the soul is in the very likeness of the divine, and immortal, and intelligible, and uniform, and indissoluble, and unchangeable; and the body is in the very likeness of the human, and mortal, and unintelligible, and multiform, and dissoluble, and changeable. Can this, my dear Cebes, be denied?

No indeed.

But if this is true, then is not the body liable to

speedy dissolution? and is not the soul almost or altogether indissoluble?

Certainly.

And do you further observe, that after a man is dead, the body, which is the visible part of man, and has a visible framework, which is called a corpse, and which would naturally be dissolved and decomposed and dissipated, is not dissolved or decomposed at once, but may remain for a good while, if the constitution be sound at the time of death, and the season of the year favorable? For the body when shrunk and embalmed, as is the custom in Egypt, may remain almost entire through infinite ages; and even in decay, still there are some portions, such as the bones and ligaments, which are practically indestructible. You allow that?

Yes.

And are we to suppose that the soul, which is invisible, in passing to the true Hades, which like her is invisible, and pure, and noble, and on her way to the good and wise God, whither, if God will, my soul is also soon to go, — that the soul, I repeat, if this be her nature and origin, is blown away and perishes immediately on quitting the body, as the many say? That can never be, my dear Simmias and Cebes. The truth rather is, that the soul which is pure at departing draws after her no bodily taint, having never voluntarily had connection with the body, which she is ever avoiding, herself gathered into herself; for such abstraction has been the study of her life. And what does this mean but that she has been a true disciple of philosophy, and has practised how to die easily? And is not philosophy the practice of death?

Certainly.

That soul, I say, herself invisible, departs to the invisible world — to the divine and immortal and

rational: thither arriving, she lives in bliss and is released from the error and folly of men, their fears and wild passions and all other human ills, and forever dwells, as they say of the initiated, in company with the gods? Is not this true, Cebes?

Yes, said Cebes, beyond a doubt.

But the soul which has been polluted, and is impure at the time of her departure, and is the companion and servant of the body always, and is in love with and fascinated by the body and by the desires and pleasures of the body, until she is led to believe that the truth only exists in a bodily form, which a man may touch and see and taste and use for the purposes of his lusts, — the soul, I mean, accustomed to hate and fear and avoid the intellectual principle, which to the bodily eye is dark and invisible, and can be attained only by philosophy; — do you suppose that such a soul as this will depart pure and unalloyed?

That is impossible, he replied.

She is engrossed by the corporeal, which the continual association and constant care of the body have made natural to her.

Very true.

And this, my friend, may be conceived to be that heavy, weighty, earthy element of sight by which such a soul is depressed and dragged down again into the visible world, because she is afraid of the invisible and of the world below — prowling about tombs and sepulchres, in the neighborhood of which, as they tell us, are seen certain ghostly apparitions of souls which have not departed pure, but are cloyed with sight and therefore visible.[1]

[1] Compare Milton, Comus, 463 foll.: —

"But when lust,
By unchaste looks, loose gestures, and foul talk,
But most by lewd and lavish act of sin,
Lets in defilement to the inward parts,

That is very likely, Socrates.

Yes, that is very likely, Cebes; and these must be the souls, not of the good, but of the evil, who are compelled to wander about such places in payment of the penalty of their former evil way of life; and they continue to wander until the desire which haunts them is satisfied and they are imprisoned in another body. And they may be supposed to be fixed in the same natures which they had in their former life.

What natures do you mean, Socrates?

I mean to say that men who have followed after gluttony, and wantonness, and drunkenness, and have had no thought of avoiding them, would pass into asses and animals of that sort. What do you think?

I think that exceedingly probable.

And those who have chosen the portion of injustice, and tyranny, and violence, will pass into wolves, or hawks and kites; — whither else can we suppose them to go?

Yes, said Cebes; that is doubtless the place of natures such as theirs.

And there is no difficulty, he said, in assigning to all of them places answering to their several natures and propensities?

There is not, he said.

Even among them some are happier than others; and the happiest both in themselves and their place of abode are those who have practised the civil and social virtues which are called temperance and justice, and

> The soul grows clotted by contagion,
> Imbodies, and imbrutes, till she quite lose
> The divine property of her first being.
> Such are those thick and gloomy shadows damp
> Oft seen in charnel vaults and sepulchres,
> Lingering, and sitting by a new made grave,
> As loath to leave the body that it lov'd,
> And linked itself by carnal sensuality
> To a degenerate and degraded state."

are acquired by habit and attention without philosophy and mind.

Why are they the happiest?

Because they may be expected to pass into some gentle social nature which is like their own, such as that of bees or ants, or even back again into the form of man, and just and moderate men spring from them.

That is not impossible.

But he who is a philosopher or lover of learning, and is entirely pure at departing, is alone permitted to reach the gods. And this is the reason, Simmias and Cebes, why the true votaries of philosophy abstain from all fleshly lusts, and endure and refuse to give themselves up to them, — not because they fear poverty or the ruin of their families, like the lovers of money, and the world in general; nor like the lovers of power and honor, because they dread the dishonor or disgrace of evil deeds.

No, Socrates, that would not become them, said Cebes.

No indeed, he replied; and therefore they who have a care of their souls, and do not merely live in the fashions of the body, say farewell to all this; they will not walk in the ways of the blind: and when philosophy offers them purification and release from evil, they feel that they ought not to resist her influence, and to her they incline, and whither she leads they follow her.

What do you mean, Socrates?

I will tell you, he said. The lovers of knowledge are conscious that their souls when philosophy receives them, are simply fastened and glued to their bodies: the soul is only able to view existence through the bars of a prison, and not in her own nature; she is wallowing in the mire of all ignorance; and philosophy, seeing the terrible nature of her confinement, and that

the captive through desire is led to conspire in her own captivity (for the lovers of knowledge are aware that this was the original state of the soul, and that when she was in this state philosophy received and gently counselled her, and wanted to release her, pointing out to her that the eye is full of deceit, and also the ear and the other senses, and persuading her to retire from them in all but the necessary use of them, and to be gathered up and collected into herself, and to trust only to herself and her own intuitions of absolute existence, and mistrust that which comes to her through others and is subject to vicissitude) — philosophy shows her that this is visible and tangible, but that what she sees in her own nature is intellectual and invisible. And the soul of the true philosopher thinks that she ought not to resist this deliverance, and therefore abstains from pleasures and desires and pains and fears, as far as she is able; reflecting that when a man has great joys or sorrows or fears or desires, he suffers from them, not the sort of evil which might be anticipated — as for example, the loss of his health or property which he has sacrificed to his lusts — but he has suffered an evil greater far, which is the greatest and worst of all evils, and one of which he never thinks.

And what is that, Socrates? said Cebes.

Why this: When the feeling of pleasure or pain in the soul is most intense, all of us naturally suppose that the object of this intense feeling is then plainest and truest: but this is not the case.

Very true.

And this is the state in which the soul is most enthralled by the body.

How is that?

Why, because each pleasure and pain is a sort of nail which nails and rivets the soul to the body, and

engrosses her and makes her believe that to be true which the body affirms to be true; and from agreeing with the body and having the same delights she is obliged to have the same habits and ways, and is not likely ever to be pure at her departure to the world below, but is always saturated with the body; so that she soon sinks into another body and there germinates and grows, and has therefore no part in the communion of the divine and pure and simple.

That is most true, Socrates, answered Cebes.

And this, Cebes, is the reason why the true lovers of knowledge are temperate and brave; and not for the reason which the world gives.

Certainly not.

Certainly not! For not in that way does the soul of a philosopher reason; she will not ask philosophy to release her in order that when released she may deliver herself up again to the thraldom of pleasures and pains, doing a work only to be undone again, weaving instead of unweaving her Penelope's web. But she will make herself a calm of passion, and follow reason, and dwell in her, beholding the true and divine (which is not matter of opinion), and thence derive nourishment. Thus she seeks to live while she lives, and after death she hopes to go to her own kindred and to be freed from human ills. Never fear, Simmias and Cebes, that a soul which has been thus nurtured and has had these pursuits, will at her departure from the body be scattered and blown away by the winds and be nowhere and nothing.

When Socrates had done speaking, for a considerable time there was silence; he himself and most of us appeared to be meditating on what had been said; only Cebes and Simmias spoke a few words to one another. And Socrates observing this asked them what they thought of the argument, and whether there

was anything wanting? For, said he, much is still open to suspicion and attack, if any one were disposed to sift the matter thoroughly. If you are talking of something else I would rather not interrupt you, but if you are still doubtful about the argument do not hesitate to say exactly what you think, and let us have anything better which you can suggest; and if I am likely to be of any use, allow me to help you.

Simmias said: I must confess, Socrates, that doubts did arise in our minds, and each of us was urging and inciting the other to put the question which we wanted to have answered and which neither of us liked to ask, fearing that our importunity might be troublesome under present circumstances.

Socrates smiled, and said: O Simmias, how strange that is; I am not very likely to persuade other men that I do not regard my present situation as a misfortune, if I am unable to persuade you, and you will keep fancying that I am at all more troubled now than at any other time. Will you not allow that I have as much of the spirit of prophecy in me as the swans? For they, when they perceive that they must die, having sung all their life long, do then sing more than ever, rejoicing in the thought that they are about to go away to the god whose ministers they are. But men, because they are themselves afraid of death, slanderously affirm of the swans that they sing a lament at the last, not considering that no bird sings when cold, or hungry, or in pain, not even the nightingale, nor the swallow, nor yet the hoopoe; which are said indeed to tune a lay of sorrow, although I do not believe this to be true of them any more than of the swans. But because they are sacred to Apollo, and have the gift of prophecy, and anticipate the good things of another world, therefore they sing and rejoice in that day more than ever they did before. And

I too, believing myself to be the consecrated servant of the same God, and the fellow-servant of the swans, and thinking that I have received from my master gifts of prophecy which are not inferior to theirs, would not go out of life less merrily than the swans. Cease to mind then about this, but speak and ask anything which you like, while the eleven magistrates of Athens allow.

Well, Socrates, said Simmias, then I will tell you my difficulty, and Cebes will tell you his. For I dare say that you, Socrates, feel as I do, how very hard or almost impossible is the attainment of any certainty about questions such as these in the present life. And yet I should deem him a coward who did not prove what is said about them to the uttermost, or whose heart failed him before he had examined them on every side. For he should persevere until he has attained one of two things: either he should discover or learn the truth about them; or, if this is impossible, I would have him take the best and most irrefragable of human notions, and let this be the raft upon which he sails through life — not without risk, as I admit, if he can not find some word of God which will more surely and safely carry him. And now, as you bid me, I will venture to question you, as I should not like to reproach myself hereafter with not having said at the time what I think. For when I consider the matter, either alone or with Cebes, the argument does certainly appear to me, Socrates, to be not sufficient.

Socrates answered: I dare say, my friend, that you may be right, but I should like to know in what respect the argument is not sufficient.

In this respect, replied Simmias: — might not a person use the same argument about harmony and the lyre — might he not say that harmony is a thing invisible, incorporeal, fair, divine, abiding in the lyre

which is harmonized, but that the lyre and the strings are matter and material, composite, earthy, and akin to mortality? And when some one breaks the lyre, or cuts and rends the strings, then he who takes this view would argue as you do, and on the same analogy, that the harmony survives and has not perished; for you can not imagine, as he would say, that the lyre without the strings, and the broken strings themselves remain, and yet that the harmony, which is of heavenly and immortal nature and kindred, has perished — and perished too before the mortal. That harmony, he would say, certainly exists somewhere, and the wood and strings will decay before that decays. For I suspect, Socrates, that the notion of the soul which we are all of us inclined to entertain, would also be yours, and that you too would conceive the body to be strung up, and held together, by the elements of hot and cold, wet and dry, and the like, and that the soul is the harmony or due proportionate admixture of them. And, if this is true, the inference clearly is, that when the strings of the body are unduly loosened or overstrained through disorder or other injury, then the soul, though most divine, like other harmonies of music or of works of art, of course perishes at once; although the material remains of the body may last for a considerable time, until they are either decayed or burned. Now if any one maintained that the soul, being the harmony of the elements of the body, first perishes in that which is called death, how shall we answer him?

Socrates looked round at us as his manner was, and said with a smile: Simmias has reason on his side; and why does not some one of you who is abler than myself answer him? for there is force in his attack upon me. But perhaps, before we answer him, we had better also hear what Cebes has to say against the argument — this will give us time for reflection, and when both

of them have spoken, we may either assent to them, if their words appear to be in consonance with the truth, or if not, we may take up the other side, and argue with them. Please to tell me then, Cebes, he said, what was the difficulty which troubled you?

Cebes said: I will tell you. My feeling is that the argument is still in the same position, and open to the same objections which were urged before; for I am ready to admit that the existence of the soul before entering into the bodily form has been very ingeniously, and, as I may be allowed to say, quite sufficiently proven; but the existence of the soul after death is still, in my judgment, unproven. Now my objection is not the same as that of Simmias; for I am not disposed to deny that the soul is stronger and more lasting than the body, being of opinion that in all such respects the soul very far excels the body. Well then, says the argument to me, why do you remain unconvinced? — When you see that the weaker is still in existence after the man is dead, will you not admit that the more lasting must also survive during the same period of time? Now I, like Simmias, must employ a figure; and I shall ask you to consider whether the figure is to the point. The parallel which I will suppose is that of an old weaver, who dies, and after his death somebody says: — He is not dead, he must be alive; and he appeals to the coat which he himself wove and wore, and which is still whole and undecayed. And then he proceeds to ask of some one who is incredulous, whether a man lasts longer, or the coat which is in use and wear; and when he is answered that a man lasts far longer, thinks that he has thus certainly demonstrated the survival of the man, who is the more lasting, because the less lasting remains. But that, Simmias, as I would beg you to observe, is not the truth; every one sees that he who talks thus is talking

nonsense. For the truth is, that this weaver, having worn and woven many such coats, though he outlived several of them, was himself outlived by the last; but this is surely very far from proving that a man is slighter and weaker than a coat. Now the relation of the body to the soul may be expressed in a similar figure; for you may say with reason that the soul is lasting, and the body weak and shortlived in comparison. And every soul may be said to wear out many bodies, especially in the course of a long life. For if while the man is alive the body deliquesces and decays, and yet the soul always weaves her garment anew and repairs the waste, then of course, when the soul perishes, she must have on her last garment, and this only will survive her; but then again, when the soul is dead, the body will at last show its native weakness, and soon pass into decay. And therefore this is an argument on which I would rather not rely as proving that the soul exists after death. For suppose that we grant even more than you affirm as within the range of possibility, and besides acknowledging that the soul existed before birth, admit also that after death the souls of some are existing still, and will exist, and will be born and die again and again, and that there is a natural strength in the soul which will hold out and be born many times — for all this, we may be still inclined to think that she will weary in the labors of successive births, and may at last succumb in one of her deaths and utterly perish; and this death and dissolution of the body which brings destruction to the soul may be unknown to any of us, for no one of us can have had any experience of it: and if this be true, then I say that he who is confident in death has but a foolish confidence, unless he is able to prove that the soul is altogether immortal and imperishable. But if he is not able to prove this, he who is about to die will

always have reason to fear that when the body is disunited, the soul also may utterly perish.

All of us, as we afterwards remarked to one another, had an unpleasant feeling at hearing them say this. When we had been so firmly convinced before, now to have our faith shaken seemed to introduce a confusion and uncertainty, not only into the previous argument, but into any future one; either we were not good judges, or there were no real grounds of belief.

Ech. There I feel with you — indeed I do, Phaedo, and when you were speaking, I was beginning to ask myself the same question: What argument can I ever trust again? For what could be more convincing than the argument of Socrates, which has now fallen into discredit? That the soul is a harmony is a doctrine which has always had a wonderful attraction for me, and, when mentioned, came back to me at once, as my own original conviction. And now I must begin again and find another argument which will assure me that when the man is dead the soul dies not with him. Tell me, I beg, how did Socrates proceed? Did he appear to share the unpleasant feeling which you mention? or did he receive the interruption calmly and give a sufficient answer? Tell us, as exactly as you can, what passed.

Phaed. Often, Echecrates, as I have admired Socrates, I never admired him more than at that moment. That he should be able to answer was nothing, but what astonished me was, first, the gentle and pleasant and approving manner in which he regarded the words of the young men, and then his quick sense of the wound which had been inflicted by the argument, and his ready application of the healing art. He might be compared to a general rallying his defeated and broken army, urging them to follow him and return to the field of argument.

Ech. How was that?

Phaed. You shall hear, for I was close to him on his right hand, seated on a sort of stool, and he on a couch which was a good deal higher. Now he had a way of playing with my hair, and then he smoothed my head, and pressed the hair upon my neck, and said: — To-morrow, Phaedo, I suppose that these fair locks of yours will be severed.

Yes, Socrates, I suppose that they will, I replied.

Not so, if you will take my advice.

What shall I do with them? I said.

To-day, he replied, and not to-morrow, if this argument dies and can not be brought to life again by us, you and I will both shave our locks: and if I were you, and could not maintain my ground against Simmias and Cebes, I would myself take an oath, like the Argives, not to wear hair any more until I had renewed the conflict and defeated them.

Yes, I said; but Heracles himself is said not to be a match for two.

Summon me then, he said, and I will be your Iolaus until the sun goes down.

I summon you rather, I said, not as Heracles summoning Iolaus, but as Iolaus might summon Heracles.

That will be all the same, he said. But first let us take care that we avoid a danger.

And what is that? I said.

The danger of becoming misologists, he replied, which is one of the very worst things that can happen to us. For as there are misanthropists or haters of men, there are also misologists or haters of ideas, and both spring from the same cause, which is ignorance of the world. Misanthropy arises from the too great confidence of inexperience; — you trust a man and think him altogether true and good and faithful, and then in a little while he turns out to be false and knavish;

and then another and another, and when this has happened several times to a man, especially within the circle of his own most trusted friends, as he deems them, and he has often quarrelled with them, he at last hates all men, and believes that no one has any good in him at all. I dare say that you must have observed this.

Yes, I said.

And is not this discreditable? The reason is, that a man, having to deal with other men, has no knowledge of them; for if he had knowledge, he would have known the true state of the case, that few are the good and few the evil, and that the great majority are in the interval between them.

How do you mean? I said.

I mean, he replied, as you might say of the very large and very small — that nothing is more uncommon than a very large or very small man; and this applies generally to all extremes, whether of great and small, or swift and slow, or fair and foul, or black and white: and whether the instances you select be men or dogs or anything else, few are the extremes, but many are in the mean between them. Did you never observe this?

Yes, I said, I have.

And do you not imagine, he said, that if there were a competition of evil, the first in evil would be found to be very few?

Yes, that is very likely, I said.

Yes, that is very likely, he replied; not that in this respect arguments are like men — there I was led on by you to say more than I had intended; but the point of comparison was, that when a simple man who has no skill in dialectics believes an argument to be true which he afterwards imagines to be false, whether really false or not, and then another and another, he

has no longer any faith left, and great disputers, as you know, come to think at last that they have grown to be the wisest of mankind; for they alone perceive the utter unsoundness and instability of all arguments, or indeed, of all things, which, like the currents in the Euripus, are going up and down in never-ceasing ebb and flow.

That is quite true, I said.

Yes, Phaedo, he replied, and very melancholy too, if there be such a thing as truth or certainty or power of knowing at all, that a man should have lighted upon some argument or other which at first seemed true and then turned out to be false, and instead of blaming himself and his own want of wit, because he is annoyed, should at last be too glad to transfer the blame from himself to arguments in general; and for ever afterwards should hate and revile them, and lose the truth and knowledge of existence.

Yes, indeed, I said; that is very melancholy.

Let us then, in the first place, he said, be careful of admitting into our souls the notion that there is no truth or health or soundness in any arguments at all; but let us rather say that there is as yet no health in us, and that we must quit ourselves like men and do our best to gain health — you and all other men with a view to the whole of your future life, and I myself with a view to death. For at this moment I am sensible that I have not the temper of a philosopher; like the vulgar, I am only a partisan. For the partisan, when he is engaged in a dispute, cares nothing about the rights of the question, but is anxious only to convince his hearers of his own assertions. And the difference between him and me at the present moment is only this — that whereas he seeks to convince his hearers that what he say is true, I am rather seeking to convince myself; to convince my hearers is a second-

ary matter with me. And do but see how much I gain by this. For if what I say is true, then I do well to be persuaded of the truth; but if there be nothing after death, still, during the short time that remains, I shall save my friends from lamentations, and my ignorance will not last, and therefore no harm will be done. This is the state of mind, Simmias and Cebes, in which I approach the argument. And I would ask you to be thinking of the truth and not of Socrates: agree with me, if I seem to you to be speaking the truth; or if not, withstand me might and main, that I may not deceive you as well as myself in my enthusiasm, and like the bee, leave my sting in you before I die.

And now let us proceed, he said. And first of all let me be sure that I have in my mind what you were saying. Simmias, if I remember rightly, has fears and misgivings whether the soul, being in the form of harmony, although a fairer and diviner thing than the body, may not perish first. On the other hand, Cebes appeared to grant that the soul was more lasting than the body, but he said that no one could know whether the soul, after having worn out many bodies, might not perish herself and leave her last body behind her; and that this is death, which is the destruction not of the body but of the soul, for in the body the work of destruction is ever going on. Are not these, Simmias and Cebes, the points which we have to consider?

They both agreed to this statement of them.

He proceeded: And did you deny the force of the whole preceding argument, or of a part only?

Of a part only, they replied.

And what did you think, he said, of that part of the argument in which we said that knowledge was recollection only, and inferred from this that the soul must have previously existed somewhere else before she was enclosed in the body? Cebes said that he had been

wonderfully impressed by that part of the argument, and that his conviction remained unshaken. Simmias agreed, and added that he himself could hardly imagine the possibility of his ever thinking differently about that.

But, rejoined Socrates, you will have to think differently, my Theban friend, if you still maintain that harmony is a compound, and that the soul is a harmony which is made out of strings set in the frame of the body; for you will surely never allow yourself to say that a harmony is prior to the elements which compose the harmony.

No, Socrates, that is impossible.

But do you not see that you *are* saying this when you say that the soul existed before she took the form and body of man, and was made up of elements which as yet had no existence? For harmony is not a sort of thing like the soul, as you suppose; but first the lyre, and the strings, and the sounds exist in a state of discord, and then harmony is made last of all, and perishes first. And how can such a notion of the soul as this agree with the other?

Not at all, replied Simmias.

And yet, he said, there surely ought to be harmony when harmony is the theme of discourse.

There ought, replied Simmias.

But there is no harmony, he said, in the two propositions that knowledge is recollection, and that the soul is a harmony. Which of them then will you retain?

I think, he replied, that I have a much stronger faith, Socrates, in the first of the two, which has been fully demonstrated to me, than in the latter, which has not been demonstrated at all, but rests only on probable and plausible grounds; and I know too well that these arguments from probabilities are impostors,

and unless great caution is observed in the use of them, they are apt to be deceptive — in geometry, and in other things too. But the doctrine of knowledge and recollection has been proven to me on trustworthy grounds; and the proof was that the soul must have existed before she came into the body, because to her belongs the essence of which the very name implies existence. Having, as I am convinced, rightly accepted this conclusion, and on sufficient grounds, I must, as I suppose, cease to argue or allow others to argue that the soul is a harmony.

Let me put the matter, Simmias, he said, in another point of view: Do you imagine that a harmony or any other composition can be in a state other than that of the elements, out of which it is compounded?

Certainly not.

Or do or suffer anything other than they do or suffer?

He agreed.

Then a harmony does not lead the parts or elements which make up the harmony, but only follows them.

He assented.

For harmony can not possibly have any motion, or sound, or other quality which is opposed to the parts.

That would be impossible, he replied.

And does not every harmony depend upon the manner in which the elements are harmonized?

I do not understand you, he said.

I mean to say that a harmony admits of degrees, and is more of a harmony, and more completely a harmony, when more completely harmonized, if that be possible; and less of a harmony, and less completely a harmony, when less harmonized.

True.

But does the soul admit of degrees? or is one soul

in the very least degree more or less, or more or less completely, a soul than another?

Not in the least.

Yet surely one soul is said to have intelligence and virtue, and to be good, and another soul is said to have folly and vice, and to be an evil soul: and this is said truly?

Yes, truly.

But what will those who maintain the soul to be a harmony say of this presence of virtue and vice in the soul? — will they say that here is another harmony, and another discord, and that the virtuous soul is harmonized, and herself being harmony has another harmony within her, and that the vicious soul is inharmonical and has no harmony within her?

I can not say, replied Simmias; but I suppose that something of that kind would be asserted by those who take this view.

And the admission is already made that no soul is more a soul than another; and this is equivalent to admitting that harmony is not more or less harmony, or more or less completely a harmony?

Quite true.

And that which is not more or less a harmony is not more or less harmonized?

True.

And that which is not more or less harmonized can not have more or less of harmony, but only an equal harmony?

Yes, an equal harmony.

Then one soul not being more or less absolutely a soul than another, is not more or less harmonized?

Exactly.

And therefore has neither more nor less of harmony or of discord?

She has not.

And having neither more nor less of harmony or of discord, one soul has no more vice or virtue than another, if vice be discord and virtue harmony?

Not at all more.

Or speaking more correctly, Simmias, the soul, if she is a harmony, will never have any vice; because a harmony, being absolutely a harmony, has no part in the inharmonical.

No.

And therefore a soul which is absolutely a soul has no vice?

How can she have, consistently with the preceding argument?

Then, according to this, if the souls of all animals are equally and absolutely souls, they will be equally good?

I agree with you, Socrates, he said.

And can all this be true, think you? he said; and are all these consequences admissible — which nevertheless seem to follow from the assumption that the soul is a harmony?

Certainly not, he said.

Once more, he said, what ruling principle is there of human things other than the soul, and especially the wise soul? Do you know of any?

Indeed, I do not.

And is the soul in agreement with the affections of the body? or is she at variance with them? For example, when the body is hot and thirsty, does not the soul incline us against drinking? and when the body is hungry, against eating? And this is only one instance out of ten thousand of the opposition of the soul to the things of the body.

Very true.

But we have already acknowledged that the soul, being a harmony, can never utter a note at variance

with the tensions and relaxations and vibrations and other affections of the strings out of which she is composed; she can only follow, she can not lead them?

Yes, he said, we acknowledged that, certainly.

And yet do we not now discover the soul to be doing the exact opposite — leading the elements of which she is believed to be composed; almost always opposing and coercing them in all sorts of ways throughout life, sometimes more violently with the pains of medicine and gymnastic; then again more gently; — threatening and also reprimanding the desires, passions, fears, as if talking to a thing which is not herself, as Homer in the Odyssee represents Odysseus doing in the words: —

> "He beat his breast, and thus reproached his heart:
> Endure, my heart; far worse hast thou endured!"

Do you think that Homer could have written this under the idea that the soul is a harmony capable of being led by the affections of the body, and not rather of a nature which leads and masters them; and herself a far diviner thing than any harmony?

Yes, Socrates, I quite agree to that.

Then, my friend, we can never be right in saying that the soul is a harmony, for that would clearly contradict the divine Homer as well as ourselves.

True, he said.

Thus much, said Socrates, of Harmonia, your Theban goddess, Cebes, who has not been ungracious to us, I think; but what shall I say to the Theban Cadmus, and how shall I propitiate him?

I think that you will discover a way of propitiating him, said Cebes; I am sure that you have answered the argument about harmony in a manner that I could never have expected. For when Simmias mentioned his objection, I quite imagined that no answer could be

given to him, and therefore I was surprised at finding that this argument could not sustain the first onset of yours, and not impossibly the other, whom you call Cadmus, may share a similar fate.

Nay, my good friend, said Socrates, let us not boast, lest some evil eye should put to flight the word which I am about to speak. That, however, may be left in the hands of those above; while I draw near in Homeric fashion, and try the mettle of your words. Briefly, the sum of your objection is as follows: — You want to have proven to you that the soul is imperishable and immortal, and you think that the philosopher who is confident in death has but a vain and foolish confidence, if he thinks that he will fare better than one who has led another sort of life, in the world below, unless he can prove this: and you say that the demonstration of the strength and divinity of the soul, and of her existence prior to our becoming men, does not necessarily imply her immortality. Granting that the soul is longlived, and has known and done much in a former state, still she is not on that account immortal; and her entrance into the human form may be a sort of disease which is the beginning of dissolution, and may at last, after the toils of life are over, end in that which is called death. And whether the soul enters into the body once only or many times, that, as you would say, makes no difference in the fears of individuals. For any man, who is not devoid of natural feeling, has reason to fear, if he has no knowledge or proof of the soul's immortality. That is what I suppose you to say, Cebes, which I designedly repeat, in order that nothing may escape us, and that you may, if you wish, add or subtract anything.

But, said Cebes, as far as I see at present, I have nothing to add or subtract; you have expressed my meaning.

Socrates paused awhile, and seemed to be absorbed in reflection. At length he said: This is a very serious inquiry which you are raising, Cebes, involving the whole question of generation and corruption, about which I will, if you like, give you my own experience; and you can apply this, if you think that anything which I say will avail towards the solution of your difficulty.

I should very much like, said Cebes, to hear what you have to say.

Then I will tell you, said Socrates. When I was young, Cebes, I had a prodigious desire to know that department of philosophy which is called Natural Science; this appeared to me to have lofty aims, as being the science which has to do with the causes of things, and which teaches why a thing is, and is created and destroyed; and I was always agitating myself with the consideration of such questions as these: — Is the growth of animals the result of some decay which the hot and cold principle contract, as some have said? Is the blood the element with which we think, or the air, or the fire? or perhaps nothing of this sort — but the brain may be the originating power of the perceptions of hearing and sight and smell, and memory and opinion may come from them, and science may be based on memory and opinion when no longer in motion, but at rest. And then I went on to examine the decay of them, and then to the things of heaven and earth, and at last I concluded that I was wholly incapable of these inquiries, as I will satisfactorily prove to you. For I was fascinated by them to such a degree that my eyes grew blind to things that I had seemed to myself, and also to others, to know quite well; and I forgot what I had before thought to be self-evident, that the growth of man is the result of eating and drinking; for when by the digestion of

food flesh is added to flesh and bone to bone, and whenever there is an aggregation of congenial elements, the lesser bulk becomes larger and the small man greater. Was not that a reasonable notion?

Yes, said Cebes, I think so.

Well; but let me tell you something more. There was a time when I thought that I understood the meaning of greater and less pretty well; and when I saw a great man standing by a little one, I fancied that one was taller than the other by a head; or one horse would appear to be greater than another horse: and still more clearly did I seem to perceive that ten is two more than eight, and that two cubits are more than one, because two is twice one.

And what is now your notion of such matters? said Cebes.

I should be far enough from imagining, he replied, that I knew the cause of any of them, indeed I should, for I can not satisfy myself that when one is added to one, the one to which the addition is made becomes two, or that the two units added together make two by reason of the addition. For I cannot understand how, when separated from the other, each of them was one and not two, and now, when they are brought together, the mere juxtaposition of them can be the cause of their becoming two: nor can I understand how the division of one is the way to make two; for then a different cause would produce the same effect, — as in the former instance the addition and juxtaposition of one to one was the cause of two, in this the separation and subtraction of one from the other would be the cause. Nor am I any longer satisfied that I understand the reason why one or anything else either is generated or destroyed or is at all, but I have in my mind some confused notion of another method, and can never admit this.

Then I heard some one who had a book of Anaxagoras, as he said, out of which he read that mind was the disposer and cause of all, and I was quite delighted at the notion of this, which appeared admirable, and I said to myself: If mind is the disposer, mind will dispose all for the best, and put each particular in the best place; and I argued that if any one desired to find out the cause of the generation or destruction or existence of anything, he must find out what state of being or suffering or doing was best for that thing, and therefore a man had only to consider the best for himself and others, and then he would also know the worse, for that the same science comprised both. And I rejoiced to think that I had found in Anaxagoras a teacher of the causes of existence such as I desired, and I imagined that he would tell me first whether the earth is flat or round; and then he would further explain the cause and the necessity of this, and would teach me the nature of the best and show that this was best; and if he said that the earth was in the centre, he would explain that this position was the best, and I should be satisfied if this were shown to me, and not want any other sort of cause. And I thought that I would then go on and ask him about the sun and moon and stars, and that he would explain to me their comparative swiftness, and their returnings and various states, and how their several affections, active and passive, were all for the best. For I could not imagine that when he spoke of mind as the disposer of them, he would give any other account of their being as they are, except that this was best; and I thought that when he had explained to me in detail the cause of each and the cause of all, he would go on to explain to me what was best for each and what was best for all. I had hopes which I would not have sold for much, and I seized the books and read them as fast as

I could in my eagerness to know the better and the worse.

What hopes I had formed, and how grievously was I disappointed! As I proceeded, I found my philosopher altogether forsaking mind or any other principle of order, but having recourse to air, and ether, and water, and other eccentricities. I might compare him to a person who began by maintaining generally that mind is the cause of the actions of Socrates, but who, when he endeavored to explain the causes of my several actions in detail, went on to show that I sit here because my body is made up of bones and muscles; and the bones, as he would say, are hard and have ligaments which divide them, and the muscles are elastic, and they cover the bones, which have also a covering or environment of flesh and skin which contains them; and as the bones are lifted at their joints by the contraction or relaxation of the muscles, I am able to bend my limbs, and this is why I am sitting here in a curved posture; — that is what he would say, and he would have a similar explanation of my talking to you, which he would attribute to sound, and air, and hearing, and he would assign ten thousand other causes of the same sort, forgetting to mention the true cause, which is, that the Athenians have thought fit to condemn me, and accordingly I have thought it better and more right to remain here and undergo my sentence; for I am inclined to think that these muscles and bones of mine would have gone off to Megara or Boeotia — by the dog of Egypt they would, if they had been guided only by their own idea of what was best, and if I had not chosen as the better and nobler part, instead of playing truant and running away, to undergo any punishment which the state inflicts. There is surely a strange confusion of causes and conditions in all this. It may be said,

indeed, that without bones and muscles and the other parts of the body I can not execute my purposes. But to say that I do as I do because of them, and that this is the way in which mind acts, and not from the choice of the best, is a very careless and idle mode of speaking. I wonder that they can not distinguish the cause from the condition, which the many, feeling about in the dark, are always mistaking and misnaming. And thus one man makes a vortex all round and steadies the earth by the heaven; another gives the air as a support to the earth, which is a sort of broad trough. Any power which in disposing them as they are disposes them for the best never enters into their minds, nor do they imagine that there is any superhuman strength in that; they rather expect to find another Atlas of the world who is stronger and more everlasting and more containing than the good is, and are clearly of opinion that the obligatory and containing power of the good is as nothing; and yet this is the principle which I would fain learn if any one would teach me. But as I have failed either to discover myself, or to learn of any one else, the nature of the best, I will exhibit to you, if you like, what I have found to be the second best mode of inquiring into the cause.

I should very much like to hear that, he replied.

Socrates proceeded: — I thought that as I had failed in the contemplation of true existence, I ought to be careful that I did not lose the eye of my soul; as people may injure their bodily eye by observing and gazing on the sun during an eclipse, unless they take the precaution of only looking at the image reflected in the water, or in some similar medium. That occurred to me, and I was afraid that my soul might be blinded altogether if I looked at things with my eyes or tried by the help of the senses to apprehend them. And I thought that I had better have recourse to

ideas, and seek in them the truth of existence. I dare say that the simile is not perfect — for I am very far from admitting that he who contemplates existences through the medium of ideas, sees them only " through a glass darkly," any more than he who sees them in their working and effects. However, this was the method which I adopted: I first assumed some principle which I judged to be the strongest, and then I affirmed as true whatever seemed to agree with this, whether relating to the cause or to anything else; and that which disagreed I regarded as untrue. But I should like to explain my meaning clearly, as I do not think that you understand me.

No indeed, replied Cebes, not very well.

There is nothing new, he said, in what I am about to tell you; but only what I have been always and everywhere repeating in the previous discussion and on other occasions: I want to show you the nature of that cause which has occupied my thoughts, and I shall have to go back to those familiar words which are in the mouth of every one, and first of all assume that there is an absolute beauty and goodness, and greatness, and the like; grant me this, and I hope to be able to show you the nature of the cause, and to prove the immortality of the soul.

Cebes said: You may proceed at once with the proof, as I readily grant you this.

Well, he said, then I should like to know whether you agree with me in the next step; for I can not help thinking that if there be anything beautiful other than absolute beauty, that can only be beautiful in as far as it partakes of absolute beauty — and this I should say of everything. Do you agree in this notion of the cause?

Yes, he said, I agree.

He proceeded: I know nothing and can understand

nothing of any other of those wise causes which are alleged; and if a person says to me that the bloom of color, or form, or anything else of that sort is a source of beauty, I leave all that, which is only confusing to me, and simply and singly, and perhaps foolishly, hold and am assured in my own mind that nothing makes a thing beautiful but the presence and participation of beauty in whatever way or manner obtained; for as to the manner I am uncertain, but I stoutly contend that by beauty all beautiful things become beautiful. That appears to me to be the only safe answer that I can give, either to myself or to any other, and to that I cling, in the persuasion that I shall never be overthrown, and that I may safely answer to myself or any other, that by beauty beautiful things become beautiful. Do you not agree to that?

Yes, I agree.

And that by greatness only great things become great and greater greater, and by smallness the less become less.

True.

Then if a person remarks that A is taller by a head than B, and B less by a head than A, you would refuse to admit this, and would stoutly contend that what you mean is only that the greater is greater by, and by reason of, greatness, and the less is less only by, or by reason of, smallness; and thus you would avoid the danger of saying that the greater is greater and the less less by the measure of the head, which is the same in both, and would also avoid the monstrous absurdity of supposing that the greater man is greater by reason of the head, which is small. Would you not be afraid of that?

Indeed, I should, said Cebes, laughing.

In like manner you would be afraid to say that ten exceeded eight by, and by reason of, two; but

would say by, and by reason of, number; or that two cubits exceed one cubit by a half, but by magnitude? — that is what you would say, for there is the same danger in both cases.

Very true, he said.

Again, would you not be cautious of affirming that the addition of one to one, or the division of one, is the cause of two? And you would loudly asseverate that you know of no way in which anything comes into existence except by participation in its own proper essence, and consequently, as far as you know, the only cause of two is the participation in duality; that is, the way to make two, and the participation in one is the way to make one. You would say: I will let alone puzzles of division and addition — wiser heads than mine may answer them; inexperienced as I am, and ready to start, as the proverb says, at my own shadow, I can not afford to give up the sure ground of a principle. And if any one assails you there, you would not mind him, or answer him, until you had seen whether the consequences which follow agree with one another or not, and when you are further required to give an explanation of this principle, you would go on to assume a higher principle, and the best of the higher ones until you found a resting-place; but you would not confuse the principle and the consequences in your reasoning, like the Eristics — at least if you wanted to discover real existence. Not that this confusion signifies to them who never care or think about the matter at all, for they have the wit to be well pleased with themselves however great may be the turmoil of their ideas. But you, if you are a philosopher, will, I believe, do as I say.

What you say is most true, said Simmias and Cebes, both speaking at once.

Ech. Yes, Phaedo; and I don't wonder at their

assenting. Any one who has the least sense will acknowledge the wonderful clearness of Socrates' reasoning.

Phaed. Certainly, Echecrates; and that was the feeling of the whole company at the time.

Ech. Yes, and equally of ourselves, who were not of the company, and are now listening to your recital. But what followed?

Phaed. After all this was admitted, and they had agreed about the existence of ideas and the participation in them of the other things which derive their names from them, Socrates, if I remember rightly, said: —

This is your way of speaking; and yet when you say that Simmias is greater than Socrates and less than Phaedo, do you not predicate of Simmias both greatness and smallness?

Yes, I do.

But still you allow that Simmias does not really exceed Socrates, as the words may seem to imply, because he is Simmias, but by reason of the size which he has; just as Simmias does not exceed Socrates because he is Simmias, any more than because Socrates is Socrates, but because he has smallness when compared with the greatness of Simmias?

True.

And if Phaedo exceeds him in size, this is not because Phaedo is Phaedo, but because Phaedo has greatness relatively to Simmias, who is comparatively smaller?

That is true.

And therefore Simmias is said to be great, and is also said to be small, because he is in a mean between them, exceeding the smallness of the one by his greatness, and allowing the greatness of the other to exceed his smallness. He added, laughing, I am speaking

like a book, but I believe that what I am saying is true.

Simmias assented to this.

The reason why I say this, is that I want you to agree with me in thinking, not only that absolute greatness will never be great and also small, but that greatness in us or in the concrete will never admit the small or admit of being exceeded: instead of this one of two things will happen, either the greater will fly or retire before the opposite, which is the less, or at the advance of the less will cease to exist; but will not, if allowing or admitting smallness, be changed by that; even as I, having received and admitted smallness when compared with Simmias, remain just as I was, and am the same small person. And as the idea of greatness can not condescend ever to be or become small, in like manner the smallness in us can not be or become great; nor can any other opposite which remains the same ever be or become its own opposite, but either passes away or perishes in the change.

That, replied Cebes, is quite my notion.

One of the company, though I do not exactly remember which of them, on hearing this, said: By heaven, is not this the direct contrary of what was admitted before — that out of the greater came the less and out of the less the greater, and that opposites were simply generated from opposites; whereas now this seems to be utterly denied.

Socrates inclined his head to the speaker and listened. I like your courage, he said, in reminding us of this. But you do not observe that there is a difference in the two cases. For then we were speaking of opposites in the concrete, and now of the essential opposite which, as is affirmed, neither in us nor in nature can ever be at variance with itself: then, my

friend, we were speaking of things in which opposites are inherent and which are called after them, but now about the opposites which are inherent in them and which give their name to them; these essential opposites will never, as we maintain, admit of generation into or out of one another. At the same time, turning to Cebes, he said: Were you at all disconcerted, Cebes, at our friend's objection?

That was not my feeling, said Cebes; and yet I can not deny that I am apt to be disconcerted.

Then we are agreed after all, said Socrates, that the opposite will never in any case be opposed to itself?

To that we are quite agreed, he replied.

Yet once more let me ask you to consider the question from another point of view, and see whether you agree with me: — There is a thing which you term heat, and another thing which you term cold?

Certainly.

But are they the same as fire and snow?

Most assuredly not.

Heat is not the same as fire, nor is cold the same as snow?

No.

And yet you will surely admit, that when snow, as was before said, is under the influence of heat, they will not remain snow and heat; but at the advance of the heat, the snow will either retire or perish?

Very true, he replied.

And the fire too at the advance of the cold will either retire or perish; and when the fire is under the influence of the cold, they will not remain as before, fire and cold.

That is true, he said.

And in some cases the name of the idea is not confined to the idea; but anything else which, not being

the idea, exists only in the form of the idea, may also lay claim to it. I will try to make this clearer by an example: — The odd number is always called by the name of odd?

Very true.

But is this the only thing which is called odd? Are there not other things which have their own name, and yet are called odd, because, although not the same as oddness, they are never without oddness? — that is what I mean to ask — whether numbers such as the number three are not of the class of odd. And there are many other examples: would you not say, for example, that three may be called by its proper name, and also be called odd, which is not the same with three? and this may be said not only of three but also of five, and every alternate number — each of them without being oddness is odd, and in the same way two and four, and the whole series of alternate numbers, has every number even, without being evenness. Do you admit that?

Yes, he said, how can I deny that?

Then now mark the point at which I am aiming: — not only do essential opposites exclude one another, but also concrete things, which, although not in themselves opposed, contain opposites; these, I say, also reject the idea which is opposed to that which is contained in them, and at the advance of that they either perish or withdraw. There is the number three for example; — will not that endure annihilation or anything sooner than be converted into an even number, remaining three?

Very true, said Cebes.

And yet, he said, the number two is certainly not opposed to the number three?

It is not.

Then not only do opposite ideas repel the advance

of one another, but also there are other things which repel the approach of opposites.

That is quite true, he said.

Suppose, he said, that we endeavor, if possible, to determine what these are.

By all means.

Are they not, Cebes, such as compel the things of which they have possession, not only to take their own form, but also the form of some opposite?

What do you mean?

I mean, as I was just now saying, and have no need to repeat to you, that those things which are possessed by the number three must not only be three in number, but must also be odd.

Quite true.

And on this oddness, of which the number three has the impress, the opposite idea will never intrude?

No.

And this impress was given by the odd principle?

Yes.

And to the odd is opposed the even?

True.

Then the idea of the even number will never arrive at three?

No.

Then three has no part in the even?

None.

Then the triad or number three is uneven?

Very true.

To return then to my distinction of natures which are not opposites, and yet do not admit opposites: as in this instance, three, although not opposed to the even, does not any the more admit of the even, but always brings the opposite into play on the other side; or as two does not receive the odd, or fire the cold — from these examples (and there are many more of

them) perhaps you may be able to arrive at the general conclusion, that not only opposites will not receive opposites, but also that nothing which brings the opposite will admit the opposite of that which it brings in that to which it is brought. And here let me recapitulate — for there is no harm in repetition. The number five will not admit the nature of the even, any more than ten, which is the double of five, will admit the nature of the odd — the double, though not strictly opposed to the odd, rejects the odd altogether. Nor again will parts in the ratio of 3:2, nor any fraction in which there is a half, nor again in which there is a third, admit the notion of the whole, although they are not opposed to the whole. You will agree to that?

Yes, he said, I entirely agree and go along with you in that.

And now, he said, I think that I may begin again; and to the question which I am about to ask I will beg you to give not the old safe answer, but another, of which I will offer you an example; and I hope that you will find in what has been just said another foundation which is as safe. I mean that if any one asks you "what that is, the inherence of which makes the body hot," you will reply not heat (this is what I call the safe and stupid answer), but fire, a far better answer, which we are now in a condition to give. Or if any one asks you "why a body is diseased," you will not say from disease, but from fever; and instead of saying that oddness is the cause of odd numbers, you will say that monad is the cause of them: and so of things in general, as I dare say that you will understand sufficiently without my adducing any further examples.

Yes, he said, I quite understand you.

Tell me, then, what is that the inherence of which will render the body alive?

The soul, he replied.

And is this always the case?

Yes, he said, of course.

Then whatever the soul possesses, to that she comes bearing life?

Yes, certainly.

And is there any opposite to life?

There is, he said.

And what is that?

Death.

Then the soul, as has been acknowledged, will never receive the opposite of what she brings. And now, he said, what did we call that principle which repels the even?

The odd.

And that principle which repels the musical, or the just?

The unmusical, he said, and the unjust.

And what do we call that principle which does not admit of death?

The immortal, he said.

And does the soul admit of death?

No.

Then the soul is immortal?

Yes, he said.

And may we say that this is proven?

Yes, abundantly proven, Socrates, he replied.

And supposing that the odd were imperishable, must not three be imperishable?

Of course.

And if that which is cold were imperishable, when the warm principle came attacking the snow, must not the snow have retired whole and unmelted — for

it could never have perished, nor could it have remained and admitted the heat?

True, he said.

Again, if the uncooling or warm principle were imperishable, the fire when assailed by cold would not have perished or have been extinguished, but would have gone away unaffected?

Certainly, he said.

And the same may be said of the immortal: if the immortal is also imperishable, the soul when attacked by death can not perish; for the preceding argument shows that the soul will not admit of death, or ever be dead, any more than three or the odd number will admit of the even, or fire, or the heat in the fire, of the cold. Yet a person may say: "But although the odd will not become even at the approach of the even, why may not the odd perish and the even take the place of the odd?" Now to him who makes this objection, we can not answer that the odd principle is imperishable; for this has not been acknowledged, but if this had been acknowledged, there would have been no difficulty in contending that at the approach of the even the odd principle and the number three took up their departure; and the same argument would have held good of fire and heat and any other thing.

Very true.

And the same may be said of the immortal: if the immortal is also imperishable, then the soul will be imperishable as well as immortal; but if not, some other proof of her imperishableness will have to be given.

No other proof is needed, he said; for if the immortal, being eternal, is liable to perish, then nothing is imperishable.

Yes, replied Socrates, all men will agree that God, and the essential form of life, and the immortal in general, will never perish.

Yes, all men, he said — that is true; and what is more, gods, if I am not mistaken, as well as men.

Seeing then that the immortal is indestructible, must not the soul, if she is immortal, be also imperishable?

Most certainly.

Then when death attacks a man, the mortal portion of him may be supposed to die, but the immortal goes out of the way of death and is preserved safe and sound?

True.

Then, Cebes, beyond question, the soul is immortal and imperishable, and our souls will truly exist in another world!

I am convinced, Socrates, said Cebes, and have nothing more to object; but if my friend Simmias, or any one else, has any further objection, he had better speak out, and not keep silence, since I do not know how there can ever be a more fitting time to which he can defer the discussion, if there is anything which he wants to say or have said.

But I have nothing more to say, replied Simmias; nor did I see any room for uncertainty, except that which arises necessarily out of the greatness of the subject and the feebleness of man, and which I can not help feeling.

Yes, Simmias, replied Socrates, that is well said: and more than that, first principles, even if they appear certain, should be carefully considered; and when they are satisfactorily ascertained, then, with a sort of hesitating confidence in human reason, you may, I think, follow the course of the argument; and if this is clear, there will be no need for any further inquiry.

That, he said, is true.

But then, O my friends, he said, if the soul is really immortal, what care should be taken of her, not only

in respect of the portion of time which is called life, but of eternity! And the danger of neglecting her from this point of view does indeed appear to be awful. If death had only been the end of all, the wicked would have had a good bargain in dying, for they would have been happily quit not only of their body, but of their own evil together with their souls. But now, as the soul plainly appears to be immortal, there is no release or salvation from evil except the attainment of the highest virtue and wisdom. For the soul when on her progress to the world below takes nothing with her but nurture and education; which are indeed said greatly to benefit or greatly to injure the departed, at the very beginning of his pilgrimage in the other world.

For after death, as they say, the genius of each individual, to whom he belonged in life, leads him to a certain place in which the dead are gathered together for judgment, whence they go into the world below, following the guide, who is appointed to conduct them from this world to the other: and when they have there received their due and remained their time, another guide brings them back again after many revolutions of ages. Now this journey to the other world is not, as Aeschylus says in the Telephus, a single and straight path — no guide would be wanted for that, and no one could miss a single path; but there are many partings of the road, and windings, as I must infer from the rites and sacrifices which are offered to the gods below in places where three ways meet on earth. The wise and orderly soul is conscious of her situation, and follows in the path; but the soul which desires the body, and which, as I was relating before, has long been fluttering about the lifeless frame and the world of sight, is after many struggles and many sufferings hardly and with violence carried away by

her attendant genius, and when she arrives at the place where the other souls are gathered, if she be impure and have done impure deeds, or been concerned in foul murders or other crimes which are the brothers of these, and the works of brothers in crime — from that soul every one flees and turns away; no one will be her companion, no one her guide, but alone she wanders in extremity of evil until certain times are fulfilled, and when they are fulfilled, she is borne irresistibly to her own fitting habitation; as every pure and just soul which has passed through life in the company and under the guidance of the gods has also her own proper home.

Now the earth has divers wonderful regions, and is indeed in nature and extent very unlike the notions of geographers, as I believe on the authority of one who shall be nameless.

What do you mean, Socrates? said Simmias. I have myself heard many descriptions of the earth, but I do not know in what you are putting your faith, and I should like to know.

Well, Simmias, replied Socrates, the recital of a tale does not, I think, require the art of Glaucus; and I know not that the art of Glaucus could prove the truth of my tale, which I myself should never be able to prove, and even if I could, I fear, Simmias, that my life would come to an end before the argument was completed. I may describe to you, however, the form and regions of the earth according to my conception of them.

That, said Simmias, will be enough.

Well then, he said, my conviction is, that the earth is a round body in the centre of the heavens, and therefore has no need of air or any similar force as a support, but is kept there and hindered from falling or inclining any way by equability of the surrounding

heaven and by her own equipoise. For that which, being in equipoise, is in the centre of that which is equably diffused, will not incline any way in any degree, but will always remain in the same state and not deviate. And this is my first notion.

Which is surely a correct one, said Simmias.

Also I believe that the earth is very vast, and that we who dwell in the region extending from the river Phasis to the Pillars of Heracles along the borders of the sea, are just like ants or frogs about a marsh, and inhabit a small portion only, and that many others dwell in many like places. For I should say that in all parts of the earth there are hollows of various forms and sizes, into which the water and the mist and the air collect; and that the true earth is pure and in the pure heaven, in which also are the stars — that is the heaven which is commonly spoken of as the ether, of which this is but the sediment collecting in the hollows of the earth. But we who live in these hollows are deceived into the notion that we are dwelling above on the surface of the earth; which is just as if a creature who was at the bottom of the sea were to fancy that he was on the surface of the water, and that the sea was the heaven through which he saw the sun and the other stars, — he having never come to the surface by reason of his feebleness and sluggishness, and having never lifted up his head and seen, nor ever heard from one who had seen, this other region which is so much purer and fairer than his own. Now this is exactly our case: for we are dwelling in a hollow of the earth, and fancy that we are on the surface; and the air we call the heaven, and in this we imagine that the stars move. But this is also owing to our feebleness and sluggishness, which prevent our reaching the surface of the air: for if any man could arrive at the exterior limit, or take the wings of a bird and

fly upward, like a fish who puts his head out and sees this world, he would see a world beyond; and, if the nature of man could sustain the sight, he would acknowledge that this was the place of the true heaven and the true light and the true stars. For this earth, and the stones, and the entire region which surrounds us, are spoiled and corroded, like the things in the sea which are corroded by the brine; for in the sea too there is hardly any noble or perfect growth, but clefts only, and sand, and an endless slough of mud; and even the shore is not to be compared to the fairer sights of this world. And greater far is the superiority of the other. Now of that upper earth which is under the heaven, I can tell you a charming tale, Simmias, which is well worth hearing.

And we, Socrates, replied Simmias, shall be charmed to listen.

The tale, my friend, he said, is as follows: — In the first place, the earth, when looked at from above, is like one of those balls which have leather coverings in twelve pieces, and is of divers colors, of which the colors which painters use on earth are only a sample. But there the whole earth is made up of them, and they are brighter far and clearer than ours; there is a purple of wonderful lustre, also the radiance of gold, and the white which is in the earth is whiter than any chalk or snow. Of these and other colors the earth is made up, and they are more in number and fairer than the eye of man has ever seen; and the very hollows (of which I was speaking) filled with air and water are seen like light flashing amid the other colors, and have a color of their own, which gives a sort of unity to the variety of earth. And in this fair region everything that grows — trees, and flowers, and fruits — are in a like degree fairer than any here; and there are hills, and stones in them in a like degree

smoother, and more transparent, and fairer in color than our highly-valued emeralds and sardonyxes and jaspers, and other gems, which are but minute fragments of them: for there all the stones are like our precious stones, and fairer still. The reason of this is, that they are pure, and not, like our precious stones, infected or corroded by the corrupt briny elements which coagulate among us, and which breed foulness and disease both in earth and stones, as well as in animals and plants. They are the jewels of the upper earth, which also shines with gold and silver and the like, and they are visible to sight and large and abundant and found in every region of the earth, and blessed is he who sees them. And upon the earth are animals and men, some in a middle region, others dwelling about the air as we dwell about the sea; others in islands which the air flows round, near the continent: and in a word, the air is used by them as the water and the sea are by us, and the ether is to them what the air is to us. Moreover, the temperament of their season is such that they have no disease, and live much longer than we do, and have sight and hearing and smell, and all the other senses, in far greater perfection, in the same degree that air is purer than water or the ether than air. Also they have temples and sacred places in which the gods really dwell, and they hear their voices and receive their answers, and are conscious of them and hold converse with them, and they see the sun, moon, and stars as they really are, and their other blessedness is of a piece with this.

Such is the nature of the whole earth, and of the things which are around the earth; and there are divers regions in the hollows on the face of the globe everywhere, some of them deeper and also wider than that which we inhabit, others deeper and with a nar-

rower opening than ours, and some are shallower and wider; all have numerous perforations, and passages broad and narrow in the interior of the earth, connecting them with one another; and there flows into and out of them, as into basins, a vast tide of water, and huge subterranean streams of perennial rivers, and springs hot and cold, and a great fire, and great rivers of fire, and streams of liquid mud, thin or thick (like the rivers of mud in Sicily, and the lava streams which follow them), and the regions about which they happen to flow are filled up with them. And there is a sort of swing in the interior of the earth which moves all this up and down. Now the swing is on this wise: — There is a chasm which is the vastest of them all, and pierces right through the whole earth; this is that which Homer describes in the words: —

> "Far off, where is the inmost depth beneath the earth;"

and which he in other places, and many other poets, have called Tartarus. And the swing is caused by the streams flowing into and out of this chasm, and they each have the nature of the soil through which they flow. And the reason why the streams are always flowing in and out, is that the watery element has no bed or bottom, and is surging and swinging up and down, and the surrounding wind and air do the same; they follow the water up and down, hither and thither, over the earth — just as in respiring the air is always in process of inhalation and exhalation; — and the wind swinging with the water in and out produces fearful and irresistible blasts: when the waters retire with a rush into the lower parts of the earth, as they are called, they flow through the earth into those regions, and fill them up as with the alternate motion of a pump, and then when they leave those regions and rush back hither, they again fill the hollows here,

and when these are filled, flow through subterranean channels and find their way to their several places, forming seas, and lakes, and rivers, and springs. Thence they again enter the earth, some of them making a long circuit into many lands, others going to few places and those not distant; and again fall into Tartarus, some at a point a good deal lower than that at which they rose, and others not much lower, but all in some degree lower than the point of issue. And some burst forth again on the opposite side, and some on the same side, and some wind round the earth with one or many folds like the coils of a serpent, and descend as far as they can, but always return and fall into the lake. The rivers on either side can descend only to the centre and no further, for to the rivers on both sides the opposite side is a precipice.

Now these rivers are many, and mighty, and diverse, and there are four principle ones, of which the greatest and outermost is that called Oceanus, which flows round the earth in a circle; and in the opposite direction flows Acheron, which passes under the earth through desert places, into the Acherusian lake: this is the lake to the shores of which the souls of the many go when they are dead, and after waiting an appointed time, which is to some a longer and to some a shorter time, they are sent back again to be born as animals. The third river rises between the two, and near the place of rising pours into a vast region of fire, and forms a lake larger than the Mediterranean Sea, boiling with water and mud; and proceeding muddy and turbid, and winding about the earth, comes, among other places, to the extremities of the Acherusian lake, but mingles not with the waters of the lake, and after making many coils about the earth plunges into Tartarus at a deeper level. This is that Pyriphlegethon, as the stream is called, which throws up jets of

fire in all sorts of places. The fourth river goes out on the opposite side, and falls first of all into a wild and savage region, which is all of a dark blue color, like lapis lazuli; and this is that river which is called the Stygian river, and falls into and forms the Lake Styx, and after falling into the lake and receiving strange powers in the waters, passes under the earth, winding round in the opposite direction to Pyriphlegethon and meeting in the Acherusian lake from the opposite side. And the water of this river too mingles with no other, but flows round in a circle and falls into Tartarus over against Pyriphlegethon; and the name of this river, as the poets say, is Cocytus.

Such is the nature of the other world; and when the dead arrive at the place to which the genius of each severally conveys them, first of all, they have sentence passed upon them, as they have lived well and piously or not. And those who appear to have lived neither well nor ill, go to the river Acheron, and mount such conveyances as they can get, and are carried in them to the lake, and there they dwell and are purified of their evil deeds, and suffer the penalty of the wrongs which they have done to others, and are absolved, and receive the rewards of their good deeds according to their deserts. But those who appear to be incurable by reason of the greatness of their crimes — who have committed many and terrible deeds of sacrilege, murders foul and violent, or the like — such are hurled into Tartarus which is their suitable destiny, and they never come out. Those again who have committed crimes, which, although great, are not unpardonable — who in a moment of anger, for example, have done violence to a father or a mother, and have repented for the remainder of their lives, or, who have taken the life of another under the like extenuating circumstances — these are plunged into Tartarus, the pains

of which they are compelled to undergo for a year, but at the end of the year the wave casts them forth — mere homicides by way of Cocytus, parricides and matricides by Pyriphlegethon — and they are borne to the Acherusian lake, and there they lift up their voices and call upon the victims whom they have slain or wronged, to have pity on them, and to receive them, and to let them come out of the river into the lake. And if they prevail, then they come forth and cease from their troubles; but if not, they are carried back again into Tartarus and from thence into the rivers unceasingly, until they obtain mercy from those whom they have wronged: for that is the sentence inflicted upon them by their judges. Those also who are remarkable for having led holy lives are released from this earthly prison, and go to their pure home which is above, and dwell in the purer earth; and those who have duly purified themselves with philosophy, live henceforth altogether without the body, in mansions fairer far than these, which may not be described, and of which the time would fail me to tell.

Wherefore, Simmias, seeing all these things, what ought not we to do in order to obtain virtue and wisdom in this life? Fair is the prize, and the hope great!

I do not mean to affirm that the description which I have given of the soul and her mansions is exactly true — a man of sense ought hardly to say that. But I do say that, inasmuch as the soul is shown to be immortal, he may venture to think, not improperly or unworthily, that something of the kind is true. The venture is a glorious one, and he ought to comfort himself with words like these, which is the reason why I lengthen out the tale. Wherefore, I say, let a man be of good cheer about his soul, who has cast away the pleasures and ornaments of the body as alien

to him, and rather hurtful in their effects, and has followed after the pleasures of knowledge in this life; who has adorned the soul in her own proper jewels, which are temperance, and justice, and courage, and nobility, and truth — in these arrayed she is ready to go on her journey to the world below, when her time comes. You, Simmias and Cebes, and all other men, will depart at some time or other. Me already, as the tragic poet would say, the voice of fate calls. Soon I must drink the poison; and I think that I had better repair to the bath first, in order that the women may not have the trouble of washing my body after I am dead.

When he had done speaking, Crito said: And have you any commands for us, Socrates — anything to say about your children, or any other matter in which we can serve you?

Nothing particular, he said: only, as I have always told you, I would have you look to yourselves; that is a service which you may always be doing to me and mine as well as to yourselves. And you need not make professions; for if you take no thought for yourselves, and walk not according to the precepts which I have given you, not now for the first time, the warmth of your professions will be of no avail.

We will do our best, said Crito. But in what way would you have us bury you?

In any way that you like; only you must get hold of me, and take care that I do not walk away from you. Then he turned to us, and added with a smile: — I can not make Crito believe that I am the same Socrates who has been talking and conducting the argument; he fancies that I am the other Socrates whom he will soon see, a dead body — and he asks, How shall he bury me? And though I have spoken many words in the endeavor to show that when I have

drunk the poison I shall leave you and go to the joys of the blessed, — these words of mine, with which I comforted you and myself, have had, as I perceive, no effect upon Crito. And therefore I want you to be surety for me now, as he was surety for me at the trial: but let the promise be of another sort; for he was my surety to the judges that I would remain, but you must be my surety to him that I shall not remain, but go away and depart; and then he will suffer less at my death, and not be grieved when he sees my body being burned or buried. I would not have him sorrow at my hard lot, or say at the burial, Thus we lay out Socrates, or, Thus we follow him to the grave or bury him; for false words are not only evil in themselves, but they infect the soul with evil. Be of good cheer, then, my dear Crito, and say that you are burying my body only, and do with that as is usual, and as you think best.

When he had spoken these words, he arose and went into the bath-chamber with Crito, who bid us wait; and we waited, talking and thinking of the subject of discourse, and also of the greatness of our sorrow; he was like a father of whom we were being bereaved, and we were about to pass the rest of our lives as orphans. When he had taken the bath his children were brought to him — (he had two young sons and an elder one); and the women of his family also came, and he talked to them and gave them a few directions in the presence of Crito; and he then dismissed them and returned to us.

Now the hour of sunset was near, for a good deal of time had passed while he was within. When he came out, he sat down with us again after his bath, but not much was said. Soon the jailer, who was the servant of the eleven, entered and stood by him, saying: — To you, Socrates, whom I know to be the

noblest and gentlest and best of all who ever came to this place, I will not impute the angry feelings of other men, who rage and swear at me, when, in obedience to the authorities, I bid them drink the poison — indeed, I am sure that you will not be angry with me; for others, as you are aware, and not I, are the guilty cause. And so fare you well, and try to bear lightly what must needs be; you know my errand. Then bursting into tears he turned away and went out.

Socrates looked at him and said: I return your good wishes, and will do as you bid. Then turning to us, he said, How charming the man is: since I have been in prison he has always been coming to see me, and at times he would talk to me, and was as good as could be to me, and now see how generously he sorrows for me. But we must do as he says, Crito; let the cup be brought, if the poison is prepared: if not, let the attendant prepare some.

Yet, said Crito, the sun is still upon the hill-tops, and many a one has taken the draught late, and after the announcement has been made to him, he has eaten and drunk, and indulged in sensual delights; do not hasten then, there is still time.

Socrates said: Yes, Crito, and they of whom you speak are right in doing thus, for they think that they will gain by the delay; but I am right in not doing thus, for I do not think that I should gain anything by drinking the poison a little later; I should be sparing and saving a life which is already gone; I could only laugh at myself for this. Please then to do as I say, and not to refuse me.

Crito, when he heard this, made a sign to the servant; and the servant went in, and remained for some time, and then returned with the jailer carrying the cup of poison. Socrates said: You, my good friend,

who are experienced in these matters, shall give me directions how I am to proceed. The man answered: You have only to walk about until your legs are heavy, and then to lie down, and the poison will act. At the same time he handed the cup to Socrates, who in the easiest and gentlest manner, without the least fear or change of color or feature, looking at the man with all his eyes, Echecrates, as his manner was, took the cup and said: What do you say about making a libation out of this cup to any god? May I, or not? The man answered: We only prepare, Socrates, just so much as we deem enough. I understand, he said: yet I may and must pray to the gods to prosper my journey from this to that other world — may this then, which is my prayer, be granted to me. Then holding the cup to his lips, quite readily and cheerfully he drank off the poison. And hitherto most of us had been able to control our sorrow; but now when we saw him drinking, and saw too that he had finished the draught, we could no longer forbear, and in spite of myself my own tears were flowing fast; so that I covered my face and wept over myself, for certainly I was not weeping over him, but at the thought of my own calamity in having lost such a companion. Nor was I the first, for Crito, when he found himself unable to restrain his tears, had got up and moved away, and I followed; and at that moment, Apollodorus, who had been weeping all the time, broke out into a loud cry which made cowards of us all. Socrates alone retained his calmness: What is this strange outcry? he said. I sent away the women mainly in order that they might not offend in this way, for I have heard that a man should die in peace. Be quiet then, and have patience. When we heard that, we were ashamed, and refrained our tears; and he walked about until, as he said, his legs began to fail, and then

he lay on his back, according to the directions, and the man who gave him the poison now and then looked at his feet and legs; and after a while he pressed his foot hard, and asked him if he could feel; and he said, No; and then his leg, and so upwards and upwards, and showed us that he was cold and stiff. And he felt then himself and said: When the poison reaches the heart, that will be the end. He was beginning to grow cold about the groin, when he uncovered his face, for he had covered himself up, and said (they were his last words) — he said: Crito, I owe a cock to Asclepius; will you remember to pay the debt? The debt shall be paid, said Crito; is there anything else? There was no answer to this question; but in a minute or two a movement was heard, and the attendants uncovered him; his eyes were set, and Crito closed his eyes and mouth.

Such was the end, Echecrates, of our friend, whom I may truly call the wisest, and justest, and best of all men whom I have ever known.

THE SYMPOSIUM

INTRODUCTION

Of all the works of Plato the Symposium is the most perfect in form, and may be truly thought to contain more than any commentator has ever dreamed of; or, as Goethe said of one of his own writings, more than the author himself knew. For in philosophy as in prophecy glimpses of the future may often be conveyed in words which could hardly have been understood or interpreted at the time when they were uttered. More than any other Platonic work the Symposium is Greek both in style and subject, having a beauty "as of a statue," while the companion Dialogue of the Phaedrus is marked by a sort of Gothic irregularity. More too than in any other part of his writings, Plato is emancipated from former philosophies. The genius of Greek art seems to triumph over the traditions of Pythagorean, Eleatic, or Megarian systems, and "the old quarrel of poetry and philosophy" has at least a superficial reconcilement.

An unknown person who had heard of the discourses in praise of love spoken by Socrates and others at the banquet of Agathon, is desirous of having an authentic account of them, which he thinks that he can obtain from Apollodorus, the same excitable, or rather "mad" friend of Socrates, who has already appeared in the Phaedo. He had imagined that the discourses were recent. There he is mistaken: but they are still fresh in the memory of his informant, who had just been repeating them to Glaucon, and is quite prepared to have another rehearsal of them in a walk from the Piraeus to Athens. He had not indeed been present himself, but he had heard them from the best authority. Aristodemus, who is described as having been in past times a sort of humble but inseparable attendant of Socrates, had reported them to him.

The narrative which he had heard was as follows: —

Aristodemus meeting Socrates in holiday attire, is invited by him to a banquet at the house of Agathon, who had been sacrificing in thanksgiving for his tragic victory on the day previous. But no sooner has he entered the house than he finds that Socrates is missing — he has stayed behind in a fit of abstraction, and does not appear until the banquet is half over.

Some raillery passes between him and the host, and then the question is asked, "What shall they do about drinking? as they had been all well drunk on the day before, and drinking on two successive days is a bad thing." This is confirmed by the authority of Eryximachus the physician, who further proposes that instead of listening to the flute-girl and her "noise" they shall hold discourses in honor of love, one after another, going from left to right as they are sitting at the table. All of them agree to this, and Phaedrus, who is the "father" of the idea which he has previously communicated to Eryximachus, begins as follows: —

He descants first of all upon the antiquity of love, which is proved by the authority of the poets, and then upon the benefits which he gives to man. The greatest of these is the sense of honor and dishonor. The lover is ashamed to be seen by the beloved doing or suffering any cowardly or mean act. And a state or army which was made up only of lovers and their loves would be invincible. For love will convert the veriest coward into an inspired hero.

And there have been true loves not only of men but of women also. Such was the love of Alcestis, who dared to die for her husband, and as a reward was allowed to come again from the dead. But Orpheus, the cowardly harper, who went down to Hades alive, that he might bring back his wife, was mocked with an apparition only, and the gods afterwards contrived his death as a punishment of his impudence. The hero Achilles affords an instance of similar devotion; for he was willing to avenge his lover Patroclus, although he knew that his own death would immediately follow: and the gods, who honor the love of the beloved above that of the lover, rewarded him, and sent him to the islands of the blest.

Pausanias, who was sitting next, then takes up the tale. He says that Phaedrus should have distinguished the heavenly love from the earthly, before he praised either. For there are two loves, as there are two Aphrodites — one the heavenly, who has no mother and is the elder and wiser goddess, and the other, the daughter of Zeus and Dione, who is popular and common. The first of the two loves has a noble purpose, and delights only in the intelligent nature of man, and is faithful to the end, and has no shadow of wantonness or lust. The second is the coarser kind of love, which is a love of the body rather than of the soul, and is apt to be a love of women and boys as well as of men. Now actions vary according to the manner of their performance; and

this applies to love as well as to every other sort of action. Moreover there is a difference of opinion about the propriety of male loves. Some, like the Boeotians, approve of them; others, like the Ionians, and most of the barbarians, disapprove of them; partly because they are aware of the political dangers which ensue from them, as may be seen in the instance of Harmodius and Aristogeiton. At Athens and Sparta there is an apparent contradiction about them. For at times they are encouraged, and then the lover is allowed to play all sorts of fantastic tricks; he may swear and forswear himself (and "at lovers' perjuries they say Jove laughs"); he may be a servant, and lie on a mat at the door of his love, without any loss of character; but there are also times when elders look grave and guard their young relations, and personal remarks are made. The truth is that some of these loves are disgraceful and others honorable. The vulgar love of the body which takes wings and flies away when the bloom of youth is over, is disgraceful, as is also the interested love of power or wealth; but the love of the noble mind is lasting. The lover should be tested, and the beloved should not be too ready to yield. The rule in our country is that the beloved may do the same service to the lover in the way of virtue which the lover may do to him.

This voluntary service rendered for the sake of virtue and wisdom is permitted among us; and when these two customs — one the love of youth, the other the practice of virtue and philosophy — meet in one, then the lovers may lawfully unite. Nor is there any disgrace to a disinterested lover in being deceived: but the interested lover is doubly disgraced, for if he loses his love he loses his character; whereas the noble love of the other remains the same, although the object of his love is unworthy: for nothing can be nobler than love for the sake of virtue. This is that love of the heavenly goddess which is of great price to individuals and cities, making them work together for their improvement.

The turn of Aristophanes comes next; but he has the hiccough, and therefore proposes that Eryximachus the physician shall cure him or speak in his turn. Eryximachus is ready to do both, and speaks as follows: —

He agrees with Pausanias in maintaining that there are two kinds of love; but his art has led him to the conclusion that the empire of this double love extends over all things, and is to be found in animals and plants as well as in man. In the human body also there are two loves; and the art of medicine shows

which is the good and which is the bad love, and persuades the body to accept the good and reject the bad, and reconciles conflicting elements and makes them friends. Every art, gymnastic and husbandry as well as medicine, is the reconciliation of opposites; and this is what Heracleitus meant, when he spoke of a harmony of opposites: but in strictness he should rather have spoken of a harmony which succeeds opposites, for an agreement of disagreements there can not be. Music too is concerned with the principles of love in their application to harmony and rhythm. In the abstract, all is simple, and we are not troubled with the twofold love; but when they are applied in education with their accompaniments of song and metre, then the discord begins. Then the old tale has to be repeated of fair Urania and the coarse Polyhymnia, who must be indulged sparingly, just as in my own art of medicine care must be taken that the taste of the epicure be gratified without inflicting upon him the attendant penalty of disease.

There is a similar harmony or disagreement in the course of the seasons and in the relations of moist and dry, hot and cold, hoar frost and blight; and diseases of all sorts spring from the excesses or disorders of the element of love. The knowledge of this in relation to the heavenly bodies is termed astronomy, and in relation to the gods is called divination. For divination is the peacemaker of gods and men, and works by a knowledge of the tendencies of merely human loves to piety and impiety. Such is the power of love; and that love which is just and temperate has the greatest power, and is the source of all our happiness and friendship with the gods and with one another. I dare say that I have omitted to mention many things which you, Aristophanes, may supply, as I perceive that you are cured of the hiccough.

Aristophanes, who has been cured of the hiccough, now speaks: —

He professes to open a new vein of discourse, in which he begins by treating of the origin of human nature. The sexes were originally three, men, women, and the union of the two; and they were made round, having four hands, four feet, two faces on a round neck, and the rest to correspond. Terrible was their strength and swiftness; and they were essaying to scale heaven and attack the gods. Doubt reigned in the celestial councils; the gods were divided between the desire of quelling the pride of man and the fear of losing the sacrifices. At last Zeus hit upon an expedient. Let us cut them in two, he said; then

they will only have half their strength, and we shall have twice as many sacrifices. He spake, and split them as you might split an egg with an hair; and when this was done, he told Apollo to give their faces a twist and rearrange their persons, taking out the wrinkles and tying the skin in a knot about the navel. The two halves went about looking for one another, and were ready to die of hunger in one another's arms. Then Zeus invented an adjustment of the sexes, which enabled them to marry and go their way to the business of life. Now the characters of men differ accordingly as they are derived from the original man or the original woman, or the original man-woman. Those who come from the man-woman are lascivious and adulterous; those who come from the woman form female attachments; those who are a section of the male follow the male and embrace him, and in him all their desires centre. They can not tell what they want of one another, but they live in pure and manly affection and can not be separated. If Hephaestus were to come to them and propose that they should be melted into one and remain one in this world and in the world below, they would acknowledge that this was the very expression of their want. For love is the desire of the whole, and the pursuit of the whole is called love. There was a time when the two sexes were only one, but now God has halved them, — much as the Lacedaemonians have cut up the Arcadians, — and if they don't behave themselves he will quarter them, and they will hop about with half a nose and face in basso relievo. Wherefore let us exhort all men to piety, that we may obtain the goods of which love is the author, and be reconciled to God, and find our own true loves, which rarely happens in this world. And now I must beg you not to suppose that I am alluding to Pausanias and Agathon, for my words refer to all mankind everywhere.

Some raillery ensues first between Aristophanes and Eryximachus and then between Agathon and Socrates, which threatens to grow into an argument. This is speedily repressed by Phaedrus, who reminds the disputants of their tribute to the god. Agathon's speech follows.

He will speak of the god first and then of his gifts. He is the fairest and blessedest and best of the gods, and also the youngest, having had no existence in the old days of Iapetus and Cronos when the gods were at war. The things that were done then were done of necessity and not of love. For love is young and dwells in soft places, — not like Ate in Homer, walking on the skulls of men, but in their hearts and souls, which are

soft enough. He is all flexibility and grace, and his habitation is among the flowers, and he can not do or suffer wrong; for all men serve and obey him of their own free will, and where there is love there is obedience, and where obedience is, there is justice; for none can be wronged of his own free will. And he is temperate as well as just, for he is the ruler of the desires, and if he rules them he must be temperate. Also he is courageous, for he is the conqueror of the lord of war. And he is wise too; for he is a poet, and the author of poesy in others. He created the animals; he is the inventor of the arts; all the gods are his subjects; he is the fairest and best in himself, and the cause of what is fairest and best in others; he makes men to be of one mind at a banquet, filling them with affection and emptying them of disaffection; the pilot, helper, defender, savior of men, in whose footsteps let every man follow, chanting a strain of love. Such is the discourse, half playful, half serious, which I dedicate to the god.

The turn of Socrates comes next. He begins by remarking satirically that he has not understood the terms of the original agreement, for he fancied that they meant to speak the true praises of love, but now he finds that they only say what is good of him, whether true or false. He begs to be absolved from speaking falsely, but he is willing to speak the truth, and proposes to begin by questioning Agathon. The result of his questions may be summed up as follows: —

Love is of something, and that which love desires is not that which love is or has; for no man desires that which he is or has. And love is of the beautiful, and therefore love has not the beautiful. And the beautiful is the good, and therefore, in wanting and desiring the beautiful, love also wants and desires the good. Socrates professes to have put the same questions and have obtained the same answers from Diotima, a wise woman of Mantinea, who, like Agathon, had spoken first of love and then of his works. Socrates, like Agathon, had told her that love is a mighty god and also fair, and she had shown him in return that love was neither, but in a mean between fair and foul, good and evil, and not a god at all, but only a great demon or intermediate being, who conveys to the gods the prayers of men, and to men the commands of the gods.

Socrates asks: Who are his father and mother? To this Diotima replies that he is the son of Plenty and Poverty, and partakes of the nature of both, and is full and starved by turns. Like his mother he is poor and squalid, lying on mats at doors;

like his father he is full of arts and resources, and is in a mean between ignorance and knowledge. And in this he resembles the philosopher who is also in a mean between the wise and the ignorant. Such is the nature of love, who is not to be confused with the beloved.

But love desires the beautiful; and then arises the question, What does he desire of the beautiful? He desires, of course, the possession of the beautiful; — but what is given by that? For the beautiful let us substitute the good, and we have no difficulty in seeing that the possession of the good is happiness, and that love is the desire of this. But the meaning of the term has been too often confined to one sort of love, whereas love is really coëxtensive with the good. And love desires not only the good, but the everlasting possession of the good. Why then is there all this flutter and excitement about love? Because all men and women at a certain age are desirous of bringing to the birth. And love is not of beauty only, but of birth in beauty; this is the principle of immortality in a mortal creature. And when beauty approaches, then the conceiving power is benign and diffuse, but when foulness, she is averted and morose.

But why again does this extend not only to men but also to animals? Because they too have an instinct of immortality. Even in the same individual there is a perpetual succession as well of the parts of the material body as of the thoughts and desires of the mind; nay, even knowledge comes and goes. There is no sameness of existence, but the new mortality is always taking the place of the old. This is why parents love their children — for the sake of immortality; and this is why men love the immortality of fame. For the creative soul creates not children, but conceptions of wisdom and virtue, such as poets and other creators have invented. And the noblest creations of all are those of legislators, in honor of whom temples have been raised. Who would not sooner have these children of the mind than the ordinary human ones?

I will now initiate you, she said, into the greater mysteries; for he who would proceed in due course should love first one fair form, and then many, and learn the connection of them; and from beautiful bodies he should proceed to beautiful minds, and the beauty of laws and institutions, until he perceives that all beauty is of one kindred; and from institutions he should go on to the sciences, until at last the vision is revealed to him of a single science of universal beauty, and then he will behold

the everlasting nature which is the cause of all, and will be near the end. In the contemplation of that supreme being of love he will be purified of earthly leaven, and will behold beauty, not with the bodily eye, but with the eye of the mind, and will bring forth true creations of virtue and wisdom, and be the friend of God and heir of immortality.

Such, Phaedrus, is the tale which I heard from the stranger of Mantinea, and which you may call the encomium of love, or what you please.

The company applaud the speech of Socrates, and Aristophanes is about to say something, when suddenly a band of revellers breaks into the court, and the voice of Alcibiades is heard asking for Agathon. He is led in drunk, and welcomed by Agathon, whom he has come to crown with a garland. He is placed on a couch at his side, but suddenly, on recognizing Socrates, he starts up, and a sort of conflict is carried on between them, which Agathon is requested to appease. Alcibiades insists that they shall drink, and has a large wine-cooler filled, which he first empties himself, and then fills again and passes on to Socrates. He is informed of the nature of the entertainment; he is willing to join, if only in the character of a drunken and disappointed lover he may be allowed to sing the praises of Socrates.

He begins by comparing Socrates first to the masks of Silenus, which have images of the gods inside them; and, secondly, to Marsyas the flute-player. For Socrates produces the same effect with the voice which Marsyas did with the flute. He is the great speaker and enchanter who ravishes the souls of men, the convincer of hearts too, as he has convinced Alcibiades, and made him ashamed of his mean and miserable life. He has suffered agonies from him, and is at his wit's end. He was in hopes that Socrates would fall in love with him; this as he thought would give him a wonderful opportunity of receiving lessons of wisdom. He narrates the failure of his design. He then proceeds to mention some other particulars of the life of Socrates; how they were at Potidaea together, where Socrates showed his superior powers of enduring cold and fatigue; how on one occasion he had stood for an entire day and night absorbed in reflection amid the wonder of the spectators; how on another occasion he had saved Alcibiades' life; how at the battle of Delium, after the defeat, he might be seen stalking about like a pelican, rolling his eyes. The sum of all is, that he is the most wonderful of human beings, and absolutely unlike any one but a satyr. Like the satyr

in his language too; for he uses the commonest words as the outward mask of the divinest truths.

When Alcibiades has done speaking, a dispute begins between him and Agathon and Socrates. Socrates piques Alcibiades by a pretended affection for Agathon. Presently another band of revellers appears, who introduce disorder into the feast; the sober part of the company, Eryximachus, Phaedrus, and others, withdraw; and Aristodemus, the follower of Socrates, sleeps during the whole of a long winter's night. When he wakes at cockcrow the revellers are nearly all asleep. Only Socrates, Aristophanes, and Agathon hold out; they are drinking out of a large goblet, which they pass round, and Socrates is explaining to the two others, who are half asleep, that the genius of tragedy is the same as that of comedy, and that the writer of tragedy ought to be a writer of comedy also. And first Aristophanes drops, and then, as the day is dawning, Agathon. Socrates, having laid them to rest, goes to his daily avocations until the evening.

If it be true that there are more things in the Symposium of Plato than any commentator has dreamed of, it is also true that many things have been imagined which are not really to be found there. Some writings hardly admit of a more distinct interpretation than a musical composition; and every reader may form his own accompaniment of thought or feeling to the strain which he hears. The Symposium of Plato is a work of this character, and hardly admits of being rendered in any other words but the writer's own. There are so many half-lights and cross-lights, so much of the color of mythology, and of the manner of sophistry, adhering — rhetoric and poetry, the playful and the serious, are so subtly intermingled in it, and vestiges of old philosophy so curiously blend with germs of future knowledge, that agreement among interpreters is not to be expected. The expression " poema magis putandum quam comicorum poetarum," which has been applied to all the writings of Plato, is especially applicable to the Symposium.

The power of love is represented in the Symposium as running through all nature and all being: at one end descending to animals and plants, and attaining to the highest vision of truth at the other. In an age when man was seeking for an expression of the world around him, the conception of love greatly affected him. One of the first distinctions of language and of mythology

was that of gender; and at a later period the ancient physicist, anticipating modern science, saw, or thought that he saw, a sex in plants; there were elective affinities among the elements, marriages of earth and heaven. Love became a mythic personage, whom philosophy, borrowing from poetry, converted into an efficient cause of creation. As of number and figure, the traces of the existence of love were everywhere discerned; and in the Pythagorean list of opposites male and female were ranged side by side with odd and even, finite and infinite.

But Plato seems also to be aware that there is a mystery of love not only in nature, but in man, extending far beyond the mere immediate relation of the sexes. He is conscious that the highest and noblest things in the world are not easily severed from the sensual desires, or may even be regarded as a spiritualized form of them. We may observe that Socrates himself is not represented as originally unimpassioned, but as one who has overcome his passions; the secret of his power over others partly lies in his passionate but self-controlled nature. Love is with Plato not merely the feeling usually so called, but the mystical contemplation of the beautiful and the good. The same passion which may wallow in the mire is capable of rising to the highest summit — of penetrating to the inmost secret of philosophy. The unity of knowledge, the consistency of the warring elements of the world, the enthusiasm of knowledge when first beaming upon mankind, the relativity of ideas to the human mind, and of the human mind to ideas, are all included, consciously or unconsciously, in Plato's doctrine of love.

The successive speeches in praise of love are all of them characteristic of the speakers, and contribute in various degrees to the final result; they are all designed to prepare the way for Socrates, who gathers up the threads anew, and skims the highest points of each of them. But they are not to be regarded as the stages of an idea, rising above one another to a climax. They are fanciful, partly facetious performances, "yet also having a certain degree of seriousness," which the successive speakers dedicate to the god. All of them are rhetorical and poetical rather than dialectical; they do not aim at truth, but only at appearance. When the turn of Socrates comes round, he can not be allowed to disturb the arrangement, and therefore he throws his argument into the form of a speech. And on the occasion of a banquet, good manners would not allow him to win a victory either over his host or any of the guests. The advantage which he gains over Agathon is ingeniously represented as having been

already gained over himself by Diotima. At the same time he maintains his own profession of ignorance.

The speeches are attested to us by the very best authority. The madman Apollodorus, who for three years past has made a daily study of the actions of Socrates — to whom the world is summed up in the words "Great is Socrates" — he has heard them from another "madman" who was the shadow of Socrates in days of old, like him going about barefooted, and who had been present at the time. Would you desire better witness? We may observe, by the way, (1) how the very appearance of Aristodemus by himself is a sufficient indication to Agathon that Socrates has been left behind; also, (2) how the courtesy of Agathon anticipates the excuse which Socrates was to have made on Aristodemus' behalf for coming uninvited; (3) how the story of the fit or trance of Socrates is confirmed by the mention which Alcibiades makes of a similar fit of abstraction occurring when he was serving with the army at Potidaea; like (4) the drinking powers of Socrates and his love of the fair, which receive a similar attestation in the concluding scene; or the attachment of Aristodemus, who is not forgotten when Socrates takes his departure. (5) We may notice the manner in which Socrates himself regards the first five speeches, not as true, but as fanciful and exaggerated encomiums of the god Love; (6) the ruling passion of Socrates for dialectics, who will argue with Agathon instead of making a speech, and will only speak at all upon the condition that he is allowed to speak the truth. We may note also (7) the characteristic Platonic remark which occurs in the speech of Eryximachus, that "confusion first begins in the concrete;" and the touch of Socratic irony, (8) which admits of a wide application and reveals a deep insight into the world; that in speaking of holy things and persons there is a general understanding that you should praise them, not that you should speak the truth of them — this is the sort of praise which Socrates is unable to give. Lastly we may remark that the banquet is a real banquet after all, at which love is the theme of discourse, and huge quantities of wine are drunk.

The discourse of Phaedrus is half-mythical, half-ethical; and he himself, true to the character which is given him in the Dialogue which bears his name, is half-sophist, half-enthusiast. He is the critic of poetry also, who compares Homer and Aeschylus in the insipid and irrational manner of the schools of the day, characteristically reasoning about the probability of matters which do not admit of reasoning. The age of love, the great

blessing of having a lover, the incentive which love is to daring deeds, the examples of Alcestis and Achilles, are the chief themes of his discourse. The love of women is regarded by him as almost on an equality with that of men; and he takes occasion to remark that the lover has a diviner being, and that therefore the gods favor the return of love which is made to him more than the original sentiment of the lover.

There is something of a sophistical ring in the speech of Phaedrus, which recalls the first speech in imitation of Lysias, occurring in the Dialogue called the Phaedrus. This is still more marked in the speech of Pausanias which follows; and which is at once hyperlogical in form and also extremely confused and pedantic. Plato is attacking the logical feebleness of the sophists and rhetoricians, through their pupils; of course, "playing both sides of the game," as in the Phaedrus; but it is not necessary in order to understand him that we should discuss the fairness of his mode of proceeding. The love of Pausanias for Agathon has already been touched upon in the Protagoras, and is alluded to by Aristophanes. Hence he is naturally the upholder of male loves, which, like all the other affections or actions of men, he regards as varying according to the manner of their performance; thus the question of morals is converted into one of manners. Like the sophists and like Plato himself, though in a different sense, he begins his discussion by an appeal to mythology, and distinguishes between the elder and younger love. The value which he attributes to such loves as motives to virtue and philosophy is greatly at variance with modern and Christian notions, but is in accordance with Hellenic sentiment. For it is impossible to deny that some of the best and greatest of the Greeks indulged in attachments, which Plato in the Laws, no less than the universal opinion of Christendom, has stigmatized as unnatural. Pausanias is very earnest in insisting on the innocence of such loves, when pursued in a right spirit; and he speaks of them as generally approved of among the Hellenes and disapproved by the barbarians, the latter for the sophistical reason that they are inimical to tyrants. The speech as a whole is "more words than matter," such as might certainly have been composed by a pupil of Lysias and Prodicus, although there is no hint given that Plato is designing to parody them.

Plato transposes the two next speeches, as in the Republic he would transpose the virtues and the mathematical sciences. This is done partly to avoid monotony, partly for the sake of making Aristophanes "the cause of wit in others," and also in order

to bring the comic and tragic poet into juxtaposition, as if by accident. A suitable "expectation" of Aristophanes is raised by the ludicrous circumstance of his having the hiccough, which is appropriately cured by his substitute, the physician Eryximachus. To Eryximachus Love is the good physician; he sees everything as an intelligent physicist, and, like many professors of his art in modern times, attempts to reduce the moral to the physical; or recognizes one law of love which pervades them both. There are loves and strifes of the body as well as of the mind. Like Hippocrates the Asclepiad, he is a disciple of Heracleitus, whose conception of the harmony of opposites he explains in a new way as the harmony after discord; to his common sense, as to that of many moderns as well as ancients, the identity of contradictories is an absurdity. His notion of love may be summed up as the harmony of man with himself in soul as well as body, and of all things in heaven and earth with one another.

Aristophanes is ready to laugh and make laugh before he opens his mouth, just as Socrates, true to his character, is ready to argue before he begins to speak. He expresses the very genius of the old comedy, its coarse and forcible imagery, and the license of its language in speaking about the gods. He has no sophistical notions about love, which is brought back by him to its common-sense meaning of love between intelligent beings. His account of the origin of the sexes has the greatest (comic) probability and verisimilitude. Nothing in Aristophanes is more truly Aristophanic than the description of the human monster whirling round on four arms and four legs, eight in all, with incredible rapidity. Yet there is a mixture of earnestness in this jest; three serious principles seem to be insinuated: — first, that man can not exist in isolation; he must be reunited if he is to be perfected; secondly, that love is the mediator and reconciler of poor, divided human nature: thirdly, that the loves of this world are an indistinct anticipation of an ideal union which is not yet realized.

The speech of Agathon is conceived in a higher strain, and receives the real, if half-ironical, approval of Socrates. It is the speech of the tragic poet and a sort of poem, like tragedy, moving among the gods of Olympus, and not among the elder or Orphic deities. In the idea of the antiquity of love he can not agree; love is not of the old time, but present and youthful ever. The speech may be compared with that speech of Socrates in the Phaedrus, in which he describes himself as talking dithyrambs. It is at once a preparation for Socrates and a foil to

him. The rhetoric of Agathon elevates the soul to "sunlit heights," but at the same time contrasts with the natural and necessary eloquence of Socrates. Agathon contributes the distinction between love and the works of love, and also hints incidentally that love is always of beauty, which Socrates afterwards elevates into a principle. While the consciousness of discord is stronger in the comic poet Aristophanes, Agathon, the tragic poet, has a deeper sense of harmony and reconciliation, and speaks of Love as the creator and artist.

All the earlier speeches embody common opinions colored with a tinge of philosophy. They furnish the material out of which Socrates proceeds to form his discourse, starting, as in other places, from mythology and the opinions of men. From Phaedrus he takes the thought that love is stronger than death; from Pausanias, that the true love is akin to intellect and political activity; from Eryximachus, that love is a universal phenomenon and the great power of nature; from Aristophanes, that love is the child of want, and is not merely the love of the congenial or of the whole, but (as he adds) of the good; from Agathon, that love is of beauty — not however of beauty only, but of birth of beauty.

The speech of the day begins with a short argument which overthrows not only Agathon but all of them, by the help of a distinction which has escaped them. Extravagant praises have been ascribed to Love as the author of every good; no sort of encomium was too high for him, whether deserved and true or not. But Socrates has no talent for speaking anything but the truth, and if he is to speak the truth of Love he must honestly confess that he is not a good at all: for love is of the good, and no man can desire that which he has. This piece of dialectics is ascribed to Diotima, the wise woman of Mantineia, who has already urged upon Socrates the argument which he urges against Agathon.

But Diotima, the prophetess of Mantineia, whose sacred and superhuman character raises her above the ordinary proprieties of women, has taught Socrates far more than this about the art and mystery of love. She has taught him that love is another aspect of philosophy. The same want in the human soul which is satisfied in the vulgar by the procreation of children, may become the highest aspiration of intellectual desire. As the Christian might speak of hungering and thirsting after righteousness; or of divine loves under the figure of human ("This is a great mystery, but I speak concerning Christ and the

church"); as the mediæval saint might speak of the "fruitio Dei," so the absorption and annihilation of all other loves and desires in the love of knowledge is a feeling that was at least intelligible to the Greek of the fifth century before Christ. To most men reason and passion appear to be antagonistic both in idea and fact. The union of the greatest comprehension of knowledge and the burning intensity of love is a contradiction in nature, which may have existed in a far-off primeval age in the mind of some Hebrew prophet or other Eastern sage, but has now become an imagination only. Yet this "passion of the reason" is the theme of the Symposium of Plato. And as there is no impossibility in supposing that "one king, or son of a king, may be a philosopher," so also there is a probability that there may be some few — perhaps one or two in a whole generation — in whom the light of truth may not lack the warmth of desire. And if there be such natures, no one will be disposed to deny that "from them flow most of the benefits of individuals and states."

Yet there is a higher region in which love is not only felt, but satisfied, in the perfect beauty of eternal knowledge, beginning with the beauty of earthly things, and at last by regular steps reaching a beauty in which all existence is seen harmonious and one. The limited affection is enlarged, and enabled to behold the ideal beauty of all things. This ideal beauty of the Symposium is the ideal good of the Republic; regarded not with the eye of knowledge, but of faith and desire. The one seems to say to us "the idea is love," the other "the idea is truth." In both the lover of wisdom is the "spectator of all time and all existence." This is a sort of "mystery" in which Plato also obscurely intimates the interpenetration of the moral and intellectual faculties.

The divine image of beauty that resides within Socrates has been revealed; the Silenus mask, or outward man, has now to be exhibited. The description of Socrates is placed side by side with the speech of Socrates; one is the complement of the other. At the height of divine inspiration, when the force of nature can no further go, as if by way of contrast to this extreme idealism or mysticism, Alcibiades, accompanied by a troop of revellers, staggers in, and in his drunken state is able to tell of things which he would have been ashamed to mention, if he had been sober. The state of his affections towards Socrates, unintelligible to us and perverted as they appear, is a perfect illustration of the power ascribed to the loves of men in the speech of Pau-

sanias. Indeed, he is confident that the whole company will sympathize with him; several of them have been in love with Socrates, and, like himself, have been deceived by him. The singular part of this confession is the combination of the most degrading passion with the desire of virtue and improvement. The pangs of philosophy and of love work together on this abandoned soul. Such an union is not wholly untrue to human nature, in which there is a mixture of good and evil, far surpassing in subtlety any powers of human imagination to conceive. The Platonic Socrates (for of the real Socrates this may be doubted: cp. Xenophon's Mem. I. 2, 29, 30) does not appear to regard the greatest evil of Greek life as matter of abhorrence, but as a subject for irony, and is far from resenting the imputation of such attachments. Nor does Plato feel any repugnance, such as would be felt in modern times, in bringing his great master and hero into connection with nameless crimes. He is contented with representing him as a sort of saint, who has won "the Olympian victory" over the temptations of human nature. The fault of taste, which to us appears glaring, and which was recognized by the Greeks of a later age, was not perceived by Plato himself. Still more surprising is the fact itself, that the elevation of sentiment, which is regarded by Plato as the first step in the upward progress of the philosopher, is aroused not by female beauty, but by the beauty of youth, which alone seems to have been capable of inspiring the modern feeling of romance in the Greek mind. The passion which was unsatisfied by the love of women, took the spurious form of an enthusiasm for the ideal of beauty — a worship as of some godlike image of an Apollo or Antinous. Thus wide is the gulf which separates a portion of Hellenic sentiment in the age of Plato (for about the opinion of Plato himself, as of Socrates, respecting these male loves we are in the same perplexity which he attributes to his countrymen,) not only from Christian, but from Homeric feeling.

The character here attributed to Alcibiades is hardly less remarkable than that of Socrates. He is the impersonation of lawlessness — "the lion's whelp, who ought not to be reared in the city," yet not without a certain generosity which gained the hearts of men, — strangely fascinated by Socrates, and possessed of a genius which might have been either the destruction or salvation of Athens. The dramatic interest of the character is heightened by the recollection of his after history. He seems to have been present to the mind of Plato in the description of the democratic man of the Republic.

There is no criterion of the date of the Symposium, except that which is furnished by the allusion to the division of Arcadia after the destruction of Mantineia. This took place in the year B. C. 384, which is the forty-fourth year of Plato's life. The Symposium can not therefore be regarded as a youthful work. As Mantineia was restored in the year 369, the composition of the Dialogue will probably fall between 384 and 369. Whether the recollection of the event is more likely to have been renewed at the destruction or restoration of the city, rather than at some intermediate period, is a consideration not worth raising.

The Symposium is closely connected with the Phaedrus both in style and matter. They are the only Dialogues of Plato in which the subject of love is considered at length. In both philosophy is regarded as a sort of enthusiasm or madness. Philosophy in the Phaedo might also be described as "dying for love." But while the Phaedo and Phaedrus look backwards and forwards to past and future states of existence, the Symposium is bounded by this world. The intellectual and ethical are held in solution with the physical. Philosophy is not death, or abstraction from life: in and through the sensible world we rise to the ideal. Nor is the eternity of knowledge asserted; but only the eternal succession of knowledge. The immortality is not personal, but an immortality of the race. The Lysis may be compared as containing the first suggestion of the questions finally answered in the speech of Socrates.

The Symposium of Xenophon, in which Socrates describes himself as a pander, and also discourses of the difference between sensual and sentimental love, likewise offers several interesting points of comparison. But the suspicion which hangs over other writings of Xenophon, and the numerous minute references to the Phaedrus and Symposium, throw a doubt on the genuineness of the work. The Symposium of Xenophon, if written by him at all, would certainly show that he wrote against Plato, and was acquainted with his works. Of this there is no trace in the Memorabilia. Such a rivalry is more characteristic of an imitator than of an original writer. This (so-called) Symposium of Xenophon may therefore have no more title to be regarded as genuine than the confessedly spurious Apology.

There are no means of determining the relative order in time of the Phaedo, Symposium, Phaedrus. The order which has been adopted in this translation rests on no other principle than the desire to bring together in a series the memorials of the life of Socrates.

THE SYMPOSIUM

PERSONS OF THE DIALOGUE

APOLLODORUS, *who repeats to his companion the dialogue which he had heard from Aristodemus, and had already once narrated to Glaucon.*
PHAEDRUS.
PAUSANIAS.
ERYXIMACHUS.
ARISTOPHANES.
AGATHON.
SOCRATES.
ALCIBIADES.
A TROOP OF REVELLERS.

SCENE: — The House of Agathon.

I BELIEVE that I am prepared with an answer. For the day before yesterday I was coming from my own home at Phalerum to the city, and one of my acquaintance, who had caught a sight of the back of me at a distance, in merry mood commanded me to halt: Apollodorus, he cried, O thou man of Phalerum, halt! So I did as I was bid; and then he said, I was looking for you, Apollodorus, only just now, that I might hear about the discourses in praise of love, which were delivered by Socrates, Alcibiades, and others, at Agathon's supper. Phoenix, the son of Philip, told another person who told me of them, and he said that you knew; but he was himself very indistinct, and I wish that you would give me an account of them. Who but you should be the reporter of the words of your friend? And first tell me, he said, were you present at this meeting?

Your informant, Glaucon, I said, must have been very indistinct indeed, if you imagine that the occasion was recent, or that I could have been present.

Why, yes, he replied, that was my impression.

But how is that possible? I said. For Agathon has not been in Athens for many years, (are you aware of that?) and my acquaintance with Socrates, of whose every action and word I now make a daily study, is not as yet of three years' standing. I used to be running about the world, thinking that I was doing something, and would have done anything rather than be a philosopher; I was almost as miserable as you are now.

Well, he said, cease from jesting, and tell me when the meeting occurred.

In our boyhood, I replied, when Agathon won the prize with his first tragedy, on the day after that on which he and his chorus offered the sacrifice of victory.

That is a long while ago, he said; and who told you — did Socrates?

No indeed, I replied, but the same person who told Phoenix; — he was a little fellow, who never wore any shoes, Aristodemus, of the deme of Cydathenaeum. He had been at this feast; and I think that there was no one in those days who was a more devoted admirer of Socrates. Moreover, I asked Socrates about the truth of some parts of his narrative, and he confirmed them. Then, said Glaucon, let us have the tale over again; is not the road to Athens made for conversation? And so we walked, and talked of the discourses on love; and therefore, as I said at first, I am prepared with an answer, and will have another rehearsal, if you like. For I love to speak or to hear others speak of philosophy; there is the greatest pleasure in that, to say nothing of the profit. But when I hear any other discourses, especially those of you rich men and traders, they are irksome to me; and I pity you who are my companions,

because you always think that you are hard at work when really you are idling. And I dare say that you pity me in return, whom you regard as an unfortunate wight, which I perhaps am. But I certainly know of you what you only think of me — there is the difference.

Companion. I see, Apollodorus, that you are just the same — always speaking evil of yourself, and of others; and I do believe that you pity all mankind, beginning with yourself and including everybody else with the exception of Socrates, true in this to your old name, which, however deserved, I know not how you acquired, of Apollodorus the madman; for your humor is always to be out of humor with yourself and with everybody except Socrates.

Apollodorus. Yes, friend, and I am proved to be mad, and out of my wits, because I have these notions of myself and you; no other evidence is required.

Com. I have no wish to dispute about that, Apollodorus; but let me renew my request that you would repeat the tale of love.

Apoll. Well, the tale of love was on this wise: — But perhaps I had better begin at the beginning, and endeavor to repeat to you the words as Aristodemus gave them.

He said that he met Socrates fresh from the bath and sandalled; and as the sight of the sandals was unusual, he asked him whither he was going that he was so fine.

To a banquet at Agathon's, he replied, whom I refused yesterday, fearing the crowd that there would be at his sacrifice, but promising that I would come to-day instead; and I have put on my finery because he is a fine creature. What say you to going with me unbidden?

Yes, I replied, I will go with you, if you like.

Follow then, he said, and let us demolish the proverb that

"To the feasts of lesser men the good unbidden go;"

instead of which our proverb will run that

"To the feasts of the good unbidden go the good;"

and this alteration may be supported by the authority of Homer, who not only demolishes but literally outrages this proverb. For, after picturing Agamemnon as the most valiant of men, he makes Menelaus, who is but a soft-hearted warrior, come of his own accord [1] to the sacrificial feast of Agamemnon, the worse to the better.

I am afraid, Socrates, said Aristodemus, that I shall rather be the inferior person, who, like Menelaus in Homer,

"To the feasts of the wise unbidden goes."

But I shall say that I was bidden of you, and then you will have to make the excuse.

"Two going together,"

he replied, in Homeric fashion, may invent an excuse by the way.[2]

This was the style of their conversation as they went along; and a comical thing happened — Socrates stayed behind in a fit of abstraction, and desired Aristodemus, who was waiting, to go on before him. When he reached the house of Agathon he found the doors wide open, and a servant coming out met him, and led him at once into the banqueting-hall in which the guests were reclining, for the banquet was about to begin. Welcome, Aristodemus, said Agathon, you are just in time to sup with us; if you come on any other errand put that off, and make one of us, as I

[1] Iliad, xvii. 588. [2] Iliad, x. 224.

was looking for you yesterday and meant to have asked you, if I could have found you. But what have you done with Socrates?

I turned round and saw that Socrates was missing, and I had to explain that he had been with me a moment before, and that I came by his invitation.

You were quite right in coming, said Agathon; but where is he himself?

He was behind me just now, as I entered, he said, and I can not think what has become of him.

Go and look for him, boy, said Agathon, and bring him in; do you, Aristodemus, meanwhile take the place by Eryximachus.

Then he said that the attendant assisted him to wash, and that he lay down, and presently another servant came in and said that our friend Socrates had retired into the portico of the neighboring house. "There he is fixed, and when I call to him," said the servant, "he will not stir."

How strange, said Agathon; then you must call him again, and keep calling him.

Let him alone, said my informant; he has just a habit of stopping anywhere and losing himself without any reason; don't disturb him, as I believe he will soon appear.

Well, if you say that, I will not interfere with him, said Agathon. My domestics, who on these occasions become my masters, shall entertain us as their guests. "Put on the table whatever you like," he said to the servants, "as usual when there is no one to give you orders, which I never do. Imagine that you are our hosts, and that I and the company are your guests; and treat us well, and then we shall commend you." After this they supped; and during the meal Agathon several times expressed a wish to send for Socrates, but Aristodemus would not allow him; and

when the feast was half over — for the fit, as usual, was not of long duration — Socrates entered. Agathon, who was reclining alone at the end of the table, begged that he would take the place next to him; that I may touch the sage, he said, and get some of that wisdom which came into your mind in the portico. For I am certain that you would not have left until you had found what you were seeking.

How I wish, said Socrates, taking his place as he was desired, that wisdom could be infused through the medium of touch, out of the full into the empty man, like the water which the wool sucks out of the full vessel into an empty one; in that case how much I should prize sitting by you! For you would have filled me full of gifts of wisdom, plenteous and fair, in comparison of which my own is of a very mean and questionable sort, no better than a dream; but yours is bright and only beginning, and was manifested forth in all the splendor of youth the day before yesterday in the presence of more than thirty thousand Hellenes.

You are insolent, said Agathon; and you and I will have to settle hereafter who bears off the palm of wisdom, and of this Dionysus shall be the judge; but at present you are better occupied with the banquet.

Socrates took his place on the couch; and when the meal was ended, and the libations offered, and after a hymn had been sung to the god, and there had been the usual ceremonies, — as they were about to commence drinking, Pausanias reminded them that they had had a bout yesterday, from which he and most of them were still suffering, and they ought to be allowed to recover, and not go on drinking to-day. He would therefore ask, How the drinking could be made easiest?

I entirely agree, said Aristophanes, that we should, by all means, get off the drinking, having been myself one of those who were yesterday drowned in drink.

I think that you are right, said Eryximachus, the son of Acumenus; but I should like to hear one other person speak. What are the inclinations of our host?

I am not able to drink, said Agathon.

Then, said Eryximachus, the weak heads like myself, Aristodemus, Phaedrus, and others who never can drink, are fortunate in finding that the stronger ones are not in a drinking mood. (I do not include Socrates, who is an exceptional being, and able either to drink or to abstain.) Well, then, as the company seem indisposed to drink much, I may be forgiven for saying, as a physician, that drinking is a bad practice, which I never, if I can help, follow, and certainly do not recommend to another, least of all to any one who still feels the effects of yesterday's carouse.

I always follow what you advise, and especially what you prescribe as a physician, rejoined Phaedrus the Myrrhinusian, and the rest of the company, if they are wise, will do the same.

All agreed that drinking was not to be the order of the day. Then, said Eryximachus, as you are all agreed that drinking is to be voluntary, and that there is to be no compulsion, I move, in the next place, that the flute-girl, who has just made her appearance, be told to go away; she may play to herself, or, if she has a mind, to the women who are within. But on this day let us have conversation instead; and, if you will allow me, I will tell you what sort of conversation. This proposal having been accepted, Eryximachus proceeded as follows: —

I will begin, he said, after the manner of Melanippe in Euripides,

"Not mine the word"

which I am about to speak, but that of Phaedrus. For he is in the habit of complaining that, whereas other gods have poems and hymns made in their honor by the poets, who are so many, the great and glorious god, Love, has not a single panegyrist or encomiast. Many sophists also, as for example the excellent Prodicus, have descanted in prose on the virtues of Heracles and other heroes; and, what is still more extraordinary, I have met with a philosophical work in which the utility of salt has been made the theme of an eloquent discourse; and many other like things have had a like honor bestowed upon them. And only to think that there should have been an eager interest created about them, and yet that to this day, as Phaedrus well and truly says, no one has ever dared worthily to hymn Love's praises. This mighty deity has been neglected wholly! Now I want to offer Phaedrus a contribution to his feast; nor do I see how the present company can, at this moment, do anything better than honor the god Love. And if you agree to this, there will be no lack of conversation; for I mean to propose that each of us in turn shall make a discourse in honor of Love. Let us have the best which he can make; and Phaedrus, who is sitting first on the left hand, and is the father of the thought, shall begin.

No one will oppose that, Eryximachus, said Socrates; I certainly can not refuse to speak on the only subject of which I profess to have any knowledge, and Agathon and Pausanias will surely assent; and there can be no doubt of Aristophanes, who is always in the company of Dionysus and Aphrodite; nor will any one disagree of those whom I see around me. The proposal, as I am aware, may seem hard upon us whose place is last; but that does not matter if we hear some good speeches first. Let Phaedrus

begin the praise of Love, and good luck to him. All the company expressed their assent, and desired him to do as Socrates bade him.

Aristodemus did not recollect all that was said, nor do I recollect all that he related to me; but I will tell you what I thought most worthy of remembrance, and what the chief speakers said.

Phaedrus began by affirming that Love is a mighty god, and wonderful among gods and men, but especially wonderful in his birth. For that he is the eldest of the gods is an honor to him; and a proof of this is, that of his parents there is no memorial; neither poet nor prose-writer has ever affirmed that he had any. As Hesiod says: —

> " First Chaos came, and then broad-bosomed Earth,
> The everlasting seat of all that is,
> And Love."

In other words, after Chaos, the Earth and Love, these two came into being. Also Parmenides sings of the generation of the gods: —

> " First in the train of gods, he moulded Love."

And Acusilaus agrees with Hesiod. Thus numerous are the witnesses which acknowledge Love to be the eldest of the gods. And not only is he the eldest, he is also the source of the greatest benefits to us. For I know not any greater blessing to a young man beginning life than a virtuous lover, or to the lover than a beloved youth. For the principle which ought to be the guide of men who would nobly live — that principle, I say, neither kindred, nor honor, nor wealth nor any other motive is able to implant as surely as love. Of what am I speaking? Of the sense of honor and dishonor, without which neither states nor individuals ever do any good or great work. And I say

that a lover who is detected in doing any dishonorable act, or submitting through cowardice when any dishonor is done to him by another, will be more pained at being detected by his beloved than at being seen by his father, or his companions, or any one else. And the beloved has the same feeling about his love, when he again is seen on any disgraceful occasion. And if there were only some way of contriving that a state or an army should be made up of lovers and their loves, they would be the very best governors of their own city, abstaining from all dishonor, and emulating one another in honor; and when fighting at one another's side, although a mere handful, they would overcome all men. For what lover would not choose rather to be seen by all mankind than by his beloved, either when abandoning his post or throwing away his arms? He would be ready to die a thousand deaths rather than endure this. Or who would desert his beloved or fail him in the hour of danger? The veriest coward would become an inspired hero, equal to the bravest, at such a time; Love would inspire him. That courage which, as Homer says, the god breathes into the soul of heroes, Love of himself infuses into the lover.

Love will make men dare to die for their beloved; and women as well as men. Of this, Alcestis, the daughter of Pelias, is a monument to all Hellas; for she was willing to lay down her life on behalf of her husband, when no one else would, although he had a father and mother; but the tenderness of her love so far exceeded theirs, that they seemed to be as strangers to their own son, having no concern with him; and so noble did this action of hers appear, not only to men but also to the gods, that among the many who have done virtuously she was one of the very few to whom the gods have granted the privilege of re-

turning to earth, in admiration of her virtue; such exceeding honor is paid by them to the devotion and virtue of love. But Orpheus, the son of Oeagrus, because he appeared to them to be a cowardly harper, who did not dare to die for love, like Alcestis, but contrived to go down alive to Hades, was sent back by them without effecting his purpose; to him they showed an apparition only of her whom he sought, but herself they would not give up; moreover, they afterwards caused him to suffer death at the hands of women, as the punishment of his intrusiveness. Far other was the reward of the true love of Achilles towards his lover Patroclus — his lover and not his love (the notion that Patroclus was the beloved one is a foolish error into which Aeschylus has fallen, for Achilles was surely the fairer of the two, fairer also than all the other heroes; and he was much younger, as Homer informs us, and he had no beard). And greatly as the gods honor the virtue of love, still the return of love on the part of the beloved to the lover is more admired and valued and rewarded by them, for the lover has a nature more divine and more worthy of worship. Now Achilles was quite aware, for he had been told by his mother, that he might avoid death and return home, and live to a good old age, if he abstained from slaying Hector. Nevertheless he gave his life to revenge his friend, and dared to die, not only on his behalf, but after his death. Wherefore the gods honored him even above Alcestis, and sent him to the Islands of the Blest. These are my reasons for affirming that Love is the eldest and noblest and mightiest of the gods, and the chiefest author and giver of happiness and virtue, in life and after death.

This, or something like this, was the speech of Phaedrus; and some other speeches followed which

Aristodemus did not remember; the next which he repeated was that of Pausanias, who observed that the proposal of Phaedrus was too indiscriminate, and that Love ought not to be praised in this unqualified manner. If there were only one Love, then what he said would be well enough; but since there are more Loves than one, he should have begun by determining which of them was to be the theme of our praises. I will amend this defect, he said; and first of all I will tell you which Love is worthy of praise, and then try to hymn the praiseworthy one in a manner worthy of the god. For we all know that Love is inseparable from Aphrodite, and if there were only one Aphrodite there would be only one Love; but as there are two goddesses there must be two Loves. For am I not right in asserting that there are two goddesses? The elder one, having no mother, who is called the heavenly Aphrodite — she is the daughter of Uranus; the younger, who is the daughter of Zeus and Dione, whom we call common; and the other Love who is her fellow-worker may and must also have the name of common, as the other is called heavenly. All the gods ought to have praise given to them, but still I must discriminate the attributes of the two Loves. For actions vary according to the manner of their performance. Take for example, that which we are now doing, drinking, singing and talking — these actions are not in themselves either good or evil, but turn out in this or that way according to the mode of performing them; and when well done they are good, and when wrongly done they are evil; and in like manner not every love, but only that which has a noble purpose, is noble and worthy of praise. But the Love who is the son of the common Aphrodite is essentially common, and has no discrimination, being such as the meaner sort of men feel, and is apt to be of women

as well as of youths, and is of the body rather than of the soul — the most foolish beings are the objects of this love which desires only to gain an end, but never thinks of accomplishing the end nobly, and therefore does good and evil quite indiscriminately. The goddess who is his mother is far younger, and she was born of the union of the male and female, and partakes of both sexes. But the son of the heavenly Aphrodite is sprung from a mother in whose birth the female has no part, but she is from the male only; this is that love which is of youths only, and the goddess being older has nothing of wantonness. Those who are inspired by this love turn to the male, and delight in him who is the more valiant and intelligent nature; any one may recognize the pure enthusiasts in the very character of their attachments. For they love not boys, but intelligent beings whose reason is beginning to be developed, much about the time at which their beards begin to grow. And in choosing them as their companions, they mean to be faithful to them, and to pass their whole life with them, and be with them, and not to take them in their inexperience, and deceive them, and play the fool with them, or run away from one to another of them. But the love of young boys should be forbidden by law, because their future is uncertain; they may turn out good or bad, either in body or soul, and the affection which is devoted to them may be thrown away; in this the good are a law to themselves, and the coarser sort of lovers ought to be restrained by force, as we restrain or attempt to restrain them from fixing their affections on women of free birth. For the abuse of a thing brings discredit on the lawful use, and this has led some to deny the lawfulness of love when they see the impropriety and evil of attachments of this sort; for surely nothing that is decorously and lawfully done can

justly be censured. Now in most cities the practice about love is determined by a simple rule, and is easily intelligible. But here and in Lacedaemon there is a perplexity, — in Elis and Boeotia, having no gifts of eloquence, they are very straightforward; the universal sentiment is simply in favor of these connections, and no one, whether young or old, has anything to say to their discredit. The reason is, as I suppose, that they are men of few words in those parts, and therefore the lovers do not like the trouble of pleading their suit. But in Ionia and other places, and generally in countries which are subject to the barbarians, loves of youths share the evil repute of philosophy and gymnastics, because they are inimical to tyranny; for the interests of rulers require that their subjects should be poor in spirit, and that there should be no strong bond of friendship or society among them, and love, above all other motives, is likely to inspire this, as our Athenian tyrants learned by experience; for the love of Aristogeiton and the constancy of Harmodius had a strength which undid their power. And, therefore, the ill-repute into which these attachments have fallen is to be ascribed to the evil condition of those who make them to be ill-reputed; that is to say, to the rapacity of the governors and the cowardice of the governed; on the other hand, the indiscriminate honor which is given to them in some countries is attributable to the laziness of those who hold this opinion of them. There is yet a more excellent way of legislating about them, which is our own way; but this, as I was saying, is rather perplexing. For, observe that open loves are held to be more honorable than secret ones, and that the love of the noblest and highest, even if their persons are less beautiful than others, is especially honorable. Consider, too, how great is the encouragement which all

the world gives to the lover; neither is he supposed to be doing anything dishonorable; but if he succeeds he is praised, and if he fail he is blamed. And in the pursuit of his love the custom of mankind allows him to do many strange things, which philosophy would bitterly censure if they were done from any motive of interest, or wish for office or power. He may pray, and entreat, and supplicate, and swear, and be a servant of servants, and lie on a mat at the door; in any other case friends and enemies would be equally ready to prevent him, but now there is no friend who will be ashamed of him and admonish him, and no enemy will charge him with meanness or flattery; the actions of a lover have a grace which ennobles them; and custom has decided that they are highly commendable and that there is no loss of character in them; and, what is yet more strange, he only may swear and forswear himself (this is what the world says), and the gods will forgive his transgression, for there is no such thing as a lover's oath. Such is the entire liberty which gods and men allow the lover, and which in our part of the world the custom confirms. And this is one side of the question, which may make a man fairly think that in this city to love and to be loved is held to be a very honorable thing. But when there is a new regime, and parents forbid their sons to talk with their lovers, and place them under a tutor's care, and their companions and equals are personal in their remarks when they see anything of this sort going on, and their elders refuse to silence them and do not reprove their words; any one who reflects on this will, on the contrary, think that we hold these practices to be disgraceful. But the truth, as I imagine, and as I said at first, is, that whether such practices are honorable or whether they are dishonorable is not a simple question; they are honorable to him who follows them

honorably, dishonorable to him who follows them dishonorably. There is dishonor in yielding to the evil, or in an evil manner; but there is honor in yielding to the good, or in an honorable manner. Evil is the vulgar lover who loves the body rather than the soul, and who is inconstant because he is a lover of the inconstant, and therefore when the bloom of youth which he was desiring is over, he takes wings and flies away, in spite of all his words and promises; whereas the love of the noble mind, which is in union with the unchangeable, is everlasting. The custom of our country would have them both proven well and truly, and would have us yield to the one sort of love and avoid the other; testing them in contests and trials, which will show to which of the two classes the lover and the beloved respectively belong. And this is the reason why, in the first place, a hasty attachment is held to be dishonorable, because time is the true test of this as of most other things; and then again there is a dishonor in being overcome by the love of money, wealth, or of political power, whether a man suffers and is frightened into surrender at the loss of them, or is unable to rise above the advantages of them. For none of these things are of a permanent or lasting nature; not to mention that no generous friendship ever sprung from them. There remains, then, only one way of honorable attachment which custom allows in the beloved, and this is the way of virtue; any service which the lover did was not to be accounted flattery or dishonor, and the beloved has also one way of voluntary service which is not dishonorable, and this is virtuous service.

For we have a custom, and according to our custom any one who does service to another under the idea that he will be improved by him either in wisdom, or in some other particular of virtue — such a voluntary

service as this, I say, is not regarded as a dishonor, and is not open to the charge of flattery. And these two customs, one the love of youth, and the other the practice of philosophy and virtue in general, ought to meet in one, and then the beloved may honorably indulge the lover. For when the lover and beloved come together, having each of them a law, and the lover on his part is ready to confer any favor that he rightly can on his gracious loving one, and the other is ready to yield any compliance that he rightly can to him who is to make him wise and good; the one capable of communicating wisdom and virtue, the other seeking after knowledge, and making his object education and wisdom; when the two laws of love are fulfilled and meet in one — then, and then only, may the beloved yield with honor to the lover. Nor when love is of this disinterested sort is there any disgrace in being deceived, but in every other case there is equal disgrace in being or not being deceived. For he who is gracious to his lover under the impression that he is rich, and is disappointed of his gains because he turns out to be poor, is disgraced all the same: for he has done his best to show that he would turn himself to any one's uses base for the sake of money, and this is not honorable. But on the same principle he who lives for the sake of virtue, and in the hope that he will be improved by his lover's company, shows himself to be virtuous, even though the object of his affection be proved to be a villain, and to have no virtue; and if he is deceived he has committed a noble error. For he has proved that for his part he will do anything for anybody for the sake of virtue and improvement, and nothing can be nobler than this. Thus noble in every case is the acceptance of another for the sake of virtue. This is that love which is the love of the heavenly goddess, and is heavenly, and of great

price to individuals and cities, making the lover and the beloved alike eager in the work of their own improvement. But all other loves are the offspring of the common or vulgar goddess. To you, Phaedrus, I offer this my encomium of love, which is as good as I could make on the sudden.

When Pāusănĭās cāme tŏ ă pāuse (this is the balanced way in which I have been taught by the wise to speak), Aristodemus said that the turn of Aristophanes was next, but that either he had eaten too much, or from some other cause he had the hiccough, and was obliged to change with Eryximachus the physician, who was reclining on the couch below him. Eryximachus, he said, you ought either to stop my hiccough, or to speak in my turn until I am better.

I will do both, said Eryximachus: I will speak in your turn, and do you speak in mine; and while I am speaking let me recommend you to hold your breath, and if this fails, then to gargle with a little water; and if the hiccough still continues, tickle your nose with something and sneeze; and if you sneeze once or twice, even the most violent hiccough is sure to go. In the meantime I will take your turn, and you shall take mine. I will do as you prescribe, said Aristophanes, and now get on.

Eryximachus spoke as follows: Seeing that Pausanias made a fair beginning, and but a lame ending, I will endeavor to supply his deficiency. I think that he has rightly distinguished two kinds of love. But my art instructs me that this double love is to be found in all animals and plants, and I may say in all that is; and is not merely an affection of the soul of man towards the fair, or towards anything; that, I say, is a view of the subject which I seem to have gathered from my own art of medicine, which shows me how

great and wonderful and universal is this deity, whose empire is over all that is, divine as well as human. And from medicine I will begin that I may do honor to my art. For there are in the human body two loves, which are confessedly different and unlike, and being unlike, have loves and desires which are unlike; and the desire of the healthy is one, and the desire of the diseased is another; and, as Pausanias says, the good are to be accepted, and the bad are not to be accepted; and so too in the body the good and healthy elements are to be indulged, and the bad elements and the elements of desire are not to be indulged, but discouraged. And this is what the physician has to do, and in this the art of medicine consists: for medicine may be regarded generally as the knowledge of the loves and desires of the body, and how to fill or empty them; and the good physician is he who is able to separate fair love from foul, or to convert one into the other; and if he is a skilful practitioner, he knows how to eradicate and how to implant love, whichever is required, and he can reconcile the most hostile elements in the constitution, and make them friends. Now the most hostile are the most opposite, such as hot and cold, moist and dry, bitter and sweet, and the like. And my ancestor, Asclepius, knowing how to implant friendship and accord in these elements, was the creator of our art, as our friends the poets here tell us, and I believe them; and not only medicine in every branch, but the arts of gymnastic and husbandry are under his dominion. Any one who pays the least attention will also perceive that in music there is the same reconciliation of opposites; and I suppose that this must have been the meaning of Heracleitus, although his words are not accurate; for he says that one is united by disunion, like the harmony of the bow and the lyre. Now there is an ab-

surdity in saying that harmony is disagreement or is composed of elements which are still in a state of disagreement. But perhaps what he really meant to say was that harmony is composed of differing notes of higher or lower pitch which disagreed once, but are now reconciled by the art of music; for if the higher and lower notes still disagree, there could be no harmony, as is indeed evident. For harmony is a symphony, and symphony is an agreement; but an agreement of disagreements while they disagree can not exist; there is no harmony of discord and disagreement. This may be illustrated by rhythm, which is composed of elements short and long, once differing and now in accord; which accordance, as in the former instance, medicine, so in this, music implants, making love and unison to grow up among them: and thus music, too, is concerned with the principles of love in their application to harmony and rhythm. Again, in the abstract principles of harmony and rhythm there is no difficulty in discerning them, for as yet love has no double nature. But when you want to use them in actual life, either in the composition of music or in the correct performance of airs or metres composed already, which latter is called education, then the difficulty begins, and the good artist is needed. Then the old tale has to be repeated of fair and heavenly love — the love of Urania the fair and heavenly muse, and of the duty of accepting the temperate, and the intemperate only that they may become temperate, and of preserving their love; and again, of the vulgar Polyhymnia, who must be used with circumspection that the pleasure may not generate licentiousness; just as in my own art great skill is shown in gratifying the taste of the epicure without inflicting upon him the attendant evil of disease. The conclusion is that in music, in medicine, in all

other things human as well as divine, both loves ought to be noted as far as may be, for they are both present.

The course of the season is also full of both principles; and when, as I was saying, the elements of hot and cold, moist and dry, attain the harmonious love of one another and blend in temperance and harmony, they bring to men, animals and vegetables health and wealth, and do them no harm; whereas the wantonness and overbearingness of the other love affecting the seasons is a great injurer and destroyer, and is the source of pestilence, and brings many different sorts of diseases on animals and plants; for hoar-frost and hail and blight spring from the excesses and disorders of these elements of love, the knowledge of which in relation to the revolutions of the heavenly bodies and the seasons of the year is termed astronomy. Furthermore all sacrifices and the whole art of divination, which is the art of communion between gods and men — these, I say, are concerned only with the salvation and healing power of love. For all impiety is likely to ensue if, instead of accepting and honoring and reverencing the harmonious love in all his actions, a man honors the other love, whether in his feelings towards gods or parents, towards the living or the dead. Wherefore the business of divination is to see to these loves and to heal them, and divination is the peacemaker of gods and men, working by a knowledge of the religious or irreligious tendencies which exist in merely human loves. Such is the great and mighty, or rather universal, force of all love. And that love, especially, which is concerned with the good, and which is perfected in company with temperance and justice, whether among gods or men, has the greatest power, and is the source of all our happiness and harmony and friendship with the gods which are

above us, and with one another. I dare say that I have omitted several things which might be said in praise of Love, but this was not intentional, and you, Aristophanes, may now supply the omission or take some other line of commendation; as I perceive that you are cured of the hiccough.

Yes, said Aristophanes, who followed, the hiccough is gone; not, however, until I applied the sneezing; and I wonder whether the principle of order in the human frame requires these sort of noises and ticklings, for I no sooner applied the sneezing than I was cured.

Eryximachus said: Take care, friend Aristophanes, you are beginning with a joke, and I shall have to watch if you talk nonsense; and the interruption will be occasioned by your own fault.

You are very right, said Aristophanes, laughing, and I will retract what I said; and do you please not to watch me, as I fear that in what I am going to say, instead of making others laugh, which is to the manner born of our muse and would be all the better, I shall only be laughed at by them.

Do you expect to shoot your bolt and escape, Aristophanes? Well, if you are very careful and have a due sense of responsibility, I may be induced to let you off.

Aristophanes professed to open another vein of discourse; he had a mind to praise Love in another way, not like that either of Pausanias or Eryximachus. Mankind, he said, judging by their neglect of him, have never, as I think, at all understood the power of Love. For if they had understood him they would surely have built noble temples and altars, and offered solemn sacrifices in his honor; but this is not done, and certainly ought to be done: for of all the gods he is the best friend of men, the helper and the healer of the

ills which are the great obstruction to the happiness of the race. I shall rehearse to you his power, and you may repeat what I say to the rest of the world. And first let me treat of the nature and state of man; for the original human nature was not like the present, but different. In the first place, the sexes were originally three in number, not two as they are now; there was man, woman, and the union of the two, having a name corresponding to this double nature; this once had a real existence, but is now lost, and the name only is preserved as a term of reproach. In the second place, the primeval man was round and had four hands and four feet, back and sides forming a circle, one head with two faces, looking opposite ways, set on a round neck and precisely alike; also four ears, two privy members, and the remainder to correspond. When he had a mind he could walk as men now do, and he could also roll over and over at a great rate, leaning on his four hands and four feet, eight in all, like tumblers going over and over with their legs in the air; this was when he wanted to run fast. Now there were these three sexes, because the sun, moon, and earth are three; and the man was originally the child of the sun, the woman of the earth, and the man-woman of the moon, which is made up of sun and earth, and they were all round and moved round and round like their parents. Terrible was their might and strength, and the thoughts of their hearts were great, and they made an attack upon the gods; and of them is told the tale of Otus and Ephialtes who, as Homer says, dared to scale heaven, and would have laid hands upon the gods. Doubt reigned in the councils of Zeus and of the gods. Should they kill them and annihilate the race with thunderbolts, as they had done the giants, then there would be an end of the sacrifice and worship which men offered to

them; but, on the other hand, the gods could not suffer their insolence to be unrestrained. At last, after a good deal of reflection, Zeus discovered a way. He said: "I have a notion which will humble their pride and mend their manners; they shall continue to exist, but I will cut them in two and then they will be diminished in strength and increased in numbers; this will have the advantage of making them more profitable to us. They shall walk upright on two legs, and if they continue insolent and won't be quiet, I will split them again and they shall hop about on a single leg." He spoke and cut them in two, like a sorb-apple which is halved for pickling, or as you might divide an egg with a hair; and as he cut them one after another, he bade Apollo give the face and the half of the neck a turn in order that the man might contemplate the section of himself: this would teach him a lesson of humility. He was also to heal their wounds and compose their forms. Apollo twisted the face and pulled the skin all round over that which in our language is called the belly, like the purses which draw in, and he made one mouth at the centre, which he fastened in a knot (this is called the navel); he also moulded the breast and took out most of the wrinkles, much as a shoemaker might smooth out leather upon a last; he left a few, however, in the region of the belly and navel, as a memorial of the primeval change. After the division the two parts of man, each desiring his other half, came together, and threw their arms about one another eager to grow into one, and would have perished from hunger without ever making an effort, because they did not like to do anything apart; and when one of the halves died and the other survived, the survivor sought another mate, whether the section of an entire man or of an entire woman, which had usurped the name of man and woman, and clung to

that. And this was being the destruction of them, when Zeus in pity invented a new plan: he turned the parts of generation round in front, for this was not always their position, and they sowed the seed no longer as hitherto like grasshoppers in the ground, but in one another; and after the transposition the male generated in the female in order that by the mutual embraces of man and woman they might breed, and the race might continue; or if man came to man they might be satisfied, and rest and go their ways to the business of life: so ancient is the desire of one another which is implanted in us, reuniting our original nature, making one of two, and healing the state of man. Each of us when separated is but the indenture of a man, having one side only like a flat fish, and he is always looking for his other half. Men who are a section of that double nature which was once called Androgynous are lascivious; adulterers are generally of this breed, and also adulterous and lascivious women: the women who are a section of the woman don't care for men, but have female attachments; the female companions are of this sort. But the men who are a section of the male follow the male, and while they are young, being a piece of the man, they hang about him and embrace him, and they are themselves the best of boys and youths, because they have the most manly nature. Some indeed assert that they are shameless, but this is not true; for they do not act thus from any want of shame, but because they are valiant and manly, and have a manly countenance, and they embrace that which is like them. And these when they grow up are our statesmen, and these only, which is a great proof of the truth of what I am saying. And when they reach manhood they are lovers of youth, and are not naturally inclined to marry or beget children, which they do, if at all, only

in obedience to the law, but they are satisfied if they may be allowed to live unwedded; and such a nature is prone to love and ready to return love, always embracing that which is akin to him. And when one of them finds his other half, whether he be a lover of youth or a lover of another sort, the pair are lost in an amazement of love and friendship and intimacy, and one will not be out of the other's sight, as I may say, even for a moment: these are they who pass their lives with one another; yet they could not explain what they desire of one another. For the intense yearning which each of them has towards the other does not appear to be the desire of intercourse, but of something else which the soul desires and can not tell, and of which she has only a dark and doubtful presentiment. Suppose Hephaestus, with his instruments, to come to the pair who are lying side by side and say to them, "What do you people want of one another?" they would be unable to explain. And suppose further, that when he saw their perplexity he said: "Do you desire to be wholly one; always day and night to be in one another's company? for if this is what you desire, I am ready to melt you into one and let you grow together, so that being two you shall become one, and while you live live a common life as if you were a single man, and after your death in the world below still be one departed soul instead of two — I ask whether this is what you lovingly desire, and whether you are satisfied to attain this?" — there is not a man among them when he heard this who would deny or who would not acknowledge that this meeting and melting in one another's arms, this becoming one instead of two, was the very expression of his ancient need. And the reason is that human nature was originally one and we were a whole, and the desire and pursuit of the whole is called love.

There was a time, I say, when the two were one, but now because of this wickedness of men God has dispersed us, as the Arcadians were dispersed into villages by the Lacedaemonians. And if we are not obedient to the gods there is a danger that we shall be split up again and go about in basso-relievo, like the figures having only half a nose which are sculptured on columns, and that we shall be like tallies. Wherefore let us exhort all men to piety, that we may avoid the evil and obtain the good, of which Love is the lord and leader; and let no one oppose him — he is the enemy of the gods who opposes him. For if we are friends of God and reconciled to him we shall find our own true loves, which rarely happens in this world. I am serious, and therefore I must beg Eryximachus not to make fun or to find any allusion to Pausanias and Agathon, who, as I believe, are of the manly sort such as I have been describing. But my words have a wider application — they include men and women everywhere; and I believe that if all of us obtained our love, and each one had his particular beloved, thus returning to his original nature, then our race would be happy. And if this would be best of all, that which would be best under present circumstances would be the nearest approach to such an union; and that will be the attainment of a congenial love. Therefore we shall do well to praise the god Love, who is the author of this gift, and who is also our greatest benefactor, leading us in this life back to our own nature, and giving us high hopes for the future, that if we are pious, he will restore us to our original state, and heal us and make us happy and blessed. This, Eryximachus, is my discourse of love, which, although different from yours, I must beg you to leave unassailed by the shafts of your ridicule, in order that each may have his turn; each, or rather

either, for Agathon and Socrates are the only ones left.

Indeed, I am not going to attack you, said Eryximachus, for I thought your speech charming, and did I not know that Agathon and Socrates are masters in the art of love, I should be really afraid that they would have nothing to say, after all the world of things which have been said already. But, for all that, I am not without hopes.

Socrates said: You did your part well, Eryximachus; but if you were as I am now, or rather as I shall be when Agathon has spoken, you would, indeed, be in a great strait.

You want to cast a spell over me, Socrates, said Agathon, in the hope that I may be disconcerted, thinking of the anticipation which the theatre has of my fine speech.

I should be strangely forgetful, Agathon, replied Socrates, of the courage and magnanimity which you showed when your own compositions were about to be exhibited, coming upon the stage with the actors and facing the whole theatre altogether undismayed, if I thought that your nerves could be fluttered at a small party of friends.

Do you think, Socrates, said Agathon, that my head is so full of the theatre as not to know how much more formidable to a man of sense a few good judges are than many fools?

Nay, replied Socrates, I should be very wrong in attributing to you, Agathon, that or any other want of refinement. And I am quite aware that if you happened to meet with any one whom you thought wise, you would care for his opinion much more than for that of the many. But then we, having been a part of the foolish many in the theatre, can not be regarded as the select wise; though I know that if you chanced

to light upon a really wise man, you would be ashamed of disgracing yourself before him — would you not?

Yes, said Agathon.

But you would not be ashamed of disgracing yourself before the many?

Here Phaedrus interrupted them, saying: Don't answer him, my dear Agathon; for if he can only get a partner with whom he can talk, especially a good-looking one, he will no longer care about the completion of our plan. Now I love to hear him talk; but just at present I must not forget the encomium on Love which I ought to receive from him and every one. When you and he have paid the tribute to the god, then you may talk.

Very good, Phaedrus, said Agathon; I see no reason why I should not proceed with my speech, as I shall have other opportunities of conversing with Socrates. Let me say first how I ought to speak, and then speak.

The previous speakers, instead of praising the god Love, or unfolding his nature, appear to have congratulated mankind on the benefits which he confers upon them. But I would rather praise the god first, and then speak of his gifts; this is always the right way of praising everything. May I express unblamed then, that of all the blessed gods he is the blessedest and the best? And also the fairest, which I prove in this way: for, in the first place, Phaedrus, he is the youngest, and of his youth he is himself the witness, fleeing out of the way of age, which is swift enough surely, swifter than most of us like: yet he can not be overtaken by him; he is not a bird of that feather; youth and love live and move together — like to like, as the proverb says. There are many things which Phaedrus said about Love in which I agree with him; but I can not agree that he is older

than Iapetus and Kronos — that is not the truth; as I maintain, he is the youngest of the gods, and youthful ever. The ancient things of which Hesiod and Parmenides speak, if they were done at all, were done of necessity and not of love; had love been in those days, there would have been no chaining or mutilation of the gods, or other violence, but peace and sweetness, as there is now in heaven, since the rule of Love began. Love is young and also tender; he ought to have a poet like Homer to describe his tenderness, as Homer says of Ate, that she is a goddess and tender: —

> "Her feet are tender, for she sets her steps,
> Not on the ground but on the heads of men:"

which is an excellent proof of her tenderness, because she walks not upon the hard but upon the soft. Let us adduce a similar proof of the tenderness of Love; for he walks not upon the earth, nor yet upon the skulls of men, which are hard enough, but in the hearts and souls of men: in them he walks and dwells and has his home. Not in every soul without exception, for where there is hardness he departs, where there is softness there he dwells; and clinging always with his feet and in all manner of ways in the softest of soft places, how can he be other than the softest of all things? And he is the youngest as well as the tenderest, and also he is of flexile form; for without flexure he could not enfold all things, or wind his way into and out of every soul of man without being discovered, if he were hard. And a proof of his flexibility and symmetry of form is his grace, which is universally admitted to be in an especial manner the attribute of Love; ungrace and love are always at war with one another. The fairness of his complexion is revealed by his habitation among the flowers; for

he dwells not amid unflowering or fading beauties, whether of body or soul or aught else, but in the place of flowers and scents, there he dwells and abides. Enough of his beauty — of which, however, there is more to tell. But I must now speak of his virtue: his greatest glory is that he can neither do nor suffer wrong from any god or any man; for he suffers not by force if he suffers, for force comes not near him, neither does he act by force. For all serve him of their own free will, and where there is love as well as obedience, there, as the laws which are the lords of the city say, is justice. And not only is he just but exceedingly temperate, for Temperance is the acknowledged ruler of the pleasures and desires, and no pleasure ever masters Love; he is their master and they are his servants; and if he conquers them he must be temperate indeed. As to courage, even the God of War is no match for him; he is the captive and Love is the lord, for love, the love of Aphrodite, masters him, as the tale runs; and the master is stronger than the servant. And if he conquers the bravest of all he must be himself the bravest. Of his courage and justice and temperance I have spoken; but I have yet to speak of his wisdom, and I must try to do my best, according to the measure of my ability. For in the first place he is a poet (and here, like Eryximachus, I magnify my art), and he is also the source of poesy in others, which he could not be if he were not himself a poet. And at the touch of him every one becomes a poet, even though he had no music in him before; this also is a proof that Love is a good poet and accomplished in all the musical arts; for no one can give to another that which he has not himself, or teach that of which he has no knowledge. Who will deny that the creation of the animals is his doing? Are they not all the works of

his wisdom, born and begotten of him? And as to the artists, do we not know that he only of them whom love inspires has the light of fame? — he whom love touches not walks in darkness. The arts of medicine and archery and divination were discovered by Apollo, under the guidance of love and desire, so that he too is a disciple of love. Also the melody of the Muses, the metallurgy of Hephaestus, the weaving of Athene, the empire of Zeus over gods and men, are all due to love, who was the inventor of them. Love set in order the empire of the gods — the love of beauty, as is evident, for of deformity there is no love. And formerly, as I was saying, dreadful deeds were done among the gods, because of the rule of necessity; but now since the birth of love, and from the love of the beautiful, has sprung every good in heaven and earth. Therefore, Phaedrus, I say of love that he is the fairest and best in himself, and the cause of what is fairest and best in all other things. And I have a mind to say of him in verse that he is the god who

> "Gives peace on earth and calms the stormy deep,
> Who stills the waves and bids the sufferer sleep."

He makes men to be of one mind at a banquet such as this, fulfilling them with affection and emptying them of disaffection. In sacrifices, banquets, dances, he is our lord — supplying kindness and banishing unkindness, giving friendship and forgiving enmity, the joy of the good, the wonder of the wise, the amazement of the gods; desired by those who have no part in him, and precious to those who have the better part in him; parent of delicacy, luxury, desire, fondness, softness, grace; careful of the good, uncareful of the evil. In every word, work, wish, fear — pilot, helper, defender, savior; glory of gods and men, leader best

and brightest: in whose footsteps let every man follow, chanting a hymn and joining in that fair strain with which love charms the souls of gods and men. Such is the discourse, Phaedrus, half playful, yet having a certain measure of seriousness, which, according to my ability, I dedicate to the god.

When Agathon had done speaking, Aristodemus said that there was a general cheer; the fair youth was thought to have spoken in a manner worthy of himself, and of the god. And Socrates, looking at Eryximachus, said: Tell me, son of Acumenus, was I not a prophet? Did I not anticipate that Agathon would make a wonderful oration and, that I should be in a strait?

I think, said Eryximachus, that you were right in the first anticipation, but not in the second.

Why, my dear friend, said Socrates, must not I or any one be in a strait who has to speak after such a rich and varied discourse as that? I am especially struck with the beauty of the concluding words — who could listen to them without amazement? When I reflected on the immeasurable inferiority of my own powers, I was ready to run away for shame, if there had been any escape. For I was reminded of Gorgias, and at the end of his speech I fancied that Agathon was shaking at me the Gorginian or Gorgonian head of the great master of rhetoric, which was simply to turn me and my speech into stone, as Homer says, and strike me dumb. And then I perceived how foolish I had been in consenting to take my turn with you in praising love, and saying that I too was a master of the art, when I really had no idea of the meaning of the word "praise," which appears to be another name for glorification, whether true or false; in which sense of the term I am unable to praise anything. For I in my simplicity imagined that the topics of

praise should be true; this was to be the foundation, and that out of them the speaker was to choose the best and arrange them in the best order. And I felt quite proud, and thought that I could speak as well as another, as I knew the nature of true praise. Whereas I see now that the intention was to attribute to love every species of greatness and glory, whether really belonging to him or not, without regard to truth or falsehood — that was no matter; for the original proposal seems to have been not that you should praise, but only that you should appear to praise him. And you attribute to love every imaginable form of praise, and say that "he is all this," "the cause of all this," in order that you may exhibit him as the fairest and best of all; and this of course imposes on the unwary, but not on those who know him: and a noble and solemn hymn of praise have you rehearsed. But as I misunderstood the nature of the praise when I said that I would take my turn, I must beg to be absolved from the promise which (as Euripides would say) was a promise of the lips and not of the mind. Farewell then to such a strain: for that is not my way of praising; no, indeed, I can not attain to that. But if you like to hear the truth about love, I am ready to speak in my own manner, though I will not make myself ridiculous by entering into any rivalry with you. Say then, Phaedrus, whether you would like to have the truth about love, spoken in any words and in any order which may happen to come into my mind at the time. Will that be agreeable to you?

Aristodemus said that Phaedrus and the company bid him take his own course. Then, he said, let me have your permission first to ask Agathon a few more questions, in order that I may take his admissions as the premisses of my discourse.

I grant the permission, said Phaedrus: put your questions. Socrates then proceeded as follows: —

In the magnificent discourse which you have uttered, I think that you were right, my dear Agathon, in saying that you would begin with the nature of love and then afterwards speak of his works — that is a way of beginning which I very much approve. And as you have spoken thus eloquently of the nature of love, will you answer me a further question? — Is love the love of something or of nothing? And here I must explain myself: I do not want you to say that love is the love of a father or the love of a mother — that would be ridiculous; but to answer as you would, if I asked is a father a father of something? to which you would find no difficulty in replying, of a son or daughter: and that would be right.

Very true, said Agathon.

And you would say the same of a mother?

He assented.

Yet let me ask you one more question in order further to illustrate my meaning. Is not a brother to be regarded essentially as a brother of something?

Certainly, he replied.

That is, of a brother or sister?

Yes, he said.

And now, said Socrates, I will ask about love: — Is love of something or of nothing?

Of something, surely, he replied.

Keep in mind what this is, and tell me what I want to know — whether love desires that of which love is.

Yes, surely.

And does he possess, or does he not possess, that which he loves and desires?

Probably not, I should say.

Nay, replied Socrates, I would have you consider

whether necessarily is not rather the word. The inference that he who desires something is in want of something, and that he who desires nothing is in want of nothing, is in my judgment, Agathon, absolutely and necessarily true. What do you think?

I think with you, said Agathon, in that.

Very good. And would he who is great desire to be great, or he who is strong desire to be strong?

That would be inconsistent with our previous admissions.

True. For he who is anything can not want to be that which he is?

Very true.

But if, added Socrates, a man being strong desired to be strong, or being swift desired to be swift, or being healthy desired to be healthy (for any one may be imagined to desire any quality which he already has), in these cases there might be an objection raised — they might be said to desire that which they have already. I give the example in order that we may avoid misconception. For as you may see, Agathon, these persons must be supposed to have their respective advantages at the time, whether they choose or not; and surely no man can desire that which he has. And therefore, when a person says, I am well and wish to be well, or I am rich and wish to be rich, and I desire simply what I have; we shall reply to him: "You, my friend, having wealth and health and strength, want to have the continuance of them; for at this moment, whether you choose or no, you have them. And when you say, I desire that which I have and nothing else, is not your meaning that you want to have what you now have in the future?" He must allow this?

He must, said Agathon.

Then, said Socrates, this is equivalent to desiring

not what he has or possesses already, but that what he has may be preserved to him in the future?

Very true, he said.

Then he and every one who desires, desires that which he has not already, and which is future and not present, and which he has not, and is not, and of which he is in want; — these are the sort of things which love and desire seek?

Very true, he said.

Then now, said Socrates, let us recapitulate the argument. First, is not love of something, and of something too which is wanting to a man?

Yes, he replied.

Remember further what you said in your speech, or if you do not remember I will remind you: you said that the love of the beautiful disposes the empire of the gods, for that of deformed things there is no love — did you not say something like that?

Yes, said Agathon.

Yes, my friend, and the remark is a just one. And if this is true, love is the love of beauty and not of deformity?

He assented.

And the admission has been already made that love is of that which a man wants and has not?

True, he said.

Then love wants and has not beauty?

Certainly, he replied.

And would you call that beautiful which wants and does not possess beauty?

Certainly not.

Then would you still say that love is beautiful?

Agathon replied: I fear that I did not understand what I was saying.

Nay, Agathon, replied Socrates; but I should like

to ask you one more question: — Is not the good also the beautiful?

Yes.

Then in wanting the beautiful, love wants also the good?

I can not refute you, Socrates, said Agathon. And let us suppose that what you say is true.

Say rather, dear Agathon, that you can not refute the truth; for Socrates is easily refuted.

And now I will take my leave of you, and rehearse the tale of love which I heard once upon a time from Diotima of Mantineia, who was a wise woman in this and many other branches of knowledge. She was the same who deferred the plague of Athens ten years by a sacrifice, and was my instructress in the art of love. In the attempt which I am about to make I shall pursue Agathon's method, and begin with his admissions, which are nearly if not quite the same which I made to the wise woman when she questioned me: this will be the easiest way, and I shall take both parts myself as well as I can. For, like Agathon, she spoke first of the being and nature of love, and then of his works. And I said to her in nearly the same words which he used to me, that love was a mighty god, and likewise fair; and she proved to me as I proved to him that, in my way of speaking about him, love was neither fair nor good. "What do you mean, Diotima," I said, "is love then evil and foul?" "Hush," she cried; "is that to be deemed foul which is not fair?" "Certainly," I said. "And is that which is not wise, ignorant? do you not see that there is a mean between wisdom and ignorance?" "And what is this?" I said. "Right opinion," she replied; "which, as you know, being incapable of giving a reason, is not knowledge (for how could knowledge be devoid of reason? nor again, ignorance, for neither

can ignorance attain the truth), but is clearly something which is a mean between ignorance and wisdom." "Quite true," I replied. "Do not then insist," she said, "that what is not fair is of necessity foul, or what is not good evil; or infer that because love is not fair and good he is therefore foul and evil; for he is in a mean between them." "Well," I said, "love is surely admitted by all to be a great god." "By those who know or by those who don't know?" "By all." "And how, Socrates," she said with a smile, "can love be acknowledged to be a great god by those who say that he is not a god at all?" "And who are they?" I said. "You and I are two of them," she replied. "How can that be?" I said. "That is very intelligible," she replied; "as you yourself would acknowledge that the gods are happy and fair — of course you would — would you dare to say that any god was not?" "Certainly not," I replied. "And you mean by the happy, those who are the possessors of things good or fair?" "Yes." "And you admitted that love, because he was in want, desires those good and fair things of which he is in want?" "Yes, I admitted that." "But how can he be a god who has no share in the good or the fair?" "That is not to be supposed." "Then you see that you also deny the deity of love."

"What then is love?" I asked; "Is he mortal?" "No." "What then?" "As in the former instance, he is neither mortal nor immortal, but in a mean between them." "What is he then, Diotima?" "He is a great spirit (*δαίμων*), and like all that is spiritual he is intermediate between the divine and the mortal." "And what is the nature of this spiritual power?" I said. "This is the power," she said, "which interprets and conveys to the gods the prayers and sacrifices of men, and to men the commands and rewards

of the gods; and this power spans the chasm which divides them, and in this all is bound together, and through this the arts of the prophet and the priest, their sacrifices and mysteries and charms, and all prophecy and incantation, find their way. For God mingles not with man; and through this power all the intercourse and speech of God with man, whether awake or asleep, is carried on. The wisdom which understands this is spiritual; all other wisdom, such as that of arts or handicrafts, is mean and vulgar. Now these spirits or intermediate powers are many and divine, and one of them is love." "And who," I said, "was his father, and who his mother?" "The tale," she said, "will take time; nevertheless I will tell you. On the birthday of Aphrodite there was a feast of the gods, at which the god Poros or Plenty, who is the son of Metis or Discretion, was one of the guests. When the feast was over, Penia or Poverty, as the manner was, came about the doors to beg. Now Plenty, who was the worse for nectar (there was no wine in those days), came into the garden of Zeus and fell into a heavy sleep; and Poverty considering her own straitened circumstances, plotted to have him for a husband, and accordingly she lay down at his side and conceived Love, who partly because he is naturally a lover of the beautiful, and because Aphrodite is herself beautiful, and also because he was born on Aphrodite's birthday is her follower and attendant. And as his parentage is, so also are his fortunes. In the first place he is always poor, and anything but tender and fair, as the many imagine him; and he is hard-featured and squalid, and has no shoes, nor a house to dwell in; on the bare earth exposed he lies under the open heaven, in the streets, or at the doors of houses, taking his rest; and like his mother he is always in distress. Like his father too, whom he

also partly resembles, he is always plotting against the fair and good; he is bold, enterprising, strong, a hunter of men, always at some intrigue or other, keen in the pursuit of wisdom, and never wanting resources; a philosopher at all times, terrible as an enchanter, sorcerer, sophist; for as he is neither mortal nor immortal, he is alive and flourishing at one moment when he is in plenty, and dead at another moment, and again alive by reason of his father's nature. But that which is always flowing in is always flowing out, and so he is never in want and never in wealth, and he is also in a mean between ignorance and knowledge. The truth of the matter is just this: No god is a philosopher or seeker after wisdom, f he is wise already; or does any one else who is wi seek after wisdom. Neither do the ignorant seek af wisdom. For herein is the evil of ignorance, that h who is neither good nor wise is nevertheless satisfied: he feels no want, and has therefore no desire." "But who then, Diotima," I said, "are the lovers of wisdom, if they are neither the wise nor the foolish?" "A child may answer that question," she replied; "they are those who, like love, are in a mean between the two. For wisdom is a most beautiful thing, and love is of the beautiful; and therefore love is also a philosopher or lover of wisdom, and being a lover of wisdom is in a mean between the wise and the ignorant. And this again is a quality which Love inherits from his parents; for his father is wealthy and wise, and his mother poor and foolish. Such, my dear Socrates, is the nature of the spirit Love. The error in your conception of him was very natural, and as I imagine from what you say, has arisen out of a confusion of love and the beloved — this made you think that love was all beautiful. For the beloved is the truly beautiful, delicate, and perfect and blessed; but the prin-

ciple of love is of another nature, and is such as I have described."

I said: "O thou stranger woman, thou sayest well, and now, assuming love to be such as you say, what is the use of him?" "That, Socrates," she replied, "I will proceed to unfold: of his nature and birth I have already spoken; and you acknowledge that love is of the beautiful. But some one will say: Of the beautiful in what, Socrates and Diotima — or rather let me put the question more clearly, and ask: When a man loves the beautiful, what does he love?" I answered her "That the beautiful may be his." "Still," she said, "The answer suggests a further question, which this: What is given by the possession of beauty?" That," I replied, "is a question to which I have no swer ready." "Then," she said, "let me put the vord 'good' in the place of the beautiful, and repeat the question: What does he who loves the good desire?" "The possession of the good," I said. "And what does he gain who possesses the good?" "Happiness," I replied; "there is no difficulty in answering that." "Yes," she said, "the happy are made happy by the acquisition of good things. Nor is there any need to ask why a man desires happiness; the answer is already final." "That is true," I said. "And is this wish and this desire common to all? and do all men always desire their own good, or only some men? — what think you?" "All men," I replied; "the desire is common to all." "But all men, Socrates," she rejoined, "are not said to love, but only some of them; and you say that all men are always loving the same things." "I myself wonder," I said, "why that is." "There is nothing to wonder at," she replied; "the reason is that one part of love is separated off and receives the name of the whole, but the other parts have other names." "Give an example,"

I said. She answered me as follows: "There is poetry, which, as you know, is complex and manifold. And all creation or passage of non-being into being is poetry or making, and the processes of all art are creative; and the masters of arts are all poets." "Very true." "Still," she said, "you know that they are not called poets, but have other names; the generic term 'poetry' is confined to that specific art which is separated off from the rest of poetry, and is concerned with music and metre; and this is what is called poetry, and they who possess this kind of poetry are called poets." "Very true," I said. "And the same holds of love. For you may say generally that all desire of good and happiness is due to the great and subtle power of love; but those who, having their affections set upon him, are yet diverted into the paths of money-making or gymnastic philosophy, are not called lovers — the name of the genus is reserved for those whose devotion takes one form only — they alone are said to love, or to be lovers." "In that," I said, "I am of opinion that you are right." "Yes," she said, "and you hear people say that lovers are seeking for the half of themselves; but I say that they are seeking neither for the half, nor for the whole, unless the half or the whole be also a good. And they will cut off their own hands and feet and cast them away, if they are evil; for they love them not because they are their own, but because they are good, and dislike them not because they are another's, but because they are evil. There is nothing which men love but the good. Do you think that there is?" "Indeed," I answered, "I should say not." "Then," she said, "the conclusion of the whole matter is, that men love the good." "Yes," I said. "To which may be added that they love the possession of the good?" "Yes, that may be added." "And not only the pos-

session, but the everlasting possession of the good?" "That may be added too." "Then, love," she said, "may be described generally as the love of the everlasting possession of the good?" "That is most true," I said.

"Then if this be the nature of love, can you tell me further," she said, "what is the manner of the pursuit? what are they doing who show all this eagerness and heat which is called love? Answer me that." "Nay, Diotima," I said, "if I had known I should not have wondered at your wisdom, or have come to you to learn." "Well," she said, "I will teach you; — love is only birth in beauty, whether of body or soul." "The oracle requires an explanation," I said; "I don't understand you." "I will make my meaning clearer," she replied. "I mean to say, that all men are bringing to the birth in their bodies and in their souls. There is a certain age at which human nature is desirous of procreation; and this procreation must be in beauty and not in deformity: and this is the mystery of man and woman, which is a divine thing, for conception and generation are a principle of immortality in the mortal creature. And in the inharmonical they can never be. But the deformed is always inharmonical with the divine, and the beautiful harmonious. Beauty, then, is the destiny or goddess of parturition who presides at birth, and therefore when approaching beauty the conceiving power is propitious, and diffuse, and benign, and begets and bears fruit: on the appearance of foulness she frowns and contracts in pain, and is averted and morose, and shrinks up, and not without a pang refrains from conception. And this is the reason why, when the hour of conception arrives, and the teeming nature is full, there is such a flutter and ecstasy about beauty whose approach is the alleviation of pain. For love,

Socrates, is not, as you imagine, the love of the beautiful only." "What then?" "The love of generation and birth in beauty." "Yes," I said. "Yes, indeed," she replied. "But why of birth?" I said. "Because to the mortal, birth is a sort of eternity and immortality," she replied; "and as has been already admitted, all men will necessarily desire immortality together with good, if love is of the everlasting possession of the good."

And this she taught me at various times when she spoke of love. And on another occasion she said to me, "What is the reason, Socrates, of this love, and the attendant desire? See you not how all animals, birds as well as beasts, in their desire of procreation, are in agony when they take the infection of love; — this begins with the desire of union, to which is added the care of offspring, on behalf of whom the weakest are ready to battle against the strongest even to the uttermost, and to die for them, and will let themselves be tormented with hunger or suffer anything in order to maintain their offspring. Man may be supposed to do this from reason; but why should animals have these passionate feelings? Can you tell me why?" Again I replied, that I did not know. She said to me: "And do you expect ever to become a master in the art of love, if you do not know this?" "But that," I said, "Diotima, is the reason why I come to you, because, as I have told you already, I am aware that I want a teacher; and I wish that you would explain to me this and the other mysteries of love." "Marvel not at this," she said, "if you believe that love is of the immortal, as we have already admitted; for here again, and on the same principle too, the mortal nature is seeking as far as is possible to be everlasting and immortal: and this is only to be attained by generation, because the new is always left in the

place of the old. For even in the same individual there is succession and not absolute unity: a man is called the same; but yet in the short interval which elapses between youth and age, and in which every animal is said to have life and identity, he is undergoing a perpetual process of loss and reparation — hair, flesh, bones, blood, and the whole body are always changing. And this is true not only of the body, but also of the soul, whose habits, tempers, opinions, desires, pleasures, pains, fears, never remain the same in any one of us, but are always coming and going. And what is yet more surprising is, that this is also true of knowledge; and not only does knowledge in general come and go, so that in this respect we are never the same; but particular knowledge also experiences a like change. For what is implied in the word "recollection," but the departure of knowledge, which is ever being forgotten and is renewed and preserved by recollection, appearing to be the same although in reality new, according to that law of succession by which all mortal things are preserved, not by absolute sameness of existence, but by substitution, the old worn-out mortality leaving another new and similar one behind — unlike the immortal in this, which is always the same and not another? And in this way, Socrates, the mortal body, or mortal anything, partakes of immortality; but the immortal in another way. Marvel not then at the love which all men have of their offspring; for that universal love and interest is for the sake of immortality."

When I heard this, I was astonished, and said: "Is this really true, O thou wise Diotima?" And she answered with all the authority of a sophist: "Of that, Socrates, you may be assured; — think only of the ambition of men, and you will marvel at their senselessness, unless you consider how they are stirred

by the love of an immortality of fame. They are ready to run risks greater far than they would have run for their children, and to spend money and undergo any amount of toil, and even to die for the sake of leaving behind them a name which shall be eternal. Do you imagine that Alcestis would have died on behalf of Admetus, or Achilles after Patroclus, or your own Codrus in order to preserve the kingdom for his sons, if they had not imagined that the memory of their virtues, which is still retained among us, would be immortal? Nay," she said, "for I am persuaded that all men do all things for the sake of the glorious fame of immortal virtue, and the better they are the more they desire this; for they are ravished with the desire of the immortal.

"Men whose bodies only are creative, betake themselves to women and beget children — this is the character of their love; their offspring, as they hope, will preserve their memory and give them the blessedness and immortality which they desire in the future. But creative souls — for there are men who are more creative in their souls than in their bodies — conceive that which is proper for the soul to conceive or retain. And what are these conceptions? — wisdom and virtue in general. And such creators are all poets and other artists who may be said to have invention. But the greatest and fairest sort of wisdom by far is that which is concerned with the ordering of states and families, and which is called temperance and justice. And he who in youth has the seed of these implanted in him and is himself inspired, when he comes to maturity desires to beget and generate. And he wanders about seeking beauty that he may beget offspring — for in deformity he will beget nothing — and embraces the beautiful rather than the deformed; and when he finds a fair and noble and well-nurtured

soul, and there is union of the two in one person, he gladly embraces him, and to such an one he is full of fair speech about virtue and the nature and pursuits of a good man; and he tries to educate him; and at the touch and presence of the beautiful he brings forth the beautiful which he conceived long before, and the beautiful is ever present with him and in his memory even when absent, and in company they tend that which he brings forth, and they are bound together by a far nearer tie and have a closer friendship than those who beget mortal children, for the children who are their common offspring are fairer and more immortal. Who, when he thinks of Homer and Hesiod and other great poets, would not rather have their children than any ordinary human ones? Who would not emulate them in the creation of children such as theirs, which have preserved their memory and given them everlasting glory? Or who would not have such children as Lycurgus left behind to be the saviors, not only of Lacedaemon, but of Hellas, as one may say? There is Solon, too, who is the revered father of Athenian laws; and many others there are in many other places, both among Hellenes and barbarians. All of them have done many noble works, and have been the parents of virtue of every kind, and many temples have been raised in honor of their children, which were never raised in honor of the mortal children of any one.

"These are the lesser mysteries of love, into which even you, Socrates, may enter; to the greater and more hidden ones which are the crown of these, and to which, if you pursue them in a right spirit, they will lead, I know not whether you will be able to attain. But I will do my utmost to inform you, and do you follow if you can. For he who would proceed rightly in this matter should begin in youth to turn

to beautiful forms; and first, if his instructor guide him rightly, he should learn to love one such form only — out of that he should create fair thoughts; and soon he would himself perceive that the beauty of one form is truly related to the beauty of another; and then if beauty in general is his pursuit, how foolish would he be not to recognize that the beauty in every form is one and the same! And when he perceives this he will abate his violent love of the one, which he will despise and deem a small thing, and will become a lover of all beautiful forms; this will lead him on to consider that the beauty of the mind is more honorable than the beauty of the outward form. So that if a virtuous soul have but a little comeliness, he will be content to love and tend him, and will search out and bring to the birth thoughts which may improve the young, until his beloved is compelled to contemplate and see the beauty of institutions and laws, and understand that all is of one kindred, and that personal beauty is only a trifle; and after laws and institutions he will lead him on to the sciences, that he may see their beauty, being not like a servant in love with the beauty of one youth or man or institution, himself a slave mean and calculating, but looking at the abundance of beauty and drawing towards the sea of beauty, and creating and beholding many fair and noble thoughts and notions in boundless love of wisdom; until at length he grows and waxes strong, and at last the vision is revealed to him of a single science, which is the science of beauty everywhere. To this I will proceed; please to give me your very best attention.

"For he who has been instructed thus far in the things of love, and who has learned to see the beautiful in due order and succession, when he comes toward the end will suddenly perceive a nature of wondrous

beauty — and this, Socrates, is that final cause of all our former toils, which in the first place is everlasting — not growing and decaying, or waxing and waning; in the next place not fair in one point of view and foul in another, or at one time or in one relation or at one place fair, at another time or in another relation or at another place foul, as if fair to some and foul to others, or in the likeness of a face or hands or any other part of the bodily frame, or in any form of speech or knowledge, nor existing in any other being; as for example, an animal, whether in earth or heaven, but beauty only, absolute, separate, simple, and everlasting, which without diminution and without increase, or any change, is imparted to the ever-growing and perishing beauties of all other things. He who under the influence of true love rising upward from these begins to see that beauty, is not far from the end. And the true order of going or being led by another to the things of love, is to use the beauties of earth as steps along which he mounts upwards for the sake of that other beauty, going from one to two, and from two to all fair forms, and from fair forms to fair actions, and from fair actions to fair notions, until from fair notions he arrives at the notion of absolute beauty, and at last knows what the essence of beauty is. This, my dear Socrates," said the stranger of Mantineia, "is that life above all others which man should live, in the contemplation of beauty absolute; a beauty which if you once beheld, you would see not to be after the measure of gold, and garments, and fair boys and youths, which when you now behold you are in fond amazement, and you and many a one are content to live seeing only and conversing with them without meat or drink, if that were possible — you only want to be with them and to look at them. But what if man had eyes to see the true

beauty — the divine beauty, I mean, pure and clear and unalloyed, not clogged with the pollutions of mortality, and all the colors and vanities of human life — thither looking, and holding converse with the true beauty divine and simple, and bringing into being and educating true creations of virtue and not idols only? Do you not see that in that communion only, beholding beauty with the eye of the mind, he will be enabled to bring forth, not images of beauty, but realities; for he has hold not of an image but of a reality, and bringing forth and educating true virtue to become the friend of God and be immortal, if mortal man may. Would that be an ignoble life?"

Such, Phaedrus — and I speak not only to you, but to all men — were the words of Diotima; and I am persuaded of their truth. And being persuaded of them, I try to persuade others, that in the attainment of this end human nature will not easily find a better helper than love. And therefore, also, I say that every man ought to honor him as I myself honor him, and walk in his ways, and exhort others to do the same, even as I praise the power and spirit of love according to the measure of my ability now and ever.

The words which I have spoken, you, Phaedrus, may call an encomium of love, or anything else which you please.

When Socrates had done speaking, the company applauded, and Aristophanes was beginning to say something in answer to the allusion which Socrates had made to his own speech, when suddenly there was a great knocking at the door of the house, as of revellers, and the sound of a flute-girl was heard. Agathon told the attendants to go and see who were the intruders. "If they are friends of ours," he said, "invite them in, but if not say that the drinking is over." A little while afterwards they heard the voice

of Alcibiades resounding in the court; he was in a great state of intoxication, and kept roaring and shouting "Where is Agathon? Lead me to Agathon," and at length, supported by the flute-girl and some of his companions, he found his way to them. "Hail friends," he said, appearing at the door crowned with a massive garland of ivy and wall-flowers, and having his head flowing with ribands. "Will you have a very drunken man as a companion of your revels? Or shall I crown Agathon, as was my intention in coming, and go my way? For I was unable to come yesterday, and therefore I come today, carrying on my head these ribands, that taking them from my own head, I may crown the head of this fairest and wisest of men, as I may be allowed to call him. Will you laugh at me because I am drunk? Yet I know very well that I am speaking the truth, although you may laugh. But first tell me whether I shall come in on the understanding that I am drunk. Will you drink with me or not?"

The company were vociferous in begging that he would take his place among them, and Agathon specially invited him. Thereupon he was led in by the people who were with him; and as he was being led he took the crown and ribands from his head, intending to crown Agathon, and had them before his eyes; this prevented him from seeing Socrates, who made way for him, and Alcibiades took the vacant place between Agathon and Socrates, and in taking the place he embraced Agathon and crowned him. Take off his sandals, said Agathon, and let him make a third on the same couch.

By all means; but who makes the third partner in our revels? said Alcibiades, turning round and starting up as he caught sight of Socrates. By Heracles, he said, what is this? here is Socrates always lying in

wait for me, and always, as his way is, coming out at all sorts of unsuspected places: and now, what have you to say for yourself, and why are you lying here, where I perceive that you have contrived to find a place, not by a professor or lover of jokes, like Aristophanes, but by the fairest of the company?

Socrates turned to Agathon and said: I must ask you to protect me, Agathon; for this passion of his has grown quite a serious matter. Since I became his admirer I have never been allowed to speak to any other fair one, or so much as to look at them. If I do he goes wild with envy and jealousy, and not only abuses me but can hardly keep his hands off me, and at this moment he may do me some harm. Please to see to this, and either reconcile me to him, or, if he attempts violence, protect me, as I am in bodily fear of his mad and passionate attempts.

There can never be reconciliation between you and me, said Alcibiades; but for the present I will defer your chastisement. And I must beg you, Agathon, to give me back some of the ribands that I may crown the marvellous head of this universal despot — I would not have him complain of me for crowning you, and neglecting him, who in conversation is the conqueror of all mankind; and this not once only, as you were the day before yesterday, but always. Then taking some of the ribands, he crowned Socrates, and again reclined. When he had lain down again, he said: You seem, my friends, to be sober, which is a thing not to be endured; you must drink — for that was the agreement which I made with you — and I elect myself master of the feast until you are well drunk. Let us have a large goblet, Agathon, or rather, he said, addressing the attendant, bring me that wine-cooler. The wine-cooler was a vessel holding more than two quarts which caught his eye —

this he filled and emptied, and bid the attendant fill it again for Socrates. Observe, my friends, said Alcibiades, that my ingenious device will have no effect on Socrates, for he can drink any quantity of wine and not be at all nearer being drunk. Socrates drank the cup which the attendant filled for him.

Eryximachus said: What is this, Alcibiades? Are we to have neither conversation nor singing over our cups; but simply to drink as if we were thirsty?

Alcibiades replied: Hail, worthy son of a most wise and worthy sire.

The same to you, said Eryximachus; but what shall we do?

That I leave to you, said Alcibiades.

"The wise physician skilled our wounds to heal"

shall prescribe and we will obey. What do you want?

Well, Eryximachus said: Before you appeared a resolution was agreed to by us that each one in turn should speak a discourse in praise of love, and as good a one as he could: this was passed round from left to right; and as all of us have spoken, and you have not spoken but have well drunken, you ought to speak, and then impose upon Socrates any task which you please, and he on his right hand neighbor, and so on.

That is good, Eryximachus, said Alcibiades; and yet the comparison of a drunken man's speech with those of sober men is hardly fair; and I should like to know, sweet friend, whether you really believe what Socrates was just now saying; for I can assure you that the very reverse is the fact, and that if I praise any one but himself in his presence, whether God or man, he will hardly keep his hands off me.

For shame, said Socrates.

By Poseidon, said Alcibiades, there is no use in

your denying this, for no creature will I praise in your presence.

Well then take your own course, said Eryximachus, and if you like praise Socrates.

What do you think, Eryximachus? said Alcibiades; shall I attack him and inflict the punishment in your presence?

What are you about? said Socrates; are you going to raise a laugh at me? Is that the meaning of your praise?

I am going to speak the truth, if you will permit me.

I not only permit you but exhort you to speak the truth.

Then I will begin at once, said Alcibiades, and if I say anything that is not true, you may interrupt me if you will, and say that I speak falsely, though my intention is to speak the truth. But you must not wonder if I speak any how as things come into my mind; for the fluent and orderly enumeration of all your wonderful qualities is not a task the accomplishment of which is easy to a man in my condition.

I shall praise Socrates in a figure which shall appear to him to be a caricature, and yet I do not mean to laugh at him, but only to speak the truth. I say then, that he is exactly like the masks of Silenus, which may be seen sitting in the statuaries' shops, having pipes and flutes in their mouths; and they are made to open in the middle, and there are images of gods inside them. I say also that he is like Marsyas the satyr. You will not deny, Socrates, that your face is like that of a satyr. Aye, and there is a resemblance in other points too. For example, you are a bully, — that I am in a position to prove by the evidences of witnesses, if you will not confess. And are you not a flute-player? That you are, and a far

more wonderful performer than Marsyas. For he indeed with instruments charmed the souls of men by the power of his breath, as the performers of his music do still: for the melodies of Olympus are derived from the teaching of Marsyas, and these, whether they are played by a great master or by a miserable flute-girl, have a power which no others have; they alone possess the soul and reveal the wants of those who have needs of gods and mysteries, because they are inspired. But you produce the same effect with the voice only, and do not require the flute: that is the difference between you and him. When we hear any other speaker, even a very good one, his words produce absolutely no effect upon us in comparison, whereas the very fragments of you and your words, even at second-hand, and however imperfectly repeated, amaze and possess the souls of every man, woman, and child who comes within hearing of them. And if I were not afraid that you would think me drunk, I would have sworn as well as spoken to the influence which they have always had and still have over me. For my heart leaps within me more than that of any Corybantian reveller, and my eyes rain tears when I hear them. And I observe that many others are affected in the same way. I have heard Pericles and other great orators, but though I thought that they spoke well, I never had any similar feeling; my soul was not stirred by them, nor was I angry at the thought of my own slavish state. But this Marsyas has often brought me to such a pass, that I have felt as if I could hardly endure the life which I am leading (this, Socrates, you admit); and I am conscious that if I did not shut my ears against him, and fly from the voice of the siren, he would detain me until I grew old sitting at his feet. For he makes me confess that I ought not to live as I do, neglecting the

wants of my own soul, and busying myself with the concerns of the Athenians; therefore I hold my ears and tear myself away from him. And he is the only person who ever made me ashamed, which you might think not to be in my nature, and there is no one else who does the same. For I know that I can not answer him or say that I ought not to do as he bids, but when I leave his presence the love of popularity gets the better of me. And therefore I run away and fly from him, and when I see him I am ashamed of what I have confessed to him. And many a time I wish that he were dead, and yet I know that I should be much more sorry than glad, if he were to die: so that I am at my wit's end.

And this is what I and many others have suffered from the flute-playing of this satyr. Yet hear me once more while I show you how exact the image is, and how marvellous his power. For I am sure that none of you know him; but I know him and will describe him, as I have begun. See you how fond he is of the fair? He is always with them and is always being smitten by them, and then again he knows nothing and is ignorant of all things — that is the appearance which he puts on. Is he not like a Silenus in this? Yes, surely: that is, his outer mask, which is the carved head of the Silenus; but when he is opened, what temperance there is, as I may say to you, O my companions in drink, residing within. Know you that beauty and wealth and honor, at which the many wonder, are of no account with him, and are utterly despised by him: he regards not at all the persons who are gifted with them; mankind are nothing to him; all his life is spent in mocking and flouting at them. But when I opened him, and looked within at his serious purpose, I saw in him divine and golden images of such fascinating beauty that I was ready to do in

a moment whatever Socrates commanded: (they may have escaped the observation of others, but I saw them). Now I thought that he was seriously enamored of my beauty, and this appeared to be a grand opportunity of hearing him tell what he knew, for I had a wonderful opinion of the attractions of my youth. In the prosecution of this design, when I next went to him, I sent away the attendant who usually accompanied me (I will confess the whole truth, and beg you to listen; and if I speak falsely, do you, Socrates, expose the falsehood). Well, he and I were alone together, and I thought that when there was nobody with us, I should hear him speak the language of love as lovers do, and I was delighted. Not a word; he conversed as usual, and spent the day with me and then went away. Afterwards I challenged him to the palaestra; and he wrestled and closed with me several times alone; I fancied that I might succeed in this way. Not a bit; there was no use in that. Lastly, as I had failed hitherto, I thought that I must use stronger measures and attack him boldly, as I had begun, and not give him up until I saw how the matter stood. So I invited him to supper, just as if he were a fair youth, and I a designing lover. He was not easily persuaded to come; he did, however, after a while accept the invitation, and when he came the first time, he wanted to go away at once as soon as supper was over, and I had not the face to detain him. The second time, still in pursuance of my design, after we had supped, I went on conversing far into the night, and when he wanted to go away, I pretended that the hour was late and that he had better remain. So he lay down on the next couch to me, the same on which he had supped, and there was no one else in the apartment. All this may be told without shame to any one. But what follows I could hardly tell you

if I were sober. Yet as the proverb says, "In vino veritas," whether there is in boys or not; and therefore I must speak. Nor, again, should I be justified in concealing the lofty actions of Socrates as I come to praise him. Moreover I have felt the pang; and he who has suffered, as they say, is willing to tell his fellow-sufferers only, as they alone will be likely to understand him, and will not be extreme in judging of the sayings or doings which have been wrung from his agony. For I have been bitten by the viper too; I have known in my soul, or in my heart, or in some other part, that worst of pangs, more violent in ingenuous youth than any serpent's tooth, the pang of philosophy, which will make a man say or do anything. And you whom I see around me, your Phaedrus, your Agathon, your Eryximachus, your Pausanias, your Aristodemus, your Aristophanes, all of you, and I need not say Socrates himself, have all had experience of the same madness and passion of philosophy. Therefore listen and excuse my doings then and my sayings now. But let the attendants and other profane and unmannered persons close the doors of their ears.

When the lamp was put out and the servants had gone away, I thought that I must be plain with him and have no more ambiguity. So I gave him a shake, and I said: "Socrates, are you asleep?" "No," he said. "Do you know what I am meditating?" "What is that?" he said. "I think," I replied, "that of all the lovers whom I have ever had you are the only one who is worthy of me, and you appear to be too modest to speak. Now I feel that I should be a fool to refuse you this or any other favor, and therefore I come to lay at your feet all that I have and all that my friends have, in the hope that you will assist me in the way of virtue, which I desire above all things,

and in which I believe that you can help me better than any one else. And I am certainly of opinion that I should have more reason to be ashamed of what wise men would say if I were to refuse a favor to such as you, than of what fools would say if I granted it." When he heard this, he said in his ironical manner: "Friend Alcibiades, you have indeed an elevated aim if what you say is true, and if there really is in me any power by which you may become better; truly you must see in me some rare beauty of a kind infinitely higher than that which I see in you. And if, seeing this, you mean to share with me and to exchange beauty for beauty, you will have greatly the advantage of me; you will gain real beauty in return for appearance — gold in exchange for brass. But look again, sweet friend, and see whether you are not deceived in me. The mind begins to grow critical when the bodily eye fails, and you have not come to that yet." Hearing this, I said: "I have told you my purpose, which is quite serious, and do you consider what you think best for you and me." "That is good," he said; "at some other time then we will consider and act as seems best about this and about other matters." When I heard this answer, I fancied that he was smitten, and that my arrows had wounded him, and so without waiting to hear more I got up, and throwing my coat about him crept under his threadbare cloak, as the time of year was winter, and there I lay during the whole night having this wonderful monster in my arms. You won't deny this, Socrates. And yet, notwithstanding all this, he was so superior to my solicitations, so contemptuous and derisive and disdainful of my beauty — which really, as I believe, had some attractions — hear, O judges; for judges you shall be of the haughty virtue of Socrates — that in the morning when I awoke

(let all the gods and goddesses be my witnesses) I arose as from the couch of a father or an elder brother.

What do you suppose must have been my feelings after this rejection at the thought of my own dishonor? And yet I could not help wondering at his natural temperance and self-restraint and courage. I never could have thought that I should have met with a man like him in wisdom and endurance. Neither could I be angry with him or renounce his company, any more than I could hope to win him. For I well knew that if Ajax could not be wounded by steel, much less he by money; and I had failed in my only chance of captivating him. So I wandered about and was at my wit's end; no one was ever more hopelessly enslaved by another. All this, as I should explain, happened before he and I went on the expedition to Potidaea; there we messed together, and I had the opportunity of observing his extraordinary power of sustaining fatigue and going without food when our supplies were intercepted at any place, as will happen with an army. In the faculty of endurance he was superior not only to me but to everybody; there was no one to be compared to him. Yet at a festival he was the only person who had any real powers of enjoyment, and though not willing to drink, he could if compelled beat us all at that, and the most wonderful thing of all was that no human being had ever seen Socrates drunk; and that, if I am not mistaken, will soon be tested. His endurance of cold was also surprising. There was a severe frost, for the winter in that region is really tremendous, and everybody else either remained indoors, or if they went out had on no end of clothing, and were well shod, and had their feet swathed in felt and fleeces: in the midst of this, Socrates, with his bare feet on the ice, and in his ordinary dress, marched better than any

of the other soldiers who had their shoes on, and they looked daggers at him because he seemed to despise them.

I have told you one tale, and now I must tell you another, which is worth hearing, of the doings and sufferings of this enduring man while he was on the expedition. One morning he was thinking about something which he could not resolve; and he would not give up, but continued thinking from early dawn until noon — there he stood fixed in thought; and at noon attention was drawn to him, and the rumor ran through the wondering crowd that Socrates had been standing and thinking about something ever since the break of day. At last, in the evening after supper, some Ionians out of curiosity (I should explain that this was not in winter but in summer), brought out their mats and slept in the open air that they might watch him and see whether he would stand all night. There he stood all night as well as all day and the following morning; and with the return of light he offered up a prayer to the sun, and went his way. I will also tell, if you please — and indeed I am bound to tell — of his courage in battle; for who but he saved my life? Now this was the engagement in which I received the prize of valor: for I was wounded and he would not leave me, but he rescued me and my arms; and he ought to have received the prize of valor which the generals wanted to confer on me partly on account of my rank, and I told them so (this Socrates will not impeach or deny), but he was more eager than the generals that I and not he should have the prize. There was another occasion on which he was very noticeable; this was in the flight of the army after the battle of Delium, and I had a better opportunity of seeing him than at Potidaea as I was myself on horseback, and therefore comparatively out

of danger. He and Laches were retreating as the troops were in flight, and I met them and told them not to be discouraged, and promised to remain with them; and there you might see him, Aristophanes, as you describe, just as he is in the streets of Athens, stalking like a pelican, and rolling his eyes, calmly contemplating enemies as well as friends, and making very intelligible to anybody, even from a distance, that whoever attacks him will be likely to meet with a stout resistance; and in this way he and his companion escaped — for these are the sort of persons who are never touched in war; they only pursue those who are running away headlong. I particularly observed how superior he was to Laches in presence of mind. Many are the wonders of Socrates which I might narrate in his praise; most of his ways might perhaps be paralleled in others, but the most astonishing thing of all is his absolute unlikeness to any human being that is or ever has been. You may imagine Brasidas and others to have been like Achilles; or you may imagine Nestor and Antenor to have been like Pericles; and the same may be said of other famous men, but of this strange being you will never be able to find any likeness however remote, either among men who now are or who ever have been, except that which I have already suggested of Silenus and the satyrs; and this is an allegory not only of himself, but also of his words. For, although I forgot to mention this before, his words are ridiculous when you first hear them; he clothes himself in language that is as the skin of the wanton satyr — for his talk is of pack-asses and smiths and cobblers and curriers, and he is always repeating the same things in the same words, so that an ignorant man who did not know him might feel disposed to laugh at him; but he who pierces the mask and sees what is within will find that

they are the only words which have a meaning in them, and also the most divine, abounding in fair examples of virtue, and of the largest discourse, or rather extending to the whole duty of a good and honorable man.

This, friends, is my praise of Socrates. I have added my blame of him for his ill-treatment of me; and he has ill-treated not only me, but Charmides the son of Glaucon, and Euthydemus the son of Diocles, and many others in the same way — beginning as their lover he has ended by making them pay their addresses to him. Wherefore I say to you, Agathon, "Be not deceived by him; learn from me and take warning, and don't be a fool and learn by experience," as the proverb says.

When Alcibiades had done speaking, there was a laugh at his plainness of speech, as he seemed to be still in love with Socrates. You are sober, Alcibiades, said Socrates, or you would never have gone about to hide the purpose of your satyr's praises, for all this long story is only an ingenious circumlocution, the point of which comes in by the way at the end; you want to get up a quarrel between me and Agathon, and your notion is that I ought to love you and nobody else, and that you and you only ought to love Agathon. But the plot of this Satyric or Silenic drama has been detected, and you must not allow him, Agathon, to set us at variance.

I believe you are right, said Agathon, and I am disposed to think that his intention in placing himself between you and me was only to divide us; but he shall gain nothing by that move, as I will go and lie in the couch next to you.

Yes, yes, replied Socrates, by all means come here and lie on the couch below me.

Alas, said Alcibiades, how am I fooled by this man;

he is determined to get the better of me at every turn. I do beseech you, allow Agathon to lie between us.

Impossible, said Socrates, as you praised me, and I ought to praise my neighbor on the right, he will be out of order in praising me again when he ought rather to be praised by me, and I must entreat you to consent to this, and not be jealous, for I have a great desire to praise the youth.

Ha! ha! cried Agathon, I will rise instantly, that I may be praised by Socrates.

The usual way, said Alcibiades, where Socrates is, no one else has any chance with the fair, and now how readily has he invented a specious reason for attracting Agathon to himself.

Agathon arose in order that he might take his place on the couch by Socrates, when suddenly a band of revellers entered, and spoiled the order of the banquet. Some one who was going out having left the door open, they had found their way in, and made themselves at home; great confusion ensued, and every one was compelled to drink large quantities of wine. Aristodemus said that Eryximachus, Phaedrus, and others went away — he himself fell asleep, and as the nights were long took a good rest: he was awakened towards daybreak by a crowing of cocks, and when he awoke, the others were either asleep, or had gone away; there remained awake only Socrates, Aristophanes, and Agathon, who were drinking out of a large goblet which they passed round, and Socrates was discoursing to them. Aristodemus did not hear the beginning of the discourse, and he was only half awake, but the chief thing which he remembered, was Socrates insisting to the other two that the genius of comedy was the same as that of tragedy, and that the writer of tragedy ought to be a writer of comedy also. To this they were compelled to assent, being sleepy, and not quite under-

standing his meaning. And first of all Aristophanes dropped, and then, when the day was already dawning, Agathon. Socrates, when he had put them to sleep, rose to depart, Aristodemus, as his manner was, following him. At the Lyceum he took a bath and passed the day as usual; and when evening came he retired to rest at his own home.

PHAEDRUS

INTRODUCTION

The Phaedrus is closely connected with the Symposium, and may be regarded either as introducing or following it. The two Dialogues together contain the whole philosophy of Plato on the nature of love, which in the Republic and in the later writings of Plato is only introduced playfully or as a figure of speech. But in the Phaedrus and Symposium love and philosophy join hands, and one is an aspect of the other. The spiritual and emotional part is elevated into the ideal, to which in the Symposium mankind are described as looking forward, and which in the Phaedrus, as well as in the Phaedo, they are seeking to recover from a former state of existence. Whether the subject of the Dialogue is love or rhetoric, or the union of the two, or the relation of philosophy to love and to art in general, will be hereafter considered.

Phaedrus has been passing the day with Lysias, the celebrated rhetorician, and is going to refresh himself by taking a walk outside the wall, when he is met by Socrates, who professes that he will not leave him until he has delivered up the speech with which Lysias has regaled him, and which he is carrying about in his mind, or more probably in a book hidden under his cloak, and is intending to study as he walks. The imputation is not denied, and the two agree to direct their steps out of the public way along the stream of the Ilissus towards a plane-tree which is seen in the distance. There, lying down amidst pleasant sounds and scents, they will read the speech of Lysias. The country is a novelty to Socrates, who never goes out of the town; and hence he is full of admiration for the beauties of nature, of which he seems for the first time to be conscious.

In the course of their walk Phaedrus asks the opinion of Socrates respecting the local tradition of Boreas and Oreithyia. Socrates, after a satirical allusion to the "rationalizers" of his day, replies that he has no time for these "nice" interpretations of mythology; "the proper study of mankind is man," who is a far more complex and wonderful being than the serpent Typhon. When they have reached the plane-tree, Phaedrus pulls out the speech and reads.

The speech consists of a foolish paradox which is to the effect that the non-lover ought to be accepted rather than the lover — because he is more rational, more agreeable, more enduring, less suspicious, less hurtful, less boastful, less engrossing, and because there are more of them, and for a great many other reasons which are equally unmeaning. Phaedrus is captivated with the beauty of the periods, and wants to make Socrates say that nothing was or ever could be better written. Socrates does not think much of the matter, but then he has only attended to the form, and in the form he thinks that he has detected repetitions and other marks of haste. He can not agree with Phaedrus in the extreme value which he sets upon this performance, because he is afraid of doing injustice to Anacreon and Sappho and other great writers, and is almost inclined to think that he himself, or rather some power residing within him, could make a speech better than that of Lysias on the same theme, and also different from his, if he may be allowed to have a few commonplaces which all speakers must equally employ.

Phaedrus is delighted at the prospect of having another speech, and promises that he will set up a golden statue of Socrates at Delphi, if he keeps his word. Some raillery ensues, and at length Socrates, conquered by the threat that he shall never hear a speech of Lysias again unless he fulfils his promise, veils his face and begins.

The first part of his speech is a somewhat prosaic discussion of the opposition between desire and opinion guided by reason. But he has not proceeded far when he fancies that he detects in himself an unusual flow of eloquence — this he can only attribute to the inspiration of the place, which appears to be dedicated to the nymphs. Starting from the philosophical basis which has been already laid down, he proceeds to show how many advantages the non-lover has over the lover. The one leads to softness and poverty and exclusiveness, and is full of all sorts of unpleasantness; "crabbed age and youth" have to "live together," and the sight and the ways of the old are mighty disagreeable to the young. Or if they part company, then the spectacle may be seen of the lover running away from the beloved, who pursues him with vain reproaches, and demands his reward which the other refuses to pay. The lover turns virtuous when the hour of payment arrives, and the beloved learns too late, after all his pains and disagreeables, that as wolves love lambs so lovers love their loves. Here is the end; the "other" or "non-lover" part of the speech had better be under-

stood, for if in the censure of the lover Socrates has broken out in verse, what will he do in his praise of the non-lover? He has said his say and is preparing to go away.

Phaedrus begs him to remain, at any rate until the heat of noon has passed; he thinks that they may as well have a little more conversation before they go. Socrates, who has risen to go, recognizes the oracular sign which forbids him to depart until he has done penance. His conscience has been awakened, and like Stesichorus over Helen he will sing a palinode for having blasphemed the majesty of love. His palinode takes the form of a myth.

Socrates begins his tale with a glorification of madness, which he divides into four kinds: first, there is the art of divination or prophecy — this, in a vein similar to that of the Cratylus, he connects with madness by an etymological explanation ("'tis all one reckoning, save the phrase is a little variations"); secondly, there is the art of purification by mysteries; thirdly, poetry or the inspiration of the Muses, without which no man can enter their temple. All this shows that madness is one of heaven's blessings, and may sometimes be a great deal better than sense. There is also a fourth kind of madness which cannot be explained without inquiring into the nature of the soul.

The soul is immortal, for she is the source of all motion both in herself and in others. Of her true and divine form it would be long to tell, but she may be described in a figure as a composite being made up of a charioteer and a pair of winged steeds. The steeds of the gods are immortal, but ours are one mortal and the other immortal. The immortal soul soars upwards into the heavens, but the mortal drops her plumes and is draggled upon the earth.

Now the nature of the wings is to rise and carry the downward element into the upper world — there to behold beauty, wisdom, goodness, and the other things of God by which the soul is nourished. On a certain day Zeus the lord of heaven goes forth in a winged chariot; and an array of gods and demi-gods and of human souls in their train, follows him. There are glorious and blessed sights in the interior of heaven, and he who will may freely behold them. The great vision of all is seen at the feast of the gods, when they ascend the heights of heaven — all but Hestia, who is left at home to keep house. The horses of the gods glide readily upwards and stand upon the outside, and are carried round in the revolutions of the spheres, and gaze upon the world beyond. But of this world beyond the heavens, who can

tell? There is an essence formless, colorless, intangible, perceived by the mind only, circling above in the place of true knowledge. The divine mind in her revolution enjoys this fair prospect, and beholds justice, temperance, and knowledge in their everlasting essence. When fulfilled with the sight of them she returns home, and the charioteer puts up the horses in their stable, and gives them ambrosia to eat and nectar to drink. This is the life of the gods; and the human soul tries to reach the same heights, but hardly succeeds; and sometimes the head of the charioteer rises above, and sometimes sinks below the fair vision, and is at last obliged, after much contention, to turn away and leave the plain of truth. Yet if she has followed in the train of any god and once beheld truth she is preserved harmless, and is carried round in the next revolution of the spheres; and if always following, and always seeing the truth, then forever harmless. But if she drops her wings and falls to the earth, then she takes the form of man, and the soul which has seen most of the truth passes into a philosopher or lover; that which has seen truth in the second degree, into a king or warrior; the third, into a householder or money-maker; the fourth, into a gymnast; the fifth, into a prophet, or mystic; the sixth, into a poet, or imitator; the seventh, into a husbandman or craftsman; the eighth, into a sophist, or demagogue; the ninth, into a tyrant. In all these conditions he who lives righteously improves, and he who lives unrighteously deteriorates his lot. Ten thousand years elapse before the souls of men in general can regain their first estate, and have their wings restored to them. And the soul of a man may descend into a beast, and return again into the form of man. But the form of man can only be acquired at all by those who have once beheld truth, for the soul of man alone apprehends the universal; and this is the recollection of that knowledge which she attained when in the company of the gods. At the end of every thousand years the soul has another choice, and may go upwards or downwards. Only the soul of a philosopher or lover who has three times in succession chosen the better life may receive wings and go her way in three thousand years.

For the soul in her own nature having the vision of true being remembers in her condition here those glorious sights of justice and temperance and wisdom and truth which she once gazed upon when in company with the heavenly choir. Then she celebrated holy mysteries and beheld blessed apparitions shining in pure light, herself pure and not as yet entombed in the oyster-shell

of the body. And still she is eager to depart, and like a bird is fluttering and looking upwards, and is therefore esteemed mad. Such a light of other days is spread over her when she remembers that beauty which alone of the ideas has any visible representation on earth. For wisdom has no outward form, and is "too dazzling bright for mortal eye." Now the corrupted nature, when blindly excited by the vision of beauty, only rushes on to enjoy, and wallows like a quadruped in sensual pleasures. But the true mystic, who has seen the many sights of bliss, when he beholds a godlike form or face is ravished with delight, and if he were not afraid of being thought mad he would fall down and worship. Then the stiffened wing begins to relax and grow again. At the sight of earthly beauty the memory of the heavenly is recalled; desire which has been imprisoned, pours over the soul of the lover; the germ of the wing unfolds, and stings and pangs at birth, like the cutting of teeth, are everywhere felt. Father and mother, and goods and laws, and proprieties are nothing to him; his beloved is his physician, who can alone cure his pain. An apocryphal sacred writer says that mortals call him love, but the immortals call him dove, or the winged one, in order to represent the force of his wings — at any rate this is his nature. Now the characters of lovers depend upon the god whom they followed in the other world, and they choose their loves in this world accordingly. The followers of Ares are fierce and violent; those of Zeus seek out some philosophical and imperial nature; the attendants of Here find a royal love; and in like manner the followers of every god seek a love who is in his likeness, and they communicate to him the nature which they have received from their god. The manner in which they take their love is as follows: —

I told you about the charioteer and two steeds, the one a noble animal who is guided by word and admonition only, the other an ill-looking villain who will hardly yield to blow or spur. Together all three, who are a figure of the soul, approach the vision of love. And now a conflict begins. The ill-conditioned steed rushes on to enjoy, but the charioteer, who beholds the beloved with awe, falls back in adoration, and forces both the steeds on their haunches; again the evil steed rushes forwards and pulls shamelessly. Then a still more fearful conflict ensues; the charioteer dropping at the very start jerks violently the bit from the clenched teeth of the brute, and pulling harder than ever at the reins, covers his tongue and jaws with blood, and forces him to rest his hocks and haunches with pain upon the

ground. When this has happened several times, the villain is tamed and humbled, and from that time forward the soul of the lover follows the beloved in modesty and holy fear. And now their bliss is consummated; the same image of love dwells in the breast of either; and if they have self-control, they pass their lives in the greatest happiness which is attainable by man — they live masters of themselves and conquer in one of the three heavenly victories. But if they choose the lower life of ambition they may still have a happy destiny, though inferior, because they have not the approval of the whole soul. At last they leave the body and proceed on their pilgrim's progress, and those who have once begun can never go back. When the time comes they receive their wings and fly away, and the lovers have the same wings.

Socrates concludes: —

These are the blessings of love, and thus I have made my recantation in finer language than before, but this was only in order to please Phaedrus. If I said what was wrong at first, please to attribute my error to Lysias, who ought to study philosophy instead of rhetoric, and then he will not mislead his disciple Phaedrus.

Phaedrus is afraid that he will lose conceit of Lysias, and that Lysias will be out of conceit with himself, and leave off making speeches, as the politicians have been deriding him. Socrates is of opinion that there is small danger of this, and that the politicians are themselves the great rhetoricians of the age, who desire to obtain immortality by the authorship of laws, and therefore there can be no disgrace, nothing with which anybody could reproach Lysias in being a writer, but there may be disgrace in being a bad one.

And what is good or bad writing or speaking? There is time to consider that question. For by the discussion of such questions man lives, and not by the indulgence of bodily pleasures. And the grasshoppers who are chirruping around may carry our words to the Muses, who are their patronesses; for the grasshoppers were human beings themselves in a world before the Muses, and when the Muses came they died of hunger for the love of song. And they carry to them in heaven the report of those who honor them on earth.

The first rule of good speaking is to know and speak truth; true art is truth, says a Spartan proverb, whereas rhetoric is a mode of enchanting the soul, which makes things appear good and evil, like and unlike, according to the fancy of the speaker.

Still, mankind are deceived, not all at once, but by degrees, and therefore he who would either impose on others or escape imposition must know the truth.

Socrates then proposes that they shall use the two speeches as illustrations of the art of rhetoric; first distinguishing between the debatable and undisputed class of subjects. In the debatable class there ought to be a definition of all disputed matters. But there was no such definition in the speech of Lysias; nor is there any order or connection in his words any more than in a nursery rhyme. With this he compares the regular divisions of the other speech, which was his own (and yet not his own, for the local deities must have inspired him). This "fancy" of his will be found to embody two principles; first, that of synthesis or the comprehension of parts in a whole; secondly, analysis, or the resolution of the whole into parts. These are the processes of division and generalization which are so dear to the dialectician, that king of men. But this is dialectic and not rhetoric; of which the remains are but scanty after order and arrangement have been subtracted. There is nothing left but a heap of "ologies" and other technical terms invented by Theodorus, Evenus, Tisias, Gorgias, and others who have rules for everything, and who teach how to be short or long at pleasure. Prodicus showed his good sense in saying that there was a better thing than either being short or long, which was to be of a convenient length.

Still, notwithstanding the absurdities of Polus and others, rhetoric has great power in public assemblies. This, however, is not given by these technical rules, but is the gift of genius. The real art is always being confused by rhetoricians with the preliminaries of the art. The perfection of oratory is the perfection of all things; but for this the art of rhetoric can do little, and the art which does this little is of another kind from that which is taught by the rhetoricians.

Pericles, the most accomplished of all speakers, derived his art not from rhetoric but from the philosophy of nature which he learned from Anaxagoras. The true rhetoric is like medicine, and the rhetorician has to consider the natures of men's souls as the physician considers the natures of their bodies. Such and such persons are to be affected in this way, such and such others in that; he must know the times and the seasons for saying this or that. This is not an easy task, and this, if there be such an art, is the art of rhetoric.

I know that there are some professors of the art who maintain

that probability is stronger than truth. But we maintain that probability is engendered by likeness of the truth which is best attained by the knowledge of the truth, and that the aim of the good man should not be to please or persuade his fellow-servants, but to please his good masters who are the gods. Rhetoric has a fair beginning in this.

Enough of the art of speaking; let us now proceed to consider the true use of writing. There is an old Egyptian tale of Theuth, the inventor of writing, showing his invention to the god Thamuz, who told him that he would only spoil men's memories and take away their understandings. From this tale, which young Athens will probably scorn, may be gathered the lesson that writing is inferior to speech. For writing is like a picture which can give no answer to a question, and has only a deceitful likeness of a living creature. It has no power of adaptation, but uses the same words for all. It is a sort of bastard and not a legitimate son of knowledge, and when an attack is made upon the illegitimate progeny neither the parent nor any one else is there to defend it. The husbandman will not seriously incline to sow his seed in such a hot-bed or garden of Adonis; he will rather sow in the natural soil of the human soul which has depth of earth; and he will anticipate this natural process by writing, if at all, only as a remedy against old age. The natural growth will be far nobler, and bring forth fruit not only in his own but in other minds.

The conclusion of the whole matter is just this, — that until a man knows the truth, and the manner of adapting the truth to the natures of other men, he can not be a good orator; also, that the living is better than the written word, and that the principles of justice and truth when delivered by word of mouth are the legitimate offspring of a man's own bosom, and their lawful descendants take up their abode in others. Such an orator as he is who has them, you and I would fain become. And to all composers in the world who are poets, orators, legislators, we hereby announce that if their compositions are based upon these principles then they are not only poets, orators, statesmen, but philosophers. All the rest are mere flatterers and putters together of words. This is the message which Phaedrus undertakes to carry to Lysias from the local deities, and Socrates will himself carry a similar message to his favorite Isocrates, whose future distinction as a great rhetorician he prophesies. The heat of the day has passed and, after offering up a prayer to Pan and the nymphs, Socrates and Phaedrus depart.

There are two principal controversies which have been raised about the Phaedrus; the first relates to the subject, the second to the date of the Dialogue.

There seems to be a notion that the work of a great artist like Plato could not fail in unity, and that the unity of a dialogue requires a single subject. But the conception of unity really applies in very different degrees and ways to different kinds of art; to a statue, for example, far more than to any kind of literary composition, and to some species of literature far more than to others. Nor does the dialogue appear to be a style of composition in which the requirement of unity is most stringent; nor should the idea of unity derived from one sort of art be hastily transferred to another. The double titles of several of the Platonic Dialogues seem to indicate that this severer unity was not attempted by Plato. The Republic is divided between the search after justice and the construction of the ideal state; the Parmenides between the criticism of the Platonic ideas and of the Eleatic one or being; the Gorgias between the art of speaking and the nature of the good; the Sophist between the detection of the Sophist and the correlation of ideas. The Theaetetus, the Politicus, and the Philebus, have also digressions which are but remotely connected with the main subject.

Thus the comparison of Plato's other writings, as well as the reason of the thing, lead us to the conclusion that we are not to expect to find one idea pervading a whole work, but one, two, or more, as the invention of the writer may suggest or his fancy wander. If each dialogue were confined to the development of a single idea, this would appear on the face of the dialogue, nor could any controversy be raised as to whether the Phaedrus treated of love or rhetoric. But the truth is that Plato subjects himself to no rule of this sort. Like every great artist he gives unity of form to the different and apparently distracting topics which he brings together. He works freely and is not to be supposed to have arranged every part of the dialogue before he begins to write. He fastens or weaves together the frame of his discourse loosely and imperfectly, and which is the warp and which is the woof is not always easy to determine.

The subjects of the Phaedrus (exclusive of the short introductory passage about mythology which is suggested by the local tradition) are first the false or conventional art of rhetoric; secondly, love or the inspiration of beauty and knowledge which is described as madness; thirdly, dialectic or the art of composition and division; fourthly, the true rhetoric, which is based upon

dialectic; fifthly, the superiority of the spoken over the written word. The continuous thread which appears and reappears throughout is rhetoric; this is the ground into which the rest of the Dialogue is inlaid, in parts embroidered with fine words "in order to please Phaedrus." The speech of Lysias, and the first speech of Socrates are examples of the false rhetoric, as the second speech of Socrates is adduced as an instance of the true. But the true rhetoric is based upon dialectic, and dialectic is a sort of inspiration akin to love; they are two aspects of philosophy in which the technicalities of rhetoric are absorbed. Thus the example becomes also the deeper theme of discourse. The true knowledge of things in heaven and earth is based upon enthusiasm or love of the ideas; and the true order of speech or writing proceeds according to them. Love, again, has three degrees: first, of interested love corresponding to the conventionalities of rhetoric; secondly, of disinterested or mad love, fixed on objects of sense and answering, perhaps, to poetry; thirdly, of disinterested love directed towards the unseen, answering to dialectic or the science of the ideas. Lastly, the art of rhetoric in the lower sense is found to rest on a knowledge of the natures and characters of men, which Socrates at the commencement of the Dialogue has described as his own peculiar study.

Thus amid the appearance of discord a very tolerable degree of uniformity begins to arise; there are many threads of connection which are not visible at first sight. At the same time the Phaedrus, although one of the most beautiful of the Platonic dialogues, may be admitted to have more of the character of a "tour de force," and has certainly more of the "quidlibet audendi potestas" than any other.

The first speech is composed "in that balanced style in which the wise love to talk." The characteristics of rhetoric are insipidity, mannerism, and monotonous parallelism of clauses. There is more rhythm than reason; the creative power of imagination is wanting.

"'Tis Greece, but living Greece no more."

Plato has seized by anticipation the spirit which hung over Greek literature for a thousand years afterwards. Yet doubtless there were some who, like Phaedrus, felt a delight in the harmonious cadence and the pedantic reasoning of the rhetoricians newly imported from Sicily, which had ceased to be awakened in them by really great works, such as the poems of Anacreon or Sappho or the orations of Pericles. That the first speech was

really written by Lysias is improbable. Like the poem of Solon, or the story of Thamuz and Theuth, or the funeral oration of Aspasia (if genuine), or the pretence of Socrates in the Cratylus that his knowledge of philology is derived from Euthyphro, the invention is really due to the imagination of Plato, and may be compared to the parodies of the Sophists in the Protagoras. Numerous fictions of this sort occur in the dialogues, and the gravity of Plato has sometimes imposed upon his commentators. The introduction of a considerable writing of another would seem not to be in keeping with a great work of art, and has no parallel elsewhere.

In the second speech Socrates is exhibited as beating the rhetoricians at their own weapons; he "an unpractised man and they masters of the art." True to his character he must, however, profess that the speech which he makes is not his own, for he knows nothing of himself. The superiority of this speech over the first seems to consist chiefly in a better arrangement of the topics; a lesser merit is the greater liveliness of Socrates, which hurries him into verse and relieves the monotony of the style; and he gives an apparent weight to his words by going back to general maxims.

Both speeches are strongly condemned by Socrates as sinful and blasphemous towards the god Love, and as worthy only of some haunt of sailors to which good manners were unknown. The meaning of this and other wild language to the same effect, which is introduced by way of contrast to the formality of the two speeches (Socrates has a sense of relief when he has escaped from the trammels of rhetoric) seems to be that the two speeches proceed upon the supposition that love is and ought to be interested, and that no such thing as a real or disinterested passion, which would be at the same time lasting, could be conceived.

This is what Socrates proposes to recant in the famous myth, which is a sort of parable, and like other parables ought not to receive too minute an interpretation. In all such allegories there is a great deal which is merely ornamental, and the interpreter has to separate the important from the unimportant. Socrates himself has given the right clue when, in using his own discourse afterwards as the text for his examination of rhetoric, he characterizes it as a "partly true and tolerably credible mythus," in which amid poetical figures, order and arrangement were not forgotten.

The soul is described in magnificent language as the self-

moved and the source of motion in all other things. This is the philosophical theme or proem of the whole. But ideas must be given through something, and under the pretext that to realize the true nature of the soul would be not only tedious but impossible, we at once pass on to describe the souls of gods as well as men under the figure of two winged steeds and a charioteer. No connection is traced between the soul as the great motive power and the triple soul which is thus imaged. There is no difficulty in seeing that the charioteer represents the reason, or that the black horse is the symbol of the sensual or concupiscent element of human nature. The white horse also represents rational impulse, but the description, "a lover of honor and modesty and temperance, and a follower of true glory," though kindred, does not at once recall the "spirit" of the Republic. The two steeds really correspond in a figure more nearly to the appetitive and moral or semi-rational soul of Aristotle. And thus for the first time, perhaps, in the history of philosophy, we have represented to us the threefold division of psychology. The image of the charioteer and the steeds has been compared with a similar image which occurs in the verses of Parmenides; but it is important to remark that the horses of Parmenides have no allegorical meaning, and that the poet is only describing his own approach in a chariot to the regions of light and the house of the goddess of truth.

The triple soul has had a previous existence, in which following in the train of some god, from whom she derived her character, she beheld partially and imperfectly the vision of absolute truth. All her after existence, passed in many forms of men and animals, is spent in regaining this. In the various stages of this long struggle she is sorely let and hindered by the animal desires of the inferior or concupiscent steed. Again and again she beholds the flashing beauty of the beloved. But before that vision can be finally enjoyed the animal desires must be subjected.

The moral or spiritual element in man is represented by the immortal steed which, like *θυμὸς* in the Republic, always sides with the reason. Both are dragged out of their course by the furious impulses of desire. In the end something is conceded to the desires, after they have been finally humbled and overpowered. And yet the way of philosophy, or perfect love of the unseen is total abstinence from bodily delights. "But all men can not receive this saying:" in the lower life of ambition they may be taken off their guard and stoop to folly unawares, and

then, although they do not attain to the highest bliss, yet if they have once conquered they may be happy enough.

The language of the Meno and the Phaedo as well as of the Phaedrus, seems to show that at one time of his life Plato was quite serious in maintaining a former state of existence. His mission was to realize the abstract; in that all good and truth, all the hopes of this and another life seemed to centre. It was another kind of knowledge to him — a second world distinct from that of sense, which seemed to exist within him far more truly than the fleeting objects of sense which are without him. When we are once able to imagine the intense power which abstract ideas exercised over the mind of Plato, we see that there was no more difficulty to him in realizing the eternal existence of them and of the human minds which were associated with them — in the past and future than in the present. The difficulty was not how they could exist, but how they could fail to exist. In the attempt to regain this "saving" knowledge of the ideas, the sense was found to be as great an enemy as the desires; and hence two things which to us seem quite distinct are inextricably blended in the representation of Plato.

Thus far we may believe that Plato was serious in his conception of the soul as a motive power, in his reminiscence of a former state of being, in his elevation of the reason over sense and passion, and perhaps in his doctrine of transmigration. Was he equally serious in the rest? For example, are we to attribute his tripartite division of the soul to the gods? Or is this merely assigned to them by way of parallelism with men? The latter is the more probable; for the horses of the gods are both white, i. e. their every impulse is in harmony with reason; their dualism, on the other hand, only carries out the figure of the chariot. Is he serious, again, in regarding love as "a madness?" That seems to arise out of the antithesis to the former conception of love. At the same time he appears to intimate here, as in the Ion, Apology, Meno, and elsewhere, that there is a faculty in man, whether to be termed in modern language genius, or inspiration, or idealism, which can not be reduced to rule and measure. Perhaps, too, he is ironically repeating the common language of mankind about philosophy, and is turning their jest into a sort of earnest. Or is he serious in holding that each soul bears the character of a god? Perhaps he had no other account to give of the differences of human characters to which he afterwards refers. It seems to be characteristic of the irony of Socrates to mix up sense and nonsense in such a

way that no exact line can be drawn between them. And allegory helps to increase this sort of confusion.

As is often the case in the parables and prophecies of Scripture, the meaning is allowed to break through the figure, and the details are not always consistent. When the charioteers and their steeds stand upon the dome of heaven they behold the intangible, invisible essences which are not objects of sight. This is because the force of language can no further go. Nor can we dwell much on the circumstance, that at the completion of ten thousand years all are to return to the place from whence they came; because he also represents this as dependent on their own good conduct in the successive stages of existence. Nor again can we attribute anything to the accidental inference which would also follow, that even a tyrant may live righteously in the condition of life to which fate has called him ("he aiblins might, I dinna ken"). But this would be much at variance with Plato himself and with Greek notions generally. He is much more serious in distinguishing men from animals by their recognition of the universal which they have known in a former state, and in denying that this gift of reason can ever be obliterated or lost. In the language of some modern theologians he might be said to maintain the "final perseverance" of those who have entered on their pilgrim's progress. Other intimations of a "metaphysic" or "theology" of the future may also be discerned in him: (1) The moderate predestinarianism which here, as in the Republic, acknowledges the element of chance in human life, and yet asserts the freedom and responsibility of man; (2) The recognition of a moral as well as an intellectual principle in man under the image of an immortal steed; (3) The notion that the divine nature exists by the contemplation of ideas of virtue and justice — or, in other words, the assertion of the essentially moral nature of God; (4) Again, there is the hint that human life is a life of aspiration only, and that the true ideal is not to be found in art; (5) There occurs the first trace of the distinction between certain and contingent matter; (6) The conception of the soul itself as the motive power and reason of the universe.

The conception of the philosopher, or the philosopher and lover in one, as a sort of madman, may be compared with the Republic and Theaetetus, in both of which the philosopher is regarded as a stranger and monster upon the earth. The whole myth, like the other myths of Plato, describes in a figure things which are beyond the range of human faculties, or inaccessible

to the knowledge of the age. That philosophy should be represented as the inspiration of love is a conception that has already become familiar to us in the Symposium, and is the expression partly of Plato's enthusiasm for the idea, and is also an indication of the real power exercised by the passion of friendship over the mind of the Greek. The master in the art of love knew that there was a mystery in these feelings and their associations, and especially in the contrast of the sensible and permanent which is afforded by them; and he sought to explain this, as he explained universal ideas, by a reference to a former state of existence. The capriciousness of love is also derived by him from an attachment to some god in a former world. The singular remark that the beloved is more affected than the lover at the final consummation of their love, seems likewise to have a psychological truth.

We may now pass on to the second part of the Dialogue, which is a criticism on the first. Rhetoric is assailed on various grounds: first, as expecting to deceive, without a knowledge of the truth; and secondly, as ignoring the distinction between certain and probable matter. The three speeches are then passed in review: the first of them has no definition of the nature of love, and no order in the topics (being in these respects far inferior to the second); while the third of them is found (though a fancy of the hour) to be framed upon real dialectical principles. But dialectic is not rhetoric; nothing on that subject is to be found in the endless treatises of rhetoric, however prolific in hard names. When Plato has sufficiently put them to the test of ridicule he touches, as with the point of a needle, the real error of this as well as of much modern literature and writing upon the arts, which is the confusion of preliminary knowledge with creative power. No attainments will provide the speaker with genius; and the sort of attainments which can alone be of any value are the higher philosophy and the power of psychological analysis, which is given by dialectic, not by the rules of the rhetoricians.

Dialectic may be variously defined, either as the power of dividing a whole into parts, and of uniting the parts in a whole, or as the process of the mind talking with herself. The latter view seems to have led Plato to the paradox that speech is superior to writing, in which he may seem also to be doing an injustice to himself. For the truth is, that speech and writing can not be fairly compared in the manner which Plato suggests. The contrast of the living and dead word, as well as the exam-

ple of Socrates, which he has represented in the form of the dialogue, seem to have misled him. For speech and writing have really different functions; the one is more transitory, more diffuse, more elastic and capable of adaptation to moods and times; the other is more permanent, more concentrated, and is uttered not to this or that person or audience, but to all the world. In the Politicus the paradox is carried further; the mind or will of the king is preferred to the written law.

The chief criteria for determining the date of the Dialogue are (1) the ages of Lysias and Isocrates; (2) the character of the work.

Lysias was born in the year 458; Isocrates in the year 436, about seven years before the birth of Plato. The first of the two great rhetoricians is described as in the zenith of his fame; the second as still young and full of promise. Now it is argued that this must have been written in the youth of Isocrates, when the promise was still unfulfilled. And thus we should have to assign the Dialogue to a year not later than 406, when Isocrates was thirty and Plato twenty-three years of age, and while Socrates himself was still alive.

Those who argue in this way seem not to reflect how easily Plato can "invent Egyptians or anything else," and how careless he is of historical truth or probability. Who would suspect that the wise Critias, the virtuous Charmides, had ended their lives among the thirty tyrants? Who would imagine that Lysias, who is here assailed by Socrates, is the son of his old friend Cephalus? Or that Isocrates himself is the enemy of Plato and his school? No arguments can be drawn from the appropriateness or inappropriateness of the characters of Plato. (Else, perhaps, it might be further argued, that judging from their extant remains, insipid rhetoric is far more characteristic of Isocrates than of Lysias.) But Plato makes use of names which have often hardly any connection with the historical characters to whom they belong. In this instance the comparative favor shown to Isocrates may possibly be accounted for by the circumstance of his belonging to the aristocratical, as Lysias to the democratical party.

Few persons will be inclined to suppose, in the superficial manner of some ancient critics, that a dialogue which treats of love must necessarily have been written in youth. As little weight can be attached to the argument that he had probably visited Egypt before he wrote the story of Theuth and Thamuz. For there is no real proof that he ever was in Egypt; and even

if he was, he might have known or invented Egyptian traditions before he went there. The late date of the Phaedrus is really to be proved by other arguments than these: the maturity of the thought, the perfection of the style, the insight, the relation to the other Platonic Dialogues, seem to contradict the notion that it could have been the work of a youth of twenty or twenty-three years of age. The cosmological notion of the mind as the *primum mobile,* and the admission of impulse into the immortal nature, afford grounds for assigning a much later date. Add to this that the picture of Socrates, though in some lesser particulars, e. g. his going without sandals, his habit of remaining within the walls, his emphatic declaration that his study is human nature, an exact resemblance, is in the main the Platonic and not the real Socrates. Can we suppose " the young man to have told such lies " about his master while he was still alive? Moreover, when two Dialogues are so closely connected as the Phaedrus and Symposium, there is great improbability in supposing that one of them was written at least twenty years after the other. The conclusion seems to be, that the Dialogue was written at some comparatively late but unknown period of Plato's life, after he had deserted the purely Socratic point of view, but before he had entered on the more abstract speculations of the Sophist or the Philebus. Comparing the divisions of the soul, the doctrine of transmigration, the isolation of the philosophic life, and the general character of the style, we shall not be far wrong in placing the Phaedrus in the neighborhood of the Republic; remarking only that allowance must be made for the poetical element in the Phaedrus, which, while falling short of the Republic in definite philosophic results, seems to have glimpses of a truth beyond.

Two short passages, which are unconnected with the main subject of the Dialogue, may seem to merit a more particular notice: (1) the *locus classicus* about mythology; (2) the tale of the grasshoppers.

The first passage is remarkable as showing that Plato was entirely free from what may be termed the Euhemerism of his age. (For there were Euhemerists in Greece before Euhemerus.) Other philosophers, like Anaxagoras, had found in Homer and mythology hidden meanings. Plato, with a truer instinct, rejects these attractive interpretations; he regards the invention of them as an " unfortunate " way of employing a man's mind and time. They are endless, and they draw a man off from the knowledge of himself. There is a latent criticism, and also a

poetical sense in Plato, which at once enable him to discard them, and yet in another way to make the fullest use of poetry and mythology as a vehicle of thought and feeling. The "sophistical" interest of Phaedrus, the little touch about the two versions of the story, the ironical manner in which these explanations are set aside, "the common opinion about them is enough for me," may be noted in passing; also the general agreement between the tone of this speech and the remark of Socrates which follows afterwards, "I am a diviner, but a poor one."

The tale of the grasshoppers is naturally suggested by the surrounding scene. Yet we must not forget also, that they are the representatives of the Athenians as children of the soil. Under the image of the lively chirruping grasshoppers who inform the Muses in heaven who honors them on earth, Plato intends to represent an Athenian audience. The story is introduced, apparently, to mark a change of subject, and also, like several other allusions which occur in the course of the Dialogue, in order to preserve the scene in the recollection of the reader.

PHAEDRUS

PERSONS OF THE DIALOGUE

SOCRATES. PHAEDRUS.

SCENE :— Under a plane-tree, by the banks of the Ilissus.

Socrates. My dear Phaedrus, whence come you, and whither are you going?

Phaedrus. I am come from Lysias the son of Cephalus, and I am going to take a walk outside the wall, for I have been with him ever since the early dawn, which is a long while, and our common friend Acumenus advises me to walk in the country; he says that this is far more refreshing than walking in the courts.

Soc. There he is right. Lysias then, I suppose, was in the city?

Phaedr. Yes, he was with Epicrates, at the house of Morychus; that house which is near the temple of Olympian Zeus.

Soc. And how did he entertain you? Can I be wrong in supposing that Lysias gave you a feast of discourse?

Phaedr. You shall hear, if you have leisure to stay and listen.

Soc. And would I not regard the conversation of you and Lysias as "a thing of higher import," as I may say in the words of Pindar, "than any business?"

Phaedr. Will you go on?

Soc. And will you go on with the narration?

Phaedr. My tale, Socrates, is one of your sort, for the theme which occupied us was love — after a fash-

ion: Lysias imagined a fair youth who was being tempted, but not by a lover; and this was the point: he ingeniously proved that the non-lover should be accepted rather than the lover.

Soc. O that is noble of him. And I wish that he would say a poor man rather than a rich, and an old man rather than a young one; he should meet the case of me, and all of us, and then his words would indeed be charming, and of public utility; and I am so eager to hear them that if you walk all the way to Megara, and when you have reached the wall come back, as Herodicus recommends, without going in, I will not leave you.

Phaedr. What do you mean, Socrates? How can you imagine that I, who am quite unpractised, can remember or do justice to an elaborate work, which the greatest rhetorician of the day spent a long time in composing. Indeed, I can not; I would give a great deal if I could.

Soc. I believe that I know Phaedrus about as well as I know myself, and I am very sure that he heard the words of Lysias, not once only, but again and again he made him say them, and Lysias was very willing to gratify him; at last, when nothing else would satisfy him, he got hold of the book, and saw what he wanted — this was his morning's occupation — and then when he was tired with sitting, he went out to take a walk, not until, as I believe, he had simply learned by heart the entire discourse, which may not have been very long; and as he was going to take a walk outside the wall in order that he might practise, he saw a certain lover of discourse who had the same complaint as himself; — he saw and rejoiced; now thought he, "I shall have a partner in my revels." And he invited him to come with him. But when the lover of discourse asked to hear the tale, he gave him-

self airs and said, "No I can't," as if he didn't like; although, if the hearer had refused, the end would have been that he would have made him listen whether he would or no. Therefore, Phaedrus, as he will soon speak in any case, begs him to speak at once.

Phaedr. As you don't seem very likely to let me off until I speak in some way, the best thing that I can do is to speak as I best may.

Soc. That is a very true observation of yours.

Phaedr. I will do my best, for believe me, Socrates, I did not learn the very words; O no, but I have a general notion of what he said, and will repeat concisely, and in order, the several arguments by which the case of the non-lover was proved to be superior to that of the lover; let me begin at the beginning.

Soc. Yes, my friend; but you must first of all show what you have got in your left hand under your cloak, for that roll, as I suspect, is the actual discourse. Now, much as I love you, I would not have you suppose that I am going to have your memory exercised upon me, if you have Lysias himself here.

Phaedr. Enough; I see that I have no hope of practising upon you. But if I am to read, where would you please to sit?

Soc. Turn this way; let us go to the Ilissus, and sit down at some quiet spot.

Phaedr. I am fortunate in not having my sandals, and as you never have any, I think that we may go along the brook and cool our feet in the water; this is the easiest way, and at mid-day and in the summer is far from being unpleasant.

Soc. Lead on, and look out for a place in which we can sit down.

Phaedr. Do you see that tallest plane-tree in the distance?

Soc. Yes.

Phaedr. There are shade and gentle breezes, and grass on which we may either sit or lie down.

Soc. Move on.

Phaedr. I should like to know, Socrates, whether the place is not somewhere here at which Boreas is said to have carried off Orithyia from the banks of the Ilissus.

Soc. That is the tradition.

Phaedr. And is this the exact spot? The little stream is delightfully clear and bright; I can fancy that there might be maidens playing near.

Soc. I believe that the spot is not exactly here, but about a quarter of a mile lower down, where you cross to the temple of Agra, and I think that there is some sort of altar of Boreas at the place.

Phaedr. I don't recollect; but I wish that you would tell me whether you believe this tale.

Soc. The wise are doubtful, and if, like them, I also doubted, there would be nothing very strange in that. I might have a rational explanation that Orithyia was playing with Pharmacia, when a northern gust carried her over the neighboring rocks; and this being the manner of her death, she was said to have been carried away by Boreas. There is a discrepancy, however, about the locality, as according to another version of the story she was taken from the Areopagus, and not from this place. Now I quite acknowledge that these explanations are very nice, but he is not to be envied who has to give them; much labor and ingenuity will be required of him; and when he has once begun, he must go on and rehabilitate centaurs and chimeras dire. Gorgons and winged steeds flow in apace, and numberless other inconceivable and impossible monstrosities and marvels of nature. And if he is sceptical about them, and would fain reduce them all to the rules of probability,

this sort of crude philosophy will take up all his time. Now I have certainly not time for this; shall I tell you why? I must first know myself, as the Delphian inscription says; and I should be absurd indeed, if while I am still in ignorance of myself I were to be curious about that which is not my business. And therefore I say farewell to all this; the common opinion is enough for me. For, as I was saying, I want to know not about this, but about myself. Am I indeed a wonder more complicated and swollen with passion than the serpent Typho, or a creature of a gentler and simpler sort, to whom Nature has given a diviner and lowlier destiny? But here let me ask you, friend: Is not this the plane-tree to which you were conducting us?

Phaedr. Yes, this is the tree.

Soc. Yes, indeed, and a fair and shady resting-place, full of summer sounds and scents. There is the lofty and spreading plane-tree, and the agnus castus high and clustering, in the fullest blossom and the greatest fragrance; and the stream which flows beneath the plane-tree is deliciously cold to the feet. Judging from the ornaments and images, this must be a spot sacred to Achelous and the Nymphs; moreover, there is a sweet breeze, and the grasshoppers chirrup; and the greatest charm of all is the grass like a pillow gently sloping to the head. My dear Phaedrus, you have been an admirable guide.

Phaedr. I always wonder at you, Socrates; for when you are in the country, you really are like a stranger who is being led about by a guide. Do you ever cross the border? I rather think that you never venture even outside the gates.

Soc. Very true, my good friend; and I hope that you will excuse me when you hear the reason, which is, that I am a lover of knowledge, and the men who

dwell in the city are my teachers, and not the trees or the country. Though I do, indeed, believe that you have found a spell with which to draw me out of the city into the country, as hungry cows are led by shaking before them a bait of leaves or fruit. For only hold up the bait of discourse, and you may lead me all round Attica, and over the wide world. And now having arrived, I intend to lie down, and do you choose any posture in which you can read best. Begin.

Phaedr. Listen. "You know my views of our common interest, and I do not think that I ought to fail in the object of my suit, because I am not your lover: for the kindnesses of lovers are afterwards regretted by them when their passion ceases, but non-lovers have no time of repentance, because they are free and not subject to necessity, and they confer their benefits as far as they are able, in the way which is most conducive to their own interest. Then again lovers remember how they have neglected their interests, for the sake of their loves; they consider the benefits which they have conferred on them; and when to these they add the troubles which they have endured, they think that they have long ago paid all that is due to them. But the non-lover has no such tormenting recollections; he has never neglected his affairs or quarrelled with his relations; he has no troubles to reckon up, or excuses to allege; for all has gone smoothly with him. What remains, then, but that he should freely do what will gratify the beloved? But you will say that the lover is more to be esteemed, because his love is thought to be greater; for he is willing to say and do what is hateful to other men, in order to please his beloved: well, that, if true, is only a proof that he will prefer any future love to his present, and will injure his old love at the pleasure of the new. And how can a man reasonably sacrifice

himself to one who is possessed with a malady which no experienced person would attempt to cure, for the patient himself admits that he is not in his right mind, and acknowledges that he is wrong in his mind, but is unable, as he says, to control himself. How, if he came to his right mind, could he imagine that the desires were good which he conceived when in his wrong mind? Then again, there are many more non-lovers than lovers; and, therefore, you will have a larger choice, and are far more likely to find among them a compatible friend. And if you fear common opinion, and would avoid publicity and reproach, the lover, who is always thinking that other men are as emulous of him as he is of them, will be sure to boast of his successes, and make a show of them openly in the pride of his heart; — he wants others to know that his labor has not been lost; but the non-lover is more his own master, and is desirous of solid good, and not of the vainglory of men. Again, the lover may be generally seen and known following the beloved (this is his regular occupation), and when they are observed to exchange two words they are supposed to meet about some affair of love, either past or future; but when non-lovers meet, no one asks the reason why, because people know that talking is natural, whether friendship or mere pleasure is the motive. And, again, if you fear the fickleness of friendship, consider that in any other case a quarrel might be a mutual calamity; but now, when you have given up what is most precious to you, you will be the great loser, and therefore, you will have reason in being more afraid of the lover, for his vexations are many, and he is always fancying that everything is against him. And for this reason he debars his beloved from society; he will not have you intimate with the wealthy, lest they should exceed him in wealth, or with men of education,

lest they should be his superiors in knowledge; and he is equally afraid of the power of any other good. He would persuade you to have nothing to do with them, in order that he may have you all to himself, and if, out of regard to your own interest, you have more sense than to comply with this desire, a quarrel will ensue. But those who are non-lovers, and whose success in love is the reward of their superiority, will not be jealous of the companions of their beloved, but will rather hate those who refuse to be his companions, thinking that their refusal is a mark of contempt, and that he would be benefited by having companions; more love than hatred may be expected to come of that. Many lovers also have loved the person of a youth before they knew his character, or were acquainted with his domestic relations; so that when their passion has passed away, there is no knowing whether they will continue to be his friends; whereas, in the case of non-lovers who were always friends, the friendship is not lessened by sensual delights; but the recollection of these remains with them, and is an earnest of good things to come. Further, I say that you are likely to be improved by me, whereas the lover will spoil you. For they praise your words and actions in a bad way; partly, they are afraid of offending you, and partly, their judgment is weakened by their passion: for lovers are singular beings when disappointed in love — they deem that painful which is not painful to others, and when successful they can not help praising that which ought not to give them pleasure; so that the beloved is a far more appropriate object of pity than of envy. But if you listen to me, in the first place, I, in my intercourse with you, shall not regard present enjoyment, but future advantage, being not conquered by love, but conquering myself; nor for small causes taking violent offences, but even

when the cause is great, slowly laying up little wrath — unintentional offences I shall forgive, and intentional ones I shall try to prevent; and these are the marks of a friendship which will last. But if you think that only a lover can be a firm friend, you ought to consider that, if this were true, we should set small value on sons, or fathers, or mothers; nor should we ever have loyal friends, for our love of them arises not from passion, but from other associations. Further, if we ought to confer favors on those who are the most eager suitors, we ought to confer them not on the most virtuous, but on the most needy; for they are the persons who will be most relieved, and will therefore be the most grateful; and, in general, when you make a feast, invite not your friend, but the beggar and the empty soul, for they will love you, and attend you, and come about your doors, and will be the best pleased, and the most grateful, and will invoke blessings on your head. But, perhaps, you will say that you ought not to give to the most importunate, but to those who are best able to reward you; nor to the lover only, but to those who are worthy of love; nor to those who will enjoy the charm of your youth, but to those who will share their goods with you in age; nor to those who, having succeeded, will glory in their success to others, but to those who will be modest and hold their peace; nor to those who care about you for a moment only, but to those who will continue your friends for life; nor to those who, when their passion is over, will pick a quarrel with you, but rather to those who, when the bloom of youth is over, will show their own virtue. Remember what I have said; and consider this also, that friends admonish the lover under the idea that his way of life is bad, but no one of his kindred ever yet censured the non-lover, or thought that he was ill-advised about his own interests.

" Perhaps you will ask me whether I propose that you should indulge every non-lover. To which I reply that not even the lover would advise you to indulge all lovers, for the favor is less in the just estimation of the receiver and more difficult to hide from the world. Now love ought to be for the advantage of both parties and for the injury of neither.

" I believe that I have said enough; but if there is anything more which you desire or which needs to be supplied, ask and I will answer."

Now, Socrates, what do you think? Is not the discourse excellent, especially the language?

Soc. Yes indeed, admirable; the effect on me was ravishing. And this I owe to you, Phaedrus, for I observed you while reading to be in an ecstasy, and thinking that you are more experienced in these matters than I am, I followed your example, and, like you, became inspired with a divine frenzy.

Phaedr. Indeed, you are pleased to be merry.

Soc. Do you mean that I am not in earnest?

Phaedr. Now, don't talk in that way, Socrates, but let me have your real opinion; I adjure you, by the god of friendship, to tell me whether you think that any Hellene could have said more or spoken better on the same subject.

Soc. Well, but are you and I expected to praise the sentiments of the author, or only the clearness, and roundness, and accuracy, and tournure of the language? As to the first I willingly submit to your better judgment, for I am unworthy to form an opinion, having only attended to the rhetorical manner; and I was doubting whether Lysias himself would be able to defend that; for I thought, though I speak under correction, that he repeated himself two or three times, either from want of words or from want of pains; and also, he appeared to me wantonly ambitious of show-

ng how well he could say the same thing in two or hree ways.

Phaedr. Nonsense, Socrates; that was his exhaustve treatment of the subject; for he omitted nothing; — this is the special merit of the speech, and I do not hink that any one could have made a fuller or better.

Soc. I can not go so far as that with you. Ancient ages, men and women, who have spoken and written of these things, would rise up in judgment against me, f I lightly assented to you.

Phaedr. Who are they, and where did you hear nything better than this?

Soc. I am sure that I must have heard; I don't remember at this moment from whom; perhaps from Sappho the fair, Anacreon the wise; or, possibly, from a prose writer. What makes me say this? Why, because I perceive that my bosom is full, and that I could make another speech as good as that of Lysias, and different. Now I am certain that this is not an nvention of my own, for I am conscious that I know nothing, and therefore I can only infer that I have been filled through the ears, like a pitcher from the waters of another, though I have actually forgotten n my stupidity who was my informant.

Phaedr. That is grand. But never mind where you heard the discourse or of whom; let that, if you will, be a mystery not to be divulged even at my earnest desire. But do as you say; promise to make another and better oration of equal length on the same subject, with other arguments; and I, like the nine Archons, will promise to set up a golden image at Delphi, not only of myself, but of you, and as large as life.

Soc. You are a dear golden simpleton if you suppose me to mean that Lysias has altogether missed the mark, and that I can make a speech from which all

his arguments are to be excluded. The worst of authors will say something that is to the point. Who, for example, could speak on this thesis of yours without praising the discretion of the non-lover and blaming the folly of the lover? These are the common-places which must come in (for what else is there to be said?) and must be allowed and excused; the only merit is in the arrangement of them, for there can be none in the invention; but when you leave the common-places, then there may be some originality.

Phaedr. I admit that there is reason in that, and I will be reasonable too, and will allow you to start with the premiss that the lover is more disordered in his wits than the non-lover; and if you go on after that and make a longer and better speech than Lysias, and use other arguments, then I say again that a statue you shall have of beaten gold, and take your place by the colossal offering of the Cypselids at Olympia.

Soc. Is not the lover serious, because only in fun I lay a finger upon his love? And so, Phaedrus, you really imagine that I am going to improve upon his ingenuity?

Phaedr. There I have you as you had me, and you must speak "as you best can," and no mistake. And don't let us have the vulgar exchange of "tu quoque" as in a comedy, or compel me to say to you as you said to me, "I know Socrates as well as I know myself, and he was wanting to speak, but he gave himself airs." Rather I would have you consider that from this place we stir not until you have unbosomed yourself of the speech; for here are we all alone, and I am stronger, remember, and younger than you; therefore perpend, and do not compel me to use violence.

Soc. But, my sweet Phaedrus, how can I ever compete with Lysias in an extempore speech? He is a master in his art and I am an untaught man.

Phaedr. You see how matters stand; and therefore let there be no more pretences; for, indeed, I know the word that is irresistible.

Soc. Then don't say it.

Phaedr. Yes, but I will; and my word shall be an oath. "I say, or rather swear" — but what god will be the witness of my oath? — "I swear by this plane-tree, that unless you repeat the discourse here, in the face of the plane-tree, I will never tell you another; never let you have word of another!"

Soc. Villain! I am conquered; the poor lover of discourse has no more to say.

Phaedr. Then why are you still at your tricks?

Soc. I am not going to play tricks now that you have taken the oath, for I can not allow myself to be starved.

Phaedr. Proceed.

Soc. Shall I tell you what I will do?

Phaedr. What?

Soc. I will veil my face and gallop through the discourse as fast as I can, for if I see you, I shall feel ashamed and not know what to say.

Phaedr. Only go on and you may do as you please.

Soc. Come, O ye Muses, melodious (λιγεῖαι), as ye are called, whether you have received this name from the character of your strains, or because the Melians are a musical race, help, O help me in the tale which my good friend desires me to rehearse, for the good of his friend whom he always deemed wise and will now deem wiser than ever.

Once upon a time there was a fair boy, or, more properly speaking, a youth; he was very fair and had a great many lovers; and there was one special cunning one, who had persuaded the youth that he did not love him, but he really loved him all the same; and one day as he was paying his addresses to him, he used

this very argument — that he ought to accept the non-lover rather than the lover; and his words were as follow: —

"All good counsel begins in the same way; a man should know what he is advising about, or his counsel will come to nought. But people imagine that they know about the nature of things, when they don't know about them, and, not agreeing at the beginning, they end, as might be expected, in contradicting one another and themselves. Now you and I must not be guilty of the error which we condemn in others; but as our question is whether the lover or non-lover is to be preferred, let us first of all agree in defining the nature and power of love, and then, keeping our eyes upon this and to this appealing let us further inquire whether love brings advantage or disadvantage.

"Every one sees that love is a desire, and we know also that non-lovers desire the beautiful and good. Now in what way is the lover to be distinguished from the non-lover? Let us note that in every one of us there are two guiding and ruling principles which lead us whither they will; one is the natural desire of pleasure, the other is an acquired opinion which is in search of the best; and these two are sometimes in harmony and then again at war, and sometimes the one, sometimes the other conquers. When opinion conquers, and by the help of reason leads us to the best, the conquering principle is called temperance; but when desire, which is devoid of reason, rules in us and drags us to pleasure, that power of misrule is called excess. Now excess has many names, and many members, and many forms, and any of these forms when marked gives a name to the bearer of the name, neither honorable nor desirable. The desire of eating, which gets the better of the higher reason and the other desires, is called gluttony, and he who is possessed by

this is called a glutton; the tyrannical desire of drink, which inclines the possessor of the desire to drink, has a name which is only too obvious; and the same may be said of the whole family of desires and their names, whichever of them happens to be dominant. And now I think that you will perceive the drift of my discourse; but as every spoken word is in a manner plainer than the unspoken, I had better say further that the irrational desire which overcomes the tendency of opinion towards right, and is led away to the enjoyment of beauty, and especially of personal beauty, by the desires which are her kindred — that desire, I say, the conqueror and leader of the rest, and waxing strong from having this very power, is called the power of love."

And now, dear Phaedrus, I shall pause for an instant to ask whether you do not think me, as I appear to myself, inspired?

Phaedr. Yes, Socrates, you seem to have a very unusual flow of words.

Soc. Listen to me, then, in silence; for surely the place is holy; so that you must not wonder, if, as I proceed, I appear to be in a divine fury, for already I am getting into dithyrambics.

Phaedr. That is quite true.

Soc. And that I attribute to you. But hear what follows, and perhaps the fit may be averted; all is in their hands above. And now I will go on talking to my youth. Listen: —

Thus, my friend, we have declared and determined the nature of love. Keeping this in view, let us now inquire what advantage or disadvantage is likely to ensue from the lover or the non-lover to him who accepts their advances.

He who is the victim of his passions and the slave of pleasure will of course desire to make his beloved as

agreeable to himself as possible. Now to him who is not in his right senses that is agreeable which is not opposed to him, but that which is equal or superior is hateful to him, and therefore the lover will not brook any superiority or equality on the part of his beloved; he is always employed in reducing him to inferiority. And the ignorant is the inferior of the wise, the coward of the brave, the slow of speech of the speaker, the dull of the clever. These are the sort of natural and inherent defects in the mind of the beloved which enhance the delight of the lover, and there are acquired defects which he must produce in him, or he will be deprived of his fleeting joy. And therefore he can not help being jealous, and will debar him from the advantages of society which would make a man of him, and especially from that society which would have given him wisdom. That is to say, he will be compelled to banish from him divine philosophy, in his excessive fear lest he should come to be despised in his eyes; and there is no greater injury which he can inflict on him than this. Moreover, he will contrive that he shall be wholly ignorant, and in everything dependent on himself; he is to be the delight of his lover's heart, and a curse to himself. Verily, a lover is a profitable guardian and associate for him in all that relates to his mind.

Let us next see how his master, whose law of life is pleasure and not good, will keep and train the body of his servant. Will he not choose a beloved who is delicate rather than sturdy and strong? One brought up in shady bowers and not in the bright sun, not practised in manly exercises or dried by perspiration, but knowing only a soft and luxurious diet, instead of the hues of health having only the colors of paint and ornament, and the rest of a piece? — such a life as any one can imagine and which I need not detail at

length. But I may sum up all that I have to say in a word, and pass on. Such a person in war, or in any of the great exigencies in life, will be the anxiety of his friends and also of his lover, and certainly not the terror of his enemies; which nobody can deny.

And now let us tell what advantage or disadvantage the beloved will receive from the guardianship and society of his lover in the matter of his possessions; that is the next point to consider. All men will see, and the lover above all men, that his own first wish is to deprive his beloved of his dearest and best and most sacred possessions, father, mother, kindred, friends, all whom he thinks may be hinderers or reprovers of their sweet converse; he will even cast a jealous eye upon his gold and silver or other property, because these make him a less easy and manageable prey, and hence he is of necessity displeased at the possession of them and rejoices at their loss; and he would like him to be wifeless, childless, homeless, as well; and the longer the better, for the longer he is all this, the longer he will enjoy him.

There are some sort of animals, such as flatterers, which are dangerous and mischievous enough, and yet nature has mingled a temporary pleasure and grace in their composition. You may say that a courtesan is hurtful, and disapprove of such creatures and their practices, and yet for the time they are very pleasant. But the lover is not only mischievous to his love, he is also extremely unpleasant to live with. Equals, as the proverb says, delight in equals; equality of years inclines them to the same pleasures, and similarity begets friendship, and yet you may have more than enough even of this, and compulsion is always said to be grievous. Now the lover is not only unlike his beloved, but he forces himself upon him. For he is old and his love is young, and neither day nor night

will he leave him if he can help; and necessity and the sting of desire drive him on, and allure him with the pleasure which he receives from seeing, hearing, touching, perceiving him. And therefore he is delighted to fasten upon him and to minister to him. But what pleasure or consolation can the beloved be receiving all this time? Must he not feel the extremity of disgust when he looks at an old withered face and the remainder to match, which even in a description is not agreeable, and quite detestable when you are forced into daily contact with them; moreover he is jealously watched and guarded against everything and everybody, and has to hear misplaced and exaggerated praises of himself, and censures as inappropriate, which are quite intolerable when the man is sober, and, besides being intolerable, are published all over the world in all their shamelessness and wearisomeness when he is drunk.

And not only while his love continues is he mischievous and unpleasant, but when his love ceases he becomes a perfidious enemy of him on whom he showered his oaths and prayers and promises, and yet could hardly prevail upon him to tolerate the tedium of his company even from motives of interest. The time of payment arrives, and now he is the servant of another master; instead of love and infatuation, wisdom and temperance are his bosom's lords; the man has changed, but the beloved is not aware of this; he asks for a return and recalls to his recollection former acts and words, for he fancies that he is talking to the same person, and the other, being ashamed and not having the courage to tell him that he has changed, and not knowing how to make good his promises, has now grown virtuous and temperate; he does not want to do as he did or to be as he was before. Therefore he runs away and can but end a defaulter; quick as the

spinning of a teetotum [1] he changes pursuit into flight, and the other is compelled to follow him with passion and imprecation, not knowing that he ought never from the first to have accepted a demented lover instead of a sensible non-lover; and that in making such a choice he was yielding to a faithless, morose, envious, disagreeable being, hurtful to his estate, hurtful to his bodily constitution, and still more hurtful to the cultivation of his mind, which is and ever will be the most honorable possession both of gods and men. Consider this, fair youth, and know that in the friendship of the lover there is no real kindness; he has an appetite and wants to feed upon you.

"As wolves love lambs so lovers love their loves."

But, as I said before, I am speaking in verse, and therefore I had better make an end; that is enough.

Phaedr. I thought that you were only half-way and were going to make a similar speech about all the advantages of accepting the non-lover. Why don't you go on?

Soc. Does not your simplicity observe that I have got out of dithyrambics into epics; and if my censure was in verse, what will my praise be? Don't you see that I am already overtaken by the Nymphs to whom you have mischievously exposed me? And therefore I will only add that the non-lover has all the advantages in which the lover is charged with being deficient. And now I will say no more; there has been enough said of both of them. Leaving the tale to its fate, I will cross the river and make the best of my way home, lest a worse thing be inflicted upon me by you.

Phaedr. Not yet, Socrates; not until the heat of the day has passed; don't you see that the hour is

[1] Lit. an oyster-shell.

noon, and the sun is standing over our heads? Let us rather stay and talk over what has been said, and then return in the cool.

Soc. Your love of discourse, Phaedrus, is superhuman, simply marvellous, and I do not believe that there is any one of your contemporaries who in one way or another has either made or been the cause of others making an equal number of speeches. I would except Simmias the Theban, but all the rest are far behind you. And now I do verily believe that you have been the cause of another.

Phaedr. That is good news. But what do you mean?

Soc. I mean to say that as I was about to cross the stream the usual sign was given to me; that is the sign which never bids but always forbids me to do what I am going to do; and I thought that I heard a voice saying in my ear that I had been guilty of impiety, and that I must not go away until I had made an atonement. Now I am a diviner, though not a very good one, but I have enough religion for my own needs, as you might say of a bad writer — his writing is good enough for him. And, O my friend, how singularly prophetic is the soul! For at the time I had a sort of misgiving, and, like Ibycus, "I was troubled," and I suspected that I might be receiving honor from men at the expense of sinning against the gods. Now I am aware of the error.

Phaedr. What error?

Soc. That was a dreadful speech which you brought with you, and you made me utter one as bad.

Phaedr. How was that?

Soc. Foolish, I say, and in a degree impious; and what can be more dreadful than this?

Phaedr. Nothing, if the speech was really such as you describe.

Soc. Well, and is not Eros, the son of Aphrodite, a mighty god?

Phaedr. That is the language of mankind about him.

Soc. But that was not the language of Lysias' speech any more than of that other speech uttered through my lips when under the influence of your enchantments, and which I may call yours and not mine. For love, if he be a god or divine, can not be evil. Yet this was the error of both our speeches. There was also a solemnity about them which was truly charming; they had no truth or honesty in them, and yet they pretended to be something, hoping to succeed in deceiving the manikins of earth and be famous among them. And therefore I must have a purgation. And now I bethink me of an ancient purgation of mythological error which was devised, not by Homer, for he never had the wit to discover why he was blind, but by Stesichorus, who was a philosopher and knew the reason why; and, therefore, when he lost his eyes, for that was the penalty which was inflicted upon him for reviling the lovely Helen, he purged himself. And the purgation was a recantation, which began with the words: —

> "That was a lie of mine when I said that thou never embarkedst on the swift ships, or wentest to the walls of Troy."

And when he had completed his poem, which is called "the recantation," immediately his sight returned to him. Now I will be wiser than either Stesichorus or Homer, in that I am going to make a recantation before I lose mine; and this I will attempt, not as before, veiled and ashamed, but with forehead bold and bare.

Phaedr. There is nothing which I should like better to hear.

Soc. Only think, my good Phaedrus, what an utter want of delicacy was shown in the two discourses; I mean, in my own and in the one which you recited out of the book. Would not any one who was himself of a noble and gentle nature, and who loved or ever had loved a nature like his own, when he heard us speaking of the petty causes of lovers' jealousies, and of their exceeding animosities, and the injuries which they do to their beloved, have imagined that our ideas of love were taken from some haunt of sailors to which good manners were unknown — he would certainly never have admitted the justice of our censure?

Phaedr. Certainly not.

Soc. Therefore, because I blush at the thought of this person, and also because I am afraid of the god Love, I desire to wash down that gall and vinegar with a wholesome draught; and I would counsel Lysias not to delay, but to write another discourse, which shall prove "ceteris paribus" that the lover ought to be accepted rather than the non-lover.

Phaedr. Be assured that he shall. You shall speak the praises of the lover, and Lysias shall be made to write them in another discourse. I will compel him to do this.

Soc. You will be true to your nature in that, and therefore I believe you.

Phaedr. Speak, and fear not.

Soc. But where is the fair youth whom I was addressing, and who ought to listen, in order that he may not be misled by one side before he has heard the other?

Phaedr. He is close at hand, and always at your service.

Soc. Know then, fair youth, that the former discourse was that of a finely-scented gentleman, who is all myrrh and fragrance, named Phaedrus, the son

of Vain Man. And this is the recantation of Stesichorus the pious, who comes from the town of Desire, and is to the following effect: That was a lie in which I said that the beloved ought to accept the non-lover and reject the lover, because the one is sane, and the other mad. For that might have been truly said if madness were simply an evil; but there is also a madness which is the special gift of heaven, and the source of the chiefest blessings among men. For prophecy is a madness, and the prophetess at Delphi and the priestesses of Dodona, when out of their senses have conferred great benefits on Hellas, both in public and private life, but when in their senses few or none. And I might also tell you how the Sibyl and other persons, who have had the gift of prophecy, have told the future of many an one and guided them aright; but that is obvious, and would be tedious.

There will be more reason in appealing to the ancient inventors of names, who, if they had thought madness a disgrace or dishonor, would never have called prophecy, which is the noblest of arts, by the very same name (*μαντικὴ, μανικὴ*) as madness, thus inseparably connecting them; but they must have thought that there was an inspired madness which was no disgrace; for the two words, *μαντικὴ* and *μανικὴ*, are really the same, and the letter *τ* is only a modern and tasteless insertion. And this is confirmed by the name which they gave to the rational investigation of futurity, whether made by the help of birds or other signs; this as supplying from the reasoning faculty insight and information to human thought (*νοῦς* and *ἱστορία*), they originally termed *οἰονοιστικὴ*, but the word has been lately altered and made sonorous by the modern introduction of the letter Omega (*οἰονοιστικὴ* and *οἰωνιστικὴ*), and in proportion as (*μαντικὴ* or) prophecy is higher and more perfect than divina-

tion both in name and reality, in the same proportion as the ancients testify, is madness superior to a sane mind (*σωφροσύνη*), for the one is only of human, but the other of divine origin. Again, where plagues and mightiest woes have bred in a race, owing to some ancient wrath, there madness, lifting up her voice and flying to prayers and rites, has come to the rescue of those who are in need; and he who has part in this gift, and is truly possessed and duly out of his mind, is by the use of purifications and mysteries made whole and delivered from evil, future as well as present, and has a release from the calamity which afflicts him. There is also a third kind of madness, which is a possession of the Muses; this enters into a delicate and virgin soul, and there inspiring frenzy, awakens lyric and all other numbers; with these adorning the myriad actions of ancient heroes for the instruction of posterity. But he who, not being inspired and having no touch of madness in his soul, comes to the door and thinks that he will get into the temple by the help of art — he, I say, and his poetry are not admitted; the sane man is nowhere at all when he enters into rivalry with the madman.

I might tell of many other noble deeds which have sprung from inspired madness. And therefore, let no one frighten or flutter us by saying that temperate love is preferable to mad love, but let him further show, if he would carry off the palm, that love is not sent by the gods for any good to lover or beloved. And we, on our part, will prove in answer to him that the madness of love is the greatest of heaven's blessings, and the proof shall be one which the wise will receive, and the witling disbelieve. And, first of all, let us inquire what is the truth about the affections and actions of the soul, divine as well as human. And thus we begin our proof:

The soul is immortal, for that is immortal which is ever in motion; but that which moves and is moved by another, in ceasing to move ceases also to live. Therefore, only that which is self-moving, never failing of self, never ceases to move, and is the fountain and beginning of motion to all that moves besides. Now, the beginning is unbegotten, for that which is begotten has a beginning; but the beginning has no beginning, for if a beginning were begotten of something, that would have no beginning. But that, which is unbegotten must also be indestructible; for if beginning were destroyed, there could be no beginning out of anything, nor anything out of a beginning; and all things must have a beginning. And therefore the self-moving is the beginning of motion; and this can neither be destroyed nor begotten, for in that case the whole heavens and all generation would collapse and stand still, and never again have motion or birth. But if the self-moving is immortal, he who affirms that self-motion is the very idea and essence of the soul will not be put to confusion. For the body which is moved from without is soulless; but that which is moved from within has a soul, and this is involved in the nature of the soul. But if the soul be truly affirmed to be the self-moving, then must she also be without beginning, and immortal. Enough of the soul's immortality.

Her form is a theme of divine and large discourse; human language may, however, speak of this briefly, and in a figure. Let our figure be of a composite nature — a pair of winged horses and a charioteer. Now the winged horses and the charioteer of the gods are all of them noble, and of noble breed, while ours are mixed; and we have a charioteer who drives them in a pair, and one of them is noble and of noble origin, and the other is ignoble and of ignoble origin; and,

as might be expected, there is a great deal of trouble in managing them. I will endeavor to explain to you in what way the mortal differs from the immortal creature. The soul or animate being has the care of the inanimate, and traverses the whole heaven in divers forms appearing; — when perfect and full winged she soars upward, and is the ruler of the universe; while the imperfect soul loses her feathers, and drooping in her flight at last settles on the solid ground — there, finding a home, she receives an earthly frame which appears to be self-moved, but is really moved by her power; and this composition of soul and body is called a living and mortal creature. For no such union can be reasonably believed, or at all proved to be other than mortal; although fancy may imagine a god whom, not having seen nor surely known, we invent — such an one, an immortal creature having a body, and having also a soul which have been united in all time. Let that, however, be as God wills, and be spoken of acceptably to him. But the reason why the soul loses her feathers should be explained, and is as follows:

The wing is intended to soar aloft and carry that which gravitates downwards into the upper region, which is the dwelling of the gods; and this is that element of the body which is most akin to the divine. Now the divine is beauty, wisdom, goodness, and the like; and by these the wing of the soul is nourished, and grows apace; but when fed upon evil and foulness, and the like, wastes and falls away. Zeus, the mighty lord holding the reins of a winged chariot, leads the way in heaven, ordering all and caring for all; and there follows him the heavenly array of gods and demi-gods, divided into eleven bands; for only Hestia is left at home in the house of heaven; but the rest of the twelve greater deities march in their

appointed order. And they see in the interior of heaven many blessed sights; and there are ways to and fro, along which the happy gods are passing, each one fulfilling his own work; and any one may follow who pleases, for jealousy has no place in the heavenly choir. This is within the heaven. But when they go to feast and festival, then they move right up the steep ascent, and mount the top of the dome of heaven. Now the chariots of the gods, self-balanced, upward glide in obedience to the rein; but the others have a difficulty, for the steed who has evil in him, if he has not been properly trained by the charioteer, gravitates and inclines and sinks towards the earth: — and this is the hour of agony and extremest conflict of the soul. For the immortal souls, when they are at the end of their course, go out and stand upon the back of heaven, and the revolution of the spheres carries them round, and they behold the world beyond. Now of the heaven which is above the heavens, no earthly poet has sung or ever will sing in a worthy manner. But I must tell, for I am bound to speak truly when speaking of the truth. The colorless and formless and intangible essence is visible to the mind, which is the only lord of the soul. Circling around this in the region above the heavens is the place of true knowledge. And as the divine intelligence, and that of every other soul which is rightly nourished, is fed upon mind and pure knowledge, such an intelligent soul is glad at once more beholding being; and feeding on the sight of truth is replenished, until the revolution of the worlds brings her round again to the same place. During the revolution she beholds justice, temperance, and knowledge absolute, not in the form of generation or of relation, which men call existence, but knowledge absolute in existence absolute; and beholding other existences in like manner, and feeding

upon them, she passes down into the interior of the heavens and returns home, and there the charioteer putting up his horses at the stall, gives them ambrosia to eat and nectar to drink.

This is the life of the gods; but of other souls, that which follows God best and is likest to him lifts the head of the charioteer into the outer world, and is carried round in the revolution, troubled indeed by the steeds, and beholding true being, but hardly; another rises and falls, and sees, and again fails to see by reason of the unruliness of the steeds. The rest of the souls are also longing after the upper world and they all follow, but not being strong enough they sink into the gulf, as they are carried round, plunging, treading on one another, striving to be first; and there is confusion and the extremity of effort, and many of them are lamed or have their wings broken through the ill-driving of the charioteers; and all of them after a fruitless toil go away without being initiated into the mysteries of being, and are nursed with the food of opinion. The reason of their great desire to behold the plain of truth is that the food which is suited to the highest part of the soul comes out of that meadow; and the wing on which the soul soars is nourished with this. And there is a law of the goddess Retribution, that the soul which attains any vision of truth in company with the god is preserved from harm until the next period, and he who always attains is always unharmed. But when she is unable to follow, and fails to behold the vision of truth, and through some ill-hap sinks beneath the double load of forgetfulness and vice, and her feathers fall from her and she drops to earth, then the law ordains that this soul shall in the first generation pass, not into that of any other animal, but only of man; and the soul which has seen most of truth shall come to the birth as a philosopher,

or artist, or musician, or lover; that which has seen truth in the second degree shall be a righteous king or warrior or lord; the soul which is of the third class shall be a politician, or economist, or trader; the fourth shall be a lover of gymnastic toils, or a physician; the fifth a prophet or hierophant; to the sixth a poet or imitator will be appropriate; to the seventh the life of an artisan or husbandman; to the eighth that of a sophist or demagogue; to the ninth that of a tyrant; — all these are states of probation, in which he who lives righteously improves, and he who lives unrighteously deteriorates his lot.

Ten thousand years must elapse before the soul can return to the place from whence she came, for she can not grow her wings in less; only the soul of a philosopher, guileless and true, or the soul of a lover, who is not without philosophy, may acquire wings in the third recurring period of a thousand years: and if they choose this life three times in succession, then they have their wings given them, and go away at the end of three thousand years. But the others receive judgment when they have completed their first life, and after the judgment they go, some of them to the houses of correction which are under the earth, and are punished; others to some place in heaven whither they are lightly borne by justice, and there they live in a manner worthy of the life which they led here when in the form of men. And at the end of the first thousand years the good souls and also the evil souls both come to cast lots and choose their second life, and they may take any that they like. And then the soul of the man may pass into the life of a beast, or from the beast again into the man. But the soul of him who has never seen the truth will not pass into the human form, for man ought to have intelligence, as they say, "secundum speciem," proceeding from many partic-

ulars of sense to one conception of reason; and this is the recollection of those things which our soul once saw when in company with God — when looking down from above on that which we now call being and upwards towards the true being. And therefore the mind of the philosopher alone has wings; and this is just, for he is always, according to the measure of his abilities, clinging in recollection to those things in which God abides, and in beholding which He is what he is. And he who employs aright these memories is ever being initiated into perfect mysteries and alone becomes truly perfect. But, as he forgets earthly interests and is rapt in the divine, the vulgar deem him mad, and rebuke him; they do not see that he is inspired.

Thus far I have been speaking of the fourth and last kind of madness, which is imputed to him who, when he sees the beauty of earth, is transported with the recollection of the true beauty; he would like to fly away, but he can not; he is like a bird fluttering and looking upward and careless of the world below; and he is therefore esteemed mad. And I have shown that this is of all inspirations the noblest and best, and comes of the best, and that he who has part or lot in this madness is called a lover of the beautiful. For as has been already said, every soul of man has in the way of nature beheld true being; this was the condition of her passing into the form of man. But all men do not easily recall the things of the other world; they may have seen them for a short time only, or they may have been unfortunate when they fell to earth, and may have lost the memory of the holy things which they saw there through some evil and corrupting association. Few there are who retain the remembrance of them sufficiently; and they, when they behold any image of that other world, are rapt in amaze-

ment; but they are ignorant of what this means, because they have no clear perceptions. For there is no light in the earthly copies of justice or temperance or any of the higher qualities which are precious to souls: they are seen but through a glass dimly; and there are few who, going to the images, behold in them the realities, and they only with difficulty. They might have seen beauty shining in brightness, when, with the happy band following in the train of Zeus, as we philosophers did, or with other gods as others did, they saw a vision and were initiated into most blessed mysteries, which we celebrated in our state of innocence; and having no feeling of evils as yet to come; beholding apparitions innocent and simple and calm and happy as in a mystery; shining in pure light, pure ourselves and not yet enshrined in that living tomb which we carry about, now that we are imprisoned in the body, as in an oyster-shell. Let me linger thus long over the memory of scenes which have passed away.

But of beauty, I repeat again that we saw her there shining in company with the celestial forms; and coming to earth we find her here too, shining in clearness through the clearest aperture of sense. For sight is the keenest of our bodily senses; though not by that is wisdom seen, for her loveliness would have been transporting if there had been a visible image of her, and this is true of the loveliness of the other ideas as well. But beauty only has this portion, that she is at once the loveliest and also the most apparent. Now he who has not been lately initiated or who has become corrupted, is not easily carried out of this world to the sight of absolute beauty in the other; he looks only at that which has the name of beauty in this world, and instead of being awed at the sight of her, like a brutish beast he rushes on to enjoy and

beget; he takes wantonness to his bosom, and is not afraid or ashamed of pursuing pleasure in violation of nature. But he whose initiation is recent, and who has been the spectator of many glories in the other world, is amazed when he sees any one having a god-like face or form, which is the expression or imitation of divine beauty; and at first a shudder runs through him, and some "misgiving" of a former world steals over him; then looking upon the face of his beloved as of a god he reverences him, and if he were not afraid of being thought a downright madman, he would sacrifice to his beloved as to the image of a god; then as he gazes on him there is a sort of reaction, and the shudder naturally passes into an unusual heat and perspiration; for, as he receives the effluence of beauty through the eyes, the wing moistens and he warms. And as he warms, the parts out of which the wing grew, and which had been hitherto closed and rigid, and had prevented the wing from shooting forth are melted, and as nourishment streams upon him, the lower end of the wing begins to swell and grow from the root upwards, extending under the whole soul — for once the whole was winged. Now during this process the whole soul is in a state of effervescence and irritation, like the state of irritation and pain in the gums at the time of cutting teeth; in like manner the soul when beginning to grow wings has inflammation and pains and ticklings, and when looking at the beauty of youth she receives the sensible warm traction of particles which flow towards her, therefore called attraction (ἵμερος), and is refreshed and warmed by them, and then she ceases from her pain with joy. But when she is separated and her moisture fails, then the orifices of the passages out of which the wing shoots dry up and close, and intercept the germ of the wing; which, being shut up within in company

with desire, throbbing as with the pulsations of an artery, pricks the aperture which is nearest, until at length the entire soul is pierced and maddened and pained, and at the recollection of beauty is again delighted. And from both of them together the soul is oppressed at the strangeness of her condition, and is in a great strait and excitement, and in her madness can neither sleep by night nor abide in her place by day. And wherever she thinks that she will behold the beautiful one, thither in her desire she runs. And when she has seen him, and drunk rivers of desire, her constraint is loosened, and she is refreshed, and has no more pangs and pains; and this is the sweetest of all pleasures at the time, and is the reason why the soul of the lover never forsakes his beautiful one, whom he esteems above all; he has forgotten his mother and brethren and companions, and he thinks nothing of the neglect and loss of his property; and as to the rules and proprieties of life, on which he formerly prided himself, he now despises them, and is ready to sleep and serve, wherever he is allowed, as near as he can to his beautiful one who is not only the object of his worship, but the only physician who can heal him in his extreme agony. And this state, my dear imaginary youth, is by men called love, and among the gods has a name which you, in your simplicity, may be inclined to mock; there are two lines in honor of love in the Homeric Apocrypha in which the name occurs. One of them is rather outrageous, and is not quite metrical; they are as follow: —

> "Mortals call him Eros (love),
> But the immortals call him Pteros (fluttering dove),
> Because fluttering of wings is a necessity to him."

You may believe this or not as you like. At any rate the loves of lovers and their causes are such as I have described.

Now the lover who is the attendant of Zeus is better able to bear the winged god, and can endure a heavier burden; but the attendants and companions of Ares, when under the influence of love, if they fancy that they have been at all wronged, are ready to kill and put an end to themselves and their beloved. And in like manner he who follows in the train of any other god honors him, and imitates him as far as he is able while the impression lasts; and this is his way of life and the manner of his behavior to his beloved and to every other in the first period of his earthly existence. Every one chooses the object of his affections according to his character, and this he makes his god, and fashions and adorns as a sort of image which he is to fall down and worship. The followers of Zeus desire that their beloved should have a soul like him; and, therefore, they seek some philosophical and imperial nature, and when they have found him and loved him, they do all they can to create such a nature in him, and if they have no experience hitherto, they learn of any one who can teach them, and themselves follow in the same way. And they have the less difficulty in finding the nature of their own god in themselves, because they have been compelled to gaze intensely on him; their recollection clings to him, and they become possessed by him, and receive his character and ways, as far as man can participate in God. These they attribute to the beloved, and they love him all the more, and if they draw inspiration from Zeus, like the Bacchic Nymphs, they pour this out upon him in order to make him as like their god as possible. But those who are the followers of Hera seek a royal love, and when they have found him they do the same with him; and in like manner the followers of Apollo, and of every other god walking in the ways of their god, seek a love who is to be

like their god, and when they have found him, they themselves imitate their god, and persuade their love to do the same, and bring him into harmony with the form and ways of the god as far as they can; for they have no feelings of envy or mean enmity towards their beloved, but they do their utmost to create in him the greatest likeness of themselves and the god whom they honor. And the desire of the lover, if effected, and the initiation of which I speak into the mysteries of true love, is thus fair and blissful to the beloved when he is chosen by the lover who is driven mad by love. Now the beloved or chosen one is taken captive in the following manner: —

As I said at the beginning of this tale, I divided each soul into three parts, two of them having the forms of horses and the third that of a charioteer; and one of the horses was good and the other bad, but I have not yet explained the virtue and vice of either, and to that I will now proceed. The well-conditioned horse is erect and well-formed; he has a lofty neck and an aquiline nose, and his color is white, and he has dark eyes and is a lover of honor and modesty and temperance, and the follower of true glory; he needs not the touch of the whip, but is guided by word and admonition only. Whereas the other is a large misshapen animal, put together anyhow; he has a strong short neck; he is flat-faced and of a dark color, grey-eyed and bloodshot, the mate of insolence and pride, shag-eared, deaf, hardly yielding to blow or spur. Now when the charioteer beholds the vision of love, and has his whole soul warmed with sense, and is full of tickling and desire, the obedient steed then as always under the government of shame, refrains himself from leaping on the beloved; but the other, instead of heeding the blows of the whip, prances away and gives all manner of trouble to his companion and to the char-

ioteer, and urges them on toward the beloved and reminds them of the joys of love. They at first indignantly oppose him and will not be urged on to do terrible and unlawful deeds; but at last, when there is no end of evil, they yield and suffer themselves to be led on to do as he bids them. And now they are at the spot and behold the flashing beauty of the beloved. But when the charioteer sees that, his memory is carried to the true beauty, and he beholds her in company with Modesty set in her holy place. And when he sees her he is afraid and falls back in adoration, and in falling is compelled to pull back the reins, which he does with such force as to bring both the steeds on their haunches, the one willing and unresisting, the unruly one very unwilling; and when they have gone back a little, the one is overflowing with shame and wonder, and pours forth rivers of perspiration over the entire soul; the other, when the pain is over which the bridle and the fall had given him, having with difficulty taken breath, is full of wrath and reproaches, which he heaps upon the charioteer and his fellow-steed, as though from want of courage and manhood they had been false to their agreement and guilty of desertion. And, when they again decline, he forces them on, and will scarce yield to their request that he would wait until another time. Returning at the appointed hour, they make as if they had forgotten, and he reminds them, fighting and neighing and dragging them, until at length he on the same thoughts intent, forces them to draw near. And when they are near he stoops his head and puts up his tail, and takes the bit in his mouth and pulls shamelessly. Then the charioteer is worse off than ever; he drops at the very start, and with still greater violence draws the bit out of the teeth of the wild steed and covers his abusive tongue and jaws with blood, and forces his legs and

haunches to the ground and punishes him sorely. And when this has happened several times and the villain has ceased from his wanton way, he is tamed and humbled, and follows the will of the charioteer, and when he sees the beautiful one he is ready to die of fear. And from that time forward the soul of the lover follows the beloved in modesty and holy fear.

And so the beloved who, like a god, has received every true and loyal service from his lover, not in pretence but in reality, being also himself of a nature friendly to his admirer, if in former days he has blushed to own his passion and turned away his lover, because his youthful companions or others slanderously told him that he would be disgraced, now as years advance, at the appointed age and time is led to receive him into communion. For fate which has ordained that there shall be no friendship among the evil has also ordained that there shall ever be friendship among the good. And when he has received him into communion and intimacy, then the beloved is amazed at the good will of the lover; he recognizes that the inspired friend is worth all other friendship or kinships, which have nothing of friendship in them in comparison. And as he continues to feel this and approaches and embraces him, in gymnastic exercises and at other times of meeting, then does the fountain of that stream, which Zeus when he was in love with Ganymede called desire, overflow upon the lover, and some enters into his soul, and some when he is filled flows out again, and as a breeze or an echo leaps from the smooth rocks and rebounds to them again, so does the stream of beauty, passing the eyes which are the natural doors and windows of the soul, return again to the beautiful one; there arriving and fluttering the passages of the wings, and watering them and inclining them to grow, and filling the soul of the beloved

also with love. And thus he loves, but he knows not what; he does not understand and can not explain his own state; he appears to have caught the infection of another's eye; the lover is his mirror in whom he is beholding himself, but he is not aware of this. When he is with the lover, both cease from their pain, but when he is away then he longs as he is longed for, and has love's image, love for love (Anteros) lodging in his breast, which he calls and deems not love but friendship only, and his desire is as the desire of the other, but weaker; he wants to see him, touch him, kiss, embrace him, and not long afterwards his desire is accomplished. Now, when they meet, the wanton steed of the lover has a word to say to the charioteer; he would like to have a little pleasure as a return for many pains, but the wanton steed of the beloved says not a word, for he is bursting with passion which he understands not, but he throws his arms round the lover and embraces him as his dearest friend; and, when they are side by side, he is not in a state in which he can refuse the lover anything, if he ask him, while his fellow-steed and the charioteer oppose him with shame and reason. After this their happiness depends upon their self-control; if the better elements of the mind which lead to order and philosophy prevail, then they pass their life in this world in happiness and harmony — masters of themselves and orderly — enslaving the vicious and emancipating the virtuous elements; and when the end comes, being light and ready to fly away, they conquer in one of the three heavenly or truly Olympian victories; nor can human discipline or divine inspiration confer any greater blessing on man than this. If, on the other hand, they leave philosophy and lead the lower life of ambition, then, probably in the dark or in some other careless hour, the two wanton animals take the two souls

when off their guard and bring them together, and they accomplish that desire of their hearts which to the many is bliss; and this having once enjoyed they continue to enjoy, yet rarely because they have not the approval of the whole soul. They too are dear, but not so dear to one another as the others, either at the time of their love or afterwards. They consider that they have given and taken from each other the most sacred pledges, and they may not break them and fall into enmity. At last they pass out of the body, unwinged, but eager to soar, and thus obtain no mean reward of love and madness. For those who have once begun the heavenward pilgrimage may not go down again to darkness and the journey beneath the earth, but they live in light always; happy companions in their pilgrimage, and when the time comes at which they receive their wings they have the same plumage because of their love.

Thus great are the heavenly blessings which the friendship of a lover will confer on you, my youth. Whereas the attachment of the non-lover which is just a vulgar compound of temperance and niggardly earthly ways and motives, will breed meanness — praised by the vulgar as virtue in your inmost soul; will send you bowling round the earth during a period of nine thousand years, and leave you a fool in the world below.

And thus, dear Eros, I have made and paid my recantation, as well as I could and as fairly as I could; the poetical figures I was compelled to use, because Phaedrus would have them. And now forgive the past and accept the present, and be gracious and merciful to me, and do not deprive me of sight or take from me the art of love, but grant that I may be yet more esteemed in the eyes of the fair. And if Phaedrus or I myself said anything objectionable in our

first speeches, blame Lysias, who is the father of the brat, and let us have no more of his progeny; bid him study philosophy, like his brother Polemarchus; and then his lover Phaedrus will no longer halt between two, but dedicate himself wholly to love and philosophical discourses.

Phaedr. I say with you, Socrates, may this come true if this be for my good. But why did you make this discourse of yours so much finer than the other? I wonder at that. And I begin to be afraid that I shall lose conceit of Lysias, even if he be willing to make another as long as yours, which I doubt. For one of our politicians lately took to abusing him on this very account; he would insist on calling him a speech-writer. So that a feeling of pride may probably induce him to give up writing.

Soc. That is an amusing notion; but I think that you are a little mistaken in your friend if you imagine that he is frightened at every noise; and, possibly, you think that his assailant was in earnest?

Phaedr. I thought, Socrates, that he was. And you are aware that the most powerful and considerable men among our statesmen are ashamed of writing speeches and leaving them in a written form because they are afraid of posterity, and do not like to be called sophists.

Soc. I don't know whether you are aware, Phaedrus, that the "sweet elbow"[1] of which the proverb speaks is really derived from the long and difficult arm of the Nile. And you appear to be equally unaware of the fact that this sweet elbow of theirs is also a long arm. For there is nothing of which great politicians are so fond as of writing speeches, which they bequeath to posterity. And when they write

[1] A proverb, like "the grapes are sour," applied to pleasures which can not be had, meaning sweet things which are out of the reach of the mouth.

them, out of gratitude to their admirers, they append their names at the top.

Phaedr. What do you mean? I don't understand.

Soc. Why, don't you know that when a politician writes, he begins with the names of his approvers?

Phaedr. How is that?

Soc. Why, he begins thus: "Be it enacted by the senate, the people, or both, as a certain person who was the author proposed;" and then he rehearses all his titles, and proceeds to display his own wisdom to his admirers with a great flourish in what is often a long and tedious composition. Now what is that sort of thing but a regular piece of authorship?

Phaedr. True.

Soc. And if the law is passed, then, like the poet, he leaves the theatre in high delight; but if the law is rejected and he is done out of his speech-making, and not thought good enough to write, then he and his party are in mourning.

Phaedr. Very true.

Soc. This shows how far they are from despising, or rather how highly they value the practice of writing.

Phaedr. No doubt.

Soc. And when the king or orator has the power, as Lycurgus or Solon or Darius had, of attaining an immortality of authorship in a state, is he not thought by posterity, when they see his writings, and does he not think himself, while he is yet alive, to be like a god?

Phaedr. That is true.

Soc. Then do you think that any one of this class who may be ill-disposed to Lysias would ever make it a reproach against him that he is an author?

Phaedr. Not upon your view; for according to you he would be reproaching him with his own favorite pursuit.

Soc. Any one may see that there is no disgrace in the fact of writing?

Phaedr. Certainly not.

Soc. There may however be a disgrace in writing, not well, but badly.

Phaedr. That is true.

Soc. And what is well and what is badly — need we ask Lysias, or any other poet or orator, who ever wrote or will write either a political or any other work, in metre or out of metre, poet or prose writer, to teach us this?

Phaedr. Need we? What motive has a man to live if not for the pleasure of discourse? Surely he would not live for the sake of bodily pleasures, which almost always have previous pain as a condition of them, and therefore are rightly called slavish.

Soc. There is time yet. And I can fancy that the grasshoppers who are still chirruping in the sun over our heads are talking to one another and looking at us. What would they say if they saw that we also, like the many, are not talking but slumbering at midday, lulled by their voices, too indolent to think? They would have a right to laugh at us, and might imagine that we are slaves coming to our place of resort, who like sheep lie asleep at noon about the fountain. But if they see us discoursing, and like Odysseus sailing by their siren voices, they may perhaps, out of respect, give us of the gifts which they receive of the gods and give to men.

Phaedr. What gifts do you mean? I never heard of any.

Soc. A lover of music like yourself ought surely to have heard the story of the grasshoppers, who are said to have been human beings in an age before the Muses. And when the Muses came and song appeared they were ravished with delight; and singing always, never

thought of eating and drinking, until at last they forgot and died. And now they live again in the grasshoppers; and this is the return which the Muses make to them — they hunger no more, neither thirst any more, but are always singing from the moment that they are born, and never eating or drinking; and when they die they go and inform the Muses in heaven who honors them on earth. They win the love of Terpsichore for the dancers by their report of them; of Erato for the lovers, and of the other Muses for those who do them honor, according to the several ways of honoring them; — of Calliope the eldest Muse, and of her who is next to her for the votaries of philosophy; for these are the Muses who are chiefly concerned with heaven and the ideas, divine as well as human, and they have the sweetest utterance. For many reasons, then, we ought always to talk and not to sleep at mid-day.

Phaedr. Let us talk.

Soc. Shall we discuss the rules of writing and speech as we were proposing?

Phaedr. Very good.

Soc. Is not the first rule of good speaking that the mind of the speaker should know the truth of what he is going to say?

Phaedr. And yet, Socrates, I have heard that he who would be an orator has nothing to do with true justice, but only with that which is likely to be approved by the many who sit in judgment; nor with the truly good or honorable, but only with public opinion about them, and that from this source and not from the truth come the elements of persuasion.

Soc. Any words of the wise ought to be regarded and not trampled under foot, for there is probably something in them, and perhaps there may be something in this which is worthy of attention.

Phaedr. Very true.

Soc. Let us put the matter thus: — Suppose that I persuaded you to buy a horse and go to the wars. Neither of us knew what a horse was like, but I knew that you believed a horse to be the longest-eared of domestic animals.

Phaedr. That would be ridiculous.

Soc. There is something more ridiculous coming. Suppose, now, that I was in earnest and went and composed a speech in honor of an ass, whom I entitled a horse, beginning: "A noble animal and a most useful possession, especially in war, and you may get on his back and fight, and he will carry baggage or anything."

Phaedr. That would be most ridiculous.

Soc. Ridiculous! Yes; but is not even a ridiculous friend better than a dangerous enemy?

Phaedr. Certainly.

Soc. And when the orator instead of putting an ass in the place of a horse, puts good for evil, being himself as ignorant of their true nature as the city on which he imposes is ignorant; and having studied the notions of the multitude, persuades them to do evil instead of good, — what will be the harvest which rhetoric will be likely to gather after the sowing of that fruit?

Phaedr. Anything but good.

Soc. Perhaps, however, rhetoric has been getting too roughly handled by us, and she might answer: What amazing nonsense is this! As if I forced any man to learn to speak in ignorance of the truth! Whatever my advice may be worth, I should have told him to arrive at the truth first, and then come to me. At the same time I boldly assert that mere knowledge of the truth will not give you the art of persuasion.

Phaedr. There is reason in the lady's defence of herself.

Soc. Yes, I admit that, if the argument which she has yet in store bear witness that she is an art at all. But I seem to hear them arraying themselves on the opposite side, declaring that she speaks not true, and that rhetoric is not an art but only a dilettante amusement. Lo! a Spartan appears, and says that there never is nor ever will be a real art of speaking which is unconnected with the truth.

Phaedr. And what are these arguments, Socrates? Bring them out that we may examine them.

Soc. Come out, children of my soul, and convince Phaedrus, who is the father of similar beauties, that he will never be able to speak about anything unless he be trained in philosophy. And let Phaedrus answer you.

Phaedr. Put the question.

Soc. Is not rhetoric, taken generally, a universal art of enchanting the mind by arguments; which is practised not only in courts and public assemblies, but in private houses also, having to do with all matters, great as well as small, good and bad alike, and is in all equally right, and equally to be esteemed — that is what you have heard?

Phaedr. Nay, not exactly that; but I should rather say that I have heard the art confined to speaking and writing in law-suits, and to speaking in public assemblies — not extended farther.

Soc. Then I suppose that you have only heard of the rhetoric of Nestor and Odysseus, which they composed in their leisure hours when at Troy, and never of Palamedes?

Phaedr. No more than of Nestor and Odysseus, unless Gorgias is your Nestor, and Thrasymachus and Theodorus your Odysseus.

Soc. Perhaps that is my meaning. But let us leave them. And do you tell me, instead, what are plaintiff and defendant doing in a law-court — are they not contending?

Phaedr. Exactly.

Soc. About the just and unjust — that is the matter in dispute?

Phaedr. Yes.

Soc. And he who is practised in the art will make the same thing appear to the same persons to be at one time just and at another time unjust, if he has a mind?

Phaedr. Exactly.

Soc. And when he speaks in the assembly, he will make the same things seem good to the city at one time, and at another time the reverse of good?

Phaedr. That is true.

Soc. Have we not heard of the Eleatic Palamedes (Zeno), who has an art of speaking which makes the same things appear to his hearers like and unlike, one and many, at rest and in motion too?

Phaedr. Very true.

Soc. The art of disputation, then, is not confined to the courts and the assembly, but is one and the same in every use of language; this is that art, if such an art there be, which finds a likeness of everything to which a likeness can be found, and draws into the light of day the likenesses and disguises which are used by others?

Phaedr. How do you mean?

Soc. Let me put the matter thus: When will there be more chance of deception — when the difference is large or small?

Phaedr. When the difference is small.

Soc. And you will be less likely to be discovered in passing by degrees into the other extreme than when you go all at once?

Phaedr. Of course.

Soc. He, then, who would deceive others, and not be deceived, must exactly know the real likenesses and differences of things?

Phaedr. Yes, he must.

Soc. And if he is ignorant of the true nature of anything, how can he ever distinguish the greater or less degree of likeness to other things of that which he does not know?

Phaedr. He can not.

Soc. And when men are deceived, and their notions are at variance with realities, it is clear that the error slips in through some resemblances?

Phaedr. Yes, that is the way.

Soc. Then he who would be a master of the art must know the real nature of everything; or he will never know either how to contrive or how to escape the gradual departure from truth into the opposite of truth which is effected by the help of resemblances?

Phaedr. He will not.

Soc. He then, who being ignorant of the truth catches at appearances, will only attain an art of rhetoric which is ridiculous and is not an art at all?

Phaedr. That may be expected.

Soc. Shall I propose that we look for examples of good and bad art, according to our notion of them, in the speech of Lysias which you have in your hand, and in my own speech?

Phaedr. Nothing could be better; and indeed I think that our previous argument has been too barren of illustrations.

Soc. Yes; and the two speeches afford a good illustration of the way in which the speaker who knows the truth may playfully draw away the hearts of his hearers. This piece of good fortune I attribute to the

local deities; and, perhaps, the prophets of the Muses who are singing over our heads may have imparted their inspiration to me. For I do not imagine that I have any rhetorical art myself.

Phaedr. I will not dispute that; only please to go forward.

Soc. Suppose that you read me the first words of Lysias' speech?

Phaedr. "You know my views of our common interest, and I do not think that I ought to fail in the object of my suit because I am not your lover. For lovers repent when ——"

Soc. Enough. Now, shall I point out the rhetorical error of those words?

Phaedr. Yes.

Soc. Every one is aware that about some things we are agreed, whereas about other things we differ.

Phaedr. I think that I understand you; but will you explain yourself?

Soc. When any one speaks of iron and silver, is not the same thing present in the minds of all?

Phaedr. Certainly.

Soc. But when any one speaks of justice and goodness, there is every sort of disagreement, and we are at odds with one another and with ourselves?

Phaedr. Precisely.

Soc. Then in some things we agree, but not in others?

Phaedr. That is true.

Soc. In which are we more likely to be deceived, and in which has rhetoric the greater power?

Phaedr. Clearly, in the class which admits of error.

Soc. Then the rhetorician ought to make a regular division, and acquire a distinct notion of both classes, as well of that in which the many err, as of that in which they do not err?

Phaedr. He who made such a distinction would have an excellent principle.

Soc. Yes; and in the next place he must have a keen eye for the observation of particulars in speaking, and not make a mistake about the class to which they are to be referred.

Phaedr. Certainly.

Soc. Now to which class does love belong — to the debatable or to the undisputed class?

Phaedr. To the debatable class surely; for if not, do you think that any one would have allowed you to say as you did, that love is an evil both to the lover and the beloved, and also the greatest possible good?

Soc. Capital. But will you tell me whether I defined love at the beginning of my speech? for, having been in an ecstasy, I can not well remember.

Phaedr. Yes, indeed; that you did, and no mistake.

Soc. Then I perceive that the Nymphs of Achelous and Pan the son of Hermes, who inspired me, were far better rhetoricians than Lysias the son of Cephalus. Alas! how inferior to them he is! But perhaps I am mistaken; and Lysias at the commencement of his lover's speech did insist on our supposing love to be something or other which he fancied him to be, and that in relation to this something he fashioned and framed the remainder of his discourse. Suppose we read him over again.

Phaedr. If you please; but you will not find what you want.

Soc. Read, that I may have his exact words.

Phaedr. "You know my views of our common interest; and I do not think that I ought to fail in the object of my suit because I am not your lover, for lovers repent of the kindnesses which they have shown, when their love is over."

Soc. Here he appears to have done just the reverse

of what he ought; for he has begun at the end, and is swimming on his back through the flood of words to the place of starting. His address to the fair youth commences with reference to the conclusion of his love. Am I not right, sweet Phaedrus?

Phaedr. Yes, indeed, Socrates; he does begin at the end.

Soc. Then as to the other topics — are they not a mass of confusion? Is there any principle in them? Why should the next topic or any other topic follow in that order? I can not help fancying in my ignorance that he wrote freely off just what came into his head, but I dare say that you would recognize a rhetorical necessity in the succession of the several parts of the composition?

Phaedr. You have too good an opinion of me if you think that I have any such insight into his principles of composition.

Soc. At any rate, you will allow that every discourse ought to be a living creature, having its own body and head and feet; there ought to be a middle, beginning, and end, which are in a manner agreeable to one another and to the whole?

Phaedr. Certainly.

Soc. Can this be said of the discourse of Lysias? See whether you can find any more connections in his words than in the epitaph, which is said by some to have been inscribed on the grave of Midas the Phrygian.

Phaedr. What is there remarkable in the epitaph?

Soc. The epitaph is as follows:

"I am a maiden of brass;
I lie on the tomb of Midas,
While waters flow and tall trees grow,
Here am I.

On Midas' tearful tomb I lie;
I am to tell the passers by
That Midas sleeps in earth below."

Now in this rhyme whether a line comes first or comes last, that, as you will perceive, makes no difference.

Phaedr. You are making fun of that oration of ours.

Soc. Well, I will say no more about your friend lest I should give offence to you; although I think that he might furnish many other examples of what a man ought to avoid. But I will proceed to the other speech, which, as I think, is also suggestive to students of rhetoric.

Phaedr. In what way?

Soc. The two speeches, as you may remember, were of an opposite character, the one argued that the lover and the other that the non-lover ought to be accepted.

Phaedr. And right manfully.

Soc. You should rather say "madly;" and that was the argument of them, for, as I said, "love is a madness."

Phaedr. Yes.

Soc. And there were two kinds of madness; one produced by human infirmity, the other by a divine release from the ordinary ways of men.

Phaedr. True.

Soc. The divine madness was subdivided into four kinds, prophetic, initiatory, poetic, erotic, having four gods presiding over them; the first was the inspiration of Apollo, the second that of Dionysus, the third that of the Muses, the fourth that of Aphrodite and Eros. In the description of the last kind of madness, which was also the best, being a sort of figure of love, we mingled a tolerably credible and possibly true, though partly erring myth, which was also a hymn in honor

of Eros, who is your lord and also mine, Phaedrus, and the guardian of fair children, and to him we sung the hymn in measured and solemn form.

Phaedr. I know that I had great pleasure in listening to the tale.

Soc. Let us take this instance and examine how the transition was made from blame to praise.

Phaedr. What do you mean.

Soc. I mean to say that the composition was mostly playful. Yet in these chance fancies of the hour were involved two principles which would be charming if they could be fixed by art.

Phaedr. What are they?

Soc. First, the comprehension of scattered particulars in one idea; — the speaker defines his several notions in order that he may make his meaning clear, as in our definition of love, which whether true or false certainly gave clearness and consistency to the discourse.

Phaedr. What is the other principle, Socrates?

Soc. Secondly, there is the faculty of division according to the natural ideas or members, not breaking any part as a bad carver might. But, as the body may be divided into a left side and into a right side, having parts right and left, so in the two discourses there was assumed, first of all, the general idea of unreason, and then one of the two proceeded to divide the parts of the left side and did not desist until he found in them an evil or left-handed love which the speaker justly reviled; and the other leading us to the right portion in which madness lay, found another love, having the same name, but yet divine, which he held up before us and applauded as the author of the greatest benefits.

Phaedr. That is most true.

Soc. I am a great lover of these processes of division

and generalization; they help me to speak and think. And if I find any man who is able to see unity and plurality in nature, him I follow, and walk in his step as if he were a god. And those who have this art, I have hitherto been in the habit of calling dialecticians; but God knows whether the name is right or not. And I should like to know what name you would give to your or Lysias' disciples, and whether this may not be that famous art of rhetoric which Thrasymachus and others practise? Skilful speakers they are, and impart their skill to any one who will consent to worship them as kings and to bring them gifts.

Phaedr. Yes, they are royal men; but their art is not the same with the art of those whom you call, and rightly, in my opinion, dialecticians. Still we are in the dark about rhetoric.

Soc. What do you mean? The remains of the art, when all this has been taken away, must be of rare value; and are not at all to be despised by you and me. But what are the remains? — tell me that.

Phaedr. There is a great deal surely to be found in books of rhetoric?

Soc. Yes; thank you for reminding me of that, there is the prooemium, if I remember rightly — that is what you mean — the niceties of the art?

Phaedr. Yes.

Soc. There follows the statement of facts, and upon that witnesses; thirdly, proofs; fourthly, probabilities are to come; the great Byzantian artist also speaks, if I am not mistaken, of confirmation and superconfirmation.

Phaedr. You mean the excellent Theodorus.

Soc. Yes; and he tells how refutation or further refutation is to be managed, whether in accusation or defence. I need hardly mention the Parian Evenus, who first invented indirect allusions and incidental

praises, and also censures, of which this wise man made a *memoria technica* in verse. But shall

"I to dumb forgetfulness consign"

Tisias and Gorgias, who are not ignorant that probability is superior to truth, and who by force of argument make the little appear great and the great little, and the new old and the old new, and have discovered universal forms, either short or going on to infinity. I remember Prodicus laughing when I told him of this; he said that he had himself discovered the true rule of art, which was to be neither long nor short, but of a convenient length.

Phaedr. Well done, Prodicus.

Soc. Then there is Hippias of Elis, who probably agrees with him.

Phaedr. Yes.

Soc. And there is also Polus, who has schools of diplasiology, and gnomology, and eikonology, and who teaches in them the words of which Licymnius made him a present; they were to give a polish.

Phaedr. Had not Protagoras something of the same sort?

Soc. Yes, rules of correctness and many other fine precepts; for the "sorrows of a poor old man," or any other pathetic case, no one is better than the Chalcedonian giant; he can put a whole company of people into a passion and out of one again by his mighty magic, and is first-rate at inventing or disposing of any sort of calumny on any grounds or none. All of them agree in asserting that a speech should end in a recapitulation, though they do not all agree in the use of this word.

Phaedr. You mean that there should be a summing up of the arguments in order to remind the hearers of them.

Soc. I have now said all that I have to say of the art of rhetoric: have you anything to add?

Phaedr. Not much, nor very important.

Soc. Leave the unimportant and let us bring the really important question into the light of day, which is: What power this art of rhetoric has, and when?

Phaedr. A very great power in public meetings.

Soc. Yes, that is true. But I should like to know whether you have the same feeling as I have about the rhetoricians? To me there seems to be a great many holes in their web.

Phaedr. Give an example.

Soc. I will. Suppose a person to come to your friend Eryximachus, or to his father Acumenus, and say to him: "I know how to apply drugs which shall have either a heating or a cooling effect, and I can give a vomit and also a purge, and all that sort of thing; and knowing all this, as I do, I claim to be a physician and a teacher of physic" — what do you suppose that they would say?

Phaedr. They would be sure to ask him whether he knew "to whom" he would give them, and "when," and "how much."

Soc. And suppose that he were to reply: "No; I know nothing of that; I expect those whom I have taught all this to do that of themselves."

Phaedr. They would reply that he is a madman or a pedant who fancies that he is a physician, because he has read something in a book, or has stumbled on a few drugs, although he has no real understanding of the art of medicine.

Soc. And suppose a person were to come to Sophocles or Euripides and say that he knows how to make a long speech about a small matter, and a short speech about a great matter, and also a sorrowful speech, or a terrible, or threatening speech, or any

other kind of speech, and in teaching this fancies that he is teaching the art of tragedy?

Phaedr. They too would surely laugh at him if he fancies that tragedy is anything but the arranging of these elements in a manner suitable to one another and to the whole.

Soc. But I do not suppose that they would be rude to him or revile him. Would they not treat him as a musician would treat a man who thinks that he is a harmonist because he knows how to pitch the highest and lowest note; happening to meet such an one he would not say to him savagely, "Fool, you are mad!" Oh, no; he would rather say to him in a gentle and musical tone of voice: "My good friend, he who would be a harmonist must certainly know this, and yet he may understand nothing of harmony if he has not got beyond your stage of knowledge, for you only know the preliminaries of harmony and not harmonies."

Phaedr. Very true.

Soc. And would not Sophocles say to the display of the would-be tragedian, that this was not tragedy but the preliminaries of tragedy, and would not Acumenus say to the would-be doctor that this was not medicine but the preliminaries of medicine?

Phaedr. Very true.

Soc. And if Adrastus the mellifluous or Pericles heard of these wonderful arts, brachylogies and eikonologies and all the hard names which we have been endeavoring to draw into the light of day, what would they say? Instead of losing temper and applying uncomplimentary epithets, as you and I have been doing to the authors of such an imaginary art, their superior wisdom would rather censure us, as well as them. Have a little patience, Phaedrus and Socrates, they would say, and don't be angry with those who from some want of dialectical skill are unable to define

the nature of rhetoric, and consequently suppose that they have found the art in the preliminary conditions of the art, and when they have taught these to others, fancy that they have been teaching the whole art of rhetoric; but as to persuasion in detail and unity of composition, that they regard as an easy thing with which their disciples may supply themselves.

Phaedr. I quite admit, Socrates, that the art of rhetoric which these men teach and of which they write is such as you describe — in that I agree with you. But I still want to know where and how the true art of rhetoric and persuasion is to be acquired.

Soc. The perfection of oratory is, or rather must be, like the perfection of all things, partly given by nature; but this is assisted by art, and if you have the natural power you will be famous as a rhetorician, if you only add knowledge and practice, and in either you may fall short. But the art, as far as there is an art, of rhetoric does not lie in the direction of Tisias or Thrasymachus.

Phaedr. But in what direction then?

Soc. I should conceive that Pericles was the most accomplished of rhetoricians.

Phaedr. What of that?

Soc. All the higher arts require much discussion and lofty contemplation of nature; this is the source of sublimity and perfect comprehensive power. And this, as I conceive, was the quality which, in addition to his natural gifts, Pericles acquired from his happening to know Anaxagoras. He was imbued with the higher philosophy, and attained the knowledge of mind and matter, which was the favorite theme of Anaxagoras, and hence he drew what was applicable to his art.

Phaedr. Explain.

Soc. Rhetoric is like medicine.

Phaedr. How is that?

Soc. Why, because medicine has to define the nature of the body and rhetoric of the soul — if you would proceed, not empirically but scientifically, in the one case to impart health and strength by giving medicine and food, in the other to implant the conviction which you require by the right use of words and principles.

Phaedr. You are probably right in that.

Soc. And do you think that you can know the nature of the soul intelligently without knowing the nature of the whole?

Phaedr. Hippocrates the Asclepiad says that this is the only method of procedure by which the nature even of the body can be understood.

Soc. Yes, friend, and he says truly. Still, we ought not to be content with the name of Hippocrates, but to examine and see whether he has reason on his side.

Phaedr. True.

Soc. Then consider what this is which Hippocrates says, and which right reason says about this or any other nature. Ought we not to consider first whether that which we wish either to learn or to teach is simple or multiform, and if simple, then to inquire what power this has of acting or being acted upon by other, and if multiform, then to number the forms; and see first in the case of one of them, and then in the case of all of them, the several powers which they by nature have of doing or suffering.

Phaedr. That will be the way.

Soc. The method which has not this analysis is like the groping of a blind man. Yet, surely, he who is an artist ought not to admit of a comparison with the blind, or deaf; but he who imparts rules of speech in an artist-like or scientific manner will particularly set

forth the nature of that to which he gives his rules, which I suppose is the soul.

Phaedr. Certainly.

Soc. His whole effort is directed towards this, for in this he seeks to produce conviction.

Phaedr. Yes.

Soc. Then clearly, Thrasymachus or any one else who elaborates a system of rhetoric will give an exact description of the nature of the soul; which he will make to appear either as single and same, or, like the body, multiform. That is what we should call showing the nature of the soul.

Phaedr. Exactly.

Soc. He will next proceed to speak of the instruments by which the soul acts or is affected in any way.

Phaedr. True.

Soc. Thirdly, having arranged men and speeches, and their modes and affections in different classes, and fitted them into one another, he will point out the connection between them — he will show why one is naturally persuaded by a particular form of argument, and another not.

Phaedr. That will certainly be a very good way.

Soc. Yes, that is the true and only way in which any subject can be set forth or treated by rules of art, whether in speaking or writing. But the writers of the present day, at whose feet you have sat, improperly conceal all this about the soul which they know quite well. Nor, until they adopt our method of reading and writing, can we admit that they write by rules of art.

Phaedr. What is our method?

Soc. I can not give you the exact details; but I should like to tell you generally, as far as I can, how a man ought to proceed according to rules of art.

Phaedr. Let me hear.

Soc. Oratory is the art of enchanting the soul, and therefore he who would be an orator has to learn the differences of human souls — they are so many and of such a nature, and from them come the differences between man and man — he will then proceed to divide speeches into their different classes. Such and such persons, he will say, are affected by this or that kind of speech in this or that way, and he will tell you why; he must have a theoretical notion of them first, and then he must see them in action, and be able to follow them with all his senses about him, or he will never get beyond the precepts of his masters. But when he is able to say what persons are persuaded by what arguments, and recognize the individual about whom he used to theorize as actually present to him, and say to himself, "This is he and this is the sort of man who ought to have that argument applied to him in order to convince him of this;" — when he has attained the knowledge of all this, and knows also when he should speak and when he should abstain from speaking, and when he should make use of pithy sayings, pathetic appeals, aggravated effects, and all the other figures of speech; — when, I say, he knows the times and seasons of all these things, then, and not till then, he is perfect and a consummate master of his art; but if he fail in any of these points, whether in speaking or teaching or writing them, and says that he speaks by rules of art, he who denies this has the better of him. Well, the teacher will say, is this Phaedrus and Socrates, your account of the art of rhetoric, or am I to look for another?

Phaedr. He must take this, Socrates, for there is no possibility of another, and yet the creation of such an art is not easy.

Soc. That is true; and therefore let us turn the

matter up and down, and see whether there may not be a shorter and easier road; there is no use in taking the longer and more difficult way when there is a shorter and easier one. And I wish that you would try and remember whether there is anything which you have heard from Lysias or any one else which might be of service to us.

Phaedr. If trying would avail, then I might; but I fear that I can not remember anything at the moment.

Soc. Suppose I tell you something which somebody who knows told me.

Phaedr. Certainly.

Soc. May not the wolf, as the proverb says, claim a hearing?

Phaedr. Do you say what can be said for him.

Soc. Well, they say that there is no use in putting a solemn face on a matter, or in going round and round, until you arrive at the beginning of all things; for that when the question is of justice and good, as I said at first, or a question in which men are concerned who are just and good, either by nature or habit, he who would be a skilful rhetorician has no need of truth — for that in courts of law men literally care nothing about truth, but only about conviction: and this is based on probability, to which he who would be a skilful orator should therefore give his whole attention. And they say also that there are cases in which the actual facts ought to be withheld, and only the probabilities should be told either in accusation or defence, and that always in speaking the orator should run after probability, and say good-bye to the truth. And the observance of this principle throughout a speech furnishes the whole art.

Phaedr. That is what the professors of rhetoric do actually say, Socrates, for I remember that although

we have touched upon this matter but slightly, the point is all-important with them.

Soc. I dare say that you are familiar with Tisias. Does he not define probability to be that which the many think?

Phaedr. Certainly, he does.

Soc. I believe that he has a clever and ingenious case of this sort: — He supposes a feeble and valiant man to have assaulted a strong and cowardly one, and to have robbed him of his coat or of something or other; he is brought into court, and then Tisias says that both parties should tell lies: the coward should say that he was assaulted by more men than one; the other should prove that they were alone, and should use this argument: "How could a man like me have assaulted a man like him?" The other will not like to confess his own cowardice, and will therefore invent some other lie which his adversary will thus gain an opportunity of refuting. These and others like them are the precepts of the doctors of the art. Am I not right, Phaedrus?

Phaedr. Certainly.

Soc. I can not help feeling that this is a wonderfully mysterious art which Tisias has discovered, or whoever the gentleman was, or whatever his name or country may have been who was the discoverer. Shall we say a word to him or not?

Phaedr. What shall we say to him?

Soc. Let us tell him that, before he appeared, you and I were saying that probability was engendered in the minds of the many by the likeness of the truth, and were setting forth that he who knew the truth would always know how best to discover the resemblances of the truth. If he has anything further to say about the art of speaking we should like to hear him; but if not, we are satisfied with our own view,

that unless a man estimates the various characters of his hearers and is able to divide existences into classes and to sum them up in single ideas, he will never be a skilful rhetorician even within the limits of human power. And this art he will not attain without a great deal of trouble, which a good man ought to undergo, not for the sake of speaking and acting before men, but in order that he may be able to say what is acceptable to God and in all things to act acceptably to Him as far as in him lies; for there is a saying of wiser men than ourselves, that a man of sense should not try to please his fellow-servants (at least this should not be his principal object) but his good and noble masters, so that, if the way is long and circuitous, marvel not at this; for, where the end is great, there the way may be permitted to be long, but not for lesser ends such as yours. Truly, the argument may say, Tisias, that if you do not mind going so far, rhetoric has a fair beginning in this.

Phaedr. I think, Socrates, that this is admirable, if only practicable.

Soc. But even to fail in an honorable object is honorable.

Phaedr. True.

Soc. I think that enough has been said of a true and false art of speaking.

Phaedr. Certainly.

Soc. But there is something yet to be said of propriety and impropriety of writing.

Phaedr. Yes.

Soc. Do you know how you can speak or act about rhetoric in a manner which will be acceptable to God?

Phaedr. No, indeed. Do you?

Soc. I have heard a tradition of antiquity, whether true or not antiquity only knows. If we had the truth

ourselves, do you think that we should care much about the opinions of men?

Phaedr. That is a question which needs no answer; but I wish that you would tell me what you say that you have heard.

Soc. At the Egyptian city of Naucratis, there was a famous old god, whose name was Theuth; the bird which is called the Ibis was sacred to him, and he was the inventor of many arts, such as arithmetic and calculation and geometry and astronomy and draughts and dice, but his great discovery was the use of letters. Now in those days Thamus was the king of the whole of Upper Egypt, which is the district surrounding that great city which is called by the Hellenes Egyptian Thebes, and they call the god himself Ammon. To him came Theuth and showed his inventions, desiring that the other Egyptians might be allowed to have the benefit of them; he went through them, and Thamus inquired about their several uses, and praised some of them and censured others, as he approved or disapproved of them. There would be no use in repeating all that Thamus said to Theuth in praise or blame of the various arts. But when they came to letters, This, said Theuth, will make the Egyptians wiser and give them better memories; for this is the cure of forgetfulness and of folly. Thamus replied: O most ingenious Theuth, he who has the gift of invention is not always the best judge of the utility or inutility of his own inventions to the users of them. And in this instance a paternal love of your own child has led you to say what is not the fact; for this invention of yours will create forgetfulness in the learners' souls, because they will not use their memories; they will trust to the external written characters and not remember of themselves. You have found a specific, not for memory but for reminiscence, and you give

your disciples only the pretence of wisdom; they will be hearers of many things and will have learned nothing; they will appear to be omniscient and will generally know nothing; they will be tiresome, having the reputation of knowledge without the reality.

Phaedr. Yes, Socrates, you can easily invent tales of Egypt, or of any other country that you like.

Soc. There was a tradition in the temple of Dodona that oaks first gave prophetic utterances. The men of that day, unlike in their simplicity to young philosophy, deemed that if they heard the truth even from "oak or rock," that was enough for them; whereas, you seem to think not of the truth but of the speaker, and of the country from which the truth comes.

Phaedr. I acknowledge the justice of your rebuke; and I think that the Theban is right in his view about letters.

Soc. He would be a simple person, and quite without understanding of the oracles Thamus and Ammon, who should leave in writing or receive in writing any art under the idea that the written word would be intelligible or certain; or who deemed that writing was at all better than knowledge and recollection of the same matters.

Phaedr. That is most true.

Soc. I can not help feeling, Phaedrus, that writing is unfortunately like painting; for the creations of the painter have the attitude of life, and yet if you ask them a question they preserve a solemn silence. And the same may be said of speeches. You would imagine that they had intelligence, but if you want to know anything and put a question to one of them, the speaker always gives one unvarying answer. And when they have been once written down they are tossed about anywhere among those who do and

among those who do not understand them. And they have no reticences or proprieties towards different classes of persons; and, if they are unjustly assailed or abused, their parent is needed to protect his offspring, for they can not protect or defend themselves.

Phaedr. That again is most true.

Soc. May we not imagine another kind of writing or speaking far better than this is, and having far greater power — which is one of the same family, but lawfully begotten? Let us see what his origin is.

Phaedr. Who is he, and what do you mean about his origin?

Soc. I am speaking of an intelligent writing which is graven in the soul of him who has learned, and can defend itself, and knows when to speak and when to be silent.

Phaedr. You mean the word of knowledge which has a living soul, and of which the written word is properly no more than an image?

Soc. Yes, of course that is what I mean. And I wish that you would let me ask you a question: Would a husbandman, who is a man of sense, take the seeds, which he values and which he wishes to be fruitful, and in sober earnest plant them during the heat of summer, in some garden of Adonis, that he may rejoice when he sees them in eight days appearing in beauty (at least he does that, if at all, only as the show of a festival); but those about which he is in earnest he sows in fitting soil, and practises husbandry, and is satisfied if in eight months they arrive at perfection?

Phaedr. Yes, Socrates, that will be his way when he is in earnest; he will do the other, as you say, only as an amusement.

Soc. And can we suppose that he who knows the just and good and honorable has less understanding in reference to his own seeds than the husbandman?

Phaedr. Certainly not.

Soc. Then he will not seriously incline to write them in water with pen and ink or in dumb characters which have not a word to say for themselves and can not adequately express the truth?

Phaedr. No, that is not likely.

Soc. No, that is not likely — in the garden of letters he will plant them only as an amusement, or he will write them down as memorials against the forgetfulness of old age, to be treasured by him and his equals when they, like him, have one foot in the grave; and he will rejoice in beholding their tender growth; and they will be his pastime while others are watering the garden of their souls with banqueting and the like.

Phaedr. A pastime, Socrates, as noble as the other is ignoble, when a man is able to pass time merrily in the representation of justice and the like.

Soc. True, Phaedrus. But nobler far is the serious pursuit of the dialectician, who finds a congenial soul, and then with knowledge engrafts and sows words which are able to help themselves and him who planted them, and are not unfruitful, but have in them seeds which may bear fruit in other natures, nurtured in other ways — making the seed everlasting and the possessors happy to the utmost extent of human happiness.

Phaedr. Yes, indeed, that is far nobler.

Soc. And now, Phaedrus, having agreed upon the premisses we may decide about the conclusion.

Phaedr. About what conclusion?

Soc. About Lysias, whom we censured, and his art of writing, and his discourses, and the rhetorical skill or want of skill which was shown in them; for he brought us to this point. And I think that we are now pretty well informed about the nature of art and its opposite.

Phaedr. Yes, I think with you; but I wish that you would repeat what was said.

Soc. Until a man knows the truth of the several particulars of which he is writing or speaking, and is able to define them as they are, and having defined them again to divide them until they can be no longer divided, and until in like manner he is able to discern the nature of the soul and discover the different modes of discourse which are adapted to different natures, and to arrange and dispose them in such a way that the simple form of speech may be addressed to the simpler nature, and the complex and composite to the complex nature — until he has accomplished all this, he will be unable to handle arguments according to rules of art, as far as their nature allows them to be subjected to art, either for the purpose of teaching or persuading; — that is the view which is implied in the whole preceding argument.

Phaedr. Yes, that was our view, certainly.

Soc. Secondly, as to the justice of the censure which was passed on speaking or writing discourses — did not our previous argument show — ?

Phaedr. Show what?

Soc. That whether Lysias or any other writer that ever was or will be, whether private man or statesman, writes a political treatise in his capacity of legislator, and fancies that there is a great certainty and clearness in his performance, the fact of his writing as he does is only a disgrace to him, whatever men may say. For entire ignorance about the nature of justice and injustice, and good and evil, and the inability to distinguish the dream from the reality, can not in truth be otherwise than disgraceful to him, even though he have the applause of the whole world.

Phaedr. Certainly.

Soc. But he who thinks that in the written wor

there is necessarily much which is not serious, and that neither poetry nor prose, spoken or written, are of any great value — if, like the compositions of the rhapsodes, they are only recited in order to be believed, and not with any view to criticism or instruction; and who thinks that even the best of them are but a reminiscence of what we know, and that only in principles of justice and goodness and nobility taught and communicated orally and written in the soul, which is the true way of writing, is there clearness and perfection and seriousness; and that such principles are like legitimate offspring; — being, in the first place, that which the man finds in his own bosom; secondly, the brethren and descendants and relations of this which has been duly implanted in the souls of others; and who cares for them and no others — this is the right sort of man; and you and I, Phaedrus, would pray that we may become like him.

Phaedr. That is most assuredly my desire and prayer.

Soc. And now the play is played out; and of rhetoric enough. Go and tell Lysias that to the fountain and school of the Nymphs we went down, and were bidden by them to convey a message to him and to other composers of speeches — to Homer and other writers of poems, whether set to music or not. And to Solon and the writers of political documents, which they term laws, we are to say that if their compositions are based on knowledge of the truth, and they can defend or prove them, when they are put to the test, by spoken arguments, which leave their writings poor in comparison of them, then they are not only poets, orators, legislators, but worthy of a higher name.

Phaedr. What name is that?

Soc. Wise, I may not call them; for that is a great

name which belongs to God only, — lovers of wisdom or philosophers is their modest and befitting title.

Phaedr. Very good.

Soc. And he who can not rise above his own compilations and compositions, which he has been long patching and piecing, adding some and taking away some, may be justly called poet or speech-maker or law-maker.

Phaedr. Certainly.

Soc. Now go and tell this to your companion.

Phaedr. But there is also a friend of yours who ought not to be forgotten.

Soc. Who is that?

Phaedr. Isocrates the fair.

Soc. What of him?

Phaedr. What message shall we send to him?

Soc. Isocrates is still young, Phaedrus; but I am willing to risk a prophecy concerning him.

Phaedr. What would you prophesy?

Soc. I think that he has a genius which soars above the orations of Lysias, and he has a character of a finer mould. My impression of him is that he will marvellously improve as he grows older, and that all former rhetoricians will be as children in comparison of him. And I believe that he will not be satisfied with this, but that some divine impulse will lead him to things higher still. For there is an element of philosophy in his nature. This is the message which comes from the gods dwelling in this place, and which I will myself deliver to Isocrates, who is my delight; and do you give the other to Lysias who is yours.

Phaedr. I will; and now as the heat is abated let us depart.

Soc. Should we not offer up a prayer first of all to the local deities?

Phaedr. By all means.

Soc. Beloved Pan, and all ye other gods who haunt this place, give me beauty in the inward soul; and may the outward and inward man be at one. May I reckon the wise to be the wealthy, and may I have such a quantity of gold as none but the temperate can carry. Anything more? That prayer, I think, is enough for me.

Phaedr. Ask the same for me, for friends should have all things in common.

Soc. Let us go.

CHARMIDES

INTRODUCTION

THE subject of the Charmides is Temperance, which may also be rendered Moderation, Modesty, Discretion, Wisdom, without completely exhausting by all these terms the various associations of the word. It may be described as "mens sana in corpore sano," the harmony or due proportion of the higher and lower elements of human nature which "makes a man his own master," according to the definition of the Republic. In the accompanying translation the word has been rendered in different places either Temperance or Wisdom, as the connection seemed to require.

The beautiful youth, Charmides, who is also the most temperate of human beings, is asked by Socrates, "What is Temperance?" He answers characteristically, (1) "Quietness." "But temperance is a fine and noble thing; and quietness in many or most cases is not so fine a thing as quickness." He tries again and says (2) that temperance is modesty. But this again is set aside by a sophistical application of Homer: for temperance is good as well as noble, and Homer has declared that "modesty is not good for a needy man." (3) Once more Charmides makes the attempt. This time he gives a definition which he has heard, and of which he insinuates that Critias is the author: "Temperance is doing one's own business." But the artisan who makes another man's shoes may be temperate, and yet he is not doing his own business. How is this riddle to be explained?

Critias, who takes the place of Charmides, distinguishes in his answer between "making" and "doing," and with the help of a misapplied quotation from Hesiod assigns to the words "doing" and "work" an exclusively good sense: temperance is doing one's own business; — (4) is doing good.

Still an element of knowledge is wanting which Critias is

readily induced to admit at the suggestion of Socrates; and, in the spirit of Socrates and of Greek life generally, proposes as a fifth definition, (5) Temperance is self-knowledge. But all sciences have a subject: number is the subject of arithmetic, health of medicine — what is the subject of temperance or wisdom? The answer is that (6) Temperance is the knowledge of what a man knows and of what he does not know. But this is contrary to analogy; there is no vision of vision, but only of visible things; no love of loves, but only of beautiful things; how then can there be a knowledge of knowledge? That which is older, heavier, lighter, is older, heavier, and lighter than something else, not than itself, and this seems to be true of all relative notions — the object of relation is outside of them; at any rate they can only have relation to themselves in the form of that object. Whether there are any such cases of reflex relation or not, and whether that sort of knowledge which we term Temperance is of this reflex nature, has yet to be determined by the great metaphysician. But even if knowledge can know itself, how does the knowledge of what we know imply the knowledge of what we do not know? Besides this, knowledge is an abstraction only, and will not inform us of any particular subject, such as medicine, building, and the like. It may tell us that we or other men know something, but can never tell what we know.

But admitting further that there is such a knowledge of what we know and do not know, which would supply a rule and measure of all things, still there would be no good in this. For temperance is a good, and the knowledge which temperance gives must be of a kind which will do us good. But this universal knowledge does not tend to our happiness or good: the only kind of knowledge which brings happiness is the knowledge of good and evil. To this Critias replies that the science or knowledge of good and evil, and all the other sciences, are regulated by the higher science or knowledge of knowledge. Socrates replies by again dividing the abstract from the concrete, and asks how this knowledge conduces to happiness in the same definite way that medicine conduces to health.

And now, after making all these concessions, which are really inadmissible, we are still as far as ever from ascertaining the nature of temperance, which Charmides has already discovered, and had therefore better rest in the knowledge that the more temperate he is the happier he will be, and not trouble himself with the speculations of Socrates.

In this Dialogue may be noted (1) the Greek ideal of beauty and goodness, the vision of the fair soul in the fair body, realized in the beautiful Charmides; (2) The true conception of medicine as a science of the whole as well as the parts, and of the mind as well as the body, which is playfully intimated in the story of the Thracian; (3) The tendency of the age to verbal distinctions, which here, as in the Protagoras and Cratylus, are ascribed to the ingenuity of Prodicus; also the interpretations or rather parodies of Homer and Hesiod, which are eminently characteristic of Plato and of his age; (4) The germ of an ethical principle contained in the notion that temperance is "doing one's own business," which in the Republic (such is the shifting character of the Platonic philosophy) is given as the definition, not of temperance, but of justice; (5) The beginnings of logic and metaphysics implied in the two questions, whether there can be a science of science? and whether the knowledge of what you know is the same as the knowledge of what you do not know? also in the distinction between "what you know," and "that you know;" here arises the first conception of an absolute self-determined science (the claims of which, however, are set aside by Socrates); as well as the first suggestion of the difficulty of the abstract and concrete, and one of the earliest anticipations of the relation of subject and object, and of the subjective element in knowledge; (6) The conception of a science of good and evil also first occurs here, and may be regarded as an anticipation of the Philebus and Republic, as well as of moral philosophy in later ages.

The dramatic interest of the Dialogue chiefly centres in the youth Charmides, with whom Socrates talks in the kindly spirit of an elder. Some contrast appears to be intended between his youthful simplicity and ingenuousness and the dialectical and rhetorical arts of Critias, who is the grown-up man of the world, not without a tincture of philosophy. But neither in this nor in any other of the dialogues of Plato is that most hated of Athenians displayed in his true character. He is simply a cultivated person who, like his kinsman Plato, is ennobled by the connection of his family with Solon, and had been the follower, if not the disciple, both of Socrates and of the Sophists. In the argument he is not unfair, if allowance is made for a slight rhetorical tendency, and for some desire to save his reputation with the company; in some respects he is nearer the truth than Socrates. Nothing in his language or behavior is unbecoming the guardian of the beautiful Charmides. His love of reputation,

which is characteristically Greek, contrasts with the utter absence of this quality and profession of ignorance on the part of Socrates.

The definitions of temperance proceed in regular order from the popular to the philosophical. The first two are simple enough and partially true, like the first thoughts of an intelligent youth; the third, which is a real contribution to ethical philosophy, is perverted by the ingenuity of Socrates, and hardly rescued by an equal perversion on the part of Critias. The remaining definitions have a higher aim, which is to introduce the element of knowledge, and at last to unite good and truth in a single science. But the time has not yet arrived for the realization of this vision of metaphysical philosophy. Hence we see with surprise that Plato, who in his other writings identifies good and knowledge, here opposes them, and asks, almost in the spirit of Aristotle, how can there be a knowledge of knowledge, and even if attainable, how can such a knowledge be of any use?

The relations of knowledge and virtue are again brought forward in the companion Dialogues of the Lysis and Laches; and also in the Protagoras and Euthydemus.

CHARMIDES, OR TEMPERANCE

PERSONS OF THE DIALOGUE

SOCRATES, *who is the narrator.* CHARMIDES.
CHAEREPHON. CRITIAS.

SCENE: — The Palaestra of Taureas, which is near the Porch of the King Archon.

YESTERDAY evening I returned from the army at Potidaea, and having been a good while away, I thought that I would go and look at my old haunts. So I went into the palaestra of Taureas, which is over against the temple adjoining the porch of the King Archon, and there I found a number of persons, most of whom I knew, but not all. My visit was unexpected, and no sooner did they see me entering than they saluted me from afar on all sides; and Chaerephon, who is a kind of madman, started up and ran to me, seizing my hand, and saying, How did you escape, Socrates? — (I should explain that an engagement had taken place at Potidaea not long before we came away, the news of which had only just reached Athens.)

You see, I replied, that here I am.

There was a report, he said, that the engagement was very severe, and that many of our acquaintance had fallen.

That, I replied, was not far from the truth.

I suppose, he said, that you were present.

I was.

Then sit down, and tell us the whole story, which as yet we have only heard imperfectly.

I took the place which he assigned to me, by the side of Critias the son of Callaeschrus, and when I had saluted him and the rest of the company, I told them the news from the army, and answered their several inquiries.

Then, when there had been enough of this, I, in my turn, began to make inquiries about matters at home — about the present state of philosophy, and about the youth. I asked whether any of them were remarkable for beauty or sense, or both. Critias, glancing at the door, invited my attention to some youths who were coming in, and talking noisily to one another, followed by a crowd. Of the beauties, Socrates, he said, I fancy that you will soon be able to form a judgment. For those who are just entering are the advanced guard of the great beauty of the day, and he is likely to be not far off himself.

Who is he, I said; and who is his father?

Charmides, he replied, is his name; he is my cousin, and the son of my uncle Glaucon: I rather think that you know him, although he was not grown up at the time of your departure.

Certainly, I know him, I said, for he was remarkable even then when he was still a child, and now I should imagine that he must be almost a young man.

You will see, he said, in a moment what progress he has made and what he is like. He had scarcely said the word, when Charmides entered.

Now you know, my friend, that I can not measure anything, and of the beautiful, I am simply such a measure as a white line is of chalk; for almost all young persons are alike beautiful in my eyes. But at that moment, when I saw him coming in, I must admit that I was quite astonished at his beauty and

stature; all the world seemed to be enamored of him; amazement and confusion reigned when he entered; and a troop of lovers followed him. That grown-up men like ourselves should have been affected in this way was not surprising, but I observed that there was the same feeling among the boys; all of them, down to the very least child, turned and looked at him as if he had been a statue.

Chaerephon called me and said: What do you think of him, Socrates? Has he not a beautiful face?

That he has, indeed, I said.

But you would think nothing of his face, he replied, if you could see his naked form: he is absolutely perfect.

And to this they all agreed.

By Heracles, I said, there never was such a paragon, if he has only one other slight addition.

What is that? said Critias.

If he has a noble soul; and being of your house, Critias, he may be expected to have this.

He is as fair and good within, as he is without, replied Critias.

Shall we ask him then, I said, to show us, not his body, but his soul, naked and undisguised? he is just of an age at which he will like to talk.

That he will, said Critias, and I can tell you that he is a philosopher already, and also a considerable poet, not in his own opinion only, but in that of others.

That, my dear Critias, I replied, is a distinction which has long been in your family, and is inherited by you from Solon. But why don't you call him, and show him to us? for even if he were younger than he is, there could be no impropriety in his talking to us in the presence of you, who are his guardian and cousin.

Very well, he said; then I will call him; and turn-

ing to the attendant, he said, Call Charmides, and tell him that I want him to come and see a physician about the illness of which he spoke to me the day before yesterday. Then again addressing me, he added: He has been complaining lately of having a headache when he rises in the morning: now why should you not make believe to him that you know a cure for the headache?

There will be no difficulty about that, I said, if he comes.

He will be sure to come, he replied.

He came as he was bidden, and sat down between Critias and me. Great amusement was occasioned by every one pushing with might and main at his neighbor in order to make a place for him next to them, until at the two ends of the row one had to get up and the other was rolled over sideways. Now I, my friend, was beginning to feel awkward; my former bold belief in my powers of conversing with him had vanished. And when Critias told him that I was the person who had the cure, he looked at me in such an indescribable manner, and was about to ask a question; and then all the people in the palaestra crowded about us, and, O rare! I caught a sight of the inwards of his garment, and took the flame. Then I could no longer contain myself. I though how well Cydias understood the nature of love, when, in speaking of a fair youth, he warns some one "not to bring the fawn in the sight of the lion lest he devour him," for I felt that I had been overcome by a sort of wild-beast appetite. But I controlled myself, and when he asked me if I knew the cure of the headache, I answered, but with an effort, that I did know.

And what is it? he said.

I replied that it was a kind of leaf, which required to be accompanied by a charm, and if a person would

repeat the charm at the same time that he used the cure, he would be made whole; but that without the charm the leaf would be of no avail.

Then I will write out the charm from your dictation, he said.

With my good will? I said, or without my good will?

With your good will, Socrates, he said, laughing.

Very good, I said; and are you quite sure that you know my name?

I ought to know you, he replied, for there is a great deal said about you among my companions; and I remember when I was a child seeing you in company with my cousin Critias.

That is very good of you, I said; and will make me more at home with you in explaining the nature of the charm; I was thinking that I might have a difficulty about this. For the charm will do more, Charmides, than only cure the headache. I dare say that you may have heard eminent physicians say to a patient who comes to them with bad eyes, that they can not cure his eyes by themselves, but that if his eyes are to be cured, his head must be treated; and then again they say that to think of curing the head alone, and not the rest of the body also, is the height of folly. And arguing in this way they apply their methods to the whole body, and try to treat and heal the whole and the part together. Did you ever observe that this is what they say?

Yes, he said.

And they are right, and you would agree with them?

Yes, he said, certainly I should.

His approving answers reassured me, and I began by degrees to regain confidence, and the vital heat returned. Such, Charmides, I said, is the nature of

the charm. Now I learned it when serving with the army, of one of the physicians of the Thracian king, Zamolxis. He was one of those who are said to give immortality. This Thracian told me that the Greek physicians are quite right in these notions of theirs, which I was mentioning, as far as they go; but Zamolxis, he added, our king, who is also a god, says further, "that as you ought not to attempt to cure the eyes without the head, or the head without the eyes, so neither ought you to attempt to cure the body without the soul; and this," he said, "is the reason why the cure of many diseases is unknown to the physicians of Hellas, because they are ignorant of the whole, which ought to be studied also; for the part can never be well unless the whole is well." For all good and evil, whether in the body or in human nature, originates, as he declared, in the soul, and overflows from thence, as from the head into the eyes. And therefore if the head and the body are to be well, you must begin by curing the soul; that is the first thing. And the cure, my dear youth, has to be effected by the use of certain charms, and these charms are fair words; and by them temperance is implanted in the soul, and where temperance is, there health is speedily imparted, not only to the head, but to the whole body. And he who taught me the cure and the charm added a special direction; "Let no one," he said, "persuade you to cure the head, until he has first given you his soul to be cured by the charm. For this," he said, "is the great error of our day in the treatment of the human body, that physicians separate the soul from the body." And he added with emphasis, at the same time making me swear to his words, "let no one, however rich, or noble, or fair, persuade you to give him the cure, without the charm." Now I have sworn, and I must keep my oath, and therefore if you will

allow me to apply the Thracian charm first to your soul, as the stranger directed, I will afterwards proceed to apply the cure to your head. But if not, I do not know what I am to do with you, my dear Charmides.

Critias, when he heard this, said: The headache will be an unexpected benefit to my young relation, if the pain in his head compels him to improve his mind: and I can tell you, Socrates, that Charmides is not only preëminent in beauty among his equals, but also in that quality which is given by the charm; and this, as you say, is temperance, is it not?

Yes, I said.

Then let me tell you that he is the most temperate of human beings, and for his age inferior to none in any quality.

Yes, I said, Charmides; and indeed I think that you ought to excel others in all good qualities; for if I am not mistaken there is no one present who could easily point out two Athenian houses, the alliance of which was likely to produce a better or nobler son than the two from which you are sprung. There is your father's house, which is descended from Critias the son of Dropidas, whose family has been commemorated in the panegyrical verses of Anacreon, Solon, and many other poets, as famous for beauty and virtue and all other high fortune: and your mother's house is equally distinguished; for your maternal uncle, Pyrilampes, never met with his equal in Persia at the court of the great king, or on the whole continent in all the places to which he went as ambassador, for stature and beauty; that whole family is not a whit inferior to the other. Having such ancestors you ought to be first in all things, and as far as I can see, sweet son of Glaucon, your outward form is no dishonor to them. And if you have temperance as well

as beauty, as Critias declares, then blessed art thou, dear Charmides, in being the son of thy mother. And this is the question: if this gift of temperance is already yours, as Critias declares, and you are temperate enough, in that case you have no need of any charms, whether of Zamolxis, or of Abaris the Hyperborean, and I may as well give you the cure of the head at once; but if you are wanting in these qualities, I must use the charm before I give you the medicine. Please, therefore, to inform me whether you admit the truth of what Critias has been saying about your gift of temperance, or are you wanting in this particular?

Charmides blushed, and the blush heightened his beauty, for modesty is becoming in youth; he then said very ingenuously, that he really could not say at once, either yes, or no, in answer to the question which I had asked: For, said he, if I affirm that I am not temperate, that would be a strange thing to say of myself, and also I should have to give the lie to Critias, and many others, who think that I am temperate, as he tells you: but, on the other hand, if I say that I am, I shall have to praise myself, which would be ill manners; and therefore I have no answer to make to you.

I said to him: That is a natural reply, Charmides, and I think that you and I may as well inquire together whether you have this quality about which I am asking or not; and then you will not be compelled to say what you do not like; neither shall I be a rash practitioner of medicine: therefore, if you please, I will join with you in the inquiry, but I will not press you if you would rather not.

There is nothing which I should like better, he said; and as far as I am concerned you may proceed in the way which you think best.

I think, I said, that I had better begin by asking you, What is Temperance? for you must have an opinion about this: if temperance abides in you, she must give some intimation of her nature and qualities, which may enable you to form some notion of her. Is not that true?

Yes, he said, that I think is true.

And as you speak Greek, I said, you can surely describe what this appears to be, which you have within you.

Certainly, he said.

In order, then, that I may form a conjecture whether you have temperance abiding in you or not, tell me, I said, what, in your opinion, is Temperance?

At first he hesitated, and was very unwilling to answer: then he said that he thought temperance was doing things orderly and quietly, such things for example as walking in the streets, and talking, or anything else of that nature. In a word, he said, I should answer that, in my opinion, temperance is quietness.

Are you right, Charmides? I said. No doubt the opinion is held that the quiet are the temperate; but let us see whether they are right who say this; and first tell me whether you would not acknowledge temperance to be of the class of the honorable and good?

Yes.

But which is best when you are at the writing-master's, to write the same letters quickly or quietly?

Quickly.

And to read quickly or slowly?

Quickly again.

And in playing the lyre, or wrestling, quickness or cleverness are far better than quietness and slowness?

Yes.

And the same holds in boxing and the pancratium?

Certainly.

And in leaping and running, and bodily exercises generally, quickness and agility are good; slowness, and inactivity, and quietness, are bad?

That is evident.

Then, I said, in all bodily actions, not quietness, but the greatest agility and quickness, is noblest and best?

Yes, certainly.

And is temperance a good?

Yes.

Then, in reference to the body, not quietness, but quickness will be the higher degree of temperance, if temperance is a good?

True, he said.

And which, I said, is better — facility in learning, or difficulty in learning?

Facility.

Yes, I said; and facility in learning is learning quickly, and difficulty in learning is learning quietly and slowly?

True.

And is it not better to teach one another quickly and energetically, rather than quietly and slowly?

Yes.

And to call to mind, and to remember, quickly and readily — that is also better than to remember quietly and slowly?

Yes.

And is not shrewdness a quickness or cleverness of the soul, and not a quietness?

True.

And is it not best to understand what is said, whether at the writing-master's or the music-master's, or anywhere else, not as quietly as possible, but as quickly as possible?

Yes.

And when the soul inquires, and in deliberations, not the quietest, as I imagine, and he who with difficulty deliberates and discovers, is thought worthy of praise, but he who does this most easily and quickly?

That is true, he said.

And in all that concerns either body or soul, swiftness and activity are clearly better than slowness and quietness?

That, he said, is the inference.

Then temperance is not quietness, nor is the temperate life quiet, upon this view; for the life which is temperate is supposed to be the good. And of two things, one is true, — either never, or very seldom, do the quiet actions in life appear to be better than the quick and energetic ones; or, granting ever so much that of the nobler sort of actions, there are as many quiet, as quick and vehement ones: still, even if we admit this, temperance will not be acting quietly any more than acting quickly and vehemently, either in walking, talking, or anything else; nor will the quiet life be more temperate than the unquiet, seeing that temperance is reckoned by us in the class of good and honorable, and the quick have been shown to be as good as the quiet.

I think, he said, Socrates, that you are right in saying that.

Then once more, Charmides, I said, fix your attention, and look within; consider the effect which temperance has upon yourself, and the nature of that which has the effect. Think over that, and, like a brave youth, tell me — What is temperance?

After a moment's pause, in which he made a real manly effort to think, he said: My opinion is, Socrates, that temperance makes a man ashamed or modest, and that temperance is the same as modesty.

Very good, I said; and did you not admit, just now, that temperance is honorable?

Yes, certainly, he said.

And the temperate are also good?

Yes.

And can that be good which does not make men good?

Certainly not.

And you would infer that temperance is not only honorable, but also good?

That is my opinion.

Well, I said; and surely you would agree with Homer when he says,

"Modesty is not good for a needy man"?

Yes, he said; I agree to that.

Then I suppose that modesty is and is not good?

That is plain.

But temperance, whose presence makes men only good, and not bad, is always good?

That appears to me to be as you say.

Then the inference is, that temperance can not be modesty — if temperance is a good, and if modesty is as much an evil as a good?

All that, Socrates, appears to me to be true; but I should like to know what you think about another definition of temperance, which I just now remember to have heard from some one, who said, "That temperance is doing our own business." Was he right who affirmed that?

You young monster! I said; this is what Critias, or some philosopher has told you.

Some one else, then, said Critias; for certainly I have not.

But what matter, said Charmides, from whom I heard this?

No matter at all, I replied; for the point is not who said the words, but whether they are true or not.

There you are in the right, Socrates, he replied.

To be sure, I said; yet I doubt whether we shall ever be able to discover their truth or falsehood; for they are a riddle.

What makes you think that? he said.

Because, I said, he who uttered them seems to me to have meant one thing, and said another. Is the scribe, for example, to be regarded as doing nothing when he reads or writes?

I should rather think that he was doing something.

And does the scribe write or read, or teach you boys to write or read, your own names only, or did you write your enemies' names as well as your own and your friends'?

As much one as the other.

And was there anything meddling or intemperate in this?

Certainly not.

And yet, if reading and writing are the same as doing, you were doing what was not your own business?

But they are the same as doing.

And the healing art, my friend, and building, and weaving, and doing anything whatever which is done by art, all come under the head of doing?

Certainly.

And do you think that a state would be well ordered by a law which compelled every man to weave and wash his own coat, and make his own shoes, and his own flask and strigil, and other implements, on this principle of every one doing and performing his own, and abstaining from what is not his own?

I think not, he said.

But, I said, a temperate state will be a well-ordered state.

Of course, he replied.

Then temperance, I said, will not be doing one's own business; at least not in this way, or not doing these sort of things?

Clearly not.

Then, as I was just now saying, he who declared that temperance is a man doing his own business had another and a hidden meaning; for I don't think that he could have been such a fool as to mean this. Was he a fool who told you, Charmides?

Nay, he replied, I certainly thought him a very wise man.

Then I am quite certain that he put forth this as a riddle: he meant to say that there was a difficulty in a man knowing what is his own business.

I dare say, he replied.

And what, then, is the meaning of a man doing his own business? Can you tell me?

Indeed, I can not, he said; and I shouldn't wonder if he who said this had no notion of his own meaning. And in saying this he laughed slyly, and looked at Critias.

Critias had long been showing uneasiness, for he felt that he had a reputation to maintain with Charmides and the rest of the company. He had, however, hitherto managed to restrain himself; but now he could no longer forbear, and his eagerness satisfied me of the truth of my suspicion, that Charmides had heard this answer about temperance from Critias. And Charmides, who did not want to answer himself, but to make Critias answer, tried to stir him up. He went on pointing out that he had been refuted, and at this Critias got angry, and, as I thought, was rather inclined to quarrel with him; just as a poet might

quarrel with an actor who spoiled his poems in repeating them; so he looked hard at him and said —

Do you imagine, Charmides, that the author of the definition of temperance did not understand the meaning of his own words, because you don't understand them?

Why, at his age, I said, most excellent Critias, he can hardly be expected to understand; but you, who are older, and have studied, may well be assumed to know the meaning of them; and therefore, if you agree with him, and accept his definition of temperance, I would much rather argue with you than with him about the truth or falsehood of the definition.

I entirely agree, said Critias, and accept the definition.

Very good, I said; and now let me repeat my question — Do you admit, as I was just now saying, that all craftsmen make or do something.

I do.

And do they make or do their own business only, or that of others also?

They make that of others also.

And are they temperate, seeing that they make not for themselves or their own business only?

Why not? he said.

No objection on my part, I said, but there may be a difficulty on his who proposes as a definition of temperance, "doing one's own business," and then says that there is no reason why those who do the business of others should not be temperate.

Nay, said he; did I ever acknowledge that those who do the business of others are temperate? I said, those who make, not those who do.

What! I asked; do you mean to say that doing and making are not the same?

No more, he replied, than making or working are the same: that I have learned from Hesiod, who says that "work is no disgrace." Now do you imagine that if he had meant by working such things as you were describing, he would have said that there was no disgrace in them? in making shoes, for example, or in selling pickles, or sitting for hire in a house of ill fame. That, Socrates, is not to be supposed: but, as I imagine, he distinguished making from action and work; and, while admitting that the making anything might sometimes become a disgrace, when the employment was not honorable, thought that work was never any disgrace at all. For things nobly and usefully made he called works; and such makings he called workings, and doings; and he must be supposed to have called such things only man's proper business, and what is hurtful, not his business: and in that sense Hesiod, and any other wise man, may be reasonably supposed to call him wise who does his own work.

O Critias, I said, no sooner had you opened your mouth, than I pretty well knew that you would call that which is proper to a man, and that which is his own, good; and that the making of the good you would call doings, for I have heard Prodicus drawing endless distinctions about names. Now I have no objection to your giving names any sense that you please, if you will only tell me what you mean by them. Please then to begin again, and be a little plainer. Do you not mean that this doing or making, or whatever is the word which you would use, of good actions, is temperance?

I do, he said.

Then not he who does evil, but he who does good, is temperate?

Yes, he said; and you would agree to that.

Never mind whether I agree or not; as yet we are only concerned with your meaning.

Well, he answered; I mean to say, that he who does evil, and not good, is not temperate; and that he is temperate who does good, and not evil: for temperance I define in plain words to be the doing of good actions.

And you may be very likely right in that, I said; but I am curious to know whether you imagine that temperate men are ignorant of their own temperance?

I do not imagine that, he said.

And yet were you not saying, not so very long ago, that craftsmen might be temperate in doing another's work, as well as their own?

Yes, I was, he replied; but why do you refer to that?

I have no particular reason, but I wish you would tell me whether a physician who cures a patient may do good to himself and good to another also?

I think that he may.

And he who does this does his duty. And does not he who does his duty act temperately or wisely?

Yes, he acts wisely.

But must the physician necessarily know when his treatment is likely to prove beneficial, and when not? or must the craftsman necessarily know when he is likely to be benefited, and when not to be benefited, by the work which he is doing?

I suppose not.

Then, I said, he may sometimes do good or harm, and not know what he is himself doing, and yet, in doing good, as you say, he has done temperately or wisely. Was not that your statement?

Yes.

Then, as would seem, in doing good, he may act

wisely or temperately, and be wise or temperate, but not know his own wisdom or temperance?

But that, Socrates, he said, is impossible; and therefore if that is, as you imply, the necessary consequence of any of my previous admissions, I would rather withdraw them, and not be ashamed to confess that I was mistaken, than admit that a man can be temperate or wise, who does not know himself. For self-knowledge would certainly be maintained by me to be the very essence of knowledge, and in this I agree with him who dedicated the inscription, "Know thyself!" at Delphi. That word, if I am not mistaken, is put there as a sort of salutation which the god addresses to those who enter the temple; as much as to say that the ordinary salutation of "Hail!" is not right, and that the exhortation "'Be temperate!" would be a far better way of saluting one another. The notion of him who dedicated the inscription was, as I believe, that the god speaks to those who enter his temple not as men speak; but, when a worshipper enters, the first word which he hears is "Be temperate!" This, however, like a prophet he expresses in a sort of riddle, for "Know thyself!" and "Be temperate!" are the same, as I maintain, and as the writing implies, and yet they may be easily misunderstood; and succeeding sages who added "Never too much," or "Give a pledge, and evil is nigh at hand," would appear to have misunderstood them; for they imagined that "Know thyself!" was a piece of advice which the god gave, and not his salutation of the worshippers at their first coming in; and they wrote their inscription under the idea that they would give equally useful pieces of advice. Shall I tell you, Socrates, why I say all this? My object is to leave the previous discussion (in which I know not whether you or I are more right, but, at any rate, no clear result was at-

tained), and to raise a new one in which I will attempt to prove, if you deny, that temperance is self-knowledge.

Yes, I said, Critias; but you come to me as though I professed to know about the questions which I ask, and as though I could, if only I would, agree with you. Whereas the fact is that I am, as you are, an inquirer into the truth of your proposition; and when I have inquired, I will say whether I agree with you or not. Please then to allow me time to reflect.

Reflect, he said.

I am reflecting, I replied, and discover that temperance, or wisdom, if implying a knowledge of anything, must be a science, and a science of something.

Yes, he said; the science of itself.

And is not medicine, I said, the science of health?

True.

And suppose, I said, that I were asked by you what is the use or effect of medicine, which is this science of health, I should answer that medicine is of very great use in producing health, which, as you will admit, is an excellent effect.

Granted.

And if you were to ask me, what is the result or effect of architecture, which is the science of building, I should say, houses, and so of other arts, which all have their different results. Now I want you, Critias, to answer a similar question about temperance, or wisdom, to which you ought to know the answer, if, as you say, wisdom or temperance is the science of itself. Admitting this, I ask, what good work, worthy of the name, does wisdom effect? Answer me that.

That is not the true way of pursuing the inquiry, Socrates, he said; for wisdom is not like the other sciences, any more than they are like one another: but you proceed as if they were alike. For tell me,

he said, what result is there of computation or geometry, in the same sense as a house is the result of building, or a garment of weaving, or any other work of any other art? Can you show me any such result of them? You can not.

That is true, I said; but still each of these sciences has a subject which is different from the science. I can show you that the art of computation has to do with odd and even numbers in their numerical relations to themselves and to each other. Is not that true?

Yes, he said.

And the odd and even numbers are not the same with the art of computation?

They are not.

The art of weighing, again, has to do with lighter and heavier; but the art of weighing is one thing, and the heavy and the light another. Do you admit that?

Yes.

Now, I want to know, what is that which is not wisdom, and of which wisdom is the science?

That is precisely the old error, Socrates, he said. You come asking in what wisdom differs from the other sciences; and then you carry on the inquiry, as if they were alike: but that is not the case, for all the other sciences are of something else, and not of themselves; but that alone is a science of other sciences, and of itself. And of this, as I believe, you are very well aware; and that you are only doing what you denied that you were doing just now, leaving the argument and trying to refute me.

And what if I am refuting you? How can you think that I have any other motive in this but what I should have in examining into myself? which motive would be just a fear of my unconsciously fancying that I knew something of which I was ignorant.

And at this moment I pursue the inquiry chiefly for my own sake, and perhaps in some degree also for the sake of my other friends. For is not the discovery of things as they truly are a common good to all mankind?

Yes, certainly, Socrates, he said.

Then, I said, be of good cheer, sweet sir, and give your opinion in answer to the question which I asked, without minding whether Critias or Socrates is the person refuted; attend only to the argument, and see what will come of the refutation.

I think that you are right, he replied; and I will do as you say.

Tell me, then, I said, what you mean to affirm about wisdom.

I mean, he said, that wisdom is the only science which is the science of itself and of the other sciences as well.

But the science of science, I said, will also be the science of the absence of science.

Very true, he said.

Then the wise or temperate man, and he only, will know himself, and be able to examine what he knows or does not know, and see what others know, and think that they know and do really know; and what they do not know, and fancy that they know, when they do not. No other person will be able to do this. And this is the state and virtue of wisdom, or temperance, and self-knowledge, which is just knowing what a man knows, and what he does not know. That is your view?

Yes, he said.

Now then, I said, making an offering of the third or last argument to Zeus the Savior, let us once more begin, and ask, in the first place, whether this knowledge that you know and do not know what you know

and do not know is possible; and in the second place, whether, even if quite possible, such knowledge is of any use.

That is what we must consider, he said.

And here, Critias, I said, I hope that you will find a way out of a difficulty into which I have got myself. Shall I tell you the difficulty?

By all means, he replied.

Does not what you have been saying, if true, amount to this: that there must be a science which is wholly a science of itself, and also of other sciences, and that the same is also the science of the absence of science?

True.

But consider how monstrous this is, my friend: in any parallel case, the impossibility will be transparent to you.

How is that? and in what cases do you mean?

In such cases as this: Suppose that there is a kind of vision which is not like ordinary vision, but a vision of itself and of other sorts of vision, and of the defect of them, which in seeing sees no color, but only itself and other sorts of vision. Do you think that there is such a kind of vision?

Certainly not.

Or is there a kind of hearing which hears no sound at all, but only itself and other sorts of hearing, or the defects of them?

There is not.

Or take all the senses: can you imagine that there is any sense of itself and of other senses, but which is incapable of perceiving the objects of the senses?

I think not.

Could there be any desire which is not the desire of any pleasure, but of itself, and of all other desires?

Certainly not.

Or can you imagine a wish which wishes for no good, but only for itself and all other wishes?

I should answer, No.

Or would you say that there is a love which is not the love of beauty, but of itself and of other loves?

I should not.

Or did you ever know of a fear which fears itself or other fears, but has no object of fear?

I never did, he said.

Or of an opinion which is an opinion of itself and of other opinions, and which has no opinion on the subjects of opinion in general?

Certainly not.

But surely we are assuming a science of this kind, which, having no subject-matter, is a science of itself and of the other sciences; for that is what is affirmed. Now this is strange, if true: however, we must not as yet absolutely deny the possibility of such a science; let us rather consider the matter.

You are quite right.

Well then, this science of which we are speaking is a science of something, and is of a nature to be a science of something?

Yes.

Just as that which is greater is of a nature to be greater than something?[1]

Yes.

Which is less, if the other is to be conceived as greater?

To be sure.

And if we could find something which is at once greater than self, and greater than other great things,

[1] Socrates is intending to show that science differs from the object of science, as any other relative differs from the object of relation. A relation to self as well as to other things involves in the case of comparison of magnitudes an absolute contradiction; and in other cases, as in the case of the senses, is hardly conceivable.

but not greater than those things in comparison of which the others are greater, then that thing would have the property of being greater and also less than itself?

That, Socrates, he said, is the inevitable inference.

Or if there be a double which is double of other doubles and of itself, they will be halves; for the half is relative to the double?

That is true.

And that which is greater than itself will also be less, and that which is heavier will also be lighter, and that which is older will also be younger: and the same of other things; that which has a nature relative to self will retain also the nature of its object. I mean to say, for example, that hearing is, as we say, of sound or voice. Is that true?

Yes.

Then if hearing hears itself, it must hear a voice; for there is no other way of hearing.

Certainly.

And sight also, my excellent friend, if it sees itself must see a color, for sight can not see that which has no color.

No.

Then do you see, Critias, that in several of the examples which have been recited the notion of a relation to self is altogether inadmissible, and in other cases hardly credible — inadmissible, for example, in the case of magnitudes, numbers, and the like.

Very true.

But in the case of hearing, and the power of self-motion, and the power of heat to burn, this relation to self will be regarded as incredible by some, but perhaps not by others. And some great man, my friend, is wanted, who will satisfactorily determine for us, whether there is nothing which has an inherent

property of relation to self, or some things only and not others; and whether in this latter class, if there be such a class, that science which is called wisdom or temperance is included. I altogether distrust my own power of determining this: I am not certain whether there is such a science of science at all; and even if there be, I should not acknowledge this to be wisdom or temperance, until I can also see whether such a knowledge would or would not do us any good; for I have an impression that temperance is a benefit and a good. And therefore, O son of Callaeschrus, as you maintain that temperance or wisdom is a science of science, and also of the absence of science, I will request you to show in the first place, as I was saying before, the possibility, and in the second place, the advantage, of such a science; and then perhaps you may satisfy me that you are right in your view of temperance.

Critias heard me say this, and saw that I was in a difficulty; and as one person when another yawns in his presence catches the infection of yawning from him, so did he seem to be driven into a difficulty by my difficulty. But as he had a reputation to maintain, he was ashamed to admit before the company that he could not answer my challenge or decide the question at issue; and he made an unintelligible attempt to hide his perplexity. In order that the argument might proceed, I said to him, Well then, Critias, if you like, let us assume that there may be this science of science; whether the assumption is right or wrong may be hereafter investigated. But fully admitting this, will you tell me how such a science enables us to distinguish what we know or do not know, which, as we were saying, is self-knowledge or wisdom. That is what we were saying?

Yes, Socrates, he said; and that I think is certainly

true: for he who has that science or knowledge which knows itself will become like that knowledge which he has, in the same way that he who has swiftness will be swift, and he who has beauty will be beautiful, and he who has knowledge will know. In the same way he who has that knowledge which is the knowledge of itself, will know himself.

I do not doubt, I said, that a man will know himself, when he possesses that which has self-knowledge: but what necessity is there that, having this, he should know what he knows and what he does not know?

Because, Socrates, they are the same.

Very likely, I said; but I remain as stupid as ever; for still I fail to comprehend how this knowing what you know and do not know is the same as the knowledge of self.

What do you mean? he said.

This is what I mean, I replied: I will admit that there is a science of science, but can this do more than determine that of two things one is and the other is not science or knowledge?

No, just that.

Then is knowledge or want of knowledge of health the same as knowledge or want of knowledge of justice?

Certainly not.

The one is medicine, and the other is politics; but that of which we are speaking is knowledge pure and simple.

Very true.

And if a man knows only, and has only knowledge of knowledge, and has no further knowledge of health and justice, the probability is that he will only know that he knows something, and has a certain knowledge, whether concerning himself or other men.

True.

But how will this knowledge or science teach him to know what he knows? Say that he knows health; — not wisdom or temperance, but the art of medicine has taught him that; — and he has learned harmony from the art of music, and building from the art of building, — neither, from wisdom or temperance: and the same of other things.

That is evident.

But how will wisdom, regarded only as a knowledge of knowledge or science of science, ever teach him that he knows health, or that he knows building?

That is impossible.

Then he who is ignorant of this will only know that he knows, but not what he knows?

True.

Then wisdom or being wise appears to be not the knowledge of the things which we do or do not know, but only the knowledge that we know and do not know?

That is the inference.

Then he who has this knowledge will not be able to examine whether a pretender knows or does not know that which he says that he knows: he will only know that he has a knowledge of some kind; but wisdom will not show him of what the knowledge is?

Plainly not.

Neither will he be able to distinguish the pretender in medicine from the true physician, nor between any other true and false possessor of knowledge. Let us consider the matter in this way: If the wise man or any other man wants to distinguish the true physician from the false, what is he to do? He will not talk to him about medicine; and that, as we are saying, is the only thing which the physician understands.

True.

And he certainly knows nothing of science, for this has been assumed to be the province of wisdom.

True.

But then again, if medicine is a science, neither will the physician know anything of medicine.

Exactly.

The wise man will indeed know that the physician has some kind of science or knowledge; but when he wants to discover the nature of this he will ask, What is the subject-matter? For each science is distinguished, not as science, but by the nature of the subject. Is not that true?

Yes; that is quite true.

And medicine is distinguished from other sciences as having the subject-matter of health and disease?

Yes.

And he who would inquire into the nature of medicine must pursue the inquiry into health and disease, and not into what is extraneous?

True.

And he who judges rightly will judge of the physician as a physician in what relates to these?

He will.

He will consider whether what he says is true, and whether what he does is right in relation to these?

He will.

But can any one appreciate either without having a knowledge of medicine?

He can not.

Nor any one but the physician, not even the wise man, as appears; for that would require him to be a physician as well as a wise man?

Very true.

Then, assuredly, wisdom or temperance, if only a science of science, and of the absence of science or knowledge, will not be able to distinguish the physi-

cian who knows from one who does not know but pretends or thinks that he knows, or any other professor of anything at all; like any other artist, he will only know his fellow in art or wisdom, and no one else.

That is evident, he said.

But then what profit, Critias, I said, is there any longer in wisdom or temperance which yet remains, if this is wisdom? If, indeed, as we were supposing at first, the wise man had been able to distinguish what he knew and did not know, and that he knew the one and did not know the other, and to recognize a similar faculty of discernment in others, there would certainly have been a great advantage in being wise; for then we should never have made a mistake, but have passed through life the unerring guides of ourselves and of those who were under us; and we should not have attempted to do what we did not know, but we should have found out those who knew, and confided in them; nor should we have allowed those who were under us to do anything which they were not likely to do well; and they would be likely to do well just that of which they had knowledge; and the house or state which was ordered or administered under the guidance of wisdom would have been well ordered, and everything else of which wisdom was the lord; for truth guiding, and error having been expelled, in all their doings, men would have done well, and would have been happy. Was not this, Critias, what we spoke of as the great advantage of wisdom — to know what is known and what is unknown to us?

Very true, he said.

And now you perceive, I said, that no such science is to be found anywhere.

I perceive, he said.

May we assume then, I said, that wisdom, viewed in this new light merely as a knowledge of knowledge

and ignorance, has this advantage: — that he who possesses such knowledge will more easily learn anything that he learns; and that everything will be clearer to him, because, in addition to the knowledge of individuals, he sees the science, and this also will better enable him to test the knowledge which others have of what he knows himself; whereas the inquirer who is without this knowledge may be supposed to have a feebler and weaker insight? Are not these, my friend, the real advantages which are to be gained from wisdom? And are not we looking and seeking after something more than is to be found in her?

That is very likely, he said.

That is very likely, I said; and very likely, too, we have been inquiring to no purpose. I am led to infer this, because I observe that if this is wisdom, some strange consequences would follow. Let us, if you please, assume the possibility of this science of sciences, and further admit and allow, as was originally suggested, that wisdom is the knowledge of what we know and do not know. Assuming all this, still, upon further consideration, I am doubtful, Critias, whether wisdom, if such as this, would do us any good. For I think we were wrong in supposing, as we were saying just now, that such wisdom ordering the government of house or state would be a great benefit.

How is that? he said.

Why, I said, we were far too ready to admit the great benefits which mankind would obtain from their severally doing the things which they knew, and committing to others who knew the things of which they are ignorant.

Were we not right, he said, in making that admission?

I think not, I said.

That is certainly strange, Socrates.

By the dog of Egypt, I said, I am of your opinion about that: and that was in my mind when I said that strange consequences would follow, and that I was afraid we were on the wrong track; for however ready we may be to admit that this is wisdom, I certainly can not make out what good this sort of thing does to us.

What do you mean? he said; I wish that you could make me understand what you mean.

I dare say that what I am saying is nonsense, I replied; and yet if a man has any feeling of what is due to himself, he can not let the thought which comes into his mind pass away unheeded and unexamined.

I like that, he said.

Hear, then, I said, my own dream; whether coming through the horn or the ivory gate, I can not tell. The dream is this: Let us suppose that wisdom is such as we are now defining, and that she has absolute sway over us; then each action will be done according to the arts or sciences, and no one professing to be a pilot when he is not, or any physician or general, or any one else pretending to know matters of which he is ignorant, will deceive or elude us; our health will be improved; our safety at sea, and also in battle, will be assured; our coats and shoes, and all other instruments and implements will be well made, because the workmen will be good and true. Aye, and if you please, you may suppose that prophecy, which is the knowledge of the future, will be under the control of wisdom, and that she will deter deceivers and set up the true prophet in their place as the revealer of the future. Now I quite agree that mankind, thus provided, would live and act according to knowledge, for wisdom would watch and prevent ignorance from intruding on us. But we have not as yet discovered why, because we act according to knowledge, we act well and are happy, my dear Critias.

Yet I think, he replied, that you will hardly find any other end of right action, if you reject knowledge.

And of what is this knowledge? I said. Just answer me that small question. Do you mean a knowledge of shoemaking?

God forbid.

Or of working in brass?

Certainly not.

Or in wool, or wood, or anything of that sort?

No, I do not.

Then, I said, we are giving up the doctrine that he who lives according to knowledge is happy, for these live according to knowledge, and yet they are not allowed by you to be happy; but I think that you mean to confine happiness to particular individuals who live according to knowledge, such for example as the prophet, who, as I was saying, knows the future.

Yes, I mean him, but there are others as well.

Yes, I said, some one who knows the past and present as well as the future, and is ignorant of nothing. Let us suppose that there is such a person, and if there is, you will allow that he is the most knowing of all living men.

Certainly he is.

Yet I should like to know one thing more: which of the different kinds of knowledge makes him happy? or do all equally make him happy?

Not all equally, he replied.

But which most tends to make him happy? the knowledge of what past, present, or future thing? May I infer this to be the knowledge of the game of draughts?

Nonsense about the game of draughts.

Or of computation?

No.

Or of health?

That is nearer the truth, he said.

And that knowledge which is nearest of all, I said, is the knowledge of what?

The knowledge with which he discerns good and evil.

Monster! I said; you have been carrying me round in a circle, and all this time hiding from me the fact that the life according to knowledge is not that which makes men act rightly and be happy, not even if all the sciences be included, but that this has to do with one science only, that of good and evil. For, let me ask you, Critias, whether, if you take away this science from all the rest, medicine will not equally give health, and shoemaking equally produce shoes, and the art of the weaver clothes? — whether the art of the pilot will not equally save our lives at sea, and the art of the general in war?

Quite so.

And yet, my dear Critias, none of these things will be well or beneficially done, if the science of the good be wanting.

That is true.

But that science is not wisdom or temperance, but a science of human advantage; not a science of other sciences, or of ignorance, but of good and evil: and if this be of use, then wisdom or temperance will not be of use.

And why, he replied, will not wisdom be of use? For if we really assume that wisdom is a science of sciences, and has a sway over other sciences, surely she will have this particular science of the good under her control, and in this way will benefit us.

And will wisdom give health? I said; is not this rather the effect of medicine? Or does wisdom do the work of any of the other arts, and do not they do, each of them, their own work? Have we not long ago

asseverated that knowledge is only the knowledge of knowledge and of ignorance, and of nothing else?

That is clear.

Another art is concerned with health.

Another.

The art of health is different.

Yes, different.

Nor does wisdom give advantage, my good friend; for that again we have just now been attributing to another art.

Very true.

How then can wisdom be advantageous, giving no advantage?

That, Socrates, is certainly inconceivable.

You see then, Critias, that I was not far wrong in fearing that I could have no sound notion about wisdom; I was quite right in depreciating myself; for that which is admitted to be the best of all things would never have seemed to us useless, if I had been good for anything at an inquiry. But now I have been utterly defeated, and have failed to discover what that is to which the imposer of names gave this name of temperance or wisdom. And yet many more admissions were made by us than could be really granted; for we admitted that there was a science of science, although the argument said No, and protested against this; and we admitted further, that this science knew the works of the other sciences (although this too was denied by the argument), because we wanted to show that the wise man had knowledge of what he knew and did not know; also we nobly disregarded, and never even considered, the impossibility of a man knowing in a sort of way that which he does not know at all; for our assumption was, that he knows that which he does not know; than which nothing, as I think, can be more irrational. And yet, after finding

us so easy and good-natured, the inquiry is still unable to discover the truth; but mocks us to a degree, and has gone out of its way to prove the inutility of that which we admitted only by a sort of supposition and fiction to be the true definition of temperance or wisdom: which result, as far as I am concerned, is not so much to be lamented, I said. But for your sake, Charmides, I am very sorry — that you, having such beauty and such wisdom and temperance of soul, should have no profit or good in life from your wisdom and temperance. And still more am I grieved about the charm which I learned with so much pain, and to so little profit, from the Thracian, for the sake of a thing which is nothing worth. I think indeed that there is a mistake, and that I must be a bad inquirer, for I am persuaded that wisdom or temperance is really a great good; and happy are you if you possess that good. And therefore examine yourself, and see whether you have this gift and can do without the charm; for if you can, I would rather advise you to regard me simply as a fool who is never able to reason out anything; and to rest assured that the more wise and temperate you are, the happier you will be.

Charmides said: I am sure that I do not know, Socrates, whether I have or have not this gift of wisdom and temperance; for how can I know whether I have that, the very nature of which even you and Critias, as you say, are unable to discover? — (not that I believe you.) And further, I am sure, Socrates, that I do need the charm, and as far as I am concerned, I shall be willing to be charmed by you daily, until you say that I have had enough.

Very good, Charmides, said Critias; if you do this I shall have a proof of your temperance, that is, if you allow yourself to be charmed by Socrates, and never desert him at all.

You may depend on my following and not deserting him, said Charmides: if you who are my guardian command me, I should be very wrong not to obey you.

And I do command you, he said.

Then I will do as you say, and begin this very day.

You sirs, I said, what are you conspiring about?

We are not conspiring, said Charmides, we have conspired already.

And are you about to use violence, without even going through the forms of justice?

Yes, I shall use violence, he replied, since he orders me; and therefore you had better consider well.

But the time for consideration has passed, I said, when violence is employed; and you, when you are determined on anything, and in the mood of violence, are irresistible.

Do not you resist me then, he said.

I will not resist you, I replied.

LYSIS

INTRODUCTION

No answer is given in the Lysis to the question, "What is Friendship?" any more than in the Charmides to the question, "What is Temperance?" There are several resemblances in the two Dialogues: the same youthfulness and sense of beauty pervades both of them; they are alike rich in the description of Greek life. The question is again raised of the relation of knowledge to virtue and good, which also recurs in the Laches; and Socrates appears again as the elder friend of the two boys Lysis and Menexenus. In the Charmides, as also in the Laches, he is described as middle-aged; in the Lysis he is advanced in years.

The Dialogue consists of two scenes or conversations which seem to have no relation to each other. The first is a conversation between Socrates and Lysis, who, like Charmides, is an Athenian youth of noble descent and of great beauty, goodness, and intelligence: this is carried on in the absence of Menexenus, who is called away to take part in a sacrifice. Socrates asks Lysis whether his father and mother do not love him very much? "Yes, that they do." "Then of course they allow him to do exactly as he likes." "Of course not: the very slaves have more liberty than he has." "But how is this?" "The reason is that he is not old enough." "No; the real reason is that he is not wise enough." "For are there not some things which he is allowed to do, although he is not allowed to do others?" "Yes, because he knows them, and does not know the others." This leads to the conclusion that all men everywhere will trust him in what he knows, but not in what he does not know; for in such matters he will be unprofitable to them, and do them no good. And no one will love him, if he does them no good; and he can only do them good by knowledge; and as he is still without knowledge, he has no conceit of knowledge. In this manner Socrates reads a lesson to Hippothales, the foolish lover of Lysis, respecting the style of conversation which he should address to his beloved.

After the return of Menexenus, Socrates, at the request of Lysis, asks him a new question: "What is friendship? You,

Menexenus, who have a friend already, can tell me, who am always longing to find one, what is the secret of this great blessing."

When one man loves another, which is the friend — he who loves, or he who is loved? or are both friends? From the first of these suppositions they are driven to the second; and from the second to the third; and neither the two boys nor Socrates are satisfied with any of them. Socrates turns to the poets, who affirm that God brings like to like (Homer), and to philosophers (Empedocles), who assert also that like is the friend of like. But the bad are not friends, for they are not even like themselves, and still less are they like one another. And the good have no need of one another, and therefore do not care about one another. Moreover there are others who say that likeness is a cause of aversion, and unlikeness of love and friendship; and they too adduce the authority of poets and philosophers in support of their doctrines; for Hesiod says that "potter is jealous of potter, bard of bard;" and subtle doctors tell us that "moist is the friend of dry, hot of cold," and the like. But neither can their doctrine be maintained; for then the just would be the friend of the unjust, good of evil.

Thus we arrive at the conclusion that like is not the friend of like, nor unlike of unlike; and therefore good is not the friend of good, nor evil of evil, nor good of evil, nor evil of good. What remains but that the indifferent, which is neither good nor evil, should be the friend (not of the indifferent, for that would be "like the friend of like," but) of the good?

But why should the indifferent have this attachment to the good? There are circumstances under which such an attachment would be natural. Suppose the indifferent, say the human body, to be desirous of getting rid of some evil, such as disease, which is not essential but only accidental to it (for if the evil were essential the body would cease to be indifferent, and would become evil) — in such a case the indifferent becomes a friend of the good for the sake of getting rid of the evil. In this intermediate "indifferent" position the philosopher or lover of wisdom stands: he is not wise, and yet not unwise, but he has ignorance accidentally clinging to him, and he yearns for wisdom as the cure of the evil.

After this explanation has been received with triumphant accord, a fresh dissatisfaction begins to steal over the mind of Socrates: Must not friendship be for the sake of some ulterior end? and what can that final cause or end of friendship be,

other than the good? But the good is desired by us only as the cure of evil; and therefore if there were no evil there would be no friendship. Some other explanation then has to be devised. May not desire be the source of friendship? And desire is of what a man wants and of what is congenial to him. But then again, the congenial can not be the same as the like; for like can not be the friend of like. Nor can the congenial be explained as the good; for good is not the friend of good, as has been also shown. The problem is unsolved, and the three friends, Socrates, Lysis, and Menexenus, are still unable to find out what a friend is.

Thus, as in the Charmides and Laches, and several of the other Dialogues of Plato, no conclusion is arrived at. The dialogue is what would be called in the language of Thrasyllus tentative or inquisitive. The subject is continued in the Phaedrus and Symposium, and treated, with a manifest reference to the Lysis, in the eighth and ninth books of the Nicomachean Ethics of Aristotle. As in other writings of Plato (for example, the Republic), there is a progress from unconscious morality, illustrated by the unconscious friendship of the two youths, and also by the sayings of the poets ("who are our fathers in wisdom," and yet only tell us half the truth, and in this particular instance are not much improved upon by the philosophers), to a more comprehensive notion of friendship. This, however, is far from being cleared of its perplexity. Two notions appear to be struggling or balancing in the mind of Socrates: — First, the sense that friendship arises out of human needs and wants; Secondly, that the higher form or ideal of friendship exists only for the sake of the good. That friends are not necessarily either like or unlike, is also a truth confirmed by experience. But the use of the terms "like" or "good" is too strictly limited; Socrates has allowed himself to be carried away by a sort of eristic or illogical logic against which the truest definition of friendship would be unable to stand. The sense of the interdependence of good and evil, and the allusion to the possibility of the non-existence of evil, are very curious.

The dialectical interest is fully sustained by the dramatic accompaniments. Observe, first, the scene, which is a Greek Palaestra, at a time when a sacrifice is going on, and the Hermaea are in course of celebration; secondly, the "accustomed irony" of Socrates, who declares, as in the Symposium, that he is ignorant of all other things, but claims to have a knowledge of the mysteries of love. There are also several contrasts of character;

first of the dry, caustic Ctesippus, of whom Socrates professes a humorous sort of fear, and Hippothales the flighty lover, who murders sleep by bawling out the name of his beloved; also there is a contrast between the false, exaggerated, sentimental love of Hippothales towards Lysis, and the simple and innocent friendship of the boys with one another. Some difference appears to be intended between the characters of the more talkative Menexenus and the reserved and simple Lysis. Socrates draws out the latter by a new sort of irony, which is sometimes adopted in talking to children, and consists in asking a leading question which can only be answered in a sense contrary to the intention of the question: "Your father and mother of course allow you to drive the chariot?" "No they don't." When Menexenus returns, the serious dialectic begins.

LYSIS, OR FRIENDSHIP

PERSONS OF THE DIALOGUE

SOCRATES, *who is the narrator.* MENEXENUS.
HIPPOTHALES. LYSIS.
CTESIPPUS.

SCENE: —A newly-erected Palaestra outside the walls of Athens.

I WAS going from the Academy straight to the Lyceum, intending to take the outer road, which is close under the wall. When I came to the postern gate of the city, which is by the fountain of Panops, I fell in with Hippothales, the son of Hieronymus, and Ctesippus the Paeanian, and a company of young men who were standing with them. Hippothales, seeing me approach, asked whence I came and whither I was going.

I am going, I replied, from the Academy straight to the Lyceum.

Then come straight to us, he said, and put in here; you may as well.

Who are you, I said; and where am I to come?

He showed me an enclosed space and an open door over against the wall. And there, he said, is the building at which we all meet: and a goodly company we are.

And what is this building, I asked; and what sort of entertainment have you?

The building, he replied, is a newly-erected Palaestra; and the entertainment is generally conversation, to which you are welcome.

Thank you, I said; and is there any teacher there?

Yes, he said, your old friend and admirer, Miccus.

Indeed, I replied; he is a very eminent professor.

Are you disposed, he said, to go with me and see them?

Yes, I said; but I should like to know first, what is expected of me, and who is the favorite among you.

Some persons have one favorite, Socrates, and some another, he said.

And who is yours? I asked: tell me that, Hippothales.

At this he blushed; and I said to him, O Hippothales, thou son of Hieronymus! do not say that you are, or that you are not, in love; the confession is too late; for I see not only that you are in love, but that you are already far gone in your love. Simple and foolish as I am, the Gods have given me the power of understanding these sort of affections.

At this he blushed more and more.

Ctesippus said: I like to see you blushing, Hippothales, and hesitating to tell Socrates the name; when, if he were with you but for a very short time, he would be plagued to death by hearing of nothing else. Indeed, Socrates, he has literally deafened us, and stopped our ears with the praises of Lysis; and if he is a little intoxicated, there is every likelihood that we may have our sleep murdered with a cry of Lysis. His performances in prose are bad enough, but nothing at all in comparison with his verse; and when he drenches us with his poems and other compositions, that is really too bad; and what is even worse, is his manner of singing them to his love; this he does in a voice which is truly appalling, and we can not help hearing him: and now he has a question put to him by you, and lo! he is blushing.

Who is Lysis? I said: I suppose that he must be young; for the name does not recall any one to me.

Why, he said, his father being a very well-known man, he retains his patronymic, and is not as yet commonly called by his own name; but, although you do not know his name, I am sure that you must know his face, for that is quite enough to distinguish him.

But tell me whose son he is, I said.

He is the eldest son of Democrates, of the deme of Aexonè.

Ah, Hippothales, I said; what a noble and really perfect love you have found! I wish that you would favor me with the exhibition which you have been making to the rest of the company, and then I shall be able to judge whether you know what a lover ought to say about his love, either to the youth himself, or to others.

Nay, Socrates, he said; you surely do not attach any weight to what he is saying.

Do you mean, I said, that you disown the love of the person whom he says that you love?

No; but I deny that I make verses or address compositions to him.

He is not in his right mind, said Ctesippus; he is talking nonsense, and is stark mad.

O Hippothales, I said, if you have ever made any verses or songs in honor of your favorite, I do not want to hear them; but I want to know the purport of them, that I may be able to judge of your mode of approaching your fair one.

Ctesippus will be able to tell you, he said; for if, as he avers, I talk to him of nothing else, he must have a very accurate knowledge and recollection of that.

Yes, indeed, said Ctesippus; I know only too well; and very ridiculous the tale is: for although he is a

lover, and very devotedly in love, he has nothing particular to talk about to his beloved which a child might not say. Now is not that ridiculous? He can only speak of the wealth of Democrates, which the whole city celebrates, and grandfather Lysis, and the other ancestors of the youth, and their stud of horses, and their victory at the Pythian games, and at the Isthmus, and at Nemea with four horses and single horses; and these he sings and says, and greater twaddle still. For the day before yesterday he made a poem in which he described how Heracles, who was a connection of the family, was entertained by an ancestor of Lysis as his relation; this ancestor was himself the son of Zeus and the daughter of the founder of the deme. And these are the sort of old wives' tales which he sings and recites to us, and we are obliged to listen to him.

When I heard this, I said: O ridiculous Hippothales! how can you be making and singing hymns in honor of yourself before you have won?

But my songs and verses, he said, are not in honor of myself, Socrates.

You think not, I said.

But what are they, then? he replied.

Most assuredly, I said, those songs are all in your own honor; for if you win your beautiful love, your discourses and songs will be a glory to you, and may be truly regarded as hymns of praise composed in honor of you who have conquered and won such a love; but if he slips away from you, the more you have praised him, the more ridiculous you will look at having lost this fairest and best of blessings; and this is the reason why the wise lover does not praise his beloved until he has won him, because he is afraid of accidents. There is also another danger; the fair, when any one praises or magnifies them, are filled

with the spirit of pride and vain-glory. Is not that true?

Yes, he said.

And the more vain-glorious they are, the more difficult is the capture of them?

I believe that.

What should you say of a hunter who frightened away his prey, and made the capture of the animals which he is hunting more difficult?

He would be a bad hunter, that is clear.

Yes; and if, instead of soothing them, he were to infuriate them with words and songs, that would show a great want of wit: don't you agree with me?

Yes.

And now reflect, Hippothales, and see whether you are not guilty of all these errors in writing poetry. For I can hardly suppose that you will affirm a man to be a good poet who injures himself by his poetry.

Assuredly not, he said: I should be a fool if I said that; and this makes me desirous, Socrates, of taking you into my counsels, and I shall be glad of any further advice which you may have to offer. Will you tell me by what words or actions I may become endeared to my love?

That is not easy to determine, I said; but if you will bring your love to me, and will let me talk with him, I may perhaps be able to show you how to converse with him, instead of singing and reciting in the fashion of which you are accused.

There will be no difficulty in bringing him, he replied; if you will only go into the house with Ctesippus, and sit down and talk, he will come of himself; for he is fond of listening, Socrates. And as this is the festival of the Hermaea, there is no separation of young men and boys, but they are all mixed up together. He will be sure to come: but if he does not

come, Ctesippus, with whom he is familiar, and whose relation Menexenus is his great friend, shall call him.

That will be the way, I said. Thereupon I and Ctesippus went towards the Palaestra, and the rest followed.

Upon entering we found that the boys had just been sacrificing; and this part of the festival was nearly come to an end. They were all in white array, and games at dice were going on among them. Most of them were in the outer court amusing themselves; but some were in a corner of the Apodyterium playing at odd and even with a number of dice, which they took out of little wicker baskets. There was also a circle of lookers on, one of whom was Lysis. He was standing among the other boys and youths, having a crown upon his head, like a fair vision, and not less worthy of praise for his goodness than for his beauty. We left them, and went over to the opposite side of the room, where we found a quiet place, and sat down; and then we began to talk. This attracted Lysis, who was constantly turning round to look at us — he was evidently wanting to come to us. For a time he hesitated and had not the courage to come alone; but first of all, his friend Menexenus came in out of the court in the interval of his play, and when he saw Ctesippus and myself, came and sat by us; and then Lysis, seeing him, followed, and sat down with him; and the other boys joined. I should observe that Hippothales, when he saw the crowd, got behind them, where he thought that he would be out of sight of Lysis, lest he should anger him; and there he stood and listened.

I turned to Menexenus, and said: Son of Demophon, which of you two youths is the elder?

That is a matter of dispute between us, he said.

And which is the nobler? Is that a matter of dispute too?

Yes, certainly.

And another disputed point is, which is the fairer?

The two boys laughed.

I sha'n't ask which is the richer, I said; for you two are friends, are you not?

Certainly, they replied.

And friends have all things in common, so that one of you can be no richer than the other, if you say truly that you are friends.

They assented. I was about to ask which was the juster of the two, and which was the wiser of the two; but at this moment Menexenus was called away by some one who came and said that the gymnastic-master wanted him. As I imagine, he had to offer sacrifice. So he went away, and I asked Lysis some more questions. I dare say, Lysis, I said, that your father and mother love you very much.

That they do, he said.

And they would wish you to be perfectly happy.

Yes.

But do you think that any one is happy who is in the condition of a slave, and who can not do what he likes?

I should think not indeed, he said.

And if your father and mother love you, and desire that you should be happy, no one can doubt that they are very ready to promote your happiness.

Certainly, he replied.

And do they then permit you to do what you like, and never rebuke you or hinder you from doing what you desire?

Yes, indeed, Socrates; there are a great many things which they hinder me from doing.

What do you mean? I said. Do they want you to be happy, and yet hinder you from doing what you like? — for example, if you want to mount one of

your father's chariots, and take the reins at a race, they will not allow you to do that; they will prevent you?

Certainly, he said, they will not allow me to do that.

Whom then will they allow?

There is a charioteer, whom my father pays for driving.

And do they trust a hireling more than you? and may he do what he likes with the horses? and do they pay him for this?

They do.

But I dare say that you may take the whip and guide the mule-cart if you like; — they will permit that?

Permit me! no they won't.

Then, I said, may no one use the whip to the mules?

Yes, he said, the muleteer.

And is he a slave or a free man?

A slave, he said.

And do they esteem a slave of more value than you who are their son? And do they entrust their property to him rather than to you? and allow him to do what he likes, when you may not? Answer me now: Are you your own master, or do they not even allow that?

Nay, he said; of course they do not allow that.

Then you have a master?

Yes, my tutor; there he is.

And is he a slave?

To be sure; he is our slave, he replied.

Surely, I said, this is a strange thing, that a free man should be governed by a slave. And what does he do with you?

He takes me to my teachers.

You don't mean to say that your teachers also rule over you?

Of course they do.

Then I must say that your father is pleased to inflict many lords and masters on you. But at any rate when you go home to your mother, she will let you have your own way, and will not interfere with your happiness; her wool, or the piece of cloth she is weaving, are at your disposal: I am sure that there is nothing to hinder you from touching her wooden spathe, or her comb, or any other of her spinning implements.

Nay, Socrates, he replied, laughing; not only does she hinder me, but I should be beaten, if I were to touch one of them.

Well, I said, that is amazing. And did you ever behave ill to your father or your mother?

No, indeed, he replied.

But why then are they so terribly anxious to prevent you from being happy, and doing as you like? — keeping you all day long in subjection to another, and, in a word, doing nothing which you desire; so that you have no good, as would appear, out of their great possessions, which are under the control of anybody rather than of you, and have no use of your own fair person, which is committed to the care of a shepherd; while you, Lysis, are master of nobody, and can do nothing?

Why, he said, Socrates, the reason is that I am not of age.

I doubt whether that is the real reason, I said; for as far as that goes, I should imagine that your father Democrates, and your mother, do permit you to do many things already, and do not wait until you are of age: for example, if they want anything read or written, you, I presume, would be the first person in the house who is summoned by them.

Very true.

And you would be allowed to write or read the letters in any order which you please, or take up the lyre and tune the notes, and play with the fingers, or strike with the plectrum, exactly as you please, and neither father nor mother would interfere with you.

That is true, he said.

Then what can be the reason, Lysis, I said, why they allow you to do the one and not the other?

I suppose, he said, that the reason is that I understand the one, and not the other.

Yes, my dear youth, I said, the reason is not any deficiency of years, but a deficiency of knowledge; and whenever your father thinks that you are wiser than he is, he will instantly commit himself and his possessions to you.

That I believe.

Aye, I said; and about your neighbor, too, does not the same rule hold as about your father? If he is satisfied that you know more of housekeeping than he does, will he continue to administer his affairs himself, or will he commit them to you?

I think that he will commit them to me.

And will not the Athenian people, too, entrust their affairs to you when they see that you have wisdom enough for his?

Yes.

Now, I said, let me put a case. Suppose the great king to have an eldest son, who is the Prince of Asia; and you and I go to him and establish to his satisfaction that we are better cooks than his son, will he not entrust to us the prerogative of making soup, and putting in anything that we like while the boiling is going on, rather than to the Prince of Asia, who is his son?

To us, clearly.

And we shall be allowed to throw in salt by hand-

fuls, whereas the son will not be allowed to put in as much as he can take up between his fingers?

Of course.

Or suppose again that the son has bad eyes, will he allow him, or will he not allow him, to touch his own eyes if he thinks that he has no knowledge of medicine?

He will not allow him.

Whereas, if we are supposed to have a knowledge of medicine, he will allow us to open the eyes wide and sprinkle ashes upon them, because he supposes that we know what is best?

That is true.

And everything in which we appear to him to be wiser than himself or his son he will commit to us?

That is very true, Socrates, he replied.

Then now, my dear youth, I said, you perceive that in things which we know every one will trust us, — Hellenes and barbarians, men and women, — and we may do as we please, and no one will like to interfere with us; and we are free, and masters of others; and these things will be really ours, for we shall turn them to our good. But in things of which we have no understanding, no one will trust us to do as seems good to us — they will hinder us as far as they can; and not only strangers, but father and mother, and the friend, if there be one, who is dearer still, will also hinder us; and we shall be subject to others; and these things will not be ours, for we shall turn them to no good. Do you admit that?

He assented.

And shall we ever be friends to others? and will any others love us, in as far as we are useless to them?

Certainly not.

Neither can your father or mother love you, nor

can anybody love anybody else, in as far as they are useless to them?

No.

And therefore, my boy, if you are wise, all men will be your friends and kindred, for you will be useful and good; but if you are not wise, neither father, nor mother, nor kindred, nor any one else, will be your friends. And not having yet attained to wisdom, can you have high thoughts about that of which you have no thoughts?

How can I? he said.

And you have no wisdom, for you require a teacher?

True.

And you are not conceited, having nothing of which to be conceited?

Indeed, Socrates, I think not.

When I heard him say this, I turned to Hippothales, and was very nearly making a blunder, for I had a mind to say to him: That is the way, Hippothales, in which you should talk to your beloved, humbling and lowering him, and not as you do, puffing him up and spoiling him. But I saw that he was in great excitement and confusion at what had been said; and I remembered that, although he was in the neighborhood, he did not want to be seen by Lysis, so I thought better and refrained.

In the meantime Menexenus came back and sat down in his place by Lysis; and Lysis, in a childish and affectionate manner, whispered privately in my ear, so that Menexenus should not hear: Do, Socrates, tell Menexenus what you have been telling me.

Suppose that you tell him yourself, Lysis, I replied; for I am sure that you were attending.

That I was, he replied.

Try, then, to remember the words, and be as exact

as you can in repeating them to him, and if you have forgotten anything, ask me again the next time that you see me.

I will be sure to do that, Socrates; but go on telling him something new, and let me hear, as long as I am allowed to stay.

I certainly can not refuse, I said, as you ask me; but then, as you know, Menexenus is very pugnacious, and therefore you must come to the rescue if he attempts to upset me.

Yes, indeed, he said; he is very pugnacious, and that is the reason why I want you to argue with him.

That I may make a fool of myself?

No, indeed, he said; but that you may put him down.

That is no easy matter, I replied; for he is a terrible fellow — a pupil of Ctesippus. And there is Ctesippus: do you see him?

Never mind, Socrates, you shall argue with him.

Well, I suppose I must, I replied.

Hereupon Ctesippus complained that we were talking in secret, and keeping the feast to ourselves.

I shall be happy, I said, to let you have a share. Here is Lysis, who does not understand something that I was saying, and wants me to ask Menexenus, who, as he thinks, will be able to answer.

And why don't you ask him? he said.

Very well, I said, I will ask him; and do you, Menexenus, answer. But first I must tell you that I am one who from my childhood upward have set my heart upon a certain thing. All people have their fancies; some desire horses, and others dogs; and some are fond of gold, and others of honor. Now, I have no violent desire of any of these things; but I have a passion for friends; and I would rather have a good friend than the best cock or quail in the world: I

would even go further, and say than a horse or dog. Yea, by the dog of Egypt, I should greatly prefer a real friend to all the gold of Darius, or even to Darius himself: I am such a lover of friends as that. And when I see you and Lysis, at your early age, so easily possessed of his treasure, and so soon, he of you, and you of him, I am amazed and delighted, seeing that I myself, although I am now advanced in years, am so far from having made a similar acquisition, that I do not even know in what way a friend is acquired. But this is the question which I want to ask you, as you have experience: tell me then, when one loves another, is the lover or the beloved the friend; or may either be the friend?

Either, he said, may be the friend.

Do you mean, I said, that if only one of them loves the other, they are mutual friends?

Yes, he said; that is my meaning.

But what if the lover is not loved in return? That is a possible case.

Yes.

Or is, perhaps, even hated? for that is a fancy which lovers sometimes have. Nothing can exceed their love; and yet they imagine either that they are not loved in return, or that they are hated. Is not that true?

Yes, he said, quite true.

In that case, the one loves, and the other is loved?

Yes.

Then which is the friend of which? Is the lover the friend of the beloved, whether he be loved in return, or hated; or is the beloved the friend; or is there no friendship at all on either side, unless they both love one another?

There would seem to be none at all.

Then that is at variance with our former notion.

That appears to be true.

Then no one is a friend to his friend who does not love in return?

I think not.

Then they are not lovers of horses, whom the horses do not love in return; nor lovers of quails, nor of dogs, nor of wine, nor of gymnastic exercises, who have no return of love; no, nor of wisdom, unless wisdom loves them in return. Or perhaps they do love them, but they are not beloved by them; and the poet was wrong who sings: —

"Happy the man to whom his children are dear, and steeds having single hoofs, and dogs of chase, and the stranger of another land."

I do not think that he was wrong.

Then you think that he is right?

Yes.

Then, Menexenus, the conclusion is, that what is beloved may be dear, whether loving or hating: for example, very young children, too young to love, or even hating their father or mother when they are punished by them, are never dearer to them than at the time when they are hating them.

I think that is true, he said.

Then on this view, not the lover, but the beloved, is the friend or dear one; and the hated one, and not the hater, is the enemy?

That is plain.

Then many men are loved by their enemies, and hated by their friends, and are the friends of their enemies, and the enemies of their friends — that follows if the beloved is dear, and not the lover: but this, my dear friend, is an absurdity, or, I should rather say, an impossibility.

That, Socrates, I believe to be true.

But then, if not the enemy, the lover will be the friend, of that which is loved?

True.

And the hater will be the enemy of that which is hated?

Certainly.

Yet there is no avoiding the admission in this, as in the preceding instance, that a man may love one who is not his friend, or who may be his enemy. There are cases in which a lover loves, and is not loved, or is perhaps hated; and a man may be the enemy of one who is not his enemy, and is even his friend: for example, when he loves that which does not hate him, or even hates that which loves him.

That appears to be true.

But if the lover is not a friend, nor the beloved a friend, nor both together, what are we to say? Whom are we to call friends to one another? Do any remain?

Indeed, Socrates, I can not find any.

But, O Menexenus! I said, may we not have been altogether wrong in our conclusions?

I am sure that we have been wrong, Socrates, said Lysis. And he blushed at his own words, as if he had not intended to speak, but the words escaped him involuntarily in his eagerness; there was no mistaking his attentive look while he was listening.

I was pleased at the interest which was shown by Lysis, and I wanted to give Menexenus a rest, so I turned to him, and said, I think, Lysis, that what you say is true, and that we, if we had been right, should never have gone so far wrong; let us proceed no further in this direction (for the road seems to be getting troublesome), but take the other in which the poets will be our guide; for they are to us in a manner the fathers and authors of wisdom, and they speak of

friends in no light or trivial manner, but God himself, as they say, makes them and draws them to one another; and this they express, if I am not mistaken, in the following words: —

"God is ever drawing like towards like, and making them acquainted."

I dare say that you have heard those words.

Yes, he said; I have.

And have you not also met with the treatises of philosophers who say that like must love like? they are the people who go talking and writing about nature and the universe.

That is true, he said.

And are they right in saying that?

They may be.

Perhaps, I said, about half right, or probably altogether right, if their meaning were rightly apprehended by us. For the more a bad man has to do with a bad man, and the more nearly he is brought into contact with him, the more he will be likely to hate him, for he injures him, and injurer and injured can not be friends. Is not that true?

Yes, he said.

Then one half of the saying is untrue, if the wicked are like one another?

That is true.

But people really mean, as I suppose, that the good are like one another, and friends to one another; and that the bad, as is often said of them, are never at unity with one another or with themselves, but are passionate and restless: and that which is at variance and enmity with itself is not likely to be in union or harmony with any other thing. Don't you agree to that?

Yes, I do.

Then, my friend, those who say that the like is

friendly to the like mean to intimate, if I do not misapprehend, that the good only is the friend of the good, and of him only; but that the evil never attains to any real friendship, either with good or evil. Do you agree?

He nodded assent.

Then now we know how to answer the question "Who are friends?" for the argument supplies the answer, "That the good are friends."

Yes, he said, that is true.

Yes, I replied; and yet I am not quite satisfied with this. Shall I tell you what I suspect? I will. Assuming that like, inasmuch as he is like, is the friend of like, and useful to him — or rather let me try another way of putting the matter: Can like do any good or harm to like which he could not do to himself, or suffer anything from his like which he would not suffer from himself? And if neither can be of any use to the other, how can they be loved by one another? Can they now?

They can not.

And can he who is not loved be a friend?

Certainly not.

But say that the like is not the friend of the like in as far as he is like; still the good may be the friend of the good in as far as he is good.

True.

But then again, will not the good, in as far as he is good, be sufficient for himself? And he who is sufficient wants nothing — that is implied in the word sufficient?

Of course not.

And he who wants nothing will desire nothing?

He will not.

Neither can he love that which he does not desire?

He can not.

And he who loves not is not a lover or friend?

Clearly not.

What place then is there for friendship, if, when absent, good men have no desire of one another (for when alone they are sufficient for themselves), and when present have no use of one another? How can such persons ever be induced to value one another?

They can not.

And friends they can not be, unless they value one another?

Very true.

But see now, Lysis, how we are being deceived in all this; are we not entirely wrong?

How is that? he said.

Have I not heard some one say, as I just now recollect, that the like is the greatest enemy of the like, the good of the good? — and in fact he quoted the authority of Hesiod, who says, " That potter quarrels with potter, bard with bard, beggar with beggar; " and of all other things he also says " That of necessity the most like are most full of envy, strife, and hatred of one another, and the most unlike of friendship. For the poor man is compelled to be the friend of the rich, and the weak requires the aid of the strong, and the sick man of the physician; every one who knows not has to love and court him who knows." And indeed he went on to say in grandiloquent language, that the idea of friendship existing between similars is not the truth, but the very reverse of the truth, and that the most opposed are the most friendly; for that everything desires not like but unlike: for example, the dry desires the moist, the cold the hot, the bitter the sweet, the sharp the blunt, the void the full, the full the void, and so of all other things; for the opposite is the food of the opposite, whereas like receives

nothing from like. And I thought that he was a charming man who said this, and that he spoke well. What do the rest of you say?

I should say, at first hearing, that he is right, said Menexenus.

Then are we to say that the greatest friendship is of opposites?

Exactly.

Yes, Menexenus; but will not that be a monstrous answer? and will not the all-wise eristics be down upon us in triumph, and ask, fairly enough, whether love is not the very opposite of hate? and what answer shall we make to them? must we not admit that they speak truly?

That we must.

They will ask whether the enemy is the friend of the friend, or the friend the friend of the enemy?

Neither, he replied.

Well, but is a just man the friend of the unjust, or the temperate of the intemperate, or the good of the bad?

I do not see how that is possible.

And yet, I said, if friendship goes by contraries, the contraries must be friends.

They must.

Then neither like and like nor unlike and unlike are friends.

I suppose not.

And yet there is a further consideration: may not all these notions of friendship be erroneous? but still may there not be cases in which that which is neither good nor bad is the friend of the good?

How do you mean? he said.

Why really, I said, the truth is that I don't know; but my head is dizzy with thinking of the argument, and therefore I hazard the conjecture, that the beau-

tiful is the friend, as the old proverb says. Beauty is certainly a soft, smooth, slippery thing, and therefore of a nature which easily slips in and permeates our souls. And I further add that the good is the beautiful. You will agree to that?

Yes.

This I say from a sort of notion that what is neither good nor evil is the friend of the beautiful and the good, and I will tell you why I am inclined to think this: I assume that there are three principles — the good, the bad, and that which is neither good nor bad. What do you say to that?

I agree.

And neither is the good the friend of the good, nor the evil of the evil, nor the good of the evil; — that the preceding argument will not allow; and therefore the only alternative is — if there be such a thing as friendship or love at all — that what is neither good nor evil must be the friend, either of the good, or of that which is neither good nor evil, for nothing can be the friend of the bad.

True.

Nor can like be the friend of like, as we were just now saying.

True.

Then that which is neither good nor evil can have no friend which is neither good nor evil.

That is evident.

Then the good alone is the friend of that only which is neither good nor evil.

That may be assumed to be certain.

And does not this seem to put us in the right way? Just remark, that the body which is in health requires neither medical nor any other aid, but is well enough; and the healthy man has no love of the physician, because he is in health.

He has none.

But the sick loves him, because he is sick?

Certainly.

And sickness is an evil, and the art of medicine a good and useful thing?

Yes.

But the human body, viewed as a body, is neither good nor evil?

True.

And the body is compelled by reason of disease to court and make friends of the art of medicine?

Yes.

Then that which is neither good nor evil becomes the friend of good, by reason of the presence of evil?

That is the inference.

And clearly this must have happened before that which was neither good nor evil had become altogether corrupted with the element of evil, for then it would not still desire and love the good; for, as we were saying, the evil can not be the friend of the good.

That is impossible.

Further, I must observe that some substances are assimilated when others are present with them; and there are some which are not assimilated: take, for example, the case of an ointment or color which is put on another substance.

Very good.

In such a case, is the substance which is anointed the same as the color or ointment?

What do you mean? he said.

This is what I mean, I said: Suppose that I were to cover your auburn locks with white lead, would they be really white, or would they only appear to be white?

They would only appear to be white, he replied.

And yet whiteness would be present in them. But that would not make them at all the more white, notwithstanding the presence of white in them — they would be neither white nor black.

True.

But when old age superinduces in them the same color, then they become assimilated, and are white by the presence of white.

Certainly.

Now I want to know whether in all cases a substance is assimilated by the presence of another substance; or must the presence be after a peculiar sort?

The latter, he said.

Then that which is neither good nor evil may be in the presence of evil, and not be wholly evil, and that has happened before now?

True.

Then when anything is in the presence of evil, but is not as yet evil, the presence of good arouses the desire of good in that thing; but the presence of evil, which makes a thing evil, takes away the desire and friendship of the good; for that which was once both good and evil has now become evil only, and the good had no friendship with the evil?

None.

And therefore we say that those who are already wise, whether Gods or men, are no longer lovers of wisdom; nor can they be lovers of wisdom, who are ignorant to the extent of being evil, for no evil or ignorant person is a lover of wisdom. There remain those who have the misfortune to be ignorant, but are not yet hardened in their ignorance, or void of understanding, and do not as yet fancy that they know what they do not know: and therefore those who are the lovers of wisdom are as yet neither good nor bad. But the bad do not love wisdom any more than the

good; for, as we have already seen, neither unlike is the friend of unlike, nor like of like. You remember that?

Yes, they both said.

And so, Lysis and Menexenus, we have discovered the nature of friendship: there can be no doubt of that. Friendship is the love which the neither good nor evil has of the good, when the evil is present, either in the soul, or in the body, or anywhere.

They both agreed and entirely assented, and for a moment I rejoiced and was satisfied like a huntsman whose prey is within his grasp. But then a suspicion came across me, and I fancied unaccountably that the conclusion was untrue, and I felt pained, and said, Alas! Lysis and Menexenus, I am afraid that we have been grasping at a shadow.

Why do you say that? said Menexenus.

I am afraid, I said, that the argument about friendship is false: arguments, like men, are often pretenders.

How is that? he asked.

Well, I said; look at the matter in this way: a friend is the friend of some one.

Certainly he is.

And has he a motive and object in being a friend, or has he no motive and object?

He has a motive and object.

And is the object which makes him a friend dear to him, or neither dear nor hateful to him?

I don't quite follow you, he said.

I do not wonder at that, I said. But perhaps, if I put the matter in another way, you will be able to follow me, and my own meaning will be clearer to myself. The sick man, as I was just now saying, is the friend of the physician — is he not?

Yes.

And he is the friend of the physician because of disease, and for the sake of health?

Yes.

And disease is an evil?

Certainly.

And what of health? I said. Is that good or evil, or neither?

Good, he replied.

And we were saying, I believe, that the body being neither good nor evil, because of disease, that is to say because of evil, is the friend of medicine, and medicine is a good: and medicine has entered into this friendship for the sake of health, and health is a good.

True.

And is health a friend, or not a friend?

A friend.

And disease is an enemy?

Yes.

Then that which is neither good nor evil is the friend of the good because of the evil and hateful, and for the sake of the good and the friend?

That is clear.

Then the friend is a friend for the sake of the friend, and because of the enemy?

That is to be inferred.

Then at this point, my boys, let us take heed, and be on our guard against deceptions. I will no more say that the friend is the friend of the friend, and the like of the like, which has been declared by us to be an impossibility; but, in order that this new statement may not delude us, let us attentively examine another point, which is this: medicine, as we were saying, is a friend, or dear to us for the sake of health?

Yes.

And health is also dear?

Certainly.

And if dear, then dear for the sake of something?

Yes.

And surely this object must also be dear, as is implied in our previous admissions?

Yes.

And that something dear involves something else dear?

Yes.

But then, proceeding in this way, we shall at last come to an end, and arrive at some first principle of friendship or dearness which is not capable of being referred to any other, for the sake of which, as we maintain, all other things are dear.

Certainly.

My fear is that all those other things, which, as we say, are dear for the sake of that other, are illusions and deceptions only, of which that other is the reality or true principle of friendship. Let me put the matter thus: Suppose the case of a great treasure (this may be a son, who is more precious to his father than all his other treasures); would not the father, who values his son above all things, value other things also for the sake of his son? I mean, for instance, if he knew that his son had drunk hemlock, and the father thought that wine would save him, he would value the wine?

Certainly.

And also the vessel which contains the wine?

Certainly.

But he does not therefore value the three measures of wine, or the earthen vessel which contains them, equally with his son? Is not this rather the true state of the case? All this anxiety of his has regard not to the means which are provided for the sake of an object, but to the object for the sake of which they are provided. And although we may often say that

gold and silver are highly valued by us, that is not the truth; for the truth is that there is a further object, whatever that may be, which we value most of all, and for the sake of which gold and all our other possessions are acquired by us. Am I not right?

Yes, certainly.

And may not the same be said of the friend? That which is only dear to us for the sake of something else is improperly said to be dear, but the truly dear is that in which all these so-called dear friendships terminate.

That, he said, appears to be true.

And the truly dear or ultimate principle of friendship is not for the sake of any other or further dear.

True.

Then the notion is at an end that friendship has not any further object. But are we therefore to infer that the good is the friend?

That is my view.

Then is the good loved for the sake of the evil? Let me put the case in this way: Suppose that of the three principles, good, evil, and that which is neither good nor evil, there remained only the good and the neutral, and that evil went far away, and in no way affected soul or body, nor ever at all that class of things which, as we say, are neither good nor evil in themselves; — would the good be of any use, or other than useless to us? For if there were nothing to hurt us any longer, we should have no need of anything that would do us good. Then would be clearly seen that we did but love and desire the good because of the evil, and as the remedy of the evil, which was the disease; but if there had been no disease, there would have been no need of a remedy. Is not this the nature of the good — to be loved because of the evil, by us who are between the two? but there is no use in the good for its own sake.

I suppose that is true.

Then the final principle of friendship, in which all other friendships which are relative only were supposed by us to terminate, is of another and a different nature from them. For they are called dear because of another dear or friend. But with the true friend or dear, the case is quite the reverse; for that is proved to be dear because of the hated, and if the hated were away, the loved would no longer stay.

That is true, he replied: at least, that is implied in the argument.

But, oh! will you tell me, I said, whether if evil were to perish, we should hunger any more, or thirst any more, or have any similar affection? Or may we suppose that hunger will remain while men and animals remain, but not so as to be hurtful? And the same of thirst and the other affections, — that they will remain, but will not be evil because evil has perished? Or shall I say rather, that to ask what either would be or would not be has no meaning, for who can tell? This only we know, that in our present condition hunger may injure us, and may also benefit us. Is not that true?

Yes.

And in like manner thirst or any similar desire may sometimes be a good and sometimes an evil to us, and sometimes neither one nor the other?

To be sure.

But is there any reason why, because evil perishes, that which is not evil should also perish?

None.

Then, even if evil perishes, the desires which are neither good nor evil will remain?

That is evident.

And must not a man love that which he desires and affects?

He must.

Then, even if evil perishes, there may still remain some elements of love or friendship?

Yes.

But not, if evil is the cause of friendship: for in that case nothing will be the friend of any other thing after the destruction of evil; for the effect can not remain when the cause is destroyed.

True.

And have we not been saying that the friend loves something for a reason? and the reason was because of the evil which leads the neither good nor evil to love the good?

Very true.

But now our view is changed, and there must be some other cause of friendship?

I suppose that there must.

May not the truth be that, as we were saying, desire is the cause of friendship; for that which desires is dear to that which is desired at the time of desire? and may not the other theory have been just a long story about nothing?

That is possibly true.

But surely, I said, he who desires, desires that of which he is in want?

Yes.

And that of which he is in want is dear to him?

True.

And he is in want of that of which he is deprived?

Certainly.

Then love, and desire, and friendship would appear to be of the natural or congenial. That, Lysis and Menexenus, is the inference.

They assented.

Then if you are friends, you must have natures which are congenial to one another?

Certainly, they both said.

And I say, my boys, that no one who loves or desires another would ever have loved or desired or affected him, if he had not been in some way congenial to him, either in his soul, or in his character, or in his manners, or in his form.

Yes, yes, said Menexenus. But Lysis was silent.

Then, I said, the conclusion is, that what is of a congenial nature must be loved.

That follows, he said.

Then the true lover, and not the counterfeit, must be loved by his love.

Lysis and Menexenus gave a faint assent to this; and Hippothales changed into all manner of colors with delight.

Here, intending to revise the argument, I said: Can we point out any difference between the congenial and the like? For if that is possible, then I think, Lysis and Menexenus, there may be some sense in our argument about friendship. But if the congenial is only the like, how will you get rid of the other argument, of the uselessness of like to like in as far as they are like; for to say that what is useless is dear, would be absurd? Suppose, then, that we agree to distinguish between the congenial and the like — in the intoxication of argument, that may perhaps be allowed.

Very true.

And shall we further say that the good is congenial, and the evil uncongenial to every one? Or again that the evil is congenial to the evil, and the good to the good; or that which is neither good nor evil to that which is neither good nor evil.

They agreed to the latter alternative.

Then, my boys, we have again fallen into the old discarded error; for the unjust will be the friend of

the unjust, and the bad of the bad, as well as the good of the good.

That appears to be true.

But again if we say that the congenial is the same as the good, in that case the good will only be the friend of the good.

True.

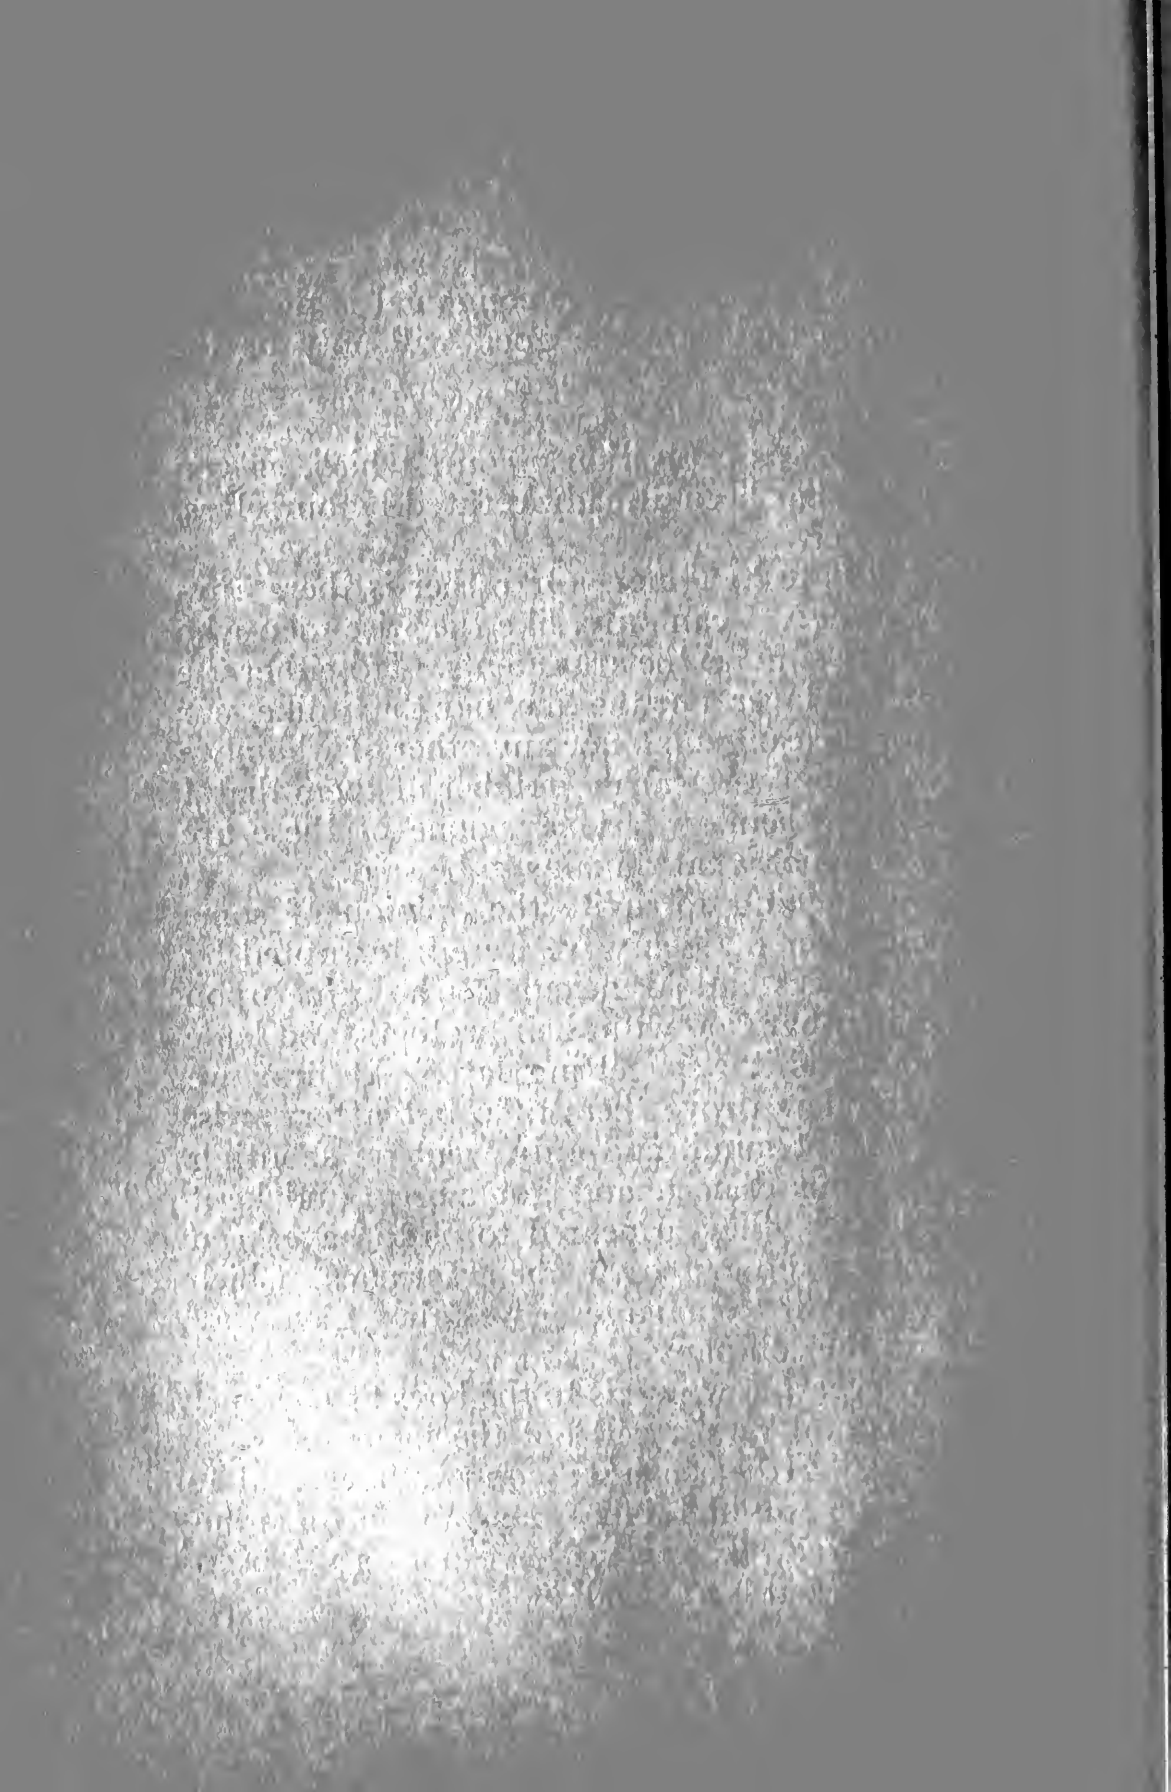
But that too was a position of ours which, as you will remember, has been already refuted by ourselves.

We remember.

Then what is to be done? Or rather is there anything to be done? I can only, like the wise men who argue in courts, sum up the arguments. If neither the beloved, nor the lover, nor the like, nor the unlike, nor the good, nor the congenial, nor any other of whom we spoke — for there were such a number of them that I can't remember them — if, I say, none of these are friends, I know not what remains to be said.

Here I was going to invite the opinion of some older person, when suddenly we were interrupted by the tutors of Lysis and Menexenus, who came upon us like an evil apparition with their brothers, and bade them go home, as it was getting late. At first, we and the bystanders drove them off; but afterwards, as they would not mind, and only went on shouting in their barbarous dialect, and got angry, and kept calling the boys — they appeared to us to have been drinking rather too much at the Hermaea, which made them difficult to manage — we fairly gave way and broke up the company.

I said, however, a few words to the boys at parting: O Menexenus and Lysis, will not the bystanders go away, and say, "Here is a jest; you two boys, and I, an old boy, who would fain be one of you, imagine ourselves to be friends, and we have not as yet been able to discover what is a friend!"



LACHES

INTRODUCTION

LYSIMACHUS, the son of Aristides the Just, and Melesias, the son of the elder Thucydides, two aged men, who live together, are desirous of educating their sons in the best manner. Their own education, as often happens with the sons of great men, has been neglected; and they are resolved that their children shall have more care taken of them, than they received themselves at the hands of their fathers.

At their request, Nicias and Laches have accompanied them to see a man named Stesilaus fighting in heavy armor. The two fathers ask the two generals what they think of this exhibition, and whether they would advise that their sons shou˙l acquire the accomplishment. Nicias and Laches are quite willing to give their opinion; but they suggest that Socrates should be invited to take part in the consultation. He is a stranger to Lysimachus, but is afterwards recognized as the son of his old friend Sophroniscus, with whom " he never had a difference to the hour of his death." Socrates is also known to Nicias, to whom he had introduced the excellent Damon, musician and sophist, as a tutor for his son, and to Laches, who had witnessed his heroic behavior at the battle of Delium.

Socrates, as he is younger than either Nicias or Laches, prefers to wait until they have delivered their opinions, which they give in a characteristic manner. Nicias, the tactician, is very much in favor of the new art, which he describes as the gymnastics of war — useful when the ranks are formed, and still more useful when they are broken; creating a general interest in military studies, and greatly adding to the appearance of the soldier in the field. Laches, the blunt warrior, is of opinion that such an art is not knowledge, and can not be of any value, because the Lacedaemonians, those great masters of arms, neglect it. His own experience in actual service has taught him that these pretenders are useless and ridiculous. This man Stesilaus has been seen by him on board ship making a very sorry exhibition of himself. The possession of the art will make the coward rash, and subject the courageous, if he chance to make a slip, to invidious remarks. And now let Socrates be taken into counsel. As they differ he must decide.

Socrates would rather not decide the question by a plurality of votes: in such a serious matter as the education of a friend's children, he would rather consult the one skilled person who has had masters, and has works to show as evidences of his skill. This is not himself; for he has never been able to pay the sophists for instructing him, and has never had the wit to do or discover anything. But Nicias and Laches are older and richer than he is: they have had teachers, and perhaps have made discoveries; and he would have trusted them entirely, if they had not been diametrically opposed.

Lysimachus here proposes to resign the argument into the hands of the younger part of the company, as he is old, and has a bad memory. He earnestly requests Socrates to remain; — in this showing, as Nicias says, how little he knows the man, who will certainly not go away until he has cross-examined the company about their past lives. Nicias has often submitted to this process; and Laches is quite willing to learn from Socrates, because his actions, in the true Dorian mode, correspond to his words.

Socrates proceeds: We might ask who are our teachers? But a better and more thorough way of examining the question will be to ask, "What is Virtue?" — or rather, to restrict the inquiry to that part of virtue which is concerned with the use of weapons — "What is Courage?" Laches thinks that he knows this: (1) "He is courageous who remains at his post." But some nations fight flying, after the manner of Aeneas in Homer; or as the heavy-armed Spartans also did at the battle of Plataea. (2) Socrates wants a more general definition, not only of military courage, but of courage of all sorts, both amid pleasures and pains. Laches replies that this universal courage is endurance. But courage is a good thing, and mere endurance may be hurtful and injurious. Therefore (3) the element of intelligence must be added. But then again unintelligent endurance may often be more courageous than the intelligent — the bad than the good. How is this contradiction to be solved? Socrates and Laches are not set "to the Dorian mode" of words and actions; for their words are all confusion, although their actions are courageous. Still they must "endure" in an argument about endurance. Laches is very willing, and is quite sure that he knows what courage is, if he could only tell.

Nicias is now appealed to; and in reply he offers a definition which he has heard from Socrates himself, to the effect that (1) "Courage is intelligence." Laches derides this; and Socrates

inquires, "What sort of intelligence?" to which Nicias replies, "Intelligence of things terrible." "But every man knows the things to be dreaded in his own art." "No they do not. They may predict results, but can not tell whether they are really terrible; only the courageous man can do that." Laches draws the inference that the courageous man is either a soothsayer or a god.

Again, in Nicias' way of speaking, the term "courageous" must be denied to animals or children, because they do not know the danger. Against this inversion of the ordinary use of language Laches reclaims, but is in some degree mollified by a compliment to his own courage. Still, he does not like to see an Athenian statesman and general descending to sophistries of this sort. Socrates resumes the argument. Courage has been defined to be intelligence or knowledge of the terrible; and courage is not all virtue, but only one of the virtues. The terrible is in the future, and therefore the knowledge of the terrible is a knowledge of the future. But there can be no knowledge of future good or evil separated from a knowledge of the good and evil of the past or present; that is to say, of all good and evil. Courage, therefore, is the knowledge of good and evil generally. But he who has the knowledge of good and evil generally, must not only have courage, but also temperance, justice, and every other virtue. Thus, a single virtue would be the same as all virtues. And after all the two generals, and Socrates, the hero of Delium, are still in ignorance of the nature of courage. They must go to school again, boys, old men and all.

Some points of resemblance, and some points of difference, appear in the Laches when compared with the Charmides and Lysis. There is less of poetical and simple beauty, and more of dramatic interest and power. They are richer in the externals of the scene; the Laches has more play and development of character. In the Lysis and Charmides the youths are the central figures, and frequent allusions are made to the place of meeting, which is a palaestra. Here the place of meeting, which is also a palaestra, is quite forgotten, and the boys play a subordinate part. The *séance* is of old and elder men, of whom Socrates is the youngest.

First is the aged Lysimachus, who may be compared with Cephalus in the Republic, and, like him, withdraws from the argument. Melesias, who is only his shadow, also subsides into silence. Both of them have been ill-educated, as is shown in a striking manner by the circumstance that Lysimachus, the friend of Sophroniscus, has never heard of the fame of Socrates, his

son; they belong to different circles. The characters of the two generals, Nicias and Laches, are first indicated by their opinions on the exhibitions of the man fighting in heavy armor. The more thoughtful Nicias is quite ready to accept the new art, which Laches treats in the spirit of ridicule, and seems to think that this, or any other military question, may be settled by asking, "What do the Lacedaemonians say to this?" The one clearly inclines to tactics and arts of fence; the other is an enemy to innovation, and relies on native courage. It is to be noted that one of them is supposed to be a hearer of Socrates; the other is only acquainted with his actions. Laches is the admirer of the Dorian mode; and into his mouth the remark is put that there are some persons who, never having been taught, are better than those who have.

In the discussion of the main thesis of the Dialogue — "What is Courage?" the antagonism of the two characters is still more clearly brought out; and in this, as in the preliminary question, the truth is parted between them. Gradually, and not without difficulty, Laches is made to pass on from the more popular to the more philosophical; it has never occurred to him that there was any other courage than that of the soldier; and only by an effort of the mind can he frame a general notion at all. No sooner has this general notion been formed than it evanesces before the dialectic of Socrates; and Nicias appears from the other side with the Socratic doctrine, that courage is knowledge. But to this Socrates himself replies, that knowledge is of past, present, and future, and such a definition of virtue would make courage equivalent to all virtue. In this part of the Dialogue the contrast between the mode of cross-examination which is practised by Laches and by Socrates, and the manner in which the definition of Laches is made to approximate to that of Nicias, are well worthy of attention.

Thus, with some intimation of the connection and unity of virtue and knowledge, we arrive at no distinct result. The two aspects of courage are never harmonized. The knowledge which in the Protagoras is explained as the faculty of estimating pleasures and pains is here lost in an unmeaning and transcendental conception. Yet several true intimations of the nature of courage are allowed to appear: (1) That courage is moral as well as physical; (2) That true courage is inseparable from knowledge, and yet (3) is based on a sort of natural instinct. Laches exhibits one aspect of courage; Nicias the other. The perfect image and harmony of both is only realized in Socrates himself.

LACHES, OR COURAGE

PERSONS OF THE DIALOGUE.

LYSIMACHUS, *son of Aristides.*
MELESIAS, *son of Thucydides.*
THEIR SONS.
NICIAS.
LACHES.
SOCRATES.

Lys. YOU have seen the exhibition of the man fighting in armor, Nicias and Laches, but we did not tell you at the time the reason why my friend Melesias and I asked you to go with us and see him. I think that we may as well confess this, for we certainly ought not to have any reserve with you. The reason was, that we were intending to ask your advice. Some laugh at the very notion of advising others, and when they are asked will not say what they think. They guess at the wishes of the person who asks them, and answer according to his, and not according to their own, opinion. But as we know that you are good judges, and will say exactly what you think, we have taken you into our counsels. And the matter about which I am making all this preface is just this: Melesias and I have two sons; that is his son, and he is named Thucydides, after his grandfather; and this is mine, who is also called, after his grandfather, Aristides. Now, we are resolved to take the greatest care of the youths, and not to let them run about as they like, which is too often the way with the young, when they are no longer children, but to begin at once and do the utmost that we can for them. And knowing that you have sons of your own, we thought that you were most likely to have attended to their training

and improvement, and, if you have not, we may remind you that you ought to have attended to them, and would invite you to assist us in the fulfilment of a common duty. I will tell you, Nicias and Laches, even at the risk of being tedious, how we came to think of this. Melesias and I live together, and our two sons live with us; and now, as I was saying at first, we are going to confess to you. Both of us often talk to the lads about the many noble deeds which our fathers did in war and peace — in the management of the allies, and also of the affairs of the city; but neither of us has any deeds of his own which he can show. Now we are somewhat ashamed of this contrast being seen by them, and we blame our fathers for letting us be spoiled in the days of our youth, while they were occupied with the concerns of others; and this we point out to the lads, and tell them that they will not grow up to honor if they are rebellious and take no pains about themselves; but that if they take pains they may, perhaps, become worthy of the names which they bear. They, on their part, promise to comply with our wishes; and our care is to discover what studies or pursuits are likely to be most improving to them. Some one told us of this art of using weapons, which, he said, was an excellent accomplishment for a young man to learn; and he praised the man whose exhibition you have seen, and told us to go and see him. And we determined to go, and to get you to accompany us, and if you did not object, we thought that we would take counsel with you about the education of our sons. That is the matter about which we wanted to talk with you; and we hope that you will give us your opinion about this, and about any other studies or pursuits which may or may not be desirable for a young man to learn. Please to say whether you object to our proposal.

Nic. As far as I am concerned, Lysimachus and Melesias, I applaud your purpose, and will gladly assist you; and I believe that you, Laches, will be equally glad.

La. Certainly, Nicias; and I quite approve of the remark which Lysimachus made about his own father, and the father of Melesias, and which is applicable, not only to them, but to us, and to every one who is occupied with public affairs. As he says, they are too apt to be negligent and careless of their own children and their private concerns. There is much truth in that remark of yours, Lysimachus. But why do you not consult our friend Socrates, instead of consulting us, about the education of the youths? he is of the same deme with you, and is always passing his time in places in which the youth have any noble study or pursuit, such as you are inquiring after.

Lys. Why, Laches, has Socrates ever attended to matters of this sort?

La. Certainly, Lysimachus.

Nic. That I have the means of knowing as well as Laches; for quite lately he supplied me with a teacher of music for my sons, — Damon, the disciple of Agathocles, who is a most accomplished man in every way, as well as a musician, and a companion of inestimable value for young men at their age.

Lys. Those who have reached my age, Socrates and Nicias and Laches, fall out of acquaintance with the young, because they are generally detained at home by old age; but I hope that you, O son of Sophroniscus, will let your fellow demesmen have the benefit of any advice which you are able to give them. And I have a claim upon you as an old friend of your father; for I and he were always companions and friends, and to the hour of his death there never was a difference between us; and now it comes back to

me, at the mention of your name, that I have heard these lads talking to one another at home, and often speaking of Socrates in terms of the highest praise; but I have never thought to ask them whether the son of Sophroniscus was the person whom they meant. Tell me, my boy, whether this is the Socrates of whom you have often spoken?

Son. Certainly, father, this is he.

Lys. I am delighted to hear, Socrates, that you maintain the name of your father, who was a most excellent man; and I further rejoice at the prospect of our family ties being renewed.

La. Indeed, Lysimachus, you ought not to give him up; for I can assure you that I have seen him maintaining, not only his father's, but also his country's name. He was my companion in the retreat from Delium, and I can tell you that if others had only been like him, the honor of our country would have been maintained, and the great defeat would never have occurred.

Lys. That is very high praise, which is given you, Socrates, by faithful witnesses and for deserts like these. And let me tell you the pleasure which I feel in hearing of your fame; and I hope that you will regard me as one of your best friends; indeed you ought to have visited us long ago, and reckoned us among your friends; but now, from this day forward, as we have at last found one another out, do as I say — come and make acquaintance with me, and with these young men, that I may continue your friend, as I was your father's. I shall expect you to do this, and shall venture to remind you. But what say you of the matter of which I was speaking — the art of fighting in armor? Is that a practice in which the lads may be advantageously instructed?

Soc. I will endeavor to advise you, Lysimachus, as

far as I can in this matter, and also in every way will comply with your wishes; but as I am younger and not so experienced, I think that I ought to hear what my elders have to say first, and to learn of them, and if I have anything to add, then I may venture to give my opinion to them as well as to you. Suppose, Nicias, that one of you speaks first.

Nic. I have no objection, Socrates; and my opinion is that the acquirement of this art is in many ways useful to young men. There is an advantage in their being employed during their leisure hours in a way which tends to improve their bodily constitution, and not in the way in which young men are too apt to be employed. No sort of gymnastics could be harder exercise; and this, and the art of riding, are of all arts most befitting to a freeman; for they only who are thus trained in the use of implements of war are trained in the conflict which is set before us, or in that on which the conflict turns. Moreover in actual battle this sort of acquirement will be of some use, when you have to fight in a line with a number of others; and will be of the greatest use when the ranks are broken and you have to fight singly; either in pursuit, when you are attacking some one who is defending himself, or in flight, when you have to defend yourself against an assailant. Certainly he who possessed the art could not meet with any harm at the hands of a single person, or perhaps of several; and in any case he would have a great advantage. Further, this sort of skill inclines a man to other noble lessons; for every man who has learned how to fight in arms will desire to learn the proper arrangement of an army, which is the sequel of the lesson: and when he has learned this, and his ambition is once fired, he will go on to learn the complete art of the general. There is no difficulty in seeing that the knowledge and practice

of other military arts will be useful and valuable to a man; and this lesson may be the beginning of them. Let me add a further advantage, which is by no means a slight one, — that this science will make any man a great deal more valiant and self-possessed in the field. And I will not disdain to mention, what to some may appear to be a small matter, that he will make a better appearance at the right time; that is to say, at the time when his appearance will strike terror into his enemies. My opinion then, Lysimachus, is, as I say, that the youths should be instructed in this art, and for the reasons which I have given. But I shall be very glad to hear Laches, if he has another view.

La. I should not like to say, Nicias, that any kind of knowledge is not to be learned; for all knowledge appears to be a good: and if, as Nicias and as the teachers of it affirm, this art of fence is really a species of knowledge, then it ought to be learned; but if not, and if those who profess it are deceivers only; or if it be knowledge, but not of a valuable sort; then what is the use of learning it? I say this, because I think that if it had been really valuable, the Lacedaemonians, whose whole life is passed in finding out and practising the arts which give them an advantage over other nations in war, would have discovered this one. And even if they had not, still these professors of the art would certainly not have failed to discover that of all the Hellenes the Lacedaemonians have the greatest interest in such matters, and that a master of the art who was honored among them would have been sure to have made his fortune among other nations, just as a tragic poet would who is honored among ourselves; which is the reason why he who fancies that he can write a tragedy does not go on a peregrination into the neighboring states, but rushes hither straight, and exhibits at Athens; and this is natural. Whereas

I perceive that these fighters in armor regard Lacedaemon as a sacred inviolable territory, which they do not touch with the point of their foot; but they make a circuit of the neighboring states, and would rather exhibit to any others than to the Spartans; and particularly to those who would themselves acknowledge that they are by no means first-rate in the arts of war. Further, Lysimachus, I have encountered a good many of these gentlemen in actual service, and have taken their measure, which I can give you at once; for none of these masters of fence has ever been distinguished in war, — there has been a sort of fatality about this: whereas, in all other arts, the men of note have been always those who have practised the art; but these appear to be a most unfortunate exception. For example, this very Stesilaus, whom you and I have just witnessed exhibiting in all that crowd and making such great professions of his powers, I have seen at another time making, in sober truth, an involuntary exhibition of himself, which was a far better spectacle. He was a marine on board a ship, which struck a transport vessel, and was armed with a weapon, half spear, half scythe, the singularity of which was worthy of the singularity of the man. To make a long story short, I will only tell you what happened to this notable invention of the scythe-spear. He was fighting, and the scythe end caught in the rigging of the other ship, and stuck fast; and he tugged, but was unable to get his weapon free. The two ships were passing one another. He first ran along his own ship holding on to the spear; but as the other ship passed by and drew him after as he was holding on, he let the spear slip through his hand until he retained only the end of the handle. The people in the transport clapped their hands, and laughed at his ridiculous figure; and when some one threw a stone,

which fell on the deck at his feet, and he quitted his hold of the scythe-spear, the crew of his own trireme also burst out laughing; they could not refrain when they beheld the weapon waving in the air, suspended from the transport. Now I do not deny that there may be something in such an art, as Nicias asserts: but I tell you my experience, and, as I said at first, my opinion is, that whether this be an art which is of some slight advantage, or not an art at all, but only an imposition; in either case there is no use in such an acquirement. For my opinion is, that if the professor of this art be a coward, he will be likely to become rash, and his character will be only more notorious; or if he be brave, and fail ever so little, other men will be on the watch, and he will be greatly traduced: for there is a jealousy of such pretenders; and unless a man be preëminent in valor, he can not help being ridiculous, if he says that he has this skill in weapons. Such is my judgment, Lysimachus, of the desirableness of this art; but, as I said at first, ask Socrates, and do not let him go until he has given you his opinion of the matter.

Lys. I am going to ask this favor of you, Socrates; as is the more necessary because the two doctors disagree, and some one is needed to decide between them. Had they agreed, this might not have been required. But as Laches has voted one way and Nicias another, I should like to hear with which of our two friends you agree.

Soc. What, Lysimachus, are you for going by the opinion of the majority?

Lys. Why, yes, Socrates; what other way is there?

Soc. And would you agree in that, Melesias? If you were deliberating about the gymnastic training of your son, would you follow the advice of the major-

ity of us, or the opinion of the one who had been trained and exercised under a skilful master?

Mel. I should take the advice of the latter, Socrates; as would be reasonable.

Soc. His one vote would be worth more than the vote of all us four?

Mel. Certainly.

Soc. And for this reason, as I imagine, — because a good decision is based on knowledge and not on numbers?

Mel. To be sure.

Soc. Must we not then first of all ask, whether there is any one of us who has knowledge in that about which we are deliberating? If there is, let us take his advice, though he be one only, and not mind the others; if there is not, let us seek further counsel. Is this a slight matter about which you and Lysimachus are deliberating? Are you not risking the greatest of your possessions? For children are your riches; and upon their turning out well or ill will depend the whole order of their father's house.

Mel. That is true.

Soc. Great care, then, is required in the matter?

Mel. Certainly.

Soc. Suppose, as I was just now saying, that we were considering, or wanting to consider, who was the best trainer. Should we not decide in his favor who knew and had practised the art, and had the best teachers?

Mel. I think that we should.

Soc. But would there not arise a prior question about the nature of the art of which we want to find the masters?

Mel. I do not understand.

Soc. Let me try to make my meaning plainer then. I do not think that we have as yet decided what that

is about which we are consulting, when we ask which of us is skilled in that, and which of us has or has not had a teacher of the art.

Nic. Why, Socrates, is not the question whether young men ought or ought not to learn the art of fighting in armor?

Soc. Yes, Nicias; but there is also a prior question, which I may illustrate in this way: When a person considers about applying a medicine to the eyes, would you say that he is consulting about the medicine or about the eyes?

Nic. About the eyes.

Soc. And when he considers if he shall set a bridle on a horse, he thinks of the horse and not of the bridle?

Nic. True.

Soc. And in a word, when he considers anything for the sake of another thing, he thinks of the end and not of the means?

Nic. Certainly.

Soc. And when you call in an adviser, you should see whether he is skilful in the accomplishment of the end which you have in view, as well as of the means?

Nic. Most true.

Soc. And at present we have in view some kind of knowledge, the end of which is the soul of youth?

Nic. Yes.

Soc. The question is, Which of us is skilful or successful in the treatment of the soul, and which of us has had good teachers?

La. Well but Socrates; did you never observe that some persons, who have had no teachers, are more skilful than those who have, in some things?

Soc. Yes, Laches, I have observed that; but you would not be very willing to trust them if they only professed to be masters of their art, unless they could

show some proof of their skill or excellence in one or more works.

La. That is true.

Soc. And therefore, Laches and Nicias, as Lysimachus and Melesias, in their anxiety to improve the minds of their sons, have asked our advice about them, we too should inform them who our teachers were, if we say that we have any, and prove them to be men of merit and experienced trainers of the minds of youth and really our teachers. Or if any of us says that he has no teacher, but that he has works to show of his own; then he should point out to them, what Athenians or strangers, bond or free, he is generally acknowledged to have improved. But if he can show neither teachers nor works, then they should ask him to look out for others; and not to run the risk of spoiling the children of friends, which is the most formidable accusation that can be brought against any one by his near and dear relations. As for myself, Lysimachus and Melesias, I am the first to confess that I have never had a teacher; although I have always from my earliest youth desired to have one. But I am too poor to give money to the Sophists, who are the only professors of moral improvement; and to this day I have never been able to discover the art myself, though I should not be surprised if Nicias or Laches may have learned or discovered it; for they are far wealthier than I am, and may therefore have learned of others. And they are older too; so that they have had more time to make the discovery. And I really believe that they are able to educate a man; for unless they had been confident in their own knowledge, they would never have spoken thus decidedly of the pursuits which are advantageous or hurtful to a young man. I repose confidence in both of them; but I do not understand why they differ from one another.

And therefore, Lysimachus, as Laches suggests that you should detain me, and not let me go until I have answered, I in turn earnestly beseech and advise you to detain Laches and Nicias, and question them. I would have you say to them: Socrates says that he has no knowledge of the matter, and that he is unable to decide which of you speaks truly; neither discoverer nor student is he of anything of the kind. But you, Laches and Nicias, should either of you tell us who is the most skilful educator whom you have ever known; and whether you invented the art yourselves, or learned of another; and if you learned, who were your respective teachers, and who were their brothers in the art; and then, if you are too much occupied in politics to teach us yourselves, let us go to them, and present them with gifts, or make interest with them, or both, in the hope that they may be induced to take charge of all our families, in order that they may not grow up inferior, and disgrace their ancestors. But if you are yourselves original discoverers in that field, give us some proof of your skill. Who are they who, having been inferior persons, have become under your care good and noble? For if this is your first attempt at education, there is a danger that you may be trying the experiment, not on the "vile corpus" of a Carian slave, but on your own sons, or the sons of your friend; and as the proverb says, "break the large vessel in learning to make pots." Tell us then, what qualities you claim or do not claim. Make them tell you this, Lysimachus, and do not let them off.

Lys. I very much approve of the words of Socrates, my friends; but you, Nicias and Laches, must determine whether you will be questioned, and give an explanation about matters of this sort. Assuredly, I and Melesias would be greatly pleased

to hear you answer the questions which Socrates asks, if you will: for I began by saying that we took you into our counsels because we thought you would be likely to have attended to the subject, especially as you have children who, like our own, are nearly of an age to be educated. Suppose, then, if you have no objection, that you take Socrates into partnership; and do you and he ask and answer one another's questions: for, as he has well said, we are deliberating about the most important of our concerns. I hope that you will see fit to comply with our request.

Nic. I see very clearly, Lysimachus, that you have only known Socrates' father, and have no acquaintance with Socrates himself: at least, you can only have known him when he was a child, and may have met him among his fellow-tribesmen, in company with his father, at a sacrifice, or at some other gathering. You clearly show that you have never known him since he arrived at manhood.

Lys. Why do you say that, Nicias?

Nic. You don't seem to be aware that any one to whom Socrates has an intellectual affinity is liable to be drawn into an argument with him; and whatever subject may be started by him, he will be continually carried round and round by him, until at last he finds that he has to give an account both of his present and past life; and when he is once entangled, Socrates will not let him go until he has completely and thoroughly sifted him. Now I am used to his ways; and I know that he will certainly do this: and also I know that I myself will be the sufferer; for I am fond of his company, Lysimachus. Neither do I think that there is any harm in being reminded of the evil which we are, or have been, doing: he who does not fly from reproof will be sure to take more heed of his after life; he will wish and desire to learn as long as he

lives, as Solon says, and will not think that old age of itself brings wisdom. To me, to be cross-examined by Socrates is neither unusual nor unpleasant; indeed, I knew all along that where Socrates was, the argument would soon pass from our sons to ourselves; and therefore, as I say, as far as I am concerned, I am quite willing to discourse with Socrates in his own manner; but you had better ask our friend Laches what his feeling may be.

La. I have but one feeling, Nicias, or (shall I say?) two feelings, about discussions. And to some I may seem to be a lover, and to others a hater of discourse; for when I hear a man discoursing of virtue, or of any sort of wisdom, who is a true man and worthy of his theme, I am delighted beyond measure: and I compare the man and his words, and note the harmony and correspondence of them. And such an one I deem to be the true musician, having in himself a fairer harmony than that of the lyre, or any pleasant instrument of music; for truly he has in his own life a harmony of words and deeds arranged, not in the Ionian, or in the Phrygian mode, nor yet in the Lydian, but in the true Hellenic mode, which is the Dorian, and no other. Such a one makes me merry with the sound of his voice; and when I hear him I am thought to be a lover of discourse; so eager am I in drinking in his words. But when I hear a man of opposite character, I am annoyed; and the better he speaks the more I hate him, and then I seem to be a hater of discourse. As to Socrates, I have no knowledge of his words: but of old, as would seem, I have had experience of his deeds; and his deeds show that free and noble sentiments may be expected from him. And if his words accord, then I am of one mind with him, and shall be delighted to be interrogated by a man such as he is, and shall not be annoyed at having

THE INSTITUTE OF MEDIAEVAL STUDIES
NOV 10 1953

to learn of him: for I agree with Solon, "that I would fain grow old, learning many things." But I must be allowed to add of the good only. Socrates must be willing to allow that he is a good teacher, or I shall be a dull and uncongenial pupil: but that the teacher is younger, or not as yet in repute — anything of that sort is of no account with me. And therefore, Socrates, I give you notice that you may teach and confute me as much as ever you like, and also learn of me anything which I know. Such is the opinion which I have had of you ever since that day on which you were my companion in danger, and gave an unmistakable proof of your valor. Therefore, say whatever you like, and do not mind about the difference of our ages.

Soc. I can not say that either of you show any reluctance to take counsel and advise with me.

Lys. But that is our business, in which I regard you as having a common interest; for I reckon you as one of us. Please then to take my place, and find out from Nicias and Laches what we want to know, for the sake of the youths, and talk and advise with them: for I am old, and my memory is bad; and I do not remember the questions which I am going to ask, or the answers to them; and if there is any interruption I am quite lost. I will therefore beg of you to carry on the proposed discussion by yourselves; and I will listen, and Melesias and I will act upon your conclusions.

Soc. Let us, Nicias and Laches, comply with the request of Lysimachus and Melesias. There would be no harm in asking ourselves the question which was first proposed to us: Who have been our own instructors in this sort of training, and whom we have made better? But the other mode of carrying on the inquiry will bring us to the same point, and will be more

like proceeding from first principles. For if we knew that the addition of something would improve some other thing, and were able to make the addition, then, clearly, we must know how that about which we are advising may be best and most easily attained. Perhaps you do not understand what I mean. Then let me make my meaning plainer in this way. Suppose we know that the addition of sight makes better the eyes which possess this gift, and also were able to impart sight to the eyes, then, clearly, we should know the nature of sight, when asked how this gift of sight may be best and most easily attained; for if we knew neither what sight is, nor what hearing is, we should not be very good medical advisers about the eyes, or the ears, or about the best mode of giving sight and hearing to them.

La. That is true, Socrates.

Soc. And are not our two friends, Laches, at this very moment inviting us to consider in what way the gift of virtue may be imparted to their sons for the improvement of their minds?

La. Very true.

Soc. Then must we not first know the nature of virtue? For how, if we are wholly ignorant of this, can we advise any one about the best mode of attaining it?

La. I do not think that we can, Socrates.

Soc. Then, Laches, we may presume that we know the nature of virtue?

La. Yes.

Soc. And that which we know we must surely be able to tell?

La. Certainly.

Soc. I would not have us begin, my friend, with inquiring about the whole of virtue; for that may be too much for us: let us first consider whether we have

a sufficient knowledge of a part; that will probably be an easier mode of proceeding.

La. Let us do as you say, Socrates.

Soc. Then which of the parts of virtue shall we select? Must we not select that to which the use of arms is supposed to conduce? And is not that generally supposed to be courage?

La. Yes, certainly.

Soc. Then, Laches, suppose that we first set about determining the nature of courage, and in the second place proceed to inquire how the young men may attain this quality of courage, as far as this is to be effected by the help of studies and pursuits. Try, and see whether you can tell me what is courage.

La. Indeed, Socrates, that is soon answered: he is a man of courage who remains at his post, and does not run away, but fights against the enemy; of that you may be very certain.

Soc. That is good, Laches; and yet I fear that I did not express myself clearly; and therefore you have answered not the question which I intended to ask, but another.

La. What do you mean, Socrates?

Soc. I will endeavor to explain; you would call a man courageous, who remains at his post, and fights with the enemy?

La. Certainly I should.

Soc. And so should I; but what would you say of another man, who fights flying, instead of remaining?

La. How flying?

Soc. Why, as the Scythians are said to fight, flying as well as pursuing; and as Homer says in praise of the horses of Aeneas, that they knew how to pursue, and fly quickly hither and thither; and he passes an encomium on Aeneas himself, as having a knowledge

of fear or flight, and calls him an author of fear or flight.

La. Yes, Socrates, and there Homer is right; for he was speaking of chariots, as you were speaking of the Scythian cavalry, who have that way of fighting; but the heavy-armed Greek fights, as I say, remaining in his rank.

Soc. And yet, Laches, you must except the Lacedaemonians at Plataea, who, when they came upon the light shields of the Persians, are said not to have been willing to stand and fight, and to have fled; but when the ranks of the Persians were broken, they turned upon them like cavalry, and won the battle.

La. That is true.

Soc. That was my meaning when I said that I was to blame in having put my question badly, and that this was the reason of your answering badly. For I meant to ask you not only about the courage of heavy-armed soldiers, but about the courage of cavalry, and every other style of soldier; and not only who are courageous in war, but who are courageous in perils by sea, and who in disease, or poverty, or again in politics, are courageous; and not only who are courageous against pain or fear, but mighty to contend against desires and pleasures, either fixed in their rank or turning upon their enemy. There is this sort of courage, is there not?

La. Certainly, Socrates.

Soc. And all these are courageous, but some have courage in pleasures, and some in pains; some in desires, and some in fears; and some are cowards under the same conditions, as I should imagine.

La. Very true.

Soc. Now I was asking about courage and cowardice in general. And I will begin with courage, and

once more ask, What is that common quality, which is the same in all these cases, and which is called courage? Do you understand now what I mean?

La. Not over well.

Soc. I mean this: As I might ask what is that quality which is called quickness, and which is found in running, playing the lyre, speaking, learning, and in many other similar actions, or rather which we possess in nearly every action that can be mentioned of arms or legs, mouth, voice, mind; — would you not apply the term quickness to all of them?

La. Quite true.

Soc. And suppose I were to be asked by some one: What is that common quality, Socrates, which, in all these uses of the word, you call quickness? I should say that which accomplishes much in a little time — that I call quickness in running, speaking, and every other sort of action.

La. You would be quite correct.

Soc. And now, Laches, do you try and tell me, What is that common quality which is called courage, and which includes all the various uses of the term when applied both to pleasure and pain, and in all the cases which I was just now mentioning?

La. I should say that courage is a sort of endurance of the soul, if I am to speak of the universal nature which pervades them all.

Soc. But that is what we must do if we are to answer the question. And yet I can not say that every kind of endurance is, in my opinion, to be deemed courage. Hear my reason: I am sure, Laches, that you would consider courage to be a very noble quality.

La. Most noble, certainly.

Soc. And you would say that a wise endurance is also good and noble?

La. Very noble.

Soc. But what would you say of a foolish endurance? Is not that, on the other hand, to be regarded as evil and hurtful?

La. True.

Soc. And is anything noble which is evil and hurtful?

La. I ought not to say that, Socrates.

Soc. Then you would not admit that sort of endurance to be courage — for that is not noble, but courage is noble?

La. You are right.

Soc. Then, according to you, only the wise endurance is courage?

La. True.

Soc. But as to the epithet " wise," — wise in what? In all things small as well as great? For example, if a man endures in spending his money wisely, knowing that by spending he will acquire more in the end, do you call him courageous?

La. Assuredly not.

Soc. Or, for example, if a man is a physician, and his son, or some patient of his, has inflammation of the lungs, and begs that he may be allowed to eat or drink something, and the other refuses; is that courage?

La. No; that is not courage at all, any more than the last.

Soc. Again, take the case of one who endures in war, and is willing to fight, and wisely calculates and knows that others will help him, and that there will be fewer and inferior men against him than there are with him; and suppose that he has also advantages of position; — would you say of such a one who endures with all this wisdom and preparation, that he, or some man in the opposing army who is in the opposite circumstances to these and yet endures and remains at his post, is the braver?

La. I should say that the latter, Socrates, was the braver.

Soc. But, surely, this is a foolish endurance in comparison with the other?

La. That is true.

Soc. And you would say that he who in an engagement of cavalry endures, having the knowledge of horsemanship, is not so courageous as he who endures, having no knowledge of horsemanship?

La. That is my view.

Soc. And he who endures, having a knowledge of the use of the sling, or the bow, or any other art, is not so courageous as he who endures, not having such a knowledge?

La. True.

Soc. And he who descends into a well, and dives, and holds out in this or any similar action, having no knowledge of diving, or the like, is, as you would say, more courageous than those who have this knowledge?

La. Why, Socrates, what else can a man say?

Soc. Nothing, if that is what he thinks.

La. But that is what I do think.

Soc. And yet men who thus run risks and endure are but foolish, Laches, in comparison of those who do the same things, having the skill to do them.

La. That is true.

Soc. But foolish boldness and endurance appeared before to be base and hurtful to us.

La. Quite true.

Soc. Whereas courage was acknowledged to be a noble quality.

La. True.

Soc. And now on the contrary we are saying that the foolish endurance, which was before held in dishonor, is courage.

La. Very true.

Soc. And are we right in saying that?

La. Indeed, Socrates, I am sure that we are not right.

Soc. Then according to your statement, you and I, Laches, are not attuned to the Dorian mode, which is a harmony of words and deeds; for our deeds are not in accordance with our words. Any one would say that we had courage who saw us in action, but not, I imagine, he who heard us talking about courage just now.

La. That is most true.

Soc. And is this condition of ours satisfactory?

La. Quite the reverse.

Soc. Suppose, however, that we admit our principle to a certain extent.

La. What principle? And what are we to admit?

Soc. The principle of endurance. Let us too endure and persevere in the inquiry, and then courage will not laugh at our faint-heartedness in searching for courage; which after all may, very likely, be endurance.

La. I am ready to go on, Socrates; and yet I am unused to investigations of this sort. But the spirit of controversy has been aroused in me by what has been said; and I am really grieved at being thus unable to express my meaning. For I fancy that I do know the nature of courage; but, somehow or other, she has slipped away from me, and I can not get hold of her and tell her nature.

Soc. But, my dear friend, should not the good sportsman follow the track, and not be lazy?

La. Certainly, he should.

Soc. And shall we invite Nicias to join us? he may be better at the sport than we are. What do you say?

La. I should like that.

Soc. Come then, Nicias, and do what you can to

help your friends, who are tossing on the waves of argument, and at the last gasp: you see our extremity, and may save us, and also settle your own opinion, if you will tell us what you think about courage.

Nic. I have been thinking, Socrates, that you and Laches are not defining courage in the right way; for you have forgotten an excellent saying which I have heard from your own lips.

Soc. What is that, Nicias?

Nic. I have often heard you say that "Every man is good in that in which he is wise, and bad in that in which he is unwise."

Soc. That is certainly true, Nicias.

Nic. And therefore if the brave man is good, he is also wise.

Soc. Do you hear him, Laches?

La. Yes, I hear him, but I don't quite understand him.

Soc. I think that I understand him; and he appears to me to mean that courage is a sort of wisdom.

La. What sort of wisdom, Socrates?

Soc. That is a question which you must ask of Nicias.

La. Yes.

Soc. Tell him then, Nicias, what you mean by this wisdom; for you surely do not mean the wisdom which plays on the flute?

Nic. Certainly not.

Soc. Nor the wisdom which plays the lyre?

Nic. No.

Soc. But what is this knowledge then, and of what?

La. I think that you put the question to him very well, Socrates; and I would like him to say what is the nature of this knowledge or wisdom.

Nic. I mean to say, Laches, that courage is the

knowledge of that which inspires fear or confidence in war, or in anything.

La. How strangely he is talking, Socrates.

Soc. What makes you say that, Laches?

La. What makes me say that? Why, surely courage is one thing, and wisdom another.

Soc. That is just what Nicias denies.

La. Yes, that is what he denies in his foolishness.

Soc. Shall we enlighten him instead of abusing him?

Nic. Laches does not want to enlighten me, Socrates; but having been proved to be talking nonsense himself, he wants to prove that I have been doing the same.

La. Very true, Nicias; and you are talking nonsense, as I shall endeavor to show. Let me ask you a question: Do not physicians know the dangers of disease? or do the courageous know them? or are the physicians the same as the courageous?

Nic. Not at all.

La. No more than the husbandmen who know the dangers of husbandry, or other masters of crafts, who have a knowledge of that which inspires them with fear or confidence in their own crafts, and yet they are not courageous a whit the more for that.

Soc. What is Laches saying, Nicias; he appears to be saying something.

Nic. Yes, he is saying something, but something which is not true.

Soc. How is that?

Nic. Why, because he does not see that the physician's knowledge only extends to the nature of health and disease: he can tell the sick man that, and nothing more. Do you imagine, Laches, that the physician knows whether health or disease is the more terrible to a man? Had not many a man better never

get up from a sick bed? I should like to know whether you think that life is always better than death. May not death often be the better of the two?

La. Yes, I certainly think that.

Nic. And do you think that the same things are terrible to those to whom to die is better, and to those to whom to live is better?

La. Certainly not.

Nic. And do you suppose that the physician or any other artist knows this, or any one indeed, except he who is skilled in the grounds of fear and hope? And him I call the courageous.

Soc. Do you understand his meaning, Laches?

La. Yes; I suppose that, in his way of speaking, the soothsayers are courageous. For who but one of them can know to whom to die or to live is better? And yet, Nicias, would you allow that you are yourself a soothsayer, or are you neither soothsayer nor courageous?

Nic. What! do you mean to say that the soothsayer ought to know the grounds of hope or fear?

La. Indeed I do: who but he?

Nic. Much rather I should say he of whom I speak; for the soothsayer ought to know only the signs of things that are about to come to pass, whether death or disease, or loss of property, or victory, or defeat in war, or in any sort of contest; but to whom the suffering or not suffering of these things will be for the best, can no more be decided by the soothsayer than by one who is no soothsayer.

La. I can not understand what Nicias would be at, Socrates; for he represents the courageous man as neither a soothsayer, nor a physician, nor in any other character, unless he means to say that he is a god. My opinion is that he does not like honestly to confess that he is talking nonsense, but that he

shuffles up and down in order to conceal the difficulty into which he has got himself. You and I, Socrates, might have practised a similar shuffle just now, if we had only wanted to avoid the appearance of contradiction. And if we had been arguing in a court of law there might have been reason in this; but why should a man deck himself out with vain words at a meeting of friends such as this?

Soc. I quite agree with you, Laches, that he should not. But perhaps Nicias is serious, and not merely talking for the sake of talking. Let us ask him to explain what he means, and if he has reason on his side we will agree with him; if not, we will instruct him.

La. Do you, Socrates, if you like, ask him: I think that I have asked enough.

Soc. I don't see why I should not; and my question will do for both of us.

La. Very good.

Soc. Then tell me, Nicias, or rather tell us, for Laches and I are partners in the argument: Do you mean to affirm that courage is the knowledge of the grounds of hope and fear?

Nic. I do.

Soc. And that is a very special knowledge which is not possessed by the physician or prophet, who will not be courageous unless they superadd this particular knowledge. That is what you were saying?

Nic. I was.

Soc. Then courage is not a thing which every pig would have, any more than he would have knowledge, as the proverb says?

Nic. I think not.

Soc. Clearly not, Nicias; not even such a big pig as the Crommyonian sow would be called by you courageous. And this I say not as a joke, but be-

cause I think that he who assents to your doctrine, that courage is the knowledge of the grounds of fear and hope, can not allow that any wild beast is courageous, unless he admits that a lion, or a leopard, or perhaps a boar, or any other animal, has a degree of wisdom which but a few human beings, and these only with difficulty, attain. He who takes your view of courage must affirm that a lion, and a stag, and a bull, and a monkey, have equally little pretensions to courage.

La. Capital, Socrates; by the gods, that is truly good. And I hope, Nicias, that you will tell us whether these animals, which we all admit to be courageous, are really wiser than mankind; or whether you will have the boldness, in the face of universal opinion, to deny their courage.

Nic. Why, Laches, I don't call animals or any other things courageous, which have no fear of dangers, because they are ignorant of them, but fearless and senseless only. Do you think that I should call little children courageous, which fear no dangers because they know none? There is a difference, as I should imagine, between fearlessness and courage. Now I am of opinion that thoughtful courage is a quality possessed by very few, but that rashness, and boldness, and fearlessness, which has no forethought, are very common qualities possessed by many men, many women, many children, many animals. And you, and men in general, call by the term "courageous" actions which I call rash, and my courageous actions are wise actions.

La. Behold, Socrates, how admirably, as he thinks, he dresses himself out in words, while seeking to deprive of the honor of courage those whom all the world acknowledges to be courageous.

Nic. Be of good cheer, Laches; for I am quite

willing to say of you and also of Lamachus, and of many other Athenians, that you are courageous and therefore wise.

La. I could answer that; but I would not have you cast in my teeth that I am a haughty Aexonian.

Soc. I would not have you answer him, for I fancy, Laches, that you have not discovered whence his wisdom comes; he has got all this from my friend Damon, and Damon is always with Prodicus, who, of all the Sophists, is considered to be the best taker to pieces of words of this sort.

La. Yes, Socrates; and the examination of such niceties is a much more suitable employment for a Sophist than for a great statesman whom the city chooses to preside over her.

Soc. But still, my sweet friend, a great statesman is just the man to have a great mind. And I think that the view which is implied in Nicias' definition of courage is worthy of examination.

La. Then examine for yourself, Socrates.

Soc. That is what I am going to do, my dear friend. Don't, however, suppose that I shall let you out of the partnership; for I shall expect you to apply your mind, and join with me in the consideration of the question.

La. I do not object if you think that I ought.

Soc. Yes, I do; and I must beg of you, Nicias, to begin again. You remember that we originally considered courage to be a part of virtue.

Nic. Very true.

Soc. And you yourself said that this was a part, and that there were many other parts, all of which together are called virtue.

Nic. Certainly.

Soc. Do you agree with me about the parts? For I say that justice, temperance, and the like, are all of

them parts of virtue as well as courage. Would you not say the same?

Nic. Certainly.

Soc. Well then, about that we are agreed. And now let us proceed a step, and see whether we are equally agreed about the fearful and the hopeful. Let me tell you my own opinion, and if I am wrong you shall set me right: my opinion is that the terrible and the hopeful are the things which do or do not create fear, and that fear is not of the present, nor of the past, but is of future and expected evil. Do you not agree to that, Laches?

La. Yes, Socrates, entirely.

Soc. That is my view, Nicias; the terrible things, as I should say, are the evils which are future; and the hopeful are the good or not evil things which are future. Do you or do you not agree in this?

Nic. I agree.

Soc. And the knowledge of these things you call courage?

Nic. Precisely.

Soc. And now let me see whether you agree with Laches and myself in a third point.

Nic. What is that?

Soc. I will tell you. He and I have a notion that there is not one knowledge or science of the past, another of the present, a third of what will be and will be best in the future; but that of all three there is one science only: for example, there is one science of medicine which is concerned with the inspection of health equally in all times, present, past, and future; and of husbandry in like manner, which is concerned with the productions of the earth. And as to the general's art, you yourself will be my witnesses, that the general has to think of the future as well as the present; and he considers that he is not to be the

servant of the soothsayer, but his master, because he knows better what is happening or is likely to happen in war: and accordingly the law places the soothsayer under the general, and not the general under the soothsayer. Am I not correct, Laches?

La. Quite correct.

Soc. And do you, Nicias, also acknowledge that the same science has understanding of the same things, whether future, present, or past?

Nic. Yes, indeed, Socrates; that is my opinion.

Soc. And courage, my friend, is, as you say, a knowledge of the fearful and of the hopeful?

Nic. Yes.

Soc. And the fearful, and the hopeful, are admitted to be future goods and future evils?

Nic. True.

Soc. And the same science has to do with the same things in the future or at any time?

Nic. That is true.

Soc. Then courage is not the science which is concerned with the fearful and hopeful, for they are future only; and courage, like the other sciences, is concerned not only with good and evil of the future, but of the present, and past, and of any time?

Nic. That, as I suppose, is true.

Soc. Then the answer which you have given, Nicias, includes only a third part of courage; but our question extended to the whole nature of courage: and according to your view, that is, according to your present view, courage is not only the knowledge of the hopeful and the fearful, but seems to include nearly every good and evil without reference to time. What do you say to that alteration in your statement?

Nic. I agree to that, Socrates.

Soc. But then, my dear friend, if a man knew all

good and evil, and how they are, and have been, and will be produced, would he not be perfect, and wanting in no virtue, whether justice, or temperance, or holiness? He would possess them all, and he would know which were dangers and which were not, and guard against them whether they were supernatural or natural; and he would provide the good, as he would know how to deal with gods or men.

Nic. I think, Socrates, that there is a great deal of truth in what you say.

Soc. But then, Nicias, courage, according to this new definition of yours, instead of being a part of virtue only, will be all virtue?

Nic. I suppose that is true.

Soc. But we were saying that courage is one of the parts of virtue?

Nic. Yes, that was what we were saying.

Soc. And that is in contradiction with our present view?

Nic. That appears to be the case.

Soc. Then, Nicias, we have not discovered what courage is.

Nic. We have not.

La. And yet, friend Nicias, I imagined that you would have made the discovery, as you were so contemptuous of the answers which I made to Socrates. I had very great hopes that you would have been enlightened by the wisdom of Damon.

Nic. I perceive, Laches, that you think nothing of having displayed your ignorance of the nature of courage, but you look only to see whether I have not made a similar display; and if we are both equally ignorant of the things which a man who is good for anything should know, that, I suppose, will be of no consequence. You certainly appear to me very like the rest of the world, looking at your neighbor and

not at yourself. I am of opinion that enough has been said on the subject of discussion; and if anything has been imperfectly said, that may be hereafter corrected by the help of Damon, whom you think to deride, although you have never seen him, and with the help of others. And when I am satisfied myself, I will freely impart my satisfaction to you, for I think that you are very much in want of knowledge.

La. You are a philosopher, Nicias; of that I am aware: nevertheless I would recommend Lysimachus and Melesias not to take you and me as advisers about the education of their children; but, as I said at first, they should ask Socrates; and if my sons were old enough, I would have asked him myself.

Nic. To that I quite agree, if Socrates is willing to take them under his charge. I should not wish for any one else to be the tutor of Niceratus. But I observe that when I mention the matter to him he recommends to me some other tutor and refuses himself. Perhaps he may be more ready to listen to you, Lysimachus.

Lys. He ought, Nicias: for certainly I would do things for him which I would not do for many others. What do you say, Socrates — will you comply? And are you ready to give assistance in the improvement of the youths?

Soc. Indeed, Lysimachus, I should be very wrong in refusing to aid in the improvement of anybody. And if I had shown in this conversation that I had a knowledge which Nicias and Laches have not, then I admit that you would be right in inviting me to perform this duty; but as we are all in the same perplexity, why should one of us be preferred to another? I certainly think that no one should; and under these circumstances, let me offer you a piece of advice (and this need not go further than ourselves).

I maintain, my friends, that every one of us should seek out the best teacher whom he can find, first for ourselves, and then for the youth, regardless of expense or anything. But I can not advise that we remain as we are. And if any one laughs at us for going to school at our age, I would quote to them the authority of Homer, who says, that

"Modesty is not good for a needy man."

Let us then, regardless of the remarks which are made upon us, make the education of the youths our own education.

Lys. I like your proposal, Socrates; and as I am the oldest, I am also the most eager to go to school with the boys. Let me beg a favor of you: come to my house to-morrow at dawn, and we will advise about these matters. For the present, let us make an end of the conversation.

Soc. I will come to you to-morrow, Lysimachus, as you propose, God willing.

PROTAGORAS

INTRODUCTION

THE Protagoras, like several of the Dialogues of Plato, is put into the mouth of Socrates, who describes a conversation which had taken place between himself and the great Sophist at the house of Callias — "the man who had spent more upon the Sophists than all the rest of the world, and in which the learned Hippias and the grammarian Prodicus had also shared, as well as Alcibiades and Critias, both of whom said a few words — in the presence of a distinguished company consisting of disciples of Protagoras and of leading Athenians belonging to the Socratic circle. The Dialogue commences with a request on the part of Hippocrates that Socrates would introduce him to the celebrated teacher. He has come before the dawn had risen to testify his zeal. Socrates moderates his excitement and advises him to find out "what Protagoras will make of him," before he becomes his pupil.

They go together to the house of Callias; and Socrates, after explaining the purpose of their visit to Protagoras, asks the question "What he will make of Hippocrates?" Protagoras answers that he will make a better and a wiser man." "But in what will he be better?" — Socrates desires to have a more precise answer. Protagoras replies, "That he will teach him prudence in affairs private and public; in short, the science or knowledge of human life."

This, as Socrates admits, is a noble profession: but he is doubtful — or rather would have been, if Protagoras had not assured him of it — whether such knowledge can be taught. And this for two reasons: (1) Because the Athenian people, who recognize in their assemblies the distinction between the skilled and the unskilled, do not recognize any distinction between the trained politician and the untrained; (2) Because the wisest and best Athenian citizens do not teach their sons political virtue. Will Protagoras explain this anomaly to him?

Protagoras explains his views in the form of an apologue, in which, after Prometheus had given men the arts, Zeus is represented as sending Hermes to them, bearing with him Justice and

Reverence. These are not, like the arts, to be imparted to a few only, but all men are to be partakers of them. Therefore the Athenian people are right in distinguishing between the skilled and unskilled in the arts, and not between skilled and unskilled politicians. (1) For all men have the political virtues to a certain degree, and whether they have them or not are obliged to say that they have them. A man would be thought a madman who professed an art which he did not know; and he would be equally thought a madman if he did not profess a virtue which he had not. (2) And that the political virtues can be taught and acquired, in the opinion of the Athenians, is proved by the fact that they punish evil-doers, with a view to prevention, of course — mere retribution is for beasts, and not for men. (3) Another proof of this is the education of youth, which begins almost as soon as they can speak, and is continued by the state, when they pass out of the control of their parents. (4) Nor is there any inconsistency in wise and good fathers having foolish and worthless sons; for (*a*) in the first place the young do not learn of their fathers only, but of all the citizens; and (*b*) this is partly a matter of chance and of natural gifts: the sons of a great statesman are not necessarily great statesmen any more than the sons of a good artist are necessarily good artists. (5) The error of Socrates lies in supposing that there are no teachers, when all men are teachers. Only a few, like Protagoras himself, are somewhat better than others.

Socrates is highly delighted, and quite satisfied with this explanation of Protagoras. But he has still a doubt lingering in his mind. Protagoras has spoken of the virtues: are they many, or one? are they parts of a whole, or different names of the same thing? Protagoras replies that they are parts, like the parts of a face, which have their several functions, and no one part is like any other part. This admission, which has been somewhat hastily made, is now taken up and cross-examined by Socrates:

"Is justice just, and is holiness holy? And are justice and holiness opposed to one another?" — "Then justice is unholy." Protagoras would rather say that justice is different from holiness, and yet in a certain point of view nearly the same. He does not, however, escape in this way from the cunning of Socrates, who entangles him into an admission that everything has but one opposite. Folly, for example, is opposed to wisdom; and folly is also opposed to temperance; and therefore temperance and wisdom are the same. And holiness has been already ad-

mitted to be nearly the same as justice. Temperance, therefore, has now to be compared with justice.

Protagoras, whose temper begins to get a little ruffled at the process to which he has been subjected, is aware that he will soon be compelled by the dialectics of Socrates to admit that the temperate is the just. He therefore defends himself with his favorite weapon; that is to say, he makes a long speech not much to the point, which elicits the applause of the audience.

Here occurs a sort of interlude, which commences with a declaration on the part of Socrates that he can not follow a long speech, and therefore he must beg Protagoras to speak shorter. As Protagoras declines to accommodate him, he rises to depart, but is detained by Callias, who thinks him unreasonable in not allowing Protagoras the liberty which he takes himself of speaking as he likes. But Alcibiades answers that the two cases are not parallel. For Socrates admits his inability to speak long; will Protagoras in like manner acknowledge his inability to speak short?

Counsels of moderation are urged first in a few words by Critias, and then by Prodicus in balanced and sententious language: and Hippias proposes an umpire. But who is to be the umpire? rejoins Socrates; he would rather suggest as a compromise that Protagoras shall ask, and he will answer. To this Protagoras yields a reluctant assent.

Protagoras selects as the thesis of his questions a poem of Simonides of Ceos, in which he professes to find a contradiction. First the poet says,

"Hard is it to become good,"

and then reproaches Pittacus for having said, "Hard is it to be good." How is this to be reconciled? Socrates, who is familiar with the poem, is embarrassed at first, and invokes the aid of Prodicus the Cean, who must come to the help of his countryman, but apparently only with the intention of flattering him into absurdities. First a distinction is drawn between to be, and to become: to become good is difficult; to be good is easy. Then the word difficult or hard is explained to mean "evil" in the Cean dialect. To this Prodicus assents; but when Protagoras reclaims, Socrates slily withdraws Prodicus from the fray, under the pretence that his assent was only intended to test the wits of his adversary. He then proceeds to give another and more elaborate explanation of the whole passage. The explanation is as follows: —

The Lacedaemonians are great philosophers (although this is a fact which is not generally known); and the soul of their philosophy is brevity, which was also the style of primitive antiquity and of the seven sages. Now Pittacus had a saying, "Hard is it to be good:" Simonides was jealous of the fame of this saying, and wrote a poem which was designed to controvert it. No, says he, Pittacus; not "hard to be good," but "hard to become good." Socrates proceeds to argue in a highly impressive manner that the whole composition is intended as an attack upon Pittacus. This, though manifestly absurd, is accepted by the company, and meets with the special approval of Hippias, who has however a favorite interpretation of his own, which he is requested by Alcibiades to defer.

The argument is now resumed, not without some disdainful remarks of Socrates on the practice of introducing the poets, who ought not to be allowed, any more than flute-girls, to come into good society. Men's own thoughts should supply them with the materials for discussion. A few soothing flatteries are addressed to Protagoras by Callias and Socrates, and then the old question is repeated, "Whether the virtues are one or many?" To which Protagoras is now disposed to reply, that four out of the five virtues are in some degree similar; but he still contends that the fifth, courage, is wholly dissimilar. Socrates proceeds to undermine the last stronghold of the adversary, first obtaining from him the admission that all virtue is in the highest degree good:

The courageous are the confident; and the confident are those who know their business or profession: those who have no such knowledge and are still confident are madmen. This is admitted. Then, says Socrates, courage is knowledge — an inference which Protagoras evades by drawing a futile distinction between the courageous and the confident in a fluent speech.

Socrates renews the attack from another side: he would like to know whether pleasure is not the only good, and pain the only evil? Protagoras seems to doubt the morality or propriety of assenting to this; he would rather say that "some pleasures are good, some pains are evil," which is also the opinion of the generality of mankind. What does he think of knowledge? does he agree with the common opinion about this also, that knowledge is overpowered by passion? or does he hold that knowledge is power? Protagoras agrees that knowledge is certainly a governing power.

This, however, is not the doctrine of men in general, who main-

tain that many who know what is best, act contrary to their knowledge under the influence of pleasure. But this opposition of good and evil is really the opposition of a greater or lesser amount of pleasure. Pleasures are evils because they end in pain, and pains are good because they end in pleasures. Thus pleasure is seen to be the only good; and the only evil is the preference of the lesser pleasure to the greater. But then comes in the illusion of distance. Some art of mensuration is required in order to show us pleasures and pains in their true proportion. This art of mensuration is a kind of knowledge, and knowledge is thus proved once more to be the governing principle of human life, and ignorance the origin of all evil: for no one prefers the less pleasure to the greater, or the greater pain to the less, except from ignorance. The argument is drawn out in an imaginary "dialogue within a dialogue," conducted by Socrates and Protagoras on the one part, and the rest of the world on the other. Hippias and Prodicus, as well as Protagoras, admit the soundness of the conclusion.

Socrates then applies this new conclusion to the case of courage — the only virtue which still holds out against the assaults of the Socratic dialectic. No one chooses the evil or refuses the good except through ignorance. This explains why cowards refuse to go to war: — because they form a wrong estimate of good, and honor, and pleasure. And why are the courageous willing to go to war? — because they form a right estimate of pleasures and pains, of things terrible and not terrible. Courage then is knowledge, and cowardice is ignorance. And the five virtues, which were originally maintained to have five different natures, after having been easily reduced to two only, are at last resolved in one. The assent of Protagoras to this last position is extracted with great difficulty.

Socrates concludes by professing his disinterested love of the truth, and remarks on the singular manner in which he and his adversary had changed sides. Protagoras began by asserting, and Socrates by denying, the teachableness of virtue, and now the latter ends by affirming that virtue is knowledge, which is the most teachable of all things, while Protagoras has been striving to show that virtue is not knowledge, and this is almost equivalent to saying that virtue can not be taught. He is not satisfied with the result, and would like to renew the inquiry with the help of Protagoras in a different order, asking (1) What virtue is, and (2) Whether virtue can be taught. Protagoras

declines this offer, but commends Socrates' earnestness and mode of discussion.

The Protagoras is often supposed to be full of difficulties. These are partly imaginary and partly real. The imaginary ones are: (1) Chronological, — which were pointed out in ancient times by Athenaeus, and are noticed by Schleiermacher and others, and relate to the impossibility of all the persons in the Dialogue meeting at any one time, whether in the year 425 B. C., or in any other. But Plato, like other writers of fiction, aims only at the probable, and has shown in other Dialogues (e. g. the Symposium and Republic) an extreme disregard of the historical accuracy which is sometimes demanded of him. (2) The exact place of the Protagoras among the Dialogues, and the date of composition, have also been much disputed. But there are no criteria which afford any real grounds for determining the date of composition; and the affinities of the Dialogues, when they are not indicated by Plato himself, must always to some extent remain uncertain. (3) There is another class of difficulties, which may be ascribed to preconceived notions of commentators, who imagine that Protagoras the Sophist ought always to be in the wrong, and his adversary Socrates in the right; or that in this or that passage — e. g. in the explanation of good as pleasure — Plato is inconsistent with himself; or that the Dialogue fails in unity, and has not a proper "beginning, middle, and ending." They seem to forget that Plato is a dramatic writer who throws his thoughts into both sides of the argument, and certainly does not aim at any unity which is inconsistent with freedom, and with a natural or even wild manner of treating his subject; also that his mode of revealing the truth is by lights and shadows, and far off and opposing points of view, and not by dogmatic statements or definite results.

The real difficulties arise out of the extreme subtlety of the work, which, as Socrates says of the poem of Simonides, is a most perfect piece of art. There are dramatic contrasts and interests, threads of philosophy broken and resumed, satirical reflections on mankind, veils thrown over truths which are lightly suggested, and all woven together in a single design, and moving towards one end.

In the introductory scene Plato raises the expectation that a "great personage" is about to appear on the stage (perhaps with a further view of showing that he is destined to be overthrown by a greater still, who makes no pretensions). Before introducing Hippocrates to him, Socrates thinks proper to warn

the youth of the dangers of "influence," of the invidious nature of which Protagoras is also sensible. Hippocrates readily adopts the suggestion of Socrates that he shall learn the accomplishments which befit an Athenian gentleman of Protagoras, and let alone his "sophistry." There is nothing however in the introduction which leads to the inference that Plato intended to blacken the character of the Sophists; he only makes a little merry at their expense.

The "great personage" is somewhat ostentatious, but frank and honest. He is introduced on a stage which is worthy of him — at the house of the rich Callias, in which are congregated the noblest and wisest of the Athenians. He considers openness to be the best policy, and particularly mentions his own liberal mode of dealing with his pupils, as if in answer to the favorite accusation of the Sophists that they received pay. He is remarkable for the good temper which he exhibits throughout the discussion under the trying and often sophistical cross-examination of Socrates. Although once or twice ruffled, and reluctant to continue the discussion, he parts company on perfectly good terms, and appears to be, as he says of himself, the "least jealous of mankind."

Nor is there anything in the sentiments of Protagoras which impairs this pleasing impression of the grave and weighty old man. His real defect is that he is inferior to Socrates in dialectics. The opposition between him and Socrates is not the opposition of good and bad, true and false, but of the old art of rhetoric and the new science of interrogation and argument; also of the irony of Socrates and the self-assertion of the Sophists. There is quite as much truth on the side of Protagoras as of Socrates; but the truth of Protagoras is based on common sense and common maxims of morality, while that of Socrates is paradoxical or transcendental, and though full of meaning and insight, hardly intelligible to the rest of mankind.

For example: (1) one of the noblest statements to be found in antiquity about the preventive nature of punishment is put into the mouth of Protagoras; (2) he is clearly right also in maintaining that virtue can be taught (which Socrates himself, at the end of the Dialogue, is disposed to concede); and also (3) in his explanation of the phenomenon that good fathers have bad sons; (4) he is right also in observing that the virtues are not like the arts, gifts, or attainments of special individuals, but the common property of all: this, which in all ages has been the strength and weakness of ethics and politics, is deeply seated in

human nature; (5) there is a sort of half truth in the notion that all civilized men are teachers of virtue; and (6) the religious allegory should be noticed, in which the arts are said to be given by Prometheus (who stole them), whereas justice and reverence and the political virtues could only be imparted by Zeus. It is observable also (7) in the latter part of the Dialogue, when Socrates is arguing that "pleasure is the only good," Protagoras deems it more in accordance with his character to maintain that "some pleasures only are good."

There is no reason to suppose that in all this Plato is depicting an imaginary Protagoras; at any rate, he is showing us the teaching of the Sophists under the milder aspect under which he once regarded them. Nor is there any reason to doubt that Socrates is equally an historical character, paradoxical, ironical, tiresome, but seeking for the unity of virtue and knowledge as for a precious treasure; willing to rest this even on a calculation of pleasure, and irresistible here, as everywhere in Plato, in his intellectual superiority.

The aim of Socrates, and of the Dialogue, is to show the unity of virtue. In the determination of this question the identity of virtue and knowledge is found to be involved. But if virtue and knowledge are one, then virtue can be taught; the end of the Dialogue returns to the beginning. Had Protagoras been allowed by Plato to make the Aristotelian distinction, and say that virtue is not knowledge, but is accompanied with knowledge; or to point out with Aristotle that the same quality may have more than one opposite; or with Plato himself in the Phaedo to deny that good is a mere exchange of a greater pleasure for a less — the unity of virtue and the identity of virtue and knowledge would have required to be proved by other arguments.

The victory of Socrates over Protagoras is in every way complete when their minds are fairly brought together. Protagoras falls before him after two or three blows. Socrates partially gains his object in the first part, and completely in the second. Nor does he appear at any disadvantage when subjected to "the question" by Protagoras. He succeeds in making his two "friends," Prodicus and Hippias, ludicrous by the way; he also makes a long speech in defence of the poem of Simonides, after the manner of the Sophists, showing, as Alcibiades says, that he is only pretending to have a bad memory.

Not having the whole of this poem before us, it is impossible for us to answer certainly the question of Protagoras, how the two passages of Simonides are to be reconciled. We can only

follow the indications given by Plato himself. But it seems likely that the reconcilement offered by Socrates is only a caricature of the methods of interpretation which were practised by the Sophists — for the following reasons: (1) The transparent irony of the previous interpretations given by Socrates. (2) The ludicrous opening of the speech in which the Lacedaemonians are described as the true philosophers, and Laconic brevity as the true form of philosophy, evidently with an allusion to Protagoras' long speeches. (3) The manifest futility and absurdity of the explanation of ἐμῶν ἐπαίνημι ἀλαθέως, which is hardly consistent with the rational interpretation of the rest of the poem. The opposition of εἶναι and γενέσθαι seems also intended to express the rival doctrines of Socrates and Protagoras, and is a sort of facetious commentary on their differences. (4) The general treatment in Plato both of the Poets and the Sophists, who are their interpreters, and whom he delights to identify with them. (5) The depreciating spirit in which Socrates speaks of the introduction of the poets as a substitute for original conversation, which is intended to contrast with Protagoras' exaltation of the study of them — this again is hardly consistent with the serious defence of Simonides. (6) The marked approval of Hippias, who is supposed at once to catch the familiar sound, just as in the previous conversation Prodicus is represented as ready to accept any distinctions of language however absurd. At the same time Hippias is desirous of substituting a new interpretation of his own; as if the words might really be made to mean anything, and were only to be regarded as affording a field for the ingenuity of the interpreter.

This curious passage is, therefore, to be regarded as Plato's satire on the tedious and hypercritical arts of interpretation which prevailed in his own day, and may be compared with his condemnation of the same arts when applied to mythology in the Phaedrus, and with his other parodies, e. g. with the second speech in the Phaedrus and with the Menexenus. Several lesser touches of satire appear in it, e. g. the claim of philosophy advanced for the Lacedaemonians, which is a parody of the claims advanced for the Poets by Protagoras; the mistake of the Laconizing set in supposing that the Lacedaemonians are a great nation because they bruise their ears; the far-fetched notion, which is "really too bad," that Simonides uses the Lesbian (?) word, ἐπαίνημι, because he is addressing a Lesbian. The whole may also be considered as a satire on those who spin pompous theories out of nothing.

All the interests and contrasts of character in a great dramatic work like the Protagoras are not easily exhausted. The impressiveness of the scene should not be lost upon us, or the gradual substitution of Socrates in the second part for Protagoras in the first. There is Alcibiades, who is compelled by the necessity of his nature to be a partisan, lending effectual aid to Socrates; there is Critias assuming the tone of impartiality; Callias there as always inclining to the Sophist, but eager for any intellectual repast; Prodicus, who finds an opportunity for displaying his distinctions of language; Hippias, for exhibiting his vanity and superficial knowledge of natural philosophy. Both of these have been previously a good deal damaged by the mock sublime description of them in the introduction. It may be remarked that Protagoras is consistently presented to us throughout as the teacher of moral and political virtue; there is no allusion to the theories of sensation which are attributed to him elsewhere, or to his denial of the existence of the gods; he is the religious rather than the irreligious teacher in this Dialogue. Also it may be observed that Socrates shows him as much respect as is consistent with his own ironical character.

It remains to be considered in what relation the Protagoras stands to the other Dialogues of Plato. That it is one of the earlier or purely Socratic works — perhaps the last, as it is certainly the greatest of them — is indicated by the absence of all allusion to the doctrine of reminiscence; and also probably by the different attitude assumed towards the teaching and persons of the Sophists in some of the later Dialogues. The Charmides, Laches, Lysis, all touch on the question of the relation of knowledge to virtue, and may be regarded, if not as preliminary studies or sketches of the more important work, at any rate as closely connected with it. The Io and Hippias contain discussions of the Poets, which offer a parallel to the ironical criticism of the verses of Simonides, and are conceived in a similar spirit. The affinity of the Protagoras to the Meno is more doubtful. For there, although the same question is discussed, " whether virtue can be taught," and the relation of Meno to the Sophists is much the same as that of Hippocrates, the answer to the question is supplied out of the doctrine of ideas; the real Socrates is already passing into the Platonic one. At a later stage of the Platonic philosophy we shall find that both the paradox and the solution of it appear to have been retracted. The Phaedo, the Gorgias, and the Philebus offer further corrections of the teaching of the Protagoras; in all of them the doctrine that virtue is pleasure,

or that pleasure is the chief or only good, is distinctly renounced.

Thus after many preparations and oppositions, both of the characters of men and aspects of the truth, especially of the popular and philosophical aspect; and after many interruptions and detentions by the way, which, as Theodorus says in the Theaetetus, are quite as agreeable as the argument, we arrive at the great Socratic thesis that virtue is knowledge. This is an aspect of the truth which was lost almost as soon as it was found; and yet has to be recovered by every one for himself who would pass the limits of proverbial and popular philosophy. It is not to be regarded only as a passing stage in the history of the human mind, but as an anticipation of the reconcilement of the moral and intellectual elements of human nature.

PROTAGORAS

PERSONS OF THE DIALOGUE

SOCRATES, *who is the narrator of the Dialogue to his Companion.*
HIPPOCRATES.
ALCIBIADES.
CRITIAS.
PROTAGORAS, HIPPIAS, PRODICUS, *Sophists.*
CALLIAS, *a wealthy Athenian.*

SCENE: — The House of Callias.

Com. WHERE do you come from, Socrates? And yet I need hardly ask the question, as I know that you have been in chase of the fair Alcibiades. I saw him the day before yesterday; and he had got a beard like a man, — and he is a man, as I may tell you in your ear. But I thought that he was still very charming.

Soc. What of his beard? Are you not of Homer's opinion, who says that

> "Youth is most charming when the beard first appears"?

And that is now the charm of Alcibiades.

Com. Well, and how do matters proceed? Have you been visiting him, and was he gracious to you?

Soc. Yes, I thought that he was very gracious; and especially to-day, for I have just come from him, and he has been helping me in an argument. But shall I tell you a strange thing? Although he was present, I never attended to him, and several times he quite passed out of my mind.

Com. What is the meaning of this? Has anything happened between you and him? For surely you can not have discovered a fairer love than he is; certainly not in this city of Athens.

Soc. Yes, much fairer.

Com. What do you mean — a citizen or a foreigner?

Soc. A foreigner.

Com. Of what country?

Soc. Of Abdera.

Com. And is this stranger really in your opinion fairer than the son of Cleinias?

Soc. And is not the wiser always the fairer, sweet friend?

Com. But have you really met, Socrates, with some wise one?

Soc. Yes; I would say rather, with the wisest of all living men, if you are willing to accord that title to Protagoras.

Com. What! Do you mean to say that Protagoras is in Athens?

Soc. Yes; he has been here two days.

Com. And do you just come from an interview with him?

Soc. Yes; and I have heard and said many things.

Com. Then, if you have no engagement, suppose that you sit down and tell me what passed, and my attendant shall give up his place to you.

Soc. To be sure; and I shall be grateful to you for listening.

Com. Thank you, too, for telling us.

Soc. That is thank you twice over. Listen then: —

Last night, or rather very early this morning, Hippocrates, the son of Apollodorus and the brother of Phason, gave a tremendous thump with his staff at my door; some one opened to him, and he came rushing in and bawled out: Socrates, are you awake or asleep?

I knew his voice, and said: Hippocrates, is that you? and do you bring any news?

Good news, he said; nothing but good.

Very good, I said; but what news? and why have you come here at this unearthly hour?

He drew nearer to me and said: Protagoras is come.

Yes, I said; he came two days ago: have you only just heard of his arrival?

Yes, indeed, he said; I heard yesterday evening.

At the same time he felt for the truckle-bed, and sat down at my feet, and then he said: I heard yesterday, quite late in the evening, on my return from Oenoe whither I had gone in pursuit of my runaway slave Satyrus — as I was going to have told you if some other matter had not come in the way; — on my return, when we had done supper and were about to retire to rest, my brother said to me: Protagoras is come. And I was going to you at once, if I had not considered that the night was far spent. But when sleep relaxed her hold on me after my toil, I got up and came hither direct.

I, who knew the very courageous madness of the man, said: What is the matter? has Protagoras robbed you of anything?

He replied, laughing: Yes, indeed he has, Socrates, of the wisdom which he keeps to himself.

But, surely, I said, if you give him money, and make friends with him, he will make you as wise as he is himself.

Would to heaven, he replied, that he would! He might take all that I have, and all that my friends have, if he would. And that is why I have come to you now, in order that you may speak to him on my behalf; for I am young, and also I have never seen nor heard him; (when he visited Athens before I was but a child;) and all men praise him, Socrates, as being the most accomplished of speakers. There is no

reason why we should not go to him at once, and then we shall find him at home. He lodges, as I hear, with Callias the son of Hipponicus. Let us start.

I replied: Not yet, my good friend; the hour is too early. But let us rise and take a turn in the court and wait there until daybreak, and when the day breaks, then we will go; for Protagoras is generally at home, and we shall be sure to find him; never fear.

Upon this we got up and walked about in the court, and I thought that I would make trial of the strength of his resolution. So I examined him and put questions to him. Tell me, Hippocrates, I said, as you are going to Protagoras, and will be paying your money to him, what is he to whom you are going? and what will he make of you? If you were going to Hippocrates, the Coan, the Asclepiad, and were about to give him your money, and some one said to you: As being what, do you give money to your namesake Hippocrates, O Hippocrates? what would you answer?

I should say, he replied, that I give money to him as a physician.

And what will he make of you?

A physician, he said.

And if you went to Polycleitus the Argive, or Pheidias the Athenian, and intended to give them money, and some one were to ask you: As being what, do you give this money to Polycleitus and Pheidias? what would you answer?

I should answer, as being statuaries.

And what will they make of you?

A statuary, of course.

Well now, I said, you and I are going to Protagoras, and we are ready to pay him money for you. If our own means are sufficient, and we can gain him with these, we shall be too glad; but if not,

then we are to spend your friends' money as well. Now suppose, that while we are in this intense state of excitement, some one were to say to us: Tell me, Socrates, and you Hippocrates, as being what, are you going to pay money to Protagoras? how should we answer him? I know that Pheidias is a sculptor, and Homer is a poet; but what appellation is given to Protagoras? how is he designated?

They call him a Sophist, Socrates, he replied.

Then we are going to pay our money to him in the character of a Sophist?

Certainly.

But suppose a person were to ask this further question: And how about yourself? what will Protagoras make you, if you go to see him?

He answered, with a blush upon his face (for the day was just beginning to dawn, so that I could see him): Unless this differs in some way from the former instances, I suppose that he will make a Sophist of me.

And are you not, in sober earnest ashamed, I said, at having to appear before the Hellenes in the character of a Sophist?

Indeed, Socrates, if I am to confess the truth, I am.

But why do you assume, Hippocrates, that the instruction of Protagoras is of this nature? and why may you not learn of him in the same way that you learned the arts of the grammarian, or musician, or trainer, not with the view of making any of them a profession, but only as a part of education, and because a private gentleman and freeman ought to know them?

Just so, he said; and that, in my opinion, is a far truer account of the teaching of Protagoras.

I said: I wonder whether you know what you are doing?

And what am I doing?

You are going to commit your soul to the care of a man whom you call a Sophist. And yet I hardly think that you know what a Sophist is; and if not, then you do not even know whether you are committing your soul to good or evil.

I certainly think that I do know, he replied.

Then tell me, what do you imagine that he is?

I take him to be one who is wise and knowing, he replied, as his name implies.

And might you not, I said, affirm this of the painter and the carpenter also; are not they, too, wise and knowing? But suppose a person were to ask us: In what are the painters wise? We should answer: In what relates to the making of likenesses, and similarly of other things. And if he were further to ask: What is the wisdom of the Sophist, and what is the manufacture over which he presides? how should we answer him?

How should we answer him, Socrates? What other answer could there be but that he presides over the art which makes men eloquent?

Yes, I replied, that is very likely a true, but not a sufficient answer; for a further question is involved: About what does the Sophist make a man eloquent? The player on the lyre may be supposed to make a man eloquent about that which he makes him understand, that is about playing the lyre. Is not that true?

Yes.

Then about what does the Sophist make him eloquent? must not he make him eloquent in that which he understands?

Yes, that may be assumed.

And what is that which the Sophist knows and makes his disciple know?

Indeed, he said, that I can not tell.

Then I proceeded to say: Well, but are you aware of the danger which you are incurring? If you were going to commit the body to some one, and there was a risk of your getting good or harm from him, would you not carefully consider and ask the opinion of your friends and kindred, and deliberate many days as to whether you should give him the care of your body? But when the soul is in question, which you hold to be of far more value than the body, and upon the well or ill-being of which depends your all, — about this you never consulted either with your father or with your brother or with any one of us who are your companions. But no sooner does this foreigner appear, than you instantly commit your soul to his keeping. In the evening, as you say, you hear of him, and in the morning you go to him, never deliberating, or taking the opinion of any one as to whether you ought to intrust yourself to him or not; — you have quite made up your mind that you will be a pupil of Protagoras, and are prepared to expend all the property of yourself and of your friends in carrying out at any price this determination, although, as you admit, you do not know him, and have never spoken with him: and you call him a Sophist, but are manifestly ignorant of what a Sophist is; and yet you are going to commit yourself to his keeping.

When he heard me say this he replied: That I suppose, Socrates, is the conclusion which I must draw from your words.

I proceeded: Is not a Sophist, Hippocrates, one who deals wholesale or retail in the food of the soul? To me that appears to be the sort of man.

And what, Socrates, is the food of the soul?

Surely, I said, knowledge is the food of the soul; and we must take care, my friend, that the Sophist

does not deceive us when he praises what he sells, like the dealers wholesale or retail who sell the food of the body; for they praise indiscriminately all their goods, without knowing what are really beneficial or hurtful: neither do their customers know, with the exception of any trainer or physician who may happen to buy of them. In like manner those who carry about the wares of knowledge, and make the round of the cities, and sell or retail them to any customer who is in want of them, praise them all alike; and I should not wonder, O my friend, if many of them were really ignorant of their effect upon the soul; and their customers equally ignorant, unless he who buys of them happens to be a physician of the soul. If, therefore, you have understanding of what is good and evil, you may safely buy knowledge of Protagoras or of any one; but if not then, O my friend, pause, and do not hazard your dearest interests at a game of chance. For there is far greater peril in buying knowledge than in buying meat and drink: the one you purchase of the wholesale or retail dealer, and carry them away in other vessels, and before you receive them into the body as food, you may deposit them at home and call in any experienced friend who knows what is good to be eaten or drunken, and what not, and how much, and when; and hence the danger of purchasing them is not so great. But when you buy the wares of knowledge you can not carry them away in another vessel; they have been sold to you, and you must take them into the soul and go your way, either greatly harmed or greatly benefited by the lesson: and therefore we should think about this and take counsel with our elders; for we are still young — too young to determine such a matter. And now let us go, as we were intending, and hear Protagoras; and when we have heard what he has to say, we may take counsel

of others; for not only is Protagoras at the house of Callias, but there is Hippias of Elis, and, if I am not mistaken, Prodicus of Ceos, and several other wise men.

To this we agreed, and proceeded on our way until we reached the vestibule of the house; and there we stopped in order to finish a dispute which had arisen as we were going along; and we stood talking in the vestibule until we had finished and come to an understanding. And I think that the door-keeper, who was a eunuch, and who was probably annoyed at the great inroad of the Sophists, must have heard us talking. At any rate, when we knocked at the door, and he opened and saw us, he grumbled: They are Sophists — he is not at home; and instantly gave the door a hearty bang with both his hands. Again we knocked, and he answered without opening: Did you not hear me say that he is not at home, fellows? But, my friend, I said, we are not Sophists, and we are not come to see Callias; fear not, for we want to see Protagoras; and I must request you to announce us. At last, after a good deal of difficulty, the man was persuaded to open the door.

When we entered, we found Protagoras taking a walk in the portico; and next to him, on one side, were walking Callias, the son of Hipponicus, and Paralus, the son of Pericles, who, by the mother's side, is his half-brother, and Charmides, the son of Glaucon. On the other side of him were Xanthippus, the other son of Pericles, Philippides, the son of Philomelus; also Antimoerus of Mende, who of all the disciples of Protagoras is the most famous, and intends to make sophistry his profession. A train of listeners followed him, of whom the greater part appeared to be foreigners, who accompanied Protagoras out of the various cities through which he journeyed.

Now he, like Orpheus, attracted them by his voice, and they followed the attraction. I should mention also that there were some Athenians in the company. Nothing delighted me more than the precision of their movements: they never got into his way at all; but when he and those who were with him turned back, then the band of listeners divided into two parts on either side; he was always in front, and they wheeled round and took their places behind him in perfect order.

After him, as Homer says [1], "I lifted up my eyes and saw" Hippias the Elean sitting in the opposite portico on a chair of state, and around him were seated on benches Eryximachus, the son of Acumenus, and Phaedrus the Myrrhinusian, and Andron the son of Androtion, and there were strangers whom he had brought with him from his native city of Elis, and some others: they appeared to be asking Hippias certain physical and astronomical questions, and he, *ex cathedrà,* was determining their several questions to them, and discoursing of them.

Also, "my eyes beheld Tantalus;" [2] for Prodicus the Cean was at Athens: he had been put into a room which, in the days of Hipponicus, was a storehouse; but, as the house was full, Callias had cleared this out and made the room into a guest-chamber. Now Prodicus was still in bed, wrapped up in sheepskins and bedclothes, of which there seemed to be a great heap; and there were sitting by him on the couches near, Pausanias of the deme of Cerameis, and with Pausanias was a youth quite young, who is certainly remarkable for his good looks, and if I am not mistaken, is also of a fair and gentle nature. I think that I heard him called Agathon, and my suspicion is

[1] Od. xi. 601 foll. [2] Od. xi. 582.

that he is the beloved of Pausanias. There was this youth, and also there were the two Adeimantuses, one the son of Cepis, and the other of Leucolophides, and some others. I was very anxious to hear what Prodicus was saying, for he seemed to me to be an extraordinarily wise and divine man; but I was not able to get into the inner circle, and his fine deep voice made an echo in the room which rendered his words inaudible.

No sooner had we entered than there followed us Alcibiades the beautiful, as you say, and I believe you; and also Critias the son of Callaeschrus.

On entering we stopped a little, in order to look about us, and then walked up to Protagoras, and I said: Protagoras, my friend Hippocrates and I have come to see you.

Do you wish, he said, to speak with me alone, or in the presence of others?

That is as you please, I said: you shall determine when you have heard the object of our visit.

And what is that? he said.

I must explain, I said, that my friend Hippocrates is a native Athenian; he is the son of Apollodorus, and of a great and prosperous house, and he is himself in natural ability quite a match for those of his own age. I believe that he aspires to political eminence; and this he thinks that conversation with you is most likely to procure for him: now it is for you to decide whether you would wish to speak to him of these matters alone or in company.

Thank you, Socrates, for your consideration of me. For certainly a stranger finding his way into great cities, and persuading the flower of the youth in them to leave the company of their other kinsmen or acquaintance, and live with him, under the idea that they will be improved by his conversation, ought to

be very cautious; great jealousies are occasioned by his proceedings, and he is the subject of many enmities and conspiracies. I maintain the art of the Sophist to be of ancient date; but that in ancient times the professors of the art, fearing this odium, veiled and disguised themselves under various names, some under that of poets, as Homer, Hesiod, and Simonides, some as hierophants and prophets, as Orpheus and Musaeus, and some, as I observe, even under the name of gymnastic-masters, like Iccus of Tarentum, or the more recently celebrated Herodicus, now of Selymbria and formerly of Megara, who is a first-rate Sophist. Your own Agathocles pretended to be a musician, but was really an eminent Sophist; also Pythocleides the Cean; and there were many others; and all of them, as I was saying, adopted these arts as veils or disguises because they were afraid of the envy of the multitude. But that is not my way, for I do not believe that they effected their purpose, which was to deceive the government, who were not blinded by them; and as to the people, they have no understanding, and only repeat what their rulers are pleased to tell them. Now to run away, and to be caught in running away, is the very height of folly, and also greatly increases the exasperation of mankind; for they regard him who runs away as a rogue, in addition to any other objections which they have to him; and therefore I take an entirely opposite course, and acknowledge myself to be a Sophist and instructor of mankind; such an open acknowledgment appears to me to be a better sort of caution than concealment. Nor do I neglect other precautions, and therefore I hope, as I may say, by the favor of heaven that no harm will come of the acknowledgment that I am a Sophist. And I have been now many years in the profession — for all my years when added

up are many — and there is no one here present of whom I might not be the father. Wherefore I should much prefer conversing with you, if you do not object, in the presence of the company.

As I suspected that he would like to have a little display and glory in the presence of Prodicus and Hippias, and would gladly show us to them in the light of his admirers, I said: But why should we not summon Prodicus and Hippias and their friends to hear us?

Very good, he said.

Suppose, said Callias, that we hold a council in which you may sit and discuss. This was determined, and great delight was felt at the prospect of hearing wise men talk; we ourselves all took the chairs and benches, and arranged them by Hippias, where the other benches had been already placed. Meanwhile Callias and Alcibiades got up Prodicus and brought in him and his companions.

When we were all seated, Protagoras said: Now that the company are assembled, Socrates, tell me about the young man of whom you were just now speaking.

I replied: I will begin again at the same point, Protagoras, and tell you once more the purport of my visit: this is my friend Hippocrates, who is desirous of making your acquaintance; he wants to know what will happen to him if he associates with you. That is all I have to say.

Protagoras answered: Young man, if you associate with me, on the very first day you will return home a better man than you came, and better on the second day than on the first, and better every day than you were on the day before.

When I heard this, I said: Protagoras, I do not at all wonder at hearing you say this; even at your

age, and with all your wisdom, if any one were to teach you what you did not know before, you would become better no doubt: but please to answer in a different way; I will explain how by an example. Let me suppose that Hippocrates, instead of desiring your acquaintance, wished to become acquainted with the young man Zeuxippus of Heraclea, who has newly come to Athens, and he were to go to him as he has gone to you, and were to hear him say, as he has heard you say, that every day he would grow and become better if he associated with him: and then suppose that he were to ask him, "In what would he be better, and in what would he grow?" Zeuxippus would answer, "In painting." And suppose that he went to Orthagoras the Theban, and heard him say the same, and asked him "In what would he become better day by day?" he would reply, "In flute-playing." Now I want you to make the same sort of answer to this young man and to me, who am asking questions on his account. When you say that on the first day on which he associates with you he will return home a better man, and on every day will grow in like manner — in what, Protagoras, will he be better? and about what?

When Protagoras heard me say this, he replied: You ask questions fairly, and I like to answer a question which is fairly put. If Hippocrates comes to me he will not experience the sort of drudgery with which other Sophists are in the habit of insulting their pupils; who, when they have just escaped from the arts, are taken and driven back into them by these teachers, and made to learn calculation, and astronomy, and geometry, and music (he gave a look at Hippias as he said this); but if he comes to me, he will learn that which he comes to learn. And this is prudence in affairs private as well as public; he will learn

to order his own house in the best manner, and he will be best able to speak and act in the affairs of the state.

Do I understand you, I said; and is your meaning that you teach the art of politics, and that you promise to make men good citizens?

That, Socrates, is exactly the profession which I make.

Then, I said, you do indeed possess a noble art, if there is no mistake about this; for I will freely confess to you, Protagoras, that I have a doubt whether this art is capable of being taught, and yet I know not how to disbelieve your assertion. And I ought to tell you why I am of opinion that this art can not be taught or communicated by man to man. I say that the Athenians are an understanding people, as indeed they are esteemed by the other Hellenes. Now I observe that when we are met together in the assembly, and the matter in hand relates to building, the builders are summoned as advisers; when the question is one of ship-building, then the ship-builders; and the like of other arts which they think capable of being taught and learned. And if some person offers to give them advice who is not supposed by them to have any skill in the art, even though he be good-looking, and rich, and noble, they don't listen to him, but laugh at him, and hoot him, until either he is clamored down and retires of himself; or if he persist, he is dragged away or put out by the constables at the command of the prytanes. This is their way of behaving about the arts which have professors. When, however, the question is an affair of state, then everybody is free to have a say — carpenter, tinker, cobbler, sailor, passenger; rich and poor, high and low — any one who likes gets up, and no one reproaches him, as in the former case, with not having learned, and having no

teacher, and yet giving advice; evidently because they are under the impression that this sort of knowledge can not be taught. And not only is this true of the state, but of individuals; the best and wisest of our citizens are unable to impart their political wisdom to others: as for example, Pericles, the father of these young men, who gave them excellent instruction in all that could be learned from masters, in his own department of politics taught them nothing; nor did he give them teachers, but they were allowed to wander at their own free will in a sort of hope that they would light upon virtue of their own accord. Or take another example: there was Cleinias the younger brother of our friend Alcibiades, of whom this very same Pericles was the guardian; and he being in fact under the apprehension that Cleinias would be corrupted by Alcibiades, took him away, and placed him in the house of Ariphron to be educated; but before six months had elapsed, Ariphron sent him back, not knowing what to do with him. And I could mention numberless other instances of persons who were good themselves, and never yet made any one else good, whether friend or stranger. Now I, Protagoras, when I reflect on all this, am inclined to think that virtue can not be taught. But then again, when I listen to your words, I am disposed to waver; and I believe that there must be something in what you say, because I know that you have great experience, and learning, and invention. And I wish that you would, if possible, show me a little more clearly that virtue can be taught. Will you be so good?

That I will, Socrates, and gladly. But what would you like? Shall I, as an elder, speak to you as younger men in an apologue or myth, or shall I argue the question?

To this several of the company answered that he should choose for himself.

Well, then, he said, I think that the myth will be more interesting.

Once upon a time there were gods only, and no mortal creatures. But when the time came that these also should be created, the gods fashioned them out of earth and fire and various mixtures of both elements in the inward parts of the earth; and when they were about to bring them into the light of day, they ordered Prometheus and Epimetheus to equip them, and to distribute to them severally their proper qualities. Epimetheus said to Prometheus: "Let me distribute, and do you inspect." This was agreed, and Epimetheus made the distribution. There were some to whom he gave strength without swiftness, or again swiftness without strength; some he armed, and others he left unarmed; and devised for the latter some other means of preservation, making some large, and having their size as a protection, and others small, whose nature was to fly in the air or burrow in the ground; this was to be their way of escape. Thus did he compensate them with the view of preventing any race from becoming extinct. And when he had provided against their destruction by one another, he contrived also a means of protecting them against the seasons of heaven; clothing them with close hair and thick skins sufficient to defend them against the winter cold and summer heat, and for a natural bed of their own when they wanted to rest; also he furnished them with hoofs and hair and hard and callous skins under their feet. Then he gave them varieties of food, — to some herb of the soil, to others fruits of trees, and to others roots, and to some again he gave other animals as food. And some he made to have few young ones, while those who were their prey were

very prolific; and in this way the race was preserved. Thus did Epimetheus, who, not being very wise, forgot that he had distributed among the brute animals all the qualities that he had to give, — and when he came to man, who was still unprovided, he was terribly perplexed. Now while he was in this perplexity, Prometheus came to inspect the distribution, and he found that the other animals were suitably furnished, but that man alone was naked and shoeless, and had neither bed nor arms of defence. The appointed hour was approaching in which man was to go forth into the light of day; and Prometheus, not knowing how he could devise his salvation, stole the mechanical arts of Hephaestus and Athene, and fire with them (they could neither have been acquired nor used without fire), and gave them to man. Thus man had the wisdom necessary to the support of life, but political wisdom he had not; for that was in the keeping of Zeus, and the power of Prometheus did not extend to entering into the castle of heaven, in which Zeus dwelt, who moreover had terrible sentinels; but he did enter by stealth into the common workshop of Athene and Hephaestus, in which they used to pursue their favorite arts, and took away Hephaestus' art of working by fire, and also the art of Athene, and gave them to man. And in this way man was supplied with the means of life. But Prometheus is said to have been afterwards prosecuted for theft, owing to the blunder of Epimetheus.

Now man, having a share of the divine attributes, was at first the only one of the animals who had any gods, because he alone was of their kindred; and he would raise altars and images of them. He was not long in inventing language and names; and he also constructed houses and clothes and shoes and beds, and drew sustenance from the earth. Thus provided,

mankind at first lived dispersed, and there were no cities. But the consequence was that they were destroyed by the wild beasts, for they were utterly weak in comparison of them, and their art was only sufficient to provide them with the means of life, and would not enable them to carry on war against the animals: food they had, but not as yet any art of government, of which the art of war is a part. After a while the desire of self-preservation gathered them into cities; but when they were gathered together, having no art of government, they evil intreated one another, and were again in process of dispersion and destruction. Zeus feared that the race would be exterminated, and so he sent Hermes to them, bearing reverence and justice to be the ordering principles of cities and the bonds of friendship and conciliation. Hermes asked Zeus how he should impart justice and reverence among men: — should he distribute them as the arts are distributed; that is to say, to a favored few only, — for one skilled individual has enough of medicine, or of any other art, for many unskilled ones? Shall this be the manner in which I distribute justice and reverence among men, or shall I give them to all? To all, said Zeus; I should like them all to have a share; for cities can not exist, if a few only share in the virtues, as in the arts. And further, make a law by my order, that he who has no part in reverence and justice shall be put to death as a plague of the state.

And this is the reason, Socrates, why the Athenians and mankind in general, when the question relates to carpentering or any other mechanical art, allow but a few to share in their deliberations; and when any one else interferes, then, as you say, they object, if he be not of the favored few, and that, as I say, is very natural. But when they come to deliberate about

political virtue, which proceeds only by way of justice and wisdom, they are patient enough of any man who speaks of them, as is also natural, because they think that every man ought to share in this sort of virtue, and that states could not exist if this were otherwise. I have explained to you, Socrates, the reason of this phenomenon.

And that you may not suppose yourself to be deceived in thinking that all men regard every man as having a share of justice and every other political virtue, let me give you a further proof, which is this. In other cases, as you are aware, if a man says that he is a good flute-player, or skilful in any other art in which he has no skill, people either laugh at him or are angry with him, and his relations think that he is mad and go and admonish him; but when honesty is in question, or some other political virtue, even if they know that he is dishonest, yet, if the man comes publicly forward and tells the truth about his dishonesty, in this case they deem that to be madness which in the other case was held by them to be good sense. They say that men ought to profess honesty whether they are honest or not, and that a man is mad who does not make such a profession. Their notion is, that a man must have some degree of honesty; and that if he has none at all he ought not to be in the world.

I have been showing that they are right in admitting every man as a counsellor about this sort of virtue, as they are of opinion that every man is a partaker of it. And I will now endeavor further to show that they regard this virtue, not as given by nature, or growing spontaneously, but as capable of being learned and acquired by study. For injustice is punished, whereas no one would instruct, or rebuke, or be angry at those whose calamities they suppose to

come to them either by nature or chance; they do not try to alter them, they do but pity them. Who would be so foolish as to chastise or instruct the ugly, or the diminutive, or the feeble? And for this reason; they know, I imagine, that this sort of good and evil comes to them by nature and chance; whereas if a man is wanting in those good qualities which come to men from study and exercise and teaching, and has only the contrary evil qualities, men are angry with him, and punish him and reprove him. And one of those evil qualities is impiety and injustice, and they may be described generally as the opposite of political virtue. When this is the case, any man will be angry with another, and reprimand him, — clearly under the impression that by study and learning the virtue in which he is deficient may be acquired. For if you will think, Socrates, of the effect which punishment has on evil-doers, you will see at once that in the opinion of mankind virtue may be acquired; for no one punishes the evil-doer under the notion, or for the reason, that he has done wrong, — only the unreasonable fury of a beast acts in that way. But he who desires to inflict rational punishment does not retaliate for a past wrong, for that which is done can not be undone, but he has regard to the future, and is desirous that the man who is punished, and he who sees him punished, may be deterred from doing wrong again. And he implies that virtue is capable of being taught; as he undoubtedly punishes for the sake of prevention. This is the notion of all who retaliate upon others either privately or publicly. And the Athenians, too, like other men, retaliate on those whom they regard as evil-doers; and this argues them to be of the number of those who think that virtue may be acquired and taught. Thus far, Socrates, I have shown you clearly enough, if I am not mistaken, that your coun-

trymen are right in admitting the tinker and the cobbler to advise about politics, and also that they deem virtue to be capable of being taught and acquired.

There yet remains one difficulty which has been raised by you about the sons of good men. What is the reason why good men teach their sons the knowledge which is gained from teachers, and make them wise in that, but do nothing towards improving them in the virtues which distinguish themselves? And here, Socrates, I will leave the apologue and take up the argument. Please to consider: Is there or is there not some one quality in which all the citizens must be partakers, if there is to be a city at all? In the answer to this question is contained the only solution of your difficulty; there is no other. For if there be any such quality, and this quality or unity is not the art of the carpenter, or the smith, or the potter, but justice and temperance and holiness and, in a word, manly virtue — if this is the quality of which all men must be partakers, and which is the very condition of their learning or doing anything else, and if he who is wanting in this, whether he be a child only or a grown-up man or woman, must be taught and punished, until by punishment he becomes better, and he who rebels against instruction and punishment is either exiled or condemned to death under the idea that he is incurable — if, I say, this be true, and nevertheless good men have their sons taught other things and not this, do consider how extraordinary would be their conduct. For we have shown that they think virtue capable of being taught and inculcated both in private and public; and yet, notwithstanding this, they teach their sons lesser matters, ignorance of which does not involve the punishment of death: but those things, the ignorance of which may cause death and exile to those who have no knowledge or training —

aye, and confiscation as well as death, and, in a word, may be the ruin of families — those things, I say, they are supposed not to teach them, — not to take the utmost care that they should learn. That is not likely, Socrates.

Education and admonition commence in the first years of childhood, and last to the very end of life. Mother and nurse and father and tutor are quarrelling about the improvement of the child as soon as ever he is able to understand them: he can not say or do anything without their setting forth to him that this is just and that is unjust; this is honorable, that is dishonorable; this is holy, that is unholy; do this and abstain from that. And if he obeys, well and good; if not, he is straightened by threats and blows, like a piece of warped wood. At a later stage they send him to teachers, and enjoin them to see to his manners even more than to his reading and music; and the teachers do as they are desired. And when the boy has learned his letters and is beginning to understand what is written, as before he understood only what was spoken, they put into his hands the works of great poets, which he reads at school; in these are contained many admonitions, and many tales, and praises, and encomia of ancient famous men, which he is required to learn by heart, in order that he may imitate or emulate them and desire to become like them. Then, again, the teachers of the lyre take similar care that their young disciple is temperate and gets into no mischief; and when they have taught him the use of the lyre, they introduce him to the poems of other excellent poets, who are the lyric poets; and these they set to music, and make their harmonies and rhythms quite familiar to the children, in order that they may learn to be more gentle, and harmonious, and rhythmical, and so more fitted for speech and

action; for the life of man in every part has need of harmony and rhythm. Then they send them to the master of gymnastic, in order that their bodies may better minister to the virtuous mind, and that the weakness of their bodies may not force them to play the coward in war or on any other occasion. This is what is done by those who have the means, and those who have the means are the rich; their children begin education soonest and leave off latest. When they have done with masters, the state again compels them to learn the laws, and live after the pattern which they furnish, and not after their own fancies; and just as in learning to write, the writing-master first draws lines with a style for the use of the young beginner, and gives him the tablet and makes him follow the lines, so the city draws the laws, which were the invention of good lawgivers who were of old time; these are given to the young man, in order to guide him in his conduct whether as ruler or ruled; and he who transgresses them is to be corrected, or, in other words, called to account, which is a term used not only in your country, but also in many others. Now when there is all this care about virtue private and public, why, Socrates, do you still wonder and doubt whether virtue can be taught? Cease to wonder, for the opposite would be far more surprising.

But why then do the sons of good fathers often turn out ill? Let me explain that, — which is far from being wonderful, if, as I have been saying, the very existence of the state implies that virtue is not any man's private possession. If this be true — and nothing can be truer — then I will ask you to imagine, as an illustration, some other pursuit or branch of knowledge which may be assumed equally to be the condition of the existence of a state. Suppose that there could be no state unless we were all flute-players,

as far as each had the capacity, and everybody was freely teaching everybody the art, both in private and public, and reproving the bad player as freely and openly as every man now teaches justice and the laws, not concealing them as he would conceal the other arts, but imparting them — for all of us have a mutual interest in the justice and virtue of one another, and this is the reason why every one is ready to teach justice and the laws; — suppose, I say, that there were the same readiness and liberality among us in teaching one another flute-playing, do you imagine, Socrates, that the sons of good flute-players would be more likely to be good than the sons of bad ones? I think not. Would not their sons grow up to be distinguished or undistinguished according to their own natural capacities as flute-players, and the son of a good player would often turn out to be a bad one, and the son of a bad player to be a good one, and all flute-players would be good enough in comparison of those who were ignorant and unacquainted with the art of flute-playing? In like manner I would have you consider that he who appears to you to be the worst of those who have been brought up in laws and humanities, would appear to be a just man and a master of justice if he were to be compared with men who had no education, or courts of justice, or laws, or any restraints upon them which compelled them to practise virtue — with the savages, for example, whom the poet Pherecrates exhibited on the stage at the last year's Lenaean festival. If you were living among men such as the man-haters in his Chorus, you would be only too glad to meet with Eurybates and Phrynondas, and you would sorrowfully desire the rascality of this part of the world. And you, Socrates, are discontented, and why? Because all men are teachers of virtue, each one according to his ability, and you

say that there is no teacher. You might as well ask, Who teaches Greek? For of that too there will not be any teachers found. Or you might ask, Who is to teach the sons of our artisans this same art which they have learned of their fathers? He and his fellow-workmen have taught them to the best of their ability, — but who will carry them further in their arts? And you would certainly have a difficulty, Socrates, in finding a teacher of them; but there would be no difficulty in finding a teacher of those who are wholly ignorant. And this is true of virtue or of anything; and if a man is better able than we are to promote virtue ever so little, that is as much as we can expect. A teacher of this sort I believe myself to be, and above all other men to have the knowledge which makes a man noble and good; and I give my pupils their money's-worth, and even more, as they themselves confess. And therefore I have introduced the following mode of payment: — When a man has been my pupil, if he likes he pays my price, but there is no compulsion; and if he does not like, he has only to go into a temple and take an oath of the value of the instructions, and he pays no more than he declares to be their value.

Such is my Apologue, Socrates, and such is the argument by which I endeavor to show that virtue may be taught, and that this is the opinion of the Athenians. And I have also attempted to show that you are not to wonder at good fathers having bad sons, or at good sons having bad fathers, as may be seen in the sons of Polycleitus, who are of the same age as our friends Paralus and Xanthippus, and who are very inferior to their father; and this is true of many other artists. But I ought not to say the same as yet of Paralus and Xanthippus themselves, for they are young and there is still hope of them.

Protagoras ended, and in my ear

"So charming left his voice, that I the while
Thought him still speaking; still stood fixed to hear."

At length, when I saw that he had really finished, I gradually recovered consciousness, and looking at Hippocrates, I said to him: O son of Apollodorus, how deeply grateful I am to you for having brought me hither; I would not have missed the speech of Protagoras for a great deal. For I used to imagine that no human care could make men good; but I know better now. Yet I have still one very small difficulty which I am sure that Protagoras will easily explain, as he has already explained so much. For if a man were to go and consult Pericles or any of our great speakers about these matters, he might perhaps hear as fine a discourse; but then if any one has a question to ask of any of them, like books, they can neither answer nor ask; and if any one challenges the least particular of their speech, they go ringing on in a long harangue, like brazen pots, which when they are struck continue to sound unless some one puts his hand upon them; whereas our friend Protagoras can not only make a good speech, as he has already shown, but when he is asked a question he can answer briefly; and when he asks he will wait and hear the answer; and this is a very rare gift. Now I, Protagoras, have a little question that I want to ask of you, and if you will only answer me that, I shall be quite satisfied. You were saying that virtue can be taught; — that I will take upon your authority, and there is no one to whom I am more ready to trust. But I marvel at one thing about which I should like to have my mind set at rest. You were speaking of Zeus sending justice and reverence to men; and several times while you were speaking justice, and temperance, and holiness, and all these qualities, were described by you as

if together they made up virtue. Now I want you to tell me truly whether virtue is one whole, of which justice and temperance and holiness are parts; or whether all these are only the names of one and the same thing: that is the doubt which still lingers in my mind.

There is no difficulty, Socrates, in answering that the qualities of which you are speaking are the parts of virtue which is one.

And are they parts, I said, in the same sense in which mouth, nose, and eyes, and ears, are the parts of a face; or are they like the parts of gold, which differ from the whole and from one another only in being larger or smaller?

I should say that they differed, Socrates, in the first way; as the parts of a face are related to the whole face.

And do men have some one part and some another part of virtue? Or if a man has one part, must he also have all the others?

By no means, he said; for many a man is brave and not just, or just and not wise.

Why then, I said, courage and wisdom are also parts of virtue?

Most undoubtedly, he said; and wisdom is the noblest of the parts.

And they are all different from one another? I said.

Yes.

And each of them has a distinct function like the parts of the face; — the eye, for example, is not like the ear, and has not the same functions; and the other parts are none of them like one another, either in their functions, or in any other way? Now I want to know whether the parts of virtue do not also differ in themselves and in their functions; as that is clearly what the simile would imply.

Yes, Socrates, you are right in that.

Then, I said, no other part of virtue is like knowledge, or like justice, or like courage, or like temperance, or like holiness?

No, he answered.

Well then, I said, suppose that you and I inquire into their natures. And first, you would agree with me that justice is of the nature of a thing, would you not? That is my opinion, would not that be yours also?

Yes, he said; that is mine also.

And suppose that some one were to ask us, saying, O Protagoras, and you Socrates, what about this thing which you just now called justice, is it just or unjust? And I were to answer, just: and you — would you vote for me or against me?

With you, he said.

Thereupon I should answer to him who asked me, that justice is of the nature of the just: would not you?

Yes, he said.

And suppose that he went on to say: Well now, is there such a thing as holiness? — we should answer, Yes, if I am not mistaken?

Yes, he said.

And that you acknowledge to be a thing — should we admit that?

He assented.

And is this a sort of thing which is of the nature of the holy, or of the nature of the unholy? I should be angry at his putting such a question, and should say, Peace, man; nothing can be holy if holiness is not holy. What do you say to that? Would you not answer in the same way?

Certainly, he said.

And then after this suppose that he came and asked

us, What were you saying just now? Perhaps I may not have heard you rightly, but you seemed to me to be saying that the parts of virtue were not the same as one another. I should reply, You certainly heard that said, but you did not, as you think, hear me say that; for Protagoras gave the answer, and I did but ask the question. And suppose that he turned to you and said, Is this true, Protagoras? and do you maintain that one part of virtue is unlike another, and is this your position? how would you answer him?

I could not help acknowledging the truth of what he said, Socrates.

Well then, Protagoras, assuming this, and supposing that he proceeded to say further, Then holiness is not of the nature of justice, nor justice of the nature of holiness, but of the nature of unholiness; and holiness is of the nature of the not just, and therefore of the unjust, and the unjust is unholy; how shall we answer him? I should certainly answer him on my own behalf that justice is holy, and that holiness is just; and I would say in like manner on your behalf also, if you would allow me, that justice is either the same with holiness, or very nearly the same; and I would most assuredly say that justice is like holiness and holiness is like justice; and I wish that you would tell me whether I may be permitted to give this answer on your behalf, and whether you would agree with me.

He replied, I can not simply agree, Socrates, to the proposition that justice is holy and that holiness is just, for there appears to me to be a difference between them. But what matter? if you please I please; and let us assume, if you will, that justice is holy, and that holiness is just.

Pardon me, I said; I do not want this "if you wish" or "if you will" sort of argument to be proven, but I want you and me to be proven; and I mean by

this that the argument will be best proven if there be no " if."

Well, he said, I admit that justice bears a resemblance to holiness, for there is always some point of view in which everything is like every other thing; white is in a certain way like black, and hard is like soft, and the most extreme opposites have some qualities in common; even the parts of the face which, as we were saying before, are distinct and have different functions, are still in a certain point of view similar, and one of them is like another of them. And you may prove that they are like one another on the same principle that all things are like one another; and yet things which are alike in some particular ought not to be called alike, nor things which are unlike in some particular, however slight, unlike.

And do you think, I said, in a tone of surprise, that justice and holiness have but a small degree of likeness?

Certainly not, he said; but I do not agree with what I understand to be your view.

Well, I said, as you appear to have a difficulty about this, let us take another of the examples which you mentioned instead. Do you admit the existence of folly?

I do.

And is not wisdom the very opposite of folly?

That is true, he said.

And when men act rightly and advantageously they seem to you to be temperate or moderate?

Yes, he said.

And moderation makes them moderate?

Certainly.

And they who do not act rightly act foolishly, and in thus acting are not moderate?

I agree to that, he said.

Then to act foolishly is the opposite of acting moderately?

He assented.

And foolish actions are done by folly, and moderate or temperate actions by moderation?

He agreed.

And that is done strongly which is done by strength, and weakly which is done by weakness?

He assented.

And that which is done with swiftness is done swiftly, and that which is done with slowness, slowly?

He acknowledged that.

And if anything is done in the same way, that is done by the same; and if anything is done in an opposite way, by the opposite?

He agreed.

Once more, I said, is there anything beautiful?

Yes.

To which the only opposite is the ugly?

There is no other.

And is there anything good?

There is.

To which the only opposite is the evil?

There is no other.

And there is the acute in sound?

True.

To which the only opposite is the grave?

There is no other, he said, but that.

Then every opposite has one opposite only and no more?

He assented.

Then now, I said, let us recapitulate our admissions. First of all we admitted that everything has one opposite and not more than one?

To that we assented.

And we admitted also that what was done in opposite ways was done by opposites?

Yes.

And that which was done foolishly, as we also admitted, was done in the opposite way to that which was done moderately?

Yes.

And that which was done moderately was done by moderation or temperance, and that which was done foolishly by folly?

He agreed.

And that which is done in opposite ways is done by opposites?

Yes.

And one thing is done by moderation or temperance, and quite another thing by folly?

Yes.

And those are opposite ways?

Certainly.

And therefore done by opposites. Then folly is the opposite of moderation or temperance?

That is evident.

And do you remember that folly has already been acknowledged by us to be the opposite of wisdom?

He assented.

And we said that everything has only one opposite?

Yes.

Then, Protagoras, which of the two assertions shall we renounce? One says that everything has but one opposite; the other that wisdom is distinct from temperance or moderation, and that both of them are parts of virtue; and that they are not only distinct, but unlike, both in themselves and in their functions, like the parts of a face. Which of these two assertions shall we renounce? For both of them together are certainly not in harmony; they do not accord or agree:

for how can they be said to agree if everything is assumed to have only one opposite and not more than one, and yet folly, which is one, has clearly the two opposites — wisdom and temperance? Is not that true, Protagoras? I said. What else would you say?

He assented, but with great reluctance.

Then temperance and wisdom are the same, as before justice and holiness appeared to us to be nearly the same. And now, Protagoras, I said, do not let us be faint-hearted, but let us complete what remains. Do you think that an unjust man can be temperate in his injustice?

I should be ashamed, Socrates, he said, to acknowledge this, which nevertheless many may be found to assert.

And shall I argue with them or with you? I replied.

I would rather, he said, that you should argue with the many first, if you will.

Whichever you please, if you will only answer me and say whether you are of their opinion or not. My object is to test the validity of the argument; and yet the result may be that I and you who ask and answer may also be put on our trial.

Protagoras at first made a show of refusing, as he said that the argument was not encouraging; at length, however, he consented to answer.

Now then, I said, begin at the beginning and answer me. You think that some men are moderate or temperate, and yet unjust?

Yes, he said; let that be admitted.

And moderation is good sense?

Yes.

And good sense is good counsel in doing justice?

Granted.

If they succeed, I said, or if they don't succeed?

If they succeed.

And you would admit the existence of goods?

Yes.

And is the good that which is expedient for man?

Yes, indeed, he said; and there are some things which may be inexpedient, and yet I call them good.

I thought that Protagoras was getting ruffled and excited; he seemed to be setting himself in an attitude of war. Seeing this, I minded my business and gently said: —

When you say, Protagoras, that things inexpedient are good, do you mean inexpedient for man only, or inexpedient altogether? and do you call the latter good?

Certainly not the last, he replied; for I know of many things, meats, drinks, medicines, and ten thousand other things, which are partly expedient for man, and partly inexpedient; and some which are expedient for horses, and not for men; and some for oxen only, and some for dogs; and some for no animals, but only for trees; and some for the roots of trees and not for their branches, as for example, manure, which is a good thing when laid about the roots, but utterly destructive if thrown upon the shoots and young branches; or I may instance olive oil, which is mischievous to all plants, and generally most injurious to the hair of every animal with the exception of man, but beneficial to human hair and to the human body generally; and even in this application (so various and changeable is the nature of the benefit) that which is the greatest good to the outward parts of a man, is a very great evil to his inward parts: and for this reason physicians always forbid their patients the use of oil in their food, except in very small quantities, just sufficient to take away the disagreeable sensation of smell in meats and sauces.

When he had given this answer, the company cheered him. And I said: Protagoras, I have a wretched memory, and when any one makes a long speech to me I never remember what he is talking about. As then, if I had been deaf, and you were going to converse with me, you would have had to raise your voice; so now, having such a bad memory, I will ask you to cut your answers short, if you would take me with you.

What do you mean? he said: how am I to shorten my answers? shall I make them too short?

Certainly not, I said.

But short enough? he said.

Yes, I said.

Shall I answer what appears to me to be short enough, or what appears to you to be short enough?

I have heard, I said, that you can speak and teach others to speak about the same things at such length that words never seemed to fail, or with such brevity that no one could use fewer of them. Please therefore, if you talk with me, to adopt the latter or more compendious method.

Socrates, he replied, many a battle of words have I fought, and if I had followed the method of disputation which my adversaries desired, as you want me to do, I should have been no better than another, and the name of Protagoras would have been nowhere.

I saw that he was not satisfied with his previous answers, and that he would not play the part of answerer any more if he could help; and I considered that there was no call upon me to continue the conversation; so I said: Protagoras, I don't wish to force the conversation upon you if you had rather not, but when you are willing to argue with me in such a way that I

can follow you, then I will argue with you. Now you, as is said of you by others and as you say of yourself, are able to have discussions in shorter forms of speech as well as in longer, for you are a master of wisdom; but I can not manage these long speeches: I only wish that I could. You, on the other hand, who are capable of either, ought to speak shorter as I beg you, and then we might converse. But I see that you are disinclined, and as I have an engagement which will prevent my staying to hear you at length (for I have to be in another place), I will depart; although I should have liked to have heard you.

Thus I spoke, and was rising from my seat, when Callias seized me by the hand, and in his left hand caught hold of this old cloak of mine. He said: We can not let you go, Socrates, for if you leave us there will be an end of our discussions: I must therefore beg you to remain, as there is nothing in the world that I should like better than to hear you and Protagoras discourse. Do not deny the company this pleasure.

Now I had got up, and was in the act of departure. Son of Hipponicus, I replied, I have always admired, and do now heartily applaud and love your philosophical spirit, and I would gladly comply with your requests, if I could. But the truth is that I can not. And what you ask is as great an impossibility to me, as if you bade me run a race with Crison of Himera, when in his prime, or with some one of the long or day course runners. To that I should reply, that I humbly make the same request to my own legs; and they can't comply. And therefore if you want to see Crison and me in the same stadium, you must bid him slacken his speed to mine, for I can not run quickly, and he can run slowly. And in like manner if you want to hear me and Protagoras discoursing, you

must ask him to shorten his answers, and keep to the point, as he did at first; if not, how can there be any discussion? For discussion is one thing, and making an oration is quite another, according to my way of thinking.

But you see, Socrates, said Callias, that Protagoras may fairly claim to speak in his own way, just as you claim to speak in yours.

Here Alcibiades interposed, and said: That, Callias, is not a fair statement of the case. For our friend Socrates admits that he can not make a speech — in this he yields the palm to Protagoras; but I should be greatly surprised if he yielded to any living man in the power of holding and apprehending an argument. Now if Protagoras will make a similar admission, and confess that he is inferior to Socrates in argumentative skill, that is enough for Socrates; but if he claims a superiority in argument as well, let him ask and answer — not, when a question is asked, having recourse to shifts and evasions, and instead of answering, making a speech at such length that most of his hearers forget the question at issue (not that Socrates is likely to forget — I will be bound for that, although he may pretend in fun that he has a bad memory). And Socrates appears to me to be more in the right than Protagoras; that is my opinion, and every man ought to say what he thinks.

When Alcibiades had done speaking, some one — Critias, I believe — went on to say: O Prodicus and Hippias, Callias appears to me to be a partisan of Protagoras. And this led Alcibiades, who loves opposition, to take the other side. But we should not be partisans either of Socrates or Protagoras; let us rather unite in entreating both of them not to break up the discussion.

Prodicus added: That, Critias, seems to me to be

well said, for those who are present at such discussions ought to be impartial hearers of both the speakers; remembering, however, that impartiality is not the same as equality, for both sides should be impartially heard, and yet an equal meed should not be assigned to both of them; but to the wiser a higher meed should be given, and a lower to the less wise. And I as well as Critias would beg you, Protagoras and Socrates, to grant our request, which is, that you will argue with one another and not wrangle; for friends argue with friends out of good will, but only adversaries and enemies wrangle. And then our meeting will be delightful; for in this way you, who are the speakers, will be most likely to win esteem, and not praise only, among us who are your audience; for esteem is a sincere conviction of the hearers' souls, but praise is often an insincere expression of men uttering words contrary to their conviction. And thus we who are the hearers will be gratified and not pleased; for gratification is of the mind when receiving wisdom and knowledge, but pleasure is of the body when eating or experiencing some other bodily delight. Thus spoke Prodicus, and many of the company applauded his words.

Hippias the sage spoke next. He said: All of you who are here present I reckon to be kinsmen and friends and fellow-citizens, by nature and not by law; for by nature like is akin to like, whereas law is the tyrant of mankind, and often compels us to do many things which are against nature. How great would be the disgrace then, if we, who know the nature of things, and are the wisest of the Hellenes, and as such are met together in this city, which is the metropolis of wisdom, and in the greatest and most glorious house of this city, should have nothing to show worthy of this height of dignity, but should only quarrel with

one another like the meanest of mankind. I do pray and advise you, Protagoras, and you, Socrates, to agree upon a compromise. Let us be your peacemakers. And do not you, Socrates, aim at this precise and extreme brevity in discourse, if Protagoras objects, but loosen and let go the reins of speech, that your words may be grander and become you better. Neither do you, Protagoras, go forth on the gale with every sail set out of sight of land into an ocean of words, but let there be a mean observed by both of you. Do as I say. And let me also suggest and suppose further, that you choose an arbiter or overseer or president; he will keep watch over your words and reduce them to their proper length.

This proposal was received by the company with universal approval; and Callias said that he would not let me off, and that I was to choose an arbiter. But I said that to choose an umpire of discourse would be unseemly; for if the person chosen was inferior, then the inferior or worse ought not to preside over the better; or if he was equal, neither would that be well; for he who is our equal will do as we do, and what will be the use of choosing him? And if you say "Let us have a better then," to that I answer that you can not have any one who is wiser than Protagoras. And if you choose another who is not really better, and whom you only say is better, to put another over him as though he were an inferior person would be an unworthy reflection on him; not that, as far as I am concerned, any reflection is of much consequence to me. Let me tell you then what I will do in order that the conversation and discussion may go on as you desire. If Protagoras is not disposed to answer, let him ask and I will answer; and I will endeavor to show at the same time how, as I maintain, he ought to answer: and when I have answered as many ques-

tions as he likes to ask, let him in like manner answer; and if he seems to be not very ready at answering the exact questions, you and I will unite in entreating him, as you entreated me, not to spoil the discussion. And this will require no special arbiter: you shall all of you be arbiters.

This was generally approved, and Protagoras, though very much against his will, was obliged to agree that he would ask questions; and when he had put a sufficient number of them, that he would answer in his turn those which he was asked in short replies. He began to put his questions as follows: —

I am of opinion, Socrates, he said, that skill in poetry is the principal part of education; and this I conceive to be the power of knowing what compositions of the poet are correct, and what are not, and how they are to be distinguished, and of explaining them when asked. And I propose to transfer the question which you and I have been discussing to the domain of poetry, speaking as before of virtue, but in reference to a passage of a poet. Now Simonides says to Scopas the Son of Creon the Thessalian: —

"Hardly on the one hand can a man become truly good; built four-square in hands and feet and mind, a work without a flaw."

Do you know the poem? or shall I repeat the whole?

There is no need, I said; for I am perfectly well acquainted with the ode, of which I have made a careful study.

Very good, he said. And do you think that the ode is a good composition, and true?

Yes, I said, both good and true.

But if there is a contradiction, can the composition be good or true?

No, not in that case, I replied.

And is there not a contradiction? he asked. Reflect.

Well, my friend, I have reflected.

And does not the poet proceed to say, "I do not agree with the word of Pittacus, albeit the utterance of a wise man; hardly," says he, "can a man be good." Now you will observe that this is said by the same poet.

I know that, I said.

And do you think, he said, that the two sayings are consistent?

Yes, I said, I think they are (at the same time I could not help fearing that there might be something in what he said). And do you think otherwise? I said.

Why, he said, how can he be consistent in saying both? First of all, premising as his own thought, "Hardly can a man become truly good;" and then a little further on in the poem, forgetting, and blaming Pittacus and refusing to agree with him, when he says, "Hardly can a man be good," which is the very same thing. And yet when he blames him who says the same with himself, he blames himself; so that he must be wrong either in his first or his second assertion.

Many of the audience cheered and applauded this. And I felt at first giddy and faint, as if I had received a blow from the expert hand of a boxer, when I heard his words and the sound of the cheering; and to confess the truth, I wanted to get time to think what the meaning of the poet really was. So I turned to Prodicus and called him. Prodicus, I said, Simonides is a countryman of yours, and you ought to come to his rescue. I think that I must summon you to my aid, like the river Scamander in Homer, who, when beleaguered by Achilles, asks Simois to aid him, saying:

"Brother dear, let us both together stay the force of the hero."

And I summon you, for I am afraid that Protagoras will make an end of Simonides. Now is the time to rehabilitate Simonides, by the application of your charming philosophy of synonyms, which distinguishes "will" and "wish" and many similar words which you mentioned in your admirable speech. And I should like to know whether you would agree with me; for I am of opinion that there is no contradiction in the words of Simonides. And first of all I wish that you would say whether, in your opinion, Prodicus, "being" is the same as "becoming."

Not the same, certainly, replied Prodicus.

Did not Simonides first set forth, as his own view, that "Hardly can a man become truly good?"

Quite right, said Prodicus.

And then he blames Pittacus, I said, not for saying the same as himself, as Protagoras imagines, but for saying something different; for Pittacus does not say as Simonides says, that hardly can a man become good, but hardly can a man be good: and our friend Prodicus says that being, Protagoras, is not the same as becoming; and if they are not the same, then Simonides is not inconsistent with himself. I dare say that Prodicus and many others would say, as Hesiod says, "Hardly can a man become good, for the gods have placed toil in front of virtue; but when you have reached the goal, then the acquisition of virtue, however difficult, is easy."

Prodicus heard and approved; but Protagoras said: Your correction, Socrates, involves a greater error than is contained in the sentence which you are correcting.

Alas! I said, Protagoras; then I am a sorry physician, and do but aggravate a disorder which I am seeking to cure.

The fact, he said, is as I have stated.

How is that? I asked.

The poet, he replied, could never have made such a mistake as to say that virtue, which in the opinion of all men is the hardest of all things, can be easily acquired.

Well, I said, and how fortunate this is that Prodicus should be of the company, for he has a wisdom, Protagoras, which, as I imagine, is more than human and of very ancient date, and may be as old as Simonides or even older. Learned as you are in many things, you appear to know nothing of this; but I know, for I am a disciple of his. And now, if I am not mistaken, you do not understand the word " hard " in the sense which Simonides intended; and I must correct you, as Prodicius corrects me when I used the word " dreadful " as a term of praise. If I say that Protagoras is a dreadfully wise man, he asks me if I am not ashamed of calling that which is good dreadful; and then he explains to me that the term " dreadful " is always taken in a bad sense, and that no one speaks of being dreadfully healthy or wealthy or wise, but of dreadful war, dreadful poverty, dreadful disease, meaning by the term " dreadful," evil. And I think that Simonides and his countrymen the Ceans, when they spoke of " hard " meant " evil," or something which you do not understand. Let us ask Prodicus, for he ought to be able to answer questions about the dialect of Simonides. What did he mean, Prodicus, by the term " hard? "

Evil, said Prodicus.

And therefore, I said, Prodicus, he blames Pittacus for saying, " Hard is the good," just as if that were equivalent to saying, Evil is the good.

Yes, he said, that was certainly his meaning; and he is twitting Pittacus with ignorance of the use of

terms, which in a Lesbian, who has been accustomed to speak a barbarous language, is natural.

Do you hear, Protagoras, I asked, what our friend Prodicus is saying? And have you an answer for him?

You are all wrong, Prodicus, said Protagoras; and I know very well that Simonides in using the word "hard" meant what all of us mean, not evil, but that which is not easy — that which takes a great deal of trouble. Of this I am positive.

I said: I also incline to think, Protagoras, that this was the meaning of Simonides, and that our friend Prodicus was quite aware of this, but he thought that he would make fun, and try if you could maintain your thesis; for that Simonides could never have meant the other is clearly proved by the context, in which he says that God only has this gift. Now he can not surely mean to say that to be good is evil, when he afterwards proceeds to say that God only has this gift, and that this is the attribute of him and of no other. For if this be his meaning, Prodicus would impute to Simonides a character of recklessness which is very unlike his countrymen. And I should like to tell you, I said, what I imagine to be the real meaning of Simonides in this poem, if you will test what, in your way of speaking, would be called my skill in poetry; or if you would rather, I will be the listener.

Protagoras hearing me offer this, replied: As you please; and Hippias, Prodicus, and the others, told me by all means to do as I proposed.

Then now, I said, I will endeavor to explain to you my opinion about this poem. There is a very ancient philosophy which is more cultivated in Crete and Lacedaemon than in any other part of Hellas, and there are more philosophers in those countries than anywhere else in the world. This, however, is a secret

which the Lacedaemonians deny; and they pretend to be ignorant, just because they do not wish to have it thought that they rule the world by wisdom, like the Sophists of whom Protagoras was speaking, and not by valor of arms; considering that if the reason of their superiority were disclosed, all men would be practising their wisdom. And this secret of theirs has never been discovered by the imitators of Lacedaemonian fashions in other cities, who go about with their ears bruised in imitation of them, and have the caestus bound on their arms, and are always in training, and wear short cloaks; for they imagine that these are the practices which have enabled the Lacedaemonians to conquer the other Hellenes. Now when the Lacedaemonians want to unbend and hold free conversation with their wise men, and are no longer satisfied with mere secret intercourse, they drive out all these laconizers, and any other foreigners who may happen to be in their country, and they hold a philosophical *séance* unknown to the strangers: and they themselves forbid their young men to go out into other cities (in this they are like the Cretans), in order that they may not unlearn the lessons which they have taught them. And in these cities not only men but also women have a pride in their high cultivation. And you may know that I am only speaking the truth in attributing this excellence in philosophy to the Lacedaemonians, by this token: If a man converses with the most ordinary Lacedaemonian, he will find him seldom good for much in general conversation, but at any point in the discourse he will be darting out some notable saying, terse and full of meaning, with unerring aim; and the person with whom he is talking seems to be like a child in his hands. And many of our own age and of former ages have noted that the true Lacedaemonian

type of character has the love of philosophy even stronger than the love of gymnastics; they are conscious that only a perfectly educated man is capable of uttering such expressions. Such were Thales of Miletus, and Pittacus of Mytilene, and Bias of Priene, and our own Solon, and Cleobulus the Lindian, and Myson the Chenian; and seventh in the catalogue of wise men was the Lacedaemonian Chilo. All these were lovers and emulators and disciples of the culture of the Lacedaemonians, and any one may perceive that their wisdom was of this character, consisting of short memorable sentences, which individuals uttered. And they met together and dedicated in the temple of Apollo at Delphi, as the first-fruits of their wisdom, the far-famed inscriptions, which are in all men's mouths, " Know thyself," and " Nothing too much."

Why do I say all this? I am explaining that this Lacedaemonian brevity was the style of primitive philosophy. Now there was a saying of Pittacus which was privately circulated and received the approbation of the good, " Hard to be good." And Simonides, who was ambitious of the fame of wisdom, was aware that if he could overthrow this saying, then, as if he had won a victory over some famous athlete, he would carry off the palm among his contemporaries. And if I am not mistaken, he composed the entire poem with the secret intention of damaging that saying.

Let us all unite in examining his words, and see whether I am speaking the truth. Simonides must have been a lunatic, if, in the very first words of the poem, wanting to say only that to be good is hard, he inserted μέν, " on the one hand " (on the one hand to become good is hard); there would be no possible reason for the introduction of unless you suppose

him to speak with a hostile reference to the words of Pittacus. Pittacus is saying "Hard to be good," and he says, controverting this, "No, the truly hard thing, Pittacus, is to become good," not joining "truly" with "good," but with "hard." Not the hard thing is to be truly good, as though there were some truly good men, and there were others who were good but not truly good (that would be a very simple observation, and quite unworthy of Simonides); but you must suppose him to make a trajection of the word (ἀλαθέως), construing the saying of Pittacus thus (and let us imagine Pittacus to be speaking and Simonides answering him): "O my friends," says Pittacus, "hard to be good," and Simonides answers, "In that, Pittacus, you are mistaken, the difficulty is not to be good, but on the one hand, to become good, four-square in hands and feet and mind, without a flaw — that is hard truly." This way of reading the passage accounts for the insertion of (μέν) "on the one hand," and for the use of the word "truly," which is rightly placed at the end; and all that follows tends to prove that this is the meaning. A great deal might be said in praise of the details of the poem, which is a charming piece of workmanship, and very finished, but that would be tedious. I should like, however, to point out the general intention of the poem, which is certainly designed in every part to be a refutation of the saying of Pittacus. For he speaks in what follows a little further on as if he meant to argue that although there is a difficulty in becoming good, yet this is possible for a time, and only for a time. But having become good, to remain in a good state and be good, as you, Pittacus, affirm, that is not possible, and is not granted to man; God only has this blessing; "but man can not help being bad when the force of circumstances overpowers him." Now

whom does the force of circumstances overpower in the command of a vessel? — not the private individual, for he is always overpowered; and as one who is already prostrate can not be overthrown, but only he who is standing upright and not he who is prostrate can be laid prostrate, so the force of circumstances can only be said to overpower him who has resources, and not him who is at all times helpless. The descent of a great storm may make the pilot helpless, or the severity of the season the husbandman or the physician; for the good may become bad, as another poet witnesses: —

"The good are sometimes good and sometimes bad."

But the bad does not become bad; he is always bad. So that when the force of circumstances overpowers the man of resources and skill and virtue, then he can not help being bad. And you, Pittacus, are saying, "Hard to be good." Now there is a difficulty in becoming good; and yet this is possible: but to be good is an impossibility; "for he who does well is the good man, and he who does ill is the bad." But what sort of doing is good in letters? and what sort of doing makes a man good in letters? Clearly the knowing of them. And what sort of well-doing makes a man a good physician? Clearly the knowing of the art of healing the sick. "But he who does ill is the bad." Now who becomes a bad physician? Clearly he who is in the first place a physician, and in the second place a good physician; for he may become a bad one also: but none of us unskilled individuals can by any amount of doing ill become physicians, any more than we can become carpenters or anything of that sort; and he who by doing ill can not become a physician at all, clearly can not become a bad physician. In like manner the good may become deteriorated by time, or

toil, or disease, or other accident (the only real ill-doing is the deprivation of knowledge), but the bad man will never become bad, for he is always bad; and if he were to become bad, he must previously have been good. Thus the words of the poem tend to show that on the one hand a man can not be continuously good, but that he may become good and may also become bad; and again that " they are the best for the longest time whom the gods love."

All this relates to Pittacus, as is further proved by the sequel. For he adds: " Therefore I will not throw away my life in searching after the impossible, hoping in vain to find a perfectly faultless man among those who partake of the fruit of the broad-bosomed earth; and when I have found him to tell you of him " (this is the vehement way in which he pursues his attack upon Pittacus throughout the whole poem): " but him who does no evil voluntarily I praise and love; — not even the gods war against necessity." All this has a similar drift, for Simonides was not so ignorant as to say that he praised those who did no evil voluntarily, as though there were some who did evil voluntarily. For no wise man, as I believe, will allow that any human being errs voluntarily, or voluntarily does evil and dishonorable actions; but they are very well aware that all who do evil and dishonorable things do them against their will. And Simonides never says that he praises him who does no evil voluntarily; the word " voluntarily " applies to himself. For he was under the impression that a good man might often compel himself to love and praise another, and that there might be an involuntary love, such as a man might feel to an ungainly father or mother, or to his country, or something of that sort. Now bad men, when their parents or country have any defects, rejoice at the sight of them, and expose them

to others, and find fault with them and denounce them under the idea that the rest of mankind will be less likely to take them to task and reproach them when they neglect them; and this makes them exaggerate their defects, in order that the odium which is necessarily incurred by them may be increased: but the good man dissembles his feelings, and constrains himself to praise them; and if they have wronged him and he is angry, he pacifies his anger and is reconciled, and compels himself to love and praise his own flesh and blood. And Simonides, as is probable, considered that he himself had often had to praise and magnify a tyrant or the like, much against his will, and he also wishes to imply to Pittacus that he is not censorious and does not censure him. "For I am satisfied," he says, "when a man is neither bad nor very stupid, and when he knows justice (which is the health of states), and is of sound mind, I will find no fault with him, for I am not given to finding fault, for there are innumerable fools" (implying that if he delighted in censure he might have abundant opportunity of finding fault). "All things are good with which evil is unmingled." In these latter words he does not mean to say that all things are good which have no evil in them, as you might say "All things are white which have no black in them," for that would be ridiculous; but he means to say that he accepts and finds no fault with the moderate or intermediate state. "I do not hope," he says, "to find a perfectly blameless man among those who partake of the fruits of the broad-bosomed earth, and when I have found him to tell you of him; in this sense I praise no man. But he who is moderately good, and does no evil, is good enough for me, who love and approve every one" (and here observe that he uses a Lesbian word, *ἐπαίνημι*, because he is addressing Pittacus, —

"who love and approve every one voluntarily," says, "who does no evil:" and that the stop should be put after "voluntarily"); but there are some whom I involuntarily praise and love. And you, Pittacus, I would never have blamed, if you had spoken what was moderately good and true; but I do blame you because, wearing the appearance of truth, you are speaking falsely about the greatest matters." And this, I said, Prodicus and Protagoras, I take to be the true meaning of Simonides in this poem.

Hippias said: I think, Socrates, that you have given a very good explanation of this poem; but I have also an excellent interpretation of my own which I will expound to you, if you will allow me.

Nay, Hippias, said Alcibiades; not now, but another time. At present we must abide by the compact which was made between Socrates and Protagoras, to the effect that as long as Protagoras is willing to ask, Socrates should answer; or that if he would rather answer, then that Socrates should ask.

I said: I wish Protagoras either to ask or answer as he is inclined; but I would rather have done with poems and odes, if you do not object, and come back to the question about which I was asking you at first, Protagoras, and by your help make an end of that. The talk about the poets seems to me like a commonplace entertainment to which a vulgar company have recourse; who, because they are not able to converse or amuse one another, while they are drinking, with the sound of their own voices and conversation by reason of their stupidity, raise the price of flute-girls in the market, hiring for a great sum the voice of a flute instead of their own breath, to be the medium of intercourse among them: but where the company are real gentlemen and men of education, you will see no

flute-girls, nor dancing-girls, nor harp-girls; and they have no nonsense or games but are contented with one another's conversation, of which their own voices are the medium, and which they carry on by turns and in an orderly manner, even though they are very liberal in their potations. And a company like this of ours, and men such as we profess to be, do not require the help of another's voice, or of the poets whom you can not interrogate about the meaning of what they are saying; people who cite them declaring, some that the poet has one meaning, and others that he has another; and there arises a dispute which can never be put to the proof. This sort of entertainment they decline, and prefer to talk with one another, and try one another's mettle in conversation. And these are the sort of models which I desire that you and I should imitate. Leaving the poets, and keeping to ourselves, let us try the mettle of one another and of the truth in conversation. And if you have a mind to ask I am ready to answer; or if you would rather, do you answer, and give me the opportunity of taking up and completing our unfinished argument.

I made these and some similar observations; but Protagoras would not distinctly say which he would do. Thereupon Alcibiades turned to Callias, and said: — Do you think, Callias, that Protagoras is fair in refusing to say whether he will or will not answer? for I certainly think that he is unfair; he ought either to proceed with the argument, or distinctly to refuse to proceed, that we may know his intention; and then Socrates will be able to discourse with some one else, and the rest of the company will be free to talk with one another.

I think that Protagoras was really made ashamed by these words of Alcibiades, and when the prayers of Callias and the company were superadded, he was

at last induced to argue, and said that I might ask and he would answer.

So I said: Do not imagine, Protagoras, that I have any other interest in asking questions of you but that of clearing up my own difficulties. For I think that Homer was very right in saying that "When two go together, one sees before the other," for all men who have a companion are readier in deed, word, or thought; but if a man "sees a thing when he is alone," he goes about straightway seeking until he finds some one to whom he may show his discoveries, and who may confirm him in them. And I would rather hold discourse with you than with any one, because I think that no man has a better understanding of most things which a good man may be expected to understand and in particular of virtue. For who is there, but you? — who not only claim to be a good man and a gentleman, for many are this, and yet have not the power of making others good. Whereas you are not only good yourself, but also the cause of goodness in others. Moreover such confidence have you in yourself, that although other Sophists conceal their profession, you proclaim in the face of Hellas that you are a Sophist or teacher of virtue and education, and are the first who demanded pay in return. How then can I do otherwise than invite you to the examination of these subjects, and ask questions and take advice of you? Indeed, I must. And I should like once more to have my memory refreshed by you about the questions which I was asking you at first, and also to have your help in considering them. If I am not mistaken the question was this: Are wisdom and temperance and courage and justice and holiness five names of the same thing? or has each of the names a separate underlying essence and corresponding thing having a proper function, no one of them being like any other

of them? And you said that the five names were not the names of the same thing, but that each of them had a separate object, and that all of them were parts of virtue, not in the same way that the parts of gold are like each other and the whole of which they are parts, but as the parts of the face are unlike the whole of which they are parts and one another, and have each of them a distinct function. I should like to know whether this is still your opinion; or if not, I will ask you to define your meaning, as I shall not take you to task if you now make a different statement. For I dare say that you may have said what you did only in order to make trial of me.

I answer, Socrates, he said, that all these qualities are parts of virtue, and that four out of the five are to some extent similar, and that the fifth of them, which is courage, is very different from the other four, as I prove in this way: You may observe that many men are utterly unrighteous, unholy, intemperate, ignorant, who are neverthelesss remarkable for their courage.

Stop, I said; that requires consideration. When you speak of brave men, do you mean the confident, or another sort of nature?

Yes, he said; I mean the impetuous, ready to go at that which others are afraid to approach.

In the next place you would affirm virtue to be a good thing, of which good thing you assert yourself to be a teacher.

Yes, he said; I should say the best of all things, as I am a sane man.

And is it partly good and partly bad, I said, or wholly good?

Wholly good, and that in the highest degree.

Tell me then; who are they who have confidence in diving into a well?

I should say, the divers.

And the reason of this is that they have knowledge?

Yes, that is the reason.

And who have confidence in fighting on horseback — the skilled horsemen or the unskilled?

The skilled.

And who in fighting with light shields — the peltasts or the nonpeltasts?

The peltasts. And that is true of all other things, he said, if that is your point: those who have knowledge are more confident than those who have no knowledge, and they are more confident after they have learned than before.

And have you not seen persons utterly ignorant, I said, of these things, and yet confident about them?

Yes, he said, I have seen persons very confident.

And are not these confident persons also courageous?

In that case, he replied, courage would be a base thing, for the men of whom we are speaking are surely madmen.

Then who are the courageous? Are they not the confident?

Yes, he said; and I still maintain that.

And those, I said, who are thus confident without knowledge are really not courageous, but mad; and in that case the wisest are also the most confident, and being the most confident are also the bravest, and upon that view again wisdom will be courage.

Nay, Socrates, he replied, you are mistaken in your remembrance of what was said by me. When you asked me, I certainly did say that the courageous are the confident; but I was not asked whether the confident are the courageous; for if you had asked me that, I should have answered "not all of them:" and what I did answer you have not disproved, although

you proceed to show that those who have knowledge are more courageous than they were before they had knowledge, and more courageous than others who have no knowledge; and this makes you think that courage is the same as wisdom. But in this way of arguing you might come to imagine that strength is wisdom. You might begin by asking whether the strong are able, and I should say "Yes;" and then whether those who know how to wrestle are not more able to wrestle than those who do not know how to wrestle, and more able after than before they had learned, and I should assent. And when I had admitted this, you might use my admissions in such a way as to prove that upon my view wisdom is strength; whereas in that case I should not have admitted, any more than in the other, that the able are strong, although I have admitted that the strong are able. For there is a difference between ability and strength; the former is given by knowledge as well as by madness or rage, but strength comes from nature and a healthy state of the body. And in like manner I say of confidence and courage, that they are not the same; and I argue that the courageous are confident, but not all the confident courageous. For confidence may be given to men by art, and also, like ability, by anger and madness; but courage comes to them from nature and the healthy state of the soul?

I said: You would admit, Protagoras, that some men live well and others ill?

He agreed to this.

And do you think that a man lives well who lives in pain and grief?

He does not.

But if he lives pleasantly to the end of his life, don't you think that in that case he will have lived well?

I do.

Then to live pleasantly is a good, and to live unpleasantly an evil?

Yes, he said, if the pleasure be good and honorable.

And do you, Protagoras, like the rest of the world, call some pleasant things evil and some painful things good? — for I am rather disposed to say that things are good in as far as they are pleasant, if they have no consequences of another sort, and in as far as they are painful they are bad.

I do not know, Socrates, he said, whether I can venture to assert in that unqualified manner that the pleasant is the good and the painful the evil. Having regard not only to my present answer, but also to the rest of my life, I shall be safer, if I am not mistaken, in saying that there are some pleasant things which are not good, and that there are some painful things which are good, and some which are not good, and that there are some which are neither good nor evil.

And you would call pleasant, I said, the things which participate in pleasure or create pleasure?

Certainly, he said.

Then my meaning is, that in as far as they are pleasant they are good; and my question would imply that pleasure is a good in itself.

According to your favorite mode of speech, Socrates, let us inquire about this, he said; and if the result of the inquiry is to show that pleasure and good are really the same, then we will agree; but if not, then we will argue.

And would you wish to begin the inquiry? I said; or shall I begin?

You ought to take the lead, he said; for you are the author of the discussion.

May I use this as an illustration? I said. Suppose some one who is inquiring into the health or some other bodily quality of another: — he looks at his face and at the tips of his fingers, and then he says, Uncover your chest and back to me that I may have a better view: — that is the sort of thing which I desire in this speculation. Having seen what you opinion is about good and pleasure, I am minded to say to you: Uncover your mind to me, Protagoras, and reveal your opinion about knowledge, that I may know whether you agree with the rest of the world. Now the rest of the world are of opinion that knowledge is a principle not of strength, or of rule, or of command: their notion is that a man may have knowledge, and yet that the knowledge which is in him may be overmastered by anger, or pleasure, or pain, or love, or perhaps fear, — just as if knowledge were a slave, and might be dragged about anyhow. Now is that your view? or do you think that knowledge is a noble and commanding thing, which can not be overcome, and will not allow a man, if he only knows the difference of good and evil, to do anything which is contrary to knowledge, but that wisdom will have strength to help him?

I agree with you, Socrates, said Protagoras; and not only that, but I, above all other men, am bound to say that wisdom and knowledge are the highest of human things.

Good, I said, and true. But are you aware that the majority of the world are of another mind; and that men are commonly supposed to know the things which are best, and not to do them when they might? And most persons of whom I have asked the reason of this have said that those who did thus were overcome by pain, or pleasure, or some of those affections which I was just now mentioning.

Yes, Socrates, he replied; and that is not the only point about which mankind are in error.

Suppose, then, that you and I endeavor to instruct and inform them what is the nature of this affection, which is called by them being overcome by pleasure, and which, as they declare, is the reason why they know the better and choose the worse. When we say to them: Friends, you are mistaken, and are saying what is not true, they would reply: Socrates and Protagoras, if this affection of the soul is not to be described as being overcome by pleasure, what is it, and how do you call it? Tell us that.

But why, Socrates, should we trouble ourselves about the opinion of the many, who just say anything that happens to occur to them?

I think, I replied, that their opinion may help us to discover the nature and relation of courage to the other parts of virtue. If you are disposed to abide by our recent agreement, that I should lead in the way in which I think that we shall find the truth best, do you follow; but if you are disinclined, never mind.

You are quite right, he said; and I would have you proceed as you have begun.

Well then, I said, let me suppose that they repeat their question, What account do you give of that which, in our language, is termed being overcome by pleasure? I should answer them thus: Listen, and Protagoras and I will endeavor to show you. When men are overcome by eating and drinking and other sensual desires which are pleasant, and they, knowing them to be evil, nevertheless indulge in them, is not that what you would call being overcome by pleasure? That they will admit. And suppose that you and I were to go on and ask them again: In what way do you say that they are evil, — in that they are pleasant and give pleasure at the moment or because they cause

disease and poverty and other like evils in the future? Would they still be evil, if they had no attendant evil consequences, simply because they give the consciousness of pleasure of whatever nature? Would they not answer that they are not evil on account of the pleasure which is immediately given by them, but on account of the after consequences — diseases and the like?

I believe, said Protagoras, that the world in general would give that answer.

And in causing diseases do they not cause pain? and in causing poverty do they not cause pain; — they would agree to that also, if I am not mistaken?

Protagoras assented.

Then I should say to them, in my name and yours: Do you think them evil for any other reason, except that they end in pain and rob us of other pleasures: — that again they would admit?

We both of us thought that they would.

And then I should take the question from the opposite point of view, and say: Friends, when you speak of goods being painful, do you not mean remedial goods, such as gymnastic exercises and military services, and the physician's use of burning, cutting, drugging, and starving? Are these the things which are good but painful? — they would assent to that?

He agreed.

And do you call them good because they occasion the greatest immediate suffering and pain; or because, afterwards, they bring health and improvement of the bodily condition and the salvation of states and empires and wealth? — they would agree to that, if I am not mistaken?

He assented.

Are these things good for any other reason except

that they end in pleasure, and get rid of and avert pain? Are you looking to any other standard but pleasure and pain when you call them good? — they would acknowledge that they were not?

I think that they would, said Protagoras.

And do you not pursue after pleasure as a good, and and avoid pain as an evil?

He assented.

Then you think that pain is an evil and pleasure is a good: and even pleasure you deem an evil, when it robs you of greater pleasures than it gives, or causes greater pain than the pleasures which it has. If, however, you call pleasure an evil in relation to some other end or standard, you will be able to show us that standard. But you have none to show.

I do not think that they have, said Protagoras.

And have you not a similar way of speaking about pain? You call pain a good when it takes away greater pains than those which it has, or gives pleasure greater than the pains: for I say that if you have some standard other than pleasure and pain to which you refer when you call actual pain a good, you can show what that is. But you can not.

That is true, said Protagoras.

Suppose, again, I said, that the world says to me: Why do you spend many words and speak in many ways on this subject? Excuse me, friends, I should reply; but in the first place there is a difficulty in explaining the meaning of the expression "overcome by pleasure;" and the whole argument turns upon this. And even now, if you see any possible way in which evil can be explained as other than pain, or good as other than pleasure, you may still retract. But I suppose that you are satisfied at having a life of pleasure which is without pain. And if you are satisfied, and if you are unable to show any good or evil which

does not end in pleasure and pain, hear the consequences: — If this is true, then I say that the argument is absurd which affirms that a man often does evil knowingly, when he might abstain, because he is seduced and amazed by pleasure; or again, when you say that a man knowingly refuses to do what is good because he is overcome at the moment by pleasure. Now that this is ridiculous will be evident if only we give up the use of various names, such as pleasant and painful, and good and evil. As there are two things, let us call them by two names — first, good and evil, and then pleasant and painful. Assuming this, let us go on to say that a man does evil knowing that he does evil. But some one will ask, Why? Because he is overcome, is the first answer. And by what is he overcome? the inquirer will proceed to ask. And we shall not be able to reply " By pleasure," for the name of pleasure has been exchanged for that of good. In our answer, then, we shall only say that he is overcome. " By what? " he will reiterate. By the good, we shall have to reply; indeed we shall. Nay, but our questioner will rejoin with a laugh, if he be one of the swaggering sort, That is too ridiculous, that a man should do what he knows to be evil when he ought not, because he is overcome by good. Is that, he will ask, because the good was worthy or not worthy of conquering the evil? And in answer to that we shall clearly reply, Because it was not worthy; for if it had been worthy, then he who, as we say, was overcome by pleasure, would not have been wrong. But how, he will reply, can the good be unworthy of the evil, or the evil of the good? Is not the real explanation that they are out of proportion to one another, either as greater and smaller, or more and fewer? This we can not deny. And when you speak of being overcome — what do you mean, he will say, but that

you choose the greater evil in exchange for the lesser good? This being the case, let us now substitute the names of pleasure and pain, and say, not as before, that a man does what is evil knowingly, but that he does what is painful knowingly, and because he is overcome by pleasure, which is unworthy to overcome. And what measure is there of the relations of pleasure to pain other than excess and defect, which means that they become greater and smaller, and more and fewer, and differ in degree? For if any one says: "Yes, Socrates, but immediate pleasure differs widely from future pleasure and pain" — To that I should reply: And do they differ in any other way except by reason of pleasure and pain? There can be no other measure of them. And do you, like a skilful weigher, put into the balance the pleasures and the pains, near and distant, and weigh them, and then say which outweighs the other. If you weigh pleasures against pleasures, you of course take the more and greater; or if you weigh pains against pains, you take the fewer and the less; or if pleasures against pains, then you choose that course of action in which the painful is exceeded by the pleasant, whether the distant by the near or the near by the distant; and you avoid that course of action in which the pleasant is exceeded by the painful Would you not admit, my friends, that this is true? I am confident that they can not deny this.

He agreed with me.

Well then, I shall say, if you admit that, be so good as to answer me a question: Do not the same magnitudes appear larger to your sight when near, and smaller when at a distance? They will acknowledge that. And the same folds of thickness and number; also sounds, which are in themselves equal, are greater when near, and lesser when at a distance. They will grant that also. Now supposing that happiness con-

sisted in making and taking large things, what would be the saving principle of human life? Would the art of measuring be the saving principle, or would the power of appearance? Is not the latter that deceiving art which makes us wander up and down and take the things at one time of which we repent at another, both in our actions and in our choice of things great and small? But the art of measurement is that which would do away with the effect of appearances, and, showing the truth, would fain teach the soul at last to find rest in the truth, and would thus save our life. Would not mankind generally acknowledge that the art which accomplishes this is the art of measurement?

Yes, he said, the art of measurement.

Suppose, again, the salvation of human life to depend on the choice of odd and even, and on the knowledge of when men ought to choose the greater or less, either in reference to themselves or to each other whether near or at a distance; what would be the saving principle of our lives? Would not knowledge? — a knowledge of measuring, when the question is one of excess and defect, and a knowledge of number, when the question is of odd and even? The world will acknowledge that, will they not?

Protagoras admitted that they would.

Well then, I say to them, my friends; seeing that the salvation of human life has been found to consist in the right choice of pleasures and pains, — in the choice of the more and the fewer, and the greater and the less, and the nearer and remoter, must not this measuring be a consideration of excess and defect and equality in relation to each other?

That is undeniably true.

And this, as possessing measure, must undeniably also be an art and science?

They will agree to that.

The nature of that art or science will be a matter of future consideration; the demonstration of the existence of such a science is a sufficient answer to the question which you asked of me and Protagoras. At the time when you asked the question, if you remember, both of us were agreeing that there was nothing mightier than knowledge, and that knowledge, in whatever existing, must have the advantage over pleasure and all other things; and then you said that pleasure often got the advantage even over a man who has knowledge; and we refused to allow this, and you said: O Protagoras and Socrates, if this state is not to be called being overcome by pleasure, tell us what it is; what would you call it? If we had immediately and at the time answered "Ignorance," you would have laughed at us. But now, in laughing at us, you will be laughing at yourselves: for you also admitted that men err in their choice of pleasures and pains; that is, in their choice of good and evil, from defect of knowledge; and you admitted further that they err, not only from defect of knowledge in general, but of that particular knowledge which is called measuring. And you are also aware that the erring act which is done without knowledge is done in ignorance. This, therefore, is the meaning of being overcome by pleasure; — ignorance, and that the greatest. And our friends Protagoras and Prodicus and Hippias declare that they are the physicians of ignorance; but you, who are under the mistaken impression that ignorance is not the cause, neither go yourselves, nor send your children, to the Sophists, who are the teachers of these things — you take care of your money and give them none; and the result is, that you are the worse off both in public and private life: — Let us suppose this to be our answer to the world in general. But I would like now to ask you, Hippias, and

you, Prodicus, as well as Protagoras (for the argument is to be yours as well as ours), whether you think that I am speaking the truth or not?

They all thought that what I said was entirely true.

Then you agree, I said, that the pleasant is the good, and the painful evil. And here I would beg my friend Prodicus not to introduce his distinction of names, whether he is disposed to say pleasurable, delightful, joyful. However and in whatever way he rejoices to name them, I will ask you, most excellent Prodicus, to answer this in my sense.

Prodicus laughed and assented, as did the others.

Then, my friends, I said, what do you say to this? Are not all actions, the tendency of which is to make life painless and pleasant, honorable and useful? The honorable work is also useful and good?

This was admitted.

Then, I said, if the pleasant is the good, nobody does anything under the idea or conviction that some other thing would be better and is also attainable, when he might do the better. And this inferiority of a man to himself is merely ignorance, as the superiority of a man to himself is wisdom.

They all assented.

And is not ignorance the having a false opinion and being deceived about important matters?

To that they also unanimously assented.

Then, I said, no man voluntarily pursues evil, or that which he thinks to be evil. To prefer evil to good is not in human nature; and when a man is compelled to choose one of two evils, no one will choose the greater when he might have the less.

All of us agreed to every word of this.

Well, I said, there is a certain thing called fear or terror; and here, Prodicus, I should particularly like

to know whether you would agree with me in defining this fear or terror as expectation of evil.

Protagoras and Hippias agreed, but Prodicus said that this was fear and not terror.

Never mind about that, Prodicus, I said; but let me ask whether, if our former assertions are true, a man will pursue that which he fears when he need not? Would not this be in contradiction to the admission which has been already made, that he thinks the things which he fears to be evil; and no one will pursue or voluntarily accept that which he thinks to be evil.

That also was universally admitted.

Then, I said, these, Hippias and Prodicus, are our premisses; and I would beg Protagoras to explain to us how he can be right in what he said at first. I do not mean in what he said quite at first, for his first statement, as you may remember, was that whereas there were five parts of virtue none of them was like any other of them; each of them had a separate function. To this, however, I am not referring, but to the assertion which he afterwards made that of the five virtues four were nearly akin to each other, but that the fifth, which was courage, differed greatly from the others. And of this he gave me the following proof. He said: You will find, Socrates, that some of the most impious, and unrighteous, and intemperate, and ignorant of men are among the most courageous; and that is a proof that courage is very different from the other parts of virtue. I was surprised at his saying this at the time, and I am still more surprised now that I have discussed the matter with you. So I asked him whether by the brave he meant the confident. Yes, he replied, and the impetuous or goers. (You may remember, Protagoras, that this was your answer.)

He acknowledged the truth of this.

Well then, I said, tell us against what are the courageous ready to go — against the same as the cowards?

No, he answered.

Then against something different?

Yes, he said.

Then do cowards go where there is safety, and the courageous where there is danger?

Yes, Socrates, that is what men say.

That is true, I said. But I want to know against what the courageous are ready to go — against dangers, believing them to be dangers, or not against dangers?

No, said he; that has been proved by you in the previous argument to be impossible.

That, again, I replied, is quite true. And if this has been rightly proven, then no one goes to meet what he thinks to be dangers, since the want of self-control, which makes men rush into dangers, has been shown to be ignorance.

He assented.

And yet the courageous man and the coward alike go to meet that about which they are confident; so that, in this point of view, the cowardly and the courageous go to meet the same things.

And yet, Socrates, said Protagoras, that to which the coward goes is the opposite of that to which the courageous goes; the one, for example, are ready to go to battle, and the others are not ready.

And is going to battle honorable or disgraceful? I said.

Honorable, he replied.

And if honorable, then already admitted by us to be good; for all honorable actions we have admitted to be good.

That is true; and to that opinion I shall always adhere.

True, I said. But which of the two are they who, as you say, are unwilling to go to war, which is a good and honorable thing?

The cowards, he replied.

And yet, I said, that which is good and honorable is also pleasant?

That, he said, was certainly admitted.

And do the cowards knowingly refuse to go to the nobler, and pleasanter, and better?

The admission of that, he replied, would belie our former admissions.

But does not the courageous man also go to meet the better, and pleasanter, and nobler?

That must be admitted.

And the courageous man has no base fear or base confidence?

True, he replied.

And if not base, then honorable?

He admitted this.

And if honorable, then good?

Yes.

But the fear and confidence of the coward or foolhardy or madman, on the contrary, are base?

He assented.

And these base fears and confidences originate in ignorance and uninstructedness?

True, he said.

Then as to the motive from which the cowards act, do you call that cowardice or courage?

I should say cowardice, he replied.

And have they not been shown to be cowards through their ignorance of dangers?

Assuredly, he said.

And because of that ignorance they are cowards?

He assented.

And the reason why they are cowards is admitted by you to be cowardice?

He assented.

Then the ignorance of what is and is not dangerous is cowardice?

He nodded assent.

But surely courage, I said, is opposed to cowardice?

Yes.

And the wisdom which knows what are and are not dangers is opposed to the ignorance of them?

To that again he nodded assent.

And the ignorance of them is cowardice?

To that he very reluctantly nodded assent.

And the knowledge of that which is and is not dangerous is courage, and is opposed to the ignorance of these things?

At this point he would no longer nod assent, but was silent.

And why, I said, do you neither assent nor dissent, Protagoras?

Finish the argument by yourself, he said.

I only want to ask one more question, I said. I want to know whether you still think that there are men who are most ignorant and yet most courageous?

You seem to have a great ambition to make me answer, Socrates, and therefore I will gratify you, and say, that this appears to me to be impossible consistently with the argument.

My only object, I said, in continuing the discussion, has been the desire to ascertain the relations of virtue and the essential nature of virtue; for if this were clear, I am very sure that the other controversy which has been carried on at great length by both of us — you affirming and I denying that virtue can be taught — would also have become clear. The result of our

discussion appears to me to be singular. For if the argument had a human voice, that voice would be heard laughing at us and saying: Protagoras and Socrates, you are strange beings; there are you who were saying that virtue can not be taught, contradicting yourself now in the attempt to show that all things are knowledge, including justice, and temperance, and courage, — which tends to show that virtue can certainly be taught; for if virtue were other than knowledge, as Protagoras attempted to show, then clearly virtue can not be taught; but if virtue is entirely knowledge, as you, Socrates, are seeking to show, then I can not but suppose that virtue is capable of being taught. Protagoras, on the other hand, who started by saying that it might be taught, is now eager to show that it is anything rather than knowledge; and if this is true, it must be quite incapable of being taught. Now I, Protagoras, perceiving this terrible confusion of ideas, have a great desire that they should be cleared up. And I should like to carry on the discussion until we ascertain what virtue is, and whether capable of being taught or not, lest haply Epimetheus should trip us up and deceive us in the argument, as he forgot to provide for us in the story; and I prefer your Prometheus to your Epimetheus: of him I make use whenever I am busy about these questions in Promethean care of my own life. And if you have no objection, as I said at first, I should like to have your help in the inquiry.

Protagoras replied: Socrates, I am not of a base nature, and I am the last man in the world to be envious. I can not but applaud your enthusiasm in the conduct of an argument. As I have often said, I admire you above all men whom I know, certainly above all men of your age; and I believe that you will become very eminent in philosophy. Let us come back

to the subject at some future time; at present we had better turn to something else.

By all means, I said, if that is your wish; for I too ought long since to have kept the engagement of which I spoke before, and only tarried because I could not refuse the request of the noble Callias. This finished the conversation, and we went our way.

EUTHYDEMUS

INTRODUCTION

The Euthydemus is, of all the Dialogues of Plato, that in which he approaches most nearly to the comic poet. The mirth is broader, the irony more sustained, the contrast between Socrates and the two Sophists, although veiled, penetrates deeper than in any other of his writings. Even Thrasymachus, in the Republic, is at last pacified, and becomes a friendly and interested auditor of the great discourse. But in the Euthydemus the mask is never dropped; the accustomed irony of Socrates continues to the end.

Socrates narrates to Crito a remarkable scene in which he has himself taken part, and in which the two brothers, Dionysodorus and Euthydemus are the chief performers. They are natives of Chios, who have been exiled from Thurii, and in former days had appeared at Athens as teachers of rhetoric and of the art of fighting in armor. To this they have now added a new fighting accomplishment — the art of Eristic, or fighting with words, which they are likewise willing to teach "for a consideration." But they can also teach virtue in a very short time and in the very best manner. Socrates, who is always on the look out for teachers of virtue, is interested in the youth Cleinias, the grandson of the great Alcibiades, and is desirous that he should have the benefit of their instructions. He is quite ready to fall down and worship them; although the greatness of their professions does arouse in his mind a temporary incredulity.

A circle gathers round them, in the midst of which are Socrates, the two brothers, the youth Cleinias, who is watched by the eager eyes of his lover Ctesippus, and others.

The performance begins; and such a performance as might well seem to require an invocation of Memory and the Muses. It is agreed that the brothers shall question Cleinias. "Cleinias," says Euthydemus, "who learn, the wise or the unwise?" "The wise," is the reply; given with blushing and hesitation. "And yet when you learned you did not know and were not wise." Then Dionysodorus takes up the ball: "Who are they who learn

dictation of the grammar-master; the wise boys or the foolish boys?" "The wise." "Then after all the wise learn." "And do they learn," said Euthydemus, "what they know or what they do not know?" "The latter." "And dictation is a dictation of letters?" "Yes." "And you know letters?" "Yes." "Then you learn what you know." "But," retorts Dionysodorus, "is not learning acquiring knowledge?" "Yes." "And you acquire that which you have not got already." "Then you learn that which you do not know."

Socrates is afraid that the youth Cleinias may be discouraged at these repeated overthrows. He therefore explains to him the nature of the process to which he is being subjected. The two strangers are not serious; there are jests at the mysteries which precede the enthronement, and he is being initiated into the mysteries of the sophistical ritual. This is all a sort of horse-play, which is now ended. The exhortation to virtue will follow, and Socrates himself (if the wise men will not laugh at him) is desirous of carrying on such an exhortation, by way of example to them, according to his own poor notion. He proceeds to question Cleinias. The result of the investigation may be summed up as follows: —

All men desire good; and good means the possession of goods, such as wealth, health, beauty, birth, power, honor; not forgetting the virtues and wisdom. And yet in this enumeration the greatest good of all is omitted. What is that? Good fortune. But what need is there of good fortune when we have wisdom already: — in every art and business are not the wise also the fortunate? This is admitted. And again, the possession of goods is not enough; there must be a right use of them as well, and this can only be given by knowledge: in themselves they are neither good nor evil, but knowledge and wisdom are the only good, and ignorance and folly the only evil. The conclusion is that we must get "wisdom." But can wisdom be taught? "Yes," says Cleinias. Socrates is delighted at the ingenuousness of the youth relieving him from the necessity of discussing one of his great puzzles. "As wisdom is the only good, he must become a philosopher, or lover of wisdom." "That I will," says Cleinias.

After Socrates has given this specimen of his own mode of instruction, the two brothers recommence their exhortation to virtue, which is of quite another sort.

"You want Cleinias to be wise?" "Yes." "And he is not wise yet?" "No." "Then you want him to be what he is not,

and not to be what he is? — not to be — that is, to perish. Pretty lovers and friends you must all be!"

Here Ctesippus, the lover of Cleinias interposes in great excitement, thinking that he will teach the two Sophists a lesson of good manners. But he is quickly entangled in the meshes of their sophistry; and as a storm seems to be gathering Socrates pacifies him with a joke, and Ctesippus then says that he is not reviling the two Sophists, he is only contradicting them. "But," says Dionysodorus, "there is no such thing as contradiction. When you and I describe the same thing, or you describe one thing and I describe another, how is there any contradiction in that?" Ctesippus is unable to reply.

Socrates has already heard of the denial of contradiction, and would like to be informed by the great master of the art, "What is the meaning of this?" Do they mean that there is no such thing as error, ignorance, falsehood? Then what are they professing to teach? The two Sophists complain that Socrates is ready to answer what they said a year ago, but is "non-plussed" at which they are saying now. "What does the word 'non-plussed' mean?" Socrates is informed in reply that words are lifeless things, and lifeless things have no sense or meaning. Ctesippus again breaks out, and again has to be pacified by Socrates, who renews the conversation with Cleinias. The two Sophists are like Proteus in the variety of their transformations, and he, like Menelaus, hopes to restore them to their natural form.

He had arrived at the conclusion that philosophy must be studied. And philosophy is the possession of knowledge; and knowledge must be of a kind which is profitable, and in which knowledge and use coincide. What knowledge is there which is of such a nature? Not the knowledge which is required in any particular art; nor again the art of the composer of speeches, who knows how to write them, but can not speak them, although he too must be admitted to be a kind of enchanter of wild animals. Neither is the knowledge for which we are searching the knowledge of the general. For the general makes over his prey to the statesman, as the huntsman does to the cook, or the taker of quails to the keeper of quails; he has not the use of that which he acquires. The two inquirers, Cleinias and Socrates, are described as wandering about in a wilderness, vainly searching after the art of life and happiness. At last they fix upon the kingly art, as having the desired sort of knowledge. But the kingly art only gives men those goods which are neither good

nor evil: and if we say further that it makes us wise, in what does it make us wise? Not in special arts, such as cobbling or carpentering, but only in itself: or say again that it makes us good, there is no answer to the question, "good in what?" At length in despair Cleinias and Socrates turn to the "Dioscuri" and request their aid.

Euthydemus argues that Socrates know something; and as he can not know and not know, he can not know some things and not know others, and therefore he knows all things: he and Dionysodorus and all other men know all things. "Do they know shoemaking, etc.?" "Yes." The sceptical Ctesippus would like to have some evidence of this extraordinary statement: he will believe if Euthydemus will tell him how many stumps of teeth Dionysodorus has, and if Dionysodorus will give him a like piece of information about Euthydemus. Even Socrates is incredulous, and indulges in a little raillery at the expense of the brothers. But he restrains himself, remembering that if the men who are to be his teachers think him stupid they will take no pains with him. Another fallacy is produced which turns on the absoluteness of the verb "to know." And here Euthydemus is caught "napping," and is induced by Socrates to confess that "he does not know the good to be unjust." Socrates recommends him to call his brother Dionysodorus to his assistance, as Heracles called his nephew Iolaus. Dionysodorus rejoins that Iolaus was no more the nephew of Heracles than of Socrates. For a nephew is a nephew, and a brother is a brother, and a father is a father, not of one man only, but of all; nor of men only, but of dogs and sea-monsters. Ctesippus makes merry with the consequences which follow: "Much good has your father got out of the wisdom of his puppies."

But, says Euthydemus, unabashed, "Nobody wants much good." Medicine is a good, arms are a good, money is a good, and yet there may be too much of them in wrong places. "No," says Ctesippus, "there can not be too much gold." "And would you be happy if you had three talents of gold in your belly, a talent in your plate, and a stater in either eye?" Ctesippus, imitating the new wisdom, replies, "And do not the Scythians reckon those to be the happiest of men who have their skulls gilded and see the inside of them?" "Do you see," retorts Euthydemus, "what has the quality of vision or what has not the quality of vision." What has the quality of vision?" "And you see our garments?" "Yes." "Then our garments have the quality of vision." A similar play of words follows, which

is successfully retorted by Ctesippus, to the great delight of Cleinias, who is rebuked by Socrates for laughing at such solemn and beautiful things.

"But are there any beautiful things? And if there are such, are they the same or not the same as absolute beauty?" Socrates replies that they are not the same, but each of them has some beauty present with it. "And are you an ox because you have an ox present with you?" After a few more similar amphiboliae, in which Socrates, like Ctesippus, in self-defence borrows the weapons of the brothers, they both confess that the two heroes are invincible; and the scene concludes with a grand chorus of shouting and laughing, and a panegyrical oration from Socrates:

First, he praises the indifference of Dionysodorus and Euthydemus to public opinion; for most persons would rather be refuted by such arguments than use them in the refutation of others. Secondly, he remarks upon their impartiality; for they stop their own mouths, as well as those of other people. Thirdly, he notes their liberality, which makes them give away their secret to all the world: they should be more reserved, and let no one be present at this exhibition who does not pay them money; or better still they might practise on one another only. He concludes with a respectful request that they will take him and Cleinias as their disciples.

Crito tells Socrates that he has heard one of the audience criticize severely this wisdom, — not sparing Socrates himself for countenancing such an exhibition. Socrates asks what manner of man was this censorious critic. "Not an orator, but a great composer of speeches." Socrates understands that he is an amphibious sort of animal, half philosopher, half politician; one of a class who have the highest opinion of themselves, and a spite against philosophers, whom they imagine to be their rivals. They are a class who are very likely to get mauled by Euthydemus and his friends, and have a great notion of their own wisdom; for they imagine themselves to have all the advantages and none of the drawbacks both of politics and of philosophy. They do not understand the principles of combination, and hence are ignorant that the union of two good things which have different ends produces a compound inferior to either of them taken separately.

Crito is anxious about the education of his children, one of whom is growing up. The description of Dionysodorus and Euthydemus suggests to him the reflection that the professors

of education are strange beings. Socrates consoles him with the remark that the good in all professions are few, and recommends that "he and his house," should continue to serve philosophy, and not mind about its professors.

There is a stage in the history of philosophy in which the old is dying out, and the new has not yet come into full life. Great philosophies like the Eleatic or Heraclitean, which have enlarged the boundaries of the human mind, begin to pass away in words. They subsist only as forms which have rooted themselves in language — as troublesome elements of thought which can not be either used or explained away. The same absoluteness which was once attributed to abstractions is now attached to the words which are the signs of them. The philosophy which in the first and second generation was a great and inspiring effort of reflection, in the third becomes sophistical, verbal, eristic.

It is this stage of philosophy which Plato satirizes in the Euthydemus. The fallacies which are noted by him appear trifling to us now, but they were not trifling in the age before logic, in the decline of the earlier Greek philosophies, at a time when language was first beginning to perplex human thought. Besides he is caricaturing them; they probably received more subtle forms at the hands of those who seriously maintained them. They are patent to us in Plato, and we are inclined to wonder how any one could ever have been deceived by them; but we must remember also that there was a time when the human mind was only with great difficulty disentangled from such fallacies.

To appreciate fully the drift of the Euthydemus, we should imagine a mental state in which not individuals only, but whole schools during more than one generation, were animated by the desire to exclude the conception of rest, and therefore the very word "thus" from language; in which the ideas of space, time, matter, motion, were proved to be contradictory and imaginary; in which the nature of qualitative change was a puzzle, and even differences of degree, when applied to abstract notions, were not understood; in which contradiction itself was denied; in which, on the one hand, it was affirmed that every predicate was true of every subject, and on the other hand, that no predicate was true of any subject; and that nothing was, or was known, or could be spoken. Let us imagine disputes carried on with religious earnestness and more than scholastic subtlety, in which the catch-

words of philosophy are completely detached from their context. To such disputes the humor, whether of Plato in the ancient, or of Pope and Swift in the modern world, is the natural enemy. Nor must we forget that in modern times there is no fallacy so gross, no trick of language so transparent, no abstraction so barren and unmeaning, no form of thought so contradictory to experience, which has not been found to satisfy the minds of philosophical inquirers at a certain stage, or when regarded from a certain point of view only. The peculiarity of the fallacies of our own age is that we live within them, and are therefore generally unconscious of them.

Aristotle has analyzed several of the same fallacies in his book "De Sophisticis Elenchis," which Plato, with equal command of their true nature, has preferred to bring to the test of ridicule. At first we are only struck with the broad humor of this "reductio ad absurdum:" gradually we perceive that some important questions begin to emerge. Here, as everywhere else, Plato is making war against the philosophers who put words in the place of things, who tear arguments to tatters, who deny predication, and thus make knowledge impossible. Two great truths seem to be indirectly taught through these fallacies: (1) The uncertainty of language, which allows the same words to be used in different meanings, or with different degrees of meaning: (2) The necessary limitation or relative nature of all phenomena. Plato is aware that his own doctrine of ideas, as well as the Eleatic Being and Not-being, alike admit of being regarded as verbal fallacies.

Contrasted with the exhibition of the Sophists are the two discourses of Socrates in several respects: (1) In their perfect relevancy to the subject of discussion, whereas the Sophistical discourses are wholly irrelevant: (2) In their inquiring sympathetic tone, which encourages the youth, instead of "knocking him down," after the manner of the two Sophists: (3) In the absence of any definite conclusion — for while Socrates and the youth are agreed that philosophy is to be studied, they are not able to arrive at any certain result about the art which is to teach it. This is a question which will hereafter be answered in the Republic and the Politicus.

The characters of the Dialogue are easily intelligible. There is Socrates once more in the character of an old man; and his equal in years, Crito, the father of Critobulus, like Lysimachus in the Laches, his fellow demesman, to whom the scene is narrated, and who once or twice interrupts with a remark after the manner

of the interlocutor in the Phaedo, and adds his commentary at the end; Socrates makes a playful allusion to his money-getting habits. There is the youth Cleinias, the grandson of Alcibiades, who may be compared with Lysis, Charmides, Menexenus, and other ingenuous youths out of whose mouths Socrates draws his own lessons, and to whom he always seems to stand in a kindly and sympathetic relation. Crito will not believe that Socrates has not improved or perhaps invented the answers of Cleinias. The name of the grandson of Alcibiades, who is described as long dead, and who died at the age of forty-four, in the year 404 B. C., suggests not only that the intended scene of the Dialogue could not have been earlier than 404, but that as a fact this Dialogue, which is probably one of the earliest of the Platonic writings, could not have been composed before 390 at the soonest, and probably even later. Ctesippus, who is the lover of Cleinias, has been already introduced to us in the Lysis, and seems there too to deserve the character which is here given him, of a somewhat uproarious young man. But the chief study of all is the picture of the two brothers, who are unapproached in their effrontery, equally careless of what they say to others and of what is said to them, and never at a loss. They are "Arcades ambo et cantare pares et respondere parati." Some superior degree of wit or subtlety is attributed, however, to Euthydemus, who continues the conversation when Dionysodorus has been put to silence.

The epilogue or conclusion of the Dialogue has been criticized as inconsistent with the general scheme. Such a criticism is like similar criticisms on Shakespeare, and proceeds upon a narrow notion of the variety which the Dialogue, like the drama, seems to admit. Plato in the abundance of his dramatic power has chosen to write a play upon a play, just as he often gives us an argument within an argument. At the same time he takes the opportunity of assailing another class of persons who are as alien from the spirit of philosophy as Euthydemus and Dionysodorus. The Eclectic, the Syncretist, the Doctrinaire, have been apt to have a bad name both in ancient and modern times. The persons whom Plato ridicules in the epilogue to the Euthydemus are of this class. They occupy a border-ground between philosophy and politics; they are free from the dangers of politics, and at the same time use philosophy as a means of serving their own interests. Plato quaintly describes them as making two good things, philosophy and politics, a little worse by perverting the objects of both.

Education is the common subject of all Plato's earlier Dialogues. The concluding remark of Crito, that he has a difficulty in educating his two sons, and the advice of Socrates to him that he should not give up philosophy because he has no faith in philosophers, seems to be a preparation for the more peremptory declaration of the Meno that "Virtue can not be taught because there are no teachers."

EUTHYDEMUS

PERSONS OF THE DIALOGUE.

SOCRATES, *who is the narrator of the Dialogue.*
CRITO.
CLEINIAS.
EUTHYDEMUS.
DIONYSODORUS.
CTESIPPUS.

SCENE:— The Lyceum.

Crito. WHO was the person, Socrates, with whom you were talking yesterday at the Lyceum? There was such a crowd around you that I could not get within hearing, but I caught a sight of him over their heads, and I made out, as I thought, that he was a stranger with whom you were talking: who was he?

Socrates. There were two, Crito; which of them do you mean?

Cri. The one who was seated second from you on the right-hand side. In the middle was Cleinias the young son of Axiochus, who has wonderfully grown; he is only about the age of my own Critobulus, but he is much forwarder and very good-looking: the other is thin and looks younger than he is.

Soc. He whom you mean, Crito, is Euthydemus; and on my left hand there was his brother Dionysodorus, who also took part in the conversation.

Cri. Neither of them are known to me, Socrates; they are a new importation of Sophists, as I should imagine. Of what country are they, and what is their line of wisdom?

Soc. As to their origin, I believe that they are natives of this part of the world, and have migrated

from Chios and Thurii; they were driven out of Thurii, and have been living for many years past in this region. As to their wisdom, about which you ask, Crito, they are wonderful — consummate! I never knew what the true pancratiast was before; they are simply made up of fighting, not like the two Acarnanian brothers who fight with their bodies only, but this pair are perfect in the use of their bodies and have a universal mode of fighting (for they are capital at fighting in armor, and will teach the art to any one who pays them): and also they are masters of legal fence, and are ready to do battle in the courts; they will give lessons in speaking and pleading, and in writing speeches. And this was only the beginning of their wisdom, but they have at last carried out the pancratiastic art to the very end, and have mastered the only mode of fighting which had been hitherto neglected by them; and now no one dares look at them: such is their skill in the war of words, that they can refute any proposition whether true or false. Now I am thinking, Crito, of putting myself in their hands; for they say that in a short time they can impart their skill to any one.

Cri. But, Socrates, are you not too old? there may be reason to fear that.

Soc. Certainly not, Crito; as I will prove to you, for I have the consolation of knowing that they began this art of disputation which I covet, quite, as I may say, in old age; last year, or the year before, they had none of their new wisdom. I am only apprehensive that I may bring the two strangers into disrepute, as I have done Connus the son of Metrobius, the harp-player, who is still my music-master; for when the boys who also go to him see me going, they laugh at me and call him grandpapa's master. Now I should not like the strangers to experience this sort of treat-

ment, and perhaps they may be afraid and not like to receive me because of this; and therefore, Crito, I shall try and persuade some old men to go along with me to them, as I persuaded them to go to Connus, and I hope that you will make one: and perhaps we had better take your sons as a bait; they will want to have them, and will be willing to receive us as pupils for the sake of them.

Cri. I see no objection, Socrates, if you like; but first I wish that you would give me a description of their wisdom, that I may know beforehand what we are going to learn.

Soc. I will tell you at once; for I can not say that I did not attend: the fact was that I paid great attention to them, and I remember and will endeavor to tell you the whole story. I was providentially sitting alone in the dressing-room of the Lyceum in which you saw me, and was about to depart, when as I was getting up I recognized the familiar divine sign: so I sat down again, and in a little while the two brothers Euthydemus and Dionysodorus came in, and several others with them, whom I believe to be their disciples, and they walked about in the covered space; they had not taken more than two or three turns when Cleinias entered, who, as you truly say, is very much improved: he was followed by a host of lovers, one of whom was Ctesippus the Paeanian, a well-bred youth, but also having the wildness of youth. Cleinias saw me from the entrance as I was sitting alone, and at once came and sat down on the right hand of me, as you describe; and Dionysodorus and Euthydemus, when they saw him, at first stopped and talked with one another, now and then glancing at us, for I particularly watched them; and then Euthydemus came and sat down by the youth, and the other by me on the left hand; the rest anywhere. I saluted the broth-

ers, whom I had not seen for a long time; and then I said to Cleinias: These two men, Euthydemus and Dionysodorus, Cleinias, are not in a small but in a large way of wisdom, for they know all about war, — all that a good general ought to know about the array and command of an army, and the whole art of fighting in armor: and they know about law too, and can teach a man how to use the weapons of the courts when he is injured.

They heard me say this, and I was despised by them; they looked at one another, and both of them laughed; and then Euthydemus said: Those, Socrates, are matters which we no longer pursue seriously; they are secondary occupations to us.

Indeed, I said, if such occupations are regarded by you as secondary, what must the principal one be; tell me, I beseech you, what that noble study is?

The teaching of virtue, Socrates, he replied, is our principal occupation; and we believe that we can impart it better and quicker than any man.

My God! I said, and where did you learn that? I always thought, as I was saying just now, that your chief accomplishment was the art of fighting in armor; and this was what I used to say of you, for I remember that this was professed by you when you were here before. But now if you really have the other knowledge, O forgive me: I address you as I would superior beings, and ask you to pardon the impiety of my former expression. But are you quite sure about this, Dionysodorus and Euthydemus: the promise is so vast, that a feeling of incredulity will creep in.

You may take our word, Socrates, for the fact.

Then I think you happier in having such a treasure than the great king is in the possession of his kingdom. And please to tell me whether you intend to exhibit this wisdom, or what you will do.

That is why we are come hither, Socrates; and our purpose is not only to exhibit, but also to teach any one who likes to learn.

But I can promise you, I said, that every unvirtuous person will want to learn. I shall be the first; and there is the youth Cleinias, and Ctesippus: and here are several others, I said, pointing to the lovers of Cleinias, who were beginning to gather round us. Now Ctesippus was sitting at some distance from Cleinias; and when Euthydemus leaned forward in talking with me, he was prevented from seeing Cleinias, who was between us; and so, partly because he wanted to look at his love, and also because he was interested, he jumped up and stood opposite to us: and all the other admirers of Cleinias, as well as the disciples of Euthydemus and Dionysodorus, followed his example. And these were the persons whom I showed to Euthydemus, telling him that they were all eager to learn: to which Ctesippus and all of them with one voice vehemently assented, and bid him exhibit the power of his wisdom. Then I said: O Euthydemus and Dionysodorus, I earnestly request you to do myself and the company the favor to exhibit. There may be some trouble in giving the whole exhibition; but tell me one thing, — can you make a good man only of him who is convinced that he ought to learn of you, or of him also who is not convinced? either because he imagines that virtue is not a thing which can be taught at all, or that you two are not the teachers of it. Say whether your art is able to persuade such an one nevertheless that virtue can be taught; and that you are the men from whom he will be most likely to learn.

This is the art, Socrates, said Dionysodorus, and no other.

And you, Dionysodorus, I said, are the men who

among those who are now living are the most likely to stimulate him to philosophy and the study of virtue?

Yes, Socrates, I rather think that we are.

Then I wish that you would be so good as to defer the other part of the exhibition, and only try to persuade the youth whom you see here that he ought to be a philosopher and study virtue. Exhibit that, and you will confer a great favor on me and on every one present; for the fact is that I and all of us are extremely anxious that he should be truly good. His name is Cleinias, and he is the son of Axiochus, and grandson of the old Alcibiades, cousin of the Alcibiades that now is. He is quite young, and we are naturally afraid that some one may get the start of us, and turn his mind in a wrong direction, and he may be ruined. Your visit, therefore, is most happily timed; and I hope that you will make a trial of the young man, and converse with him in our presence, if you have no objection.

These were pretty nearly the expressions which I used; and Euthydemus, in a lofty and at the same time cheerful tone, replied: There can be no objection, Socrates, if the young man is only willing to answer questions.

He is quite accustomed to that, I replied; for his friends often come and ask him questions and argue with him; so that he is at home in answering.

What followed, Crito, how can I rightly narrate? for not slight is the task of rehearsing infinite wisdom, and therefore, like the poets, I ought to commence my relation with an invocation to Memory and the Muses. Now Euthydemus, if I remember rightly, began nearly as follows: O Cleinias, are those who learn the wise or the ignorant?

The youth, overpowered by the question, blushed,

and in his perplexity looked at me for help; and I, knowing that he was disconcerted, said: Don't be afraid, Cleinias, but answer like a man whichever you think; for my belief is that you will derive the greatest good from their questions.

Whichever he answers, said Dionysodorus, leaning forward in my ear and laughing, I prophesy that he will be refuted, Socrates.

While he was speaking to me, Cleinias gave his answer: the consequence was that I had no time to warn him of the predicament in which he was placed, and he answered that those who learned were the wise.

Euthydemus proceeded: There are those whom you call teachers, are there not?

The boy assented.

And they are the teachers of those who learn — the grammar-master and the lyre-master used to teach you and other boys; and you were the learners?

Yes.

And when you were learners you did not as yet know the things which you were learning?

No, he said.

And were you wise then?

No, indeed, he said.

But if you were not wise you were unlearned?

Certainly.

You then, learning what you did not know, were unlearned when you were learning?

The youth nodded assent.

Then the unlearned learn, and not the wise, Cleinias, as you imagine.

At these words the followers of Euthydemus, of whom I spoke, like a chorus at the bidding of their director, laughed and cheered. Then, before the youth had well time to recover, Dionysodorus took him in hand, and said: Yes, Cleinias; and when the

grammar-master dictated to you, were they the wise boys or the unlearned who learned the dictation?

The wise, replied Cleinias.

Then after all the wise are the learners and not the unlearned; and your last answer to Euthydemus was wrong.

Then followed another peal of laughter and shouting, which came from the admirers of the two heroes, who were ravished with their wisdom, while the rest of us were silent and amazed. This Euthydemus perceiving, determined to persevere with the youth; and in order to heighten the effect went on asking another similar question, which might be compared to the double turn of an expert dancer. Do those, said he, who learn, learn what they know, or what they do not know?

Dionysodorus said to me in a whisper: That, Socrates, is just another of the same sort.

Good heavens, I said; and your last question was so good!

Like all our other questions, Socrates, he replied, — inevitable.

I see the reason, I said, why you are in such reputation among your disciples.

Meanwhile Cleinias had answered Euthydemus that those who learned learn what they do not know; and he put him through a series of questions as before.

Don't you know letters?

He assented.

All letters?

Yes.

But when the teacher dictates to you, does he not dictate letters?

He admitted that.

Then if you know all letters, he dictates that which you know?

He admitted that also.

Then, said the other, you do not learn that which he dictates; but he only who does not know letters learns?

Nay, said Cleinias; but I do learn.

Then, said he, you learn what you know, if you know all the letters?

He admitted that.

Then, he said, you were wrong in your answer.

The word was hardly out of his mouth when Dionysodorus took up the argument, like a ball which he caught, and had another throw at the youth. Cleinias, he said, Euthydemus is deceiving you. For tell me now, is not learning acquiring knowledge of that which one learns?

Cleinias assented.

And knowing is having knowledge at the time?

He agreed.

And not knowing is not having knowledge at the time?

He admitted that.

And are those who acquire those who have or have not a thing?

Those who have not.

And have you not admitted that those who do not know are of the number of those who have not?

He nodded assent.

Then those who learn are of the class of those who acquire, and not of those who have?

He agreed.

Then, Cleinias, he said, those who do not know learn, and not those who know.

Euthydemus was proceeding to give the youth a third fall; but I knew that he was in deep water, and therefore, as I wanted to give him a rest, and also in order that he might not get out of heart, I said to him

consolingly: You must not be surprised, Cleinias, at the singularity of their mode of speech: this I say because you may not understand what they are doing with you; they are only initiating you after the manner of the Corybantes in the mysteries; and this answers to the enthronement, which, if you have ever been initiated, is, as you will know, accompanied by dancing and sport; and now they are just prancing and dancing about you, and will next proceed to initiate you; and at this stage you must imagine yourself to have gone through the first part of the sophistical ritual, which, as Prodicus says, begins with initiation into the correct use of terms. The two strange gentlemen wanted to explain to you, as you do not know, that the word " to learn " has two meanings, and is used, first, in the sense of acquiring knowledge of some matter of which you previously have no knowledge, and also, when you have the knowledge, in the sense of reviewing this same matter done or spoken by the light of this knowledge; this last is generally called " knowing " rather than " learning; " but the word " learning " is also used, and you did not see that the word is used of two opposite sorts of men, of those who know, and of those who do not know, as they explained. There was a similar trick in the second question, when they asked you whether men learn what they know or what they do not know. These parts of learning are not serious, and therefore I say that these gentlemen are not serious, but only in fun with you. And if a man had all that sort of knowledge that ever was, he would not be at all the wiser; he would only be able to play with men, tripping them up and oversetting them with distinctions of words. He would be like a person who pulls away a stool from some one when he is about to sit down, and then laughs and claps his hands at the sight

of his friend sprawling on the ground. And you must regard all that has passed hitherto as merely play. But now I am certain that they will proceed to business, and keep their promise (I will show them how); for they promised to give me a sample of the hortatory philosophy, but I suppose that they wanted to have a game of play with you first. And now, Euthydemus and Dionysodorus, I said, I think that we have had enough of this. Will you let me see you exhibiting to the young man, and showing him how he is to apply himself to the study of virtue and wisdom? And I will first show you what I conceive to be the nature of the task, and what I desire to hear; and if I do this in a very inartistic and ridiculous manner, do not laugh at me, for I only venture to improvise before you because I am eager to hear your wisdom: and I must therefore ask you to keep your countenances, and your disciples also. And now, O son of Axiochus, let me put a question to you: Do not all men desire happiness? And yet, perhaps, this is one of those ridiculous questions which I am afraid to ask, and which ought not to be asked by a sensible man: for what human being is there who does not desire happiness?

There is no one, said Cleinias, who does not.

Well, then, I said, since we all of us desire happiness, how can we be happy? — that is the next question. Shall we not be happy if we have many good things? And this, perhaps, is even a more simple question than the first, for there can be no doubt of the answer.

He assented.

And what things do we esteem good? No solemn sage is required to tell us this, which may be easily answered; for every one will say that wealth is a good.

Certainly, he said.

And are not health and beauty goods, and other personal gifts?

He agreed.

Now, can there be any doubt that good birth, and power, and honors in one's own land, are goods?

He assented.

And what other goods are there? I said. What do you say of justice, temperance, courage: do you not verily and indeed think, Cleinias, that we shall be more right in ranking them as goods than in not ranking them as goods? For a dispute might possibly arise about this. What then do you say?

They are goods, said Cleinias.

Very well, I said; and in what company shall we find a place for wisdom — among the goods or not?

Among the goods.

And now, I said, think whether we have left out any considerable goods.

I do not think that we have, said Cleinias.

Upon recollection, I said, indeed I am afraid that we have left out the greatest of them all.

What is that? he asked.

Fortune, Cleinias, I replied; which all, even the most foolish, admit to be the greatest of goods.

True, he said.

On second thoughts, I added, how narrowly, O son of Axiochus, have you and I escaped making a laughing-stock of ourselves to the strangers.

Why do you say that?

Why, because we have already spoken of fortune, and are but repeating ourselves.

What do you mean?

I mean that there is something ridiculous in putting fortune again forward, and saying the same thing twice over.

He asked what was the meaning of this, and I replied: Surely wisdom is good fortune; even a child may know that.

The simple-minded youth was amazed; and, observing this, I said to him: Do you not know, Cleinias, that flute-players are most fortunate and successful in performing on the flute?

He assented.

And are not the scribes most fortunate in writing and reading letters?

Certainly.

Amid the dangers of the sea, again, are any more fortunate on the whole than wise pilots?

None, certainly.

And if you were engaged in war, in whose company would you rather take the risk — in company with a wise general, or with a foolish one?

With a wise one.

And if you were ill, whom would you rather have as a companion in a dangerous illness — a wise physician, or an ignorant one?

A wise one.

You think, I said, that to act with a wise man is more fortunate than to act with an ignorant one?

He assented.

Then wisdom always makes men fortunate: for by wisdom no man could ever err, and therefore he must act rightly and succeed, or his wisdom would be wisdom no longer. At last we somehow contrived to agree in a general conclusion, that he who had wisdom had no longer need of fortune. I then recalled to his mind the previous state of the question. You remember, I said, our making the admission that we should be happy and fortunate if many good things were present with us?

He assented.

And should we be happy by reason of the presence of good things, if they profited us not, or if they profited us?

If they profited us, he said.

And would they profit us, if we only had them and did not use them? For example, if we had a great deal of food and did not eat, or a great deal of drink and did not drink, should we be profited?

Certainly not, he said.

Or would an artisan, who had all the implements necessary for his work, and did not use them, be any the better for the possession of all that he ought to possess? For example, would a carpenter be any the better for having all his tools and plenty of wood, if he never worked?

Certainly not, he said.

And if a person had wealth and all the goods of which we were just now speaking, and did not use them, would he be happy because he possessed them?

No indeed, Socrates.

Then, I said, a man who would be happy must not only have the good things, but he must also use them; there is no advantage in merely having them?

True.

Well, Cleinias, but if you have the use as well as the possession of good things, is that sufficient to confer happiness?

Yes, in my opinion.

And may a person use them either rightly or wrongly?

He must use them rightly.

That is quite true, I said. And the wrong use of a thing is far worse than the non-use; for the one is an evil, and the other is neither a good nor an evil. You admit that.

He assented.

Now in the working and use of wood, is not that which gives the right use simply the knowledge of the carpenter?

Nothing else, he said.

And surely, in the manufacture of vessels, knowledge is that which gives the right way of making them?

He agreed.

And in the use of the goods of which we spoke at first — wealth and health and beauty, is not knowledge that which directs us to the right use of them, and guides our practice about them?

Knowledge, he replied.

Then in every possession and every use of a thing, knowledge is that which gives a man not only good fortune but success?

He assented.

And tell me, I said, O tell me, what do possessions profit a man, if he have neither sense nor wisdom? Would a man be better off, having and doing many things without wisdom, or a few things with wisdom? Look at the matter thus: If he did fewer things would he not make fewer mistakes? if he made fewer mistakes would he not have fewer misfortunes? and if he had fewer misfortunes would he not be less miserable?

Certainly, he said.

And who would do least — a poor man or a rich man?

A poor man.

A weak man or a strong man?

A weak man.

A noble man or a mean man?

A mean man.

And a coward would do less than a courageous and temperate man?

Yes.

And an indolent man less than an active man?

He assented.

And a slow man less than a quick; and one who had dull perceptions of seeing and hearing less than one who had keen eyes?

All this was mutually allowed by us.

Then, I said, Cleinias, the sum of the matter appears to be that the goods of which we spoke before are not to be regarded as goods in themselves, but the degree of good and evil in them depends on whether they are or are not under the guidance of knowledge: under the guidance of ignorance, they are greater evils than their opposites, inasmuch as they are more able to minister to the evil principle which rules them; and when under the guidance of wisdom and virtue, they are greater goods: but in themselves they are nothing?

That, he said, appears to be certain.

What then, I said, is the result of all this? Is not this the result — that other things are indifferent, and that wisdom is the only good, and ignorance the only evil?

He assented.

Let us consider this further point, I said: Seeing that all men desire happiness, and happiness, as has been shown, is gained by a use, and a right use, of the things of life, and the right use of them, and good fortune in the use of them, is given by knowledge, — the inference is that every man ought by all means to try and make himself as wise as he can?

Yes, he said.

And the desire to obtain this treasure, which is far more precious than money, from a father or a guardian or a friend or a suitor, whether citizen or stranger — the eager desire and prayer to them that they would impart wisdom to you, is not at all dis-

honorable, Cleinias; nor is any one to be blamed for doing any honorable service or ministration to any man, whether a lover or not, if his aim is wisdom. Do you agree to that, I said?

Yes, he said, I quite agree, and think that you are right.

Yes, I said, Cleinias, if only wisdom can be taught, and does not come to man spontaneously; for that is a point which has still to be considered, and is not yet agreed upon by you and me.

But I think, Socrates, that wisdom can be taught, he said.

Best of men, I said, I am delighted to hear you say that; and I am also grateful to you for having saved me from a long and tiresome speculation as to whether wisdom can be taught or not. But now, as you think that wisdom can be taught, and that wisdom only can make a man happy and fortunate, will you not acknowledge that all of us ought to love wisdom, and that you in particular should be of this mind and try to love her?

Certainly, Socrates, he said; and I will do my best.

I was pleased at hearing this; and I turned to Dionysodorus and Euthydemus and said: That is an example, clumsy and tedious I admit, of the sort of exhortations which I desire you to offer; and I hope that one of you will set forth what I have been saying in a more artistic style: at any rate take up the inquiry where I left off, and next show the youth whether he should have all knowledge; or whether there is one sort of knowledge only which will make him good and happy, and what that is. For, as I was saying at first, the improvement of this young man in virtue and wisdom is a matter which we have very much at heart.

Thus I spoke, Crito, and was all attention to what

was coming. I wanted to see how they would approach the question, and where they would start in their exhortation to the young man that he should practise wisdom and virtue. Dionysodorus the elder spoke first. Everybody's eyes were directed towards him, perceiving that something wonderful might shortly be expected. And certainly they were not far wrong; for the man, Crito, began a remarkable discourse well worth hearing, and wonderfully persuasive as an exhortation to virtue.

Tell me, he said, Socrates and the rest of you who say that you want this young man to become wise, are you in jest or in real earnest?

(I was led by this to imagine that they fancied us to have been jesting when we asked them to converse with the youth, and that this made them jest and play, and being under this impression, I was the more decided in saying that we were in profound earnest.) Dionysodorus said:

Reflect, Socrates; you may have to deny your words.

I have reflected, I said; and I shall never deny my words.

Well, said he, and so you say that you wish Cleinias to become wise?

Undoubtedly.

And he is not wise as yet?

At least his modesty will not allow him to say that he is.

You wish him, he said, to become wise and not to be ignorant?

That we do.

You wish him to be what he is not, and no longer to be what he is.

I was thrown into consternation at this.

Taking advantage of my consternation he added:

You wish him no longer to be what he is, which can only mean that you wish him to perish. Pretty lovers and friends they must be who want their favorite not to be, or to perish!

When Ctesippus heard this he got very angry (as a lover might) and said: Strangers of Thurii — if politeness would allow me I should say, You be ——. What can make you tell such a lie about me and the others, which I hardly like to repeat, as that I wish Cleinias to perish?

Euthydemus replied: And do you think, Ctesippus, that it is possible to tell a lie?

Yes, said Ctesippus; I should be mad to deny that.

And in telling a lie, do you tell the thing of which you speak or not?

You tell the thing of which you speak.

And he who tells, tells that thing which he tells, and no other?

Yes, said Ctesippus.

And that is a distinct thing apart from other things?

Certainly.

And he who says that thing says that which is?

Yes.

And he who says that which is, says the truth. And therefore Dionysodorus, if he says that which is, says the truth of you and no lie.

Yes, Euthydemus, said Ctesippus; but in saying this, he says what is not.

Euthydemus answered: And that which is not is not.

True.

And that which is not is nowhere?

Nowhere.

And can any one do anything about that which has

no existence, or do to Cleinias that which is not and is nowhere?

I think not, said Ctesippus.

Well, but do rhetoricians, when they speak in the assembly, do nothing?

Nay, he said, they do something.

And doing is making?

Yes.

And speaking is doing and making?

He agreed.

Then no one says that which is not, for in saying that, he would be doing nothing; and you have already acknowledged that no one can do what is not. And therefore, upon your own showing, no one says what is false; but if Dionysodorus, says anything, he says what is true and what is.

Yes, Euthydemus, said Ctesippus; but he speaks of things in a certain way and manner, and not as they really are.

Why, Ctesippus, said Dionysodorus, do you mean to say that any one speaks of things as they are?

Yes, he said, — all gentlemen and truth-speaking persons.

And are not good things good, and evil things evil?

He assented.

And you say that gentlemen speak of things as they are?

Yes.

Then the good speak evil of evil things, if they speak of them as they are?

Yes, indeed, he said; and they speak evil of evil men. And if I may give you a piece of advice, you had better take care that they don't speak evil of you, since I can tell you that the good speak evil of the evil.

And do they speak great things of the great,

rejoined Euthydemus, and warm things of the warm?

Yes, indeed, said Ctesippus; and they speak coldly of the insipid and cold dialectician.

You are abusive, Ctesippus, you are abusive!

Indeed, I am not, Dionysodorus, he replied; for I love you and am giving you friendly advice, and, if I could, would persuade you not to make so uncivil a speech to me as that I desire my beloved, whom I value above all men, to perish.

I saw that they were getting exasperated with one another, so I made a joke with him and said: O Ctesippus, I think that we must allow the strangers to use language in their own way, and not quarrel with them about words, but be thankful for what they give us. If they know how to destroy men in such a way as to make good and sensible men out of bad and foolish ones — whether this is a discovery of their own, or whether they have learned from some one else, this new sort of death and destruction, which enables them to get rid of a bad man and put a good one in his place — if they know this (and they do know this — at any rate they said just now that this was the secret of their newly-discovered art) — let them, in their phraseology, destroy the youth and make him wise, and all of us with him. But if you young men do not like to trust yourselves with them, then *fiat experimentum in corpore senis;* I will be the Carian on whom they shall operate. And here I offer my old person to Dionysodorus; he may put me into the pot, like Medea the Colchian, kill me, pickle me, eat me, if he will only make me good.

Ctesippus said: And I, Socrates, am ready to commit myself to the strangers; they may skin me alive, if they please (and I am pretty well skinned by them already), if only my skin is made at last, not like that

of Marsyas, into a leathern bottle, but into a piece of virtue. And here is Dionysodorus fancying that I am angry with him, when I am really not angry at all; I do but contradict him when he seems to me to be in the wrong: and you must not confound abuse and contradiction, O illustrious Dionysodorus; for they are quite different things.

Contradiction! said Dionysodorus; why, there never was such a thing.

Certainly there is, he replied; there can be no question of that. Do you, Dionysodorus, maintain that there is not?

You will never prove to me, he said, that you have heard any one contradicting any one else.

Indeed, he said; then now you may hear Ctesippus contradicting Dionysodorus. Are you prepared to make that good?

Certainly, he said.

Well, then, are not words expressive of things?

Yes.

Of their existence or of their non-existence?

Of their existence. For, as you may remember, Ctesippus, we just now proved that no man could affirm a negative; for no one could affirm that which is not.

And what does that signify, said Ctesippus; you and I may contradict all the same for that.

But can we contradict one another, said Dionysodorus, when both of us are describing the same thing? Then we must surely be speaking the same thing?

He admitted that.

Or when neither of us is speaking of the same thing? For then neither of us says a word about the thing at all?

He granted that also.

But when I describe something and you describe

another thing, or I say something and you say nothing — is there any contradiction? How can he who speaks contradict him who speaks not?

Here Ctesippus was silent; and I in my astonishment said: What do you mean, Dionysodorus? I have often heard, and have been amazed, to hear this thesis of yours, which is maintained and employed by the disciples of Protagoras, and others before them, and which to me appears to be quite wonderful and suicidal, as well as destructive, and I think that I am most likely to hear the truth of this from you. The dictum is that there is no such thing as falsehood; a man must either say what is true or say nothing. Is not that your position?

He assented.

But if he can not speak falsely, may he not think falsely?

No, he can not, he said.

Then there is no such thing as false opinion?

No, he said.

Then there is no such thing as ignorance, or men who are ignorant; for is not ignorance, if there be such a thing, a mistake of facts?

Certainly, he said.

And that is impossible?

Impossible, he replied.

Are you saying this as a paradox, Dionysodorus; or do you seriously maintain that no man is ignorant?

Do you refute me? he said.

But how can I refute you, if, as you say, falsehood is impossible?

Very true, said Euthydemus.

Neither did I tell you just now to refute me, said Dionysodorus; for how can I tell you to do that which is not?

O Euthydemus, I said, I have but a dull conception

of these subtleties and excellent devices of wisdom; I am afraid that I hardly understand them, and you must forgive me therefore if I ask a very stupid question: if there be no falsehood or false opinion or ignorance, there can be no such thing as erroneous action, for a man can not fail of acting as he is acting — that is what you mean?

Yes, he replied.

And now, I said, I will ask my stupid question: If there is no such thing as error in deed, word, or thought, then what, in the name of goodness, do you come hither to teach? And were you not just now saying that you could teach virtue best of all men, to any one who could learn?

And are you such an old fool, Socrates, rejoined Dionysodorus, that you bring up now what I said at first — and if I had said anything last year, I suppose that you would bring that up — but are nonplussed at the words I have just uttered?

Why, I said, they are not easy to answer; for they are the words of wise men: and indeed I have a great difficulty in knowing what you mean in that last expression of yours, "that I am non-plussed at them." What do you mean by that, Dionysodorus? You must mean that I have no refutation of them. Tell me if the words have any other sense.

No, he said; the sense or meaning of them is that there is a difficulty in answering them; and I wish that you would answer.

What, before you, Dionysodorus? I said.

Answer, said he.

And is that fair?

Yes, quite fair, he said.

Upon what principle? I said. I can only suppose that you are a very wise man, who comes to us in the character of a great logician, and who knows when to

answer and when not to answer — and now you won't open your mouth at all, because you know that you ought not.

You prate, he said, instead of answering. But if, my good sir, you admit that I am wise, answer as I tell you.

I suppose that I must obey, for you are master. Put the question.

Are the things which have sense alive or lifeless?

They are alive.

And do you know of any word which is alive?

I can not say that I do.

Then why did you ask me what sense my words had?

Why, because I was stupid and made a mistake. And yet, perhaps, I was right after all in saying that words have a sense; — what do you say, wise man? If I was not in error, and you do not refute me, all your wisdom will be non-plussed; but if I did fall into error, then again you are wrong in saying that there is no error, — and this remark was made by you not quite a year ago. I am inclined to think, however, Dionysodorus and Euthydemus, that this argument is not very likely to advance: even your skill in the subtleties of logic, which is really amazing, has not found out the way of throwing another and not falling yourself.

Ctesippus said: Men of Chios, Thurii, or however and whatever you call yourselves, I wonder at you, for you seem to have no objection to talking nonsense.

Fearing that there would be high words, I endeavored to soothe Ctesippus, and said to him: To you, Ctesippus, I must repeat what I said before to Cleinias — that you don't understand the peculiarity of these philosophers. They are not serious, but, like the Egyptian wizard, Proteus, they take different

forms and deceive us by their enchantments: and let us, like Menelaus, refuse to let them go until they show us their real form and character. When they are in earnest their full beauty will appear: let us then beg and entreat and beseech them to shine forth. And I think that I had better show them once more the form in which I pray to behold them. I will go on where I left off before, as well as I can, in the hope that I may touch their hearts and move them to pity, and that when they see me deeply serious, they may also be serious. You, Cleinias, I said, shall remind me at what point we left off. Did we not agree that philosophy should be studied? and was not that our conclusion?

Yes, he replied.

And philosophy is the acquisition of knowledge?

Yes, he said.

And what knowledge ought we to acquire? Is not the simple answer to that, A knowledge that will do us good?

Certainly, he said.

And should we be any the better if we went about having a knowledge of the places where most gold was hidden in the earth?

Perhaps we should, he said.

But have we not already proved, I said, that we should be none the better off, even if without trouble and digging all the gold that there is in the earth were ours? And if we knew how to convert stones into gold, the knowledge would be of no value to us, unless we also knew how to use the gold? Do you not remember? I said.

I quite remember, he said.

Nor would any other knowledge, whether of money-making, or of medicine, or of any other art which knows only how to make a thing, and not to use that

which is made, be of any use to us. Is not that true?

He agreed.

And if there were a knowledge which was able to make men immortal, without giving them the knowledge of the way to use the immortality, neither would there be any use in that, if we may argue from the analogy of the previous instances?

To all this he agreed.

Then, my dear boy, I said, the knowledge which we want is one that uses as well as makes?

True, he said.

And our desire is not to be skilful lyre-makers, or artists of that sort; far otherwise: for with them the art which makes is one, and the art which uses is another. Having to do with the same, they are divided; for the art which makes and the art which plays on the lyre differ widely from one another. Am I not right?

He agreed.

And clearly we do not want the art of the flute-maker; for that is another of the same sort?

He assented.

But suppose, I said, that we were to learn the art of making speeches — would that be the art which would make us happy?

I think not, rejoined Cleinias.

And what proof have you of that? I asked.

I see, he replied, that there are some composers of speeches who do not know how to use the speeches which they make, just as the makers of lyres do not know how to use the lyres; and also some who are of themselves unable to compose speeches, but are able to use the speeches which the others make for them; and this proves that the art of making speeches is not the same as the art of using them.

Yes, I said; and that I think is a sufficient proof

that the art of making speeches is not one which will make a man happy. And yet I did think that the art which we are seeking might be discovered in that direction; for the composers of speeches, whenever I meet them, always appear to me to be very extraordinary men, Cleinias, and their art is lofty and divine, and no wonder. For their art is a part of the great art of enchantment, and hardly, if at all, inferior to it: and whereas the art of the enchanter is a mode of charming snakes and spiders and scorpions, and other monsters and pests, this art acts upon dicasts and ecclesiasts and bodies of men, for the charming and consoling of them. Do you agree with me?

Yes, he said, I think that you are quite right.

Whither then shall we go, I said, and to what art shall we have recourse?

I do not see my way, he said.

But I think that I do, I replied.

And what is your notion? asked Cleinias.

I think that the art of the general is the one the possession of which is most likely to make a man happy.

I do not think that, he said.

Why not? I said.

The art of the general is surely an art of hunting mankind.

What of that? I said.

Why, he said, no art of hunting extends beyond hunting and capturing; and when the prey is taken they can not use it; but the huntsman or fisherman hands it over to the cook, and the geometricians and astronomers and calculators (who all belong to the hunting class, for they do not make their diagrams, but only find out that which was previously contained in them) — they, I say, not being able to use but only to catch their prey, hand over their inventions to the

dialecticians to be applied by them, if they have any sense in them.

Good, I said, fairest and wisest Cleinias. And is this true?

Certainly, he said; just as a general when he takes a city or a camp hands over his new acquisition to the statesman, for he does not know how to use them himself; or as the quail-taker transfers the quails to the keeper of them. If we are looking for that art which is to make us blessed, and which is able to use that which it makes or takes, the art of the general is not the one, and some other must be found.

Cri. And do you mean to say, Socrates, that the youngster said that?

Soc. Are you incredulous, Crito?

Cri. Indeed, I am; for if he said that, I am of opinion that he needs neither Euthydemus nor any one else to be his instructor.

Soc. Perhaps I may have forgotten, and Ctesippus was the real answerer.

Cri. Ctesippus! nonsense.

Soc. All I know is that I heard these words, and that they were not spoken either by Euthydemus or Dionysodorus. I dare say, my good Crito, that they may have been spoken by some superior person. That I heard them I am certain.

Cri. Yes, indeed, Socrates, by some one a good deal superior, as I should be disposed to think. But did you carry the search any further, and did you find the art which you were seeking?

Soc. Find! my dear sir, no indeed. And we cut a poor figure; we were like children after larks, always on the point of catching the art, which was always getting away from us. But why should I repeat the whole story? At last we came to the kingly art, and inquired whether that gave and caused hap-

piness, and then we got into a labyrinth, and when we thought we were at the end, came out again at the beginning, having still to seek as much as ever.

Cri. How did that happen, Socrates?

Soc. I will tell you; the kingly art was identified by us with the political.

Cri. Well, and what came of that?

Soc. To this royal or political art all the arts, including that of the general, seemed to render up the supremacy, as to the only one which knew how to use that which they created. This seemed to be the very art which we were seeking — the art which is the source of good government, and which may be described, in the language of Aeschylus, as alone sitting at the helm of the vessel of state, piloting and governing all things, and utilizing them.

Cri. And were you not right, Socrates?

Soc. You shall judge, Crito, if you are willing to hear what followed; for we resumed the inquiry, and a question of this sort was asked: Does this kingly art, having this supreme authority, do anything for us? To be sure, was the answer. And would not you, Crito, say the same?

Cri. Yes, I should.

Soc. And what would you say that the kingly art does? If medicine were supposed to have supreme authority over the subordinate arts, and I were to ask you a similar question about that, you would say that it produces health?

Cri. I should.

Soc. And what of your own art of husbandry, supposing that to have supreme authority over the subject arts — what does that do? Does it not supply us with the fruits of the earth?

Cri. Yes.

Soc. And what does the kingly art do when in-

vested with supreme power? Perhaps you may not be ready with an answer?

Cri. Indeed I am not, Socrates.

Soc. No more were we, Crito. But at any rate you know that if this is the art which we were seeking, it ought to be useful?

Cri. Certainly.

Soc. And surely it ought to do us some good?

Cri. Certainly, Socrates.

Soc. And Cleinias and I had arrived at the conclusion that knowledge is the only good?

Cri. Yes, that was what you were saying.

Soc. All the other results of politics, and they are many, as for example, wealth, freedom, tranquillity, were neither good nor evil in themselves; but the political science ought to make us wise, and impart wisdom to us, if that is the science which is likely to do us good, and make us happy.

Cri. Yes; that was the conclusion at which you had arrived, according to your report of the conversation.

Soc. And does the kingly art make men wise and good?

Cri. Why not, Socrates?

Soc. What, all men, and in every respect? and teach them all the arts, — carpentering, and cobbling, and the rest of them?

Cri. I do not think that, Socrates.

Soc. But then what is this knowledge, and what are we to do with it? For it is not the source of any works which are neither good nor evil, nor of any knowledge, but the knowledge of itself; what then can it be, and what are we to do with it? Shall we say, Crito, that it is the knowledge by which we are to make other men good?

Cri. By all means.

Soc. And in what way will they be good and use-

ful? Shall we repeat that they will make others good, and that these others will make others again, without ever determining in what they are to be good; for we put aside the results of politics, as they are called. Why, here is iteration; as I said, we are just as far, if not farther, than ever from the knowledge of the art or science of happiness.

Cri. Indeed, Socrates, you do appear to have got into a great perplexity.

Soc. Thereupon, Crito, seeing that I was on the point of shipwreck, I lifted up my voice, and earnestly entreated and called upon the strangers to save me and the youth from the whirlpool of the argument; they were our Castor and Pollux, I said, and they should be serious, and show us in sober earnest what that knowledge was which would enable us to pass the rest of our lives in happiness.

Cri. And did Euthydemus show you this knowledge?

Soc. Yes, indeed; he proceeded in a lofty strain to the following effect: Would you rather, Socrates, said he, that I should show you this knowledge about which you are doubting, or shall I prove that you already have it?

What, I said, are you blessed with such a power as this?

Indeed I am.

Then I would much rather that you should prove me to have such a knowledge; at my time of life that will be more agreeable than having to learn.

Then tell me, he said, do you know anything?

Yes, I said, I know many things, but not anything of much importance.

That will do, he said. And would you admit that anything is what it is, and at the same time is not what it is?

Certainly not.

And did you not say that you knew something?

I did.

If you know, you are knowing.

Certainly, of the knowledge which I have.

That makes no difference; — and must you not, if you are knowing, know all things?

Certainly not, I said, for there are many other things which I do not know.

And if you do not know, you are not knowing.

Yes, my friend, I said, I am not knowing of that which I do not know.

Still you are not knowing, and you said just now that you were knowing; and therefore you are and are not at the same time, and in reference to the same things.

That sounds well, Euthydemus; and yet I must ask you to explain how I have that knowledge which we were seeking; — since a thing can not be and not be, and if I know one thing I know all, for I can not be knowing and not knowing at the same time, and if I know all things, I must have that knowledge as well. May I not assume that to be your ingenious notion?

Out of your own mouth, Socrates, you are convicted, he said.

Well, but, Euthydemus, I said, has that never happened to you; for if I am only in the same case as you and our beloved Dionysodorus, I can not greatly mind that. Tell me then, you two, do you not know some things, and not know others?

Certainly not, Socrates, said Dionysodorus.

What do you mean, I said; do you know nothing?

Nay, he replied, we do know something.

Then, I said, you know all things, if you know anything?

Yes, all things, he said; and that is as true of you as of us.

O, indeed, I said, what a wonderful thing, and what a great blessing! And do all other men know all things or nothing?

Certainly, he replied; they can not know some things, and not know others, and be at the same time knowing and not knowing.

Then what is the inference? I said.

They all know all things, he replied, if they know one thing.

O heavens, Dionysodorus, I said, I see now that you are in earnest; hardly have I got you to that point. And do you really know all things, including carpentering and leather-cutting?

Certainly, he said.

And do you know stitching?

Yes, indeed we do, and cobbling, too.

Yes.

And do you know things such as the numbers of the stars and of the sand?

Certainly; did you think that we should say No to that?

By Zeus, said Ctesippus, interrupting, I only wish that you would give me some proof which would enable me to know whether you say truly.

What proof shall I give you? he said.

Will you tell me how many teeth Euthydemus has? and Euthydemus shall tell how many teeth you have.

Will you not take our word that we know all things?

Certainly not, said Ctesippus; you must further tell us this one thing, and then we shall know that you are speaking the truth; if you tell us the number, and we count them, and you are found to be right, we will

believe the rest. They fancied that Ctesippus was making game of them, and they refused, and contented themselves with saying, in answer to each of his questions, that they knew all things. Ctesippus at last began to throw off all restraint; no question was too bad for him; he would ask them if they knew the foulest things, and they, like wild boars, came rushing on his blows, and fearlessly replied that they did. At last, Crito, I too was carried away by my incredulity, and asked Euthydemus whether Dionysodorus could dance.

Certainly, he replied.

And can he vault upon swords, and turn upon a wheel, at his age? has he got to such a height of skill as that?

He can do anything, he said.

And did you always know this?

Always, he said.

When you were children, and at your birth?

They both said that they did.

This we could not believe. And Euthydemus said: You are incredulous, Socrates.

Yes, I said, and I might well be incredulous, if I did not know that you are wise men.

But if you will answer, he said, I will make you confess to similar marvels.

Well, I said, there is nothing that I should like better than to be self-convicted of this, for if I am really a wise man, which I never knew before, and you will prove to me that I know and have always known all things, there is nothing in life that would be a greater gain to me than that.

Answer then, he said.

Ask, I said, and I will answer.

Do you know something, Socrates, or nothing?

Something, I said.

And do you know with what you know, or with something else?

With what I know; and I suppose that you mean with my soul?

Are you not ashamed, Socrates, of asking a question when you are asked?

Well, I said; but then what am I to do? for I will do what you bid; when I do not know what you are asking, you tell me to answer nevertheless, and not to ask again.

Why, you surely have some notion of my meaning, he said.

Yes, I replied.

Well then answer according to your notion of my meaning.

Yes, I said; but if the question which you ask in one sense is understood and answered by me in another, will that please you — if I answer what is not to the point?

That will please me very well; but will not please you equally well, as I imagine.

I certainly will not answer unless I understand you, I said.

You won't answer, he said, according to your view of the meaning, because you are an old fool and pedant.

Now I saw that he was getting angry with me for drawing distinctions, when he wanted to catch me in his springes of words. And I remembered that Connus was always angry with me when I opposed him, and then he neglected me, because he thought that I was stupid; and as I was intending to go to Euthydemus as a pupil, I thought that I had better let him have his way, as he might think me a blockhead, and refuse to take me. So I said: You are a far better dialectician than myself, Euthydemus, for I have

never made a profession of the art, and therefore do as you say; ask your questions once more, and I will answer.

Answer then, he said, once more, whether you know what you know with something, or with nothing.

Yes, I said; I know with my soul.

The man will go on adding to the question; for, said he, I did not ask you with what you know, but whether you know with something.

My ignorance, I said, led me to answer more than you asked, and I hope that you will forgive that. And now I will answer simply that I always know what I know with something.

And is that something, he rejoined, always the same, or sometimes one thing, and sometimes another thing?

Always, I replied, when I know, I know with this.

Will you not cease adding to your answers?

My fear is that this word "always" may get us into trouble.

You, perhaps, but certainly not us. And now answer: Do you always know with this?

Always; since I am required to withdraw the words "when I know."

You always know with this, or, always knowing, do you know some things with this, and some things with something else, or do you know all things with this?

All that I know, I replied, I know with this.

There again, Socrates, he said, the addition is superfluous.

Well, then, I said, I will take away the words, "that I know."

Nay, take nothing away; I desire no favors of you; but let me ask: Would you be able to know all things, if you did not know all things?

Quite impossible.

And now, he said, you may add on whatever you like, for you confess that you know all things.

I suppose that is true, I said, if my qualification implied in the words, "that I know," is not allowed to stand; and so I do know all things.

And have you not admitted that you always know all things with that which you know, whether you make the addition of when you know them or not? for you have acknowledged that you have always and at once known all things, that is to say, when you were a child, and at your birth, and when you were growing up, and before you were born, and before the heaven and earth existed, you knew all things if you always know them; and I swear that you shall always continue to know them if I am of the mind to make you.

But I hope that you will be of that mind, reverend Euthydemus, I said, if you are really speaking the truth, and yet I a little doubt your power to accomplish this unless you have the help of your brother Dionysodorus; then you may do it. Tell me now, for although in the main I can not doubt that I really do know all things, when I am told so by men of your prodigious wisdom — how can I say that I know such things as this, Euthydemus, that the good are unjust; come, do I know that or not?

Certainly, you know that.

What do I know?

That the good are not unjust.

Quite true, I said; and I have always known that; but the question is, where did I learn that the good are unjust?

Nowhere, said Dionysodorus.

Then, said I, I do not know this.

You are ruining the argument, said Euthydemus to

Dionysodorus; he will be proved not to know, and then after all he will be knowing and not knowing at the same time.

Dionysodorus blushed.

I turned to the other, and said, What do you think, Euthydemus? Does not your omniscient brother appear to you to have made a mistake?

What, replied Dionysodorus in an instant; am I the brother of Euthydemus?

Thereupon I said, Please not to interrupt, my good friend, or prevent Euthydemus from proving to me that I know the unjust to be the good; such a lesson you might at least allow me to learn.

You are running away, Socrates, said Dionysodorus, and refusing to answer.

No wonder, I said, for I am not a match for one of you, and *a fortiori* I must run away from two. I am no Heracles; and even Heracles could not fight against the Hydra, who was a she-sophist, and had the wit to shoot up many new heads when one of them was cut off; especially when he saw a second monster of a sea-crab, who was also a Sophist, and appeared to have newly arrived from a sea voyage, bearing down upon him from the left, opening his mouth and biting. Then he called Iolaus, his nephew, to his help, and he ably succored him; but if my Iolaus, who is Patrocles the statuary, were to come, he would make a bad business worse.

And now that you have delivered yourself of this strain, said Dionysodorus, will you inform me whether Iolaus was the nephew of Heracles any more than he is yours?

I suppose that I had best answer you, Dionysodorus, I said, for you will insist on asking — that I pretty well know — out of envy, in order to prevent me from learning the wisdom of Euthydemus.

Then answer me, he said.

Well then, I said, I have only to say in answer, that Iolaus was not my nephew at all, but the nephew of Heracles; and his father was not my brother Patrocles, but Iphicles, who has a name rather like his, and was the brother of Heracles.

And is Patrocles, he said, your brother?

Yes, I said, he is my half brother, the son of my mother, but not of my father.

Then he is and is not your brother.

Not by the same father, my good man, I said, for Chaeredemus was his father, and mine was Sophroniscus.

And was Sophroniscus and Chaeredemus a father?

Yes, I said; the former was mine, and the latter his father.

Then, he said, Chaeredemus is not a father.

He is not my father, I said.

But can a father be other than a father? or are you the same as a stone?

I certainly do not think that I am a stone, I said, though I am afraid that you may prove me one.

Are you not other than a stone?

I am.

And being other than a stone, you are not a stone; and being other than gold, you are not gold.

Very true.

And so Chaeredemus, he said, being other than a father, is not a father.

I suppose that he is not a father, I replied.

For if, said Euthydemus, taking up the argument, Chaeredemus is a father, then Sophroniscus, being other than a father, is not a father; and you, Socrates, are without a father.

Ctesippus retorted: And is not your father in the same case, for he is other than my father?

Assuredly not, said Euthydemus.

Then he is the same?

He is the same.

I can not say that I like the connection; but is he only my father, Euthydemus, or is he the father of all other men?

Of all other men, he replied. Do you suppose that he is a father and not a father?

Certainly, I did imagine that, said Ctesippus.

And do you suppose that gold is not gold, or that a man is not a man?

They are not "*in pari materia*," Euthydemus, said Ctesippus, and you had better take care, for it is monstrous to suppose that your father is the father of all.

But he is, he said.

What, of men only, said Ctesippus, or of horses and all other animals?

Of all, he said.

And your mother, too, is the mother of all?

Yes, our mother too.

Yes; and your mother has a progeny of sea-urchins then?

Yes; and yours, he said.

And gudgeons and puppies and pigs are your brothers.

And yours too.

And your papa is a dog.

And so is yours, he said.

If you will answer my questions, said Dionysodorus, I will soon extract the same admissions from you, Ctesippus. You say that you have a dog.

Yes, a villain of a one, said Ctesippus.

And he has puppies?

Yes, and they are very like himself.

And the dog is the father of them?

Yes, he said, I certainly saw him and the mother of the puppies come together.

And is he not yours?

To be sure he is.

Then he is a father, and he is yours; ergo, he is your father, and the puppies are your brothers.

Let me ask you one little question more, said Dionysodorus, quickly interposing, in order that Ctesippus might not get in his word: You beat this dog?

Ctesippus said, laughing, Indeed I do; and I only wish that I could beat you instead of him.

Then you beat your father, he said.

I should have had far more reason to beat yours, said Ctesippus; what could he have been thinking of when he begat such wise sons? much good has this father of you and other curs got out of your wisdom.

But neither he nor you, Ctesippus, have any need of much good.

And have you no need, Euthydemus? he said.

Neither I nor any other man; for tell me now, Ctesippus, if you think it good or evil for a man who is sick to drink medicine when he wants it; or to go to war armed rather than unarmed.

Good, I say. And yet I know that I am going to be caught in one of your charming puzzles.

That, he replied, you will discover, if you answer; for seeing that you admitted medicine to be good for a man to drink, when wanted, must it not be good for him to drink as much as possible — a cartload of hellebore will not be too much for him?

Ctesippus said: Certainly not, Euthydemus, if he who drinks be as big as the statue of Delphi.

And if, he said, in war it be good to have arms, he ought to have as many spears and shields as possible?

Very true, said Ctesippus; and do you think that

he ought to have one shield only, Euthydemus, and one spear?

I do.

And would you arm Geryon and Briareus in that way?

Considering the skill which you and your companion have in fighting in armor, I thought that you would have known better. Here Euthydemus held his peace, and Dionysodorus returned to the previous answer.

Don't you think the possession of gold is good?

Yes, said Ctesippus, and the more the better.

And to have money everywhere and always is a good.

Certainly, a great good, he said.

And you admit that gold is a good?

I have admitted that, he replied.

And ought not a man then to have gold everywhere and always, and as much as possible in himself, and may he not be deemed the happiest of men who has three talents of gold in his belly, and a talent in his head, and a stater of gold in either eye?

Yes, Euthydemus, said Ctesippus; and the Scythians count them the happiest and bravest of men who have gold in their own skulls (that is only another instance of your manner of speaking about the dog and father), and what is still more extraordinary, they drink out of their own skulls gilt, and see the inside of them, and hold their own heads in their hands.

And do the Scythians and others see that which has the quality of vision, or that which has not? said Euthydemus.

That which has the quality of vision clearly.

And you also see that which has the quality of vision? he said.

Yes, I do.

Then do you see our garments?

Yes.

Then our garments have the quality of vision.

They can see to any extent, said Ctesippus.

What can they see?

Nothing; but you, my sweet man, may perhaps imagine that they do not see; and certainly, Euthydemus, you do seem to me to have been caught napping when you were not asleep, and that if it be possible to say and say nothing — that is what you are doing.

And may not a person speak and be silent? said Dionysodorus.

Impossible, said Ctesippus.

Or be silent and speak.

That is still more impossible, he said.

But when you speak of stones, wood, iron bars, do you not speak (of them) silent?

Not when I pass a smithy; for then the iron bars make a tremendous noise and outcry if they are touched: so that here your wisdom is strangely mistaken; please, however, to tell me how you can be silent when speaking (I thought that Ctesippus was put upon his mettle because Cleinias was present).

When you are silent, said Euthydemus, are you not silent about all things?

Yes, he said.

Then the speaking are silent, if speaking things are included in all things.

What, said Ctesippus, are not all things silent?

Certainly not, said Euthydemus.

Then, my good friend, do they all speak?

Yes; those which speak.

Nay, said Ctesippus, but the question which I ask is whether all things are silent or speak?

Neither and both, said Dionysodorus, quickly interposing; I am sure that you will be "non-plussed" at that answer.

Here Ctesippus, as his manner was, burst into a roar of laughter; he said, That brother of yours, Euthydemus, has got into a dilemma; all is over with him. This delighted Cleinias, whose laughter made Ctesippus ten times as uproarious; but I can not help thinking that the rogue must have picked up this answer from them; for there has been no wisdom like theirs in our time. Why do you laugh, Cleinias, I said, at such solemn and beautiful things?

Why, Socrates, said Dionysodorus, did you ever see a beautiful thing?

Yes, Dionysodorus, I replied, I have seen many.

Were they other than the beautiful, or the same as the beautiful?

Now I was in a great quandary at having to answer this question, and I thought that I was rightly served for having opened my mouth at all: I said however, They are not the same as absolute beauty, but they have beauty present with each of them.

And are you an ox because an ox is present with you, or are you Dionysodorus, because Dionysodorus is present with you?

I don't like to hear you say that, I replied.

But how, he said, by reason of one thing being present with another, will one thing be another?

Is that your difficulty? I said. For I was beginning to imitate their skill, on which my heart was set.

Yes, he answered, and I and all the world are in a difficulty about the non-existent.

What do you mean, Dionysodorus, I said. Is not the honorable honorable and the base base?

That, he said, is as I please.

And do you please?

Yes, he said.

Also you will admit that the same is the same, and the other other; for surely the other is not the same; I should imagine that even a child will hardly have any difficulty about this. But, I think, Dionysodorus, that you must have intentionally missed the last question; for in general you seem to me to be a good workman, and to do the dialectician's business excellently well.

What, said he, is the business of a good workman? tell me, in the first place, whose business is hammering?

The smith's.

And whose the making of pots?

The potter's.

And who has to kill and skin and mince and boil and cook?

The cook, I said.

And if a man does his business he does rightly?

Certainly.

And the business of the cook is to cut up and skin; you have admitted that?

Yes, I have admitted that, but you must not be too severe upon me.

Then if some one were to kill, mince, boil, roast the cook, he would do his business, and if he were to hammer the smith, and pot the potter, he would do their business.

Poseidon, I said, this is the crown of wisdom; can I ever hope to have such wisdom of my own?

And would you be able, Socrates, to recognize this wisdom when it has become your own?

Certainly, I said, if you will allow me.

What, he said, do you think that you know what is your own?

Yes, I do, subject to your correction; for you are

the bottom, and Euthydemus is the top, of all my wisdom.

Is not that which you would deem your own, he said, that which you have in your own power, and which you are able to use as you would desire, for example, an ox or a sheep — would you not think that your own which you could sell and give and sacrifice to any god whom you pleased, and that which you could not give or sell or sacrifice you would think not to be in your own power?

Yes, I said (for I was certain that something good would come of the questions, which I was impatient to hear); yes, such things only are mine.

Yes, he said, and you would mean by animals living beings?

Yes, I said.

You admit then, that those animals only are yours with which you have the power to do all these things which I was just naming.

I admit that.

Then, after an ironical pause, in which he seemed to be thinking of something great, he said: Tell me, Socrates, have you an ancestral Zeus? Here anticipating the final move which was to enclose me in the net, in the attempt to get away, I gave a desperate twist and said: No, Dionysodorus, I have not.

What a miserable man you must be then, he said; you are not an Athenian if you have no ancestral gods or temples, or any other good.

Nay, Dionysodorus, I said, do not be rough; good words, if you please; in the way of religion I have altars and temples, domestic and ancestral, and all that other Athenians have.

And have not other Athenians, he said, an ancestral Zeus?

That name, I said, is not to be found among the

Ionians, whether colonists or citizens of Athens; an ancestral Apollo there is, who is the father of Ion, and a family Zeus, and a Zeus guardian of the phratry, and an Athene guardian of the phratry. But the name of ancestral Zeus is unknown to us.

No matter, said Dionysodorus, for you admit that you have Apollo, Zeus, and Athene.

Certainly, I said.

And they are your gods, he said.

Yes, I said, my lords and ancestors.

At any rate they are yours, he said, did you not admit that?

I did, I said; what is going to happen to me?

And are not these gods animals? For you admit that all things which have life are animals; and have not these gods life?

They have life, I said.

And are they not animals?

They are animals, I said.

And you admitted that of animals those are yours which you could give away or sell or offer in sacrifice, as you pleased?

I did admit that, Euthydemus, and I have no way of escape.

Well then, said he, if you admit that Zeus and the other gods are yours, can you sell them or give them away, or do what you will with them, as you would with other animals?

At this I was quite struck dumb, Crito, and lay prostrate. Ctesippus came to the rescue.

Bravo, Heracles, brave words, said he.

Bravo Heracles, or is Heracles a bravo? said Dionysodorus.

Poseidon, said Ctesippus, what awful distinctions. I will have no more of them; the pair are invincible.

Then, my dear Crito, there was universal applause of the speakers and their words, and what with laughing and clapping of hands and rejoicings the two men were quite overpowered; for hitherto only their partisans had cheered at each successive hit, but now the whole company shouted with delight until the columns of the Lyceum returned the sound, seeming almost to sympathize in their joy. To such a pitch was I affected myself, that I made a speech, in which I acknowledged that I had never seen the like of their wisdom; I was their devoted servant, and fell to praising and admiring of them. What marvellous dexterity of wit, I said, enabled you to acquire this great perfection in such a short time? There is much, indeed, to admire in your words, Euthydemus and Dionysodorus, but there is nothing that I admire more than your magnanimous disregard of any opinion — whether of the many, or of the grave and reverend seigniors — which is not the opinion of those who are like minded with you. And I do verily believe that there are few who are like you, and would approve of your arguments; the majority of mankind are so ignorant of their value, that they would be more ashamed of employing them in the refutation of others than of being refuted by them. I must further express my approval of your kind and public-spirited denial of all differences, whether of good and evil, white or black, or any other; the result of which is that, as you say, every mouth is stopped, not excepting your own, which graciously follows the example of others; and thus all ground of offence is taken away. But what appears to me to be more than all is, that this art and invention of yours is so admirably contrived, that in a very short time it can be imparted to any one. I observe that Ctesippus learned to imitate you in no time. Now this quickness of attain-

ment is an excellent thing; but at the same time I would advise you not to have any more public entertainments; there is a danger that men may undervalue an art which they have so easy an opportunity of learning; the exhibition would be best of all, if the discussion were confined to your two selves; but if there must be an audience, let him only be present who is willing to pay a handsome fee; — you should be careful of this; — and if you are wise, you will also bid your disciples discourse with no man but you and themselves. For only what is rare is valuable; and water, which, as Pindar says, is the best of all things, is also the cheapest. And now I have only to request that you will receive Cleinias and me among your pupils.

Such was the discussion, Crito; and after a few more words had passed between us we went away. I hope that you will come to them with me, since they say that they are able to teach any one who will give them money, however old or stupid. And one thing which they said I must repeat for your especial benefit, — that not even the business of making money need hinder any man from taking in their wisdom with ease.

Cri. Truly, Socrates, though I am curious and ready to learn, yet I fear that I am not like minded with Euthydemus, but one of the other sort, who, as you were saying, would rather be refuted by such arguments than use them in refutation of others. And though I may appear ridiculous in venturing to advise you, I think that you may as well hear what was said to me by a man of very considerable pretensions — he was a professor of legal oratory — who came away from you while I was walking up and down. "Crito," said he to me, "are you attending to these wise men?" "No, indeed," I said to him;

"I could not get within hearing of them, there was such a crowd." "You would have heard something worth hearing if you had." "What was that?" I said. "You would have heard the greatest masters of the art of rhetoric discoursing." "And what did you think of them?" I said. "What did I think of them," he said; "what any one would think of them who heard them talking nonsense, and making much ado about nothing." That was the expression which he used. "Surely," I said, "philosophy is a charming thing." "Charming!" he said; "what simplicity! philosophy is nought; and I think that if you had been present you would have been ashamed of your friend — his conduct was so very strange in placing himself at the mercy of men who care not what they say, and fasten upon every word. And these, as I was telling you, are supposed to be the most eminent professors of their time. But the truth is, Crito, that the study and the men themselves are both equally mean and ridiculous." Now his censure of the pursuit, Socrates, whether coming from him or from others, appears to me to be undeserved; but as to the impropriety of holding a public discussion with such men, I confess that I thought he was in the right about that.

Soc. O Crito, they are marvellous men; but what was I going to say? What manner of man was he who came up to you and censured philosophy; was he an orator who himself practises in the courts, or an instructor of orators, who makes the speeches with which they do battle?

Cri. He was certainly not an orator, and I doubt whether he had ever been into court; but they say that he knows the business, and is a clever man, and composes wonderful speeches.

Soc. Now I understand, Crito; he is one of an

amphibious class, whom I was on the point of mentioning — one of those whom Prodicus describes as on the border-ground between philosophers and statesmen — they think that they are the wisest of all men, and that they are generally esteemed the wisest; nothing but the rivalry of the philosophers stands in their way; and they are of the opinion that if they can prove the philosophers to be good for nothing, no one will dispute their title to the palm of wisdom, for that they are really the wisest, although they are apt to be mauled by Euthydemus and his friend, when they get hold of them in conversation. This opinion which they entertain of their own wisdom is very natural; for they have a certain amount of philosophy, and a certain amount of political wisdom; there is reason in what they say, for they argue that they have just enough of both, while they keep out of the way of all risks and conflicts and reap the fruits of their wisdom.

Cri. What do you say of them, Socrates? There is certainly something specious in that notion of theirs.

Soc. Yes, Crito, there is more speciousness than truth; they can not be made to understand the nature of intermediates. For all persons or things, which are intermediate between two other things, and participant of them — if one of these two things is good and the other evil, are better than the one and worse than the other; but if they are in a mean between two good things which do not tend to the same end, they fall short of either of their component elements in the attainment of their ends. Only in the case when the two component elements which do not tend to the same end are evil is the participant better than either. Now, if philosophy and political action are both good, but tend to different ends, and they participate in both, and are in a mean between them, then they are

talking nonsense, for they are worse than either; or, if the one be good and the other evil, they are better than the one and worse than the other; only on the supposition that they are both evil could there be any truth in what they say. I do not think that they will admit that their two pursuits are either wholly or partly evil; but the truth is, that these philosopher-politicians who aim at both fall short of both in the attainment of their respective ends, and are really third, although they would like to stand first. There is no need, however, to be angry at this ambition of theirs — they may be forgiven that; for every man ought to be loved who says and manfully pursues and works out anything which is at all like wisdom: at the same time we shall do well to see them as they really are.

Cri. I have often told you, Socrates, that I am in a constant difficulty about my two sons. What am I to do with them? There is no hurry about the younger one, who is only a child; but the other, Critobulus, is getting on, and needs some one who will improve him. I can not help thinking, when I hear you talk, that there is a sort of madness in many of our anxieties about our children: — in the first place, about marrying a wife of good family to be the mother of them, and then about heaping up money for them — and yet taking no care about their education. But then again, when I contemplate any of those who pretend to educate others, I am amazed. They all seem to me to be such outrageous beings, if I am to confess the truth: so that I do not know how I can advise the youth to study philosophy.

Soc. Dear Crito, do you not know that in every profession the inferior sort are numerous and good for nothing, and the good are few and beyond all price: for example, are not gymnastic and rhetoric

and money-making and the art of the general, noble arts?

Cri. Certainly they are, in my judgment.

Soc. Well, and do you not see that in each of these arts the many are ridiculous performers?

Cri. Yes, indeed, that is very true.

Soc. And will you on this account shun all these pursuits yourself and refuse to allow them to your son?

Cri. That would not be reasonable, Socrates.

Soc. Do you then be reasonable, Crito, and do not mind whether the teachers of philosophy are good or bad, but think only of philosophy herself. Try and examine her well and truly, and if she be evil seek to turn away all men from her, and not your sons only; but if she be what I believe that she is, then follow her and serve her, you and your house, as the saying is, and be of good cheer.

ION

INTRODUCTION

THE Ion is the shortest, or nearly the shortest, of all the writings which bear the name of Plato, and is not authenticated by any early external testimony. The grace and beauty of this little work supply the only, and perhaps a sufficient, proof of its genuineness. The plan is simple, and the dramatic interest consists entirely in the contrast between the irony of Socrates and the transparent vanity and childlike enthusiasm of the rhapsode Ion. The theme of the Dialogue may possibly have been suggested by the passage of Xenophon's Memorabilia (iv. 2, 10) in which the rhapsodists are described by Euthydemus as "very precise about the exact words of Homer, but very foolish themselves."

Ion the rhapsode has just come to Athens; he has been exhibiting in Epidaurus at the festival of Asclepius, and is intending to exhibit at the festival of the Panathenaea. Socrates admires and envies the rhapsode's art — for he is always well dressed and in good company — in the company of good poets and of Homer, who is the prince of them. In the course of conversation the admission is elicited from Ion that his skill is restricted to Homer, and that he knows nothing of inferior poets, such as Hesiod and Archilochus; — he brightens up and is wide awake when Homer is being recited, but is apt to go to sleep at the recitations of any other poet. "And yet, surely, he who knows the superior ought to know the inferior also; — he who can judge of the good speaker is able to judge of the bad. And poetry is a whole; and he who judges of poetry by rules of art ought to be able to judge all poetry." This is confirmed by the analogy of sculpture, painting, flute-playing, and the other arts. The argument is at last brought home to the mind of Ion, who asks how this contradiction is to be solved. The solution given by Socrates is as follows: —

The rhapsode is not guided by rules of art, but is an inspired person who derives a mysterious power from the poet; and the poet, in like manner, is inspired by the God. The poets and

their interpreters may be compared to a chain of magnetic rings suspended from one another, and from a magnet. The magnet is the Muse, and the large ring which comes next in order is the poet himself; then follow the rhapsodes and actors, who are rings of inferior power; and the last ring of all is the spectator. The poet is the inspired interpreter of the God, and the rhapsode is the inspired interpreter of the poet, and this is the reason why some poets, like Tynnichus, are the authors of single poems, and some rhapsodes the interpreters of single poets.

Ion is delighted at the notion of being inspired, and acknowledges that he is beside himself when he is performing; — his eyes rain tears and his hair stands on end. Socrates is of opinion that a man must be mad who behaves in this way at a festival when there is nothing to trouble him. Ion is confident that Socrates would never think him mad if he could only hear his embellishments of Homer. Socrates asks whether he can speak well about everything in Homer. "Yes, indeed he can." "What about things of which he has no knowledge?" Ion answers that he can interpret anything in Homer. But, rejoins Socrates, when Homer speaks of the arts, as for example, of chariot-driving, or of medicine, or of prophecy, or of navigation — will he, or will the charioteer or physician or prophet or pilot be the better judge? Ion is compelled to admit that every man will judge of his own particular art better than the rhapsode. He still maintains, however, that he understands the art of the general as well as any one. "Then why in this city of Athens, in which men of merit are always being sought after, is he not at once appointed a general?" Ion replies that he is a foreigner, and the Athenians and Spartans will not appoint a foreigner to be their general. "No, that is not the real reason. But Ion has long been playing tricks with the argument; like Proteus, he transforms himself into a variety of shapes, and is at last about to escape in the disguise of a general. Would he rather be regarded as inspired or dishonest?" Ion eagerly embraces the alternative of inspiration.

The Ion, like the other earlier Platonic Dialogues, is a mixture of jest and earnest, in which no definite result is obtained, but some Socratic or Platonic truths are allowed dimly to appear.

The elements of a true theory of poetry are contained in the notion that the poet is inspired. Genius is often said to be unconscious, or spontaneous, or a gift of nature: that genius is akin to madness is a popular aphorism of modern times. The greatest

strength is often observed to have an element of limitation. It is said, too, that the force of nature must have its way, and is incapable of correction or improvement. Reflections of this kind may have been passing before Plato's mind when he describes the poet as inspired, or when, as in the Apology, he speaks of poets as the worst critics of their own writings — anybody taken at random from the crowd is a better interpreter of them than they are of themselves. They are sacred persons, "winged and holy things," who have a touch of madness in their composition, and should be treated with every sort of respect, but not allowed to live in a well-ordered state.

In the Protagoras the ancient poets are recognized by Protagoras himself as the original sophists; and this family resemblance may be traced in the Ion. The rhapsode belongs to the realm of imitation and of opinion: he professes to have all knowledge, which is derived by him from Homer, just as the sophist professes to have all wisdom, which is contained in his art of rhetoric. Even more than the sophist he is incapable of appreciating the commonest logical distinctions; his great memory remarkably contrasts with his inability to follow the steps of the argument. And in his highest dramatic flights he has an eye to his own gains.

The old quarrel between philosophy and poetry, which in the Republic leads to their final separation, is already working in the mind of Plato, and is embodied by him in the contrast between Socrates and Ion. Yet, as in the Republic, Socrates shows a sort of sympathy with the poetic nature. Also, the manner in which Ion is affected by his own recitations affords a lively illustration of the power which, in the Republic, Socrates attributes to dramatic performances over the mind of the performer. His allusion to his embellishments of Homer, in which he declares himself to have surpassed Metrodorus of Lampsacus and Stesimbrotus of Thasos, seems to show that, like them, he belonged to the allegorical school of interpreters. The circumstance that nothing more is known of him may be adduced in confirmation of the argument that this truly Platonic little work is not a forgery of later times.

ION

PERSONS OF THE DIALOGUE

SOCRATES. ION.

Socrates. WELCOME, Ion. Are you from your native city of Ephesus?

Ion. No, Socrates; but from Epidaurus, where I attended the festival of Asclepius.

Soc. And do the Epidaurians have contests of rhapsodes at the festival?

Ion. O yes, and of all sorts of musical performers.

Soc. And were you one of the competitors — and did you succeed?

Ion. I obtained the first prize of all, Socrates.

Soc. Well done; and I hope that you will do the same for us at the Panathenaea.

Ion. And I will, please heaven.

Soc. I often envy the profession of a rhapsode, Ion; for you have always to wear fine clothes and to look as beautiful as you can is a part of your art. Then, again, you are obliged to be continually in the company of many good poets; and especially of Homer, who is the best and most divine of them; and to understand him, and not merely learn his words by rote, is a thing greatly to be envied. And no man can be a rhapsode who does not understand the meaning of the poet. For the rhapsode ought to interpret the mind of the poet to his hearers, and he can not do this well unless he knows what he means. All this is greatly to be envied.

Ion. That is true, Socrates; and that has certainly been the most troublesome part of my art; and I believe that I can speak about Homer better than any man; and that neither Metrodorus of Lampsacus, nor Stesimbrotus of Thasos, nor Glaucon, nor any one else that ever was, had as good ideas about Homer as I have, or as many of them.

Soc. I am glad to hear that, Ion; for I see that you will not refuse to acquaint me with them.

Ion. Certainly, Socrates; you ought to hear my embellishments of Homer. I think that the Homeridae should give me a golden crown as a reward for them.

Soc. I shall take an opportunity of hearing them at some future time. But just now I should like to ask you a question: Does your art extend to Hesiod and Archilochus, or to Homer only?

Ion. To Homer only; and that appears to me to be quite enough.

Soc. Are there any things about which Homer and Hesiod agree?

Ion. Yes; I am of opinion that there are a good many.

Soc. And can you interpret better what Homer says, or what Hesiod says, about these matters in which they agree?

Ion. I can interpret them equally well, Socrates, where they agree.

Soc. But what about matters in which they do not agree? — for example, about divination, of which both Homer and Hesiod have something to say.

Ion. Very true.

Soc. Well now, would you or a good prophet be a better interpreter of what these two poets say, whether they agree or disagree, about divination?

Ion. A prophet.

Soc. But if you were a prophet, would you not be able to interpret them when they disagree as well as when they agree?

Ion. Clearly.

Soc. Well then, how come you to have this skill about Homer, but not about Hesiod or the other poets? Does not Homer speak of the same themes which all other poets handle? Is not war his great argument? and does he not speak of human society and of intercourse of men, good and bad, skilled and unskilled, and of the gods conversing with one another and with mankind, and about what happens in heaven and in the world below, and the generations of gods and heroes? Are not these the themes of which Homer sings?

Ion. Very true, Socrates.

Soc. And do not the other poets sing of the same?

Ion. Yes, Socrates; but not in the same way as Homer.

Soc. What! in a worse way?

Ion. Yes, in a far worse.

Soc. And Homer is better?

Ion. He is incomparably better.

Soc. And yet surely, my dear friend Ion, in a discussion about arithmetic, where many people are speaking, and some one person speaks better than the rest, any one can judge who is the good speaker?

Ion. Yes.

Soc. And he who judges of the good will be the same as he who judges of the bad speakers?

Ion. The same.

Soc. And he will be the arithmetician?

Ion. Yes.

Soc. Well, and in discussions about the wholesomeness of food, when many persons are speaking, and

one speaks better than the rest, will he who recognizes the better speaker be a different person from him who recognizes the worse, or the same?

Ion. Clearly the same.

Soc. And who is he, and what is his name?

Ion. A physician.

Soc. And speaking generally, in all discussions in which the subject is the same and many men are speaking, will not he who knows the good know the bad speaker also? Or if he does not know the bad, neither will he know the good.

Ion. True.

Soc. Is not the same person skilful in both?

Ion. Yes.

Soc. And you say that Homer and the other poets, such as Hesiod and Archilochus, speak of the same things, although not in the same way; but the one speaks well and the other not so well?

Ion. Yes; and I am right in saying that.

Soc. And if you know the good speaker, you would also know that the inferior speakers are inferior?

Ion. That is true.

Soc. Then, my dear friend, can I be mistaken in saying that Ion is equally skilled in Homer and in other poets, since he himself acknowledges that the same person will be a good judge of all those who speak of the same things; and that almost all poets do speak of the same things?

Ion. What then, Socrates, is the reason why I lose attention and go to sleep and have absolutely no ideas, when any one speaks of any other poet; but when Homer is mentioned, I wake up at once and am all attention and have plenty to say?

Soc. That, my friend, is easily explained. No one can fail to see that you speak of Homer not by any art or knowledge. If you were able to speak of him

by rules of art, you would have been able to speak of all other poets, for poetry is a whole.

Ion. Yes.

Soc. And when any one acquires any other art as a whole, the same may be said of them. Would you like me to explain my meaning, Ion?

Ion. Yes, indeed, Socrates; I wish that you would: for I love to hear you wise men talk.

Soc. I wish, Ion, that we could be truly called wise: but the truth is that you rhapsodes and actors, and the poets whose verses you sing, are wise; and I am a common man, who only speaks the truth. For do but consider what a very common and trivial thing this is, which I have said — a thing which any man might say; that when a man has acquired a knowledge of a whole art, the inquiry into good and bad is one and the same. Let us think about this; is not the art of painting a whole?

Ion. Yes.

Soc. And there are and have been many painters good and bad?

Ion. Yes.

Soc. And did you ever know any one who was skilful in pointing out the excellences and defects of Polygnotus the son of Aglaophon, but incapable of criticizing other painters; and when the work of any other painter was produced, went to sleep and was at a loss and had no ideas; but when he had to give his opinion about Polygnotus, or whoever the painter might be, woke up and was attentive and had plenty to say?

Ion. No indeed, I never did.

Soc. Or did you ever know of any one in sculpture, who was skilful in expounding the merits of Daedalus the son of Metion, or of Epeius the son of Panopeus, or of Theodorus the Samian, or of some other individual sculptor; but when the works of other sculp-

tors were produced, was at a loss and went to sleep and had nothing to say?

Ion. No indeed, I never did.

Soc. And if I am not mistaken, you never met with any one among flute-players or harp-players or singers to the harp or rhapsodes who was able to discourse of Olympus or Thamyras or Orpheus, or Phemius, the rhapsode of Ithaca, but was at a loss when he came to speak of Ion of Ephesus, and had no notion of his merits or defects?

Ion. I can not deny that, Socrates. Nevertheless I am conscious in my own self that I do speak better and have more to say about Homer than any other man, and this is the general opinion. But I do not speak equally well about others — tell me the reason of this?

Soc. I perceive, Ion; and I will proceed to explain to you what I imagine to be the reason of this. This gift which you have of speaking excellently about Homer is not an art, but, as I was just saying, an inspiration; there is a divinity moving you, like that in the stone which Euripides calls a magnet, but which is commonly known as the stone of Heraclea. For that stone not only attracts iron rings, but also imparts to them a similar power of attracting other rings; and sometimes you may see a number of pieces of iron and rings suspended from one another so as to form quite a long chain: and all of them derive their power of suspension from the original stone. Now this is like the Muse, who first gives to men inspiration herself; and from these inspired persons a chain of other persons is suspended, who take the inspiration from them. For all good poets, epic as well as lyric, compose their beautiful poems not as works of art, but because they are inspired and possessed. And as the Corybantian revellers when they

dance are not in their right mind, so the lyric poets are not in their right mind when they are composing their beautiful strains: but when falling under the power of music and metre they are inspired and possessed; like Bacchic maidens who draw milk and honey from the rivers, when they are under the influence of Dionysus, but not when they are in their right mind. And the soul of the lyric poet does the same, as they themselves tell us; for they tell us that they gather their strains from honied fountains out of the gardens and dells of the Muses; thither, like the bees, they wing their way. And this is true. For the poet is a light and winged and holy thing, and there is no invention in him until he has been inspired and is out of his senses, and the mind is no longer in him: when he has not attained to this state, he is powerless and is unable to utter his oracles. Many are the noble words in which poets speak of actions like your own words about Homer; but they do not speak of them by any rules of art: only when they make that to which the Muse impels them are their inventions inspired; and then one of them will make dithyrambs, another hymns of praise, another choral strains, another epic or iambic verses — and he who is good at one is not good at any other kind of verse: for not by art does the poet sing, but by power divine. Had he learned by rules of art, he would have known how to speak not of one theme only, but of all; and therefore God takes away the minds of poets, and uses them as his ministers, as he also uses diviners and holy prophets, in order that we who hear them may know that they speak not of themselves who utter these priceless words in a state of unconsciousness, but that God is the speaker, and that through them he is conversing with us. And Tynnichus the Chalcidian affords a striking instance of what I am saying: he

wrote nothing that any one would care to remember but the famous paean which is in every one's mouth, and is one of the finest poems ever written, and is certainly an invention of the Muses, as he himself says. For in this way the God would seem to indicate to us and not allow us to doubt that these beautiful poems are not human, or the work of man, but divine and the word of God; and that the poets are only the interpreters of the Gods by whom they are severally possessed. Was not this the lesson which the God intended to teach when by the mouth of the worst of poets he sang the best of songs? Am I not right, Ion?

Ion. Yes, indeed, Socrates, I feel that you are; for your words touch my soul, and I am persuaded somehow that good poets are the inspired interpreters of the Gods.

Soc. And you rhapsodists are the interpreters of the poets?

Ion. That again is true.

Soc. Then you are the interpreters of interpreters?

Ion. Precisely.

Soc. I wish you would frankly tell me, Ion, what I am going to ask of you: When you produce the greatest effect upon the spectators in the recitation of some striking passage, such as the apparition of Odysseus leaping forth on the floor, recognized by the suitors and casting his arrows at his feet, or the description of Achilles rushing at Hector, or the sorrows of Andromache, Hecuba, or Priam, — are you in your right mind? Are you not carried out of yourself, and does not your soul in an ecstasy seem to be among the persons or places of which she is speaking, whether they are in Ithaca or in Troy or whatever may be the scene of the poem?

Ion. That proof strikes home to me, Socrates. For

I must confess that at the tale of pity my eyes are filled with tears, and when I speak of horrors, my hair stands on end and my heart throbs.

Soc. Well, Ion, and what are we to say of a man who at a sacrifice or festival, when he is dressed in holiday attire, and has gold crowns upon his head, of which nobody has robbed him, appears weeping or panic-stricken in the presence of more than twenty thousand friendly faces, when there is no one spoiling or wronging him; — is he in his right mind or is he not?

Ion. No indeed, Socrates, I must say that strictly speaking he is not in his right mind.

Soc. And are you aware that you produce similar effects on most of the spectators?

Ion. Yes indeed, I am; for I look down upon them from the stage, and behold the various emotions of pity, wonder, sternness, stamped upon their countenances when I am speaking: and I am obliged to attend to them; for unless I make them cry I myself shall not laugh, and if I make them laugh, I shall do anything but laugh myself when the hour of payment arrives.

Soc. Do you know that the spectator is the last of the rings which, as I am saying, derive their power from the original magnet; and the rhapsode like yourself and the actors are intermediate links, and the poet himself is the first link of all? And through all these the God sways the souls of men in any direction which he pleases, and makes one man hang down from another. There is also a chain of dancers and masters and undermasters of bands, who are suspended at the side, and are the rings which hang from the Muse. And every poet has a Muse from whom he is suspended, and by whom he is said to be possessed, which is nearly the same thing; for he is taken possession

of. And from these first rings, which are the poets, depend others, some deriving their inspiration from Orpheus, others from Musaeus; but the greater number are possessed and held by Homer. Of which latter you are one, Ion — possessed by Homer; and when any one repeats the verses of another poet you go to sleep, and know not what to say; but when any one recites a strain of Homer you wake up in a moment, and your soul leaps within you, and you have plenty to say, for not by art or knowledge about Homer do you say what you say, but by divine inspiration and by possession; just as the revellers too have a quick perception of that strain only which is appropriated to the God by whom they are possessed, and have plenty of dances and words for that, but take no heed of any other. And you too, Ion, when the name of Homer is mentioned have plenty to say, and nothing to say of others. And the reason of this is, that you praise Homer not by art but by divine inspiration: and this is the answer to your question.

Ion. That is good, Socrates; and yet I doubt whether you will ever have eloquence enough to persuade me that I praise Homer only when I am mad and possessed; and if you could hear me speak of him I am sure that you would never think that.

Soc. I should like very much to hear you, but not until you have answered a question which I have to ask. On what part of Homer do you speak well? — not surely about every part?

Ion. There is no part, Socrates, about which I do not speak well: of that I can assure you.

Soc. Surely not about things in Homer of which you have no knowledge?

Ion. And what is there of which Homer speaks of which I have no knowledge?

Soc. Why! does not Homer speak in many pas-

sages about arts? For example, about driving; if I can only remember the lines I will repeat them.

Ion. I remember, and will repeat them.

Soc. Tell me then, what Nestor says to Antilochus, his son, where he tells him to be careful of the bend at the horse race in honor of Patroclus.

Ion. "Bend gently," he says, "in the polished chariot to the left of them, and give the horse on the right hand a touch of the whip, and shout — and at the same time slacken his rein. And when you are at the goal, let the left horse draw near, yet so that the nave of the well-wrought wheel may not even seem to touch the extremity; and keep from catching the stone." [1]

Soc. Enough. Now, Ion, will the charioteer or the physician be the better judge of the propriety of these lines?

Ion. The charioteer, clearly.

Soc. And will the reason be that this is his art, or will there be any other reason?

Ion. No, that will be the reason.

Soc. And every art is appointed by God to have knowledge of a certain work; for that which we know by the art of the pilot we do not know by the art of medicine?

Ion. Certainly not.

Soc. Nor do we know by the art of the carpenter that which we know by the art of medicine?

Ion. Certainly not.

Soc. And this is true of all the arts; — that which we know with one art we do not know with the other? But let me preface this question by another: You admit that there are differences of arts?

Ion. Yes.

Soc. You would argue, as I should, that when the subject of knowledge is different, the art is also different?

[1] Il. xxiii. 335.

Ion. Yes.

Soc. Yes; for surely, if the subject of knowledge were the same, there would be no meaning in saying that the arts were different, — if they both gave the same knowledge. For example, I know that here are five fingers, and you know the same. And if I were to ask whether I and you became acquainted with this fact by the help of the same science of arithmetic, you would acknowledge that we did?

Ion. Yes.

Soc. Tell me, then, what I was going to ask you just now, — whether this holds universally? Must the same art have the same subject of knowledge, and any others have other subjects of knowledge?

Ion. That is my opinion, Socrates.

Soc. Then he who has no knowledge of a particular art will have no right judgment of the sayings and doings of that art?

Ion. That is true.

Soc. Then which will be a better judge of the lines of Homer which you were reciting, you or the charioteer?

Ion. The charioteer.

Soc. Why, yes, because you are a rhapsode and not a charioteer.

Ion. Yes.

Soc. And the art of the rhapsode is different from that of the charioteer?

Ion. Yes.

Soc. And if a different knowledge, then a knowledge of different matters?

Ion. Yes.

Soc. You know the passage in which Hecamede the concubine of Nestor is described as giving to the wounded Machaon a posset, as he says,

"Made with Pramnian wine; and she grated cheese of goat's milk with a brazen knife, and at his side there was an onion which gives a relish to drink." [1]

Would you say now that the art of the rhapsode or the art of medicine was better able to judge of these lines?

Ion. The art of medicine.

Soc. And when Homer says,

"And she descended into the deep like a leaden plummet, which, set in the horn of ox that ranges in the fields, rushes along carrying death among the ravenous fishes," — [2]

will the art of the fisherman or of the rhapsode be better able to judge of the propriety of these lines?

Ion. Clearly, Socrates, the art of the fisherman.

Soc. Come now, suppose that you were to say to me: Since you, Socrates, are able to assign different passages in Homer to their corresponding arts, I wish that you would tell me what are the passages the excellence of which ought to be judged of by the prophet and prophetic art, and you shall see how readily and truly I will answer you. For there are many such passages, particularly in the Odyssee; as, for example, the passage in which Theoclymenus of the house of Melampus says to the suitors: —

"Wretched men! what is happening to you? Your heads and your faces and your limbs underneath are shrouded in night; and the voice of lamentation bursts forth, and your cheeks are wet with tears. And the vestibule is full, and the court is full, of ghosts descending into the darkness of Erebus, and the sun has perished out of heaven, and an evil mist is spread abroad." [3]

And there are many such passages in the Iliad also; as for example in the description of the battle near the rampart, where he says: —

[1] Il. x. 638, 630. [2] Il. xxiv. 80. [3] Od. xx. 351.

"As they were eager to pass the ditch, there came to them an omen: a soaring eagle, holding back the people on the left, bore a huge bloody dragon in his talons, still living and panting; nor had he yet resigned the strife, for he bent back and smote the bird which carried him on the breast by the neck, and he in pain let him fall from him to the ground into the midst of the multitude. And the eagle, with a cry, was borne afar on the wings of the wind." [1]

These are the sort of things which I should say that the prophet ought to consider and determine.

Ion. And you are quite right, Socrates, in saying that.

Soc. Yes, Ion, and you are right also. And as I have selected from the Iliad and Odyssee for you passages which describe the office of the prophet and the physician and the fisherman, do you, who know Homer so much better than I do, Ion, select for me passages which relate to the rhapsode and the rhapsode's art, and which the rhapsode ought to examine and judge of better than other men.

Ion. All passages, I should say, Socrates.

Soc. Not all, Ion, surely. Have you already forgotten what you were saying? A rhapsode ought to have a better memory.

Ion. Why, what am I forgetting?

Soc. Do you not remember that you declared the art of the rhapsode to be different from the art of the charioteer?

Ion. Yes, I remember.

Soc. And you admitted that being different they would have different subjects of knowledge?

Ion. Yes.

Soc. Then upon your own showing the rhapsode, and the art of the rhapsode, will not know everything.

Ion. I dare say, Socrates, that there may be exceptions.

[1] Il. xii. 200.

Soc. You mean to say that he will not know the subjects of the other arts. As he does not know all of them, which of them will he know?

Ion. He will know what a man ought to say and what a woman ought to say, and what a freeman and what a slave ought to say, and what a ruler and what a subject.

Soc. Do you mean that a rhapsode will know better than the pilot what the ruler of a sea-tossed vessel ought to say?

Ion. No; the pilot will know that best.

Soc. Or will the rhapsode know better than the physician what the ruler of a sick man ought to say?

Ion. He will not.

Soc. But he will know what a slave ought to say?

Ion. Yes.

Soc. Suppose the slave to be a cowherd; the rhapsode will know better than the cowherd what he ought to say in order to soothe the rage of infuriated cows?

Ion. No, he won't.

Soc. But he will know what a spinning-woman ought to say about the working of wool?

Ion. No.

Soc. But he will know what a general ought to say when exhorting his soldiers?

Ion. Yes, that is the sort of thing which the rhapsode will know.

Soc. Well, but is the art of the rhapsode the art of the general?

Ion. I am sure that I should know what a general ought to say.

Soc. Why, yes, Ion, because you may possibly have a knowledge of the general's art; and you may also have a knowledge of horsemanship as well as of the lyre: in that case you would know when horses were well or ill managed. But suppose I were to

ask you: By the help of which art, Ion, do you know whether horses are well managed, by your skill as a horseman or as a performer on the lyre—what would you answer?

Ion. I should reply, as a horseman.

Soc. And if you judged of performers on the lyre, you would admit that you judged of them as performers on the lyre, and not as horsemen?

Ion. Yes.

Soc. And in judging of the general's art, do you judge of that as a general or a rhapsode?

Ion. That appears to me to be all one.

Soc. What do you mean? Do you mean to say that the art of the rhapsode and of the general is the same?

Ion. Yes, one and the same.

Soc. Then he who is a good rhapsode is also a good general?

Ion. Certainly, Socrates.

Soc. And he who is a good general is also a good rhapsode?

Ion. No; I don't say that.

Soc. But you do say that he who is a good rhapsode is also a good general?

Ion. Certainly.

Soc. And you are the best of Hellenic rhapsodes?

Ion. Far the best, Socrates.

Soc. And are you the best general, Ion?

Ion. To be sure, Socrates; and Homer was my master.

Soc. But then, Ion, what in the name of goodness can be the reason why you, who are the best of generals as well as the best of rhapsodes in all Hellas, go about as a rhapsode instead of being a general? Do you think that the Hellenes want a rhapsode with his golden crown, and do not want a general?

Ion. Why, Socrates, the reason is, that my countrymen, the Ephesians, are the servants and soldiers of Athens, and don't need a general; and you and Sparta are not likely to have me, for you think that you have enough generals of your own.

Soc. My good Ion, did you never hear of Apollodorus of Cyzicus?

Ion. Who may he be?

Soc. One who, though a foreigner, has often been chosen their general by the Athenians: and there is Phanosthenes of Andros, and Heraclides of Clazomenae, whom they have also appointed to the command of their armies and to other offices, although aliens, after they had shown their merit. And will they not choose Ion the Ephesian as their general, and honor him, if he prove himself worthy? Were not the Ephesians originally Athenians; and Ephesus is no mean city? But, indeed, Ion, if you are correct in saying that by art and knowledge you are able to praise Homer, you don't deal fairly with me, and after all your professions of knowing many glorious things about Homer, and promises that you would exhibit them to me, do only deceive me, and will not even explain at my earnest entreaties what is the art of which you are a master. You have literally as many forms as Proteus; and now you go all manner of ways, twisting and turning, and, like Proteus, become all manner of people at once, and at last slip away from me in the disguise of a general, in order that you may escape exhibiting your Homeric lore. And if, as I was saying, you have art, then I should say that in falsifying your promise that you would exhibit Homer, you are not dealing fairly with me. But if, as I believe, you have no art, but speak all these beautiful words about Homer unconsciously under his inspiring influence, then I acquit you of

dishonesty, and shall only say that you are inspired. Which do you prefer to be thought, dishonest or inspired?

Ion. There is a great difference, Socrates, between them; and inspiration is the far nobler alternative.

Soc. Then, Ion, I shall assume the nobler alternative; and attribute to you in your praises of Homer inspiration, and not art.

THE DIALOGUES OF PLATO

VOLUME FOUR. PART TWO

Selections from the Translations of

B. JOWETT, M. A.

Edited with Introductions by

M. J. KNIGHT

GORGIAS

1. THE GOOD MAN DESIRES, NOT A LONG, BUT A VIRTUOUS LIFE

THE Gorgias, like several other writings of Plato, is not easily summarized under a single head, although numerous commentators and editors have attempted the task. We shall, perhaps, not be far wrong if we say that the dialogue is intended to set forth the final victory of truth and righteousness over falsehood and injustice; but we have to travel by many winding roads in order to reach our goal. There is a true rhetoric which convinces us of sin, and a false rhetoric which places evil in a specious light, and "makes the worse appear the better cause." Again, there is a true art of politics which considers only the welfare of the state, and a bastard kind which flatters the multitude and brings ruin on the city. Lastly, there is the contrast between the just man who is happy "even though he suffer undeservedly," and the wicked, who, if they escape punishment in this life, receive fitting chastisement in another world. The lesson or "moral" is pointed by a myth which shows how futile are the falsehoods and conventions of human life, when the soul comes to appear before the judgment-seat of the sons of Zeus in Hades.

The dialogue probably belongs to a middle period of the Platonic writings. It seems to be later than the Phaedrus, which also treats of Rhetoric true and false, but is written in a lighter and more playful vein; it can scarcely come after the Republic, in which the triumph of justice again furnishes a guiding principle of the whole discourse. Thus it may be described as a resumption of the one, and a preparation for the other. A further reason for assigning the dialogue to a later rather than to an earlier date is to be found in the appearance of that austerity or bitterness of tone which marks several of Plato's most important works, e. g. the Statesman and the Laws, and which we may indulge our fancy by attributing in a measure to the circumstances of his life.

The characters of the dialogue, besides the familiar figure of Socrates, are Gorgias, the famous Sophist; Polus, his young disciple, the same whose "Licymnian diction" is ridiculed in the Phaedrus, and Callicles, a wealthy Athenian and friend of Gorgias, not otherwise known to us. Chaerophon, the "excitable" admirer of Socrates, also appears in the prologue, although he does not share in the subsequent discussion. Gorgias himself plays a somewhat subordinate part; and neither he nor his confident and forward pupil, Polus, can offer any substantial resistance to the dialectical prowess of Socrates, that "hero of argument." Callicles, coming to the rescue of Polus, maintains against Socrates "the law of nature," or the principle that "might is right;" he, however, is in turn vanquished, and grudgingly admits "that he is almost convinced" of the truth of his opponent's words. This is the most serious portion of the dialogue; but the earnestness is slightly veiled as usual by the irony of Socrates, which really helps to heighten the effect.

. . . The connection of the passage which is here quoted with what immediately precedes is as follows: — Callicles has been asserting that virtue is a mere sham or convention, and that the unjust man is happy so long as he prospers in his career of crime. Socrates protests against such an impious doctrine, and declares that the unjust is only happy when he is punished for his wickedness. Callicles says that this is absurd; for will not the tyrant be able to put the just man to death or treat him in any cruel manner which he pleases? The answer according to Socrates is that life in itself is of little value; the just man simply desires a good life, whether short or long, happy or miserable. He then proceeds in his half-jesting manner to support his thesis by humorous instances of life-saving arts which are held in little esteem among mankind.

Cal. You always contrive somehow or other, Socrates, to invert everything: do you not know that he who imitates the tyrant will, if he has a mind, kill him who does not imitate him and take away his goods?

Soc. Excellent Callicles, I am not deaf, and I have heard that a great many times from you and from Polus and from nearly every man in the city, but I

wish that you would hear me too. I dare say that he will kill him if he has a mind — the bad man will kill the good and true.

Cal. And is not that just the provoking thing?

Soc. Nay, not to a man of sense, as the argument shows: do you think that all our cares are to be directed to prolonging life to the uttermost, and to the study of those arts which secure us from danger always; like that art of rhetoric which saved men in courts of law, and which you recommend me to cultivate?

Cal. Yes, truly, and very good advice too.

Soc. Well, my friend, but what do you think of the art of swimming; does that appear to have any great pretensions?

Cal. No, indeed.

Soc. And yet surely swimming saves a man from death, and there are occasions on which he must know how to swim. And if you despise the swimmers, I will tell you of another and greater art, the art of the pilot, which not only saves the souls of men, but also their bodies and properties from the extremity of danger, just like rhetoric. But this art is modest and unpresuming, and has no airs or pretences of doing anything extraordinary, and, in return for the same salvation which is given by the pleader, demands only two obols, if the voyage is from Aegina to Athens, or for the longer voyage from Pontus or Egypt at the utmost two drachmae, for the great benefit of saving the passenger and his wife and children and goods, and disembarking them safely at the Piraeus; and he who is the master of the art, and has done all this, gets out and walks about on the sea-shore by his ship in an unassuming way. For he is a philosopher, you must know, and is aware that there is no certainty as to which of his fellow-passengers he has benefited, and

which of them he has injured in not allowing them to be drowned. He knows that they are just the same when he disembarked them as when they embarked, and not a whit better either in their bodies or in their souls; and he considers that if a man who is afflicted by great and incurable bodily diseases is only to be pitied for having escaped, and is in no way benefited by him in having been kept alive; much more must this be true of one who has great and incurable diseases, not in his body, but in his soul, which is the more honorable part of him; neither is life worth having nor of any profit to him, whether he be saved from the sea, or the law-courts, or any other devourer; — he knows that the bad man had better not live, for he can not live well.

And this is the reason why the pilot, although he is our savior, is not usually conceited, any more than the engineer, who is not a whit behind either the general, or the pilot, or any one else, in his saving power, for he sometimes saves whole cities. Is there any comparison between him and the pleader? And yet, Callicles, if he were to talk in your grandiose style, he would bury you under a mountain of words, declaring and insisting that we ought all of us to be engine-makers, and that they are the only realties; he would have plenty to say. Nevertheless you despise him and his art, and sneeringly call him an engine-maker, and you will not allow your daughters to marry his son, or marry your son to his daughters. And yet, on your principle, what justice or reason is there in this? What right have you to despise the engine-maker, and the other whom I was just now mentioning? I know that you will say, " I am better, and better born." But if the better is not what I say, and virtue consists only in a man saving himself and his, whatever may be his character, then your censure

of the engine-maker, and of the physician, and of the other arts of salvation, is ridiculous.

O my friend! I want you to see that the noble and the good may possibly be something different from saving and being saved, and that he who is truly a man ought not to care about living a certain time: — he knows, as women say, that none can escape the day of destiny, and therefore he is not fond of life; he leaves all that with God, and considers in what way he can best spend his appointed term; — whether by assimilating himself to that constitution under which he lives, as you at this moment have to consider, how you may become as like as possible to the Athenian people, if you intended to be dear to them, and to have power in the state; whereas I want you to think and see whether this is for the interest of either of us; — I would not have us risk that which is dearest on the acquisition of this power, like the Thessalian enchantresses, who, as they say, bring down the moon from heaven at the risk of their own perdition.

ALCIBIADES I

SOCRATES HUMILIATES ALCIBIADES BY SHOWING HIM HIS INFERIORITY TO THE KINGS OF LACEDAEMON AND OF PERSIA.

THERE is little substantial reason to doubt the genuineness of the vast majority of the writings which have come down to us under the name of Plato. A few works, however, have been preserved, which are of a less certain character. Of these a small proportion may actually be dialogues written by Plato at an early period of his life, or in hours when the Muses were unpropitious, or they may be the work of members of his school to which, by a natural confusion, his own name has come to be affixed. The remainder and larger number appear to belong to a later date, and are so unmistakably inferior to the undoubted compositions

of Plato, that it is hardly possible seriously to maintain their authenticity.

The First Alcibiades is a good specimen of the former class. It is by no means without merit, and is clearly and simply written. The principal ground for suspicion is that it seems to be merely a rewriting of the theme which occupies a considerable space in the Symposium, — the relations of Socrates to Alcibiades. But the color and glow of the master are wanting: everything betrays the feeble hand of the copyist who is striving to imitate some work of original genius.

The characters of the Dialogue are only two, Socrates and Alcibiades, and no attempt is made to describe the scene or the surroundings. Alcibiades, who is on the point of entering public life, is cross-examined by Socrates as to his fitness for the career of a statesman. Alcibiades at first is confident that he is thoroughly prepared; but Socrates by a series of questions entangles him in self-contradictions, and finally reduces him to a humiliating confession of ignorance. He does not even, as the Delphian inscription recommends, "know himself," and much less is he capable of managing the affairs of others.

The passage which follows is a humorous contrast between the greatness and wealth of the Kings of Sparta and Persia and the insignificance of Alcibiades, both in respect of birth and means. The satire which it conveys on the statesmen of Athens is quite in the spirit of Plato; and we must suppose the writer, if not really Plato himself, to have had in mind the depreciatory references to Pericles and other public men in the Gorgias and the Statesman. And it may have been one at least of the objects with which the Dialogue was composed to exhibit the unfitness and incapacity of the politicians of the time, as well as to show that Socrates was not justly to be blamed for the wickedness and folly of some of those who called themselves his disciples. (Cp. Socrates' defence of himself against this charge in the Apology.)

Soc. You surely know that our city goes to war now and then with the Lacedaemonians and with the great king?

Al. True enough.

Soc. And if you meant to be the ruler of this city, would you not be right in considering that the Lacedaemonian and Persian kings are your true rivals?

Al. I believe that you are right.

Soc. Oh no, my friend, I am quite wrong, and I think that you ought rather to turn your attention to Midias the quail-breeder and others like him, who manage our politics; in whom, as the women would remark, you may still see the slaves' cut of hair, cropping out in their minds as well as on their pates; and they come with their barbarous lingo to flatter us and not to rule us. To these, I say, you should look, and then you will have no need to take any heed of yourself in this noble contest; you will not have to trouble yourself either with learning what has to be learned, or practising what has to be practised, or with any other sort of preparation for a political career.

Al. I think, Socrates, that you are right in that; I do not suppose, however, that the Spartan generals or the great king are really different from anybody else.

Soc. But, my dear friend, do consider what this is which you are saying.

Al. What shall I consider?

Soc. In the first place, will you be more likely to take care of yourself, if you are in a wholesome fear and dread of them, or if you are not?

Al. Clearly, if I have such a fear of them.

Soc. And do you think that you will sustain any injury if you take any care of yourself?

Al. No, I shall be greatly benefited.

Soc. And this is one very important respect in which that notion of yours is bad.

Al. True.

Soc. In the next place, consider that what you say is probably false.

Al. How is that?

Soc. Let me ask you whether better natures

are likely to be found in noble races or not in noble races?

Al. Clearly in noble races,

Soc. Are not those who are well born and well bred most likely to be perfect in nature?

Al. Certainly.

Soc. Then let us compare our antecedents with those of the Lacedaemonian and Persian kings; are they inferior to us in descent? Have we not heard that the former are sprung from Heracles, and the latter from Achaemenes, and that the race of Heracles and the race of Achaemenes go back to Perseus, son of Zeus?

Al. Why, so does mine go back to Eurysaces, and he to Zeus!

Soc. And mine, noble Alcibiades, to Daedalus, who, by the way of Hephaestus, also goes back to Zeus. But, for all this, we are far inferior to them. For they are descended "from Zeus," through a line of kings — either kings of Argos and Lacedaemon, or kings of Persia which they have always possessed, and at various time have been sovereigns of Asia, as they now are; whereas, we and our fathers were but private persons. How ridiculous would you be thought for making a parade of your ancestors and of Salamis the island of Eurysaces, or of Aegina, the habitation of the still more ancient Aeacus to Artaxerxes, son of Xerxes. You should consider how inferior we are to them both in the derivation of our birth and in other particulars. Did you never observe how great is the property of the Spartan kings? And their wives are under the guardianship of the Ephori, who are public officers, and watch over them, in order to preserve the purity of the Heracleid blood.

And the Persian king far surpasses them; for no one ever entertains a suspicion that a prince of Per-

sia can have any other father. Such is the awe which invests the person of the queen, that she needs no other guard. And when the heir of the kingdom is born, all the subjects of the king feast; and the day of his birth is forever afterwards kept as a holiday and time of sacrifice by all Asia; whereas, when you and I were born, Alcibiades, as the comic poet says, the neighbors hardly knew of the important event. After the birth of the royal child, he is tended, not by a good-for-nothing woman-nurse, but by the best of the royal eunuchs, who are charged with the care of the child, and especially with the fashioning and formation of his limbs, in order that he may be as fair as possible; and this being their calling, they are held in great honor. And when the young prince is seven years old he is put upon a horse and taken to the riding-masters and begins to go out hunting. And at fourteen years of age he is handed over to the royal schoolmasters, as they are termed: these are four chosen men, reputed to be the best among the Persians of a certain age; and one of them is the wisest, another the justest, a third the most temperate, and a fourth the most valiant. The first instructs him in the magianism of Zoroaster, the son of Oromasus, which is the worship of the Gods, and teaches him also the duties of his royal office; the second, who is the justest, teaches him always to speak the truth; the third, or most temperate, forbids him to allow any pleasure to be lord over him, that he may be accustomed to be a freeman and king indeed, — lord of himself first, and not a slave; the most valiant makes him bold and fearless, telling him that if he fears he is to deem himself a slave; whereas Pericles gave you, Alcibiades, for a tutor Zophyrus the Thracian, a slave of his with whom he could do nothing else.

I might enlarge on the nurture and education of

your rivals, but that would be tedious; and what I have said is a sufficient sample of what remains to be said. I have only to remark, by way of contrast, that no one cares about your birth or nurture or education, or, I may say, about that of any other Athenian, unless he has a lover who takes care of him. And if you cast an eye on the wealth, the luxury, the garments with their flowing trains, the anointings with myrrh, the multitudes of attendants, and all the other bravery of the Persians, you will be ashamed when you discern your own inferiority; or if you would look at the temperance and orderliness and ease and grace and magnanimity and courage and endurance and love of toil and desire of glory and ambition of the Lacedaemonians — in all these respects you will regard yourself as a child in comparison of them. Nay, even in wealth, if you are inclined to think much of that, I must reveal to you the true state of the case; for if you form an estimate of the wealth of the Lacedaemonians, you will see that our possessions fall far short of theirs. For no one here can compete with them either in the extent and fertility of their own and the Messenian territory, or in the number of their slaves, and especially of the Helots, or of their horses, or of the animals which feed on the Messenian pastures.

But I have said enough of this: and as to gold and silver, there is more of them in Lacedaemon than in all the rest of Hellas, for during many generations gold has been always flowing in to them from the whole Hellenic world, and often from the barbarian also, and never flowing out, as in the fable of Aesop, the fox said to the lion, "The prints of the feet of those going in are distinct enough;" but who ever saw the trace of money going out of Lacedaemon? and therefore you may safely infer that the inhab-

itants are the richest of the Hellenes in gold and silver, and their kings are the richest of them, for the greater part of this harvest goes to their kings, and they have also a tribute paid to them, which is very considerable. Yet the Spartan wealth, though great in comparison of the wealth of the other Hellenes, is as nothing in comparison of that of the Persians and their kings. Why, I have been informed by a credible person who went up to the king [at Susa], that he passed through a large tract of excellent land, extending for nearly a day's journey, which the people of the country called the queen's girdle, and another, which they called her veil; and several other fair and fertile districts, which were reserved for the adornment of the queen, and are named after her several habiliments. Now, I can not help thinking to myself, What, if some one were to go to Amestris, the wife of Xerxes and mother of Artaxerxes, and say to her, There is a certain Dinomachè, whose whole wardrobe is not worth fifty minae — and that will be more than the value — and she has a son who is possessed of a three-hundred acre patch at Erchiae, and he has a mind to go to war with your son — would she not wonder to what this Alcibiades trusts for success in the conflict? "He must rely," she would say to herself, "upon his training and wisdom — these are the things which Hellenes value." And if she heard that this Alcibiades who is making the attempt is not as yet twenty years old, and is wholly uneducated, and that when his lover tells him that he ought to get education and training first, and then go and fight the king, he refuses, and says that he is well enough as he is, would she not be amazed, and ask, "On what, then, does the youth rely?" And if we reply that he relies on his beauty, and stature, and birth, and mental endowments, she would

think that we were mad, Alcibiades, when she compared the advantages which you possess with those of her own people. And I believe that Lampido, the daughter of Leotychides, the wife of Archidamus and mother of Agis, all of whom were kings, would have the same feeling; if, in your present uneducated state, you were to turn your thoughts against her son, she, too, would be equally astonished. But how disgraceful, that we should not have as high a notion of what is required in us as our enemies' wives have of the qualities which are required in their assailants! O my friend, be persuaded by me and hear the Delphian inscription, "Know thyself;" deem these kings to be our antagonists, who are not such as you think, but quite of another sort, and we can only overcome them by pains and skill. And if you fail in the required qualities, you will fail also in becoming renowned among Hellenes and Barbarians, which you seem to desire, as no other man ever desired anything.

PARMENIDES

THE MEETING OF SOCRATES AND PARMENIDES AT ATHENS. CRITICISM OF THE IDEAS

The Parmenides is perhaps the most difficult of all the dialogues of Plato, and one of a group which are not very attractive to the reader who has not been initiated into the "mysteries of dialectic." The subject is the Doctrine of Ideas, those metaphysical abstractions which occupied the mind of Plato more or less during the greater part of his life. They have often been supposed to be the keystone of his system, on which all his other thoughts and conceptions depend for stability.

This view, however, goes beyond the truth. It is a mistake to imagine that Plato had in view a complete scheme of philosophy, which he endeavored to draw out in a series of treatises. His genius was unsystematic and irregular; he was almost as much

a poet as a philosopher; and the testimony of his own writings is sufficient to show that he fell at various periods under the influence of different teachers. The Ideas ought rather to be treated by us as an attempt to convey Plato's conviction that there was a truth unrealized beyond sense, which could only be grasped by the mind when freed from the thraldom of the body. But he was greatly perplexed by the difficulty of finding an adequate expression of his thoughts, and he was perfectly conscious of the many and serious objections which could be urged against his own doctrines.

In the Parmenides, which we may reasonably consider a work of Plato's later years, he has reached a stage at which he is able by an extraordinary effort of intellectual power to produce a criticism of the Ideas which he himself can not refute. Yet he hints by the mouth of Parmenides that he is still convinced of their reality and existence; for, without abstract ideas, thought and reasoning would be impossible. And in the Sophist he resumes the topic with more success, and clears away some of the obstacles to his theory which in the Parmenides had appeared to him to be insuperable.

We went from our home at Clazomenae to Athens, and met Adeimantus and Glaucon in the Agora. Welcome, said Adeimantus, taking me by the hand; is there anything which we can do for you in Athens?

Why, yes, I said, I am come to ask a favor of you.

What is that? he said.

I want you to tell me the name of your half-brother, which I have forgotten; he was a mere child when I last came hither from Clazomenae, but that was a long time ago; your father's name, if I remember rightly, is Pyrilampes?

Yes, he said, and the name of our brother, Antiphon; but why do you ask?

Let me introduce some countrymen of mine, I said; they are lovers of philosophy, and have heard that Antiphon was in the habit of meeting Pythodorus, the friend of Zeno, and remembers certain arguments

which Socrates and Zeno and Parmenides had together, and which Pythodorus had often repeated to him.

That is true.

And could we hear them? I asked.

Nothing easier, he replied; when he was a youth he made a careful study of the pieces; at present his thoughts run in another direction; like his grandfather, Antiphon, he is devoted to horses. But, if that is what you want, let us go and look for him; he dwells at Melita, which is quite near, and he has only just left us to go home.

Accordingly we went to look for him; he was at home, and in the act of giving a bridle to a blacksmith to be fitted. When he had done with the blacksmith, his brothers told him the purpose of our visit; and he saluted me as an acquaintance whom he remembered from my former visit, and we asked him to repeat the dialogue. At first he was not very willing, and complained of the trouble, but at length he consented. He told us that Pythodorus had described to him the appearance of Parmenides and Zeno; they came to Athens, he said, at the great Panathenaea; the former was, at the time of his visit, about 65 years old, very white with age, but well favored. Zeno was nearly 40 years of age, of a noble figure and fair aspect; and in the days of his youth he was reported to have been beloved of Parmenides. He said that they lodged with Pythodorus in the Ceramicus, outside the wall, whither Socrates and others came to see them; they wanted to hear some writings of Zeno, which had been brought to Athens by them for the first time. He said that Socrates was then very young, and that Zeno read them to him in the absence of Parmenides, and had nearly finished when Pythodorus entered, and with him Parmenides and Aris-

toteles who was afterwards one of the Thirty; there was not much more to hear, and Pythodorus had heard Zeno repeat them before.

When the recitation was completed, Socrates requested that the first hypothesis of the first discourse might be read over again, and this having been done, he said: What do you mean, Zeno? Is your argument that the existence of many necessarily involves like and unlike, and that this is impossible, for neither can the like be unlike, nor the unlike like; is that your position? Just that, said Zeno. And if the unlike can not be like, or the like unlike, then neither can the many exist, for that would involve an impossibility. Is the design of your argument throughout to disprove the existence of the many? and is each of your treatises intended to furnish a separate proof of this, there being as many proofs in all as you have composed arguments, of the non-existence of the many? Is that your meaning, or have I misunderstood you?

No, said Zeno; you have quite understood the general drift of the treatise.

I see, Parmenides, said Socrates, that Zeno is your second self in his writings too; he puts what you say in another way, and half deceives us into believing that he is saying what is new. For you, in your compositions, say that the all is one, and of this you adduce excellent proofs; and he, on the other hand, says that the many is naught, and gives many great and convincing evidences of this. To deceive the world, as you have done, by saying the same thing in different ways, one of you affirming and the other denying the many, is a strain of art beyond the reach of most of us.

Yes, Socrates, said Zeno. But although you are as keen as a Spartan hound in pursuing the track,

you do not quite apprehend the true motive of the performance, which is not really such an artificial piece of work as you imagine; there was no intention of concealment effecting any grand result — that was a mere accident. For the truth is, that these writings of mine were meant to protect the arguments of Parmenides against those who ridicule him, and urge the many ridiculous and contradictory results which were supposed to follow from the assertion of the one. My answer is addressed to the partisans of the many, and intended to show that greater or more ridiculous consequences follow from their hypothesis of the existence of the many if carried out, than from the hypothesis of the existence of the one. A love of controversy led me to write the book in the days of my youth, and some one stole the writings, and I had therefore no choice about the publication of them; the motive, however, of writing, was not the ambition of an old man, but the pugnacity of a young one. This you do not seem to see, Socrates; though in other respects, as I was saying, your notion is a very just one.

That I understand, said Socrates, and quite accept your account. But tell me, Zeno, do you not further think that there is an idea of likeness in the abstract, and another idea of unlikeness, which is the opposite of likeness, and that in these two, you and I and all other things to which we apply the term many, participate; and that the things which participate in likeness are in that degree and manner like; and that those which participate in unlikeness are in that degree unlike, or both like and unlike in the degree in which they participate in both? And all things may partake of both opposites, and be like and unlike to themselves, by reason of this participation. Even in that there is nothing wonderful. But if a person

could prove the absolute like to become unlike, or the absolute unlike to become like, that, in my opinion, would be a real wonder; not, however, if the things which partake of the ideas experience likeness and unlikeness — there is nothing extraordinary in this. Nor, again, if a person were to show that all is one by partaking of one, and that the same is many by partaking of many, would that be very wonderful? But if he were to show me that the absolute many was one, or the absolute one many, I should be truly amazed. And I should say the same of other things. I should be surprised to hear that the genera and species had opposite qualities in themselves; but if a person wanted to prove of me that I was many and also one, there would be no marvel in that. When he wanted to show that I was many he would say that I have a right and a left side, and a front and a back, and an upper and a lower half, for I can not deny that I partake of multitude; when, on the other hand, he wants to prove that I am one, he will say, that we who are here assembled are seven, and that I am one and partake of the one, and in saying both he speaks truly. Or if a person shows that the same wood and stones and the like, being many are also one, we admit that he shows the existence of the one and many, but he does not show that the many are one or the one many; he is uttering not a wonder but a truism. If, however, as I was suggesting just now, we were to make an abstraction, I mean of like, unlike, one, many, rest, motion, and similar ideas, and then to show that these in their abstract form admit of admixture and separation, I should greatly wonder at that. This part of the argument appears to be treated by you, Zeno, in a very spirited manner; nevertheless, as I was saying, I should be far more amazed if any one found in the ideas themselves

which are conceptions, the same puzzle and entanglement which you have shown to exist in visible objects.

While Socrates was saying this, Pythodorus thought that Parmenides and Zeno were not altogether pleased at the successive steps of the argument; but still they gave the closest attention, and often looked at one another, and smiled as if in admiration of him. When he had finished, Parmenides expressed these feelings in the following words: —

Socrates, he said, I admire the bent of your mind towards philosophy; tell me now, was this your own distinction between abstract ideas and the things which partake of them? and do you think that there is an idea of likeness apart from the likeness which we possess, or of the one and many, or of the other notions of which Zeno has been speaking?

I think that there are such abstract ideas, said Socrates.

Parmenides proceeded. And would you also make abstract ideas of the just and the beautiful and the good, and of all that class of notions?

Yes, he said, I should.

And would you make an abstract idea of man distinct from us and from all other human creatures, or of fire and water?

I am often undecided, Parmenides, as to whether I ought to include them or not.

And would you feel equally undecided, Socrates, about things the mention of which may provoke a smile? — I mean such things as hair, mud, dirt, or anything else that is foul and base; would you suppose that each of these has an idea distinct from the phenomena with which we come into contact, or not?

Certainly not, said Socrates; visible things like these are such as they appear to us, and I am afraid that there would be an absurdity in assuming any

idea of them, although I sometimes get disturbed, and begin to think that there is nothing without an idea; but then again, when I have taken up this position, I run away, because I am afraid that I may fall into a bottomless pit of nonsense, and perish; and I return to the ideas of which I was just now speaking, and busy myself with them.

Yes, Socrates, said Parmenides; that is because you are still young; the time will come when philosophy will have a firmer grasp of you, if I am not mistaken, and then you will not despise even the meanest things; at your age, you are too much disposed to look to the opinions of men. But I should like to know whether you mean that there are certain forms or ideas of which all other things partake, and from which they are named; that similars, for example, become similar, because they partake of similarity; and great things become great, because they partake of greatness; and that just and beautiful things become just and beautiful, because they partake of justice and beauty?

Yes, certainly, said Socrates, that is my meaning.

And does not each individual partake either of the whole of the idea or of a part of the idea? Is any third way possible?

Impossible, he said.

Then do you think that the whole idea is one, and yet being one, exists in each one of many?

Why not, Parmenides? said Socrates.

Because one and the same existing as a whole in many separate individuals, will thus be in a state of separation from itself.

Nay, replied the other; the idea may be like the day which is one and the same in many places, and yet continuous with itself; in this way each idea may be one and the same in all.

I like your way, Socrates, of dividing one into many; and if I were to spread out a sail and cover a number of men, that, as I suppose, in your way of speaking, would be one and a whole in or on many — that will be the sort of thing which you mean?

I am not sure.

And would you say that the whole sail is over each man, or a part only?

A part only.

Then, Socrates, the ideas themselves will be divisible, and the individuals will have a part only and not the whole existing in them?

That seems to be true.

Then would you like to say, Socrates, that the one idea is really divisible and yet remains one?

Certainly not, he said.

Suppose that you divide greatness, and that of many great things each one is great by having a portion of greatness less than absolute greatness — is that conceivable?

No.

Or will each equal part, by taking some portion of equality less than absolute equality, be equal to some other?

Impossible.

Or suppose one of us to have a portion of smallness; this is but a part of the small, and therefore the small is greater; and while the absolute small is greater, that to which the part of the small is added, will be smaller and not greater than before.

That is impossible, he said.

Then in what way, Socrates, will all things participate in the ideas, if they are unable to participate in them either as parts or wholes?

Indeed, he said, that is a question which is not easily determined.

Well, said Parmenides, and what do you say of another question?

What is that?

I imagine that the way in which you are led to assume the existence of ideas is as follows: — You see a number of great objects, and there seems to you to be one and the same idea of greatness pervading them all; and hence you conceive of a single greatness.

That is true, said Socrates.

And if you go on and allow your mind in like manner to contemplate the idea of greatness and these other greatnesses, and to compare them, will not another idea of greatness arise, which will appear to be the source of them all?

That is true.

Then another abstraction of greatness will appear over and above absolute greatness, and the individuals which partake of it; and then another, which will be the source of that, and then others, and so on; and there will be no longer a single idea of each kind, but an infinite number of them.

But may not the ideas, asked Socrates, be cognitions only, and have no proper existence except in our minds, Parmenides? For in that case there may be single ideas, which do not involve the consequences which were just now mentioned.

And can there be individual cognitions which are cognitions of nothing?

That is impossible, he said.

The cognition must be of something?

Yes.

Of something that is or is not?

Of something that is.

Must it not be of the unity, or single nature, which the cognition recognizes as attaching to all?

Yes.

And will not this unity, which is always the same in all, be the idea?

From that, again, there is no escape.

Then, said Parmenides, if you say that other things participate in the ideas, must you not say that everything is made up of thoughts or cognitions, and that all things think; or will you say that being thoughts they are without thought?

But that, said Socrates, is irrational. The more probable view, Parmenides, of these ideas is, that they are patterns fixed in nature, and that other things are like them, and resemblances of them; and that what is meant by the participation of other things in the ideas, is really assimilation to them.

But if, said he, the individual is like the idea, must not the idea also be like the individual, in as far as the individual is a resemblance of the idea? That which is like, can not be conceived of as other than the like of like.

Impossible.

And when two things are alike, must they not partake of the same idea?

They must.

And will not that of which the two partake, and which makes them alike, be the absolute idea [of likeness]?

Certainly.

Then the idea can not be like the individual, or the individual like the idea; for if they are alike, some further idea of likeness will always arise, and if that be like anything else, another and another; and new ideas will never cease being created, if the idea resembles that which partakes of it?

Quite true.

The theory, then, that other things participate in

the ideas by resemblance, has to be given up, and some other mode of participation devised?

That is true.

Do you see then, Socrates, how great is the difficulty of affirming self-existent ideas?

Yes, indeed.

And, further, let me say that as yet you only understand a small part of the difficulty which is involved in your assumption, that there are ideas of all things, which are distinct from them.

What difficulty? he said.

There are many, but the greatest of all is this: — If an opponent argues that these self-existent ideas, as we term them, can not be known, no one can prove to him that he is wrong, unless he who is disputing their existence be a man of great genius and cultivation, and is willing to follow a long and laborious demonstration — he will remain unconvinced, and still insist that they can not be known.

How is that, Parmenides? said Socrates.

In the first place, I think, Socrates, that you, or any one who maintains the existence of absolute ideas, will admit that they can not exist in us.

Why, then they would be no longer absolute, said Socrates.

That is true, he said; and any relation in the absolute ideas, is a relation which is among themselves only, and has nothing to do with the resemblances, or whatever they are to be termed, which are in our sphere, and the participation in which gives us this or that name. And the subjective notions in our mind, which have the same name with them, are likewise only relative to one another, and not to the ideas which have the same name with them, and belong to themselves, and not to the ideas.

How do you mean? said Socrates.

I may illustrate my meaning in this way, said Parmenides: — A master has a slave; now there is nothing absolute in the relation between them; they are both relations of some man to another man; but there is also an idea of mastership in the abstract, which is relative to the idea of slavery in the abstract; and this abstract nature has nothing to do with us, nor we with the abstract nature; abstract natures have to do with themselves alone, and we with ourselves. Do you see my meaning?

Yes, said Socrates, I quite see your meaning.

And does not knowledge, I mean absolute knowledge, he said, answer to very and absolute truth?

Certainly.

And each kind of absolute knowledge answers to each kind of absolute being?

Yes.

And the knowledge which we have, will answer to the truth which we have; and again, each kind of knowledge which we have, will be a knowledge of each kind of being which we have?

Certainly.

But the ideas themselves, as you admit, we have not, and can not have?

No, we can not.

And the absolute ideas or species, are known by the absolute idea of knowledge?

Yes.

And that is an idea which we have not got?

No.

Then none of the ideas are known to us, because we have no share in absolute knowledge?

They are not.

Then the ideas of the beautiful, and of the good, and the like, which we imagine to be absolute ideas, are unknown to us?

That appears to be the case.

I think that there is a worse consequence still.

What is that?

Would you, or would you not, say, that if there is such a thing as absolute knowledge, that must be a far more accurate knowledge than our knowledge, and the same of beauty and other things?

Yes.

And if there be anything that has absolute knowledge, there is nothing more likely than God to have this most exact knowledge?

Certainly.

But then, will God, having this absolute knowledge, have a knowledge of human things?

And why not?

Because, Socrates, said Parmenides, we have admitted that the ideas have no relation to human notions, nor human notions to them; the relations of either are in their respective spheres.

Yes, that has been admitted.

And if God has this truest authority, and this most exact knowledge, that authority can not rule us, nor that knowledge know us, or any human thing; and in like manner, as our authority does not extend to the gods, nor our knowledge know anything which is divine, so by parity of reason they, being gods, are not our masters; neither do they know the things of men.

Yet, surely, said Socrates, to deprive God of knowledge is monstrous.

These, Socrates, said Parmenides, are a few, and only a few, of the difficulties which are necessarily involved in the hypothesis of the existence of ideas, and the attempt to prove the absoluteness of each of them; he who hears of them will doubt or deny their existence, and will maintain that even if they do exist,

they must necessarily be unknown to man, and he will think that there is reason in what he says, and as we were remarking just now, will be wonderfully hard of being convinced; a man must be a man of real ability before he can understand that everything has a class and an absolute essence; and still more remarkable will he be who makes out all these things for himself, and can teach another to analyze them satisfactorily.

I agree with you, Parmenides, said Socrates; and what you say is very much to my mind.

And yet, Socrates, said Parmenides, if a man, fixing his mind on these and the like difficulties, refuses to acknowledge ideas or species of existences, and will not define particular species, he will be at his wit's end; in this way he will utterly destroy the power of reasoning; and that is what you seem to me to have particularly noted.

Very true, he said.

But, then, what is to become of philosophy? What resource is there, if the ideas are unknown?

I certainly do not see my way at present.

Yes, said Parmenides; and I think that this arises, Socrates, out of your attempting to define the beautiful, the just, the good, and the ideas generally, without sufficient previous training. I noticed your deficiency, when I heard you talking here with your friend Aristoteles, the day before yesterday. The impulse that carries you towards philosophy is noble and divine — never doubt that — but there is an art which often seems to be useless, and is called by the vulgar idle talking; in that you must train and exercise yourself, now that you are young, or truth will elude your grasp.

And what is the nature of this exercise, Parmenides, which you would recommend?

That which you heard Zeno practising; at the same time, I give you credit for saying to him that you did not care to solve the perplexity in reference to visible objects, or to consider the question in that way; but only in reference to the conceptions of the mind, and to what may be called ideas.

Why, yes, he said, there appears to me to be no difficulty in showing that visible things experience likeness or unlikeness or anything else.

Quite true, he said; but I think that you should go a step further, and consider not only the consequences which flow from a given hypothesis, but the consequences which flow from denying the hypothesis; and the exercise will be still better.

What do you mean? he said.

I mean, for example, that in the case of this very hypothesis of Zeno's about the many, you should inquire not only what will follow either to the many in relation to themselves and to the one, or to the one in relation to itself and the many, on the hypothesis of the existence of the many, but also what will follow to the one and many in their relation to themselves or to one another, on the opposite hypothesis. Or if likeness does or does not exist — what will follow on either of these hypotheses to that which is supposed, and to other things in relation to themselves and to one another, and the same of unlikeness; and you may argue in a similar way about motion and rest, about generation and destruction, and even about existence and non-existence; and in a word, whatever you like to suppose as existing or non-existing, or experiencing any sort of affection. You must look at what follows in relation to the thing supposed, and to any other things which you choose, — to the greater number, and to all in like manner; and you must also look at other things in relation to them-

selves and to anything else which you choose, whether you suppose that they do or do not exist, if you would train yourself perfectly and see the real truth.

THEAETETUS

THE Theaetetus is a dialogue for which it is peculiarly difficult to assign a place in the series of the Platonic writings. In style it belongs rather to the earlier class, having many affinities to such works as the Protagoras or the Meno. But in the order of thought it is nearest akin to the Sophist and the Statesman, with which also it appears to be expressly connected by Plato.

The only indication of date which is furnished by the Dialogue itself is the mention in the prologue of the fighting near Corinth. This, however, contains an element of uncertainty. If the Corinthian War (B. C. 394-387) is intended (which is most probably the case), Plato must at least have passed his fortieth year when he wrote the Theaetetus. Or, if the reference is to the later operations in B. C. 369, when Iphicrates was in command at the Isthmus, we must refer the composition of the work to a correspondingly later time in Plato's life.

The principal subject of the dialogue is a discussion of the nature of knowledge and the manner in which it is received by us through perception and sensation. It takes the form chiefly of a criticism of the doctrine of Protagoras that "man is the measure of all things," which is identified with the Heracleitean theory that "all is in a flux," and is explained by Socrates to mean that all knowledge is relative, both in the intellectual and the moral sphere.

Neither of the two passages which follow relate to the main theme. They have the character of digressions, which pleasantly help to beguile the long and sometimes tedious course of the discussion. And we are inclined perhaps to sympathize with Theodorus, when he is dragged back by the indefatigable Socrates into the direct path, and to say that we "prefer the digressions to the argument itself."

1. SOCRATES, A MIDWIFE AND THE SON OF A MIDWIFE

Socrates is here humorously described by one of those figures of speech in which Plato takes such delight, as the midwife who

delivers men of their thoughts and ideas, "the fair and immortal children of the mind," of whom he discourses in the Symposium. For Socrates is unlike any other of the great teachers of mankind; he does not convey ideas to his hearers, but elicits their intellectual conceptions from them, more sometimes, as Theaetetus says, "than was ever in them."

This is part of his mission, or rather, perhaps, another way of describing it; and when the thought comes to the light, he tries and tests it in every way to see whether it is the genuine offspring of wisdom, or the spurious progeny of self-conceit and vanity. Nor can we wonder that the "parents of the child," when it was condemned and pronounced wanting by the merciless judge, were apt to "fall into a rage," and fancied that they had been "deprived of some cherished possession."

Soc. Such are the midwives, whose work is a very important one, but not so important as mine; for women do not bring into the world at one time real children, and at another time idols which are with difficulty distinguished from them; if they did, then the discernment of the true and false birth would be the crowning achievement of the art of midwifery — you would think that?

Theaet. Yes, I certainly should.

Soc. Well, my art of midwifery is in most respects like theirs; but the difference lies in this — that I attend men and not women, and I practise on their souls when they are in labor, and not on their bodies; and the triumph of my art is in examining whether the thought which the mind of the young man is bringing to the birth is a false idol or a noble and true creation. And like the midwives, I am barren, and the reproach which is often made against me, that I ask questions of others and have not the wit to answer them myself, is very just; the reason is, that the god compels me to be a midwife, but forbids me to bring forth. And therefore I am not myself wise, nor have I anything which is the invention or

offspring of my own soul, but the way is this: — Some of those who converse with me, at first appear to be absolutely dull, yet afterwards, as our acquaintance ripens, if the god is gracious to them, they all of them make astonishing progress; and this not only in their own opinion but in that of others. There is clear proof that they have never learned anything of me, but they have acquired and discovered many noble things of themselves, although the god and I help to deliver them.

And the proof is, that many of them in their ignorance, attributing all to themselves and despising me, either of their own accord or at the instigation of others, have gone away sooner than they ought; and the result has been that they have produced abortions by reason of their evil communications, or have lost the children of which I delivered them by an ill bringing up, deeming lies and shadows of more value than the truth; and they have at last ended by seeing themselves, as others see them, to be great fools. Aristides, the son of Lysimachus, is one of this sort, and there are many others. The truants often return to me and beg that I would converse with them again — they are ready to go down on their knees — and then, if my familiar allows, which is not always the case, I receive them, and they begin to grow again. Dire are the pangs which my art is able to arouse and to allay in those who have intercourse with me, just like the pangs of women in childbirth; night and day they are full of perplexity and travail which is even worse than that of the women. So much for them. And there are others, Theaetetus, who come to me apparently having nothing in them; and as I know that they have no need of my art, I coax them into another union, and by the grace of God I can generally tell who is likely to do them good. Many

of them I have given away to Prodicus, and some to other inspired sages.

I tell you this long story, friend Theaetetus, because I suspect, as indeed you seem to think yourself, that you are in labor — great with some conception. Come then to me, who am a midwife and the son of a midwife, and try to answer the question which I will ask you. And if I abstract and expose your first-born, because I discover upon inspection that the conception which you have formed is a vain shadow, do not quarrel with me on that account, as the manner of women is when their first children are taken from them. For I have actually known some who were ready to bite me when I deprived them of a darling folly; they did not perceive that I acted from good will, not knowing that no god is the enemy of man (that was not within the range of their ideas); neither am I their enemy in all this, but religion will never allow me to admit falsehood, or to stifle the truth. Once more, then, Theaetetus, I repeat my old question, "What is knowledge?" and do not say that you can not tell; but quit yourself like a man, and by the help of God you will be able to tell.

2. THE LAWYER AND THE PHILOSOPHER

The description of the lawyer and the philosopher in the Theaetetus is one of the most striking delineations of character in all the writings of Plato. The two types of men are opposed to one another with perfect skill and completeness. The contrast intended by Plato is the same as that which has always existed among mankind under various names and disguises. Aristotle has it in view when he speaks of the "life of action" and the "life of speculation," and a similar difference also appears in another age as the "secular" and the "religious life."

The philosopher is the man of thought and reflection, who dwells apart from others in a world of his own imagination. His mind is absorbed in the contemplation of the eternal and divine;

he can not condescend to the things "which lie at his feet." He sees the faults and follies of human nature so clearly that he is incapacitated for action. But if he has almost too little of the mundane spirit, his rival and opponent is wholly taken up with the matters of daily life. He is the man of affairs, who is unable to snatch an hour from business for solitude and meditation, and whose horizon is bounded by the narrow limits of self-interest. The higher impulses of his nature have withered and died in this arid atmosphere. He is a match for the philosopher in the law courts and the senate; but when he is drawn into a philosophical argument, what a laughing-stock does he become to the wise man!

This is a picture which Plato is never weary of painting: — the philosopher and the politician in the Euthydemus; the philosopher and the man of the world in the Gorgias; the true and the false rhetorician in the Phaedrus, are all variations of the same theme. The union of the two characters in one person is the favorite dream of Plato; the philosopher is to be the king in the state, or, at least, the princes of this world must be trained and educated in the school of philosophy.

Soc. Here is a new question offering, Theodorus, which is likely to be still longer than the last.

Theod. Well, Socrates, we have plenty of leisure.

Soc. That is true, and your remark recalls to my mind an observation which I have often made, that those who have passed their days in the pursuit of philosophy are ridiculously at fault when they have to appear and plead in court. How natural is this!

Theod. What do you mean?

Soc. I mean to say, that those who from their youth upwards have been knocking about in the courts and such like places, compared with those who have received a philosophical education, are slaves, and the others are freemen.

Theod. In what is the difference seen?

Soc. In the leisure of which you were speaking, and which a freeman can always command; he has his talk out in peace, and, like ourselves, wanders at will from one subject to another, and from a second

to a third, if his fancy prefers a new one, caring not whether his words are many or few; his only aim is to attain the truth. But the lawyer is always in a hurry; there is the water of the clepsydra driving him on, and not allowing him to expatiate at will; and there is his adversary standing over him, enforcing his rights; the affidavit, which in their phraseology is termed the brief, is recited; and from this he must not deviate. He is a servant, and is disputing about a fellow-servant before his master, who is seated, and has the cause in his hands; the trial is never about some indifferent matter, but always concerns himself; and often he has to run for his life. The consequence has been, that he has become keen and shrewd; he has learned how to flatter his master in word and indulge him in deed; but his soul is small and unrighteous. His slavish condition has deprived him of growth and uprightness and independence; dangers and fears, which were too much for his truth and honesty, came upon him in early years, when the tenderness of youth was unequal to them, and he has been driven into crooked ways; from the first he has practised deception and retaliation, and has become stunted and warped. And so he has passed out of youth into manhood, having no soundness in him; and is now, as he thinks, a master in wisdom. Such is the lawyer, Theodorus. Will you have the companion picture of the philosopher, who is of our brotherhood; or shall we return to the argument? Do not let us abuse the freedom of digression which we claim.

Theod. Nay, Socrates, let us finish what we were about; for you truly said that we belong to a brotherhood which is free, and are not the servants of the argument; but the argument is our servant, and must wait our leisure. Where is the judge or spec-

tator who has a right to censure or control us, as he might the poets?

Soc. Then, as this is your wish, I will describe the leaders; for there is no use in talking about the inferior sort. In the first place, the lords of philosophy have never, from their youth upwards, known their way to the Agora, or the dicastery, or the council, or any other political assembly; they neither see nor hear the laws or votes of the state written or spoken; the eagerness of political societies in the attainment of offices — clubs, and banquets, and revels, and singing-maidens, do not enter even into their dreams. Whether any event has turned out well or ill in the city, what disgrace may have descended to any one from his ancestors, male or female, are matters of which the philosopher no more knows than he can tell, as they say, how many pints are contained in the ocean. Neither is he conscious of his ignorance. For he does not hold aloof in order that he may gain a reputation; but the truth is, that the outer form of him only is in the city; his mind, disdaining the littlenesses and nothingnesses of human things, is "flying all abroad," as Pindar says, measuring with line and rule the things which are under and on the earth and above the heaven, interrogating the whole nature of each and all, but not condescending to anything which is within reach.

Theod. What do you mean, Socrates?

Soc. I will illustrate my meaning, Theodorus, by the jest which the clever, witty Thracian handmaid made about Thales, when he fell into a well as he was looking up at the stars. She said, that he was so eager to know what was going on in heaven, that he could not see what was before his feet. This is a jest which is equally applicable to all philosophers. For the philosopher is wholly unacquainted with his

next door neighbor; he is ignorant, not only of what he is doing, but whether he is or is not a human creature; he is searching into the essence of man, and is unwearied in discovering what belongs to such a nature to do or suffer different from any other; — I think that you understand me, Theodorus?

Theod. I do, and what you say is true.

Soc. And thus, my friend, on every occasion, private as well as public, as I said at first, when he appears in a law-court, or in any place in which he has to speak of things which are at his feet and before his eyes, he is the jest, not only of Thracian handmaids but of the general herd, tumbling into wells and every sort of disaster through his inexperience. He looks such an awkward creature, and conveys the impression that he is stupid. When he is reviled, he has nothing personal to say in answer to the civilities of his adversaries, for he knows no scandals of any one, and they do not interest him; and therefore he is laughed at for his sheepishness; and when others are being praised and glorified, he can not help laughing very sincerely in the simplicity of his heart; and this again makes him look like a fool. When he hears a tyrant or king eulogized, he fancies that he is listening to the praises of some keeper of cattle — a swineherd, or shepherd, or cowherd, who is being praised for the quantity of milk which he squeezes from them; and he remarks that the creature whom they tend, and out of whom they squeeze the wealth, is of a less tractable and more insidious nature. Then, again, he observes that the great man is of necessity as ill-mannered and uneducated as any shepherd — for he has no leisure, and he is surrounded by a wall, which is his mountain-pen. Hearing of enormous landed proprietors of ten thousand acres and more, our philosopher deems this to be a

trifle, because he has been accustomed to think of the whole earth; and when they sing the praises of family, and say that some one is a gentleman because he has had seven generations of wealthy ancestors, he thinks that their sentiments only betray the dulness and narrowness of vision of those who utter them, and who are not educated enough to look at the whole, nor to consider that every man has had thousands and thousands of progenitors, and among them have been rich and poor, kings and slaves, Hellenes and barbarians, many times over. And when some one boasts of a catalogue of twenty-five ancestors, and goes back to Heracles, the son of Amphitryon, he can not understand his poverty of ideas. Why is he unable to calculate that Amphitryon had a twenty-fifth ancestor, who might have been anybody, and was such as fortune made him, and he had a fiftieth, and so on? He is amused at the notion that he can not do a sum, and thinks that a little arithmetic would have got rid of his senseless vanity. Now, in all these cases our philosopher is derided by the vulgar, partly because he is above them, and also because he is ignorant of what is before him, and always at a loss.

Theod. That is very true, Socrates.

Soc. But, O my friend, when he draws the other into upper air, and gets him out of his pleas and rejoinders into the contemplation of justice and injustice in their own nature and in their difference from one another and from all other things; or from the commonplaces about the happiness of kings to the consideration of government, and of human happiness and misery in general — what they are, and how a man should seek after the one and avoid the other — when that narrow, keen, little legal mind is called to account about all this, he gives the philos-

opher his revenge; for dizzied by the height at which he is hanging, and from which he looks into space, which is a strange experience to him, he being dismayed, and lost, and stammering out broken words, is laughed at, not by Thracian handmaidens or any other uneducated persons, for they have no eye for the situation, but by every man who has not been brought up as a slave. Such are the two characters, Theodorus: the one of the philosopher or gentleman, who may be excused for appearing simple and useless when he has to perform some menial office, such as packing up a bag, or flavoring a sauce or fawning speech; the other, of the man who is able to do every kind of service smartly and neatly, but knows not how to wear his cloak like a gentleman; still less does he acquire the music of speech, or hymn the true life which is lived by immortals or men blessed of heaven.

Theod. If you could only persuade everybody, Socrates, as you do me, of the truth of your words, there would be more peace and fewer evils among men.

Soc. Evils, Theodorus, can never perish; for there must always remain something which is antagonist to good. Of necessity, they hover around this mortal sphere and the earthly nature, having no place among the gods in heaven. Wherefore, also, we ought to fly away thither, and to fly thither is to become like God, as far as this is possible; and to become like him, is to become holy and just and wise. But, O my friend, you can not easily convince mankind that they should pursue virtue or avoid vice, not for the reasons which the many give, in order, forsooth, that a man may seem to be good; — this is what they are always repeating, and this, in my judgment, is an old wives' fable. Let them hear the truth: In God is no unrighteousness at all — he

is altogether righteous; and there is nothing more like him than he of us, who is the most righteous. And the true wisdom of men, and their nothingness and cowardice, are nearly concerned with this. For to know this is true wisdom and manhood, and the ignorance of this is too plainly folly and vice. All other kinds of wisdom or cunning, which seem only, such as the wisdom of politicians, or the wisdom of the arts, are coarse and vulgar. The unrighteous man, or the sayer and doer of unholy things, had far better not yield to the illusion that his roguery is cleverness; for men glory in their shame — they fancy that they hear others saying of them, "these are not mere good-for-nothing persons, burdens of the earth, but such as men should be who mean to dwell safely in a state." Let us tell them that they are all the more truly what they do not know that they are; for they do not know the penalty of injustice, which above all things they ought to know — not stripes and death, as they suppose, which evil-doers often escape, but a penalty which can not be escaped.

Theod. What is that?

Soc. There are two patterns set before them in nature: the one, blessed and divine, the other godless and wretched; and they do not see, in their utter folly and infatuation, that they are growing like the one and unlike the other, by reason of their evil deeds; and the penalty is, that they lead a life answering to the pattern which they resemble. And if we tell them, that unless they depart from their cunning, the place of innocence will not receive them after death; and that here on earth, they will live ever in the likeness of their own evil selves, and with evil friends — when they hear this they in their superior cunning will seem to be listening to fools.

Theod. Very true, Socrates.

Soc. Too true, my friend, as I well know; there is, however, one peculiarity in their case: when they begin to reason in private about their dislike of philosophy, if they have the courage to hear the argument out, and do not run away, they grow at last strangely discontented with themselves; their rhetoric fades away, and they seem to be no better than children. These, however, are digressions from which we must now desist, or they will overflow, and drown our original argument; to which, if you please, we will now return.

Theod. For my part, Socrates, I would rather have the digressions, for at my age I find them easier to follow; but if you wish, let us go back to the argument.

SOPHIST

THE PRE-SOCRATIC PHILOSOPHERS AND THEIR PUZZLES

The Sophist, like the Parmenides, deals with metaphysical problems and puzzles, and with the Doctrine of the Ideas. The form which it takes is an inquiry into the nature and character of the Sophist or pretender to wisdom, who is exhibited in an odious light as the opposite to the true philosopher, ambitious, shallow, mercenary, disputatious, a sorcerer who makes that which is not appear to be.

But, the question is asked, how can "not-being" exist? This, which seems to us an almost meaningless fallacy, was to Plato and his contemporaries a real philosophical difficulty. And accordingly he proceeds to show that the separation of the spheres of the absolute and the relative, of being and not-being, which had been taught by Parmenides and his followers, could not be maintained. All ideas are not incompatible, although some are. Being, for instance, partakes both of rest and motion; whereas rest and motion are inconsistent. Not-being is only the negation of being, just as not-motion or rest is the negation of motion.

In the course of the discussion Plato gives a sketch of the history of Greek philosophy, which is interesting in itself, and is also the first attempt of the kind which is known to us. It is, as we might expect, only an outline of which we are left to fill up the details to the best of our power. Plato divides the philosophers who preceded him into several schools or sects: —

(1) The early Ionian philosophers, like Pherecydes (B. C. 560), who maintained the existence of two or three principles, such as heat and cold, moist and dry, and declared that these were sometimes united and sometimes at strife:

(2) The Eleatics, who derived their origin from Xenophanes (B. C. 540), and Parmenides (B. C. 504), and taught that "the many was also one," and "asserted the unity of the Universe:"

(3) "The Ionian and Sicilian Muses" (Heracleitus, B. C. 504), and Empedocles (B. C. 443), who combined the tenets of Pherecydes and the Eleatics; Heracleitus affirming that plurality and unity were in perpetual process of union and division by love and hate, while Empedocles supposed that they were in regular alternation to each other.

These somewhat crude and primitive philosophers were succeeded by more subtle teachers, whom Plato regards as his principal opponents. He has not clearly stated to whom he is referring; but he appears to have in view chiefly the Megarian School, or, possibly, the early Cynics, who delighted in verbal questions and disputes about being and not-being, and "found no end, in wandering mazes lost."

Lastly, there were the Idealists, by whom is probably intended a School who held in some form a Doctrine of Ideas; and the fierce and uncouth sect of the Materialists, who dragged heaven to earth, and believed in nothing except the evidence of their senses.

Into the midst of this warfare of words Plato has to descend. His object is not so much to put forward opinions of his own, as to gain from the different combatants the truest part of that for which they were fighting. He was by temperament an Eclectic, in the best sense of the term, and during the whole of his life, we find him indefatigable in the search after truth, and ready to welcome her from whatever side she appeared.

The principal character in this dialogue is taken by a Stranger from Elea, "a disciple of Parmenides and Zeno, and a true philosopher."

Str. WILL you, then, forgive me, and, as your words imply, be contented if I slightly flinch from the grasp of such a sturdy argument?

Theaet. Certainly, I will.

Str. There is also another request which I have to make.

Theaet. What is that?

Str. That you will promise not to regard me as a parricide.

Theaet. Why do you say that?

Str. I mean to say that, in self-defence, I must test the philosophy of my father Parmenides, and try to prove by main force that in a certain sense not-being is, and that being is not.

Theaet. Some attempt of the kind is clearly needed.

Str. Yes, a blind man, as they say, might see that, and, unless a decision on this point is obtained, no one when he speaks of false words, or false opinion, or idols, or images, or imitations, or apparitions, or about the arts which are concerned with them, can avoid falling into ridiculous contradictions.

Theaet. Most true.

Str. And therefore I must venture to lay hands on my father's argument; for, if I am to be scrupulous, I must entirely give the matter up.

Theaet. Nothing in the world should ever induce us to do that.

Str. I have a third little excuse which I wish to offer.

Theaet. What is that?

Soc. You heard me say what I have always felt and still feel — that I have no heart for this argument?

Theaet. I did.

Str. I tremble at the thought of what I have said,

and expect that you will deem me mad, when you hear of my sudden changes and shiftings; let me therefore observe to you, that I am proceeding with the argument entirely out of regard for you.

Theaet. You certainly need not fear my bad opinion, or that I shall impute any impropriety to you, if you attempt to establish your refutation; take heart, therefore, and proceed.

Str. And where shall I begin the perilous enterprise? I think that the road which I had better take is ——

Theaet. Which? — Let me hear.

Str. I think that we had better, first of all, consider the points which at present are regarded as self-evident, lest we should have fallen into some confusion about them, and be too ready to assent to one another, fancying that we have the means of judging.

Theaet. Say more clearly what you mean.

Str. I think that Parmenides, and all who undertook to determine the number and nature of existence, talked to us in rather a light and easy strain.

Theaet. How did they talk to us?

Str. As if we had been children, to whom they repeated each their own particular mythus or story; — one said that there were three principles at one time warring in a manner with one another, and then at peace again; and they were married and begat children, and brought them up; and another spoke of two principles, — a moist and dry, or hot and cold, which he brought together and gave in marriage to one another. The Eleatics in our part of the world say that all things are many in name, but in nature one; this is their mythus, which begins with Xenophanes, and is even older. Then there are Ionian, and in more recent times Sicilian muses, who have con-

ceived the thought that to unite the two principles is safer; and they say that being is one and many, which are held together by enmity and friendship, ever parting, ever meeting, as the more potent masters of harmony assert, while the general ones do not insist on the perpetual strife and peace, but admit a relaxation and alternation of them; peace and friendship sometimes prevailing under the sway of Aphrodite, and then again diversity and war, by reason of a principle of strife. Whether any of them spoke the truth in all this is hard to determine; antiquity and famous men should have reverence, and not be liable to such insinuations. Yet one thing may be said of them without offence:

Theaet. What is that?

Str. That they went on their several ways with a good deal of disdain of people like ourselves; they did not care whether they took us with them, or left us behind them.

Theaet. How do you mean?

Str. I mean to say, that when they talk of one, two, or more elements, which are or have become or are becoming, or again of heat mingling with cold, and in some other part of their works assume separations and combinations of them, — tell me, Theaeteetus, do you understand what they mean by these expressions? When I was a younger man, I used to fancy that I understood quite well what was meant by the term " not-being," which is our present subject of dispute; and now you see in what a perplexity we are landed.

Theaet. I see.

Str. And very likely we have been getting into the same difficulty about " being," and yet may fancy that when anybody utters the word, we understand him and are in no difficulty, although we still admit

that we are ignorant of not-being, when the truth is, that we are equally ignorant of both.

Theaet. I dare say.

Str. And the same may be said of all the subjects of the previous discussion.

Theaet. True.

Str. Most of them may be deferred for the present; but we had better now consider the chief captain and leader of them.

Theaet. I suppose that you are speaking of being, and you want to take this first, and discover what they mean who use the word?

Str. You follow close at my heels, Theaetetus. For the right method, I conceive, will be to call into our presence and interrogate the dialectic philosophers. To them we will say, "O ye, who speak of hot and cold, or of any other two principles of which the universe consists, what term is this which you apply to both of them, and what do you mean when you say that both and each of them are? How are we to understand the word "are?" Are we to suppose that there is a third principle over and above the other two, and that there are three in all, and not two, according to your notions? For clearly you can not say that one of the two principles is being, and yet attribute being equally to both of them; for, whichever of the two is identified with being, they would be one and not two."

Theaet. Very true.

Str. You mean, then, to call the sum of both of them "being?"

Theaet. I suppose so.

Str. Then, friends, we shall reply to them, the answer to that is plainly that the two will thus be resolved into one.

Theaet. Most true.

Str. Since, then, we are in a difficulty, please to tell us what you mean, when you speak of being; for there can be no doubt that you always from the first understood your own meaning, whereas we once thought that we understood you, but now we are in a great strait. Please to begin by explaining this matter to us, and let us no longer fancy that we understand you, when we entirely misunderstand you. There will be no impropriety in our thus inquiring either of the dualists or of the pluralists?

Theaet. Certainly not.

Str. And what about the assertors of the all and one — must we not endeavor to ascertain from them what they mean by "being?"

Theaet. By all means.

Str. Then let us ask a question of them: — One, you say, alone is? Yes, they will reply.

Theaet. True.

Str. And, again, being is?

Theaet. Yes.

Str. And is being the same as one, and do you apply two names to the same thing?

Theaet. What will be their answer to that, Stranger?

Str. It is clear, Theaetetus, that he who asserts the unity of being will find a difficulty in answering this or any other question.

Theaet. How is that?

Str. To admit of two names, and to affirm that there is nothing but unity, is surely ridiculous?

Theaet. Certainly.

Str. And equally irrational to admit that a name has any real existence?

Theaet. How is that?

Str. If the name is distinguished from the thing, that supposes two things.

Theaet. Yes.

Str. And yet he who identifies the name with the thing will be compelled to say that the name is of nothing, or if he says that the name is of something, then the name will be the name of a name, and of nothing else.

Theaet. True.

Str. The one in the same way will be only one of one, and although absolute unity, will be of a mere name.

Theaet. Certainly.

Str. And would they say that the whole is other than the one being, or the same with it?

Theaet. To be sure they will and do say that.

Str. If the one is a whole, as Parmenides sings, —

> "Every way like the fulness of a well-formed sphere,
> Equally balanced from the centre on every side,
> And must needs be neither greater nor less,
> Neither on this side nor on that —"

then being has a centre and extremes, and, having these, must also have parts.

Theaet. True.

Str. And that which has parts may have the attribute of unity in all the parts, and in this way being all and a whole, may be one?

Theaet. Certainly.

Str. But that of which this is the condition can not be absolute unity?

Theaet. How is that?

Str. Because, according to right reason, that which is absolutely one ought to be affirmed to be indivisible.

Theaet. Certainly.

Str. But this indivisible, if made up of parts, will contradict reason.

Theaet. I understand.

Str. Shall we say that being is one and a whole only as having the attribute of unity? Or shall we say that being is not a whole at all?

Theaet. That is a hard alternative to offer.

Str. Most true; for being having in a certain sense the attribute of unity, is yet proved not to be the same as unity, and the all is therefore more than one.

Theaet. Yes.

Str. And yet if being be not a whole in having the attribute of one, and there being such a thing as an absolute whole, then being lacks something of the nature of being?

Theaet. Certainly.

Str. Upon this view, again, being having a defect of being, will become not-being?

Theaet. True.

Str. And, again, the all becomes more than one, for being and the whole will each have their separate nature.

Theaet. Yes.

Str. But if the whole does not exist at all, all the previous difficulties remain the same, and there will be the further difficulty, that besides having no existence, being can never have come into existence.

Theaet. Why is that?

Str. Because that which comes into existence always comes into existence as a whole, so that he who does not give whole a place among existences, can not speak either of essence or generation as being.

Theaet. Yes, that certainly appears to be true.

Str. Again; how can that which is not a whole have any quantity? For that which is of a certain quantity must necessarily be of that quantity taken as a whole.

Theaet. Exactly.

Str. And there will be innumerable other points,

each of them involving infinite perplexity to him who says that being is either one or two.

Theaet. The difficulties which are already appearing prove this; for one objection connects with another, and they are always increasing in difficulty and eliciting fresh doubts about what has preceded.

Str. We are far from having exhausted the more exact thinkers who treat of being and not-being. But let us be content to leave them, and proceed to view those who speak less precisely; and we shall find as the result of all, that the nature of being is quite as difficult to comprehend as that of not-being.

Theaet. Then now we are to go to the others.

Str. There appears to be a sort of war of Giants and Gods going on among them; they are fighting about the nature of essence.

Theaet. How is that?

Str. Some of them are dragging down all things from heaven and from the unseen to earth, and seem determined to grasp in their hands rocks and oaks; of these they lay hold, and are obstinate in maintaining, that the things only which can be touched or handled have being or essence, because they define being and body as one, and if any one says that what is not a body exists they altogether despise them, and will hear of nothing but body.

Theaet. I have often met with such men, and terrible fellows they are.

Str. And that is the reason why their opponents cautiously defend themselves from above, out of an unseen world, mightily contending that true essence consists of certain intelligible and incorporeal ideas; the bodies of the materialists, which are maintained by them to be the very truth, they break up into little bits by their arguments, and affirm them to be generation and not essence. O, Theaetetus, there is an end-

less war which is always raging between these two armies on this ground.

Theaet. True.

Str. Let us ask each of them, in turn, to give an account of that which they call essence.

Theaet. How shall we get that out of them?

Str. With those who make being to consist in ideas, there will be less difficulty, for they are civil people enough; but there will be very great difficulty, or rather an absolute impossibility, in arguing with those who drag everything down to matter. I will tell you what I think that we must do.

Theaet. What is that?

Str. Let us, if we can, really improve them; but if this is not possible, let us imagine them to be better than they are, and more willing to answer in accordance wih the rules of argument, and then their opinion will be more worth having; for that which better men acknowledge has more weight than that which is acknowledged by inferior men. And we are no respecters of persons, but seekers of the truth.

STATESMAN

THE REIGN OF CRONOS

THE Statesman is a companion piece to the Sophist, which it much resembles in style and manner of treatment. It contains a picture of the ideal statesman or ruler who is "set over against" his rival, the mere politician. The true king or statesman is the superior of his fellow citizens, and governs them by knowledge and not by power. His rule is better than that of the law: for the law is fixed and unbending, whereas the individual can allow himself to be guided by circumstances. But since this "king by nature" is scarcely or never to be found among men, they prefer to submit to one of the various "imperfect forms of government."

There was an age, however, when mankind was ruled in the true sense of the word. This was in the time of Cronos, those happy days during which the human race lived in Paradisiacal innocence under the government of Divine Shepherds, who were appointed by Cronos himself. Our present and far inferior state is due to the revolutions of the Universe.

In the beginning, the course of the world was guided by the hand of God; but when the appointed number of generations had been born from the earth and had returned again to her, the Creator ceased His directing care; the Universe fell to chaos, and all living creatures perished. A new race succeeded; the evil which is inherent in matter reasserted itself, and the world went from bad to worse, until the Creator at last again interposed, and restored order to creation. At the same time He introduced a new principle of life; the earth no longer brought forth men and animals, but they reproduced their species, each after their kind. Men were at first poor and helpless; gradually, however, by the aid of the Gods, they learned the arts of life and formed themselves into communities.

In this remarkable myth Plato, while adding confirmation by the example of the rule of Cronos to the argument respecting the true nature of government, is also enabled to set forth in a poetical form his solution of two different problems which seem to have been a frequent subject of his thoughts — (1) the existence of evil, and (2) the growth of human society.

(1) He is sorely perplexed, as men have been in all ages, by the existence of evil in the Universe. He saw everywhere the marks of design; yet the efforts of the Designer appeared liable to be thwarted by some malignant influence. And this power or principle of evil he supposed to be, not a " Prince of Darkness," who was opposed on almost equal terms to the Deity, but an inherent quality of matter, against which even the Creator was not wholly able to contend. Hence also he was led to place between the Creator and the Creation an intermediate order of divine beings who execute " their Father's will in the best and wisest manner which they can."

(2) The growth of civilization was a subject of much curiosity to the Greeks. Their lively and reflective minds were deeply stirred by what they were able to learn of the ancient history of the East and of Egypt. They felt how truly they might be called a " race of children; " for their national history was brief and hardly more than a mass of inconsistent legends and traditions, while the Egyptian priests could recite to Herodotus the

names of "330 kings who reigned in Egypt between the days of Menes and his own time." Moreover, short and imperfect as was their knowledge of the events of the past, they were well aware that great revolutions had happened, and that kingdoms which had once been powerful had fallen into decay, while others had succeeded in their place.

They were easily led, therefore, to the conclusion that "there had been many destructions of mankind," and that civilization had grown up by slow and painful efforts among the survivors of some deluge or other catastrophe, such as had become familiar to their minds from the legends of the deluges of Ogyges and Deucalion or the destruction of the earth by Phaëthon. Plato recurs once more to this subject in the Third Book of the Laws, where we shall find him treating of the manner in which the several forms of government may be supposed to have developed among men.

The conversation is between the Eleatic Stranger of the "Sophist" and the younger Socrates, who is not a relation of his namesake.

Str. LET us make a beginning, and travel by a different road.

Y. *Soc.* What road?

Str. I think that we may have a little amusement; there is a famous tale, of which a good portion may with advantage be interwoven, and then we may resume our series of divisions, and proceed along that path until we arrive at the summit or desired end. Shall we do as I say?

Y. *Soc.* By all means.

Str. Listen, then, to a tale which a child would love to hear, and you are not too old to be amused as a child.

Y. *Soc.* Let me hear.

Str. There did really happen, and will again happen, like many other events of which ancient tradition has preserved the record, the portent which is traditionally said to have occurred in the quarrel of Atreus and Thyestes. You remember what that was?

Υ. *Soc.* I suppose that you mean the token of the golden lamb?

Str. No, not that; but another part of the story, which tells how the sun and the stars rose in the west, and set in the east, and that the god reversed their motion, and gave them that which they have at present as a testimony to the right of Atreus.

Υ. *Soc.* Yes; that is certainly related.

Str. Again, we have been often told of the kingdom of Cronos.

Υ. *Soc.* Yes, very often.

Str. Did you ever hear that the men of former times were earth-born, and not begotten of one another?

Υ. *Soc.* Yes, that is also an old tradition.

Str. All these stories, and ten thousand others which are still more wonderful, have a common origin; many of them have been lost in the lapse of ages, or exist only as fragments; but the origin of them is what no one has told, and may as well be told now; for the tale is suited to throw light on the nature of the king.

Υ. *Soc.* Very good; and I hope that you will give the whole story, and leave out nothing.

Str. Listen, then. There is a time when God goes round with the world, which he himself guides and helps to roll; and there is a time, on the completion of a certain cycle, when he lets go, and the world being a living creature, and having originally received intelligence from its author and creator, turns about and revolves in the opposite direction.

Υ. *Soc.* Why is that?

Str. Why, because only the most divine things of all are unchangeable, and body is not included in this class. Heaven and the universe, as we have termed them, although they have been endowed by the

Creator with many glories, partake of a bodily nature, and therefore can not be entirely free from perturbations. But the heavenly motion is, as far as possible, single and in the same place, and in relation to the same; and is therefore only subject to a reversal, which is the least alteration possible. For the lord of all moving things is alone able to move of himself; and to think that he can go at one time in one direction and at another time in another, is unlawful. Hence we must not say that the world is either self-moved always, or that the universe is made to go round by God in two opposite courses; or that two Gods, having intelligence, oppose one another in the movement of the world. But as I have already said (and this is the only remaining alternative) the world is guided by an accompanying divine power and receives life and immortality by the appointment of the Creator, and then, when let go again, moves spontaneously, being let go at such a time as to have, during infinite cycles of years, a reverse movement: this is due to exquisite perfection of balance, and the size of the universe; which is the greatest of bodies, and turns on the smallest pivot.

ϒ. *Soc.* All that description seems to be very reasonable indeed.

Str. Let us now reflect upon what has been said, and try to comprehend the nature of this great mythological wonder, which has been called by us, and assuredly is, the cause of the other wonders.

ϒ. *Soc.* To what are you referring?

Str. To the reversal of the motion of the universe.

ϒ. *Soc.* How was that the cause of the others?

Str. Of all changes in the heavens, this is to be deemed the greatest and mightiest.

ϒ. *Soc.* I should imagine that.

Str. And may be supposed to have resulted in the

greatest changes to the human beings who were the inhabitants of the world at the time.

ϒ. *Soc.* That, again, is not unlikely.

Str. And animals, as we know, are seriously affected by great changes of many different kinds happening together.

ϒ. *Soc.* Very true.

Str. Hence there necessarily occurred a great destruction of them, which extended also to the life of man; few survivors of the race were left, and those who remained became the subjects of several novel and remarkable phenomena, and of one in particular, which is simultaneous with the revulsion, and took place at the time when the transition was made to the cycle opposite to that in which we live.

ϒ. *Soc.* What was that?

Str. The life of all animals first came to a stand, and the mortal nature ceased to be or look older, and was then reversed and grew young and delicate; the white locks of the aged darkened again, and the cheeks of the bearded man became smooth, and he was restored to his original youth; the bodies of the young grew finer and smaller, continually by day and night returning and becoming assimilated to the nature of a newly-born child in mind as well as body; in the succeeding stage they wasted away and wholly disappeared. And the bodies of those who had died by violence quickly passed through the like changes, and in a few days were no more seen.

ϒ. *Soc.* Then how, Stranger, were the animals created in those days; and in what way were they begotten of one another?

Str. It is evident, Socrates, that there was no such thing in the then order of nature as the procreation of animals from one another; the primeval race, who were given back from the earth, was the one then in

existence; and of this tradition, which is now-a-days often unduly discredited, our ancestors, who came into existence immediately after the end of the first period and at the beginning of this, are the heralds to us. For mark how consistent the sequel of the tale is; after the return of age to youth, follows the return of the dead, who are lying in the earth, to life; the wheel of their existence has been turned back, and they come together and rise and live in the opposite order, unless God has carried any of them away to some other lot. And these are the so-called earth-born men who, according to the tradition, of necessity came into existence, and this is the explanation of the term.

Υ. *Soc.* Certainly that is quite consistent with what has preceded; but let me interrupt you to ask whether the life which you said existed in the reign of Cronos was in that cycle of the world, or in this? For the change in the course of the stars and the sun might certainly have occurred in either.

Str. I see that you enter into my meaning; — no, that blessed and spontaneous life does not belong to the present cycle of the world, but to the previous one, in which God superintended the whole revolution of the universe; and the parts of the universe were distributed under the rule of certain inferior deities, which is the way in some places still. There were demigods, who were the shepherds of the various species and herds of animals, and each one was in all respects sufficient for those of whom he was the shepherd; neither was there any violence, or devouring of one another, or war or quarrel among them; and I might tell of ten thousand other blessings, which belonged to that dispensation. Now, the reason why the old fable speaks of the spontaneous life of man is as follows. In those days God himself was their

shepherd, and ruled over them, just as man, who is by comparison a divine being, still rules over the animals. Under him there were no governments or separate possessions of women and children. For all men rose again from the earth, having no memory of any past events; and they had no property or families, but the earth gave them abundance of fruits, which grew on trees and shrubs unbidden, and were not planted by the hand of man. And they dwelt naked, and mostly in the open air, for the temperature of their seasons was mild; and they had no beds, but lay on soft couches of grass, which grew plentifully out of the earth. Such was the life of man in the days of Cronos, Socrates; the character of our present life, which is said to be under Zeus, you know from your own experience. Can you, and will you, determine which of them you deem the happier?

ϒ. *Soc.* I can not.

Str. Then shall I determine for you as well as I can?

ϒ. *Soc.* By all means.

Str. Suppose that the children of Cronos, having this boundless leisure, and the power of holding intercourse, not only with men but with the animal creation, had used all these advantages with a view to philosophy, conversing with the animals as well as with one another, and learning of every nature which was gifted with any special power, and was able to contribute some special experience to the store of wisdom, there would be no difficulty in determining which was the happier. Or, again, if they had merely eaten and drunk until they were full, and told stories to one another, and to the animals — such stories as are now told of them — in this case also, as I should imagine, the answer would be easy. But as there is no satisfactory reporter of the desires and thoughts

of those times, I think that we must leave the question unanswered, and go at once to the point of the tale, and then we will proceed on our journey.

In the fulness of time, when the change was to take place, and the earth-born race had all perished, and every soul had fallen into the earth and been sown her appointed number of times, the governor of the universe let the helm go, and retired to his place of view; and then Fate and innate desire reversed the motion of the world. Then, also, all the other deities who share the rule of the supreme power, being informed of what was happening, let go the parts of the world of which they were severally the guardians. And the world turning round with a sudden shock, having received an opposite impulse at both ends, was shaken by a mighty earthquake, producing a new destruction of all manner of animals. After a while the tumult and confusion and earthquake ceased, and the universal creature, once more at peace, attained to a calm, and settled down into his own orderly and accustomed course, having the charge and rule of himself and of all other creatures, and remembering and executing the instructions of the Father and Creator of the world, more particularly at first, but afterwards with less exactness.

The reason of the falling off was the admixture of matter in the world; this was inherent in the primal nature, which was full of disorder, until attaining to the present cosmos or order. From God, the constructor, the world indeed received every good, but from a previous state came elements of violence and injustice, which, thence derived, were implanted in the animals. While the world was producing animals in unison with God, the evil was small, and great the good which worked within, but in the process of separation from him, when the world was let go, at

first all proceeded well enough; then, as time went on, there was more and more forgetting, and the old discord again entered in and got the better, and burst forth; and at last small was the good, and great was the admixture of the elements of evil, and there was a danger of universal ruin of the world and the things in the world. Wherefore God, the orderer of all, seeing that the world was in great straits, fearing that all might be dissolved in the storm, and go to the place of chaos and infinity, again seated himself at the helm; and reversing the elements which had fallen into dissolution and disorder when left to themselves in the previous cycle, he set them in order and restored them, and made the world imperishable and immortal.

And this is the whole tale, of which the first part will suffice to illustrate the nature of the king. For when the world returned to the present cycle of generation, the age of man again stood still, and another change was the result. The small creatures which had almost disappeared grew in stature, and the newly-born children of the earth became grey and died and sank into the earth again. All things changed, imitating and following the condition of the universe, and agreeing with that in their mode of conception and generation and nurture; for no animal was any longer allowed to come into being in the earth through the agency of other creative beings, but as the world was ordained to be the lord of his own progress, in like manner the parts were ordained to grow and generate and give nourishment, as far as they could, of themselves, impelled by a similar movement.

And so we have arrived at the real end of this discourse; for although there might be much to tell of the lower animals, and of the reasons and causes of

their changes, about men there is not much, and that little is more to the purpose. Deprived of the care of God, who had possessed and tended them when, in process of time, most of the animals who were by nature intractable had grown wild, they were left helpless and defenceless, and were torn in pieces by them; moreover, in the first ages they carried on the struggle for existence without arts or resources; the food which once grew spontaneously had failed, and they knew not how to procure any more, because no necessity had hitherto compelled them. For all these reasons they were in a great strait; wherefore, also the gifts spoken of in the old tradition were imparted to them by the gods, together with the indispensable knowledge and information of their uses; fire was given to us by Prometheus, the arts by Hephaestus and his fellow-worker (Athene), seeds and plants by others. Out of these human life was framed; since the care of the Gods, as I was saying, had now failed men, and they had to order their course of life for themselves, and were their own masters, just like the universal creature, whom they imitate and follow, ever living and being born into the world, at one time after this manner, at another time after another manner.

PHILEBUS

THE FIRST TASTE OF LOGIC. THE ART OF DIALECTIC

The Philebus is one of the more purely metaphysical dialogues of Plato, and was probably composed in his later years. The subject of the work may be briefly said to be, — "Pleasure in relation to Knowledge and to the Good," or, "The place of Pleasure in the life of man." Pleasures are divided into two classes, the pure and the impure kind; the latter have no part in the virtuous life; the former are allowed, but are placed last

in the scale of goods. First comes measure; second, symmetry; third, reason; fourth, knowledge; fifth, the pure pleasures.

The passage which follows does not relate to the principal thesis of the dialogue, but is rather an account of the method in which Plato thinks that such an inquiry should be pursued. This is the "Dialectic" of which we so often hear in the Platonic writings. Yet there is a difference in his language in the Philebus when compared with that which he employs in other works, and especially in the Republic and Symposium. In these dialogues Dialectic is spoken of as the "steps" by which we mount from sensible objects to the contemplation of true being or the eternal beauty. This vague conception is not further explained by Plato in the Republic, and in the Sophist, the Statesman, and the Philebus, he returns to the more prosaic notion of Dialectic which he has already stated in the Phaedrus, where it is said to be the art by which the philosopher is enabled to divide things into their species, "according to the natural formation, where the joint is, not breaking any part as a bad carver might."

It is, therefore, a logical process of division and subdivision, closely analogous to what Aristotle calls his "customary method by which the compound is resolved into the elements or least parts of the whole." This seems to have been merely a passing phase of Plato's philosophy, when in his "warfare on behalf of mind" he felt the necessity, as he himself expresses it, "of having weapons of another make from those which he used before." In the Laws Dialectic occupies a far less important place, and is only the name given to the mode of carrying on the argument by question and answer, which affords a "suitable pastime" for the days of old age.

Soc. Good; and where shall we begin this great and comprehensive battle, in which such various points are at issue? Shall we begin thus?

Pro. How shall we begin?

Soc. We say that the one and many are identified by the reasoning power, and that they run about everywhere together, in and out of every word which is uttered, as they have done in all time present as well as past, and this will never cease, and is not now beginning, but is, as I believe, an everlasting quality

of reason, as such, which never grows old in us. Any young man, when he first tastes these subtleties, is delighted, and fancies that he has found a treasure of wisdom; in the first enthusiasm of his joy he sets (not every stone, but) every thought rolling, now converting the many into the one, and kneading them together, now unfolding and dividing them; he puzzles himself first and above all, and then he proceeds to puzzle his neighbors, whether they are older or younger, or of his own age — that makes no difference; neither father nor mother does he spare; no human being who has ears is safe from him, hardly even his dog, and a barbarian would have no chance with him, if an interpreter could only be found.

Pro. Considering, Socrates, how many we are, and that all of us are young men, is there not a danger that we and Philebus may conspire and attack you, if you speak evil of us? Yet we understand; and if there is any better way or manner of quietly escaping out of all this trumoil and perplexity, and arriving at the truth, we hope that you will guide us into that way, and we will do our best to follow, for the inquiry in which we are engaged, Socrates, is not a small one.

Soc. Not a small one, my boys, as Philebus calls you, and there neither is nor ever will be a better than my own favorite way, which has nevertheless already often deserted me in the hour of need.

Pro. Tell us what that is?

Soc. One which may be easily explained, but is by no means easy of application, and is the parent of all the discoveries of the art.

Pro. Say only what.

Soc. A gift of heaven, which, as I conceive, the gods tossed into the world by the hands of some Prometheus, together with a blaze of fire; and the an-

cients, who were our betters and nearer the gods than we are, handed down the tradition, that all things which are supposed to exist draw their existence from the one and many, and have the finite and infinite in them as a part of their nature: seeing, then, that such is the order of the world, we too ought in all our investigations to assume that there is one idea of everything; this unity we shall be sure to find, and having found, we may next proceed to look for two, if there be two, or, if not, then for three or some other number, subdividing each of these units, until at last the original one is seen, not only as one and many and infinite, but also in some definite number; the infinite must not be suffered to approach the many until the entire number of the species intermediate between unity and infinity has been found out, — then, and not till then, we may rest from division, and all the remaining individuals may be allowed to pass into infinity.

This, as I was saying, is the way of considering and learning and teaching one another, which the gods have handed down to us. But the wise men of our time are either too quick or too slow in conceiving plurality in unity. Having no method, they make their one and many anyhow, and from unity pass at once to infinity, without thinking of the intermediate steps. And this, I repeat, is what makes the difference between the mere art of disputation and true dialectic.

TIMAEUS

1. THE TALE OF SOLON

THE Timaeus is connected by Plato himself with the Republic and the Critias. Socrates is supposed to have recounted on the following day the conversation recorded in the Republic to a circle of friends who have promised to deliver in turn a discourse upon some philosophical topic. The persons named are Timaeus, a citizen of Locri in Italy, Hermocrates, probably the famous Syracusan general, and Critias, the Athenian, who has previously appeared in the Charmides and Protagoras. A fifth member of the group, whose name is not mentioned, is said to have been absent through illness.

We hear nothing of any other auditors, and we miss the dramatic or artistic setting which enhances the effect of the earlier Platonic writings. In these respects the Timaeus seems akin to the Sophist and the Statesman, which it also resembles in the circumstance that Socrates is no longer the chief speaker, but a stranger who has come on a visit to Athens. Here Timaeus is the protagonist, no doubt because, as a native of Southern Italy, he could fitly expound a theory of the Cosmos which was to a considerable extent based upon Pythagorean ideas. His task is to explain how the world came into being, and how man and the animals were created. Before, however, Timaeus commences his speech, Critias relates in outline a story which he proposes to take for his theme on the morrow.

This is the famous legend of Atlantis, the great island which once existed in the Atlantic and afterwards sank beneath the waves. The tale has exercised a curious power of attraction over the imagination, which has lasted almost to our own time: the site of Atlantis has been gravely debated by learned writers, and has formed the subject of many treatises. Yet the story is probably only the birth of Plato's prolific fancy, or rests at most upon a vague tradition of a land beyond the Atlantic which had reached Athens from the Western Mediterranean. For it is not unreasonable to suppose that the nations who lived upon the verge of the great ocean may have dreamed of a "New World" on the other side, which their fancy would paint in bright and alluring colors as the seat of an ancient and primitive civilization. And it is even possible that the adventurous Phoenicians may have gained a knowledge of one or more of the Atlantic islands which

would gradually come to the ears of the Greek sailors and merchants.

However this may be, the object of Plato in narrating the legend is clearly enough indicated by him. He wishes to picture, as he himself says, "the ideal state engaged in a conflict with her neighbors, and showing by her actions and the magnanimity of her words a result worthy of her training." He invents, therefore, an imaginary Athenian commonwealth which is supposed to have existed many centuries ago, and to have waged a victorious war with the people of Atlantis. This is at the same time an allegory or another version of the unceasing struggle between the Hellenes and the Barbarian, which so greatly occupied the Greek mind; and Plato's use of the legend may be compared to the manner in which Herodotus turns the ancient myth into a prelude of the Persian War.

Atlantis is the typical Barbarian power, like Babylon or Egypt, full of luxury and vain pomp and glory; while Athens is the Hellenic state, "endowed with slender means," but strong in the virtue and patriotism of its citizens. The conflict is unequal; yet the issue is not doubtful. Hellenic valor and discipline prevail, as they did when the Athenians and their allies triumphed over the unwieldy hosts of Persia on the plains of Marathon, or when Xenophon led the Ten Thousand through the heart of the Persian empire to the shores of the Pontus.

Crit. THEN listen, Socrates, to a strange tale which is, however, certainly true, as Solon, who was the wisest of the seven sages, declared. He was a relative and a great friend of my great-grandfather, Dropidas, as he himself says in several of his poems; and Dropidas told Critias, my grandfather, who remembered and told us: — That there were of old great and marvellous actions of the Athenians, which have passed into oblivion through time and the destruction of the human race, and one in particular, which was the greatest of them all, the recital of which will be a suitable testimony of our gratitude to you, and also a hymn of praise true and worthy of the goddess, which may be sung by us at the festival in her honor.

Soc. Very good. And what is this ancient famous action of which Critias spoke not as a mere legend, but as a veritable action of the Athenian state, which Solon recounted?

Crit. I will tell an old-world story which I heard from an aged man; for Critias was, as he said, at that time nearly ninety years of age, and I was about ten years of age. Now the day was that day of the Apaturia which is called the registration of youth, at which, according to custom, our parents gave prizes for recitations, and the poems of several poets were recited by us boys, and many of us sang the poems of Solon, which were new at the time. One of our tribe, either because this was his real opinion, or because he thought that he would please Critias, said that in his judgment Solon was not only the wisest of men, but also the noblest of poets. The old man, as I very well remember, brightened up at this and said, smiling: Yes, Amynander, if Solon had only, like other poets, made poetry the business of his life, and had completed the tale which he brought with him from Egypt, and had not been compelled, by reason of the factions and troubles which he found stirring in this country when he came home, to attend to other matters, in my opinion he would have been as famous as Homer or Hesiod, or any poet.

And what was the poem about, Critias? said the person who addressed him.

About the greatest action which the Athenians ever did, and which ought to have been the most famous, but which, through the lapse of time and the destruction of the actors, has not come down to us.

Tell us, said the other, the whole story, and how and from whom Solon heard this veritable tradition.

He replied: — At the head of the Egyptian Delta, where the river Nile divides, there is a certain dis-

trict which is called the district of Sais, and the great city of the district is also called Sais, and is the city from which Amasis the king was sprung. And the citizens have a deity who is their foundress; she is called in the Egyptian tongue Neith, and is asserted by them to be the same whom the Hellenes called Athene. Now the citizens of this city are great lovers of the Athenians, and say that they are in some way related to them.
